At Port Moody the ratepayers have sanctioned an agreement between themselves and a company formed to build and repair ships. The plant was in process of erection, and officials of the firm stated that the first completed ship would be ready for sea in nine months.

Several new companies have been formed to handle various departments of the lumber business and its by-products. A moving picture concern has also been established.

Taking the industrial situation as a whole it was a little brighter, but there was more labour available than was needed to meet any demands which were in prospect.

Vancouver.

(Woman correspondent.)

The improvement reported for February and March in labour conditions for women was maintained during April, the months of February, March and April of this year comparing favourably with the corresponding months of 1915.

The opening on April 1 of the new premises of the Hudson Bay Company provided employment for about 120 women and girls, that number being added to the regular staff. Some were taken into the office, some were required for the telephone exchange, but the majority were needed as sales clerks.

Arrangements are being made to employ women in place of men for the picking and packing of fruit during the coming season, both on Vancouver Island and in and around Mission Junction. The strawberry picking will commence in June, and women and girls were being advertised for, a committee consisting of representatives of the British Columbia Consumers' League and other societies, acting in conjunction with the Secretary of the New Westminster Free Employment Bureau, being in charge of the arrangements to obtain the labour.

The demand for domestic help re-

mained steady during the month, but employment agencies reported a decrease in the supply, some difficulty being experienced in filling all positions offered with skilled help. A decrease was also noted in the number of young women or girls seeking employment along this line, now that other lines of work in factory or store are opening for them. The long hours of labour and the lack of time for recreation and social intercourse is the reason given by most young women and girls for not taking up domestic employment when other work, in store, factory or office, can be obtained. Wages offered during the last month for domestic help ranged from \$15 to \$25 per month.

Milliners, dressmakers and tailoresses were fully employed. Laundry workers were not fully occupied. Garment workers, boot and shoe workers, candy workers and women and girls employed in knitting factories were all fully employed, boot and shoe workers on a Government order working overtime.

A slight increase in the demand for stenographers and office help was noted, the salaries offered remaining at an average of \$40 per month.

Trained nurses and school teachers were fairly well employed.

Victoria.

With the exception of the building trades and unskilled workmen, labour was fairly well employed during April, and conditions compared very favourably with those of a year ago.

The amount spent for relief by the Friendly Help Society during March was less than for some months past, being a little more than \$300.

At the annual meeting of the Victoria Board of Trade, recently held, reports were presented dealing with business and industrial conditions. The outlook for trade and commerce was said to be better than for a year or two past.

Owing to backward weather conditions, farming operations and fruit-growing are from two weeks to a month later than most other years.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS DURING APRIL, 1916.

DURING the month of April there were two applications received in the Department under the Industrial Disputes Investigation Act, one from certain employees of the Canadian Pacific Railway Company and the other from the telegraphers employed by the Western Associated Press, Limited, of Winnipeg, Manitoba. A report was also received from the Board appointed to inquire into certain matters in dispute between the Toronto, Hamilton and Buffalo Railway and the employees of their locomotive and car department at Hamilton.

Applications Received.

On April 13 an application for a Board was received from the freight handlers employed by the Canadian Pacific Railway Company at Winnipeg, Manitoba, members of Local No. 12,

Brotherhood of Railroad Freight Handlers, to the number of 200 directly and 1,000 indirectly. The application gave as the cause of the dispute the employees' demand for increased wages, reduction of working hours and improved conditions of employment. No Board was established as the Department was informed on April 25, on behalf of both parties concerned, that a satisfactory settlement had been arrived at.

On April 13 an application was received from the telegraphers, members of the Canadian Leased Wire Division No. 52 of the Commercial Telegraphers' Union of America, employed by the Western Associated Press, Limited, of Winnipeg, Manitoba. The application gave as the cause of the dispute the employees' demand for increased wages. At the close of the month the matter was under consideration by the Minister of Labour.

REPORT OF BOARD IN DISPUTE BETWEEN THE TORONTO, HAMILTON AND BUFFALO RAILWAY COMPANY, AND ITS EMPLOYEES IN THE LOCOMOTIVE AND CAR DEPARTMENT.

THE Minister received on May 1 the unanimous report of the Board of Conciliation and Investigation which had been appointed to inquire into certain matters in dispute between the Toronto, Hamilton and Buffalo Railway Company and the employees in its locomotive and car department at Hamilton, Ontario, being members of the Toronto, Hamilton and Buffalo System Federation, No. 36, International Association of Machinists and Helpers, No. 414, International Brotherhood of Boilermakers and Iron Shipbuilders and Helpers, No. 421, and the Brotherhood

of Railway Carmen of America, No. 94. The application stated that the dispute in question grew out of the employees' demand for a schedule of agreement, providing for increased wages, shorter hours, and improved working conditions. The number of employees affected was given as 105 directly and 12 indirectly.

The Board which dealt with this matter was established by the Minister on March 13, and was composed as follows: His Honour Judge Colin G. Snider, Hamilton, Ontario, chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board; Mr. George

S. Kerr, Hamilton, Ontario, appointed by the employing company; and Mr. James Simpson, Toronto, Ontario, appointed on the recommendation of the employees concerned.

In its report the Board stated that it had been unable to secure an agreement between the parties concerned on any of the matters at issue, and it accordingly submitted a scale of wages and working hours, which is recommended should be made effective for one year from the first day of March, 1916. The Board also made recommendations regarding overtime and the appointment of a committee of five to discuss grievances with the company.

Report of Board.

The text of the report of the Board in this matter is as follows:

Hamilton, April 28, 1916.

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, and in the matter of a dispute between the Toronto, Hamilton and Buffalo Railway Company, employer, and its employees in the locomotive and car departments, employees.

To the Honourable
the Minister of Labour,
Ottawa.

The Board of Consultation and Investigation appointed in relation to the differences between the employer and employees herein proceeded, pursuant to appointment, to hear the parties and their witnesses and agents at the Court House, in the City of Hamilton, at 10 a.m., on Monday the tenth day of April, 1916, and continued in session on the 10th, 11th, 12th, 15th, 25th and 28th days of April.

Mr. F. F. Backus, the general manager, and Mr. W. T. Keïllor, superintendent of motive power of the T. H.

& B. Ry. Co., appeared for the employer, and Messrs. Roderick Dingwall, Frank R. Snyder and William G. Powlesland represented the employees.

The increase in wages asked by the employees was the first matter in difference that was considered. The employer had offered a material increase in the scale of wages, though not as much as the employees asked. The scale of wages asked by the employees is very considerably higher than is being paid by any railway company operating in Canada, and in this the employees appear to be influenced to a considerable extent by the high wages munitions plants have to pay.

The Board was unable to secure an agreement between the parties as to wages, though an earnest and repeated effort was made to do so. It, however, seemed probable that if this were the only dispute between them, an agreement between the employer and employees, not only as to wages but also as to hours of work and overtime, might have been secured.

There was no appearance of bitter feeling or ill-will of any kind between them; on the contrary, between the company and the employees very amicable relations seemed to exist.

The chief difference appears to be as to the adoption by the employer of a standardized set of rules and regulations such as most of the large railway companies have agreed to. The general manager and the superintendent of motive power of the employing company most emphatically refused to agree to or even consider the adoption of this schedule of rules and regulations, and it was evident throughout the proceedings that they could not be induced to yield on this point.

The reasons given by the employer's representatives for this refusal were as follows: that this railway is a very small one and has only this one shop in which only a few men in each craft are employed, and that with these men the employer cannot deal as the large

railways do; that the employer makes shop rules and regulations suitable to their own limited works, and which they claim are fair to their men; that the standardized schedule proposed by the employees includes provisions for conditions that do not and cannot exist in a shop on a small road such as the employer operates; that this shop has all grades of work to be done but not enough of each grade to enable the company to employ specialists at lower wages on the operations requiring less skill, and consequently part of the time of their fully qualified mechanics is put on cheap work; that the shop is not equipped for, or expected to undertake, except in rare emergency cases, the heavy blacksmithing work, nor in any case the finer carpenter work on the best coaches; that all such work is, as a regular practice, paid for by the employer in larger shops of other companies; that when an emergency case is forced on this shop the superintendent has to do the best he can to meet it with the men and facilities he has; that for these reasons the schedule of rules adopted by the Canadian Pacific Railway, which is contended for by the employees and is workable in the large shops of that great railway, is not suitable or at all workable on this employer's single small shop.

After hearing all the witnesses called, and after considering the documents and schedules of wages and hours put in, and having heard the contentions and arguments of the representatives of the employer and of the employees, the Board reports that it could not secure an agreement between the parties to the proceeding on any of the matters in dispute, and the Board recommends the following scale of wages and hours of work per day for adoption by the employer for the period of one year commencing on the first day of March, 1916, and to continue after the end of such year until terminated by 30 days' notice in writing, and further recommends for adoption by the employer the regula-

tions as to overtime and presentation of requests or grievances by any of the employees hereinafter written.

Schedule of Wages Recommended.

	cents per hour.
Machinist	36 "
Helper	20-22 "
Boilermaker	36 "
Helper	20-22 "
Blacksmith	31-36 "
Helper	22 "
Tinner	28-30 "
Helper	25 "
Pipe fitter	25-34½ "
Helper	22 "
Carpenter	26-30 "
Car repairer	20-22 "
Car inspector	\$70-\$75 per month.
Helpers	20 per hour.
Car cleaners	20 "

Hours of Work per Day and Overtime.

For machinists, boilermakers and blacksmiths in the backshop, a day's work, excepting Saturdays and Sundays, shall be 7 a.m. to noon, and 1 p.m. to 5 p.m. Saturdays, 7 a.m. to noon.

For employees in shop and running work in car department, a day's work, excepting Saturdays and Sundays, shall be 7 a.m. to noon and 1 p.m. to 6 p.m.; Saturdays, 7 a.m. to noon, excepting for car inspectors, car inspectors' helpers and car cleaners, who shall continue to work the same hours on Saturday as at present.

Overtime shall be paid at the rate of time and a half.

In case any one or more of the employees has or have any grievance, complaint, request or suggestion which it is desired to bring before and discuss with the employer, the employees may appoint a committee of themselves of the trades affected not exceeding five in number who shall have the right to wait upon and shall be received by the management of the company at any reasonable time for the purpose of discussing such matter with a view to an amicable adjustment thereof. This shall not limit or interfere with the right of any em-

ployee to personally bring his grievance, complaint, request or suggestion to the management without the intervention of a committee.

And the Board further reports that it cannot recommend the adoption of the schedule of rules and regulations which the employees ask to have adopted by the employer. No serious objection was made to the employer's rules and regulations in force in its shop other than is covered by the above recommendations. Work done on New Year's

Day, Good Friday, Victoria Day, King's Birthday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day shall be considered overtime.

All of which is respectfully submitted.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) JAMES SIMPSON.

(Sgd.) GEO. S. KERR.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Proceedings for the Fiscal Year 1915-16, and for the Nine Years 1907-1916.

THE Industrial Disputes Investigation

Act of Canada became law on March 22, 1907, and had therefore been in operation nine years at the end of March last. A summary statement is presented in the present issue of the *Labour Gazette* showing the proceedings which have taken place during the year ending March 31, 1916, which, with the tables published in the last annual report of the Registrar of Boards of Conciliation and Investigation under this Act, forms a record of all proceedings thereunder during the nine years which have elapsed since the law came into force.

In all, 191 applications have been received in the nine year period for the establishment of Boards of Conciliation and Investigation under the Act, as a result of which 169 Boards were established. In 22 cases the matters in dispute were adjusted by mutual agreement, whilst steps for the establishment of Boards were pending. The total number of employees affected by these 191

disputes was 246,641, or an average of 1,291 for each dispute.

Of disputes dealt with under the statutes during the nine-year period there were altogether twenty cases in which strikes were neither averted nor ended through its instrumentality. Eleven of these 20 strikes occurred in the mining industry, one in the operation of railways, five in railway offices, shops and yards, two in the operation of street railways, and one in the operation of municipal electrical work.

Seventeen applications received attention during the year ending March 31, 1916, Boards being established in 14 cases. In the remaining three cases proceedings were stayed to permit of negotiations between the parties concerned, which resulted in settlements being effected without the establishment of Boards. The 17 applications were divided as follows: coal mining, two; railways, including railway construction, six; street railways, four; shipping, one; municipal work, two; and the manufac-

ture of war munitions, two. The number of employees concerned in these 17 applications was 15,372, or an average of 904 for each dispute.

Few Board Applications Received.

The number of applications which were received during the fiscal year for the establishment of Boards was 14; three other disputes also receiving attention as the result of Boards established prior to April 1, 1915. The 14 applications referred to are fewer in number than the applications received in any previous year since the Act came into force. As in the later months of the preceding year the period under review was one of very general freedom from labour disputes. This was, of course, due in the main to the war situation. The commercial depression which marked the earlier months of the year was, however, later relieved by a revival of various lines of industry due to the abnormally large grain crop and to the large orders for military materials which were placed in Canada on behalf of the British, Canadian, Russian and French Governments.

Freedom from Strikes.

At the outbreak of the war the Minister of Labour, realizing that the war cause would call for the united support of all classes of the community, appealed to employers and workmen alike for an avoidance of all labour difficulties, and it is most satisfactory to be able to state that there has been during the year a comparative freedom from serious industrial disputes, while there has been an almost entire immunity from public service strikes, the only exception of note being, indeed, that of the brief contest in November, 1915, between the Toronto Hydro-Electric Commission and its employees. The railways of the Dominion were operated during the year without the occurrence of a single strike; this is true also of all street railways and

of all telegraph and telephone lines; also, save for an occasional local disturbance, to the coal mining industries in Eastern and Western Canada. In some of these lines the shortage of labour due to the recruiting for military service was, moreover, very marked toward the end of the year.

Munitions Contracts.

Special attention was naturally given by the Department of Labour to the avoidance and adjustment of labour disputes affecting contracts for the various military materials which were being executed in all parts of the country to the order of the Dominion Government. The Department of Labour also co-operated with the Shell Committee and the Imperial Munitions Board in dealing with any labour questions which arose in connection with the munitions work. Some of the questions arising in this connection naturally related to wages and piece work rates, hours of labour, etc., and were, wherever necessary, investigated on the spot under instructions from the Minister of Labour. One of the chief officers of the Department of Labour was also in constant touch with the Munitions Board in connection therewith.

In the case of a dispute between the Nova Scotia Steel and Coal Company, Limited, and the Eastern Car Company, Limited, and their munition workers at New Glasgow, N.S., and Trenton, N.S., respectively, a strike affecting 2,000 workmen occurred on August 16, 1915. The workmen concerned, however, shortly returned to work and submitted their case to a Board of Conciliation and Investigation established by the Minister of Labour. The unanimous report of the Board was effective in disposing of the various matters at issue, an agreement having previously been signed between the companies and their workmen making the decision of the Board binding upon both parties until the end of the war or so long as the companies were engaged on munitions work.

Another dispute affecting the production of military materials occurred in May, 1915, in connection with the execution of a contract of the Dominion Government with the Ottawa Car Manufacturing Company, Limited, of Ottawa, Ont., for the manufacture of field guns, the machinists engaged on this work being dissatisfied with their remuneration therefor. A Board of Conciliation and Investigation was established by consent of both parties concerned and succeeded in securing an avoidance of the threatened strike.

Act Applied to War Contracts.

On March 23, 1916, an Order-in-Council was passed in the terms following, under the authority of the War Measures Act, to provide that the Industrial Disputes Investigation Act, 1907, shall specifically apply in the case of disputes on war work for the British, Canadian or allied forces in Canada:

"His Royal Highness the Governor General in Council is pleased, in virtue of the War Measures Act, 1914, to order that the provisions of the Industrial Disputes Investigation Act, 1907, other than Section 63 thereof, shall specifically apply in the case of any dispute between employers and any employees engaged in the construction, production, repairing, manufacture, transportation or delivery of ships, vessels, works, buildings, munitions, ordnance, guns, explosives, and materials and supplies of every nature and description whatsoever, intended for the use of His Majesty's military or naval forces or militia, or for the forces of the nations allied

with the United Kingdom in the present war,—if such dispute threatens to result in a strike or lockout."

Transportation and Mining Disputes.

Through the instrumentality of a Board of Conciliation and Investigation an agreement was secured in January, 1916, for the avoidance of a threatened dispute with the longshoremen of St. John, N.B., to the number of 1,135, employed by the various shipping companies. This agreement is effective until December 1, 1919. -

The only coal mining disputes referred under the Act during the year affect the mines of the Intercolonial Coal Mining Company, Limited, of Westville, N. S., and the Acadia Coal Company, Limited, of Stellarton, N.S.

Of the four railway disputes which received attention under the Industrial Disputes Investigation Act, two were settled by direct negotiation between the parties concerned before the Board of Conciliation was established. Serious difficulty threatened for some little time in connection with a dispute between the Canadian Northern Railway Company and the engineers, firemen and enginemen on its Eastern Lines. The unanimous report of the Board in this case was, however, finally accepted by the parties and the matters at issue determined accordingly.

Of the street railway disputes, two occurred in connection with the operation of the British Columbia Railway on the Pacific Coast, and two in connection with the operation of the street railway of Edmonton, Alberta, which is owned and controlled by the civic authorities.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Proceedings 1915-1916.

Statement of Applications for Boards of Conciliation and Investigation and of Proceedings thereunder from April 1, 1915, to March 31, 1916.

A.—MINES, AGENCIES OF TRANSPORTATION AND COMMUNICATION AND OTHER PUBLIC SERVICE UTILITIES.

1. Appointed by the Minister, under Section 8, Sub-section 1, of the I.D.I. Act, on recommendation from party concerned.
2. Appointed by the Minister, under Section 8, Sub-section 2, of the I.D.I. Act, in the absence of a recommendation from party concerned.
3. Appointed by the Minister, under Section 8, Sub-section 3, of the I.D.I. Act, on the joint recommendation of the two members first appointed.
4. Appointed by the Minister, under Section 8, Sub-section 4, of the I.D.I. Act in the absence of a joint recommendation by the two members first appointed.

I. MINING AND SMELTING INDUSTRY.

1. COAL MINES

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality.	No. persons affected.	Nature of dispute.	Names of Members of Board: (c) Chairman; (E) Employer; (M) Men.	Date on which Board was constituted.	Date of receipt of report of Board.	Result of Reference.
1915 Aug. 19	Intercolonial Coal Mining Co., Ltd., and employees.	Employees...	Westville, N.S.	366.....	Concerning wages.....	His Honour Judge W. B. Wallace, (c)3; John MacKeen, (E)1 Simon Lott, (M)1.	1915 Sept. 1	1915 Sept. 17	A unanimous report was presented by the Board making certain recommendations for the settlement of the dispute, which were accepted by both parties concerned.
Nov. 20	Acadia Coal Co., Ltd., and employees.	Employees..	Stellarton, N.S.	430.....	Concerning wages.....	His Honour Judge W.B. Wallace, (c)3 Wm. H. Chase, (E)1; Simon Lott, (M)1.	Nov. 30	Dec. 13	A unanimous report was presented by the Board making certain recommendations for the settlement of the dispute. The award was accepted by the company and was understood to be acceptable also to the employees concerned, the impending strike being thereby averted.

II. TRANSPORTATION AND COMMUNICATION.

1. RAILWAYS.

1915 April 16	Canadian Northern Railway Co. and employees members of Order of Railway Conductors, Brotherhood of Railroad Trainmen, and Order of Railroad Telegraphers.	Employees...	Lines of Canadian Northern Ontario, Bay of Quinte, and B. W. and N. W. Railways.	300 dir... 4,000 indir.	Concerning wages and conditions of employment.	On request of both parties concerned the application was not proceeded with, the matters in dispute having been settled by negotiation.	
May 17	Canadian Northern Railway Co. and employees on its eastern lines, members of Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.	Employees...	Merged lines of Canadian Northern Railway, way east of Port Arthur, Ont.	407 dir... 1,120 indir.	Concerning employees' demand for same rates and rules in force west of Great Lakes.	His Honour Judge Emerson Coatsworth, (c)4; F. H. McGuigan, (a)1; D. Campbell, (m)1.	June 21	Oct. 22	A unanimous report was presented by the Board, accompanied by a proposed schedule of rules and rates effective from November 1, 1915. The award was accepted by the employees concerned and was later accepted by the Company.
June 28	Grand Trunk Pacific Railway Co. and employees, members of International Brotherhood of Maintenance-of-way employees.	Employees...	Lines of Grand Trunk Pacific Railway.	1,800 dir... 1,400 indir.	Concerning termination of working agreement and proposed reduction of wages.	Pending the establishment of a Board the application was withdrawn to permit of further negotiations which resulted in the Company deferring the proposed reduction.	
1916 Feb. 28	Toronto, Hamilton and Buffalo Railway Co. and employees in locomotive and car department, members of T. H. and B. System Federation No. 36, International Association of Machinists and Helpers No. 414, International Brotherhood of Iron Ship Builders and Helpers No. 421, International Brotherhood of Blacksmiths & Helpers No. 330, and Brotherhood of Railway Carmen of America No. 94.	Employees...	Hamilton, Ont.	105 dir... 12 indir.	Concerning wages, hrs, and conditions of employment.	His Honour Judge Colin G. Snider, (c)4; Geo. S. Kerr, K. C. (a)1; Jas. Simpson, (m)1.	1916 Mar. 28	Proceedings unfinished

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Proceedings 1915-1916.

Statement of Applications for Boards of Conciliation and Investigation and of Proceedings thereunder from April 1, 1915, to March 31, 1916.

2. STREET RAILWAYS.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality.	No. persons affected.	Nature of dispute.	Names of Members of Board: (c) Chairman; (e) Employer; (m) Men.	Date on which Board was constituted.	Date of receipt of report of Board.	Result of Reference.
1915 June 29	British Columbia Electric Railway Co. and employees, members of Local Divisions No. 101 Vancouver, No. 109 Victoria, and No. 134 New Westminster. Amalgamated Association of Street and Electric Railway Employees of America.	Employer....	Vancouver, Victoria, and Westminster, B.C.	1,058 ditto; 156 indir.	Concerning proposed reductions in wages and changes in working conditions.	Honourable Mr. Justice W. A. Macdonald, (c)4; A. G. McCandless, (e)1; Jas. H. McVety, (m)1.	1915 July 8	1915 Sept. 7	Report of Board was accompanied by a minority report signed by Mr. McVety. The Company accepted the award but the employees refused to do so. Through the efforts of one of the Departmental officers conferences were arranged between the parties concerned which resulted in an agreement being reached which disposed of all points at issue.
July 19	British Columbia Electric Railway Co. and employees, members of Local Unions No. 213 Vancouver, No. 230 Victoria and No. 558 New Westminster. International Brotherhood of Electrical Workers.	Employees...	Vancouver, Victoria, and Westminster, B.C.	150	Concerning wages, hrs, conditions of employment and alleged unfair dismissals.	Honourable Mr. Justice W. A. Macdonald, (c)4; Jas. A. Harvey, K.C. (e)2; Edmund H. Morrison, (m)1.	Aug. 14	Sept. 15	A unanimous report was presented by the Board and was accompanied by a proposed schedule of rules and rates effective for two years from September 15, 1915. The award was declared acceptable to the employees concerned but was not accepted by the Company.
Aug. 30	City of Edmonton and employees, members of Local Division No. 569, Amalgamated Association of Street and Electric Railway Employees of America.	Employees...	Edmonton, Alberta.	250.....	Concerning cancellation of agreement.				Pending the establishment of a Board the Department was informed that the dispute had been adjusted, an agreement having been entered into by both parties concerned.

1915 Nov. 11	City of Edmonton and employees, members of Local Divisions No. 569, Amalgamated Association of Street and Electric Railway Employees of America.	Edmonton, Alberta.	6 dir... 220 indir.	Concerning alleged discrimination against members of Union, J. E. Wallbridge, (c)3; (E)1; Wm. MacAdams, (M)1.	1915 Dec. 20	1916 Mar. 11	A unanimous report was presented by the Board and was accompanied by an agreement between the parties concerned, disposing of all points at issue except the case of a dismissal, the agreement providing, however, that the Board decision on this point should be final. The finding was to the effect that suspension should be substituted for dismissal.
-----------------	--	--------------------	------------------------	---	-----------------	-----------------	---

3. SHIPPING.

Dec. 20	Certain Steamship Companies trading to the Port of St. John, N.B., comprising Allan Line, C. P. R. Steamship Lines, Elder Dempster and Co., Head Line, New Zealand Shipping Co., Furness Line, Manchester Line, (Furness, Withy and Co.) Robert Reford Co., Donaldson Line, and Royal Mail Steam Packet Co.; also H. S. Gregory and Sons and H. W. Parlee, stevedores and contractors; and Wm. Thomson and Co., Ltd., J. E. Moore and Co., J. T. Knight and Co., W. M. MacKay, Ltd., Geo. McKean and Co., Ltd., J. B. Brand, R. C. Elkin, and Alexander Watson, ship brokers and shippers, and longshoremen, members of Longshoremen's Association of St. John.	Employees... St. John, N.B.	1,135.....	Concerning wages, hrs. and conditions of employment.	1916 Jan. 1	Jan. 24	A unanimous report was presented by the Board, embodying the terms of a proposed agreement effective from January 18, 1916, until December 1, 1919. The award was accepted by the employees and was also declared acceptable on behalf of most of the employers.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.

Proceedings 1915-1916. (Continued.)

Statement of Applications for Boards of Conciliation and Investigation and of Proceedings thereunder from April 1, 1915, to March 31, 1916.

III. MUNICIPAL PUBLIC UTILITIES.

Date of receipt of application.	Parties to Dispute.	Party making application.	Locality.	No. persons affected.	Nature of dispute.	Names of Members of Board: (c) Chairman; (e) Employer; (m) Men.	Date on which Board was constituted.	Date of receipt of report of Board.	Result of Reference.
1915 Mar. 9	City of Calgary & Electrical Workers, members of Local No. 348, International Brotherhood of Electrical Workers.	Employees...	Calgary, Alta.	30.....	Concerning proposed reduction of wages and termination of agreement.	Col. G. E. Sanders, (c)3; R. A. Brown, (e)1; John B. Pegg, (m)1.	1915 April 2	1915 May 5	A unanimous report was presented by the Board, accompanied by an agreement entered into by both parties concerned.
May 26	Toronto Hydro-Electric Commission & Electrical Workers, members of Local No. 353, International Brotherhood of Electrical Workers.	Employees...	Toronto, Ont.	175 dir... 25 indir.	Concerning wages and conditions of employment.	His Honour Judge Emerson Coatsworth, (c)4; F. Erichsen Brown, (e)1; Fred Bancroft, (m)1.	July 2	Aug. 13 Aug. 20	Report of Board was accompanied by a minority report signed by Mr. Brown. The employees signified their acceptance of the majority report. The Commissioners, however, refused to accept the majority report and a strike of the employees took place on November 2, 1915, which continued until November 23, 1915, when the employees returned to work substantially on the terms of the minority report.

1914 Dec. 8	J. D. McArthur and Co., Ltd., contractors, and employees, being workmen employed in the Edmonton, Dunvegan and British Columbia Railway Shops at West Edmonton, Alberta.	Employees...	Edmonton, Alberta.	127.....	Concerning reduction of wages.	Honourable Mr. Justice J. D. Hyndman, (c)3; O. M. Biggar, K.C., (e)1; Wm. MacAdams, (m)1.	1915 Jan. 4	1915 May 20	A unanimous report was presented by the Board in which it was stated that both parties had agreed to abide by the award. The dispute was accordingly settled.
1915 Jan. 14	J. D. McArthur and Co., Ltd., contractors, and employees, being train operatives on the Edmonton, Dunvegan and British Columbia Railway and the Alberta and Great Waterways Railway.	Employees...	Edmonton, Dunvegan, and British Columbia Railway and the Alberta and Great Waterways Railway.	Concerning reduction of wages.	S. A. Dickson, (c)4; O. M. Biggar, K.C., (e)1; D. Campbell, (m)1.	Mar. 16	April 19	A unanimous report was presented by the Board, recommending the restoration of the wages paid prior to the reduction of November 1, 1914. The award was accepted by both parties concerned.
May 28	Ottawa Car Manufacturing Co., Ltd., and machinists, members of Lodge No. 412, International Association of Machinists.	Employees...	Ottawa, Ont.	100.....	Concerning wages and conditions of employment.	Hannet P. Hill, (c)3 Geo. F. Henderson, K.C., (e)1; Jas. Simpson, (m)1.	May 29	June 17	Report of Board was signed by all three members. Mr. Simpson dissenting on one point. The report was accompanied by an agreement entered into by both parties concerned.
Aug. 19	Nova Scotia Steel and Coal Co., Ltd., and Eastern Car Co., Ltd., and employees engaged in the manufacture of munitions of war.	Employees...	New Glasgow and Trenton, N.S.	2,000.....	Concerning reduction of wages.	His Honour Judge Emerson Coatsworth, (c)4; Col. B. A. Weston, (e)1; R. H. Murray, (m)1.	Sept. 1	Sept. 27	Prior to the application the employees had gone out on strike. Both parties were induced to refer their differences under Sec. 63 to a Board and the employees accordingly returned to work. The report of the Board was unanimous and disposed of all matters in dispute, an agreement having been previously signed making the decision of the Board binding upon both parties until the end of the war, or as long as the Companies were engaged on munitions work.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—Summary Statement for Fiscal Year 1915-1916.
TABLE SHOWING PROCEEDINGS UNDER THE ACT FROM APRIL 1, 1915, TO MARCH 31, 1916,

Industries affected.	No. of Disputes referred under Act.	No. of Strikes not averted or ended.
I. Disputes affecting Mines and Public Utilities:		
(1) Mines:		
Coal.....	2	0
(2) Transportation and Communication:		
(a) Railways.....	4	0
(b) Street Railway.....	4	0
(c) Shipping.....	1	0
Total, Transportation and Communication.....	9	0
(3) Municipal Work.....	2	1
Total, Mines and Public Utilities.....	13	1
II. Disputes affecting other than Mines and Public Utilities.....	4	0
Total, all classes.....	17	1

The proceedings under the Act during this year include three cases in which certain proceedings had taken place during the preceding year, namely:— (1) a dispute between J. D. McArthur and Company, Limited, and the train operatives employed on the Edmonton, Dunvegan and British Columbia Railway, and the Alberta and Great Waterways Railway; (2) a dispute between J. D. McArthur and Company, Limited, and railway shopmen employed at West Edmonton, Alberta; and (3) a dispute between the Corporation of Calgary and electrical workers in its employ.

At the close of the fiscal year results were still pending in connection with an application received from the employees of the Toronto, Hamilton and Buffalo Railway Company engaged in the Company's locomotive and car department at Hamilton, Ontario.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—Summary Statement for the Nine Years 1907-1916.
TABLE SHOWING PROCEEDINGS UNDER THE ACT FROM MARCH 22, 1907, TO MARCH 31, 1916.

Industries affected.	No. of Disputes referred under Act.	No. of Strikes not averted or ended.

II.—Disputes affecting other than Mines and Public Utilities.....	12	0
Total, all classes.....	191	20

At the close of March, 1916, results were still pending in connection with an application received from the employee of the Toronto, Hamilton and Buffalo Railway Company engaged in the Company's locomotive and car department at Hamilton, Ontario.

TRADE DISPUTES DURING APRIL, 1916.

SIX trade disputes involving six firms and 1,793 employees were recorded by the Department as having begun during April. There were four disputes affecting four firms and 203 employees carried over from March, making altogether ten trade disputes by which ten firms and 1,996 employees were affected on record as existing during April. Through the four disputes carried over from March the time losses to employees affected thereby was 1,442 working days. The time losses to employees affected by the six new disputes of April amounted to 17,204 working-days, thus giving a total of 18,646 working-days lost as a result of trade disputes in existence during April. The minimum and maximum duration of the new disputes of April was from two to twelve days. Six of the ten disputes were terminated during the month, four being disputes carried over from March and two April disputes. In the case of two of the old disputes no settlement had been reported to the Department, but these were regarded as having ended, though no formal settlement had been reported.

New disputes in April, 1916.—The following table shows the disputes beginning during April according to the trades affected:

TRADES	No. of disputes.	No. of employés involved.
Mining.....	1	1,188
Metal.....	1	39
Woodworking trades.....	1	375
Clothing.....	1	21
Food and tobacco preparation ..	1	130
General transport.....	1	40
Total.....	6	1,793

Disputes beginning before April.

Four of the trade disputes existing in April and carried over from March were terminated during April. In the case of two of these disputes no settlement had been reported, but they were regarded as ended as they had ceased to affect employment conditions. These four disputes were:

Machine operators, Orillia, Ont.—On March 13, 1916, 37 employees of the Fisher Motor Company, Orillia, Ont., ceased work owing to a reduction in piece-work rates. The places of the strikers were filled and operations carried on as usual.

Printers, Quebec, Que.—On February 14, 1916, 20 printers and pressmen, employees of L'Action Sociale Ltée, Quebec, Que., ceased work, the alleged cause being the refusal of the publishing company to grant these employees an increase in wages in accordance with an agreement signed in 1914, by which they were to receive an increase of \$1.50 per week from February 14, 1916. The temporary embarrassment caused by the strike was reported to have been overcome by the firm, and although no settlement was reported to the Department, employment conditions appear to be no longer affected.

Corset makers, Toronto, Ont. — On March 24, 1916, 41 employees of the Bias Corsets, Limited, Toronto, Ont., ceased

work, the alleged cause being the objection of the employees to having their working hours increased without remuneration therefor. An amicable settlement was reached on April 8, the employees accepting the employer's terms.

Cigar makers, Hamilton, Ont. — On March 15, 1916, cigar makers to the number of 105 employed by the Harper Presnail Cigar Company ceased work owing to their demand for an increase of \$1 per 1,000 cigars being refused. An amicable settlement was reached on April 12, whereby the employees were granted the increased rate demanded.

Disputes beginning during April.

Miners, Stellarton, N.S. — On April 18, 1,188 miners in the employ of the Acadia Coal Company, Limited, Stellarton, N.S., went on strike to enforce their demand for increased wages. This dispute was still in existence at the end of the month.

Machine fitters and drill hands, Peterborough, Ont. — Thirty-nine machine fitters and drill hands employed by the Canadian General Electric Company, Limited, at Peterborough, went on strike for increased wages, the company refusing to immediately grant their demands. This dispute was still in existence at the end of April.

Planing mill employees, St. Romuald de Etchemin, Que. — On April 24, 375 employees of the A. Gravel Lumber

Company, Limited, of St. Romuald de Etchemin, Que., went on strike to enforce their demand for an increase in wages of 25 cents per day. The dispute was settled on April 27, the men accepting an increase of 10 cents per day offered by the company.

Leather cutters, Quebec, Que. — On April 13, 21 leather cutters, employees of the Duchaine & Perkins shoe manufacturing establishment at Quebec, ceased work owing to the company refusing their demand for an increase of 25 cents in piece-work rates for cutting horse-hide leather, which the men alleged was of a tougher and inferior quality to cow-hide leather, necessitating more labour and resulting in lost time. The dispute was settled on April 25 through the offices of a Conciliation Board which granted the cutters the 25 cent increase demanded.

Cigar makers, London, Ont. — On April 17, 130 employees of the cigar manufacturing establishment of John McNee & Sons ceased work owing to the company's refusal to dismiss a foreman as demanded by them. The strike was still in existence at the end of April.

Grain shovellers, Fort William, Ont. — On April 28, about 40 grain shovellers employed at elevator "D," operated by the Canadian Pacific Railway Company, ceased work owing to their demand for an increase in wages from 28 cents to 30 cents per hour being refused. The strike was unsettled at the end of the month.

TABLE OF TRADE DISPUTES IN EXISTENCE DURING APRIL, 1916.

Occupation	Locality	Alleged Cause or Object	Number affected		Date of Commencement	Date of Termination	Method of Settlement	Result
			Firms	Employees				

DISPUTES BEGINNING PRIOR TO APRIL, 1916.

<i>Metal—</i> Machine operators	Orillia, Ont.....	Reduction in piece-work rates	1	37	March 13	April —	Strike ineffective; employment conditions not affected	In favour of employers.
<i>Printing & Allied Trades—</i> Printing.....	Quebec, Que.....	Increased wages.....	1	20	Feby. 14	April —	" " " "	In favour of employers
<i>Clothing—</i> Corset makers..	Toronto, Ont....	Alleged increased hours without remuneration	1	41	March 24	April 8	Negotiations	In favour of employers
<i>Food and Tobacco Preparation—</i> Cigar makers..	Hamilton, Ont...	Increased wages.....	1	105	March 15	April 12	Negotiations	In favour of employees

DISPUTES COMMENCING DURING APRIL.

<i>Mining—</i> Miners	Stellarton, N.S...	Increased wages.....	1	1188	April 18	Unsettled.....
<i>Metal—</i> Machine fitters & drill hands	Peterborough, Ont	Increased wages.....	1	39	April 19	April 29	Unsettled

REPORTS OF EMPLOYMENT BUREAUS.

IN March there was a further expansion in the volume of employment as reported by employment bureaus—68 commercial, 11 public and 19 philanthropic. The number of vacancies notified to all these offices was 21,786, a daily average of 1578.58 as compared with 1538.48 in February. The number of persons placed was 11,875, a daily average of 870.81 as compared with 769.32 in February. As to employment for woman workers, the average number of vacancies notified daily to 19 philanthropic employment bureaus (13 Y.W.C.A.'s, 4 women's hostels and 2 miscellaneous) which deal with woman and girl workers only, was 85.20 in March as compared with 76.33 in February. The daily average persons placed was 16.93 in March as compared with 13.12 in the preceding month.

An increased demand was reported by the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—with the single exception of Edmonton. The increases in demand at Vancouver and Montreal were especially noteworthy. There were heavier demands also at Halifax, Quebec, Regina and Calgary, while Fort William and Port Arthur,

Brandon, Saskatoon, New Westminster and Victoria reported declines in the number of workpeople called for. The number of persons who obtained casual employment through the Salvation Army and other agencies was 1,068, a daily average of 39.98 as compared with 35.62 in February. The number of casual jobs secured for them was 2,070, a daily average of 77.34 as compared with 75.43 for the previous month.

CASUAL EMPLOYMENT SUPPLIED BY VARIOUS AGENCIES DURING THE MONTH ENDED MARCH 31, 1916.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS.

EMPLOYMENT in the building trades, as indicated by the value of building permits issued in 30 cities, showed an increase in April as compared with the previous month, the total rising from \$1,422,477 in March to \$3,098,628 in April, an increase of \$1,676,151 or 117.8 per cent. Grouping the returns by provinces, substantial increases are shown in all provinces except British Columbia, where a decrease is indicated. There was, however, a decrease of \$396,371 or 11.3 per cent in the value of building permits issued in these 30 cities in April, as compared with the corresponding month of last year, the

total for April, 1915, being \$3,494,999. This falling off was due to decreases in Nova Scotia, Quebec and Ontario. In New Brunswick, Manitoba, Saskatchewan, Alberta and British Columbia, increases were indicated. Of the larger cities, Montreal and Toronto showed increases in the value of building permits issued in April of this year as compared with March, but decreases as compared with April of last year; Winnipeg showed an increase in April both as compared with the previous month and with April, 1915, while in Vancouver there was a decline in April as compared with March, but an increase as compared with April of last year.

IMMIGRATION—EMIGRATION—COLONISATION.

IN the present article statistics in regard to immigration and emigration are given only for the United States, information respecting the movement of British subjects between the United Kingdom and British North America not having been received.

(2) Movement of Persons other than Citizens of the United States between the United States and British North America.

Immigration to British North America from the United States.—According to the March bulletin of the Bureau of Immigration of the United States Department of Labour, alien residents of the United States to the number of 716 departed to take up permanent residence in British North America during

March, as compared with 929 in February, 1916, and 1,014 in March, 1915.

Immigration from British North America to the United States.—During March, 1916, 8,451 persons (not including citizens of the United States) left British North America to take up permanent residence in the United States, as compared with 7,249 in February and 5,439 in March, 1915.

Balance.—It appears from the above that in this movement between the United States and British North America, the latter had an outward balance of 7,735 in March, 1916, as compared with an outward balance of 6,320 in February, 1916, and 4,425 in March, 1915.

The following statement gives the detailed figures for the first quarter of 1916, with a comparison of figures for the same period in the preceding year:

IMMIGRATION AND EMIGRATION—UNITED STATES.

MONTH.	Immigrant aliens admitted to United States, from British North America.		Emigrant aliens departed from United States to British North America.		Balance: — Outward. + Inward.	
	1915	1916	1915	1916	1915	1916
January	5,104	7,354	1,333	1,014	— 3,771	— 6,340

March	5,439	8,451	1,014	716	— 4,425	— 7,735
Total	15,299	23,054	3,497	2,659	— 11,802	— 20,395

Lands Patented.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory, for the month of March, 1916, the number of patents was 2,238 and the number of acres 367,031.52, as compared with 1,921 patents and 313,943.79

acres in February, 1916, and 2,776 patents and 449,054.53 acres for March, 1915.

The following statement gives details of lands patented during the first quarter of the present year, with a comparison of the figures for the same period of 1915:

Total January-March, 1916—5,635 patents; 915,460.15 acres.

Total January-March, 1915—6,142 patents; 1,015,163.03 acres.

PRICES, RETAIL AND WHOLESALE, IN CANADA, APRIL, 1916, AND IN OTHER COUNTRIES.

PRICES of dairy products were somewhat lower, but iron and steel and certain other metals showed further advances, but quicksilver declined steeply. Grains and fodder recovered and advanced somewhat, while animals and meats continued to advance, hogs reaching record levels. Lumber was higher in British Columbia, and many other building materials were advanced on account of high prices of metals and other materials used in their production.

In retail prices the cost of a list of staple foods stood at \$8.34 in April as compared with \$8.36 in March, \$7.79 in April, 1915, and \$7.50 in April, 1914. The chief changes for the month were decreases in eggs and butter, owing to the advance of season, and a steep rise in sugar. Flour, however, was lower. Beef, veal, mutton, pork, bacon, lard, old cheese, rice, beans and potatoes showed slight advances. Rents averaged slightly higher in New Brunswick and Ontario. As compared with April, 1915, all commodities in the list were higher except milk, bread, flour and rolled oats. Rent averaged slightly higher than a year ago, but lower than in 1914.

- In wholesale prices the Department's index number stood at 179.1 for April, as compared with 176.4 for March, 146.4 for April last year and 136.7 and 136.0 in 1914 and 1913. Advances during the month occurred in Grains and Fodder, Animals and Meats, Fruits and Vegetables, Miscellaneous Groceries, Wool-lens, Hides and Tallow, Iron and Steel, Implements, Building Materials and Raw Furs. Dairy Products were down and a steep decline in quicksilver lowered the average for Metals. As compared with April, 1915, prices were

higher in all the groups except Grains and Fodder. As compared with April, 1914, all groups were higher except Fish.

More detailed information as to the prices movement may be seen in the accompanying tables. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities of Canada, having a population of 10,000 or over. The quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for houses in districts inhabited by workingmen.

Retail Prices.

In meats many advances appeared, especially in hog products. General advances occurred in Brockville, Guelph, St. Thomas, Orillia and Brantford, Ont., New Westminster and Victoria, B.C. Lard also advanced in several localities. Hog markets were the highest on record and cattle prices were considerably higher also.

Eggs declined in nearly all the cities owing to the advance of the season. Milk was down at Three Rivers, Que., Brantford, Ont., and Regina, Sask. Butter declined in several localities as spring supplies came on the market. Prices, however, advanced at Sydney and Truro, N.S., Charlottetown, P.E.I., Hull, Que., London, Ont., and Fernie, New Westminster and Vancouver, B.C. Cheese was higher in some cities, but was lower at St. Catharines, Ont.

The advance in the price of bread spread to other localities, prices being higher in Toronto, Brantford, London, St. Thomas and Windsor, Ont. The advances were reported due to the high price of flour, the higher prices of lard,

*Coal, wood and coal oil. No allowance is made for the varying extent to which these are used in the different localities and provinces. †Revised.

sugar, malt, etc., the greater cost of delivery due to the high price of horse feed, higher wages, owing to the scarcity of labour as so many employees were enlisting, especially bakers for the Army Service Corps. In some localities bakers have been able to keep the price down as they had ordered large supplies of flour in the autumn when the price was low and found it necessary to advance prices only as these were exhausted. In April, 1914, bread averaged 4.3c per lb. in the 60 cities; in April, 1915, the average had risen to 4.8c; a considerable decrease occurred in the autumn, but advances during the winter and spring brought the average up to 4.6c for last month. Flour was down to \$6.50 per barrel for first patents in car lots as compared with \$8.00 a year before. The retail price of flour was higher for the month in Halifax, N.S., Calgary, Alta., and New Westminster, B.C., but was lower at St. Thomas and Cobalt, Ont., and at Vancouver and Victoria, B.C. Rolled oats was slightly lower. Rice and tapioca advanced in several cities.

Canned vegetables were higher at Sydney, N.S. Canned peas advanced at Vancouver, B.C., but declined at Cobalt, Ont. White beans were higher in several cities. Prunes also tended upward.

Sugar advanced in many of the cities throughout the Dominion in sympathy with the wholesale market.

Potatoes advanced in several cities in the Maritime Provinces and in Western Canada, but were down in some localities in Quebec and Ontario, and also at Saskatoon, Sask., and Vancouver, B.C. Shipments from Western Canada were received in Ontario and lowered the market.

Coal, anthracite, declined at St. Catharines and Brantford, Ont., to spring rates. At the City of Quebec, stocks were low and prices were higher owing to the higher freight rates and shortage of ships. At Fredericton, N.B., coal was also higher on account of the in-

creased freight rates. Bituminous coal was higher at Westville, N.S., and Quebec City. At Vancouver, B.C., coal was lower as transportation was cheaper, the weather being better. Hard wood was also higher at Orillia, Ont., and at Regina, Sask.

Rent advanced at Newcastle, N.B., at Brockville, Orillia and Brantford, Ont., demand for houses being better.

Wholesale Prices.

Grains and fodder.—Manitoba wheat rose to \$1.19 early in the month. The late season and small crop areas in Canada and United States tended to raise the market. Prices then eased off to \$1.13 and were fairly steady during the remainder of the month. It was reported that speculation had raised the price above the level justified by demand. A fair volume of export was carried on. Barley reached 63c per bushel at Winnipeg, as the demand was better. Western oats reached 46c under a strong export demand. American corn was up to 85c at Toronto. Flax was downward, declining from \$1.94 to \$1.91, the market being quiet. Peas eased off from \$1.60 to \$1.50, but recovered. Rye rose from 87-88c to 90-91c. Hay was higher, rising to \$21.50 at Montreal and to \$18.00-19.00 at Toronto.

Animals and meats.—Western butcher cattle rose from \$7.00-7.25 to \$7.50-7.75. There was a good demand and receipts were not large. At Toronto choice butchers rose from \$8.75 to \$8.90, offerings being light at the end of the month. Dressed beef advanced \$1.00 per cwt. Hogs reached \$11.00 per cwt. at country points in Ontario, which is the highest price on record. Bacon reached 23-24c per lb, but eased off 1c. Hams rose to 19-20c. Lard was up to 15¼-15½c. All hog products were in good demand. Sheep, mutton and lamb continued higher at the levels reached in March.

Dairy products.—Finest creamery butter at Montreal declined from 33-

f. Tamarac, Jack pine, poplar, etc. g. Natural gas used. h. Lignite. i. Calculated from the price per wagon load. j. Calculated from the price per 100 lbs. k. Allowing \$1.00 per ton for delivery. *From Dec., 1914, to 1st of March, 1915, the price was 9 q's. for \$1.00.

34c to 31c per lb. The new make came on the market in the last week at 31½-32c. At Toronto creamery solids declined from 33-34c to 31-32c, and dairy prints to 26-30c. Cheese was down slightly to 18-18¼c per lb. Eggs declined further as the season advanced, fresh eggs at Montreal being down to 25c, and also at Toronto.

Fish.—The market for dried fish was weak owing to continued low prices at Porto Rico. The market for hard cure in Portugal and Italy was reported good. Freight rates, however, were very high. In the lobster fisheries big catches were reported. Prospects for the sale of canned lobsters were somewhat uncertain. The new season's catch of alewives, pickled, was selling at \$4.50 per barrel, which was \$1.00 higher than last year. The price of salt for the fisheries was 60c per hogshead higher on the Atlantic coast than a year ago.

Fruits and vegetables.—Apples were slightly higher than in March, the highest grade selling at \$6.00. Bananas were also slightly higher at \$2.75 per bunch. Lemons and oranges were somewhat upward. Potatoes eased off at Montreal. Potatoes have been down to \$1.70 in car lots at Montreal. Onions at Montreal were up to \$4.00 per cwt. At Toronto turnips were up to 45-50c per bag. Canned vegetables advanced slightly, corn being up to 95-97½c per doz., peas 92½-95c, and tomatoes at \$1.10-1.15.

Miscellaneous groceries.—Winter wheat flour eased off by 30c to 40c per barrel, choice patents being down to \$6.00 at Montreal and straight rollers to \$5.30-5.40. Spring wheat flour, however, was steady. Bread was higher at Toronto, bakers who were selling wholesale at 4½c per loaf of 1½ lbs. advancing the price to 5c and those selling at 5c advancing the price to 6c per loaf. At several other cities prices were also higher. Rolled oats was 10c higher at \$2.65 per bag. Rangoon rice was 10c higher at \$4.30 per cwt. Sugar advanced 50c per cwt., granulated reach-

ing \$7.86 per cwt at Toronto and yellow sugar \$7.16. Molasses was higher at 52c per gallon. The raw sugar market was up considerably. Glucose was 10c per cwt. higher. Maple sugar eased off slightly to 12-14c per lb. Salt advanced in all grades except table salt, which had risen in January, fine salt being up 5c per barrel and dairy and cheese salt 9c per barrel.

Textiles.—Ontario wool eased off, washed wool declining to 42-43c per lb., and unwashed wool to 30-32c in sympathy with the lower price at which wool could be marketed. Yarn was as high as \$1.00 per lb., and beaver cloth \$2.27½ per yard. Raw cotton was slightly higher at 12c per lb. Grey cottons averaged slightly lower, but coloured cottons and prints somewhat higher. Raw silk, Japan filatures, continued to advance, but declined later in sympathy with weakness at Yokohama. The Italian market was steady. Jute was quiet, owing to a strike at Dundee. Flax sewing twine advanced again in sympathy with the market for raw materials, reaching 30-32c per lb.

Hides, leather, boots and shoes.—Calfskins rose 2c to 20c per lb., and horsehides 50c to \$5.00-5.50 per hide. Tallow rose ½c to 8c per lb.

Metals and implements.—Iron and steel markets continued at high levels, pig iron, N.S., foundry No. 1, rose \$1.00 at Montreal to \$24.50-25.50. American pig iron was also 50c per ton higher. Black sheets rose to \$3.70 per cwt., and galvanized sheets to \$6.90. Tin plates, coke, rose to \$6.50 per box. Boiler plates reached \$3.75 per cwt. Steel billets were \$1.00 higher at \$43.00-46.00 per ton. Brass was 1c higher at 44c per lb. Copper was also up 1c at 31½c per lb. Lead was higher at Toronto at 10c per lb. Quicksilver declined steeply, being down to \$1.25-1.28 per flask, almost half the price in February, owing to less demand. Silver bar rose to 63¾c per ounce. Spelter was somewhat easier at 22c per lb. Tin eased slightly to 55-

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR APRIL, 1916, MARCH, 1916,
AND APRIL, 1915, 1914 AND 1913.

*Nine commodities off the market, fruits, vegetables, etc., one line of spelter has been dropped.

56c per lb. Chain was \$1.00 per cwt. higher at \$6.35. Crowbars were up to 4-4½c per lb. Soldering coppers rose from 49c to 55c per lb.

Fuel and lighting.—Furnace coke was lower, being down from \$3.75 to \$2.75-3.00 per ton at the ovens at Connellsville. Foundry coke was also lower.

Building materials.—The lumber trade in Ontario was reported to be showing signs of improvement, there being reports of building in cities and a fair amount of building in country districts. The woodworking manufacturers were also using more hard wood. Red oak, firsts and seconds, 1 inch, was up to \$66.00 per M. British Columbia fir was also higher in price by \$3.00 per M. The export of white pine from the Georgian Bay district to the United States was reported good. There was also some export of hemlock. Orders for shell boxes improved the demand for spruce, pine, birch and maple. At St. John the scarcity of tonnage caused great uncertainty as to the market for lumber, no shipments being possible except for the Admiralty. Building paper advanced again 5c per roll, owing to the high market for paper. Black iron pipe rose to \$6.80 per 100 feet. Lead pipe rose to 14c per lb. Red lead, dried, rose to 13½c per lb. Nails were higher, cut nails reaching \$3.55 per keg for 2½ inch and wire nails \$3.70 for 6 inch. Sash weights were 30c per cwt. higher at \$2.70. Sash cord rose 1c. Copper wire was nearly 3c per lb. higher at 31½-32c. Iron wire rose to \$3.75 per cwt. Wire cloth was also higher at \$2.00 per 100 square feet. White lead in oil rose from \$11.55 to \$13.95 per cwt. Linseed oil was down 6c per gallon to 91-94c for raw at Montreal. Turpentine was 2c lower at 77c. Venetian red was higher at \$2.75 per cwt. Prepared paints also advanced from \$1.95 to \$2.15 per gallon. Shellac was higher at \$2.05 per gallon.

House furnishings.—Another advance in crockery was announced of 10 per

cent. Knives and silverware were also advanced about 10 per cent.

Drugs and chemicals.—Bleaching powder declined from 9c per lb to 8½c. Brimstone, ground, rose from 2c to 2½c per lb. Opium was upward. Soda ash rose from 3¾c to 4c per lb.

Miscellaneous.—In raw furs mink was up to \$4.00 per skin. English hops eased off 1c per lb. Newsprint paper eased off from the very high level at the end of March to \$2.10 per cwt. on the lowest basis. Manilla wrapping paper was up to \$4.25-4.50 per cwt. Pulp, ground wood, eased off from the very high level at the end of March to \$17.00-19.00 per ton. Bleached sulphite pulp was up to \$115-120 per ton and unbleached sulphite reached \$65 per ton and upwards. Sisal binder twine was up to 97½c per lb., as compared with 8½c last year, owing to the high price at Yucatan in Mexico. Raw rubber was slightly easier at 68c per lb.

Prices in Other Countries.

The accompanying tables show the latest available returns of currently published index numbers of prices in other countries.

In the United Kingdom the Board of Trade *Labour Gazette* for March reported on retail food prices on March 1 as follows:

Retail prices of food advanced during March by less than 1 per cent. British beef prices increased by about 2 per cent, imported beef and British mutton by about 3 per cent, and imported mutton by about 6 per cent. The increase in the prices of flour and bread which commenced in November last has now been arrested, and a decrease of between 1 and 2 per cent is shown this month. Granulated sugar showed an advance of 4 per cent on the average, making a total increase of 18 per cent, or ¾d. per lb., during the present year. Potatoes showed a rise of about 4 per cent, and cheese 3 per cent. Butter, margarine, bacon, milk and tea showed very slight average advances. Eggs and fish were cheaper than a month earlier, to the extent of 9 and 3 per cent respectively, on the average.

As compared with April 1, 1915, there was an average increase of 19 per cent. The increases may be summed up as follows: Sugar and frozen mutton were dearer by about 35 per cent, and fish by 30 per cent. British and imported beef, British mutton, bacon and tea had risen in price by about 25 per

a. July of each year. b. Foods.

cent. Milk, butter, cheese and eggs showed advances of 15 to 20 per cent; margarine, flour, bread and potatoes, about 6 to 11 per cent.

With a further advance in March, the price of granulated sugar at April 1 was considerably more than double that for July, 1914, and there has been a further increase since April 1. Flour averaged 60 per cent, and bread over 50 per cent dearer than immediately before the war. British meat had risen 45 per cent, and imported meat considerably more. For milk, butter and bacon, the increases recorded averaged between 30 and 35 per cent, and cheese was 45 per cent dearer.

On wholesale prices in Great Britain the *Economist*, London, April 8, 1916, reported:

Although still breaking fresh records, our index number of wholesale prices for March shows only a very small rise as compared with the enormous advances recently recorded. The rise last month amounted to only 5 points, as compared with 168 at the end of February and 206 at the end of January. The reason for the check is a decline in food prices and textiles. This, however, is offset by further rises in the mineral and miscellaneous sections. . . . Cereals are chiefly responsible for the decline in the first group, meat prices being a good deal higher. Both foreign and British wheat show a substantial decline on last month's prices. Shipments from America and supplies of home wheat have been on a larger scale, and, with a slackening demand, prices have fallen away. The market in America is also weak, and unless the European demand becomes more urgent, prices are likely to decline further. . . . The price of flour has also declined in sympathy with that of the raw material. Beef is slightly higher, but mutton has again advanced heavily. Pork, on the other hand, has fallen to the January level. Tea and coffee are a trifle higher, but sugar, which rose enormously during February, has receded. . . . In the textile group, cotton prices are all easier, owing to a great falling off in the demand. The wool market is quiet, owing to transit dislocations and labour difficulties, but only a very slight decline in values has occurred. Jute is unchanged and firm, but the industry is at present upset by labour troubles, a large quantity of machinery being idle. Silk has risen still further, owing to the scarcity of supplies, for although the European demand has been lessened by the war, the American demand has largely increased.

The *Statist*, London, April 8, 1916, reports:

A satisfactory feature of the past month has been a fall of 3.7 per cent in the prices of vegetable food, more especially in cereals, potatoes and rice having advanced. On the other hand, meat food and sugar, coffee and tea are both about 7 per cent dearer, while the advance in minerals was nearly 6 per cent. There was also a small advance in textiles and in sundry materials.

In Australia the official index number of retail prices of food and groceries stood at 1,383 for February as

compared with 1,319 for January and 1,084 for February, 1915. The principal decreases recently were in flour, oatmeal, and dairy products, with increases in meats. The index number of prices of the principal articles of domestic produce exported from New South Wales stood at 1,677 for January as compared with 1,763 for December and 1,382 for January, 1915. For the month decreases appeared in the Pastoral Products group, wool, tallow, hides, etc., but the Metals group was higher.

In Berlin, Germany, returns published in the official journal *Statistische Korrespondenz* showed a slight fall in February in retail food prices, estimated at 8 per cent by the British Board of Trade, allowing for the relative importance in working class consumption. The general rise was 85.6 per cent over July, 1914. It is pointed out that the prices of several articles quoted were maximum rates above which retail dealers were not allowed to charge and many articles were obtainable only in strictly limited quantities, whilst some articles were practically unobtainable. No quotations for peas and beans have appeared in Berlin for some months. Lentils were quoted in few localities.

In Italy the index number of the retail prices of seven foods for February, reported in the journal of the Italian Labour Office, stood at 125.0 as compared with 125.1 for January, and 103.6 for February, 1915. Bread, beef, bacon, table oil were up, but flour, macaroni and bacon were lower.

In the Netherlands the official index number of retail prices of foods and groceries stood at 155 for February as compared with 153 for January and 130 for

February, 1915. For the month prices were higher in haricot beans, green peas, coffee, margarine, syrup and soap. Coke was also higher.

In New Zealand the index number of groceries rose in November, 1915, but eased off slightly in December. Dairy produce alone showed appreciable decreases toward the end of the year.

In the United States the index number of retail food prices of the Bureau of Labour Statistics stood at 104 for February, as compared with 106 for January, eggs and butter being lower. As compared with February, 1915, prices were higher in meats, especially hog products, eggs, butter, cheese, onions, beans, potatoes and sugar. Flour was down nearly 10 per cent and corn meal was slightly lower.

Bradstreet's, New York, April 15, 1916, reported on the index number of wholesale prices as higher at April 1:

There exists the fear that supplies may become still scarcer, that prices may go even higher, and with such factors prevailing, price is not being considered. Indeed, the situation has got around to the point where numerous commodities are marked by what are usually designated runaway conditions, with goods virtually selling themselves, as it were, and with some manufacturers evincing a disposition to jack up prices to stay insistent demands. Indeed, the more prudent are questioning whether prices on many commodities have not gone high enough, and whether there has not been more or less over-buying. Obviously, fears of a shortage of goods have caused some consumers to order more goods for future delivery than they normally use over a period unmarked by extraordinary conditions, and when these high priced goods are made up into manufactured articles the real test will come. At this time it is a rather far cry to next fall, but when that season arrives it will be interesting to make observations as to the effects not only of high prices but of present feverish buying for delivery in the season named, the ordinary inference being that contracting for subsequent periods will experience some reaction. Of course, prosperity may continue, and the land, already fat, may wax still fatter, and in that event inferences, however plausible, are likely to fall to the ground. Just now high prices merely aid and abet buying.

Dun's Review, May 6, reported the rise from April 1 to May 1 to be less steep than in the previous month, as butter, potatoes and other vegetables were cheaper. Meats and provisions were higher and breadstuffs were higher, although wheat was lower. Metals and clothing were also higher.

FAIR WAGES CONTRACTS, APRIL, 1916.

DURING the month of April the Department of Labour received from the Department of Railways and Canals for insertion in the *Labour Gazette* information relating to one fair wage contract awarded by that Department. This contract contained the fair wage clauses providing for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the regulations for the Suppression of the Sweating System.

Fair Wages Clauses.

This contract is made subject to the regulations made by Order in Council dated the third day of March, 1906, under and by virtue of the Public Works (Health Act), 1899.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and, if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or pro-

perty, or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

The contracts containing the above clauses follow:

DEPARTMENT OF RAILWAYS AND CANALS.

Erection of (a) one two-stall engine house at Upper Musquodoboit; (b) three combined passenger and freight stations with platforms at Musquodoboit Harbour, Middle Musquodoboit and Upper Musquodoboit; (c) five No. 1 shelters with 50 ft. platforms at Lawrencetown, West Chezzetcook, East Chezzetcook, Meaghers Grant and Elderbank; (d) nine No. 2 shelters with 50 ft. platforms at Cow Bay, Cole Harbour, Naugles, Lloys, Three Fathom Harbour, Seaforth,

Grand Desert, Elmsvale and Centre Musquodoboit. Name of contractors, Maynard C. Denton and Maurice A. Condon, Digby. Date of contract, April 14, 1916. Amount, schedule rates.

POST OFFICE DEPARTMENT.

During the month of March, payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 993.70
Making and repairing rubber dating stamps and type; also other stamps.....	185.23
Repairing parcel scales.....	3.55
Supplying stamping material and repairing stamping pads.....	1,019.52
Supplying new mail bags.....	6,685.97
Repairing mail bags.....	3,329.19
Supplying mail bag fittings.....	84.80
Making and repairing miscellaneous articles of postal stores.....	11.50
Making railway mail clerks' tin travelling boxes also repairing steel portable letter boxes.....	126.75
Repairing parcel post hampers.....	193.15
Making and supplying articles of official uniform.....	5,039.19

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN CANADA DURING THE FIRST QUARTER OF 1916.

IN the accompanying statistical table detailed information is presented, so far as it is susceptible of tabulation, relating to changes in wages and hours of labour in Canada, reported to the Department to have taken place during the first quarter of the present year, during the months of January, February and March. These changes affected approximately from 11,300 to 11,850 employees, of whom all but 195 received advances in wages, the latter sustaining a decrease. In three cases affecting from about 1,200 to 1,600 men a reduction in hours was effected. The number of employees affected by changes in wages and hours during the last quarter of 1915 was 5,449, and in the first quarter of 1916 the number was 2,838. There were in all 18 changes reported, being one more than in the first quarter of 1915, as compared with three changes during the last quarter of 1915.

Changes by Industries and Trades.

The following is a statement of changes in wages and hours of labour according to the industry affected:

Building trades.—Fourteen painters at Regina, Sask., received an advance from 35 cents to 40 cents per hour on February 26, as the result of a strike.

An agreement was signed by the Builders' Exchange and the Bricklayers', Masons' and Plasterers' International Union of Galt, Preston and Hespler, Ont., to be in force for three years

from March 1, 1916, to March 1, 1919. By the terms of the agreement the rate of pay was fixed at 45 cents an hour for the first year and 50 cents an hour for the next two years, and the working hours were reduced from nine to eight per day. The rate of wages having previously been 40 cents per hour, the change entails a reduction in weekly earnings from \$21.60 to \$19.20 for the first year, but in the next two years the weekly pay will rise to \$24.00.

Metal trades.—During the months of January, February and March, agreements were reached between about 60 shops at Toronto and representatives of the machinists, helpers and munition workers, by which the hours of labour were reduced from 55 or 59 to 50 per week, overtime to be paid on the basis of time and a half. From 1,000 to 1,400 men were affected by this change.

On March 10, 170 moulders and core-makers at Brantford, Ont., were granted an increase of five per cent in their wages, from \$3.00 to \$3.15 per day. On March 27, 45 moulders and coremakers at Brantford were granted an increase from \$2.90 to \$3.20 per day. On March 13, 125 moulders and coremakers at Hamilton, Ont., received an increase of 25 cents per day and a reduction in hours from 60 to 54 per week. On January 10, the wages of 50 boilermakers' and iron shipbuilders' helpers at Esquimalt, B.C., were increased from \$2.75 to \$3.00 per day as the result of a strike.

Firemen:— 4th grade.	"	37	"	Salary increased from \$945. to \$1,039.50 per annum.	945.00	1039.50			\$94.50				

Printing trades.—On January 2, 40 second year compositors at Halifax were granted an increase from \$16.00, to \$17.00 per week on the request of the Typographical Union. On February 14, an increase of \$1.50 per week was granted to 130 printers at Quebec, Que., in accordance with the terms of an agreement made in 1914. As the result of the increase hand men received \$18.00, machine operators \$20.00, and foremen \$21.00 per week.

Textile trades.—On January 24, a general increase of five per cent on piece-work prices was voluntarily granted to about 7,000 textile workers at Montreal, Valleyfield, Cornwall and Kingston.

Street railway employees.—On March 22, 15 motormen and conductors of Guelph, Ont., were voluntarily granted an increase of 1 cent per hour, raising their weekly wages from \$12.24 to \$12.92, from \$13.26 to \$13.94, and from \$14.28 to \$14.96.

Railway employees.—On March 16, an increase from \$55 to \$65 per month was granted to 13 freight checkers, and an increase from 17 cents to 18 cents per hour to 40 freight truckers at London, Ont., as the result of a strike.

General transport.—On March 15, an agreement was reached between the shipping companies and the longshoremen's union at Montreal, Que., by which the wages were increased from 30 cents to 35 cents per hour for day work, and from 35 cents to 40 cents per hour for night work, the agreement to be in force until January 1, 1918. About 1,500 men are affected by this agreement.

On January 2, an advance from 28. to 30 cents per hour, day rate, was granted to from 300 to 500 longshoremen at Halifax, N.S.

On March 1, a change was made in the method of payment of 32 employees of a ferry at Dartmouth, N.S., by which wages were calculated by the hour instead of by the year. On the basis of the year 1915, the change will result in an increase in the annual earnings of all classes ranging from an advance of \$3.84 for ticket girls to \$49.44 for mates.

On January 1, the wages of 50 teamsters at Hamilton, Ont., were increased from \$50.00 to \$52.00 per month.

Miscellaneous trades.—On March 1, a bonus of 10 per cent on monthly earnings was voluntarily granted to electro-chemical workers at Niagara Falls, Ont., representing an increase in the earnings of 504 employees from \$18.00 to \$19.80 per week.

Civic employees.—A large reduction was made in the salaries and wages of civic employees at New Westminster, B. C., for the year 1916, compared with 1915. Particulars of the changes as affecting various classes of workers are given in the accompanying table. At Hamilton, Ont., 33 garbage collectors received an advance in wages on March 1 from \$12 to \$14 per week, 9 sludge workers were advanced from 22 cents to 25 cents and from 26 cents to 29 cents per hour. Increases were also granted to fire captains, lieutenants and firemen.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF APRIL, 1916.

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Departments of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the factory inspectors of Ontario and Manitoba, Ontario Railway and Municipal Board, the Building Inspector of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

The following is a record of the accidents of the month by industries and groups of trades:

STATEMENT OF ACCIDENTS DURING THE MONTH OF APRIL, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	3	6	9
Fishing and hunting.....	1	1
Lumbering.....	2	5	7
Mining.....	5	22	27
Railway construction.....	1	1
Building Trades.....	1	5	6
Metal Trades.....	7	122	129
Woodworking Trades.....	2	8	10
Clothing.....	1	1
Textile.....	3	3
Food and Tobacco Preparation.....	1	3	4
Transportation:—			
Steam Railway Service...	20	61	81
Electric Railway Service...	1	4	5
Navigation.....	1	1
Miscellaneous.....	3	22	25
Public Employees.....	1	8	9
Miscellaneous Skilled Trades	2	16	18
Unskilled Labour.....	5	4	9
Total.....	54	292	346

DURING April, according to the industrial accident record of the Department of Labour, 54 workpeople were killed and 292 injured during the course of their employment. The record for March, 1916, was 61 killed and 332 injured, and in the month of April, 1915, 49 workpeople were killed and 319 injured. Comparing the April record with that for the preceding month, it will be seen that there were seven fewer killed and 40 less injured in April, while there were five more killed and 27 less injured in April than in April, 1915.

TABLE OF FATAL INDUSTRIAL ACCIDENTS DURING APRIL, 1916

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
<i>Agriculture:—</i>				
Farmer.....	Clifford, Ont.....	April 13	1	Crushed by a falling tree.
Farmer.....	South Chegoggin, N.S.....	" 1	1	Lockjaw, resulting from mutilation of thumb by circular saw.
Farmhand (female).....	Stanley, Ont.....	" 17	1	Fell and impaled on tines of hay fork.
<i>Fishing and hunting:—</i>				
Lobster fisherman.....	Lower Montague, P.E.I....	" 12	1	Drowned—broke through ice while hauling lobster traps.
<i>Lumbering:—</i>				
Sawmill employee.....	Maxville, Ont.....	" 13	1	Mangled by circular saw.
Sawmill employee.....	Powell River, B.C.....	" 5	1	Struck by flying board.

TABLE OF FATAL INDUSTRIAL ACCIDENTS DURING APRIL, 1916.—Continued.

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
<i>Mining:—</i>				
Miner (Col. No. 12).....	New Waterford, N.S.....	April 15	1	Fall of coal.
Miner (Porcupine Crown Mine).....	Timmins, Ont.....	" 25	1	By a fall.
Miner.....	Coalhurst, Alta.....	" 4	1	Crushed by a mine car.
Miner.....	Phoenix, B.C.....	" 28	1	Fall of rock.
Brickyard employee.....	Tilbury, Ont.....	" 6	1	Mangled by machinery.
<i>Building trades:—</i>				
Roofers (shingler).....	Ancaster, Ont.....	" ..	1	Fell from a roof.
<i>Metal trades:—</i>				
Employee (Wire fence factory).....	Hamilton, Ont.....	" 14	1	Mangled by machinery.
Iron works employee.....	Toronto, Ont.....	" 12	1	Burned—endeavoring to extinguish flames.
Electrician.....	Sydney, N.S.....	" 17	1	Electrocuted.
Lineman.....	Halifax, N.S.....	" 19	1	Electrocuted.
Lineman.....	Montreal, Que.....	" 7	1	Fell from a pole.
Ship carpenter.....	Levis, Que.....	" 26	1	Fell from scaffold.
Ship carpenter.....	St. Romuald, Que.....	" 25	1	By a fall.
<i>Woodworking trades:—</i>				
Coach and car works emp.	Preston, Ont.....	" 13	1	Head struck by a piece of metal.
Planing mill employee....	Joliette, Que.....	" 10	1	Mangled by machinery.
<i>Food and tobacco preparation:</i>				
Packing plant employee..	Winnipeg, Man.....	" 23	1	Mangled by machinery.
<i>Steam railway service:—</i>				
Engineer.....	Chaudiere, Que.....	" 2	1	Rear-end collision.
Engineer.....	Lucerne, Alta.....	" 29	1	Derailement of locomotive.
Fireman.....	Chaudiere, Que.....	" 2	1	Rear-end collision.
Yard foreman.....	Regina, Sask.....	" 5	1	Run over by cars.
Yardman.....	Winnipeg, Man.....	" 6	1	Run over by cars.
Yardman.....	Stellarton, N.S.....	" 1	1	Run over by locomotive.
Yardman.....	London, Ont.....	" 17	1	While riding on locomotive struck by passing locomotive.
Yardman.....	Deloraine, Man.....	" 15	1	Fell from moving train.
Brakeman.....	Hornapayne, Ont.....	" 6	1	Head-on collision.
Brakeman.....	Renfrew, Ont.....	" 25	1	Run over by cars.
Brakeman.....	Kempton, Ont.....	" 10	1	Run over by cars.
Brakeman.....	Touchwood, Sask.....	" 26	1	Run over by locomotive.
Brakeman.....	Chaudiere, Que.....	" 2	1	Rear-end collision.
Sectionman.....	Silverdale, B.C.....	" 1	1	By a fall.
Sectionman.....	Sydney, N.S.....	" 27	1	Run over by a car.
Employees.....	M.P. 16 Webbwood, S.D...	" 23	2	Derailement.
Bridge watchman.....	Trenton, Ont.....	" 18	1	Crushed by a derailed train.
Employee.....	M.P. 104½ Port Arthur, O.	" 13	1	Crushed by a falling crane.
Employee.....	Kenora, Ont.....	" 5	1	Derailement of motor car.
<i>Electric railway service:—</i>				
Conductor.....	Waterloo, Ont.....	" 25	1	Struck by a falling car door.
<i>Miscellaneous transport:—</i>				
Driver.....	Ottawa, Ont.....	" 16	1	Fell from wagon.
Teamster.....	Ottawa, Ont.....	" 20	1	Run over by wagon.
".....	Windsor, Ont.....	" 18	1	" " "
<i>Public and civic employees:—</i>				
Watchman.....	Montreal, Que.....	" 1	1	Drowned in a cesspool at pumping station.
<i>Miscellaneous skilled trades:—</i>				
Employee, explosives plant	Beceil, Que.....	" 14	1	Burned by sulphuric acid.
Paper mill employee.....	Sault Ste Marie, Ont.....	" 26	1	Mangled by machinery.
<i>Unskilled labour:—</i>				
Laborer.....	Cornwall, Ont.....	" 7	1	Premature explosion of dynamite.
Laborer.....	Kingston, Ont.....	" 3	1	Struck by blasted material.
Laborer.....	Merriton, Ont.....	" 16	2	Explosion of carbide.
Laborer.....	Welland, Ont.....	" 2	1	Crushed by machinery.

TABLE OF NON-FATAL ACCIDENTS DURING APRIL, 1916.

DISTRIBUTION OF LABOUR IN CANADA.

THE present article is the second annual review of the work of employment bureaus in Canada, the first having appeared in the issue of the *Labour Gazette* for March, 1915. With the increase in the number of men enlisting for overseas service and the demand for labour in many industries engaged on war contracts, there was less than the normal amount of unemployment during the year 1915, and consequently the employment offices did much less business than in the previous year.

On February 7, a debate took place in the House of Commons, in which the attitude of the Government toward employment bureaus was set forth by the Hon. the Minister of Labour. With regard to the establishment of a system of national employment bureaus, it was pointed out that the Dominion Trades and Labour Congress was in favour of municipal labour exchanges rather than Dominion or Provincial ones, and that the supervision and control of employment agencies has been left almost entirely in the hands of the provincial authorities. Special work, however, along these lines is carried on by the Immigration Branch, the Military Hospitals Commission and the Economic Commission. Since 1907, the federal labour bureaus of the United States have provided work for about 40,000 persons, whereas in the same period the Dominion Immigration Branch has provided positions for about 130,000 men. A Military Hospitals Commission established some months ago has been instrumental in the formation of provincial commissions in each of the provinces, with local committees appointed by them, to take care of disabled soldiers on their return to Canada, and so far as possible to find

employment for them. For the purpose of dealing with the situation after the war, when large numbers of returned soldiers will be looking for work, a body has been created known as The Economic Commission, which is giving careful consideration to these matters, with a view to advising how best this Dominion may be enabled to meet economic emergencies.

There is much valuable work to be done in co-ordinating and systematizing the work of existing agencies, provincial, municipal and private, but this falls in the first place on the provincial authorities. The Dominion Government seeks opportunities of co-operating to the same end, and three years ago, acting under the Dominion Immigration Act, private employment agencies were brought under a system of Dominion inspection, in so far as the agencies might deal with immigrants. Otherwise the agencies remain subject to provincial control. The Department of Labour is also keeping in touch with employment bureaus by securing from them monthly reports, and opportunities may in this way be found where the facilities of the federal authorities may be advantageously exercised.

I.—Work of Dominion Immigration Officers.

During the year 1914 the number of immigrants placed as farm labourers or female domestic servants by 99 Canadian Government employment agents appointed on commission, chiefly in the provinces of Ontario and Quebec, was as follows:

Men	1,449
Women	1,864
Children	4
Total	2,817

In 1913, similar agencies placed 2,743 men and 2,937 women.

In addition to these, the salaried officers of the Immigration Department in the West placed 9,897 men, 204 married couples and 573 domestics, while the Montreal, Ottawa, Toronto, Hamilton and London agencies placed approximately 4,500 persons. In the fiscal year ended March 31, 1915, the agents in the four last mentioned cities placed 6,007 farm labourers.

II.—Provincial Employment Bureaus.

Public employment bureaus operated under the provincial authorities exist in the provinces of Ontario and Quebec. Statistics relating to these bureaus are given below.

ONTARIO.

Six free employment offices under the Ontario Bureau of Labour are operated in the province, being situated at Brantford, Hamilton, London, Ottawa, Berlin and Walkerville. Statistics of the work accomplished by them since 1907, when they were first established, to the end of 1914 are given in the following table:

Year.	Applications for work.		Help wanted.		Situations filled.	
	Male	Female	Male	Female	Male	Female
1907..	919	78	363	72	287	23
1908..	857	61	345	82	323	37
1909..	964	99	731	345	465	57
1910..	1,169	83	1,491	212	874	62
1911..	1,173	89	921	256	681	67
1912..	1,914	81	1,814	355	1,239	54
1913..	2,570	102	1,825	384	1,415	68
1914..	4,364	246	1,853	304	1,750	183
Total.	13,930	839	9,343	2,010	7,034	551

Of the 4,364 male applicants for work during the year 1914, 2,778 were classed as labourers, 433 as farmhands, 224 as carpenters, 115 as machinists, 94 as painters, 88 as blacksmiths, 68 as teamsters, and 67 as bricklayers, leaving 497 for all other occupations. The percentage of vacancies filled to vacancies notified was 89 as compared with 67 in the previous year.

QUEBEC.

The Department of Mines and Colonization of the Province of Quebec, through its immigration agencies, places farm hands particularly in the Eastern Townships and near the cities of Montreal and Quebec. The number so placed during the last three years is as follows:

July, 1912, to July, 1913	281
July, 1913, to July, 1914	277
July, 1914, to July, 1915	88

The operations of the provincial employment bureaus of Quebec are summarized as follows:

Quebec City.

	(July 1 to June 30.)			
	1911-12.	1912-13.	1913-14.	1914-15.

III.—Municipal Employment Bureaus.

Municipal free employment bureaus have been established in Montreal, Toronto, Winnipeg, Edmonton, New Westminster, Vancouver and Victoria. The Vancouver municipal authorities recently took over the employment bureau for

women operated by the Women's Employment League of that city. There is a bureau for men in connection with the City Relief Department, which supplies little else than casual employment. Statistics relating to municipal employment bureaus for the year 1915 are given below so far as they were available:

MONTREAL FREE MUNICIPAL LABOUR BUREAU.

1915	Employees' Applications.		Employers' Applications		Places filled.	
	Male.	Female	Male	Female	Male	Female
January...	1,251	33	945	32	908	19

September.	440	20	331	14	259	10
October...	502	18	386	20	344	7
November.	913	16	775	16	760	5
December.	904	6	680	21	657	5
Total 1915.	10,010	253	8,087	253	7,805	92

WINNIPEG FREE EMPLOYMENT BUREAU.

The following table shows the record of business of the Winnipeg free employment bureau for the year ended September 30, 1915, which was the second year of its operations:

	Positions offered		Positions filled	
	in City	out of City	in City	out of City
Men.....	8,634	1,810	8,361	1,524
Women...	6,097	721	5,406	261
Total				
1915...	15,331	2,531	13,767	1,775
1914...	12,191	1,692	11,034	1,243

EDMONTON MUNICIPAL EMPLOYMENT
BUREAU.

The Edmonton municipal employment bureau was organized on June 1, 1914, taking over the employment work of the Edmonton Welfare League, a charitable organization partly supported by the city and partly by voluntary contributions.

The annual report of the bureau for the year ending December 31, 1915, gives the following statistics:

Class of work.	No. placed
MEN	
Municipal work.....	781
General work in City.....	2,381
General work outside of City.....	1,811
Relief work.....	3,809
Total No. of men placed.....	8,782
WOMEN AND GIRLS.	
Office, housework, hotel, restaurant, factory and day work in City.....	1,470
Total positions filled.....	10,252

In addition to the positions filled for women and girls, there were offered 439 positions in Edmonton and 238 in the country which the bureau was unable to fill. Of these 446 were for domestic work, and 51 were for housekeepers in the country.

The bureau also secured 43 skilled mechanics for munitions work in Great Britain, and eight men for work in coal mines in Great Britain.

VICTORIA MUNICIPAL FREE LABOUR
BUREAU.

During the year 1915, employment, casual and otherwise, was found for 3,891 men. In the women's department employment was found for 443 day workers and employment of a more permanent character was supplied to 429 women.

IV.—Private Employment Offices.

The following list contains the names of private employment agencies, which are subject to inspection by the Immigration Branch of the Department of the Interior, in so far as they deal with immigrants. The agencies are given by provinces arranged from east to west. In 1913, the number of these agencies was 268, but in the present year their number dropped to 255.

NOVA SCOTIA.

Halifax.—Halifax Employment Bureau, 75 Hollis St.; Original Domestic Employment Bureau, 20 Prince St.; Guglielmo Fisher; Ignatius Roth; Women's Welcome Hostel, 327 Brunswick St.

North Sydney.—M. J. Ross.

Sydney.—Tony D. Pistone, 227 Charlotte St.; Eastern Real Estate Co., Ltd.; R. S. Harriss.

NEW BRUNSWICK.

Fredericton.—The Western Employment Agency.

St. John.—Grant's Employment Agency, 205 Charlotte St. W.; Alexander Wilson, 14 Rodney St. W.; Louis Fader, 14 Pond St.; Maritime Employment Agency, 4 North St.

REPORT ON CONDITIONS OF WOMAN AND CHILD WAGE EARNERS IN THE UNITED STATES.

BY an Act of Congress approved in January, 1907, the Secretary of Commerce and Labour was directed to conduct an investigation into the conditions of woman and child wage earners in the United States. The nineteen volumes of the report which were issued during the year 1910 to 1912 relate, for the most part, to conditions as they were found in 1908. The summary, which is here reviewed, has been issued by the United States Bureau of Labour Statistics as one of its bulletins in view of the limited distribution of volumes of the report. The inquiry was confined almost wholly to States east of the Mississippi. Over 335,000 persons were employed in the establishments covered and of this number 167,000 were females.

It was found that women and children were more numerous employed in the cotton textile industries than in any other industry in the United States, although the relative importance of both these classes has decreased with the introduction of heavy and complicated machinery and the increase in the speed of operation. However, men still form less than half of the working force. The work of the women and children in the industry is usually carried on under harmful conditions. As very little skill is required, young children can be employed to advantage, although this is unnecessary as adults can perform all the work usually assigned to children. The work done by women and children affords no general training and much of it is exhausting because of the close attention required. The scale of earnings is low and the laws relating to the employment of children were found to be frequently broken in both the North and South.

In the men's ready-made clothing industry large numbers of women were employed, but their importance in the industry is relatively less since the coming of the Russian Jews, the introduction of electric power, and the excessive subdivision of work. Children were not numerous employed. Wages seemed to depend as much on bargaining power as on ability. In the main, the women employees were young with the exception of the home workers who were usually married women with families. Their hours were irregular, they were poorly paid, and the surroundings in which the work was done were frequently unfortunate in the extreme.

The glass industry employed a large number of boys and some women and girls. Only a few of the boys have any chance of becoming glass-blowers and for the rest it is a blind-alley occupation. Their work exposes them to extreme temperatures, it frequently demands very rapid action, and often involves night work.

The silk industry employed a large number of children, but the proportion is steadily decreasing. Women were also employed in large numbers, the proportion which women form of the total employees having increased slightly in the last 30 years. The work done by the children was usually light, it was unskilled, and the wage level was low. The majority of the females over 16 years were employed in semi-skilled occupations, but there were several skilled trades open to them in which they could earn from \$10 to \$18 a week.

In the study of women and girls employed in departmental and other retail stores it was found that approximately 22.5 per cent (the proportion ranged from 7.9 per cent in New York City to 35.8 per cent in Boston) were without homes in the cities in which they work-

ed and entirely dependent upon themselves for support. The average weekly wage of such women was \$7.89. Of this they expended on an average \$4.43 for food, shelter, heat, light and laundry. Of those reporting on the point 20.5 per cent were either contributing to the support of needy relatives or supporting them wholly.

The percentage of these economically adrift women varied from 13 per cent of the number of women and girls in mills and factories included in the investigation in New York to 25.3 per cent in Boston, or 17.5 per cent of the total number of such employees. Their average weekly earnings were \$6.78. They spent for food, shelter, heat, light and laundry, \$3.50, and over one-fifth were contributing to the support of needy relatives.

With regard to the causes for children leaving school to enter employment it was found that of the 620 children studied in this connection 30 per cent left school to work through necessity, 27.9 per cent because the child's help was desired although not necessary, 26.6 per cent on account of the child's dissatisfaction with school, 9.8 per cent because of the child's preference for work, and 5.7 per cent left school through miscellaneous causes. In the study of juvenile delinquency, it was found that only 57.5 per cent of the boys and 34.2 per cent of the girls included in the study were living in their own homes with their own fathers and mothers. As to the occupational distribution of these children it was found that of the boys employed at the time of their last arrest, 21.83 per cent were newsboys, errand boys coming next with 17.8 per cent. Among the girls, domestic service in its different forms stood first with 53.95 per cent, the different textile industries contributing 12.36 per cent, and workers in stores and markets 5.44 per cent.

The section on Women in the Metal Trades deals with the working conditions for women and children in those trades. In a study of accidents

in 13 industries in the metal trades the manufacture of tin cans showed the highest accident rate among adults, followed closely by hardware and then by brassware and lanterns. The lowest rate was found in the manufacture of bolts and screws. As to infant mortality and its relation to the employment of mothers it was found in a study at Fall River that the percentage of children not well and strong at birth was almost exactly the same for mothers at home as for mothers at work, and the indications were that the work of the mother in the cotton mill before childbirth did not produce results noticeably different from the work of mothers at home. The primary cause of the excessive infant mortality in Fall River is summed up as "the mother's ignorance of proper feeding, of proper care and of the simplest requirements of hygiene. To this all other causes must be regarded as secondary." The section of the report dealing with causes of death among woman and child cotton mill operatives definitely establishes the higher mortality of cotton mill operatives as compared with non-operatives, especially in the case of women, and also demonstrates that operatives are peculiarly susceptible to tuberculosis.

The investigation as to the relation between occupation and criminality of women seems to show that the anti-social tendencies among women lie back of the industrial experience itself in the qualities which lead women into one kind of work rather than another. Occupational influences were in no case given as a leading factor, nor were poverty or low wages assigned as a direct cause. The study of family budgets of typical cotton mill workers shows "that in the cotton mill communities studied a certain proportion of the workers did not earn enough to maintain physical efficiency unimpaired; that a considerably larger proportion was unable to compass a fair standard of living; that it was only in exceptional cases that an adult male worker could earn enough to support properly a small family; and

that the employment of his wife or children or both as wage earners was a necessity." With regard to the hookworm disease among cotton mill operatives, it is stated that the situation is hopeful. The great need is the improvement of sanitary conditions on the farms and in the mill villages, and along with this should go medical treatment of existing cases, especially those of heavy infection. Of the special study of between 50,000 and 60,000 women and children in 23 industries, it is stated that the strongest impression left by the study is the haphazard and unstandardized character of the industrial world as known to such employees. They enter upon the employment without preliminary training, picking up what knowledge they need as they go along. The determining factor as to the conditions of their employment and remuneration

seems to be the individual employers' attitude upon the matter. It is pointed out that since the investigation many improvements have been made in the labour laws affecting the conditions of employment of women and children as well as of wage earners in general. In addition to the new labour laws there has been more adequate provision for effective enforcement of such laws. Tables are given showing the progress of legislation affecting women and children in the period 1908-1915, and presenting analyses of the principal features of the laws of the various States affecting women and children in industry as existing November 1, 1915.

The report contains historical sections dealing with the beginnings of child-labour legislation in certain States, women in industry in the United States, and women in trade unions.

REVIEWS.

Factory Inspection.

New Brunswick.—Report of the Factory Inspector of the Province for the year ending December 31, 1915. 27 pp.

THE report notes the increased industrial activity due to the orders for munitions of war, and records some industrial development of a more permanent character. The number of accidents recorded during the year was 74, of which eight proved fatal, this being the largest number of fatal accidents occurring in the province in any one year during the inspector's experience. While it is stated that at least 40 per cent of the accidents would have been avoided if care had been exercised by the injured employees, it is noted also that employers are often tardy in safeguarding machinery. Often when employers are requested to protect some dangerous machine "they express the opinion that it is not necessary, and especially is this

true when those dangerous places are located in some part of the establishment not frequently visited. Experience has demonstrated the fact that at least one-third of the accidents from year to year occur in those parts of the mill where, I am informed, no one goes, and where the employer does not think it necessary to pay much attention." A lack of interest is also manifested in the reporting of accidents. In order that the information supplied might be complete, blank forms for the reporting of accidents have been mailed to manufacturers, but many do not use them, and the information supplied is generally meagre.

Boiler explosions have not been of frequent occurrence in the province, but in 1915 there were two boiler explosions which resulted in the death of three persons and in severely injuring four others. With regard to one of the cases the inspector is of the opinion that due care was not exercised in connection

with the inspection and operation of the boiler. He also calls attention to the sale and purchase of old and second-hand boilers, a very dangerous practice. The Act should be amended with a view to making it compulsory under severe penalty for any person purchasing a second-hand boiler to refrain from operating the same until properly tested and a certificate presented to the factory inspector as to the safety of the boiler.

As to sanitary conditions in factories, there is no doubt that conditions are much better than for some years past, yet in a number of places there was a noticeable lack of interest with regard to cleanliness. The matter of adequate ventilation in manufacturing establishments has also received attention. The amendment to the Factories' Act passed in 1912 requiring employers to have on file age certificates for all children in their employ under 16 years of age has had good results. There are, however, from 300 to 400 children from 14 to 16 years of age in the industrial establishments of the province, and it is difficult to make sure that none are under age. During the past year the inspector found two cases where the age was understated by parents.

As to the Act for the prevention of accidents by fire in hotels, the inspector finds that there is opposition on the part of at least 75 per cent of the hotel proprietors to the carrying out of the law. The Theatre and Cinematograph Act is generally well observed, particularly with regard to fire prevention. There have, however, been some violations in the way of unlicensed operators and the use of uncensored films. The inspector recommends that there should be added to the New Brunswick Factories' Act a section from the Factories, Shops and Office Buildings Act of the province of Ontario, which calls for the provision of seats for female employees in shops. The province has laws making such provision for employees in manufacturing establishments, but as yet no such legal

consideration has been given to women and girl workers in shops.

United States.—Summary of the Report on Condition of Woman and Child Wage Earners in the United States. Bulletin of the Bureau of Labour Statistics. No. 175. Washington, December, 1915. 437 pp.

A summary of this report appears elsewhere in this issue of the *Labour Gazette*.

Town Planning.

Canada.—Town Planning.—Draft Act, with respect to Planning and Regulating the Use and Development of Land for Building Purposes in Cities, Towns and Rural Municipalities. Revised edition. Commission of Conservation. December, 1915.

In the introductory statement it is urged that preparation should now be made to properly regulate building development that is likely to take place at the close of the war, both because a period of slackness such as the present is the right time to plan and regulate new development and because much can be done to reduce the cost of local improvements and secure greater civic and industrial efficiency. The revised draft is modelled on the draft prepared in the early part of 1914, by a special committee, appointed by the Commission. The changes follow the lines of the revised Nova Scotia Act, passed in April, 1915, which is said to be a great improvement on any previous town planning legislation. It contains provisions for compulsorily creating town planning boards in each district, whether city, town or rural municipality, and for the preparation of town planning by-laws as a means of securing the application of certain general principles of land development to the whole of the province. In preparing the draft Act the precedents of the Nova Scotia Act of 1915 and of the earlier New Brunswick, Alberta and British Acts have been considered. Changes have been made mainly with the purpose of securing a wider scope for the provisions, simplifying the procedure involved in putting the Act in

force and adopting the powers to the variety of conditions which prevail in Canada. The draft is put forward by way of suggestion and will, of course, require the careful revision of the legal adviser of each provincial legislature before being introduced. The text of the Act which then follows is divided into six parts:

Part

- I—Title, Interpretation and Appointments.
- II—New Streets and Sub-divisions; Powers and Duties of Local Board to Approve all New Development.
- III—Preparation and Approval of Town Planning By-laws or Schemes.
- IV—Purchase or Expropriation of Land.
- V—Powers in Case of Default and to Inspect Property.
- VI—Expenses of Department, etc.

Labour in Mines and Quarries.

Great Britain.—Mines and Quarries. General Report, with Statistics, for year 1914. Part II—Labour.

Part II of the Annual General Report on Mines and Quarries for the year ending December 31, 1914, is briefer in form than usual owing to the pressure of work occasioned by the war and falls under two heads: the general work of administration and statistics relating to persons employed, accidents, prosecutions and reports of committees.

The total number of persons ordinarily employed at mines and at the quarries under the Quarries Act in the United Kingdom and the Isle of Man during 1914 was 1,236,363. Of these persons, 78,908 were employed at quarries, 929,807 at mines underground and 227,648 above ground. Of the latter, 6,724 were females.

The year was happily not marked by any great disaster. There were 1,300

separate fatal accidents causing the loss of 1,338 lives, a decrease of 532 fatalities as compared with the previous year. The death-rate from accidents per 1,000 persons at all mines was 1.074 surface and underground for 1914 as compared with 1.545 for 1913. It was not possible in these calculations to make allowance for the depletion of mining labour owing to recruiting, and the rates have been based on the number ordinarily employed during the pre-war months. The rates are therefore lower than they should have been and no precise comparison can be made with the results in previous years. The death-rate per million tons of mineral raised provides a more satisfactory basis of comparison. On this basis the death-rate was 4.37 in 1914 as compared with the average figure of 4.91 for the decennial period 1905-14. The total number of persons injured by accidents disabling them for more than seven days was 165,150 as compared with 184,202 in 1913, or a decrease of 19,052.

Industrial Education.

United States.—Vocational Educational Survey of Richmond, Va. Bulletin No. 162 of the Bureau of Labour Statistics. August, 1915. 326 pp.

In the spring of 1914 the National Society for the Promotion of Industrial Education arranged with the Richmond Board of Education to make a study of the schools and occupations in that city, preliminary to the annual convention of the society, which was held there in December of the same year. The society left the carrying out of the survey to a committee which had the co-operation of the United States Bureau of Labour Statistics, the United States Bureau of Education, the Russell Sage Foundation, and the school authorities and citizens of Richmond. The report indicates how a city with a population of about 135,000 mainly, native-born, sought to secure such a knowledge of its industrial and school system as would enable it to develop a plan of vocational education which would serve the needs of children

preparing for the various vocations and of employers and employees.

The recommendations of the general survey committee based on the findings of the survey of the schools and of the industrial survey are presented under the six following heads: (1) the problem of financing vocational education in Richmond; (2) compulsory attendance as a factor in a programme of industrial education; (3) the types of schools and courses of study for boys and men as determined by the findings of the industrial survey; (4) types of schools and courses of study for girls and women as determined by the findings of the industrial survey; (5) prevocational education for boys, and (6) the place of private institutions receiving city moneys in the general plan. A definite need for the offering of educational facilities for men and boys already employed is shown by the survey. The report states: "It is evident that the supply of efficient journeymen is inadequate, that the amount of systematic instruction in the shops is small, and that the amount of apprenticeship training is limited.

"The findings indicate that the men themselves seek further educational advantages and that they are personally interested in trade education. Many workers have taken courses at their own expense since leaving the regular school. The facts show that the majority of these workers have taken courses bearing directly upon their trade. The minority have taken day, evening or correspondence work unrelated to their trade.

"A study of the individual schedules points out that the typical Richmond worker is handicapped by lack of the elements of general education. The men and their employers agree with this finding and have expressed a desire that many of the trade-extension classes to be organized shall take this element into full consideration."

It is recommended that there should be courses giving department store and

salesmanship training for girls and women in Richmond. There should be established schools or classes in prevocational work for girls covering the period corresponding to the last two years of the elementary school. These courses should serve as a self-discovery and vocational guilding course, giving to the girl who must leave school early a better basis for selecting the vocation she may enter and they should give those girls who go on to the high school an opportunity to choose in the high school the more intensive practical course for which they are best fitted. They should also appeal so strongly to the interest of the pupil as to tend to hold her longer in school. The committee is of the opinion that there is no need of a girls' trade school for Richmond, but recommends a school providing prevocational training for boys who are looking forward to leaving school at a relatively early age in order to go to work and a proposed course of study is set forth.

Employment in Garment Industries.

United States.—Regularity of Employment in the Women's Ready-to-Wear Garment Industries. October, 1915. U. S. Department of Labour, Bureau of Labour Statistics. 151 pp.

A survey of the industry was made by the Bureau of Labour Statistics in co-operation with the United States Commission on Industrial Relations. The purpose of the inquiry was to ascertain, if possible, (1) the degrees of relative regularity of employment, that is, the changes in the amounts of employment in each specific industry at different points of the year; (2) the causes, fundamental and contributory, of seasonal changes of employment; and (3) the existence in any of the industries of systematic methods for the regularization of employment. The information presented in the report is based upon data from employers' pay-rolls in four centres of manufacture, New York, Boston, Cleveland and Chicago. Pay-roll

data were secured from more than 500 establishments, representing approximately 150,000 workers, and 17 different groups of manufacturers. The six industries in the survey arranged in the order of the irregularity of their employment are: (1) custom tailoring; (2) cloaks, suits and skirts; (3) house-dresses and kimono; (4) dresses and waists; (5) children's and misses' dresses, and (6) women's muslin underwear.

The six factors which influence regularity of employment in the garment trades are seasonal changes, changes in style, degree of specialization required, quality of product, scale of production and method of production, *i.e.*, whether manufactured on the premises of the firm or in contractors' shops. These factors differ considerably both in the extent to which they affect regularity of employment and in the degree to which they can be controlled. If seasonal changes were the only variable factor the manufacturer could, after determining the volume of his custom, so distribute work throughout the year that no more workers would be employed than could be kept steadily occupied. The small scale production cannot be made as steady as the large, and the outside shop takes the overflow in times of pressure from the inside shop; consequently, employment in the outside shop is irregular in the highest degree. The outside shop does not seem a necessity and its abolition would tend to regularize employment in the trade. The other two factors, specialization and quality of product, are not inevitably productive of irregularity, although it was found that the greater the specialization and the better the quality of goods the greater is the irregularity. The real cause, however, is probably the risk involved in putting high priced labour

and expensive materials into garments which if not sold at once may be rendered almost worthless by a change of style. Change of style seems the most important cause, but it is not so incalculable and uncontrollable as manufacturers profess to believe. It is due alike to the demand of the public and the competition of manufacturers, and perhaps the desire of manufacturers to profit by the introduction of novelties, is chiefly responsible. If the manufacturer gave more attention to pushing standard lines with moderate variations from year to year the situation would be changed materially for the better. A few manufacturers have attempted to regularize employment in their establishments. The two methods found were not extensively used. The first consisted of manufacturing more than one line of goods, the articles produced being selected so that the dull season of one coincided with the busy season of another. The other method was an attempt to secure orders as far in advance of delivery as possible, combined with the introduction of a standard garment which could be made during the dull season. The report concludes that dovetailing could be used more widely and might be assisted by industrial training of a general or technical character. Most of the workers are semi-skilled, but in the skilled trades such training would increase the adaptability of the workers and counteract the tendencies towards too great specialization. In the garment trades it is not so much entire lack of employment as half-pay and half-time that must be remedied. The regularization of employment can only be accomplished when all manufacturers realize that it is to their interests to unite and solve the problems arising from conditions which are neither inevitable nor uncontrollable.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopsis of recent cases affecting labour are based upon the latest reports of legal proceedings and other legal records of the different provinces of Canada.

QUEBEC CASES.

Workmen's Compensation Act—Employer's Liability—Release Void on Account of Error.

THE plaintiff, while in the employ of the defendants, was injured on November 26, 1914. He was then earning \$13.50 per week. His employers paid him half of his wages until January 26, 1915, when he signed a receipt for the money received, at the same time releasing them from any further payment as he felt better and was to resume his work within a few days. He was not, however, as well as he thought, and his incapacity from work continuing he asked for a continuation of his indemnity, which was refused. He brought an action against the employers, and the Superior Court held that the release given by him was void on account of his error as to his own condition, and rendered judgment in his favour for \$114 with costs. (*Trudel v. Levasseur et al.*)

Compensation for Accident.

An action was brought under the Workmen's Compensation Act to recover damages by the plaintiff who was in the employ of the defendant company. The plaintiff met with an accident which resulted in partial permanent incapacity for which she claimed \$50 a year, or subsidiarily the sum of \$196.50. Defendants denied liability but the judge found that the evidence established that as a result of the accident, while in defendant's employ, the plaintiff, who at the time was earning \$300 a year, suffered to an extent that would diminish her earning capacity by at least 7 per cent. The judge claimed this would entitle her to an annuity of \$10.50. The capital of such annuity would be \$196, and as the option of plaintiff was that she receive the capital, judgment was accordingly given for

this amount. (*Simpson v. Davis & Lawrence Company, Limited.*)

MANITOBA CASE.

Negligence—Railway Construction.

The plaintiff, with a number of other workmen, was engaged assisting in the lowering of a traffic bridge. In removing a false bent from the structure, plaintiff, who was operating a "pump jack" at the time, was caught between the moving bent and the bridge pier, and had one of his legs badly crushed, and a considerable portion of the leg was finally amputated. The case was heard before a judge and a jury, a verdict being rendered in plaintiff's favour for \$7,500. It was against this that the defendants appealed. Judgment was delivered that the appeal be allowed to the extent that the judgment in the court below is reduced to \$2,800, with costs of trial but no costs of appeal. (*Koski v. Canadian Northern Railway Company.*)

SASKATCHEWAN CASE.

Master and Servant—Personal Injuries—Measure of Damages.

A brakeman, 27 years of age, earning on an average about \$125 a month, was injured by reason of a tender on the rear end of which plaintiff was standing coming in contact with a car on a side-track foul of the lead (the car was not sufficiently far back on the side-track to allow proper clearance for the tender.) Plaintiff's right arm was cut off close to the shoulder joint, his right leg was badly broken and twisted and his nervous system generally received a severe shock. Plaintiff remained in the hospital for several months, during which time several operations of a serious and painful nature were performed. The jury gave a verdict of \$18,600, and judgment was entered accordingly. The defendant appealed, but the appeal was dismissed with costs. (*Hyde v. Grand Trunk Pacific.*)

THE LABOUR GAZETTE

JUNE, 1916.

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST.

THE month of May is usually a period of industrial disturbance, and the past month was not an exception to the rule. Four disputes, none of which, however, proved important, were carried over from earlier months, and thirteen new disputes began during May. The more important disputes were as follows: (1) At Stellarton, N.S., coal miners were on strike for three weeks, when work was resumed, the dispute being left to be dealt with by a Board of Conciliation appointed by the Minister of Labour; about 1,200 men were affected. (2) The shop employees of the Toronto, Hamilton and Buffalo Railway went on strike on May 20, and at the close of the month no settlement was in sight. In this case the dispute had been before a Board of Conciliation and Investigation, the findings of which appeared in the last May issue of the *Labour Gazette*. The efforts of the Board had not succeeded in preventing the threatened strike. At the close of the month no settlement seemed immediately probable. About 100 men are concerned. (3) A strike of teamsters in Montreal affected about 500 men and lasted for a week. (4) A strike of labourers employed on the Thorold section of the Welland Canal affected about 600 men and lasted about a week. (5) A strike of teamsters in Winnipeg affected 200 men, and, beginning on May 10, was unsettled at the close of the month. Machinists employed on munitions contracts by various concerns in Hamilton were endeavouring to secure from the employers an agreement re-

ducing the working day to nine hours, in accordance with the recommendations of the Munitions Commission appointed on the recommendation of the Minister of Labour. At the close of the month it seemed by no means certain that it would be possible to avoid a strike.

* * *

THE conference, noted previously in these pages, between the representatives of the four railway brotherhoods and the managers of practically all the railways of the United States, bearing on the eight-hour work day, and which have been proceeding now for several months, were at the end of May still unfinished, and prospects seemed perhaps less hopeful than some weeks earlier. Looking somewhat beyond the close of the month of May, reference may be made to a proposition submitted by the companies, which was described as a "yard stick" offer. This proposition was in the following terms: "A road man's time will start from the time he is required to report for duty, and, except where tied up between terminals, in accordance with existing agreements, all work and delay required at initial terminal and en route will be paid as continuous time or mileage. At final destination, existing rule or rules covering additional service after arrival, final terminal delay, etc., are not to be disturbed and will be paid for pro rata until the time on duty equals the overtime limit of the run. Time paid for under one rule is not to be paid for

under another rule or rules." The latest information received at the time of writing indicates that a strike vote of the four organizations will be taken by ballot at the end of the month of June. Negotiations are, however, continuing, and powerful influences will be brought to bear on the situation to prevent a strike covering between 300,000 or 400,000 men and, probably, by tying up the majority of railways, displacing a far greater number of workers.

* * *

ACCORDING to the practice which has been followed since the publication of the *Labour Gazette* was begun in 1900, this issue, No. 12, should be the final issue to be included in Volume XVI. When the *Labour Gazette* was first published, the Canadian fiscal year was July 1 to June 30, and the year of the *Labour Gazette* volume was made to accord with these dates. The Canadian Government, in 1907, changed the fiscal year so that it closed on March 31, the *Labour Gazette* volume being, however, continued on the former basis. It is proposed with the present volume to change the *Labour Gazette* year, and since the statistics of the Department are gathered as a rule for the calendar year, rendering them more easily comparable with statistics on similar subjects gathered, usually on a calendar year basis, in other countries, the calendar year will be taken as the term of the *Labour Gazette* volume. The present volume, No. XVI, will be extended to include the six numbers to be issued during the remaining months of the present calendar year. The index for Volume XVI will appear as soon after the close of the volume as possible; also it is proposed to issue, probably at the same time, a cumulative index covering the first sixteen volumes.

* * *

IT is interesting to note that a Bill has been introduced into the Assembly of the State of Ohio, patterned after the Dominion statute known as the Com-

bines Investigation Act. The full title of the Ohio Bill, on the face of which appears the name of Mr. Edward Bohm, as sponsor, is "A Bill to provide for the investigation of combines, monopolies, trusts and mergers, and to repeal Sections 6390 to 6402, inclusive, of the General Code." In its essential features the Bill follows the Canadian measure save where in the case of the Dominion Act the provisions bear on matters such as customs, patents, etc., which are within the scope of the Federal Government. The Ohio Bill provides that the general administration of the statute should be under the authority of the Public Utilities Commission of the State. No statute, however, seems likely to be enacted for the present, since the Bill did not emerge from the committee to which it was referred by the Assembly.

* * *

THE figures of trades unionism in several countries have not been as a rule easily available since the outbreak of the great war. The Bureau of Labour Statistics of the United States has issued a statement containing figures in a few cases for the year 1914, but of the countries engaged in the war Great Britain alone appears in the list. The statement, moreover, does not include the 1914 figures for the United States. The statement issued by the Bureau is as follows:

Membership of Trade Unions in Various Countries for the Years 1912, 1913 and 1914.

Country.	1912.	1913.	1914.
Australia (Commonwealth)	497,925
Austria	692,681	748,760
Belgium	281,835	202,746
Denmark	139,012	152,787	155,783
France	1,027,059	1,026,302
Germany	3,753,807	3,835,660
Great Britain	3,281,003	3,928,191	3,959,863
Italy	971,667
Netherlands	189,030	220,275
New Zealand	60,622	71,544
Norway	60,975	64,108	67,235
Sweden	87,024	97,252	101,207
Switzerland	131,380
United States	2,389,723	2,604,701

PRICES showed no marked increases in materials such as have characterized the markets continuously for some time except in hides and leathers. Cattle and beef, hay and grain, especially oats, rose steeply. Canned vegetables advanced again, while the cereal market showed further advances in bread, and flour and soda biscuits also advanced. In metals some declines appeared in antimony, lead, quicksilver, solder and tin, but silver advanced. Nova Scotia coal advanced at Montreal owing to the greater cost of shipping and greater demand at the steel plants. In the retail prices of foods, sugar rose considerably. Beef, mutton and bread also showed important advances. The Department's index number of wholesale prices stood at 180.9 as compared with 179.1 the previous month and 147.4 for May, 1915.

* * *

EMPLOYMENT continued active in practically all occupations, and if anything there was a shortage, rather than a surplus, of labour in many industries. A reduction of output was reported in some Nova Scotia coal mines on this account, and in some mines in the Crow's Nest Pass operations were reported curtailed owing to a lack of haulage hands. A number of cities reported civic construction work delayed on account of difficulty in securing unskilled labour. Building operations were improved somewhat, not only in the East, but in a few parts of the West, and even in parts where dullness existed, building trades suffered but little from lack of employment, being able to secure other work. While there appeared to be a shortage of labour in a number of industries, returns sent to the Department by employment agencies in the principal cities, indicated an increased capacity on the part of these agencies to fill positions offering, an evidence that as respects the classes of labour dealt with by these agencies, at least, the

situation in regard to a shortage of help was improving. Some agricultural districts reported a scarcity of farm labour, but in other parts sufficient help was available. Continued wet weather in many parts interfered with operations and lessened the demand for help.

* * *

AN association known as the "Protestant Directorate of Female Immigration," composed of the various religious bodies constituting the evangelical churches of Canada, has recently been formed in Montreal for the purpose of dealing with questions affecting the immigration and distribution of domestic servants in Canada.

The Association in its literature points out that the great majority of domestic servants come to this country through employment bureaus whose primary motive is mainly gain, and that thousands of those who have come to Canada have been mill and factory workers at home, with little knowledge of household affairs, and that as a consequence they have frequently been dismissed for incompetency and have often been misled, and it is to remedy these conditions that the Association has been formed. The Association differs from previously existing bureaus in maintaining a domestic training school, in the elimination of personal gain and in placing the domestic in a position without personal cost. A social centre is also maintained, to which girls can resort for rest, recreation and moral elevation.

The Association, which is assisted by a grant from the Dominion Government, will give special attention to "war widows," whom it will seek to place with farmers as domestic servants, many farmers having already advised the Association that they are willing to engage widows of soldiers, with one or two children. The Association will constitute rural ministers agents of the Association, who will, without fees, locate

one or two widows and their children in each parish or congregation. The headquarters of the Association which is known as "Dorchester House," are at 622 Dorchester Street West, Montreal. Rev. John Chisholm, B.A., is Secretary-Treasurer.

* * *

AS anticipated in the last issue of the *Labour Gazette* (page 1163) the proposed Workmen's Compensation law of the Province of British Columbia has been passed. In addition to the brief review given in the last issue it should be stated with regard to the provisions for medical aid that employers in industries under the Act are required to deduct from the earnings of their employees the sum of one cent for each day or part of day the workman is employed, as a contribution towards the cost of medical aid and to pay the same to the Board. The provisions in the Act with regard to medical aid do not apply to workmen employed on board vessels on which duty has been paid for the purposes of the "Sick Mariners' Fund"

under Part V of the Canada Shipping Act (Revised Statutes of Canada, 1906, Chapter 113) during the period in respect of which duty has been paid or is payable. The part of the Canada Shipping Act referred to provides that there shall be levied on every ship arriving in any port in the provinces of Quebec, Nova Scotia, New Brunswick, Prince Edward Island and British Columbia a duty of two cents for every ton which such ship measures, certain fishing and other vessels being exempted. The duties thus collected constitute the "Sick Mariners' Fund" in the Department of Finance, out of which are paid the expenses incurred in providing medical aid for sick mariners by such hospitals as are designated by the Governor-in-Council for the care of sick or injured workpeople of this class, as well as expenses incurred by officers of the Customs in providing such care at points where hospitals have not been designated. The Manitoba Workmen's Compensation measure, referred to in the last issue, has also been enacted, but the Department has not yet received a copy. Both these Acts will be reviewed at length in a subsequent number.

INDUSTRIAL CONDITIONS DURING MAY, 1916.

GENERAL SUMMARY.

INDUSTRIAL and commercial conditions during May were very satisfactory and the volume of labour employed owing to the advance of spring was somewhat in excess of the previous month. There was a pronounced improvement in building operations in many parts of Eastern Canada and also in some parts of the West.

A feature of the industrial situation was the scarcity of help reported from many parts of the Dominion, a shortage which in other months had been

more noticeable in some skilled trades and in agricultural operations, but which in May was becoming pronounced, not only in additional skilled trades, but in unskilled occupations as well. In a number of instances civic works, such as street paving and sewer construction, had to be delayed owing to the difficulty of securing labour. Wage tendencies were distinctly upward, and several groups of industrial workers secured higher rates, as the result of strikes or negotiations in some cases and in others by reason of volun-

tary concessions on the part of employers, many of whom in view of competition for workmen among factories and other industries found it difficult to secure new hands or to hold old ones.

There was more activity in agricultural operations in many districts than in the previous month owing to improved weather conditions, but in some districts continued wet weather threatened to seriously affect grain crops and lessened the demand for help. Fishing, with more active operations on the Great Lakes and other inland waters showed increased activity. Lumbering continued active. Coal mining was busy in Nova Scotia, though handicapped by a shortage of labour and tonnage. Conditions in some Western mines improved somewhat and in others, noticeably in the Crow's Nest district, coal mines were operated to capacity of staffs employed, with the possibility of more extensive operations when a shortage of haulage hands was overcome. Metal mining was very active. Manufacturing continued busy in most lines, with an increased shortage of labour reported in many industrial districts. Railroad construction showed little change. Rail and water transportation continued active.

The Department's index number of wholesale prices stood at 180.9 for May as compared with 179.1 for April, 147.4 May, 1915, and 136.3 for May, 1914. The chief increases during the past month appeared in grains and fodder, animals and meats, and in hides, leathers, etc. Dairy products were down considerably, and further declines in quicksilver lowered the level for metals, but several other lines also showed slight declines. Miscellaneous foods, textiles, miscellaneous building materials and the miscellaneous group showed slight advances also. In retail prices, the cost of a list of 29 staple foods was \$8.37 as compared with \$8.34 for April, \$7.84 in May, 1915, and \$7.42 in May, 1914. For the month increases appeared in beef, mutton, bread, rice, beans and sugar, with decreases in eggs, milk, butter and potatoes. Coal averaged slightly

higher. Rent averaged higher in Prince Edward Island, Quebec and Ontario, but declined in Alberta.

Changes in Wages and Hours of Labour.

There were several changes in rates of wages reported to the Department during the month, the greater number of which were in the nature of increases. At the collieries of the Nova Scotia Steel and Coal Company at Sydney, N.S., the wages of labourers employed on the surface and in the mine were advanced from \$1.63 to \$1.70 per day, and other classes received various advances.

Moulders and helpers in the employ of the James Smart Manufacturing Company at Brockville received an increase of 10 per cent on piece work and day work men an increase of 25 cents per day. Conductors, motormen and brakemen of the Chatham, Wallaceburg and Lake Erie Railway at Chatham, after a threatened strike, received an increase of 2 cents per hour. At Hamilton carpenters, painters, decorators and paperhangers and sheet metal workers received various increases. Milk wagon drivers, in the employ of the Pure Milk Company and Hamilton Dairy Company received an increase from \$12 to \$13 per week with a 2 per cent commission. At Niagara Falls carpenters received an increase of 5 cents per hour, increasing the hourly rate from 45 to 50 cents. Papermakers employed in the Booth mills at Ottawa succeeded in securing a weekly 24 hour shut-down, as compared with a former rest period of 19 hours. Some labourers at Peterborough received an advance of 5 cents per hour. Fitters and drillers in the employ of the Canadian General Electric Company at the same place to the number of 50, as the result of a strike, had their wages increased from \$13.75 and \$15.12½ to \$16.50. At Peterborough employees of the Quaker Oats Company numbering about 375 in all also received a 10 per cent increase. At Port Colborne employees of the Maple Leaf Milling Com-

pany and the Canada Furnace Company also received an increase in wages. Railway trainmen, conductors and baggage masters of the Canadian Northern Railway east of Port Arthur were given an increase of wages amounting to about 22 per cent. Printers at Winnipeg secured a three-year agreement, providing for some increases. Underground and surface workers at Cobalt mines received increased wages depending on the price of silver.

Firemen, deckhands, winchmen and quartermasters employed by the various British Columbia coast steamship companies have received an increase in wages of \$5 per month for each class of labour.

Agriculture.

There was on the whole an improvement in weather conditions during May, and while in some parts wet and cold weather still continued to delay operations, in most agricultural districts seeding was either wholly or partially completed. The season, however, was distinctly backward and in many districts it was expected that grain crops would be adversely affected. Hay and fruit, however, were expected to be good crops. Farm help was fairly scarce and high wages prevailed, but the situation in respect to a shortage of help was not as acute as earlier estimates had indicated. Adverse weather conditions in some districts lessened the demand for help.

In Nova Scotia, in some parts, seeding was reported about completed under favourable conditions and a shortage of labour felt more or less in a number of districts. Some parts reported cold weather with frosts. Coal companies in the Sydney district, as was the case last year, encouraged their employees to engage in gardening by giving free all the stable manure of the collieries and horses, ploughs and harrows to lighten and cheapen the work of planting.

In New Brunswick districts, backward weather was reported during the early

part of the month, but better conditions existed towards its close and seeding was well advanced. In Quebec seeding progressed favourably, weather being favourable but cold. Some districts reported heavy rains at the close of the month.

In Ontario agricultural districts heavy rains and backward weather were reported to have seriously interfered with seeding operations, and in some districts to have unfavourably affected grain crops. Hay and fruit, however, promised well. A number of districts reported a continued scarcity of farm help and high wages. In some parts the scarcity of farm help was relieved by the return to farming of a number of retired farmers and by the employment of school boys. Wages of men in some districts ran as high as \$45 to \$50 a month and of boys \$20 to \$30 per month.

In Manitoba bad weather early in the month had a serious effect upon seeding operations, but much progress was made later. Brandon reported a good demand for farm help and practically all seeding was completed under excellent conditions. The grain average, however, was expected to be smaller than last year. In other Western Provinces favourable weather conditions prevailed on the whole, though in the Lethbridge district rather dry weather was reported. Seeding here was about finished at the end of the month and there was less employment for farm help on account of farmers holding back somewhat their operations in order to estimate the character of the season. Market gardens in this district were reported suffering from lack of rain and the weather was too dry for seeding root crops. Saskatoon reported a good demand for farm help. On account of the late spring considerable land was stubbled in. No labour shortage of any extent was reported. At Regina favourable weather existed and work was well advanced. In the Prince Albert district the weather was wet and cold and agricultural operations were delayed. Moose Jaw reported a good demand for labour, with

wages running from \$45 to \$50 per month for a six to seven months' engagement. Seeding was all finished in this district at the end of the month; a smaller area than in 1915 was reported. Calgary reported seeding operations about finished.

In British Columbia agricultural districts agricultural operations were on the whole favourable, though the season was considerably later than last year. No serious shortage of labour was reported.

Fishing.

With the further advance in season and the commencement of operations on the Great Lakes and other inland waters the fishing industry in Canada showed some improvement over the conditions of the previous month, though along some parts of the Atlantic coast in the early part of the month drift ice and unfavourable weather interfered to some extent with the industry. Sydney reported very little fishing done until the latter part of the month on account of drift ice, although later on fair catches of herring were taken. At Canso improved conditions were reported. At Digby there was a scarcity of fishermen owing to enlistments. Yarmouth reported the lobster catch good, but canneries expected difficulty in disposing of the pack owing to the embargo placed on canned lobster by the French Government. At Newcastle, also, lobster fishermen were doing well, but feeling the effects of the embargo. Charlottetown reported fishing backward. St. John reported fair conditions in shad, gaspereaus and salmon.

Fishing on the lakes became fairly active. At Port Arthur fishing tugs were all actively employed raising nets and making collections from the various stations. Other points also reported fair activity.

Salmon fishing was rather poor at New Westminster, though prices remained good. From Victoria it was reported that the salmon canning industry would

soon be active on the North British Columbia coast and that the indications pointed to a busy season, some canneries which were idle last year getting ready for operation this season.

Lumbering.

Lumbering continued to give employment to large numbers of men engaged in the drives and in sawmills. Nova Scotia districts reported drives successful and most of the mills in operation. New Brunswick districts also reported drives, mostly all in safe waters, and sawmills working full time with capacity crews. In Quebec, also, activity in lumbering was marked. In the vicinity of Quebec City log driving was well advanced and a number of mills commenced cutting. Stocks in the piling yards were heavy owing to the scarcity of steamers. Sherbrooke reported all mills running and the market for lumber improving. At Three Rivers, sawmills, on account of extra high water, had not started, but were expected to commence operations shortly.

In Ontario lumbering districts, sawmills for the most part were busy. The Pigeon River mill in the Port Arthur district, after a shut-down since June last, started work, taking on several hundred men.

In Northern Saskatchewan mills were busy. At Edmonton one large mill was reported running to full capacity, but others were not operating. Logging and lumbering operations in British Columbia were on the whole very active, though at some interior points snow in the mountains and heavy rains in the valleys made mountain roads impassable and held up the supply of logs to some mills. New Westminster reported a good demand for all classes of lumber and shingles and mills were busy. At Vancouver the demand for men for lumber camps continued steady and all mills in the city were running full time. Nanaimo reported mills in the district working steadily, but not to capacity. Logging operations were active. The

lumbering industry in British Columbia was expected to be accelerated by recent legislation of the province granting aid to encourage shipbuilding, particularly lumber carriers.

Mining.

Coal mining continued active in Nova Scotia fields and improved in Alberta and British Columbia districts. The Sydney fields reported that lack of unskilled labour was seriously felt by skilled miners and by the companies and resulted in reduced outputs. There was a shortage also of vessels for carrying coal to the St. Lawrence markets, and this shortage in vessels rendered some of the collieries idle for a few days.

Lethbridge reported that the coal trade kept up to the extent of one-half the output, with prospects of a steady increase. At Edmonton coal operators had a fair month considering the season. Fernie reported local mines running to the full capacity of the staffs, with the prospect of a larger output if additional haulage hands could be procured. At Nanaimo coal mines in the city were working steadily, but other mines in the district, especially those at Cumberland, were not doing so well.

Metal mining continued to show very active conditions. In the Sherbrooke, Que., district mining in asbestos, copper and chrome ore was active. The copper mining company at Eustis rebuilt its mill destroyed by fire last fall and the Asbestos Corporation at Thetford Mines installed new machinery. In the Cobalt district activity was stimulated by the high price of silver and new discoveries in gold camps. All producing companies increased their mill capacity. There was, if anything, a shortage of help, more marked in the Porcupine camp than in Cobalt, although there was no idle labour in the latter camp. Some of the Porcupine mines had difficulty in securing truckers and trammers for underground work. During the month at a meeting of Cobalt mine managers, wages of underground

workers were voluntarily raised 25 cents a shift, and in addition a bonus of 25 cents a shift both to underground and surface men when the price of silver for the month previous averages over 70 cents per ounce. Activity was reported in the registration of mining claims in the new Kowkash district, to such an extent that the Provincial Government appointed another mining recorder, with headquarters at Fashoda.

Metal mining in British Columbia continued active. Reports from Nelson indicated active conditions, and Rossland mines and the smelter at Trail were operating steadily. The smelter at Anyox operated to full capacity and added to its plant. Some 540 men were being employed in connection with the Hidden Creek mines and about 400 in and around the smelting works. Operations at Alice Arm, north of Anyox, were also being actively carried on, there being about 300 people in the camp, to which it was expected there would be a large incursion of prospectors and working miners during the coming summer.

Manufacturing.

Manufacturing continued active in most industrial districts, and in a great many instances a shortage of labour was reported. The steel industry was active both at Sydney and Sydney Mines, where the plants worked to capacity. Large quantities of iron ore, limestone and other material were being shipped in with the expectation of larger outputs. Other manufacturing localities in Nova Scotia reported activity. New Brunswick industrial centres also reported manufacturing industries busy, and at Montreal May was reported a very good month. Manufacturers of dry goods had large orders and were considerably behind in deliveries. Manufacturers of boots and shoes and textiles were also active. Clothing factories and general foundries were not so busy.

In Ontario districts activity in manufacturing continued, though in some in-

stances handicapped by a shortage of labour. At Niagara Falls, fourteen of the principal industries reported operations either busy or very busy. Toronto factories on the whole were actively engaged. At Berlin, furniture factories, button, shirt and collar, whitewear, rubber and biscuit and confectionery factories were very busy, some of these establishments working overtime. There was a shortage of machinists, trunk and bag makers, machine hands, finishers and upholsterers in furniture factories, of ironers for shirt factories and of unskilled labourers. At Galt, also, in the same industrial district, factories were very busy with a lack of help in some instances. Guelph also reported manufacturing in a better position than for some months past, with a scarcity of help in some lines. Stratford reported all industries active, especially machine shops, sash and door factories and woollen and knitting mills. St. Thomas manufacturing establishments reported business fair, but complained of inability to get sufficient unskilled labour. Shoe workers also were scarce. Woodstock reported a great scarcity of labour and factory managers were complaining of difficulty, not only in getting new hands, but in holding old ones owing to competition of other factories. At Chatham factories were active with a shortage of labour.

Railway Construction.

Railway construction was fairly active throughout the month, but apart from a few undertakings in the West was mostly confined to maintenance, construction of terminals, sidings, etc. St. Thomas reported a scarcity of trackmen. The Lake Erie and Northern Electric Railway opened the extension of its lines between Brantford and Simcoe, and it was expected the line would be running into Port Dover by July. Edmonton reported that with the exception of ballasting very little railway construction was being done. It was re-

ported that the Edmonton, Dunvegan and British Columbia Railway would build 50 miles of new road this summer. Petitions were sent to Government and Grand Trunk Railway officials, asking for the immediate laying of steel from the completed bridge over the South Saskatchewan River into the City of Prince Albert, grading having been completed several years ago.

At Vancouver work was in active progress on the building of the new terminal for the Great Northern Railway. According to agreement with the city the company is required to pay current rates of wages and give employment to residents seeking work before bringing help from outside.

General Transport.

Conditions in general transport continued active, and earnings of railway companies showed an increase over those of the previous month. Sydney reported shipments by rail and water fairly heavy, especially in the latter part of the month, and at Halifax longshoremen were kept busy during the greater part of the month, with some little falling off later. This, however, did not cause any unemployment, as many of the men take up other employment at this season of the year.

At Quebec lack of tonnage affected lumber shipments, and also had the effect of raising the price of soft coal. Montreal reported enough large ships coming up the St. Lawrence to deal fairly with the demand for space. River and lake steamers were running steadily. Brockville reported steamboat and railway business good both in passenger and freight traffic. At Hamilton all railway and steamship lines were busy. Niagara Falls reported transportation active with some congestion of freight.

Shipments of grain kept up activity in the West, and in British Columbia shipments of ore and lumber created active conditions in both water and rail transportation.

The Trades.

Building.—A great improvement was shown in the building trades, especially in Eastern Canada. Conditions remained about the same as in the previous month throughout the West, with greater activity reported in a few localities.

Metal.—Metal trades continued very active with a great demand for machinists.

Woodworking.—Woodworkers were very busy in the East, and somewhat busier in the West.

Printing.—Printers were reported as very active in Eastern Canada and fair throughout the West.

Textile.—Textile trades in practically all localities were very active.

Clothing.—Tailors for the most part were reported as active, while garment workers and boot and shoe makers were very active.

Food and Tobacco Preparation.—Food preparation trades were very ac-

tive and an improvement was noted in the tobacco trades.

Leather.—Leather workers had a very busy month and tannery employees were also very active.

Transport.—All lines of transport reported a very active month.

Unskilled.—Unskilled labour continued to be very actively engaged, very few localities reporting unskilled labour quiet.

Canadian Trade.

The total imports of merchandise for consumption in Canada for April, 1916, amounted to \$50,612,619, compared with \$28,963,756 in April, 1915, an increase of \$21,648,863. Domestic exports of merchandise for April, 1916, amounted to \$55,092,035, as compared with \$28,691,889, an increase of \$26,400,146. Increases in the exports of the products of the mine, the forest, fisheries, animals and their produce, agriculture, manufactures and miscellaneous merchandise were shown.

The following table gives the latest official summary of Canadian foreign trade:

IMPORTS AND EXPORTS, APRIL, 1916.

Imports entered for consumption.	April.		Exports. (Domestic.)	April.	
	1915	1916		1915	1916
Dutiable goods.....	\$16,615,321	\$28,929,084	Mines.....	\$2,795,002	\$3,690,744
Free goods.....	11,776,319	21,218,746	The Fisheries.....	710,447	829,515
			The Forest.....	1,929,440	2,287,939
			Animals and their products...	3,312,498	5,112,105
			Agriculture.....	6,618,443	21,305,977
			Manufactures.....	13,221,658	21,573,078
			Miscellaneous.....	104,401	922,677
Total.....	\$23,391,640	\$50,147,830	Total Merchandise.....	\$28,691,889	\$55,092,035
Coin and bullion.....	\$ 572,116	464,789	Coin and bullion.....		
Grand total.....	\$23,963,756	\$50,612,619	Grand Total Exports....	\$28,691,889	\$55,092,035
Duty collected.....	\$5,986,662	\$9,797,265			

The following are the returns of Canadian bank clearing houses for May, 1916, with increase or decrease over May, 1915:

Locality.	May, 1916.	May, 1915.	Changes.
Halifax.....	\$ 10,365,346	8,031,552	+ 2,333,794
St. John.....	8,293,187	6,484,402	+ 1,788,785
Montreal.....	333,428,627	203,618,435	+ 129,810,192
Quebec.....	17,157,382	12,524,395	+ 4,632,987
Sherbrooke.....	2,389,708		
Berlin.....	2,483,050

Peterborough.....	2,247,055	1,567,347	+ 679,708
Toronto.....	230,467,743	150,352,850	+ 80,114,893
Brandon.....	2,071,287	1,853,368	+ 218,126
Winnipeg.....	169,187,263	92,622,141	+ 70,565,122
Moose Jaw.....	3,730,978	2,476,596	+ 1,255,382
Régina.....	8,413,335	5,915,020	+ 2,498,315
Saskatoon.....	4,843,664	3,073,901	+ 1,768,763
Calgary.....	18,858,568	11,976,562	+ 6,609,006
Edmonton.....	9,724,593	7,770,732	+ 1,503,807
Lethbridge.....	2,110,429	1,359,429	+ 751,000
Medicine Hat.....	1,653,898	949,191	+ 704,707
New Westminster.....	1,259,234	1,226,709	+ 32,525
Vancouver.....	26,080,473	22,669,043	+ 3,411,430
Victoria.....	6,655,310	6,156,906	+ 498,404
Total.....	\$909,167,776	\$581,702,076	+ \$327,465,700

Canadian Revenue.—Canadian revenue for the two months ending May 31, 1916, amounted to \$33,172,754.58. The expenditure on capital account for the same period was \$12,713,304.49, and comprised \$9,733,843.16 for war purposes, \$2,794,163.13 for public works, including railways and canals, and \$185,298.20 on railway subsidies.

The bank statement for April, 1916, showed the paid-up capital of the chartered banks of Canada to be \$112,823,-

898, as compared with \$112,815,581 for the month of March, 1916. Deposits payable on demand for April amounted to \$402,060,955, compared with \$389,165,388 for March, 1916. Notes in circulation for April amounted to \$119,233,330, as compared with \$114,804,604 in March. Loans to cities, towns, municipalities and school districts during April amounted to \$44,371,050, as compared with \$38,649,462 during March, 1916.

REPORTS OF LOCAL CORRESPONDENTS.

NOVA SCOTIA.

Amherst.

All trades were fairly well employed.

The Nova Scotia Clay Company's works at Pugwash have again resumed operations at full capacity, employing a large number of hands.

Lumbermen were well advanced with their mill work.

Halifax.

Labour conditions were active, in fact contractors and builders were unable to secure sufficient help in nearly every trade to handle the work offering.

The same conditions existed in practically every branch of industry—shortage of clerks, teamsters, factory hands and unskilled labour.

Longshoremen were busy during the

greater part of the month, but work fell off a little later. This has not caused any unemployment, however, as at this season of the year many of the men take up other work.

Work was carried on extensively on the new ocean terminals, and much progress was made during the month.

Sydney.

Labour conditions continued active, and labour generally was well employed. While there was much demand for steel products and coal, a shortage of coal vessels threw some of the collieries idle for a day or so. The fine weather gave an impetus to outside work and farming.

Building and allied trades were still quiet, although men usually employed in doing this work were busy at something else.

Transportation by rail and by water was fairly heavy, especially in the latter part of the month.

The weather though cold was fine and dry, which gave the farmers every opportunity for planting. A large amount of work was done in the last two weeks of the month.

The coal companies are this year again encouraging gardening by giving free to their workmen all the stable manure of the collieries, and horse, ploughs and harrows to lighten and cheapen the work of planting.

Very little fishing was done until the latter part of the month, because of the drift ice on the shore. Since the departure of the ice considerable herring have been taken.

Truro.

All branches of labour were fully employed. There was a slight falling off in railway transportation, but not to any great extent.

Lumbermen were exceedingly busy sawing the winter cut, which was very extensive.

Seeding was about completed. The shortage of labour in that respect was met by releasing a number of soldiers for thirty days for farm work. The acreage will be fully up to last year.

Considerable building was in view, and the outlook was bright.

Business, wholesale and retail, was very satisfactory.

Westville.

There was little or no change in general labour conditions from those reported last month, and there was a heavy demand for all classes of labour.

Railway traffic returned to normal, and freights were being handled with more despatch than for the preceding month. Wholesale and retail trades also, as in the previous month, continued extremely busy.

Lumbering was active.

The different coal mines in the locality were all working full time.

PRINCE EDWARD ISLAND.

Charlottetown.

Labour conditions experienced little change from those of the previous month.

Activity was reported in carpenter, paperhanging and decorating trades, while other industries were well employed.

Fishing was backward. No local catches of cod or haddock were reported.

NEW BRUNSWICK.

Fredericton.

Building trades were well employed, and the various manufacturing industries were working at full blast.

Both wholesale and retail business was more active during May than in the previous month.

Moncton.

Industrial and commercial conditions during May were very satisfactory and the volume of employed labour, owing to the natural development consequent upon spring conditions, was considerably in excess of that of the previous month. Building operations showed a considerable revival, but owing to the completion of most of the contracts for public buildings, were not expected to be on as extensive a scale as last year. Local manufacturing plants were in active operation and in some cases night shifts were employed in the endeavour to fill orders.

The Charlottetown Steam Navigation Company operating heretofore in the summer season between Point du Chene and Summerside; P.E.I., and between Pictou and Charlottetown, have sold their steamers *Northumberland* and *Empress* to the Dominion Government and the service will henceforth be conducted by the Railway Department. The initial trip of the season was made April 28.

Customs receipts at the Port of Moncton showed collections for April \$10,560.32 as against \$8,053.69 for April, 1915, an increase of \$2,506.63.

The barber establishments in the city to the number of 16 have issued a circular notice stating that after June 1 the price of shaving will be advanced from 10 cents to 15 cents and a hair cut with beard trim will be 40 cents, owing to the increased cost of all accessories and supplies.

Retail trade continued exceptionally good and wholesale trade satisfactory. Rents remained steady and houses in good demand.

In the Canadian Government railway shops the Saturday afternoon holiday again came into effect May 6 for the summer season.

Newcastle

All classes of labour were employed to the fullest extent and a scarcity of help was reported in many lines, notably

amongst skilled labour. All local industries were busy.

Sawmills on the river were working full time with capacity crews.

At a meeting of citizens held on May 3 the project of adopting the "Daylight Saving" plan in Newcastle was rejected as not being in the best interests of the working class.

Many new dwelling houses were in course of construction.

St. John.

Business generally continued to improve, and the outlook in the building line was good.

Customs receipts for April were \$349,023.19, and for the corresponding period last year \$229,819.15, an increase of \$119,204.04.

Inland revenue receipts for April, as compared with April, 1915, were \$5,174.83 greater, as follows: 1915, \$20,222.07; 1916, \$25,396.90.

Fourteen million bushels of grain were shipped by the Canadian Pacific Railway through St. John during the past winter. Up to March 31 the export shipments, apart from grain and lumber, amounted to 815,555 tons, compared with 478,090 tons in the same period last year. The imports for the season show a slight drop, having been 46,822 tons this year as against 50,291 in the previous year.

QUEBEC.**Hull.**

All the sawmills were in operation and working full time. Labour was scarce and great difficulty was experienced in securing men for public works, wages going up as high as \$3 per day.

Business in general showed a substantial increase as compared with the preceding month.

Montreal.

May has been one of the best months for Montreal manufacturers and for most classes of labour since the war

broke out. Manufacturers of dry goods were so loaded with orders that they were considerably behind in deliveries. Manufacturers of clothing, furs and boots and shoes report greatly increased orders.

Boot and shoe factories have rarely been so busy in May. As a rule their spring orders are completed in April, but nearly every one of the local factories were well employed. For this reason tanneries do full work even though prices have advanced greatly in recent months.

Glove factories were working on large orders, although they find difficulty in getting all the material they want. General foundry men were not actively employed, and the market for pig iron has been quiet, but all other metal workers were being kept very busy.

Textile mills have been well employed, and the Dominion Textile Company has withdrawn all quotations for grey and bleached cottons for a time. The company had in the year ending March 31 a record year for sales and the highest net profits in its history. At the annual meeting of the company at the end of May it was stated that difficulty was being experienced in manufacturing shirtings and prints due to the shortage of dyes and chemicals. A large number of new lines which were not made in Canada before the war broke out had been added to the company's output. The company has now 10,000 looms and 464,144 spindles in operation, employing more than 7,000 hands.

At the Angus shops there were nearly as many men at work as there ever were, the employment being divided between the demands arising from the war and the ordinary repairs. The Canadian Car Company has orders for about 5,000 cars on hand, ensuring activity for some time to come.

Although ocean vessels have not come as they did before the war, enough large ships came up the St. Lawrence to deal fairly well with the demand for space. The river and lake steamers have been running constantly. Less coal is coming

from the Maritime Provinces and more is coming in lake boats from American ports. Less than one-quarter of the wheat brought down in 1915 came to the port through the Lachine Canal, but the railways brought very much more than they did last year.

The Canadian Vickers Company launched the ice-breaker "J. D. Hazen" on May 15, an event believed here to prelude the building of many ocean ships at Montreal. On the same day the addition to Elevator No. 1, making it the largest seaport elevator on earth, was started in operation.

The Cunard and Thomson lines advertised for watchmen and checkers in May, stating that preference would be given to discharged soldiers of good character.

On May 31 the Board of Control ordered notices to be sent to 1,200 city employees to the effect that their services would no longer be required after December 31. The idea is to clear out sinecures and replace unfit men appointed by the help of patronage.

Daylight saving is being strongly urged by the Board of Trade here, and other bodies are considering the question as to whether it would be advantageous to move the clock ahead for an hour. The Trades and Labour Council have declared against the principle so far as municipal regulation is concerned, but reserve their opinion on federal action.

May, 1916, was the most active month in the history of the Montreal Stock Exchange. A new record was made in customs receipts, for the harbour and in inland revenue collected. The Montreal bank clearings for the month were the best in the city's history.

Montreal.

(Woman correspondent.)

Women were very well employed during May. Labour conditions proved much better than those of the corresponding month of last year. Factory

workers have kept busy, laundries and restaurants were preparing for their busy season by increasing the number of their hands. In domestic service it has been noticed that young girls have given up good places, attracted by the pay offered in factories.

Nurses have been busy. Six new graduates have been added to the number of competent trained nurses in Montreal. The Victorian Order of Nurses reported that 12,365 visits had been made by its 63 nurses during April.

The second annual meeting of the Montreal Housewives' League took place at the beginning of May. The work done by the League in its campaign in the interest of unadulterated food and sanitary conditions in stores was discussed. Much has been done by this body in improving conditions for women working in laundries.

The Montreal Northern District of the Women's Christian Temperance Union held its annual meeting during May. Besides the usual aid given by such bodies to those in need, the W.C.T.U. has organized a service of "travelers' aid" work. During the year 2,700 trains were met and over 200 girls assisted. This work is carried on in conjunction with the Y.W.C.A. Among the several resolutions passed was one favouring prohibition; another endorsed mothers' pensions.

At the annual meeting of the Catholic Social Service Guild an account of the year's work gave the following details: During the year 650 cases had been registered; 628 offers of work had come from prospective employers; 190 permanent situations were found; 275 persons given temporary employment; 26 persons were placed in homes; six given legal aid; material assistance was given to deserving cases.

The Parks and Playgrounds Association has devised many new ways of attracting children to the playgrounds and of supplying useful and pleasant amusements. In order to give them more interest in their physical drill, classes

have been formed at which they learn "Rustic" and "Folk" dances, and give demonstrations on certain days of the week.

The approach of summer has brought the question of increasing the number of playgrounds in congested quarters where the street is the usual place of recreation for the young.

The Society for the Protection of Women and Children had, during the month of April, to look after 59 women and 171 children. Twenty-six cases of non-support were brought to the notice of the authorities, as well as five desertions.

Quebec.

Building trades were all busy. Log driving was pretty well advanced and quite a number of mills commenced cutting.

Sherbrooke.

The labour market was still active. There was a scarcity of almost all kinds of labour owing to enlistments and the increasing demands in factories and on farms.

There was quite a lot of building going on.

The Eustis Copper Company at Eustis has rebuilt its building destroyed by fire last fall and was again running its mill.

All the lumber mills were running and the market for lumber was improved.

Mining in asbestos, chrome iron and copper was still active.

The closing of the Tobin Manufacturing Company at Bromptonville has made the labour market quiet in that town.

Sorel.

Labour, both skilled and unskilled, was well employed. There has been much activity in industries, especially in foundries and the various shipyards.

Saw mills and shingle mills were active.

St. Hyacinthe.

The general condition of the labour market was good. Labour in general was well employed, and the supply did not meet the demand. The month was more active than the corresponding month last year. Local industries were all well employed.

Activity prevailed in all lines of the retail trade, while the wholesale business had a good month.

Weather conditions being favourable, farmers were busy seeding.

St. John's and Iberville.

Labour was well employed and all local industries reported a good month, some concerns increasing their staffs.

Navigation on the Chambly canal opened May 1 and a good many American boats have come here during the month.

Customs receipts during May were \$35,105.06, as against \$21,773.08 during the corresponding month of last year, or an increase of \$12,331.98.

Merchants and banks reported a good month.

Three Rivers.

Labour conditions as far as the building trades were concerned compared favourably with the corresponding month of last year and were better than last month. Outside labourers on paving work, as well as corporation labourers, were well employed.

The opening of navigation made the harbour busy the whole month.

Factories were all fairly active, but would have done better if they could get the raw material more easily.

There was a good demand for unskilled labourers at Cap de la Madeleine and at Shawinigan Falls. The supply was not half way up to the demand.

ONTARIO.**Belleville.**

Labour conditions were good, and there was a heavy demand for labourers and farm helpers.

The various industries were working full time, and overtime in some instances.

Berlin.

Labour conditions were very good. There was a shortage of machinists, trunk and bag makers, carpenters, machine hands in furniture factories, finishers, upholsterers, ironers for shirt factories, butchers, shippers and hand lasters, as well as unskilled labourers and girls and boys for button and shirt factories.

Furniture factories, shoe factories, breweries, robe and clothing, button, shirt and collar, whitewear, rubber factories, biscuit and confectionery, tire factory, wholesale sausage factories and foundries were all very busy, some working overtime. The building trades were fairly busy.

Wages were on the up grade in factories as well as for unskilled labour.

Brantford.

Labour conditions were very good. There were no new buildings or public works being undertaken on account of the shortage of labour.

Railways in both passenger and freight departments were busy.

Beginning June 3 the clocks of the city will be set forward one hour for the daylight saving scheme.

The chief industries, those manufacturing farm implements, etc., were very busy, but business has slackened up considerably until harvest machinery is required.

Brockville.

All classes of labour were well employed.

The supply was not equal to the demand in many classes. Activity prevailed in building.

There was exceptional activity in steel, iron, brass, motor car and carriage manufacturing.

Steamboat and railway business was good in both freight and passenger traffic.

Chatham.

The demand for labour during May exceeded that of the previous month. Many of the industrial plants were unable to secure a sufficient number of mechanics to keep up with orders secured. Bricklayers and carpenters were in great demand.

The Dominion Sugar Company was unable to secure sufficient local labour from the city labour bureau and were compelled to bring in a large number of men from outside places.

Railway freight deliveries were very large. There was a shortage of cars. Passenger traffic was only fair.

Cobalt.

Recent developments at both silver and gold mining camps have been very encouraging, especially in the number and in the value of the many new discoveries made in the gold camp and in the rise in the price of silver which stimulated the silver mining industry in Cobalt. The various producing companies in Porcupine were all striving towards a higher production by increasing their mill capacities. Chief among these are the Hollinger, which was preparing to raise the capacity of its mill to almost double the daily tonnage. The Vipond was making a start towards increasing its capacity by 50 per cent and the other companies were crowding their milling capacity to the extreme limit. In Cobalt new mining companies, or rather old ones that have been idle for some time, were preparing to re-open. Included among these are the Ophir and John Black, or what is now the People's

Mining Company. The Columbus has resumed operations and the old Cochran was being worked by the Crown Reserve Mining Company under option.

In connection with the local labour situation there was if anything a shortage of help. This condition was more marked in the Porcupine camp than in Cobalt, although there were no idle men here. Some of the Porcupine mines had difficulty in securing sufficient help, especially muckers and trammers for underground work.

Galt.

Every branch of business was having trouble in securing necessary hands.

Customs returns for April showed a slight decrease. The returns are: 1916, \$38,395.04; 1915, \$40,671.59, a decrease of \$2,276.55.

Guelph.

Labour conditions for May were very satisfactory and showed a marked improvement over the corresponding month of last year.

Building trades were well employed and metal trades had an active month with no idle men. Textile workers were particularly active, working day and night shifts with a shortage of skilled workers.

Manufacturers were in a better position than they have been for months past and a scarcity of men for some lines of factory work was reported. There was also a demand for female labour.

The various civic commissions find the carrying out of civic works retarded by the scarcity of unskilled labour.

Customs returns for May totalled \$37,936.89, being the largest revenue ever received at this port in any one month and an increase over the corresponding month of last year of \$16,073.41. Trade generally was satisfactory.

Hamilton.

The large industries continued to do well, not only on large war orders but on orders for farm implements and construction equipment.

Retail and wholesale trade was very brisk.

Building trades were all very active and master builders met all demands of trade unions on May Day. A number of trades received increased wages and other concessions.

Reports showed very little seeding had been done up to May 15, the ground being too wet, but fall wheat, hay and clover crops were reported in splendid condition. The fruit crop promised to be very good.

The scarcity of dwelling houses will be somewhat relieved by the number of small and medium sized houses being built this spring. A number of extensions to factories and warehouses were also being erected.

Work has been started on the Toronto-Hamilton highway and if the season proves an average one the road will be finished by September 1 with the exception of all bridges.

The great increase in customs house business in Hamilton is shown by the April returns, the collection being more than 50 per cent above the same month last year. The figures are: April, 1916, \$519,422.34; April, 1915, \$327,041.25; increase \$192,381.09.

The inland revenue receipts for April were \$124,272.92, compared with \$116,931.71 for the same period last year.

On account of the shortage of labour in the city, 12 aged people have left the House of Refuge and secured positions. Some have started to work for contractors, who are now willing to take anyone.

The Hamilton City Council has adopted the recommendation of the Board of Control to put into effect the daylight saving measure, whereby at nine o'clock June 4 the citizens of Ham-

ilton will be asked to put their clocks and watches on to ten o'clock. The secretary of the Canadian Manufacturers' Association appeared before the Board of Control in the interest of the manufacturers who favoured the adoption of a provincial measure enacting the daylight saving scheme, and the majority of Hamilton manufacturers it is claimed are willing to stand behind the city if it is adopted locally.

Kingston.

Labour conditions during May were much the same as in the previous month, the demand being far in excess of the supply. A good deal of building was being done and contractors found it hard to get sufficient unskilled labour to carry on the work. All industries and factories were very active.

The City Council has decided to pave quite a number of streets this year, but it is feared that the shortage of labour will delay the work. Operations were very active along the waterfront.

Exports for April totalled \$146,229.90, an increase of \$109,396.65 over the same month of last year. Inland revenue receipts for April totalled \$8,939.12, an increase of \$3,554.16 compared with April, 1915.

Customs receipts for April totalled \$36,510.40; the amount for the corresponding month of last year was \$21,184.42. The statute labour tax has been advanced from \$1 to \$5 by a special by-law of the City Council.

The Utilities Commission have reduced the electric power rates from 5 cents, 3 cents and 1 cent per kilowatt to 3, 2 and 1 cent respectively. The latest advance in prices is that of the barber trades, the price of a shave having advanced from 10 to 15 cents.

A motion has passed the City Council to put in effect a daylight saving scheme by putting the clock ahead one hour, the same to take effect from June 1.

London.

Labour generally was in demand. All kinds of factories and foundries were very busy, advertisements appearing daily in the local papers for men. The railroads were very busy also.

The city has commenced a large programme of cement sidewalks, sewers, asphalt roadbeds, etc., and all available labourers and teams were being engaged in this work.

The building trades were an exception to general conditions, and although there was a little doing, indications for much work were poor. At least 50 per cent of the workers in these trades have drifted into other occupations. Painters and paperhangers had more than they could do on housecleaning work.

Niagara Falls.

Highly satisfactory industrial conditions continued during May. Labour was never more fully employed. Wages showed a decided upward tendency. Increases were granted by several employing concerns.

The great congestion of freight on railway lines that existed at the beginning of the month gradually relaxed, but traffic continued to be heavy.

Fourteen of the principal manufacturing concerns in the city reported "busy" or "very busy."

Orillia.

Labour of all kinds found ready employment. Some building was going on.

As the result of an agitation carried on by the Ontario Department of Agriculture, a number of retired farmers have returned to work on the land. Some schoolboys also have found employment on farms for the summer. Farm wages have reached a higher point than ever before, men getting as high as \$45 to \$50 and boys from \$20 to \$30 a month.

Ottawa.

Material improvement in the labour situation was marked during May; a scarcity of labour being reported in some

cases. On the whole unemployment was at the minimum since the beginning of the war. The building trades experienced a sudden renewal of activity and carpenters in particular were busy, the outlook for the summer being pronounced promising. Machinists and iron workers generally were in demand; a scarcity of labourers was reported; pulp and paper makers were fully employed, and the other leading trades were, for the most part, active.

A scarcity of labourers threatened to interfere seriously with several civic projects. "Outside" agencies in an endeavour to secure labourers in Ottawa have offered as high as 37 cents an hour.

The month closed with the employees of the Ottawa Electric Railway Company and the machinists employed by the Ottawa Car Company both negotiating for renewal of agreements, an increase being sought in each instance.

High water in the Ottawa river interfered considerably with the Chaudiere industries during the month.

Farm labour was in big demand and was scarce.

Owen Sound.

In some lines of work the supply of labour was not equal to the demand. This was true of skilled workmen and mechanics.

Trade generally was good. Money seemed fairly plentiful.

Peterborough.

Labour conditions were better than they have been for the last two years and many of the manufacturing plants found it hard to get help.

Building trades were well employed, although the weather during the greater part of the month was unfavourable for outdoor work. There was a good demand for all classes of workers, both male and female.

Port Arthur and Fort William

Labour conditions during May were similar to those of the preceding month.

Fishermen have resumed their stations for the summer along the coasts and various islands and lakes and the fishing tugs were all actively employed in raising nets and making their collections of fish from the various stations.

In the mining district many claims have been registered in the Kow-Kash district with the result that the Provincial Government has appointed another recorder, whose headquarters will be at Fashoda.

Contracts have been signed both in Fort William and Port Arthur for the erection of new elevators and work was expected to begin inside the next month.

Sault Ste. Marie.

The commencement of the new power canal created a demand for men and wages of ordinary labour advanced 25 cents per day. The two trap rock concerns at Bruce Mines and Richard's Landing also employed many hands. Some new buildings were projected, the construction of which was expected to improve conditions in the building trades within the next few months.

Stratford.

All manufacturing concerns were busy, especially woollen and knitting factories, some of which were contemplating additions to plants.

Building trades, city outdoor workers and agricultural labourers have been somewhat quiet owing to weather conditions.

Wholesale and retail merchants reported business good.

Customs returns for April totalled \$25,020.67, an increase of \$6,782.83 over the same month of 1915.

Inland revenue returns were \$5,898.11, a small increase over the month of April, 1915.

St. Catharines.

The general condition of the labour market continued to show improvement. Work on the canal was proceeding steadily.

Thorold.—The general conditions of the labour market continued fair.

Pt. Dalhousie.—Labour generally was well employed during the month.

St. Thomas.

All classes of labour were in good demand, unskilled labour being particularly scarce. The scarcity was felt to a greater extent than last month because of the heavier demand for this class of labour by railroads and farmers. The railroads were experiencing some difficulty in getting suitable men to replace trackmen who have been induced to accept other positions on account of higher wage rates. A good many native Indians were employed at track work.

The building trades continued quiet, but there appeared to be a good demand for all the skilled labour offered.

Railroad traffic employees were not so well employed during the first two weeks in May as during the same period of April, but normal conditions prevailed towards the close of the month.

Wholesale trade was just fair and retail trade was not brisk.

Manufacturing establishments reported business fair, but complained of inability to get sufficient unskilled help. Shoe workers were scarce, with plenty of work on hand.

Toronto.

Labour of all classes was well employed during May, with a decided shortage in many lines. With the revival of building activity, the men engaged in the building trades, many of whom were idle earlier in the season, have found work. Painters were especially in demand.

The clothing and boot and shoe trades were active, with female labour much

needed. Railway and street railway men, express men, sailors and others engaged in transportation had plenty of work.

The Soldiers' Aid Commission is finding positions for returned soldiers as fast as applications are made. Up to May 3 positions had been secured for 714 men, of whom 383 were placed in Toronto. No difficulty has so far been experienced in finding work for returned soldiers.

Weston.—The Canada Cycle and Motor Company have secured a site of 28 acres on which they will erect a plant at a cost of \$100,000 to employ about 300 men.

York County.—The Ontario Government has approved a scheme of highway construction which will involve the expenditure of \$1,000,000 during four years. It was estimated that \$140,000 will be spent during 1916, the Government contributing 40 per cent of the total and the city and county 30 per cent each. When this scheme is completed there will be some 225 miles of good roads under the Toronto and York Highway Commission.

Toronto.

(Woman correspondent.)

Labour conditions were not changed materially during May. Practically every factory was busy, even to overtime three nights a week, and in many cases manufacturers have had to cancel orders because of inability to fill them within the stated time. The decrease in importation accounts for many of the orders.

Girls with or without experience were needed everywhere, and it was reported that many had come from Michigan to fill positions at Toronto.

The committee of the Toronto and York Patriotic Fund are striving to remove one of the causes of lack of domestic servants and charwomen. Through some misunderstanding soldiers' wives

accustomed to working by the day have believed that they were not allowed to add to the family income in this way, while receiving an allowance from the Fund. This has been responsible in part for the shortage of help.

The outlook is not encouraging for fruit growers, owing to lack of help in picking and packing fruit. Some growers have sent applications to the city collegiates, hoping to get older schoolboys by offering attractive camp life for the summer.

A report from the Immigration Office states that more than 300 women from Toronto sailed for England during the month.

Windsor.

There has been a very good demand for all classes of labour, especially in some branches of manufacturing and the building trades.

The civic works department had commenced the paving of numerous streets and the construction of sewers, which will mean a great demand for unskilled labour.

The supply of labour has been sufficient to supply the demand, there being a great influx from Eastern cities and towns.

Woodstock.

There was a general shortage of skilled labour for mechanical purposes. Many factory managers were complaining of the difficulty not only of securing new hands but of holding old ones, because of the competition of the other factories.

The scarcity of labour was being felt throughout the life of the community. There were no men to be had for gardening and other summer work. Female help also was very scarce.

Farmers, too, were short-handed.

Shopkeepers reported business keeping up fairly well. Money seemed plentiful.

MANITOBA.

Brandon.

During the past month labour generally was well employed.

There has been a good demand for farm help and, in consequence, no unskilled labourer has had to go idle. While the City Council is doing no local improvement work this year, a large number of the men that usually rely on civic work have left for Eastern cities, where they have been able to obtain work at good wages.

The building trades were fairly active, though no large buildings were under way.

Practically all seeding was completed and conditions were excellent, though the wheat acreage will be smaller than last year.

Winnipeg.

Industrial conditions generally showed improvement over those of April. The building trades were more active.

Engineering trades had plenty of employment. Woodworkers were fairly well engaged, as were those employed in the clothing trade. Leather workers and those in miscellaneous class were steadily employed. There was a scarcity of unskilled British labour, but the demand for foreign labour was easily met.

The inclemency of the weather at the early part of the month had a rather serious effect on seeding operations in agricultural districts, but much progress was later made in this regard.

Winnipeg.

(Woman correspondent.)

There was a great dearth of domestics. The Winnipeg Free Employment Bureau has been able to continue its average of placing one daily, but the demand exceeds all previous records. In the country the bureau reports being able to place women with children at

a slight reduction on the wages offered for an ordinary domestic. A record wage has been reached when \$1.25 per day and board was being paid by at least two employers.

The Stovel Company's building being burned May 2, several bookbindery girls were thrown temporarily out of work. At the time of the fire 50 girls were employed. The company were doing business the day following the fire in a detached portion of their concern, so that they have averaged 16 girls working during the month. Many of their staff were taken on by other bookbindery firms. The bookbinders were otherwise well employed, working full time.

Laundries and other factories were fairly busy, but the City's Bureau states that it is quite easy to fill ordinary demands for any such labour as is required, with one or two exceptions, who either offer low wages or where the condition of the workroom makes it an undesirable place in which to work.

Garment factories were working with full staffs, full time and sometimes overtime.

Tailoresses, milliners and dressmakers were well employed, as are also retail clerks. Good sales ladies were in demand and the number in stores and offices was increasing on account of women taking men's places.

Teachers were well employed, and many of the city teachers will go into playground work during school vacation.

Nurses are fairly busy; the number on the waiting list at the Registry, however, was larger than in the winter, the average being 18 for the month.

SASKATCHEWAN.

Moose Jaw.

There was a good demand for labour during May, principally for work on farms. Wages for this class of work run from \$45 to \$55 per month for an engagement lasting six or seven months.

There was a scarcity of men in most lines. Plasterers, stonemasons and carpenters, however, do not find ready employment, but other lines such as painters, harness makers and machinists were in demand.

Seeding was all finished in May and a smaller area put in crop than in 1915. Growth was somewhat backward, but heavy rains around May 25 gave it a good start. The crop has germinated well and only requires some warm weather to make rapid growth.

Some work trains were started during the latter part of the month. These will work on ballast as the heavy snow of the past winter left the track in poor condition.

Prince Albert.

Labour conditions were very quiet. Lumber mills commenced operations and were running day and night shifts, and will probably do so all season. This is practically the only industry of any extent operating in the district and gives work to a large number of men, chiefly of the foreign element.

The month was very cold and wet during the latter part and warm weather was greatly needed. Acreage was expected to be much the same as last year. Around the city there was an increased tendency to cultivate vacant lots for gardening, and quite a number of householders were keeping chickens as a source of profit.

Regina.

Labour was fully employed. Bricklayers had to be brought from other places. Carpenters were all working, and unskilled labour was very busy.

Railways were fairly busy, a large amount of freight being moved East.

The Imperial Oil Company were making good headway with their new refining plant. About 1,000 men were employed on this work, which has absorbed all the idle labour in the locality.

Farmers in the district had all their wheat sown, and were busy with oats. The weather has been fine but cold up to the last week of the month, when three days' rain started all the different crops growing well.

Saskatoon.

Normal conditions prevailed in the labour market in a general way. Some branches of the building trades were quiet, but these trades were temporarily seeking other lines of employment.

Some building operations were going forward in the rural districts. A shortage of lumber was reported from some outlying localities. Retail prices of lumber have been advanced from \$3 to \$10 a thousand.

There was a good demand for farm labour all through the seeding season.

Seeding was well advanced. On account of the late spring, considerable land has been stubbled in. General rain over the locality has contributed to a good growing season so far. There has been no labour shortage of any account.

ALBERTA.

Calgary.

There was little change in the labour situation during May. There were still a number of unemployed, mostly building mechanics. Apart from the building trades other classes of labour were fairly well employed. There was, however, every indication of an increased demand for building mechanics in the rural districts, quite a few contracts having been awarded for rural schools and other buildings.

A meeting of the Board of Trade and representatives of labour, farmers and others discussed certain industrial conditions likely to arise in Canada at the close of the war and agreed on the following suggestions which will be forwarded to the proper authorities: (1) That municipal labour bureaus be established in all large centres in Canada.

(2) That the Dominion Government be requested to establish a central labour bureau which will co-operate with the municipal labour bureaux. (3) That the Dominion Government be requested to compile statistics showing the occupation of all the soldiers at the time of enlistment. (4) That the Dominion Government maintain the soldiers on their return from the front until such time as they are absorbed in the industrial life of the community.

Seeding operations in the district were reported about completed.

Edmonton.

There was a small surplus of labour at the close of the month, composed principally of foreigners who found it difficult to procure employment. There was no building going on in the city, but a number of the building trades found employment in the country at their regular occupation, while others secured work in other lines. The demand for farm labour continued fair, with the supply equal to the demand.

Retailers reported a fair month, and wholesalers did a good country business, especially in the Peace river country along the line of the Edmonton, Dunvegan and British Columbia Railway, which was put in operation this spring.

Farmers were very busy seeding. The season is two or three weeks later than usual and the weather was rather cold. The acreage under crop will not be as large as last year.

One large sawmill was running to full capacity; the others have not been started this season.

Mine operators had a fair month considering the season of the year.

Lethbridge.

For the first half of the month employment conditions remained much the same as during April, but at the end of the month, owing to a very dry spell, there were more men idle as farmers

were going slower, waiting to estimate the character of the season.

The coal trade was keeping up to the extent of one half the output with the prospects of a steady increase.

The city had a little work in hand in extension of sewers and other repairs. There was no building. Flour mills were busy.

Farmers had about finished seeding, and at the end of the month there was less activity on farms and less employment for farm help.

The weather was too dry for seeding for root crops. Market gardens were suffering for want of rain. Poultry raising was receiving great attention.

Medicine Hat.

Labour conditions during May continued very satisfactory, showing a slight improvement over the previous month. There were none who wanted work out of employment.

There was very little activity in the building trades.

Nearly all the local industries reported activity.

Wholesale and retail trade was good.

Grain growing is being carried on by the farmers in this district on a larger scale this year, owing to the large crop reaped last year. Seeding was practically all finished.

Dairying was being carried on quite successfully. A large quantity of butter and eggs was being shipped to British Columbia. Poultry raising was also being carried on with good results.

The Dominion Harvester Company plant was burned to the ground on Thursday night, April 20, about 6.30 o'clock, and the building is a total wreck. The building and contents were valued at between \$75,000 and \$80,000, which included some \$10,000 worth of shells. The insurance on the building and contents was \$53,000, while the shells were fully covered against loss.

BRITISH COLUMBIA.

Fernie.

Employment during May showed a slight improvement over April.

Commercial activity continued to be very fair with respect to railway freight and passenger traffic, while the volume of business transacted in wholesale and retail trades was if anything better than during the preceding month.

The coal mines in the immediate vicinity of Fernie were being operated to the full capacities of the staffs employed. Operations in this industry would assume considerably greater proportions, it is claimed by the operators, but for the shortage of certain classes of labour, *i.e.*, haulage hands. It is maintained if an adequate supply of drivers (one subdivision of the haulage hands) could be obtained, employment in the mines operated by the Crow's Nest Pass Coal Company (Fernie and Michel) could be given to approximately 400 additional men, thereby increasing the output for this company alone some 1,500 tons daily.

Additional orders to this amount were being held in hand by the company and every endeavour was being made to obtain the additional staff, and if same is obtained, operations in the local mines will be carried on to full capacity during the summer months, which is usually the dull season in all coal mining communities.

Nanaimo.

There was not much change in the labour situation, and there was still a large number of idle men looking for work.

Business men, wholesale and retail, reported business as very quiet, there being very little demand for anything outside of the actual necessities of life.

Sawmills of the district were working steadily, but not to capacity. Logging camps were mostly in full swing.

- Coal mines in the city worked steadily, but other mines in the district have not done so well, especially those at Cumberland.

Nelson.

Labour conditions were somewhat improved. There were very few idle men and some of the mills and mines claimed they were having difficulty in securing men. Prospects for building trades were much brighter than at the same time last year.

New Westminster.

There was a slight improvement in the employment of labour, although no new work of any magnitude was opened up. The number of unemployed was materially reduced by enlistments and departures to other fields. Increased activity in logging, lumbering, agricultural and fishing operations all helped considerably.

A certain amount of building, alterations and repairs incident to the season was also noticeable as well as a certain amount of city work.

Fishing was rather poor, although prices remained good.

The lumbering industry was active with a good demand for all classes of lumber and shingles.

Factories were all fairly busy and were nearly all running full time.

Building was still slack and was likely to remain so for some time.

Prince Rupert.

Very little change took place in the labour market during May. Practically all idle men have been picked up by mining interests and lumbering firms in the outlying districts.

The tourist trade from the south to Alaska was beginning to open up, improving local trade and causing an increase of traffic over the Grand Trunk Pacific Railway. Longshoremen report-

ed business a little better than a year ago.

Another attempt is being made by the Grand Trunk Pacific to lease the dry-dock to an eastern firm. An engineer spent several days in the city inspecting the wharf and conferring with the City Council as to inducements either in the way of a bonus or free light, power, water, exemption from taxes, etc. No report has yet been given to the public as to the outcome.

The canneries along the Skeena and elsewhere in the district were preparing for the season's work. A new cannery was being erected at the north passage to the Skeena.

The lumbering industry in the district was very brisk. There is a demand for clear spruce for shipment abroad. A new mill was being erected on the Queen Charlotte Islands, and was expected to be in operation in a short time.

During the earlier part of the month the fishing industry was good, but later there was a slight dropping off and prices were higher with a greater demand.

Demands were still coming in for men from different mining centres.

Vancouver.

In a general sense there was a slight improvement in employment over previous months of this year, and there were decidedly less men unemployed than at the same season last year. But there is no shortage of labour in any line, and in some occupations, such as building, there was some unemployment, due to little activity in those trades.

Relief is still being given by the city to 200 families and 80 single men (the latter are all infirm) at an approximate monthly cost of \$3,000.

A by-law providing for the closing of all stores at 6 p.m. the first five days in each week is being considered by the City Council.

The same body is also considering the granting of trades licenses for coal and

wood dealers to ratepayers and voters only. It is pointed out that if this proposal is adopted it will debar Orientals from engaging in those businesses. Many Orientals are at present in the wood supply industry.

Customs returns for April totalled \$466,816.20, as compared with \$297,515.56 for the corresponding month last year. The figures of the Assay Office showed an increase of 10 per cent over April last year.

The new Dominion Government elevator was tested with two carloads of wheat. It is expected that wheat from the prairies will be routed through here next fall, and the completion of the elevator is looked upon as an important event in the development of the economic life of the seaport.

Civic estimates for the year have been finally adopted, all departments being heavily reduced as compared with previous years. Only absolutely necessary new work is to be undertaken by the city this year.

Vancouver.

(Woman correspondent.)

The improvement in labour conditions for women noted in March and April was maintained during July. Most of the seasonal trades were active, with a little difficulty experienced in filling positions with skilled workers in some trades, particularly operators for garment making.

The improved conditions were not due to an increase in the demand for labour, but to a decrease in the supply, many women having left the city. Where the demand showed an increase over the demand for a similar period of last year, such as operators, the cause was due to war orders for clothing.

In particular employments, reports show that during the past month a decrease in the supply of domestic help made somewhat difficult the filling of all positions offered. Wages for domestic help showed a slight increase, from

\$12 to \$25 being offered for general help.

The demand for cooks, housemaids or nursemaids was very low, the usual call being for general help.

In factory employments, while very little increase in demand was noted, all employed were fully occupied. Garment workers, dressmakers and milliners were busy, sales clerks, boot and shoe workers, candy workers, laundry workers and those working on the manufacture of tins were fully occupied.

The demand for stenographers and office assistants remained low, the positions offered being chiefly of a temporary nature, or substitute work. A few women have been taken into some of the local banks to fill the places left vacant by young men who have enlisted. Telephone operators were fully occupied, but no learners were being taken into the school.

The reduction of the teaching staff of the schools of the city was under consideration by the Board of School Trustees, as an endeavour to reduce expenditure; the estimates for school year submitted to the City Council by the School Board having been considerably reduced, making economy necessary.

Victoria.

Labour conditions remained practically unchanged during May from those of the previous month. Building trades and unskilled labour continued quiet, while in nearly all the metal trades work was brisk, with fair prospects for the immediate future.

In future all outside employees of the city will be placed on full time, and the alternative shift system which has been in force since last September has been abolished, having proved unsatisfactory.

The salmon canning industry will shortly be in full swing on the northern British Columbia coast, and the indications are that there will be increased activity this year, as at least two canneries which have been idle for the past two years are to resume operations this season.

The Saanich Municipal Council has refused the request of the outside labourers for an increase in wages from \$2.25 to \$2.75 per eight-hour day. The latter figure was the rate paid previous to the war.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS DURING MAY, 1916.

DURING the month of May, 1916, three applications were received in the Department of Labour for the establishment of Boards of Conciliation and Investigation. In two of these cases Boards were established by the Minister; the third application being under consideration at the close of the month. In connection with an application received during the preceding month,* namely that of the commercial telegraphers employed by the Western Associated Press, Limited, members of Canadian Leased

Wire Division No. 52 of the Commercial Telegraphers' Union of America, proceedings were held in abeyance to permit of negotiations which resulted in the necessity for any action by the Department being obviated.

The three applications above referred to are as follows:

An application was received on May 10 from the employees of the Acadia Coal Company, Limited, at Stellarton, N.S., to the number of 1,000. The dispute related to wages, hours and conditions of employment. A Board was established by the Minister on May 15

*See May, 1916, *Labour Gazette*, p. 1192.

and was constituted as follows: His Honour Judge E. Coatsworth, Toronto, Ont., chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board; Mr. Wm. H. Chase, Wolfville, N.S., the company's nominee; and Mr. R. H. Murray, Halifax, N.S., the employees' nominee. The investigation by the Board was under way at the close of the month.

An application was received on May 11 from the street railway employees of the Brantford Municipal Railway Commission, being members of Division No. 685 of the Amalgamated Association of Street and Electric Railway Employees of America, to the number of 27 directly and five indirectly. The application gave as the cause of the dispute the employees' demand for a written agreement with the Brantford Municipal Railway Commission and for increased wages, also that motormen should be provided with seats. A Board was established by the Minister on May 17, Mr. F. W. Frank, Brantford, Ont., and Mr. Jos. Gibbons, Toronto, Ont., being

appointed members thereof on the recommendation of the Commission and of the employees respectively. On May 23 the Board was completed by the appointment of His Honour Judge Colin G. Snider, Hamilton, Ont., as chairman, this appointment being made by the Minister in the absence of any joint recommendation from the other members of the Board. The investigation by the Board was under way at the close of the month.

On May 29 an application was received from the employees of the Consolidated Mining and Smelting Company of Canada at Trail, B.C., members of Trail Mill and Sheltermen's Union No. 105 of the Western Federation of Miners. The application stated that 1,200 employees were directly affected and 50 indirectly, and pertained to the employees' demand for increased wages and improved working conditions. A copy of the proposed schedule of agreement was attached to the application. At the close of the month the application was under consideration by the Minister of Labour.

WESTERN COAL OPERATORS' ASSOCIATION AND DISTRICT 18, U.M.W.A.—SETTLEMENT OF DISPUTES AT MICHEL, B.C.

THREE disputes between the Crow's Nest Pass Coal Company and certain of its employees at Michel, B.C., were referred during the month to the Permanent Conciliation Committee appointed under the existing agreement between the Western Coal Operators' Association and District 18, United Mine Workers of America, and covering many important collieries in South-eastern British Columbia and Southern Alberta. The independent chairman named by the Minister of Labour at the request of both parties was the Honourable Mr. Justice Edward P. McNeill, of Macleod, Alberta. The text of the committee's findings in each case is printed below. Disputes at mines at

Lethbridge, Alberta, and Taber, British Columbia, were also dealt with, but the findings of the committee had not reached the Department at the close of the month.

Yardage Dispute.

IN THE MATTER of a dispute at Michel Mines of the Crow's Nest Pass Coal Company.

This is a claim on behalf of certain miners to be allowed payment for what is known as "yardage," and was considered by a joint committee appointed under the provisions of the agreement now in force between District No. 18 United Mine Workers of America and

the Western Coal Operators' Association.

Following the provisions of the agreement the claim was made in writing, and is stated as being "for yardage on what is known as No. 3 main slope, old No. 3 mine." Admitting the necessity of bringing the claim within the four corners of the agreement the claimants before the joint committee based their claim upon the following clause:

Michel Colliery, No. 3 Mine—

Mining rate: 57¾ cents per gross ton.

Yardage: levels and parallels \$1.75 per lineal yard.

Even if former decisions were not binding as precedents as they appear to be by the agreement it seems abundantly clear that the agreement contains and provides no rate for payment of yardage in connection with slopes as such and the discussion in connection with this dispute makes it clear that no rate could fairly be prescribed in view of the great variance in the work required to be performed in driving slopes. As a fact the rate paid for yardage in slopes very frequently and almost invariably exceeds the yardage rate of \$1.75 provided in connection with levels. The claimants contended that the place in question called by them a slope served the same purposes as a level and therefore should be paid the same yardage rate and the fact that the place was subsequently used in the progress of mining for a purpose similar to a use made of a level was relied upon.

The actual work done by the claimants was of a character not distinguishable from ordinary mining work in a room and apparently was performed for a very considerable distance without the claimants entertaining any expectation of payment of yardage, and it would not appear equitable in the absence of any extra labour occasioned during the performance of the work for example by reason of the working place being narrowed as is usual in entries or in

changing a room into an entry or other similar place that the place could by reason of some future use be magically changed so as to entitle a workman who has been paid the full mining rate during the progress of his work to successfully demand at some more or less indefinite future time an extra payment such as yardage.

It follows that these claims must be disallowed.

Dated at Macleod, May 4, 1916.

Timbering Dispute.

IN THE MATTER of a dispute at the Michel Mines of the Crow's Nest Pass Coal Company, Limited.

This is a claim on behalf of certain miners to be paid for certain "timbering" and is based on the clause in the agreement now in force between District No. 18 United Mine Workers of America and the Western Coal Operators Association, as follows:

"Timbering: \$1.00 per set, with lagging and centre post when required by the company; \$2.00 per set for heavy timbers used in partings. Room timbers shall not be over 8 inches in diameter. Levels, inclines and slope timbers shall not be over 12 inches in diameter. Anything above that size shall be considered "heavy timbers".

and paid for at the rate of \$1.50 per set."

The timber provided by the company appears to have consisted of pieces most of which were 8 inches or under in diameter but some of which exceeded 8 inches in diameter.

It appears also to be a fact that after timber is set in the progress of the mining work it is and practically always in this mine has been usual to measure same by measuring the top piece or boom only and if this piece exceeds 8 inches in diameter to classify and pay for the set under the provisions quoted respecting "heavy timber."

The clause regarding "timbering" quoted from the agreement was doubtless drawn and settled, both parties having in mind this practice as to measurement and payment.

It also appears that miners relying upon this practice have when timbers of different sizes are at hand resorted to the practice of selecting the larger pieces for the boom, thus obtaining an advantage in measurement. At the same time it was admitted that ordinarily it is good mining practice to place the heavier timber in the boom, that being the point of greatest strain if any.

Apparently perceiving this practice on the part of the miners, and also with a view to gaining an advantage in the measurement, the company ordered the miners in question to use the heavier timber as posts. At the same time the company urges as an additional reason for their order their desire based on experience gained in the older portions of the mine to have the posts in the portion of the mine in question heavy.

There can be no doubt but that the provision of the agreement contained in the following words,

"Management of mine—

"The right to hire and discharge, the management of the mine and the direction of the working forces are vested exclusively in the company, and the United Mine Workers of America shall not abridge this right,"

confers on the company the undoubted right to give orders of the kind above referred to and it is equally without doubt that such orders should and must be obeyed by the men and that departure from obedience to such orders should surely not entitle a man to be paid extra for unauthorized work.

But the orders in question clearly required the men to use "heavy timbers" in some part of the "set," and it would be manifestly unfair if the company could be permitted to exact the extra work of setting heavy timbers anywhere without compensating payment by taking advantage of a method of measurement which by long usage had become recognized as a mutual right.

It would seem therefore that some solution must be reached which recognizes the right of the company to give orders and the right of the men to be paid for any extra work resulting from obedience to such orders.

Clearly the timbering provision quoted did not contemplate such a state of affairs, it being apparently worded having in mind the method of measurement already indicated, and also having in mind the practice in the absence of contrary orders on the part of the miner of selecting the largest piece for a boom.

This joint committee does not appear to have any right or power to make a rate for the extra work of using and placing heavy timbers as posts only nor would it appear that a rate could be arrived at by attempting to calculate a proportionate rate in view of the varying length of the pieces comprising a "set" in working places of varying widths and heights, and if this view is right then the matter must be left for agreement between the miner performing the work and the company.

It must be borne in mind that the company is bound to supply suitable timbers and therefore has the selection of the sizes in the first instance, and if it supplies and orders the use of "heavy timbers" as posts it should be willing to pay a compensating rate for same.

The claimants on the occasions in question were supplied in all with 84 pieces of timber; of these 37 were over eight inches, and 47 eight inches and under. Of the 37 heavy timbers twelve were used in placing four sets. Of the remaining 25 apparently seven were placed in booms (the claim being for eleven heavy timbers in all in booms), leaving 18 pieces which were properly used as posts.

The claimants should be paid at the rate of \$1.50 per set rate for heavy timbers for the four sets.

The claimants should also be paid something, the amount of which this committee has no power to determine, for the 18 pieces properly and in accordance with orders used as posts. We recommend a payment of \$3.50 for this extra work without, however, assuming to suggest same as a rate.

It is suggested that there may have been a practice in vogue at the time of drafting the timbering clause in question entitling the company to have heavy timbers used as posts or legs without extra payment. It is, therefore, declared this decision is reached without considering such a practice and should not therefore necessarily be binding in any future case in which such a practice may be shown.

A "Make-up" Dispute.

IN THE MATTER of a dispute arising at the Michel Mine of the Crow's Nest Pass Coal Company, Limited.

This is a claim by certain miners for the difference between wages earned and the minimum rate of \$3.00 per day, and is based on the clause in the agreement now in force between District No. 18 of the United Mine Workers of America and Western Coal Operators, as follows:

"Minimum rate—

"When a miner's working place becomes deficient, owing to any abnormal conditions preventing him from earning the minimum wage of \$3.00 per shift, the company shall pay him a sufficient amount to secure him the said minimum, providing he has done a fair day's work."

In a former decision dealing with a similar claim, it was very shortly and properly declared that three things must be established by the claimants in order to have such claims allowed, namely:

- (1) That the miner did not earn the minimum wage of \$3.00 per shift;
- (2) That the miner during the time for which the claim was made had done a fair day's work;
- (3) That the miner was prevented from earning the minimum wage owing to abnormal conditions existing where the work was done.

In these claims it is admitted the first of these conditions was met, namely, that these miners did not earn the minimum wage, but it is contended the remaining two conditions are not met.

The facts appear to establish the work was in a cross-cut which the workmen had been instructed to drive eight and one-half feet wide. This width was maintained for a distance, and then the

workmen admit narrowing the cross-cut, but claim it was a usual practice to do so in order to "get through" more speedily, and they assert that in doing so it did not occur to them they were disobeying orders.

A little farther on in the cross-cut during the absence of some of these claimants another miner was employed on the work and he drove the full ordered width, and while working in the place earned more than the minimum wages. It is admitted that this miner was a highly experienced workman, and that he might have found conditions on his arrival such as to give him an advantage, but while admitting this possibility the company does not regard it as probable and no evidence was produced to establish it. After the work was resumed by the claimants they again narrowed the working place to as narrow as five and one-half feet and so continued to completion.

The claimants contend the reason they failed to earn the minimum rate was they had encountered a hard place in the seam of coal and that this constituted the abnormal condition, and it is admitted there was a hard place in the seam of coal in the room off which the cross-cut was turned, but it was also conceded this hard coal was on the opposite side of the room from the beginning of the cross-cut.

It is further admitted, and indeed is obvious, that under ordinary conditions men could not earn as high a rate of wages at a working face $5\frac{1}{2}$ feet wide as they could at one $8\frac{1}{2}$ feet wide, so that some portion at least of the deficiency in earning must be attributed to the narrowed working which was the

workmen's own act and clearly not an abnormal condition, and emphasis is placed on the fact that the independent workman working about the centre of the cross-cut at the prescribed width encountered no abnormal conditions and did earn in excess of the minimum wage.

It is regrettable there is no way of ascertaining at what stages of the work the lessened earnings occurred and that the rate of earning at the beginning of the work cannot be estimated, and it is equally regrettable that the workmen do not appear to have drawn the attention of any over-man to any abnormal conditions during the progress of the work which would seem to have been a natural thing to have done in anticipation of lessened earnings.

It was admitted that the presence of harder coal in the seam would in all likelihood have occasioned the use of an increased quantity of powder, and statements were produced to show that these claimants used a comparatively small quantity of powder during this particular work.

While the claimants may be quite right in their contention regarding the practice of narrowing cross-cuts it surely must follow they do so at their own risk as to reduced earnings and more particularly so if they do so contrary to orders. It might be suggested that the main reason for their desire to get through is with the view to more speedily returning to the work in the rooms which is of course more profitable, but it would surely be most inequitable to compel the company to submit to a disregard of the ordered method of working and at the same time to be compelled to pay extra.

The inferences therefore appear unanswerable, and to be that the lowered earnings resulted from the claimants' own unauthorized narrowing of the working or other causes within their own control and not from any abnormal conditions shown, and that it must be held they have failed to establish their claims.

United Mine Workers of America.

TRADE DISPUTES DURING MAY, 1916.

INDUSTRIAL conditions in certain localities were appreciably disturbed during May by the existence of 17 disputes, four of which were carried over from April. As a result of the 13 new disputes occurring in May, 38 establishments and 2,007 employees were involved; adding to these the four firms and 1,397 employees affected by the disputes carried over from April gives a total of 42 establishments and 3,404 employees involved in the 17 disputes on record as existing during May. The time losses occasioned by the 13 May disputes amounted to 17,712 working days, while those resultant from the four April disputes were 8,992 working days, or an estimated total of 26,704 working days lost to the employees affected by the 17 disputes. The minimum and maximum duration of the May disputes was from three to twenty-six days. Settlements were amicably effected in the case of the four April disputes; seven of the May disputes ended during the month, while in the case of two others no definite settlement was reported to

the Department, but they were regarded as having become ineffective owing to the places of the strikers being filled.

Disputes beginning before May.

New disputes in May, 1916. — The table below indicates the trades affected by the disputes beginning during May:

TRADES	No. of disputes	No. of firms.	No. of employees.
Building	2	15	60
Metal	3	3	300
General transport	6	15	994
Miscellaneous trades ...	1	4	53
Unskilled labour	1	1	600
Total	13	38	2,007

Four of the disputes carried over from the April record ended during May. These were:

Miners, Stellarton, N.S.—On April 18, 1916, miners to the number of 1,188 employed in the mines of the Acadia Coal Company at Stellarton, N.S.,

ceased work on their demand for increased wages being refused. The strike terminated as a result of the men voluntarily deciding to apply for a Board of Conciliation under the Industrial Disputes Investigation Act. Work was resumed in the mines on May 8.

Machinists, Peterborough, Ont. — Thirty-nine machine fitters and drill hands in the employ of the Canadian General Electric Company at Peterborough, Ont., ceased work on April 19 owing to their demand for an increase in wages of 75 cents per day being refused. The dispute was amicably settled by the employees accepting the company's offer of 25 cents per day. Work was resumed on May 19.

Cigar Makers, London, Ont. — On April 17, 130 cigar makers in the employ of John McNee & Sons, cigar manufacturers, at London, Ont., ceased work to enforce their demand that the management dismiss a foreman in the factory. The company refused to dismiss the foreman. The employees eventually returned to work on May 10, the company retaining the foreman in their employ.

Grain shovellers, Port Arthur, Ont. — On April 28, grain shovellers to the number of 40 employed at Elevator "D," owned by the Canadian Pacific Railway Company at Port Arthur, Ont., ceased work to enforce their demand for increased wages. Their action was followed May 1 by the grain shovellers in four other elevators at Port Arthur and Fort William. The strike was brought to a close on May 5 by the employees accepting the terms offered them by a committee representing the owners of all the elevators affected. (See reference to dispute affecting four other elevators.)

Disputes beginning during May.

Carpenters, St. Catharines, Ont. — A strike affecting the carpenters employed by 14 firms, members of the building exchange at St. Catharines, occurred on May 2, as a result of the refusal of these

firms to accede to the demand of the carpenters for an increase in wages from 43 to 50 cents per hour. The dispute was unsettled at the end of the month.

Carpenters, Quebec, Que. — Twenty-five carpenters in the employ of the Deakin Construction Company, Limited, working on an extension to the Ross rifle factory at Quebec, ceased work on May 12 owing to their demand for an increase in wages from 30 to 35 cents being refused. The strike was unsettled at the end of May.

Machinists, Brantford, Ont. — One hundred machinists in the employ of the Waterous Engine Works Company, Limited, Brantford, Ont., ceased work on May 1, owing to their dissatisfaction with a foreman in the establishment. After several conferences between the company and the strikers' representatives, a settlement was effected on May 10 to the satisfaction of the men.

Machinists, boilermakers, blacksmiths and car repairers, Hamilton, Ont. — One hundred employees of the mechanical department of the Toronto, Hamilton & Buffalo Railway went on strike on May 20 as a result principally of the company refusing to put into effect on March 1 an increase in wages awarded by a Board of Conciliation under the Industrial Disputes Investigation Act. The company put the award into effect on May 1 instead of March 1, and as a protest the men ceased work. The dispute was unsettled at the end of the month.

Gas workers, Winnipeg, Man. — One hundred gas workers in the employ of the Winnipeg Electric Railway Company, at Winnipeg, Man., went on strike on May 20 on account of the dismissal from the company's employ of one of their fellow employees. The company, however, refused to reinstate the dismissed employee, and the men resumed work on May 30.

Grain shovellers, Port Arthur and Fort William. — On May 1, grain shovellers to the number of 120, employed at the Dominion Government grain ele-

vator and the Thunder Bay Elevator Company's elevator at Port Arthur; the Eastern Terminal elevator and the Grain Growers' elevator at Fort William, Ont., ceased work demanding an increase in wages from 28 to 30 cents per hour. After several conferences between a committee representing the owners of the elevators and the strikers' representatives, the men returned to work on May 5. The demand of the strikers for increased wages was not acceded to, but the shovellers at the Dominion Government elevator were placed on a monthly salary basis of \$75 per month, with overtime at the rate of 28 cents per hour. It was reported that the management of the other elevators affected would also adopt the monthly salary plan.

Freight truckers, Port Arthur, Ont.—About 100 freight truckers employed on the docks of the Canadian Northern Railway at Port Arthur, Ont., went on strike on May 2 demanding increased wages. The strike ended on May 5 by the company filling the places of the strikers.

Teamsters, Montreal, Que.—On May 1,500 teamsters employed by the Dominion Transport Company and the Shédden Forwarding Company went on strike for an increase in wages from \$2.15 to \$2.50 per day. After several conferences between representatives of the cartage companies and the teamsters, the latter resumed work on May 13, accepting the companies' offer of \$2.25 per day.

Dairy drivers, Vancouver, B.C.—On May 5, 60 dairy drivers employed by four dairy companies, namely, the Standard Dairy Company, Pure Milk Dairy Company, the Valley Dairy and Turner's Dairy, ceased work owing to

dissatisfaction with certain conditions of their employment. Several conferences between the representatives of the dairies and the drivers failed to effect an amicable settlement. The strike was reported ineffective owing to the companies filling the places of the drivers.

Teamsters, Hamilton, Ont.—Fourteen teamsters employed by the Grant Cartage Company at Hamilton, Ont., went on strike on May 8 for an increase in wages from \$12 to \$14 per week. The company refused to grant the demand but offered the men \$13 per week, which was accepted. The teamsters resumed work on May 12.

Teamsters, Winnipeg, Man.—About 200 teamsters employed by the Manitoba Cartage Company, the Canadian Northern Railway Company and the Canadian Northern Express Company at Winnipeg, went on strike to enforce their demand for an increase in wages from \$2.25 to \$2.50 per day. The dispute was still unsettled at the end of May.

Restaurant employees, Edmonton, Alberta.—On May 16, 53 restaurant employees (cooks, pantrymen, waiters, waitresses and dishwashers) employed in four restaurants, namely, the Arcadia Café, We Should Worry Café, Phoenix Café and the Broiler Café, went on strike for increased wages. The dispute was unsettled at the end of May.

Labourers (Welland Canal), Thorold, Ont.—On May 1, about 600 labourers employed on the Welland Canal construction work in the vicinity of Thorold, Ont., ceased work to enforce their demand for increased wages. The dispute ended by the men returning to work on May 8 at the rate of wages prevailing prior to the strike.

TABLE OF TRADES DISPUTES IN EXISTENCE DURING MAY, 1916.

MUNITIONS INDUSTRY INQUIRY.

Report of Commissioners Appointed by the Minister of Labour to Inquire into Certain Concerns in Toronto and Hamilton.

AS was mentioned in last month's issue of the *Labour Gazette*, a Royal Commission appointed on the recommendation of the Minister of Labour conducted during the month of April an inquiry into conditions in Toronto and Hamilton in industries connected with the production of munitions of war, the commissioners being His Honour Colin G. Snider, Hamilton, Senior Judge of the County of Wentworth; William Inglis, Toronto, manufacturer; and J. A. McClelland, Montreal, Vice-President of the International Association of Machinists.

The report of the Commission was received by the Minister during the month of May and copies of the same in printed form were immediately distributed among the manufacturers and workmen concerned. The text of the findings of the Commission is as follows:

To the Honourable
the Minister of Labour,
Ottawa.

The commissioners appointed by Royal Commission bearing date the eleventh day of April, in the year of Our Lord 1916, to make inquiries and investigation concerning the relations between employers and employees in the industries in Toronto and Hamilton producing munitions of war, began their inquiries, pursuant to appointment, at Toronto on Tuesday, the eighteenth day of April, 1916, and continued on subsequent days, hearing evidence, visiting and examining the said industries and

interviewing machinists and others working therein to such extent as was considered necessary by them and by the employers and employees interested to enable the commissioners to become fully conversant with the nature, extent and cause of the unrest existing and to make such recommendations as in their opinion may serve to promote amicable relations and to remove or lessen the friction which in some cases they have found does exist.

Subsequently, on the second day of May, 1916, and subsequent days by appointment, the commissioners, by similar means and to the same extent, made inquiries and investigation at Hamilton into the relations between employers and employees in that city in the industries producing munitions of war, and they find in Hamilton unrest exists of the same nature to much the same extent and due to the same causes as in Toronto.

The machinists and tool-makers are the only employees who appear to be dissatisfied, and their chief complaints are:

1. That the minimum rate paid per hour is not sufficient;
2. That the number of hours constituting a day's work should be nine hours instead of ten hours as at present prevails in several of these industries in Toronto and in practically all such industries in Hamilton;
3. That overtime should be paid for at the rate of time and a half;
4. That work on Sundays and holidays should be paid at the rate of double time;

A schedule of rules and rates in considerable detail was presented by the machinist employees belonging to labour organizations to each industry in both Toronto and Hamilton in which machinists and tool-makers are engaged, without regard to the manufacture of munitions of war, with a request to have an agreement entered into by the employers with their said employees embodying this schedule. In a considerable number of the industries in Toronto engaged in producing munitions of war as well as others not so engaged, such an agreement has been entered into, but in several large industries in Toronto and in all in Hamilton so engaged the employers have for various reasons given by them in the evidence taken by us refused to enter into it.

The commissioners, after hearing all parties, feel that they cannot recommend and they think that the machinists and tool-makers ought not to insist on the acceptance of this schedule as a whole during the continuance of the war in industries engaged in producing munitions of war.

The employees all expressed most loyally their readiness to work industriously for as many hours each day as they can stand in the production of the munitions of war as long as in the interest of the Empire's cause such effort on their part is needed, providing their demands as to wages, hours and overtime are reasonably met.

On the other side the employers, it appears to the commissioners, are quite willing to meet to a reasonable extent the wishes of the employees so far as the rate of wages per hour is concerned, and it seems probable that so far as the rate of pay for overtime is concerned no serious difficulty in most cases will be found to be in the way of an amicable adjustment. The chief difficulty in the

way of a settlement is as to the adoption of a nine hour day. As the men are willing to work as long as required and expect to work more than nine hours a day as long as necessary for the supply of munitions of war, this appears to the commissioners to be also a question of wages so far as this special work is concerned; that is, whether the tenth hour shall be paid at overtime rate or as straight time. From the employers' point of view it also involves the question of the adoption of a nine hour day after the war is over and in their regular factory work in peace times.

On this latter point the commissioners find difficulty in making a suggestion which will be likely to meet the views of both the employers and employees. The demand for a nine hour day which the commissioners find is really the true ground of the unrest is made by machinists and tool-makers belonging to organized labour and has no particular reference to industries producing munitions of war. It is a desire and an effort to establish generally in Canada nine hours as the recognized standard day's work. Of the machinists who gave evidence before us or were interviewed at the shops by us, those belonging to the unions and some others who do not so belong expressed a decided desire for the day's work to be limited to nine hours, even without overtime or Sunday work. A small minority of those who gave evidence and of those whom we interviewed in the shops, while in favour of a nine hour day in time of peace, were of opinion that the machinists ought not to raise this question during the continuance of the war. These men do not belong to the union. A few others expressed a desire for a ten hour day in order to get one hour more wages. These are also non-union men. The great majority of the machinists and tool-makers so engaged belong to organized labour.

The commissioners, however, venture to recommend the following arrangement of the points in difference:

1. That their suggestions be regarded as having reference only to the employees, machinists and tool-makers, engaged in the production of munitions of war and in making and repairing tools, implements, etc., required in such production and limited to the continuance of the war in which the Empire is now engaged, this being the limitation of duties and powers given by the Royal Commission under which this inquiry is being made.
2. That the minimum rate of pay for the machinists and tool-makers so engaged be 37½c. and 42½c per hour respectively.
3. That overtime shall be paid for at the rate of time and one-half.
4. That time worked on Sundays and statutory holidays shall be paid at the rate of double time.
5. As to the request for the adoption of a nine hour working day the commissioners find themselves unable to join in a unanimous recommendation. Mr. William Inglis is of opinion that the difficulty of conducting the work of an industry partly on a nine hour day and partly on a ten hour day would be practically too unworkable, and that it would be equally difficult and unfair to expect industries only partly engaged in the production of munitions of war now running as ten hour day to change their whole business and calculation at a time when by the war and consequent scarcity of men their difficulties are increased. Mr. John A. McClelland and the chairman, from the evidence and the fact that the nine hour day has been adopted

by so many such industries without any difficulty to the management arising therefrom so far as has been discovered, recommend the adoption of nine hours as a day's work in such industries to the extent mentioned in paragraph 1 of these recommendations, stating, however, that there may be a few of these industries where special conditions of their general work may necessitate some other adjustment.

6. That in case any one or more of the employees so engaged in any such shop has or have any grievance, request, trouble or suggestion for consideration, the management of their shop shall at a reasonable time on request receive and hear a committee of not more than five of such employees, one of whom shall be the employee, or at least one of the employees, having the grievance or trouble, or desiring to make the request or suggestion, with a view to making an amicable adjustment or arrangement.

The notes of evidence taken by the stenographers of the Commission, together with the exhibits put in, are returned with and as part of this report.

All of which your commissioners have the honour to respectfully submit.

Dated at Hamilton this sixth day of May, A.D. 1916.

(Sgd.) COLIN G. SNIDER,

(Sgd.) WM. INGLIS,

(Sgd.) J. A. MCCLELLAND,

Commissioners.

REPORTS OF EMPLOYMENT BUREAUS.

DURING April the favourable expansion in the volume of employment continued as shown by the reports of employment bureaus, — 71 commercial, 11 public and 18 philanthropic. The number of vacancies notified to all these offices was 25,324, a daily average of 1032.36 as compared with 842.59* in March. The number of persons placed was 14,827, a daily average of 595.06 as compared with 469.20* in March. As to employment for woman workers, the number of vacancies notified to all bureaus was 8,105, a daily average of 321.00 in April as compared with 273.84 in March. The number of woman workers placed was 2,824, a daily average of 114.34 as compared with 101.88 in the preceding month.

The five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver, all reported an increased demand for workers. The increases at Winnipeg and Edmonton were very marked. The demand was also higher at Sherbrooke, Ottawa, Brandon, Saskatoon, Calgary, New Westminster and Victoria. Only three cities, Halifax, Quebec, and Regina showed a decline in the number of vacancies notified.

The number of persons who obtained casual employment through the Salvation Army and other agencies was

1,222, a daily average of 52.33 as compared with 47.94* in March. The number of casual jobs secured was 3,005, a daily average of 125.94 as compared with 103.79* for the previous month.

A review of these returns since the beginning of the year may be of value. As more bureaus have been included and other revisions have been made, the figures in some instances do not agree with those given in previous issues. The number of bureaus reporting is as follows:—

	January	February	March	April
Commercial.....	67	71	71	71
Public.....	9	9	11	11
Philanthropic.....	18	19	19	18
Total.....	94	99	101	100

The number of vacancies notified and positions filled is as follows:—

	January	February	March	April
Total vacancies notified.....	19,596	20,048	22,279	25,324
Daily average vacancies notified..	718.24	791.13	842.59	1032.36
Total individuals placed.....	9,860	10,565	12,275	14,827
Daily average of individuals placed.	330.21	385.69	469.20	595.06

*Revised figures.

*Revised figures.

It appears from the above that for the country generally, employment offices have been able to fill a larger percentage of the positions offered each month. The percentages are as follows:

January	February	March	April
45.9	48.7	55.6	57.6

This increase in the percentage of positions filled is also indicated in each of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver.

	January	February	March	April
Montreal.....	39.4	29.1	41.7	39.4
Toronto.....	49.0	43.8	41.9	43.3
Winnipeg.....	44.6	48.2	54.4	57.5
Edmonton.....	58.8	66.7	70.0	74.3
Vancouver.....	55.0	58.3	64.6	61.0

It is also evident from the foregoing figures that the supply of labour of the classes dealt with by employment offices stands in much greater ratio to the demand in the West than in the East,

the employment offices in the Western cities being able to fill a noticeably higher percentage of the vacancies offered than employment offices in Eastern cities.

IMMIGRATION—EMIGRATION—COLONISATION.

IN the present article statistics in regard to immigration and emigration are given only for the United States, information respecting the movement of British subjects between the United Kingdom and British North America not having been received.

(2) **Movement of Persons other than Citizens of the United States between the United States and British North America.**

Immigration to British North America from the United States.—According to the April bulletin of the Bureau of Immigration of the United States Department of Labour, alien residents of the United States to the number of 934 departed to take up permanent residence in British North America during April, as compared with 716 in March, 1916, and 985 in April, 1915.

Immigration from British North America to the United States.—During April, 1916, 10,520 persons (not including citizens of the United States) left British North America to take up permanent residence in the United States as compared with 8,451 in March, and 6,774 in April, 1916.

Balance.—It appears from the above that in this movement between the United States and British North America the latter had the outward balance of 9,586 in April, 1916, as compared with 7,735 in March, 1916, and 5,789 in April, 1915.

(3) **Homestead Entries and Land Patents.**

Homestead Entries.—During the month of April, 1916, there were 160 homestead entries in Manitoba; 375 in Saskatchewan; 471 in Alberta, and 12 in British Columbia, a total of 1,018, as compared with a total of 1,061 during March, 1916.

Letters Patented.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of April, 1916, the number of patents was 1,555 and the number of acres 259,848.07, as compared with 2,238 patents and 367,031.52 acres during March, 1916, and 1,825 patents and 309,832.88 acres for April, 1915.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS.

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 32 cities showed an increase in May as compared with the previous month, the total rising from \$3,153,516 in April to \$4,643,047 in May,

an increase of \$1,489,531 or 47.87 per cent. Grouping the returns by provinces, increases are shown in all provinces except Manitoba and British Columbia, the increases in New Brunswick, Quebec and Saskatchewan being especially noteworthy. As compared

with the corresponding month of last year, building permits in the thirty-two cities for May were practically stationary, there being an increase amounting to \$12,411 or .27 per cent, the total for May, 1915, being \$4,630,636. As compared with May of last year there were gains in all provinces except British Columbia, where there was a falling off of 91 per cent, and New Brunswick where a decline of about 10 per cent is indicated. The increases of 190 per

cent in Manitoba and 208 per cent in Saskatchewan are quite remarkable. Of the larger cities, Montreal and Toronto showed substantial increases in May as compared with April, with smaller increases as compared with May of last year. Winnipeg showed a decline in May as compared with April, but a substantial gain as compared with May of last year, while in Vancouver a decrease is indicated both as compared with April and with May of last year.

PRICES, RETAIL AND WHOLESALE, IN CANADA, MAY, 1916,
AND IN OTHER COUNTRIES.

PRICES were again on slightly higher levels, in retail food prices the declines in eggs, milk, butter and potatoes being offset by increases in sugar, bread, beef, mutton, rice and beans. In wholesale prices considerable advances occurred in grains, fodder, livestock, meats, hides, leathers, boots, with slight advances in several other groups. The level for metals was lowered by further steep declines in quicksilver and slight declines in antimony, lead and tin. Dairy products also averaged lower owing to decreases in eggs and butter, but advances in these lines set in by the end of the month.

As compared with the same month a year ago retail prices were higher in beef, mutton, pork, eggs, cheese, rice, beans, evaporated apples, sugar and potatoes, but prices were lower in milk, bread, flour, rolled oats. In wholesale

prices levels were lower in groups Grains and Fodder, and in Lumber, but were higher in all the other groups. All groups were higher than in May, 1914, except Furniture.

In other countries the latest reports showed further advances except in the United States where materials had ceased to advance steeply and foods were down owing to the advance of the season.

More detailed information as to the prices movement may be seen in the accompanying tables. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities of Canada, having a population of 10,000 or over. The quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for houses in districts inhabited by workingmen.

e. Jackpine, poplar, tamarac, etc. f. Natural gas used. g. Lignite. h. Calculated from the price per wagon load. i. Calculated from the price per 100 lbs. j. Allowing \$1.00 per ton for delivery.

Retail Prices.

Prices of beef showed numerous advances due to the high price of cattle and scarcity of livestock. Mutton and pork were also higher.

Prices of lard advanced in several localities.

Eggs began to advance, being up in thirteen cities and down in twenty. Prices of milk were lower in seven cities. Prices of butter were also lower, being down in twenty-seven cities and up in only three. The price of cheese advanced in seven cities.

The price of bread advanced at Orillia, Toronto, Guelph, Berlin and Chatham, Ont., and also at Victoria, B.C., in sympathy with the price of flour and the strong wheat market. Flour advanced in six cities, but fell in three. Rolled oats was up in two cities but was down in two. Rice and tapioca were higher in several cities.

Canned tomatoes, peas and corn rose at Orillia, Port Arthur and Fort William, Ont., and canned tomatoes alone advanced at Westville, N.S., and Hamilton, Berlin and Stratford, Ont. Dried beans were higher at several cities. Evaporated apples were higher in some cities but declined at Westville, N.S. Prunes were lower at Kingston, Ont., and Prince Albert, B.C.

There was a general advance in sugar, the price being up to 8½c and 10c per lb.

Potatoes were down in several cities throughout the Dominion, but were higher at St. John, N.B., Belleville and Cobalt, Ont., Prince Albert, Sask., and Nelson and Prince Rupert, B.C.

Both anthracite and bituminous coal were higher at Halifax, N.S., Montreal, Que., Kingston and Toronto, Ont. Anthracite coal was also higher at Fredericton, N.B., and Winnipeg, Man. Bituminous coal was higher at Westville, N.S., and Edmonton, Alberta. Anthracite coal, however, was down at Chatham, Ont., and bituminous coal was down at Vancouver, B.C. Hard wood was up

at Kingston and Guelph, Ont., and at Regina, Sask., while soft wood was up at Kingston, Ont., and Brandon, Man., but down at Fredericton, N.B., and Orillia, Ont.

Rents were higher at Charlottetown, P.E.I., Quebec, Que., Hamilton, Brantford, Galt, Berlin, Chatham and Cobalt, Ont. Rents were down at Lethbridge, Alberta.

Wholesale Prices.

Grains and fodder.—Manitoba wheat rose from \$1.13 to \$1.19 per bu. at the beginning of the month and remained high for three weeks, returning then to the previous level. Unfavourable weather reports and a demand for filling chartered vessels at Fort William accounted for the higher prices and more favourable reports with a light demand for export led to the decrease. Ontario winter wheat eased off to \$1.02-1.04, and after rising 3c at the middle of the month fell to \$1.00 at the end. Western barley was in good demand and offerings were light. The price advanced from 61c to 67c per bu. at the beginning of the month, but fell to 65c at the end. Ontario barley rose from 63-64c to 66-67c. Western oats rose from 46c to 47½c, but eased off. Ontario oats rose from 45-46c to 48-49c. Unfavourable weather for new crops was reported as the cause. American corn fell from 86c to 78c per bu. at Toronto. Flaxseed fell from \$1.83 to \$1.60 at Winnipeg. World shipments were reported to be larger and the demand for flaxseed products was light. Peas rose from \$1.60 to \$1.70 per bu. Rye was up from 90c to 93c. Hay, No. 1, was up to \$22.00-22.50 at Montreal and \$21.00-23.00 at Toronto. Baled straw advanced \$1.00. Shorts also advanced \$1.00 per ton to \$26.00.

Animals and meats.—Western cattle had reached \$7.75-8.00 for prime butchers at the end of April and further advances set in by the middle of May and prices rose to \$8.50-8.75. Offerings of choice cattle were light and there was

*Coal, wood and coal oil. No allowance is made for the varying extent to which these are used in the different localities and provinces. †Revised.

a good demand for these. At Toronto choice steers had reached \$8.90 at the end of April and continued to advance, reaching \$9.75 in May. Record prices for cattle were reported on nearly all markets owing to the great demand for army supplies and the extreme shortage of live stock as well as the relatively high price for other foodstuffs. Dressed beef also advanced, hindquarters rising from \$15.50 to \$17.50 per cwt. at Toronto. Forequarters advanced nearly 50c per cwt. Hogs had reached \$11.25 per cwt. early in the month, which is slightly higher than in April, but eased off each week, the price at the end of the month being \$10.15, f.o.b. shipping points, Ontario. Hogs, dressed, advanced 50c per cwt. Pork products were firmer, breakfast bacon being up to 24c per lb. at Montreal and barrel pork rose 50c per barrel, lard advancing from 15½c to 17c per lb. Sheep rose from \$9.50 to \$11.50 per cwt. Dressed lamb was firmer.

Dairy products. — Finest creamery butter at Montreal continued to ease off at the beginning of the month and was down to 29-29½c, but toward the end began to advance and reached 31c per lb. Creamery solids at Toronto declined to 28-29c and dairy prints to 24-27c. Western coloured cheese began to rise at Montreal, advancing from 18-18¼c in the last week of April to 19½-19¾c the second week in May. In the last week of May, however, the price eased off slightly. Milk was down to summer rates to retailers in several cities. At Toronto the price was slightly higher than last year. Eggs began to advance owing to the demand for storing. At Montreal and Toronto fresh eggs reached 27c per dozen.

Fish.—Markets for dried fish were favourable, except Porto Rico, where supplies were heavy. The early catch of the Lunenburg fleet was marketed at \$7.00 per quintal for cod and \$5.50 for haddock as compared with \$6.50 and \$4.50 a year before. There was an unusually large proportion of haddock. The weather has been favourable for

lobster fishing and the catch was normal in the earlier districts. The market for canned lobsters was somewhat disturbed by reports as to the prohibition of imports into France. Dried haddock advanced from 4c to 4½c per lb. Fresh whitefish was up to 15c per lb. at Toronto.

Fruits and vegetables.—Apples were almost off the market at Toronto, but some winter apples were sold at \$5.00 per barrel. Bananas were slightly easier at \$2.00-2.50 per bunch. Lemons were slightly easier, but oranges were firmer. Evaporated apples fell to 9½c per lb. at Toronto. Potatoes rose to \$1.75 per bag at Montreal. Beans were firmer at \$4.50 per bushel. Onions were also firmer at \$2.50 per bag. Turnips were higher at 50-60c per bag. Canned peas and corn rose 2½c per dozen and canned tomatoes advanced 5c and 10c per dozen, owing to short stocks.

Miscellaneous groceries. — Spring wheat flour rose 20c per barrel, first patents being up to \$6.80 at Montreal. Winter wheat flour was steady, however. Bread advanced in several localities. Soda biscuits were also higher, advancing from 7½c per lb. to 8c per lb. Tapioca rose 2c per lb. to 11-12c. Rio coffee was slightly higher. Sugar advanced again, being 50c per cwt. higher than in April, granulated in barrels at Toronto being quoted at \$8.31. Later, however, there was slight easiness to the market and raw sugar was somewhat lower. Molasses continued firm and choice Barbados molasses rose 2c to 54c per gallon, in barrels. Glucose advanced again 10c per cwt. Honey was slightly firmer, being up ¼c per lb. at Toronto.

Textiles.—Ontario wool was again slightly easier, washed being quoted at 41-43c per lb. at Toronto, and unwashed 28c to 33c per lb. The offerings of the new clip were easily absorbed, there being a particularly strong demand from United States dealers, owing to the difficulty in securing New Zealand cross-breds and English wools. The western clip is expected to be much heavier than

*Nine commodities off the market, fruits, vegetables, etc., one line of spelter has been dropped.

ever before. At the London sales in May prices were very strong throughout, crossbreds being 2c higher than in March, best merinos about 2c higher, medium and faulty wool about 4c to 6c higher, and greasy crossbreds about 1c higher. The cotton market showed continued strength and was 1c higher at 13c per lb. Grey cottons, coloured cottons and prints all averaged higher. Raw silk eased off, but Italian silk recovered somewhat. The market for jute and hessians was disturbed by labour troubles at Dundee and prices were slightly lower. Flax fibre advanced to 24-25c per lb. White linen rope rose to 33c per lb. Table and floor oilcloths were higher.

Hides, leather, boots and shoes.—No. 1 beef hides advanced to 19-19½c per lb., green calfskins to 26c per lb., and horse hides to \$6.50-7.00 per hide. Tallow rose from 8c to 9c per lb. Prices of leather advanced further, sole leather being up 3c per lb., and harness leather rose from 51-53c to 55c per lb. Stocks of hides and leather were very scarce in many lines. Another advance in boots and shoes was announced of ten per cent in all lines except patent leather.

Metals and implements.—Some easiness appeared in some metal markets and quicksilver continued to decline. Owing to the high price of pig iron many iron products advanced further. Iron bar was up to \$3.00 per cwt., and steel bar rose to \$3.30. Antimony was lower at 44c per lb. Lead was down to 9½c. Quicksilver fell to \$90 per flask. Solder was down to 31c from 33c and tin from 55c to 54c per lb. Brass advanced 1c per lb. and copper ½c to 32c. Silver rose from 63¾c per ounce to 76¼c. Horse shoes were higher at \$4.65 per keg. Soldering coppers fell to 52c per lb.

Fuel and light.—Nova Scotia bituminous coal advanced to \$4.46 per ton at Montreal owing to high freight rates from the mines and the strong demand for coal in the steel plants. Vancouver Island coal averaged somewhat lower. Connellsville coke was 50c easier at

\$2.25-2.50 per ton, f.o.b. ovens. Gasoline was steady. The production of gasoline for motors was increasing in the United States owing to the increasing use of the "cracking process" by which a larger quantity of gasoline is obtained from petroleum.

Building materials.—The lumber trade in Ontario showed slight improvement owing to better demand from the country trade, with the improved weather conditions. The trade in hemlock was quiet. Shingles were slightly upward, XXX, British Columbia, being quoted at \$3.35. At Montreal there was an improved demand for hard wood for piano and furniture industries. There was a good demand for spruce deals at St. John, but the scarcity of tonnage prevented shipments. Iron pipe was higher at \$6.97 per 100 ft. Copper wire rose to 33½-33¾c. Iron wire was up to \$3.90 per cwt., base size. Barbed wire fencing rose to \$4.65 per cwt. Linseed oil, raw, declined to 85-87c per gallon. Turpentine and boiled linseed oil were also down 7c per gallon. Putty rose from \$2.85 per cwt. to \$3.00.

House furnishings.—No changes were reported.

Drugs and chemicals.—Caustic soda eased off ¼c per lb., and copperas advanced ¼c per lb.

Miscellaneous.—Raw furs showed some advances, mink rising to \$4.50 per skin and raccoon to \$2.50-3.00. English hops were 1c a pound lower. Newsprint paper advanced further to \$2.25 per cwt. Wrapping paper was also higher at \$5.00-6.00 per cwt. for No. 1, Manilla. Bleached sulphite pulp advanced to \$1.25 per lb. Sulphite for newsprint was also higher at \$68.00 per ton. Manilla rope rose to 22½c per lb. Para rubber declined to 64c per lb.

Prices in Other Countries.

The British Labour Gazette for May reported on retail prices of foods in the United Kingdom on May 1 as compared with April 1:

Retail prices of food showed an increase of about 4 per cent in April. Both beef and mutton showed an advance of about 6 per cent, i.e., of from $\frac{1}{2}$ d. to $\frac{3}{4}$ d. per lb. on the average. The decline in the prices of flour and bread recorded last month has been continued to a negligible extent only. Potatoes, which have been hitherto subject to little more than the normal seasonal changes in price, show this month an advance of 42 per cent, from an average of 5d. per 7 lbs. to over 7d. The increase in the tax on sugar is reflected in a rise in the retail price of about 10 per cent, or $\frac{1}{2}$ d. per lb. The average prices of fish, bacon and cheese were slightly higher at May 1 than a month earlier. Tea, milk, butter and margarine showed little change in price, apart from an increase from 5d. to 6d. per quart of milk in a great part of London. The seasonal decline in the price of eggs continued.

As compared with prices in July, 1914, the general rise was estimated at 55 per cent, allowing for the relative importance of the commodities in consumption. In sugar and tea a great part of the increase was due to increased duties. British meat was up over 50 per cent, imported beef over 70 per cent, and frozen mutton about 80 per cent. Cheese was 50 per cent higher and butter and milk 34 per cent. Fish averaged twice as dear.

The index number of the *Economist*, London, was higher at the end of April owing chiefly to steep increases in timber, soda, steam coal and beef, and again at the end of May owing to higher prices in potatoes, meat and steam coal.

The *Sauerbeck* index number continued in the *Statist* rose to 134.2, the highest level since the Napoleonic wars, when it reached nearly 190. In 1825 the index number was 117 and in 1873 the average was 111.

In the United States retail food prices averaged slightly higher in March than in February, beef, pork, butter and raisins being higher. Wholesale prices were lower on June 1 as shown by published index numbers.

Bradstreet's, June 10, 1916, reported:

At this juncture the signs seem to indicate that prices, which evidently reached zenith point on April 1 last, are likely slowly to give ground. Green grass in plenty will act on prices for edible animals; growing weather will tend to depress prices for crops; restricted consumption on the one hand and increased production on the other will force down products that have risen to inordinate levels; enlarged domestic outputs of articles sometimes obtained from abroad will cheapen such commodities; lower ocean

freight rates, now slightly easier, will aid the movement of which we are speaking, and if the war suddenly ends, effects upon prices need not be registered here. But it is well-nigh impossible to say that forthcoming fluctuations will be sharply downward; in fact, the probabilities are that the movements will act and react within narrow limits. . . .

Dun's Review, June 10, reports:

In various ways, business fundamentals are strengthening. With a slackening of new orders in certain branches and sections, some commodities display yielding tendencies and *Dun's* index number of wholesale quotations was \$145.337 on June 1 as against \$146.197 a month earlier. Some raw materials, and a few manufactured products as well, are reacting, and less is heard of the rush to buy at medium figures. There are lines in which the crest of prices apparently has not yet been reached, and high costs everywhere are foreshadowed for months to come, but it is encouraging that recoil from the extreme limits has begun in certain quarters, and may soon follow in others.

Most of the seven divisions into which the index number is divided showed a further rise last month, the decline in the total being due mainly to the recessions in breadstuffs and dairy and garden articles.

In Australia the index number of prices of the principal products of New South Wales for February was higher, the increase being in metals, pastoral products averaging slightly lower.

In Austria, prices in Vienna were reported slightly higher in March than in February in the *British Labour Gazette* from returns published in the official Austrian journal *Warenpreisberichte*. Decreases in bacon, lard and eggs offset advances in other commodities. All commodities except potatoes were higher than before the war, the increase averaging 110.4 per cent higher. Many of the important commodities, however, were no longer freely obtainable at the prices shown, while split peas and lentils were no longer shown in the list.

In Germany, retail prices in Berlin averaged 100 per cent higher in March than before the war and 8 per cent higher than in February, the increases being chiefly in meat, coffee and potatoes. Many of the prices given in the official journal *Statistische Korrespondenz* were maxima and in many other commodities supplies were obtainable only in strictly limited quantities.

a. July of each year. b. Foods.

In Italy, the official index number including the retail prices of seven foods in 43 cities stood at 125.4 for March, as compared with 125.0 for February and 105.8 a year before. The chief increases for the year were in macaroni, beef, pork and table oil.

For the Netherlands, the official index number of retail prices was slightly higher in March than in February, beans, cheese, coffee, margarine, rye flour, rice, soda, starch and soap being higher.

In New Zealand, the index number

of retail prices published in the Journal of the Department of Labour for March was over 16 per cent higher than for July, 1914, but less than 4 per cent higher than in March, 1915.

In Switzerland, according to the estimates of the Swiss League for Reducing the Cost of Living, the general level of retail food prices in March was 2.7 per cent higher than in December, 1915, and 29.9 per cent higher than in June, 1914. The principal increases since December were in peas, beans, lentils, etc., eggs, sugar and honey.

FAIR WAGES CONTRACTS, MAY, 1916.

DURING May the Department of Labour received for insertion in the *Labour Gazette* four fair wage contracts, three of these being awarded by the Department of Public Works and one by the Department of Railways and Canals. One of the contracts awarded by the Department of Public Works contained a fair wage schedule. The other three contracts contained the fair wage clauses providing for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the regulations for the Suppression of the Sweating System.

Date of contract, May 2, 1916. Amount, \$44,994.

Fair Wages Schedules.

DEPARTMENT OF PUBLIC WORKS.

Construction of wooden freight shed on Government wharf, Vancouver, B.C.
Name of contractor, Snider Bros. and Brethour, Limited, Vancouver, B.C.

Fair Wages Clauses.

58. The contractor shall comply with and be subject to all terms, stipulations and conditions contained in the following fair wages clauses:

(1) No labourers shall be employed on or about the works hereby contracted for who are not citizens or residents of Canada, but the Minister may, in

writing, waive the provisions of this clause, either in general or to a limited extent, should he deem it expedient to do so.

(2) The minimum rate of wages to be paid by the contractor for the labour of any employee, or the minimum rate of hire for any team, employed in or about the works, shall be at the rate specified in the Fair Wages Schedule hereto annexed for the same or similar class of labour as that in which such employee is engaged, or for the hire of teams respectively.

(3) The number of working hours for employees in the day or week shall be in accordance with such statute or statutes of Canada as may now or hereafter be passed, and if there is no such statute then in accordance with the custom of the same or similar trades or classes of labour in the district where the work is being carried on—to be determined, in case of dispute, by the Minister; and no employee shall be required to work for longer hours except for the protection of life or property, or in case of other emergencies, when the necessity therefor is confirmed by the engineer.

(4) In case any labour is required in or about the works for which, in the opinion of the engineer, no rate is fixed in the said schedule, the engineer, or other officer authorized by him, may fix the minimum rate of wages payable in respect thereof, which shall not be less than the rate of wages generally accepted as current for competent workmen in the same or similar trades or classes of labour in the district where the work is being carried on.

(5) The said contractor further agrees and binds himself to pay to the workmen engaged in the said work such rates of wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district where the work is to be carried on, and if there are no current rates of wages in the district, then fair and reasonable rates; in the event of a dispute arising as to what is the current or a fair and reasonable rate of wages for any of the classes of labour required, it shall be determined by the Minister of Labour, whose decision shall be final.

(6) The contractor shall not be entitled to any payments under this contract in respect of work and labour performed until he has filed in the office of the engineer a statement, in duplicate, showing the rate of wages by him paid for the various classes of labour, and the hire of teams, employed in or about the work, and, if any amounts should then be due and unpaid in respect of such wages or hire, showing in detail the names of the unpaid employees, the class of employment, rate of wages, and the amounts due to each; nor shall the contractor be entitled to any payments under this contract in respect of materials or other things supplied, for use in or upon the works, until he has filed in the office of the engineer a statement, in duplicate, showing the prices and quantities of all such materials or things, and if any amounts should then be due and unpaid in respect thereof, showing in detail the names of the unpaid vendors, the quantities, prices, and the amounts due to each, such statements shall be attested, in duplicate, by the statutory declaration of the contractor, or of such person on behalf of the contractor as the Minister may approve.

(7) The Minister, or the engineer, may, as a further condition to such payment, at any time require the contractor to furnish such further or other detailed information as may be necessary to establish to their satisfaction the compliance by the contractor with the conditions of this contract.

(8) Should the contractor fail to adhere in every particular to the Fair Wages Schedule hereto annexed, or permit any wages or amounts payable for the hire of teams to become or remain in arrears or unpaid or fail to pay any accounts for material or other things supplied for the works, the engineer may give notice in writing requiring the contractor to adhere to such schedule, or to pay such wages, or for such hire of teams, or for such materials or other things, as the case may be. Should the contractor fail for the period of 48 hours after the giving of such notice to comply with the terms thereof, the Minister may make such payments as shall be sufficient to effect an adherence with such schedule, or other settlement or discharge of such arrears, or indebtedness for hire or materials or things supplied, and the contractor, in the event of any such payments being made after notice and default, as aforesaid, shall be stopped from setting up, as against His Majesty the accuracy of any amounts so paid, or the existence or extent of any such indebtedness, and all amounts so paid shall be repaid at once by the contractor, or may be deducted from any amounts then or thereafter due by His Majesty to the contractor.

(9) The Minister or the engineer may, in their discretion, at any time require proof, with such formalities or to such extent as they may deem requisite, of any claim under the said Fair Wages Schedule, or for wages or hire of teams in arrears or of accounts for materials, or other things unpaid.

(10) The contractor shall post and keep posted in a conspicuous place on the works under construction the said Fair Wages Schedule for the protection of the workmen employed, and also keep a proper record of all payments made to workmen in his employ, and the books and documents containing such record shall be open for inspection by the fair wages officers of His Majesty at any time that it may seem expedient to the Minister of Labour of Canada to have the same inspected.

The contracts containing the preceding clauses follow:

DEPARTMENT OF PUBLIC WORKS.

Supply and installation of metallic fittings (shelving, etc.) for new examining warehouse, Customs Department, Ottawa, Ont. Name of contractor, The Steel Equipment Company, Limited, Ottawa, Ont. Date of contract, May 22, 1916. Amount, \$41,915.

Supply and installation of metallic fittings (filing cases) for new examining warehouse, Customs Department, Ottawa, Ont. Name of contractor, Office Specialty Manufacturing Company, Limited, Ottawa, Ont. Date of contract, May 22, 1916. Amount, \$27,990.

DEPARTMENT OF RAILWAYS AND CANALS.

Supply, delivery and installation of a 750 K.W. turbo generator set and switch-board, complete, for the Intercolonial Railway shops' power plant at Moncton, N.B. Name of contractors, Canadian Westinghouse Company, Limited, Hamilton, Ont. Date of contract, May 11, 1916. Amount, \$21,000 (bulk sum price).

POST OFFICE DEPARTMENT.

During the month of April payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Sup-

pression of the Sweating System and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals	\$ 388.61
Making rubber stamps	25.25
Repairing parcel scales and furnishing crates for same	41.40
Supplying stamping material and repairing stamping pads	430.40
Supplying new mail bags	697.37
Repairing mail bags	3,362.99
Supplying mail bag fittings	7,134.85
Making and repairing miscellaneous articles of postal stores	48.15
Making and repairing railway mail clerks' tin travelling boxes and repairing steel portable letter boxes	143.80
Making and supplying letter boxes	575.00
Repairing parcel post hampers	15.50
Making and supplying articles of official uniform	3,394.28

ANNUAL CONVENTION OF ONTARIO LABOUR EDUCATIONAL ASSOCIATION.

THE Fourteenth Annual Convention of the Labour Educational Association of Ontario was held at Berlin on May 24. Some seventy organisations were represented by one hundred and fifteen delegates. President Joseph Sauve of Kingston presided and the delegates were welcomed by local civic officials and members of the Berlin Trades and Labour Council.

The report of the executive committee referred to the acute unemployment situation that existed at the time of last year's convention and the instructions to the executive committee to wage an aggressive publicity campaign to secure action by the Government to alleviate unemployment and pointed out that publicity committees had been appointed and plans completed

to carry on the agitation, but that within a very short period of time, largely owing to enlistments of thousands of men for overseas service and the employment of thousands more in the manufacture of military supplies the unemployed problem, for the time at least, had ceased to be acute, and the executive realizing that a publicity campaign was not favourable had turned its attention to other matters of importance to the labour movement. Some of these matters mentioned by the report were the action of the executive in regards to keeping the smaller centres informed of the proceedings in the Dominion Parliament and local legislators and in protesting to the Dominion Government and the Dominion Railway Commission against the granting of special privileges to

the Canadian Northern Railway that were inimicable to the proposed Provincial Hydro Radial System. The report also referred to interviews of the association with the Ontario Government in regard to legislation desired in the interests of the province. The report also recommended that the clause in the constitution re per capita tax should be amended so that while an organization of 100 members or less should only pay one dollar per year on their entire membership and an additional one dollar for every extra 100 members or fraction thereof, no organization should be called upon to contribute a larger amount than five dollars per year. This recommendation was concurred in.

The report of the secretary-treasurer showed that an indebtedness of nearly \$45 outstanding at the time of last year's convention had been wiped out, that the expenses of the year had all been met, all accounts were fully paid up and that for the first time in its history the association was without any indebtedness whatever and had a favourable balance in the treasury.

A number of motions were made the subject of considerable discussion. A resolution was passed condemning the action of the Dominion Government in placing munitions and war supply orders under the scope of the Canadian Industrial Disputes Investigation Act. Another resolution provided that at the convention to be held in 1917 each delegate must be able to show at least three different union labels on his person before he is entitled to take his seat. A motion was submitted to change the name of the association to the Provincial Federation of Labour but after discussion it was decided to continue the organization under its present name. A resolution was also passed favouring the passing of legislation by the Ontario Legislature providing sanitary conditions for theatrical employees, insuring certain safety requirements and that theatre workers be placed under the Workmen's Com-

pensation Act. The association also adopted a resolution calling upon the Provincial Government to create a commission empowered to investigate all matters pertaining to labour and industry, the commission to have at least one half of its members bona fide labour men, such a commission being, it was held, necessary, in the opinion of the association, to deal with conditions likely to arise at the conclusion of the war owing to the return of large numbers of soldiers who would be seeking employment. Another resolution drew attention to the difficulty of school children obtaining higher education on account of lack of financial means, and suggested that free scholarships be awarded in public and high schools whereby deserving pupils might be enabled to pursue a higher course of education. It was further resolved that the association ask the Minister of Education to have the subject of political economy placed in the curriculum of public and high schools.

Following a report by delegate James Simpson in regard to the standing of the "Industrial Banner" the official journal of the Association, which was shown to have made progress despite the long period of business depression followed by adverse conditions occasioned by the war, the convention endorsed the actions of the late executive in unanimously adopting the executive report. The election of officers resulted as follows:—

President, Chas. P. Doughty, Guelph.

1st Vice-President, John Briggs, Hamilton.

2nd Vice-President, George Myland, Peterborough.

3rd Vice-President, Thomas Blomeley, Kingston.

4th Vice-President, James Ussher, Ottawa.

5th Vice-President, Otto Holl, Berlin.

Secretary-Treasurer, Jos. T. Marks, Toronto.

The 1917 convention will be held at London on May 24.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF MAY, 1916.

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Departments of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the factory inspectors of Ontario and Manitoba, Ontario Railway and Municipal Board, the Building Inspector of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

DURING May 60 workpeople were killed or fatally injured and 359 were seriously injured during the course of their respective employments. The record for April, 1916, was 54 killed and 292 injured, a total of 346. During May, 1915, 102 workpeople were either killed or fatally injured while 333 received serious injuries. A comparison of the totals of fatal and non-fatal industrial accidents occurring during May with that for the record for April shows there to have been six more killed and 67 more seriously injured in May than in April, while there were 42 less killed and 26 more injured in May this year than in the same month a year ago.

The following is a record of the accidents of the month by industries and groups of trades:—

STATEMENT OF ACCIDENTS DURING THE MONTH OF MAY, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	4	5	9
Lumbering.....	10	9	19
Mining.....	11	18	29
Railway construction.....	1	1
Building Trades.....	2	8	10
Metal Trades.....	12	152	164
Woodworking Trades.....	16	16
Printing and allied trades.....	2	2
Clothing.....	5	5
Textile.....	2	2
Food and Tobacco Preparation.....	6	6
Leather.....	2	2
<i>Transportation:—</i>			
Steam Railway Service...	7	65	72
Electric Railway Service.....	7	7
Navigation.....	3	2	5
Miscellaneous.....	3	22	25
Public Employees.....	2	15	17
Miscellaneous Skilled Trades	4	19	23
Unskilled Labour.....	1	4	5
Total.....	60	359	419

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING MAY, 1916.

Trade or Industry	Locality	Date	Number	Cause of Fatality.
<i>Agriculture:—</i>				
Farmer.....	Spencerville, Ont.....	May 3	1	Jumped from hay mow and impaled on handle of fork.
Farmer.....	Goderich, Ont.....	" 30	1	Kicked by a horse
Farmer.....	Bagotville, Que.....	" 29	1	Falling piece of pulp wood.
Farmhand.....	East Kildonan, Man.....	" 24	1	Dragged by a runaway horse.
<i>Lumbering:—</i>				
Riverman.....	Aylmer, Que.....	" 13	1	Drowned.
Riverman.....	Bathurst, N.B.....	" 1	1	Crushed by logs.
Riverman.....	Bathurst, N. B.....	" 2	1	Crushed by logs.
Riverman.....	St. Raymond, Que.....	" 13	1	Drowned.
Feller.....	Benton, B. C.....	" 3	1	Struck by a falling tree.
Feller.....	Powell River, B.C.....	" 5	1	Crushed by falling logs.
Feller.....	Stillwater, B. C.....	" 10	1	Struck by a falling tree.
Logger.....	Courtenay, B. C.....	" 29	1	Crushed by falling logs.
Logger.....	White Rock, B. C.....	" 27	1	Struck by a log.
Riverman.....	St. Faustin, Que.....	" 28	1	Drowned.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING MAY, 1916—(Concluded.)

Trade or Industry	Locality.	Date	Number	Cause of Fatality.
<i>Mining:—</i>				
Quarry worker.....	Queenstown, Ont.....	May 11	1	Runover by a dump car.
Quarry worker.....	Purcell's Cove, N. S.....	" 13	1	Crushed by falling rock.
Asbestos miners.....	Thetford Mines, Que.....	" 19	3	Fall of rock.
Asbestos miner.....	Thetford Mines, Que.....	" 31	1	Mangled by machinery.
Miner.....	Fernie, B. C.....	" 26	1	Fall of rock.
Miner.....	Coalhurst, Alta.....	" 5	1	Struck roof of mine while riding on mine car.
Miner.....	Comox, B. C.....	" 2	1	Fall of rock.
Miner.....	Britannia, B.C.....	" 18	1	By a blast.
Surface employee.....	Dawson, Y. T.....	" 18	1	Drowned—Carried into water with slide of tailings.
<i>Railway and Canal Construction:—</i>				
Laborer (C.N.R. Tunnel).....	Montreal, Que.....	" 9	1	Crushed between dump cars.
<i>Building Trades:—</i>				
Painter.....	Quebec, Que.....	" 20	1	Fell from scaffold.
Carpenter.....	Montreal, Que.....	" 18	1	By a fall.
<i>Metal Trades:—</i>				
Powerhouse electrician.....	Merrickville, Ont.....	" 18	1	Mangled by belt of machinery.
Steel worker.....	Hamilton, Ont.....	" 10	1	Crushed by falling metal bars.
Steel worker.....	Montreal, Que.....	" 5	1	Electrocuted.
Steel worker.....	Montreal, Que.....	" 18	1	Crushed in hydraulic press.
Steel worker.....	Montreal, Que.....	" 20	1	Electrocuted.
Steel worker.....	Sydney, N. S.....	" 22	1	Crushed by falling metal.
Steel worker.....	Montreal, Que.....	" 21	1	Fell from railway car.
Electrician.....	Montreal, Que.....	" 20	1	Electrocuted.
Ship's carpenter.....	Montreal, Que.....	" 2	1	Fell into hold of vessel.
Lineman.....	Amherstburg, Ont.....	" 25	1	Crushed by falling pole.
Lineman.....	Southampton, Ont.....	" 27	1	Electrocuted.
Lineman.....	Montreal, Que.....	" 11	1	Crushed by falling pole.
<i>Steam Railway Service:—</i>				
Conductor.....	Montreal, Ont.....	" 2	1	Runover by locomotive.
Brakeman.....	Cobalt, Ont.....	" 8	1	Crushed between cars.
Brakeman.....	Stellarton, N. S.....	" 30	1	Derailment of cars.
Brakeman.....	Montreal, Que.....	" 21	1	Fell from moving cars.
Yardman.....	Hochelaga, Que.....	" 26	1	Runover by cars.
Bridgeman.....	Magog, Que.....	" 22	1	Crushed by falling timber.
Employee.....	Montreal, Que.....	" 15	1	Fell from and runover by cars.
<i>Navigation:—</i>				
Captain.....	Owen Sound, Ont.....	" 3	1	Fell from gang plank.
Captain.....	Pugwash Harbour, N.S.....	" 21	1	Drowned—motor boat swamped.
Deckhand.....	Halifax, N. S.....	" 22	1	Drowned—fell from gang plank.
<i>Miscellaneous Transport:—</i>				
Teamster.....	St. John, N. B.....	" 5	1	Running to catch runaway horses; collided with telegraph pole.
Longshoreman.....	Montreal, Que.....	" 12	1	Fell into hold of vessel.
Longshoreman.....	HaHa Bay, Que.....	" 24	1	Struck by falling package of pulp.
<i>Public and Civic Employees:—</i>				
Laborer.....	Moose Jaw, Sask.....	" 26	1	Overcome by sewer gas.
Laborer.....	Ottawa, Ont.....	" 29	1	Cave-in of trench.
<i>Miscellaneous Skilled Trades:</i>				
Warehouse employee.....	Toronto, Ont.....	" 10	1	Fell down elevator shaft.
Pulp Mill worker.....	Bathurst, N. B.....	" 24	1	Struck by a board thrown from machine.
Pulp and paper worker.....	Fort Frances, Ont.....	" 9	1	Electrocuted.
Gardener.....	Ottawa, Ont.....	" 11	1	Electrocuted.
<i>Unskilled Labour:—</i>				
Labourer.....	Barnet, B. C.....	" 3	1	Crushed by falling metal.

REVIEWS.

Collective Bargaining.

United States.—Bulletin of the United States Bureau of Labour Statistics. Whole Number 191. March, 1916. 171 pp.

COLLECTIVE bargaining in the anthracite coal industry furnishes a striking example of the possibility of trade agreements and peaceful settlement of labour disputes between a group of employers united by financial control and a mass of unskilled workers composed largely of immigrants from southern and southeastern Europe. A well-developed form of collective bargaining and an universally efficient system of conciliation and arbitration of disputes have been evolved. The basis for this development was established in the short period of three years beginning with the strike of 1900 and ending with the arbitration by the Anthracite Coal Strike Commission in 1902-3. In 1899 the United Mine Workers of America entered the anthracite field and in the following year the first great strike occurred which resulted in a wage increase and other concessions. In 1902 the second great strike occurred, which had for its main object the recognition of the United Mine Workers of America and the making of a trade agreement. The operators were forced by public opinion as well as by other considerations to agree to arbitration, and early in 1903 the Anthracite Coal Strike Commission, appointed by the President of the United States, announced its awards which provided for certain wage increases, reductions in hours and changes

in other working conditions and for a system of conciliation and arbitration of disputes arising during the period of three years for which the awards were to be in force.

Certain tendencies seem to have been manifested in the three agreements which have been made in the industry in the 13 subsequent years. There have been: (a) a tendency to amend the awards of 1903 with more freedom in each agreement; (b) a tendency toward more businesslike methods in negotiations and toward a better understanding between the representatives of the bargaining parties; (c) a tendency to grant more complete recognition of the union as a party to agreements. On only one occasion (in the agreement of 1912) has an increase in wages been stipulated, and the provisions of the agreements have, in so far as they have gone beyond a mere continuance of the 1903 awards, related principally to methods of settling disputes and grievances.

The system of settling disputes and agreements provided by the awards of the Anthracite Coal Strike Commission has been modified by adding machinery for the conciliation of disputes at the collieries where they occur and in the districts in which the collieries are located. The system appears to have worked efficiently and there have been practically no instances of repudiation of the settlements. The method of referring to umpires matters on which settlements by means of conciliation could

not be made has been so successful that there has been no suggestion of change. The success of the agreements is seen in the fact that at no time has there been any repudiation of any agreement, although a number of infractions have occurred in the form of local strikes. The report also covers the period prior to 1899 during which there was no organization of the anthracite mine workers of sufficient strength to influence their conditions of employment in any permanent degree.

It may be noted here that the anthracite coal wage agreement of 1916 as arranged by the joint conference committee in New York City on April 30, was ratified by the miners' convention of the three anthracite districts in Pottsville, Pa., on May 4th and signed in Philadelphia on May 5. Like the 1912 agreement this contract will be in effect for four years. It establishes the eight-hour day; contract miners and others receive an advance in wages of 7 per cent, while the nine-hour wage of daymen who will now work eight hours is advanced 3 per cent, which means an advance of about 15.5 per cent on such labour.

Occupational Diseases.

United States.—European Regulations for Prevention of Occupational Diseases. Special Bulletin, No. 76, of the State of New York Department of Labour. Issued under the direction of the Industrial Commission. Prepared by the Bureau of Statistics and Information. 77 pp.

The Bulletin presents a collection of regulations in force in leading industrial European countries which are designed to minimize, and to protect the employees from the dangers of occupational diseases. The regulations covered are those of latest adoption for a number of industries, each of which is also represented in New York State.

In Great Britain, section 79 of the Factory and Workshop Act, 1901, empowers the Secretary of State to make regulations for dangerous trades. The

Secretary of State must publish in advance notices of proposed regulations, and interested parties are given opportunity to present objections. If the Secretary of State does not consent to modify the regulations, he must submit the matter to an inquiry which must be conducted in public by a commissioner appointed by the Secretary of State. The commissioner submits his recommendations to the Secretary of State, which recommendations are not, however, necessarily binding upon the latter. They are then laid before Parliament, either House of which may within 40 days annul all or any part of them.

In Germany, section 120-e of the Imperial Industrial Code authorizes the Federal Council (Bundesrat) to issue regulations for the conduct of industries involving special danger to health or life, the regulations to be published in the Imperial Law Journal and to be brought to the attention of the Federal Assembly (Reichstag) at its next session. In case regulations for any industry are not promulgated by the Federal Council, each State may issue them, and, failing action on the part of the State, the police authorities have such power. The regulations proposed must be submitted to representatives of employers and employees for deliberation and advice except where issued by the Federal Council.

In 1912, France adopted section 67 of Book 2 of the Labour Code, which empowered the Minister of Labour to make regulations for the protection of health in industry. On October 1, 1913, such regulations were promulgated for a number of industries and the regulations were in each case, after having been prepared by the Minister of Labour, submitted successively to the Commission of Industrial Hygiene, the Consultative Committee of Arts and Manufactures, and to the Council of State.

In Austria, section 74-a of the Industrial Code empowers the Minister of Commerce and the Minister of the In-

terior to make regulations for the protection of the health of workers, after granting hearings to the associations of commerce and industry concerned.

The Bulletin reproduces the regulations for 12 British industries. In ten of these the regulations were prepared by authority of section 79 of the 1901 Act. In the case of the other two the regulations were enforced under the Factory and Workshop Acts of 1891 and 1895, which empowered the Secretary of State to make special rules for dangerous trades. All such special rules continue in force until superseded by regulations adopted under the 1901 Act. In a few trades only have such "special rules" not been superseded by "regulations" authorized by the latter Act. The statutory provisions of the 1901 Act concerning humidity and ventilation in cotton cloth factories have been replaced by regulations made by the Secretary of State in accordance with the Act of 1901 as to such establishments. These regulations are included in the Bulletin.

There is also reproduced an Act of the Netherlands passed in May, 1905, for the protection of workers in compressed air together with the detailed regulations issued by Royal Decree in pursuance of that Act. The Bulletin also includes the regulations of the Federal Council of Germany applying to the manufacture of cigars and of alkaline chromates. Seven regulations promulgated in France for a number of industries by the Minister of Labour are reproduced as well as the detailed regulations promulgated in Austria in 1911 for the safety and health of workmen employed in printing and type-founding establishments.

Wages and Hours.

United States.—Wages and Hours of Labour in the Men's Clothing Industry, 1911 to 1914. Bulletin of the U. S. Bureau of Labour Statistics, Whole Number 187. March, 1916, 130 pp.

This report is based on information obtained from representative manufac-

turers of men's factory-made clothing. It shows the rates of wages per hour, full-time hours per week and full-time weekly earnings in the principal occupations of the industry in the United States.

The clothing industry shows wide variations in the extent of specialization. As a rule the employee performs only one operation or a limited number of operations in the making of a garment. He does not often change from one of these occupation groups to another. Overlapping generally occurs between basters and hand sewers, and between hand sewers and tailors. Cutting and nearly all pressing are done by men. Hand sewing which includes felling, finishing, button sewing, button-hole making, tacking and other fine needlework, is done mostly by females. The proportion of time-workers and piece-workers varies in different shops and different cities; cutting, however, is usually time work. In the shops in all the cities considered, the work is about evenly divided between time work and piece work.

In 1914 the full time weekly earnings of males represented by 14 occupations averaged from \$13.33 for basters, coat, to \$22.74 for cutters, cloth, machine.

The average for females represented by nine occupations ranged from \$7.77 for hand-sewers, pants, to \$12.32 for operators, vest. These weekly earnings were 1 per cent lower than in 1913, 8 per cent higher than in 1912 and 10 per cent higher than in 1911. The reduction in weekly earnings in 1914 as compared with 1913 was caused by a reduction in full-time hours per week. Full-time hours per week in 1914 ranged from 44 to 60, the average for most occupations being between 51 and 53, which was 1 per cent lower than in 1913, 6 per cent lower than in 1912 and 7 per cent lower than in 1911. The average rates of wages per hour in 1914 were the same as in 1913, 14 per cent higher than in 1912 and 16 per cent higher than in 1911.

In two seasons, from the middle of June to September 1, and from December 1 to the latter part of February, the volume of business as indicated by the number of employees, the pay-rolls and the average earnings per employee is greater than at other times. The highest point of the year 1914 exceeded the lowest point as follows: employees, 22 per

cent, amount of pay-rolls 104 per cent, and the average earnings per employee per week 7.8 per cent. Aside from holidays and vacations the number of days idle was comparatively small, the average for the year for 133 shops being only 5.8 days. Including holidays and vacations the average for the year ending with June, 1914, was 14.8 days.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

NEW BRUNSWICK CASE.

Death of Workman.—Damages Awarded.—Judgment Sustained on Appeal.

AMONG the judgments delivered in the Supreme Court of Canada recently was that of a plaintiff who claimed damages for the death of her son, owing to alleged negligence and want of equipment on the defendant company's railway. There was a trial at Dorchester, N.B., at which the jury disagreed. The case was tried again, and a verdict found for the plaintiff for \$1,130. The defendant company appealed to the Supreme Court at Fredericton, and the appeal there was dismissed. The case was further appealed to the Supreme Court of Canada, which also dismissed the appeal with costs. (*Wentzell v. N. B. & P. E. I. Railway.*)

QUEBEC CASE.

Workmen's Compensation Act.—Bartender held to come under.—Compensation Awarded.

A bartender was engaged making aerated waters for his employer when an explosion occurred in the apparatus

used, and as a result the workman sustained a fracture of the right hip. He sued his employer for damages under the Workmen's Compensation Act, claiming an award equivalent to one-half his salary or a total amount not more than \$2,000. Plaintiff was earning \$10 a week at the time of the accident.

The defendant pleaded that the plaintiff had no claim under the Workmen's Compensation Act, inasmuch as the manufacturing plant, a small machine, was used only to manufacture aerated waters solely for sale in his own saloon, and not for the trade. In the Superior Court, however, this plea was ruled out and the defendant was compelled to pay plaintiff the sum of \$355 and the costs of the action, also \$5 a week for four months, and after this period an annuity of \$90, medical evidence having established that plaintiff had suffered permanent injury. (*Chamberland v. Chamberland.*)

Wrongful Employment of Minors.—Defective Machinery.—Damages for Injuries.

Judgment was given recently in the Superior Court of Montreal condemning

a manufacturer to pay \$2,800 damages in relation to two actions against him following accidents at his works in which two boys, both under age, lost fingers from the right hand. The two boys were engaged by the defendant as operators at an automatic machine, namely a stamping press for re-shaping castors. The machine was alleged to have been in a defective and dangerous condition when the accident occurred. It was also complained that the defendant, in employing boys under 16 years of age on this class of work, was acting in defiance of the provincial factory laws.

The Judge found the latter complaint was proved; that the defendant was guilty of inexcusable fault in engaging the boys, and that the machine was not in good order. Damages for \$2,000 were awarded in one case and \$800 in the other. (*Picard and Morrow v. Hinphy.*)

SASKATCHEWAN CASE.

Injury. — Negligence. — Damages Awarded.

While a workman was engaged in unloading ashes from a flat car the train started without warning, causing him to fall off. He sustained injuries and sued for damages. The workman claimed that he endeavoured to save himself by grasping the sideboards of the car, which were for the purpose of retaining the ashes, but that they gave way and he fell with one foot under the wheel of the car and that his foot was crushed. His leg became shortened by one and a half inches in consequence of the accident, and he was unable to work for two years.

The defendant company claimed that

the accident was caused by plaintiff's own negligence. They also claimed that a warning bell was rung on the engine before the train started, and that the foreman of the gang shouted before the train actually moved. Several witnesses testified that the warning was given, but it was proved that the defendant company had already offered \$800 to the plaintiff, which had been refused. Damages were awarded at \$5,700 for the plaintiff. (*Pruett v. Grand Trunk Pacific Company.*)

BRITISH COLUMBIA CASE.

Master and Servant. — Personal Injuries. — Negligence.

A workman while in the employ of a power company met with an accident and brought action to recover damages. Judgment was given in his favour, but the case was appealed by the defendant company and was finally decided in the Supreme Court of Canada.

The work upon which the accident occurred was an excavation in rock, 400 feet long and 100 feet wide. The portion in which the plaintiff was working consisted of the excavation for the power house and was about 200 feet in length and 100 in width. This involved the removal of rock to a depth of over 100 feet from the highest point of the rock excavation. About that point was a hillside extending back for some distance and covered with a deposit of earth, boulders and small stones. The work had been in progress about a year. The plaintiff was injured while working in the rock-cut by a stone which appeared to have rolled down the hillside and, falling over the brink of the rock-cut, struck him while at work.

It was contended that the company had not furnished a safe place for the plaintiff to work in. The jury found a general verdict in favour of the plaintiff which involved a general finding of all facts necessary to be found in plaintiff's favour to support it. The plaintiff's contention was that there should have been a barrier at the crest of the rock-cut above him to protect him from falling missiles. The appellants contended that they had adopted proper means for his safety by having the loose rock and any material likely to come down removed by the plaintiff and two

other workmen before he started the work at the point at which he was injured.

There was evidence that that was not sufficient protection, that in addition there should have been a barrier. The Supreme Court found that the jury might reasonably find that the barrier should have been erected and that their difficulty was to say whether its non-erection was the fault of the company or of the superintendent or foreman. The appeal was accordingly dismissed. (*Bergklint v. Western Canada Power Company.*)

THE LABOUR GAZETTE

JULY, 1916

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

In June there was no abatement of industrial activity. Unskilled labour and woman workers were specially in demand. The record of trade disputes was less favourable than for a good many months, Hamilton being the centre chiefly affected; there were also numerous disputes falling within the scope of the Industrial Disputes Investigation Act. The Department's index number of wholesale prices remained practically unchanged, being 180.6, as compared with 180.9 in May, while in retail prices the cost of a budget of staple foods averaged \$8.51 in sixty cities as compared with \$8.37 in May. The labour market, trade disputes and prices are treated in more detail in the General Review, and in addition to the monthly survey of the Industries and Trades there are special articles on the Annual Convention of the Canadian Manufacturers' Association and on Bread Prices as Affected by the War.

* * *

Numerous disputes falling within the scope of the Industrial Disputes Investigation Act, 1907, came

Industrial Disputes In- vestigation Act Cases

before the Department during recent months, several applications being received for the establishment of Boards of Conciliation and Investigation. In several cases Boards have been established, but in other instances adjustments have been found possible by renewal of negotiations, officers of the Department on several occasions lending very effec-

tive aid. Two Board reports were received during June, one in the case of a dispute at Stellarton, N.S., where after a strike of a few days' duration a Board was requested and was appointed. The Board succeeded in adjusting the difference, the chairman being Judge Coatsworth, of Toronto. A dispute between the management of the Municipal Street Railway Company at Brantford and its employees was also satisfactorily arranged by a Conciliation Board acting under the chairmanship of Judge Snider, of Hamilton. At Edmonton difficulties arose as between three newly constructed railways centring at that point and not yet wholly out of the hands of the contractors. The class of labour concerned was maintenance-of-way men. The statements made regarding this dispute seemed to indicate that personal intervention might be efficacious, and Mr. F. E. Harrison, Fair Wages Officer for the Prairie Provinces, was instructed to visit Edmonton and lend his assistance to the disputing parties. At the end of a week or two the dispute was arranged satisfactorily without the establishment of a Board.

Applications were received in disputes affecting metal miners and smelter men in Southeastern British Columbia, several unions and companies being concerned, and there seemed reason why, in these cases, also, if possible, there would be considerable advantage in the renewal of direct negotiations. Mr. J. D. McNiven, the Vancouver officer of the Department, by the Minister's instructions, visited Trail and Rossland, the centres of these disputes, and as-

sisted the parties and became the medium of renewed negotiations. At the close of the month Mr. McNiven reported one dispute adjusted to the satisfaction of both parties, and that direct negotiations were proceeding which might affect the adjustment of the second dispute.

Other applications included a dispute in the Cobalt mining camp affecting 2,200 employees, and a dispute in the case of the Ottawa Electric Company and its employees. In the first named case proceedings were stayed pending receipt of information on various points. In the Ottawa dispute a Board was established under the chairmanship of Mr. H. P. Hill, and word was received as this was being written indicating that a satisfactory adjustment had been effected.

* * *

During June the representatives of the Western Coal Operators' Association and of District 18 of the United Mine Workers of America met at Calgary to consider the question of a ten per cent increase in all wages as a war bonus. Originally the demand was made by Fernie and Michel miners, but was later extended to include the various mines affecting the Western Coal Operators' Association and District 18. The agreement at present existing between the operators and the men does not terminate until March next, but the miners urging that the cost of living had advanced and that wages in other lines of industry had gone up, asked for a ten per cent increase as a war bonus.

The operators presented a counter proposition, which was an immediate increase of five per cent and a further increase of two and one-half per cent to take effect on and after April 1, 1917, the full increase of seven and a half per cent to remain in force until March 31 immediately following the end of the war. At the conference the representatives of the miners also brought up the question of employment of Japanese la-

bour in the mines and suggested that steps might be taken to increase the supply of white labour in District 18.

The proposal submitted by the operators was made the subject of a referendum vote of all the local unions. The results of this vote had not been received at the end of the month.

A crop bulletin recently issued by the Manitoba Department of Agriculture, in addition to sections on crop prospects, dairying and the poultry industry, has the following interesting table showing the farm help employed and required in the province:

DISTRICT.	Male		Female	
	Em- ployed	Required	Em- ployed	Required
North-Western .	7,184	9,338	1,752	1,241
South-Western ..	4,393	8,257	1,146	918
North-Central .	3,790	5,887	1,216	822
South-Central ..	4,150	8,146	1,354	1,035
Eastern	3,899	4,469	1,197	512
	23,416	36,097	6,665	4,528

The annual report issued by the Department on prices, a review of which appears in the present issue of the *Gazette*, gives a summary of the movement of prices in Canada and in other countries in recent years. The index number of wholesale prices in Canada averaged 148 for 1915, as compared with 136.1 for 1914, and 135.5 in 1913, which was noted as a year of high prices. In December, 1915, the index number reached 161.1 as compared with 138.9 in January. The chief increases during 1915 were in grains, materials in demand for war supplies, such as wool, metals and chemicals and in goods imported from markets affected by war conditions such as sugar, tea, dried fruits, drugs and

Wholesale Prices in Canada, 1915

flax fibre. Higher ocean freight rates also added to the cost of some imported goods. In retail prices in Canada the cost of a weekly family budget of staple goods rose from \$2.73 in January, 1914, to \$7.96 in January, 1915, and to \$8.13 in December, 1915. Potatoes accounted for part of the rise in the latter part of 1915, but sugar, tea, butter, cheese, flour, bread and oatmeal had risen substantially as a result of war conditions. In fuel and lighting, coal, wood and coal oil showed comparatively little change, while in some cities rents were substantially lower.

In other countries prices also rose steeply. In Great Britain staple goods were 44 per cent higher in December, 1915, than in July, 1914, in Austria 113 per cent higher, in Germany 83 per cent, in Italy 31 per cent, in the Netherlands 33 per cent. In Australia and New Zealand prices were 29 per cent and 16 per cent higher respectively. In Japan, however, prices were lower as shown by the index number published by the Yokohama Chamber of Commerce, prices having continued to fall from the high levels of 1912 and 1913. Prices in most countries were affected by increased ocean freight rates and by the effect of war on normal sources of supply or on export markets.

A Bureau of Social Research has recently been organized under the joint control of the provincial governments of Manitoba, Saskatchewan and Alberta, in order to make a careful investigation of general social welfare questions.

**Social Research
in the Prairie
Provinces**

The functions of the bureau are to secure information, which will be done through co-operation with public and private agencies and by special investigation, and to disseminate such information by means of reports, bulletins, the public press, lectures, correspondence, etc.

Controlling the work of the bureau there will be, in each of the three provinces, an advisory council consisting of one cabinet minister and five appointed members. When the organization of these provincial councils is completed two representatives from each will form an interprovincial council which will be responsible for general policy. Questionnaires have been sent to school teachers, ministers, and secretaries of farmers' and womens' organizations throughout the provinces enquiring as to social conditions in various districts and the general information which will be secured in this way will be supplemented by particulars obtained as to the result of special studies in particular districts.

The Fifth Annual Report on Labour Organization in Canada for the calendar

**Labour
Organization
in Canada, 1915**

year 1915, recently issued by the Department of Labour, besides containing a variety of information and statistics

in regard to trade union membership and the extent to which members of trade unions are taking part in the war, serves as a directory of trade unions in Canada for 1916, including as it does particulars not only of every known trade union in Canada but also a list of all international and non-international central organizing bodies, together with the names and addresses of the chief executive officers.

The opening chapter of the report is devoted to showing the extent to which the trade unionists of the Dominion contributed to the Canadian expeditionary forces, and contains also the pronouncements which various central labour bodies have made on the war. Of the 1,883 local branch unions in Canada, 961 have had one or more members enlist for overseas service since the beginning of the war. Trade unions furnished 11,972 recruits and 439 reservists, making in all 12,411 members in the ranks.

That the war has evidently subjected

Canadian trade unionism to a severe strain is evidenced by a comparison of the 1915 figures with those of the previous year. The returns for 1915 show a loss of 120 local branches and 22,820 members. The total numerical strength of organized labour in Canada at the close of 1915 stood approximately at 143,343, as compared with 166,163 in 1914.

The report shows that nearly one-half of the local trade union branches is found in 22 cities, and these branches comprise over 40 per cent of the entire trade union membership in the Dominion. Montreal, as in 1914, stands in first place as to the number of local branches, but the proportion of branches reporting was not as good as in some other localities. Toronto with a reduction of 13 branches, still retains second position.

A table is furnished showing the expenditure on account of benefits paid during the year 1915 by the various central labour organizations operating in Canada. Of the international bodies 81 have benefit features on a varying scale. The total disbursements for 1915 amounted to \$14,565,365, an increase of \$1,727,378, as compared with the amount paid in 1914.

A new feature of the report is a statement showing the amount paid in benefits for the year 1915 by local branch unions in Canada to their own members, the disbursements aggregating \$128,671.

* * *

During June quite a number of cities and towns throughout the Dominion took up the question of what has come to be known as "Daylight Saving," namely, advancing the clocks forward one hour

during summer in order to economize in the use of light and to afford better opportunities for work and recreation. Considerable attention was given to the question by Boards of Trade, Trades and Labour Councils and other public bodies, and in a number of places the scheme was adopted. Some localities, however, which had decided to put the scheme into effect, later took no action, and others which had given the system a trial returned to standard time. A few localities, however, continued under the new system, claiming that it worked well.

Many public bodies, while in favour of the principle, were against the putting of the scheme into force by purely municipal regulations, it being felt that its adoption by some localities and its rejection by others would lead to confusion and would interfere with business arrangements.

Perhaps the most important pronouncement in regard to the scheme was that of the Canadian Manufacturers' Association, which at its annual convention, held in Hamilton during June, adopted a resolution pointing out that daylight saving legislation was now in operation in various parts of the world with acknowledged benefit in the saving of light and fuel, affording increased opportunities for recreation and improvement of health, but recommending that on account of any independent action by municipalities being likely to lead to confusion and business disorganization, the adoption of the principle should take the form of a national measure and that the Dominion Government be memorialized at the next session of Parliament to introduce legislation that would bring the reform into effect with the least possible delay.

**Daylight
Saving**

INDUSTRIAL CONDITIONS DURING JUNE, 1916

I. — GENERAL REVIEW

Employment during June continued at a high level with the demand rising and in many instances in excess of the supply.

The Labour Market

There was a shortage of coal miners in the Syd-

ney fields and of haulage hands at Fernie. In some localities where a shortage of labour existed locally, working men were brought in from outside points. A noticeable feature of the month was the scarcity of unskilled labour and the extent to which female workers were in demand. Civic works in a number of instances had to be discontinued or delayed through an insufficient supply of unskilled labour and there was a heavy demand for female help, even inexperienced girls in some factory districts. Part of this demand was being met by the hiring of girls who had just finished their course at school. Business colleges reported that many of their students left to take office and clerical positions without waiting to finish their courses. The employment of women as clerks and stenographers in banks was also becoming pronounced. Reports of employment bureaus showed an increase in the number of vacancies notified and the positions filled. The daily average of vacancies notified to all bureaus reporting to the Department was 1,363.33 as compared with 1,043.29 in April. The number of persons placed showed a daily average of 760.81 as compared with 607.42 in April. The demand for women workers was also higher than in the previous month, the number of vacancies notified through all bureaus showed a daily average of 345.83, as compared with 344.17 in April, the number of women placed showed a daily average of 131.49, as compared with 115.54 in the preceding month. In most of the principal centres of labour distribution such

as Montreal, Toronto, Winnipeg and Vancouver, there was an increased demand for workers. Halifax, Ottawa and New Westminster were the only points where a decline in the number of vacancies notified was reported.

While only four strikes originated in June as compared with thirteen in the

Trade Disputes

previous month, the number of firms and employees affected was large, 46 firms and over 1,500 employees being involved. Most of the strikes occurred in the metal industry at Hamilton. Numerous employers of this city were concerned in a strike of munition workers involving about 1,100 machinists. The strike began on June 12 and remained unsettled at the close of the month, although no inconsiderable number of men had returned to work. A strike of electrical workers at Hamilton involved fourteen firms, although only about 40 employees were affected. The other two strikes beginning in the month, which affected the building and clothing trades, were comparatively unimportant. In all there were nine strikes in existence in June, involving 68 firms and over 1,900 employees. The strike at Hamilton of shop employees of the Toronto, Hamilton and Buffalo Railway Company, which commenced during May, was unsettled at the close of June. Amicable adjustments were reported in the case of one old dispute and one new dispute. In another old dispute the places of strikers were filled, leaving six disputes unsettled at the close of the month. In addition to the above mentioned disputes there was a number of industrial differences which did not develop into strikes. Some of these were dealt with under the Industrial Disputes Investigation Act (see page 1359), and in other cases offi-

cers of the Department brought about direct negotiations between the parties which resulted in adjustment of the differences.

The Department's index number of wholesale prices was practically unchanged for June from the level of the previous month, standing at 180.6

as compared with 180.9 in May, considerable declines in grains and fodder, textiles and metals being offset by important advances in animals and meats, fruits and vegetables, and in hides, leathers, boots and shoes. There were slight recessions in building materials, drugs and chemicals, raw furs and also in raw rubber among sundries. As compared with the same month a year ago, when the index number stood at 149.4, prices were higher in all the groups except grains and fodder and breadstuffs. All groups were higher than in 1914 and 1913 except raw furs. In retail prices the cost of a budget of staple foods averaged \$8.51 in 60 cities of the Dominion as compared with \$8.37 in May, the increases being in meats, eggs, sugar and beans. The same budget cost \$7.77 in June, 1915, and \$7.35 in June, 1914. Anthracite coal was higher than in June during the past two years, but wood, soft coal and coal oil were slightly lower.

Wages continued to show an upward tendency during June, increases being chiefly in the coal mining and transportation

Changes in Wages and Hours industries, the printing trade, and among civic employees. The Acadia Coal Company of Nova Scotia, in accordance with the report of a Conciliation Board, granted an increase in wages of ten, twenty, and in some cases twenty-five per cent. The Intercolonial Coal Company of Nova Scotia voluntarily advanced wages to a similar extent. Employees of the Hull Electric Company to the number of 115 were granted an increase of 2 cents per hour. Employees of the Brantford Municipal Railway received an advance of $2\frac{1}{2}$

cents per hour, an agreement being arranged through a Conciliation Board appointed under the Industrial Disputes Investigation Act. About 300 printers employed in the newspaper offices at Toronto were granted an advance of \$1 per week. At Calgary the wages of street cleaners were advanced from 28 to 30 cents an hour. At Windsor, Ont., policemen in classes A and B and probationary officers received an increase of \$8 per month. At Guelph, Ont., civic firemen were granted an increase of \$50 per year.

Six fair wage contracts given out by the Department of Railways and Canals and the Department of Public Works were received for insertion in the *Labour Gazette*. One

Fair Wage Contracts

of these—a contract for lock gates at East River, N.S.—contained a fair wage schedule, the other contracts being for freighting of supplies for the Yukon telegraph line and dredging at various points, contained the usual fair wage clause providing for the payment of rates generally accepted as current in the localities where the work is to be performed. Contracts were also let by the Post Office Department for supplies subject to regulations for the suppression of the sweating system.

The total imports of merchandise for consumption in Canada for May, 1916,

Trade and Finance amounted to \$70,330,181, compared with \$35,046,944 in May, 1915, an increase of \$35,293,237. Domestic exports of merchandise for May, 1916, amounted to \$94,654,295, as compared with \$42,080,486 in May, 1915, an increase of \$52,573,809. Increases in the products of the mine, fisheries, forest, animals and their produce, agriculture, manufactures and miscellaneous merchandise were shown.

The following table gives the latest official summary of Canadian foreign trade:

IMPORTS AND EXPORTS, MAY, 1916.

Imports entered for consumption.	May.		Exports. (Domestic.)	May.	
	1915	1916		1915	1916
Dutiable goods.....	\$19,851,612	\$39,840,167	Mines.....	\$5,057,175	\$6,299,546

Totals.....	\$882,361,452	\$574,445,914	+ \$307,915,538
Sherbrooke.....	2,226,335		
Berlin.....	2,364,147		

Canadian revenue for the month of May, 1916, amounted to \$18,497,707.49, as compared with \$12,131,508.75 for May, 1915, an increase of \$6,366,198.74. The expenditure on capital account for May, 1916, amounted to \$11,929,157.39, which comprised \$9,309,474.26 for war purposes, and \$2,619,683.13 for public works, including railways and canals.

The bank statement for May, 1916, showed the paid-up capital of the chartered banks of Canada to be \$112,832,-

765, as compared with \$112,823,898 for the month of April, 1916. Deposits payable on demand for May amounted to \$412,301,481, as compared with \$402,060,955 for April, 1916. Notes in circulation for May, 1916, amounted to \$114,847,323, as compared with \$119,233,330 in April. Loans to cities, towns, municipalities and school districts during May amounted to \$43,924,036, as compared with \$44,371,050 during April, 1916.

II. THE INDUSTRIES AND TRADES

Manufacturing showed no abatement from the active conditions of the previous month except in a few localities where there was an inadequate supply of labour. Many establishments were making additions to their plants, and in a number of localities new factories were being established. There was an active demand for woman workers in many factories, not only for experienced hands, but for inexperienced girls as well. Some of this demand was being met by the taking on of girls who had just left school.

Very active conditions prevailed in most lines of metal manufacturing. The large steel plants at Sydney and Sydney Mines were very busy and the big works at Sault Ste. Marie also operated to full capacity. Iron and steel industries at Montreal were running as fully as the supply of labour would permit. At Woodstock a shortage of labour was reported in stove and furnace factories. Machine shops and foundries in practically all districts were either operating overtime or to ordinary daily capacity. Motor car manufacturers at Windsor were active, but in some instances were obliged to lay off a few hands for a time on account of car shortage and the difficulty of making shipments.

Woodworking and furniture factories also were busy. Toronto reported woodworking and piano factories active, and

at Woodstock the furniture trade was very good, factories utilizing all men available and seeking additional hands. Wagon factories at the same place reported business good with a demand for unskilled labour and skilled woodworkers and blacksmiths. The piano trade here also was active, with a demand for cabinet and action makers. At Berlin furniture factories were busy. Box factories at New Westminster were working overtime.

Clothing factories and boot and shoe factories were busy. Montreal reported shoe factories operating to the full extent of labour available. Toronto reported clothing and shoe factories active. At Berlin robe and clothing factories and boot and shoe factories were also busy, and in shirt and collar factories very active conditions prevailed with a considerable shortage of woman labour, for which there was a great demand.

Textile factories in all districts where these plants are located were reported busy. Montreal reported textile factories very active, and at Peterborough mills were working day and night. Cotton and woollen mills at Galt were extremely busy and working overtime. Pulp and paper manufacturers were active, and also factories engaged on food stuff. Other miscellaneous manufacturing establishments were also reported active in most localities.

Conditions were active both in rail and water transportation. Railway statements showed a continuance of the high earnings of the previous month. Gross earnings

Transportation

of the Canadian Pacific Railway Company for May were \$12,472,167.46, as compared with \$7,261,495.63 for the same month in 1915, an increase of \$5,210,671.83. Earnings for the Canadian Northern were \$3,088,900 compared with \$2,824,300 the previous month. Grand Trunk gross revenues for May, 1916, were \$3,548,430, as against \$3,234,883 in May, 1915, a difference of \$313,547.

Westville reported activity in railway traffic and better facilities for moving of freight which had become congested. At Moncton there was exceptional activity, particularly in the operating branches of the Intercolonial Railway and in the shops, where a large amount of extra time was made by employees. St. Thomas also reported shop employees busy. At Brantford passenger and freight traffic kept up well and the Lake Erie and Northern Railway, a new road recently opened, was running on a steady schedule. Peterborough reported railways very active with some shortage of cars. At Toronto railway men were well employed and labour in demand. Western points such as Moose Jaw and Medicine Hat reported activity in hauling the 1915 grain crop, of which there was still a considerable amount to be carried to the head of the lakes. Lines running through the mountains experienced some trouble with floods and washouts. Street and electric railway traffic was also active in most places. The staff of the Toronto street railway was reported under strength and men from outside points were taken on.

Water traffic continued to show activity. Sydney reported conditions busy and at Halifax the situation along the water-front was reported fair, long-shoremen, freight handlers and others having steady employment.

General transportation workers such

as teamsters, drivers and others were active, and in a number of places the shortage of labour caused delays in delivery of coal and other commodities.

Mining throughout the Dominion, both in metallic and non-metallic mines, was very busy, particularly in metallic mines, which displayed greater

Mining

activity than in the previous month. The antimony mines at Lake George, N.B., which had employed a large number of men, were closed on account of financial difficulties. It was expected, however, that the mines would be re-opened with new capital. In the Sherbrooke district mining in asbestos, chrome iron and copper was very active and labour scarce. Peterborough reported that the Cordova gold mines, which had been closed for some time, were expected to be re-opened with a pay-roll of \$6,000 per month at the start. At Cobalt greater activity prevailed than in the previous month; extra men were taken on at a number of mines and operations were proceeding on the greatest possible scale. All of the mills both at Cobalt and Porcupine were running at full capacity. There was also marked activity in the newer camps on the National Transcontinental Railway. In British Columbia activity was increased. Nelson reported all the large properties and many additional smaller properties operating. The Slocan mines at Sandon were making extensive improvements to add to the daily capacity and efficiency of their mill and similar undertakings were also under way at the Noble Five mines. Activity continued at Trail, both in connection with the smelter and the construction of additions to the plant. In mining districts north of Prince Rupert activity was increasing; shipments to Trail and outside points became greater and an effort was under way to have a smelter located at Prince Rupert.

Coal mining was hindered to some extent in Nova Scotia by a lack of men. In the Sydney district collieries were working every day. The output of some

of these continued low because of the scarcity of miners. Mines in the Amherst district also reported active conditions with a shortage of men. Westville reported coal mines operating full time and unable to fill the demand. By the award of a Conciliation Board appointed under the Industrial Disputes Investigation Act, employees of the Acadia Coal Company were given an increase, and the Intercolonial Coal Company voluntarily granted its employees a similar advance.

At Lethbridge coal mines were working steadily with a reduced force and no great demand for miners. Edmonton also reported coal mining quiet. In the Fernie district floods had the effect of hampering mining operations, some properties having to shut down for a short time on account of car shortage caused by interruption to railway traffic. The Crow's Nest Pass Company announced that 300 more men could be employed if sufficient haulage hands could be obtained, which would result in an increased output. Representatives of the Western Coal Operators' Association and District 18 of the United Mine Workers of America conferred at Calgary on June 23, with regard to a wage increase in the nature of a war bonus. Certain proposed arrangements were submitted to a referendum vote of the miners. At a meeting held at Nanaimo, Vancouver Island Miners' Safety Association was formed, delegates being in attendance from the different mining districts of Vancouver Island.

Conditions in building and construction showed an improvement over those of the previous month.

Building and Construction In Eastern Canada building was fairly active, and in the West also was improved. Points in the Maritime Provinces reported building trades actively engaged, and in some cases contractors complained of a shortage of help. Quebec districts also reported building either busy or fairly so, and in Ontario increased activity with

the advance of the season was noticeable. In addition to the usual repairs and construction of dwellings quite a number of places reported building considerably augmented by additions to existing manufacturing plants or the construction of new ones. Toronto reported a shortage of painters, decorators and sheet metal workers. At Port Arthur and Fort William elevator construction gave employment to many men. On the re-construction of the Parliament Buildings at Ottawa, some 1,200 men were engaged and there was a demand for carpenters and stonemasons. Windsor reported a shortage in the building trades and a scarcity of dwellings, for the construction of which a large number of permits were issued.

Some points in Saskatchewan reported an improvement in building operations. At Regina building trades, with the exception of plumbers and steamfitters, were very active, and bricklayers had to be brought in from outside. Carpenters were in great demand for country work. At Saskatoon also there was an improvement in building in the city, though the greater part of the demand for workmen was also in rural districts. Moose Jaw reported little work for building labourers on construction.

At Edmonton the general re-adjustment in labour conditions since the war affected the building trades most and conditions in the city remained quiet. Many members of these trades, however, found employment either at their trade in the country or in other industries. Considerable building was being done along the railway lines recently put into operation north of Edmonton.

In British Columbia building on the whole was dull. At Nelson bricklayers and plasterers found steady employment, but at Vancouver, Victoria and New Westminster the building trades were dull.

Railway construction showed more active conditions during June, especially in British Columbia, where with the re-opening of the season railway contractors were finding it difficult to make

up their contract gangs. Work which had been suspended for some years on the Pacific Great Eastern was again commenced and the demand for men was reported greater than the supply. To meet the deficiency there was a suggestion in some quarters that the order-in-council preventing workmen from foreign countries entering British Columbia be suspended in order to permit the bringing in of men from Washington State. It was considered, however, that the possible cessation of logging operations for a time would release a number of men who would be available for railway work.

A contract was let for the construction of 50 miles of new line by the Edmonton, Dunvegan and British Columbia Railway. The Canadian Pacific Railway called for tenders for the completion of the line from Vantage to Assiniboia, which when finished will give a direct line from Moose Jaw to Assiniboia.

In Eastern Canada maintenance work and repairs constituted the bulk of activity in railway construction. In New Brunswick 100 men were employed putting in the sub-structure of a new steel bridge over the Petitcodiac river, a work which was expected to keep a considerable number of men employed during the season. At St. Thomas track work gave employment to a large number of native Indians. The Toronto, Hamilton and Buffalo Railway line to Port Maitland was making rapid progress. This line will be one mile in length and is being built in anticipation of the inauguration of a car ferry service across Lake Erie. Work on the Welland canal was reported greatly hampered owing to a scarcity of labour.

Lumbering continued active, though in some parts of British Columbia operations were hindered by floods. There was a possibility also that logging operations in that province would be discontinued for a time owing, it was reported, to an over-production of logs.

At Newcastle, N.B., there was great

activity in sawmills and in loading lumber for the United Kingdom. Some Quebec districts reported mill operations hindered somewhat by high waters. At Three Rivers all sawmills were running full time. Sherbrooke reported lumbering active, and at Montreal the market was reported good, both in Europe and the United States. At Peterborough lumbering was very active. At Prince Albert the mills continued busy replenishing their stock in the yards, besides making regular shipments.

In British Columbia, while floods interfered with operations in some parts, conditions in other localities were good and with a fair demand for lumber and evidences of a satisfactory crop in the Prairie Provinces there was the prospect of a brisk season. In the Fernie district the lumbering industry suffered considerably from floods. Numerous bridges were swept out and interfered with the shipment of posts and poles. High water in the rivers caused considerable damage to sawmills, and in many of these operations were temporarily suspended. At Nelson also some mills were compelled to shut down on account of high water. At New Westminster lumber and shingle mills were running full time with a good demand for all products. Vancouver reported much activity in logging which had absorbed a great deal of labour. It was stated, however, that there were more logs available than the market could take up and that it was possible logging might be discontinued for a month. Prince Rupert district reported lumbering active. The industry at all points on Vancouver Island continued to show increased activity, and shipments to the Prairie Provinces, which consume about 60 per cent of the province's output, were steadily increased.

Prospects for good crops appeared on the whole excellent. Reports from the Maritime Provinces indicated that the agricultural season was several weeks ahead of last year. The hay crop in practically all parts of the coun-

Lumbering

Agriculture

try was excellent, and fruit prospects were good. Even in districts where there was an excessive rainfall the indications were fair. In the West an abundance of moisture and absence of excessive heat gave promise of an excellent grain crop.

The demand for farm help continued, with shortages reported in some parts. Sherbrooke, Que., reported farmers finding difficulty in securing help. At Hamilton, Ont., farm and domestic help was greatly in demand, with farmers offering as high as \$50 and \$60 a month for July and August. London and Guelph reported farm help very scarce. Berlin, Peterborough and Galt also reported a shortage of farm hands. At Lethbridge there was a little demand for farm help which was easily supplied. A better demand was expected by July 1 for help in the hay field and steady employment from then on through the harvest. The demand for female help on farms and ranches could not be met. Saskatoon reported a steady demand for farm labour.

A proclamation has been issued by the Governor-General in Council calling for the taking of the census of the popula-

tion and agriculture of the provinces of Manitoba, Saskatchewan and Alberta as of June 1, 1916. An extra of the Canada Gazette, dated May 31, sets out the procedure to be followed, the forms to be used and the instruction issued to the enumerators.

Fishing was fairly active during June. At Canso fishermen in all branches, with the possible exception of lobster men, had the best fishing experienced

at this season for many years. Lunenburg also reported good catches. Newcastle reported lobsters plentiful and large numbers of salmon, bass and shad being taken. At Sydney lobster, haddock and cod fishing was fair, but mackerel were scarce.

At Prince Rupert the fishing industry continued active. The demand for halibut was greater than the supply and salmon were being taken in increased quantities. During the month fire destroyed the plant of the New England Fishing Company and the Canadian Fishing Company at Victoria, entailing a loss of half a million dollars.

III—LABOUR AND INDUSTRY IN THE PROVINCES AS INDICATED IN REPORTS OF CORRESPONDENTS AND OTHER SOURCES

INDUSTRIAL conditions throughout the different provinces were on the whole satisfactory, though activity in some instances was lessened owing to a shortage of labour. Manufacturing was active in practically all the industrial centres of the various provinces; transportation, both by rail and water, kept up well; coal mines in Nova Scotia operated to full capacity of the labour available and increased activity was noticeable in some western mines. All metal mines maintained a heavy production. Building and construction was active in

the Maritime Provinces, fair in the middle provinces and improved in many parts of the West. Sawmills and shingle mills continued busy. Crop prospects throughout the Dominion were on the whole satisfactory, an improvement being noticeable in districts where rain had retarded operations, and western prospects were excellent. The fishing industry was busy on the Atlantic coast and on the lakes, and with the beginning of salmon fishing and canning season, became more active in British Columbia.

Nova Scotia

The labour market during June was very good, although no exceptional industrial activity was apparent. Very few buildings were being erected, but quite a lot of repair work was being done. Fishermen reported a very poor season all along the Northumberland Straits. Coal mines were very busy, with a large shortage of miners and help.

At Halifax the building trades were actively engaged, and in some cases contractors reported a shortage of help. Conditions were very fair along the waterfront, longshoremen, freight handlers and transport workers having very steady employment. The demand for unskilled labour was greater than the supply. Work on the Halifax ocean terminals showed good progress, both the day and night forces having been increased. While no track extensions were planned during the summer by the Halifax Electric Tramway Company, a large force were at work repairing the road-bed. Shore fishermen landed some very good catches of mackerel, the fish selling from 2 for 25 cents up to 25 cents each.

At Sydney there was no cessation in the activity which prevailed over the entire district during May, and prospects pointed to a continuation of busy times. There was abundance of employment, and some of the larger industries made very earnest efforts to secure more men. The building trades were still quiet, but none of the men of these trades were idle. The weather was fine and outside work plentiful. All departments of the steel works at Sydney and Sydney Mines were busy, and all collieries worked every day. The output of some of these continued low, because of a scarcity of men.

At Westville the procuring of sufficient labour to carry on the usual necessary work, municipal and otherwise, was becoming a serious problem, and a great deal of proposed building and improve-

ments was held up owing to the scarcity of labour, especially in the unskilled class. Railway traffic continued active. Better facilities for the moving of freight, in the shape of larger engines, etc., have overcome the congestion of the past couple of months, and traffic was about normal. Wholesale and retail trades reported a very large month's business. The lumbering industry continued busy, and some heavy export shipments of deals and timbers were made. Coal mines all operated full time, and then were unable to fill the demand, all mines being away behind in their orders for coal. In connection with the difference between the employees and the Acadia Coal Company, the decision of the Conciliation Board, advancing the employees, in some cases, ten, others twenty, and still others twenty-five per cent, was accepted by both company and men. The Intercolonial Coal Company have also, voluntarily, awarded their employees a similar advance.

Prince Edward Island

At Charlottetown labour conditions showed little change. A shortage of carpenters was reported by the larger contractors. Railway traffic was brisk. Trackmen and some other trades on the Prince Edward Island Railway received various increases in wages. Meat and other commodities of every-day consumption have increased in price. Fishing was busy and large hauls of cod, haddock and mackerel were being brought in. The local market was well supplied, and prices the highest in the history of this industry. All other local enterprises were fairly active.

New Brunswick

The industrial situation at Fredericton was generally good during June, and quite equal to conditions of the preceding month. Building trades were well employed, and machine shops and manufacturing plants busy. Sawmills were working full time and gave employment to a large number of men.

Trade, both wholesale and retail, was reported active in all branches. Steamboat traffic was also quite brisk.

At Moncton labour was very actively employed, all the available local supply being required to meet the demands, and in some instances workmen from outside were brought in. Exceptional activity existed in railway circles, particularly in the operating branches and in railway shops, where a large amount of extra time was made by employees. Building operations also continued satisfactory, though not on nearly as large a scale as last season. Local manufacturers were exceptionally active, and in several instances were operating night shifts. About 100 men were employed in putting in the substructure of the new steel bridge over the Petitecodiac river and will be employed all the season.

Customs returns for May showed an increase over collections in the same month last year. Retail trade has also been exceptionally active in all lines. The management of the Canadian Government railways have granted an increase in wages commencing June 1 to all employees of the maintenance of way department.

At Newcastle labour, both skilled and unskilled, was well employed. In fact a scarcity of some branches of skilled work existed. There was special activity in lumber mills and in loading lumber for the United Kingdom. Wholesale and retail trade showed marked improvement, and all local industries were working full time.

At St. John business generally continued to improve, and quite an impetus was given to the building trades by the erection of several new dwellings. The Canadian Pacific Railway intends to make extensive additions to its facilities. Customs and inland revenue receipts showed an increase. On June 1 the biscuit manufacturers advanced the price of all sweet goods a half cent per pound; also a slight advance in price of package sodas. Reports from outlying

districts were to the effect that the hay and potato crops would be abundant this season. Harbour fishermen have been securing large catches of salmon.

Quebec

Hull reported labour well employed, and business in general showed some improvement.

At Montreal, textile, iron and steel, boot and shoe, packing and other industries were operating as fully as the supply of labour would permit. The Canadian Car and Foundry Company had large orders ahead and was employing 3,000 men. This will be doubled when active operations commence in the car building department. In other companies equal prosperity was evidenced. All manufacturers of domestic textiles were busily employed, cotton mills having sufficient orders to keep them running for half a year. Throughout the manufacturing district the machinery was running day and night in most cases to turn out the overflow of orders on hand. The only complaint came from some manufacturers that there was a growing scarcity of male labour.

There was a marked scarcity of yarns, and some spinners have given notice that they have all the business they can look after for half a year, while some manufacturers of knitted underwear say they cannot accept any repeat orders for some time to come. Wholesale hat and fur houses have booked as many orders already as they did during the entire year of 1915. Boot and shoe manufacturers have rarely been so busy.

The Armstrong Whitworth of Canada, Limited, have given out contracts for the doubling of their already extensive plant at Longueuil by the expenditure of \$750,000. At present the 50,000 square feet of floor space at the disposal of the company is entirely utilized, 250 men being employed in the different departments. When the new buildings are completed in September there will be 100,000 square feet of floor space, and when the new machinery is install-

ed several months later the number of employees will be increased to 500.

General foundrymen were only moderately employed. The lumber trade was very active, there being a big demand both from Europe and the United States.

The secretary of the Builders' Exchange reported that many construction firms were feeling acutely the shortage of unskilled labour. One employment agency had received requests for 500 labourers, but had only been able to get 50. One quarrying company offering a high average wage and free transportation could not get 25 men to go a short distance from the city. Another large corporation needing 200 men had only secured two in five or six days.

Annual reports made during the month almost universally showed a good state of affairs. Railroads and steamship companies reported a continuance of the record business of previous months, and the local bank clearings for June were, with the exception of May, the largest ever reported.

As far as female labour was concerned conditions were more favourable than a year ago during June. Banks, offices and stores were calling on women help. Stenographers, in particular, were much in demand. Besides the many positions temporarily opened during the holiday season a number of male clerks and stenographers were replaced by female workers.

On June 6 a public meeting was held under the auspices of the Women's Canadian Club in connection with the organization of a Women's War Register. Since the inauguration of this movement many women have registered as applicants for employment to take the place of male workers in case of necessity.

Various phases of social service, such as child welfare, milk stations, summer classes for school children, technical classes, etc., received considerable attention by organizations and societies interested in this work. About 200 women workers were involved in a strike among

employees of the J. W. Peck Company, Limited, for increased wages. No settlement was reported at the end of the month.

At Quebec general activity prevailed in all branches of trade. Building trades were fairly busy, those engaged in outside work losing several days by rain. Crops, despite the plentiful rains, promised well, particularly hay. The lumbering industry was retarded on account of high water.

At Sherbrooke labour was active and factories found some difficulty in getting enough men, as business in all lines was good. There was also a lot of building being done. Considerable civic work such as the laying of new gas pipes and sewers, road work, etc., was also carried on. Farmers found considerable difficulty in getting help. Lumbering was good and better prices were being paid. Mining in asbestos, chrome iron and copper was very active and labour scarce.

Sorel reported the month an active one for labour, both skilled and unskilled. Manufacturing and industrial establishments were busy, some of them running overtime with increased staffs. Trade was fair.

The general condition of the labour market at St. Hyacinthe was very good. Workmen were scarce and the demand by far exceeded the supply. The building trades were busy. Local industries were all active. Unskilled labour was in good demand. Business, wholesale and retail, was quite satisfactory.

At St. John's and Iberville all classes of labour, with the exception of the building trades, were well employed. Manufacturing concerns worked full time, and some increased their staff. Customs receipts for the month of May were the highest in the history of the harbour.

At Three Rivers, with the exception of the building trades and unskilled workmen, labour was well employed, and conditions compared favourably with those of a year ago. Several men were

employed paving some streets and fixing up others. All sawmills were running full time. Some manufacturers were working overtime.

Ontario

Labour conditions at Belleville were fair in all branches. Whilst there were no extensive building operations going on in the city a few new dwellings were being erected and quite extensive improvements made to a number of business places. The various manufacturing concerns reported a good month. Farming operations were retarded to some extent owing to continued rains. There was a heavy cut of June hay. In the northern part of Hastings county, and especially at Deloro, mining operations were quite brisk.

Labour conditions in Berlin, Waterloo and Elmira were reported never better. Practically every factory in these centres could put on more help if they could get it. This was especially true at Berlin of button, felt, boot and shoe and furniture factories (finishers, upholsterers and machine hands). Foundries, robe and clothing, twine factory, biscuit and confectionery, breweries and glove factories were all busy. Shirt and collar factories were very busy, one company being 25 girls short and others were in a similar predicament. One factory, on the completion of an order, laid off 17 men, every one of whom was immediately hired by other manufacturers. Female labour was also very scarce and wages for the latter were reported never equalled in this section.

Outside labour was well employed, with quite a shortage in some places. Painters were very busy. There was a shortage of delivery men and farm hands. Although there was not nearly as much building going on as in former years, bricklayers and masons were well employed. Wholesale and retail trade was good.

Brantford reported labour in general employed about the same as in May with a good demand especially for un-

skilled labour. Railway traffic and freight shipments kept up well; wholesale and retail trades were steady. Local industries were busy, and preparing to take stock. The American Radiation Company, which has been closed down for some time, was expected to resume operations in July. The Lake Erie and Northern Electric Railway was running on a steady schedule.

Brockville reported labour conditions active in all lines; no unemployed, and the supply not equal to the demand in several lines. Building was fairly active. The brass, steel and iron trades were unusually active, also the motor car and carriage industry. Manufacturing was generally good, some factories running double shifts.

At Chatham labour conditions showed a great change over the preceding month, all manufacturing plants being particularly active. Construction work on the new sugar plant was resumed and all available mechanics and labourers were taken on. Many constructional iron workers were brought in from outside. Owing to the large amount of city construction work under way the city was compelled to advertise for labourers to carry on the work. Brick manufacturing plants were taxed to their full capacity. The Hay Auto Wheel Company commenced manufacturing during the latter part of the month and many men were given employment. Railway passenger business was reported light and freight traffic heavier than in the corresponding month of 1915. Customs receipts for the month were the highest on record.

At Cobalt even greater activity has characterized the conditions prevailing within the month in so far as the mines were concerned. At both the Hudson Bay mine and the Trethewey, as well as at some of the smaller mines and prospects, extra men were taken on and mining operations were proceeding on the greatest possible scale. All of the mills both in the Cobalt and Porcupine camps were running full capacity. There appeared to be even a more

marked activity in the newer camps, such as Tashota and Kowkash, on the National Transcontinental railroad. A large number of prospectors left for these districts during the month. The McKinley Darragh Mining Company's new oil flotation plant was put in operation and was showing a marked saving in the milling of the ore treated.

Galt labour conditions were fair. Building trades improved and machinists and helpers were generally in demand. Plumbers, gas fitters and stone cutters were not so busy. Cotton and woollen mills were working overtime. Agricultural conditions were good in spite of the wet spring and the comparative scarcity of labour. The shortage of farm labour, however, was not considered serious and was likely to be met. Building permits issued thus far this year exceeded the record of 1915. The construction of a new factory for the making of tools was under way.

At Guelph labour generally was well employed, unskilled workers being still very much in demand as well as machinists of all kinds. Whilst building operations were by no means extensive a number of contracts for factory additions and residences were given out, which will provide steady employment for the building trades. A new industry for the manufacture of rubber goods is about to be established in the city and will give employment to about 75 hands. Manufacturing industries were active, with a shortage of skilled men in many lines. Owing to a lack of co-operation by all citizens the daylight saving scheme proved a failure in Guelph and had to be abandoned after a three weeks' trial. Farmers reported a scarcity of help.

Labour conditions in Hamilton were very good, with a steady demand for all kinds of skilled and unskilled labour. The daylight saving scheme was put into effect at 9 o'clock p.m. June 4 and was being observed by banking houses, theatres, merchants, manufacturers, and also the electric railways running in and

out of the city, with fair results. Farm and domestic help was greatly in demand, farmers offering from \$50 to \$60 per month for July and August as the hay and fall crop was expected to be good. There was a big increase in the consumption of water over the corresponding month of last year, due to factories running night and day.

Kingston reported labour conditions much the same as in the previous month. Work in general was much delayed on account of the impossibility of getting men, more especially in regard to municipal work, which was being held up. The daylight saving scheme which was passed in May was rescinded by the Council at the following meeting.

In London labour generally was employed to its utmost limit, a shortage in some lines necessitating overtime. The city is carrying on a very extensive programme of new asphalt roads, storm sewers, sidewalks, etc., and employed a large force of men and teams.

At Niagara Falls June was a month of great industrial activity. Manufacturing, transportation and the building trades were all in the "very busy" class. Among the principal building undertakings in progress were the new factory of the Axolite Company; the doubling of the liquid air plant of the American Cyanamid Company; the extension of the Pollard Manufacturing Company's machine shops; an extension of the Clarke-McGlashan Company's silverware factory; improvements to the Bank of Hamilton building; and many new dwellings. The Canadian Niagara Power Company is enlarging its intake and discharge works in connection with the installation of three new generating units and is also enlarging its transformer building by a new wing. Commercial conditions were good. Nineteen leading manufacturing concerns were reported to be "busy" or "very busy."

The Standard Steel Construction Company at Port Robinson secured another building as an annex to its plant and will employ 200 more men.

The Motor Machine Company at Welland commenced business. Operatives were wanted in canning, clothing and cordage factories.

At Orillia the demand for nearly all kinds of labour continued to exceed the supply and was restricting building and other work. Preparations were under way for the erection of a large woollen factory. Business was brisk in nearly every line. Wages showed a strong tendency to advance, due to the competition for what labour was available.

At Ottawa continued improvement was marked in the June labour situation. Building trades, with the exception of plasterers, were busy. Carpenters and stonemasons, in particular, were in demand. The same situation prevailed in most of the other trades, a scarcity of machinists being reported. Pulp and papermakers were also busy. The wood-working trades, while as yet fully employed, were granted the Saturday half-holiday during the summer months at their own expense, the change practically constituting a slight reduction in working hours and wages.

The re-building of the Parliament Buildings, upon which some 1,200 men were engaged, placed much work in prospect for the building trades, including structural iron workers. A big new Collegiate Institute building, already begun, was another substantial prospect.

Negotiations for a wage agreement were under way at the close of the month concerning the Ottawa Electric Street Railway employees. A Board of Conciliation had been requested.

Owing to a scarcity of labour, the city will suspend construction work as much as possible this summer.

Following several differences of opinion regarding "handymen" on civic work, the local carpenters' union will request the city to include a definition of a carpenter in all civic contracts in future in which carpenters are required.

Owen Sound reported the demand for labour equal to the supply. Building was quiet, but there was considerable

repair work being done. Factories were active. Retail trade was generally good.

Peterborough reported little change in labour conditions. The shortage of unskilled labour and female help was seriously felt in most of the factories. The building trades were actively employed, with some cessations on account of wet weather. Contractors found it difficult to obtain skilled help. Some factories were making additions to their plants. Textile mills were very busy, working night and day. Lumber mills showed great activity. Railroads were very busy. The traffic has been the heaviest in many years, but a shortage of cars delayed the work. Farm help was hard to get. The Cordova gold mines, which have been closed for some time, were expected to be re-opened at once with a pay-roll of about \$6,000 per month at the start.

At Fort William and Fort Arthur there was very little change in labour conditions. Keels for two new freight boats for ocean traffic were laid at the dry docks, Port Arthur, at the latter end of the month.

Piles were being driven on the Port Arthur water front for the new elevators to be erected. The new sawmill at the south end of Port Arthur was in operation and employing some twelve to twenty men. Farmers and fishermen were busy.

At Sault Ste. Marie the large industries such as the steel and paper mills worked to full capacity and foundry and machine shops were active. Work on the new power canal and projected civic undertakings were expected to render conditions active within the next few months.

At Stratford labour conditions were about the same as last month and considerably better than for the same month of 1915. There were practically no idle men, and machine shops, foundries, woollen and knitting factories were very busy.

Wholesale and retail grocers and provision stores did a good trade.

A clothing manufacturing company at Seaforth opened its new branch factory and will give employment to a number of men and girls.

At St. Catharines the general condition of the labour market continued about the same as during the previous month. There was some activity in paving and similar work. At Thorold, Pt. Dalhousie and Merriton labour conditions continued fair.

St. Thomas reported labour, especially unskilled, in good demand throughout June. There was also a steady demand for machinists, a large number being employed in factories in addition to those in the railway shops. The building trades were fairly well employed. Very little new work has been done. Opportunities for employment were good in almost every line. Railway men were busy. Wholesale and retail trade was fair. Local industries were fairly well employed. There was a good demand for women workers. Railway shop employees were busy. Railway construction gave employment to a large number of native Indians.

At Toronto all classes of labour were well employed, with a considerable shortage in many lines, more especially in the metal trades. The building trade showed increased activity with the advance of the season. Good modern dwelling houses were in demand and rents showed an upward tendency. While there were some houses vacant they were generally of an undesirable class, and many former tenants were buying houses, so that building promised to be fairly active during the remainder of the season. There was a considerable shortage of men in some of the building trades, especially painters, decorators and sheet metal workers. Many employers were advertising in American newspapers for workers in different lines.

Railway men were well employed and labour in demand. The staff of the Toronto Street Railway was considerably under strength and men from the

United States have been taken on. Teamsters and drivers were much in demand, the shortage causing many delays in the delivery of coal and other goods. The supply of unskilled labour was far short of the demand. Work on the new crib and concrete headwall in connection with the harbour improvements was started on June 24.

Woman workers were for the most part actively engaged. Manufacturers reported a demand for more operators than were available, and there was great need of inexperienced girls. These latter vacancies will be filled by girls, who have just reached working age and have left school at the beginning of the holidays to go to work. All factories were busy, more so than is usual in the summer season. Some firms are unable to give the customary holiday of a week or fortnight to their employees.

All typists and stenographers were busy. The commercial employment bureaux found it impossible to fill the vacancies reported to them. The attendance at the business colleges has been smaller than last year, and numbers of students have left before finishing their course to take positions. The general employment of women in banks has made a new opening for first class stenographers, and many of the second and third class stenographers have left the profession for work in factories. The month was quiet for trained nurses. The Saturday half-holiday given the employees of departmental stores for the summer began June 1.

At the annual meeting of the Canadian Manufacturers' Association a deputation from the Women's Emergency Corps, representing 3,000 women of Toronto, offered their services to the manufacturers as employees. The aim of the corps is to release men for military service.

At Windsor there was a good demand for all classes of labour with a shortage in some particular classes, such as building mechanics. Numerous pavements and sewers were started and tenders

have been called for other work. A house shortage was being felt. One building firm took out permits for 200 houses during the past four months. Manufacturers were active. Some factories, among them the Ford Motor Company, laid off hands owing to inability to ship their products. Work on the new steel plant at Ojibway has been progressing fast, although no buildings were under construction.

At Woodstock all the local supply of labour was employed, and there was a general demand for men, both skilled and unskilled. The furniture trade was fairly good and the factories were utilizing all the labour available and looking for more. Wagon factories reported business good. They needed unskilled labour, also skilled woodworkers and blacksmiths. The piano trade was active, and there was a demand for cabinet makers and action makers. This is the slack season in stoves and furnaces, but there was a shortage of men, both skilled and unskilled,—moulders, stove mounters, nickel platers, etc. Farmers continued to complain of lack of help. Domestic help, also, was very scarce. Shopkeepers reported business of all kinds very good. Everybody was employed and money was comparatively plentiful.

Manitoba

At Brandon labour conditions were very satisfactory. The demand for labour in all outdoor occupations was good and yet no real shortage was noticed. Wages of farm help ruled higher than for the past three years. The building trade was brisk, though no boom condition prevailed. Wholesale business was heavy and retail business fair. Bank clearings showed a steady increase over last year.

Weather conditions have been excellent for grain growing and stock raising. There has been an abundance of moisture and no excessive heat. The wheat crop never looked better and indications pointed to a very heavy yield. It is many years since there has been

such rich pasture, and the hay crop will be very heavy. Conditions have been excellent for market gardening. A heavy crop of all garden truck was expected. garden truck was expected.

At Winnipeg industrial conditions continued to be very satisfactory throughout the month. The supply of rain in the agricultural districts was abundant, and the prospects were for a heavy crop generally.

Employment in the building trades was satisfactory. Engineering trades were actively engaged. Printing, miscellaneous and leather trades showed no slackness. The teamsters' strike which occurred on May 10 was settled, also that of machinists at the Transcona shops. A rise in the price of sugar was very noticeable during the month.

Conditions for woman workers were very satisfactory. Many families having left the city, the demand for domestic servants was not so much in excess of the supply as was reported for April and May. The demand was brisk for temporary housekeepers in the city and for housekeepers and generals for the country. Generals, kitchen girls and domestics are also in demand for hotel help, which was somewhat affected by the closing of some hotels since the Manitoba Temperance Act went into force June 1.

Garment workers were working full staff and full time. Factory girls were in demand. Bookbinders, also. At the city free employment bureau there has not been a great demand for clerks in stores, but they reported excellent conditions otherwise. For the month of May they exceeded all previous records, having placed 1,700 men and women in positions. They state that the June report will be almost as good.

This is the commencement of the slack season for milliners, and the staffs in the big stores were commencing to take holidays which usually extend for three weeks to a month. Dressmakers were busy. Saleswomen with good experience were scarce and found immediate employment. Many school girls were ap-

plying at the stores for work during the holiday period. Stenographers were busy, many positions for temporary work were open and it was difficult to secure experienced help in this line. Sixty extra telephone operators were put on recently to permit of the regular staff taking holidays. About 25 to 35 employees are taken on each month.

Saskatchewan

There was a splendid demand for labour at Moose Jaw, particularly on farms. There was very little work for labourers on buildings in course of construction. Railroads were still busy hauling grain and a considerable amount of 1915 crop remained to be carried to the head of the lakes. Machine shops, bake shops and restaurants were in need of men.

Spring breaking was about completed and work was well under way with the summer fallow. Crops were growing well. There has been plenty of moisture and the weather has been cool, so the crop is well rooted. It is shorter than last year, but strong, and the prospects are very promising. The acreage is a little less than last year.

The Canadian Pacific Railway were calling for tenders for the completion of their line from Vantage to Assiniboia. There are about eight miles to grade and when this is completed it will give a direct line from Moose Jaw to Assiniboia with connections east and west with the Weyburn-Shaunavon line.

Prince Albert reported conditions much the same as in the previous month with the labour demand and supply about equal. Local merchants complained of trade falling off. Should even a slight improvement in business conditions take place there would undoubtedly be a shortage of help all round. Contractors scraping and painting the traffic bridge over the North Saskatchewan river had to advertise for men at outside points, there being only a few local painters left. Lumber mills continued busy and were replenishing their yards

besides shipping out considerable quantities of lumber regularly. The daylight saving scheme was recently adopted by a small majority. The local lumber mills, who employ the majority of the labour, were working on standard time; railway employees, also. Reports from surrounding districts indicated that the crops were never in better condition, notwithstanding the lateness of the season. Owing to frequent showers of rain the hay harvest is now practically assured.

An extension to the railway yards in the west end of the city was practically completed and will greatly facilitate the making up of trains for the south.

Regina reported labour fully employed, particularly the building trades, with the exception of plumbers and steamfitters. Bricklayers had to be brought in from outside places. Carpenters were in demand, especially for country work. Freight receipts for the past five months were better than for any previous period. The printing pressmen and assistants' union have entered into a new agreement with their employers, to take effect July 1, 1916, and to remain in force until August 31, 1918. Painters and paperhangers who went on strike during May for increased wages, returned to work June 13, employers granting a partial increase. The price of meat rose 2 and 3 cents per pound. The city bread by-law has been amended, and in future the weight of a loaf will have to be one and a half pounds. Wholesale and retail trade was very good. Farm machinery distributors reported a fair amount of trade. Crop prospects were very good, plenty of rain during the month having brought the grain on very fast.

At Saskatoon the demand for labour in some lines was quite active. There was nothing like the activity of former years, but in proportion to the number of mechanics and labourers available the demand was good. There was a steady demand for men on the farms and the greater part of the building activity was also in the rural districts, though the city was putting a small addition to

the power house and several stores and buildings were being erected in the business district of the city. The Exhibition buildings, recently burned, were being rebuilt. The Canadian Northern Railway was also extending the station at Saskatoon. Railway traffic in general was heavier than a year ago. The chances of a good crop were excellent.

The prospects of a good crop were excellent.

Alberta

At Calgary there was an increased demand for labour in the building trades. All other trades showed a slight improvement, and there appeared to be but few unemployed in the city. Enquiries were made from several places where buildings were contemplated as to the number of available mechanics. There was also a fair demand for farm labour. In the oil fields one company was building a refinery, of a capacity of 85-90 barrels a day, and the Prudential well was producing commercial oil. The Sheep Breeders' Association reported a large increase in the sale of wool for the district. Wholesale and retail merchants reported a steady improvement in trade.

Representatives of the Western Coal Operators' Association and District 18 of the United Mine Workers conferred at Calgary on June 23, the miners asking for an immediate increase of 10 per cent owing to the increased cost of living. A counter proposition submitted by the operators was submitted to the referendum vote of the miners. The Associated Charities report giving relief to 62 British families and 7 foreign families.

At Edmonton labour conditions showed an improvement. The surplus on the market during the previous months gradually decreased, and compared with the same time a year ago conditions were much better. The general readjustment that has taken place in the ranks of labour in this district since the commencement of the war has affected the building trades more than any other industry. With building practically at a

standstill in the city many skilled mechanics have found employment in the country at their respective trades. A very large number have joined the army and many who were medically unfit for active service have found positions in other industries left vacant by men who have volunteered. The changed conditions mean a lower wage for a great majority of those affected, while the cost of living has increased. The erection of a number of cottages by the Dominion Government on a nearby Indian reserve furnished employment for a number of local mechanics during the month.

According to the statements of local wholesalers, trade was fair the first half of the month, but fell off at the close, although it was much better than that of the corresponding month of last year. Country business was exceptionally good. The demand from the Peace River country for builders' material and supplies was quite heavy. Considerable building was being done along the railway lines recently put in operation. Retail trade in the city was quiet.

The hotel and restaurant employees who went on strike in May came to an agreement with the management of one cafe; the dispute with the balance of the employers was still on at the close of the month.

City officials were making arrangements to commence considerable work about July 1, such as paving, sidewalks, and a small amount of sewer construction. To curtail expenses the free employment bureau was closed at the end of the month.

While crops were about two weeks later than last year, warm weather the latter part of the month caused a very rapid growth and the prospects for a good yield were much better than a month ago. Coal mining was quiet. Railway lines running through the mountains experienced considerable trouble with floods and washouts and a large number of men were shipped out to repair the damage. The contract has been let for 50 miles of new line by the

Edmonton, Dunvegan & British Columbia Railway.

At Lethbridge there was little change in labour conditions since last month. There was a little demand for farm help, which was easily supplied, but this demand has been more in anticipation of future rather than of present needs. A few men could be placed with farmers at once and by July there will be quite a demand for help on the hay fields. After the haying commences there will be steady employment on to harvest. Coal mines were working steadily with a reduced force, and no great demand for in the building trades. The demand for female help on the farms and ranches could not be met.

There has been an abundance of rain and all crops were looking well. Hay, with a period of clear weather, was expected to be a great crop. Farmers were still marketing last year's crop of wheat. Sheep men were busy shearing and handling the crop of wool for which there is a good market.

Medicine Hat reported that industrial conditions during May showed little change. Labour, both skilled and unskilled, was well employed. Wholesale and retail merchants reported trade good. Building trades showed improvement. Several additions to manufacturing plants were being constructed and a number of smaller buildings were in course of erection. Indications pointed to another large grain crop this year owing to the large amount of moisture that has fallen during the past month in Southern Alberta. At Redcliff there was an improvement in industrial conditions, more men being given employment each month.

British Columbia

At Fernie during the latter part of June there was more or less temporary interruption of operations in several of the industries. These were caused by the warm spring weather setting in for the first time this season and thereby releasing the vast quantities of snow

in the mountains resulting in unprecedented high water, which has done extensive damage and limited operations in some industries, and completely suspending them in others.

Civic street improvements, which were commenced during May, here, have been temporarily, at least, suspended as the men employed on this work have been required by the city for more urgent work in the nature of preservation of civic property during the flood season, as well as the reconstruction of important civic improvements destroyed at the same time. In connection with the recent floods in this district a vast amount of damage has resulted, and it will take several months of incessant effort to restore matters to normal conditions.

The question of a war bonus of 10 per cent. demanded by the Fernie and Michel coal miners last month developed into a district affair instead of being confined to the Crow's Nest Pass Coal Company and its employees. It has been recognized as such by the Operators Association, and negotiations between that association and the officials of District 18, United Mine Workers of America have been in progress. Two meetings were held in Calgary during June, the first when the miners' representatives presented the demand for the 10 per cent increase, and subsequently on June 23 when the operators replied to this demand by submitting a counter proposal. In this counter proposal the operators signified their willingness to give the men an advance on the scale of wages paid under the present working agreement between these parties, but not to the extent asked by the men. This counter proposal is to be submitted to the men in the near future for ratification by referendum.

The damage inflicted by the recent floods possibly affects the lumber industry to the greatest extent, but railway companies, the Government, municipalities and private parties are also heavy losers. One feature in this connection is that in order to make these repairs employment will be given to a

larger number of workers. Numerous bridges used for conveying posts and poles to the points of shipment have been swept out and consequently caused these operations to cease.

The high water in the rivers has resulted disastrously to the sawmills located thereon as well. The Ross Saskatoon Lumber Company at Waldo, B.C., to the south in the valley of the Kootenay river is reported to have suffered damage to the extent of over \$30,000, from the loss of sawn lumber and logs in stock and to their sawmill as well. Several others have suffered considerable loss and have been rendered inoperative for some time.

The local mills had not commenced operations and it was considered doubtful if they would this season, the floods having created so much additional work that it would be extremely late before they could start.

While this condition prevailed locally and conditions throughout the district were somewhat similar, as there is already a fair demand for lumber, and the indications favourable for another satisfactory crop in the Prairie Provinces, this demand was expected to materially increase, and the lumber companies which have been more fortunately situated and not affected to the same extent were pushing operations forward in anticipation of the better market so that the industry as a whole will recover and the prospects were still indicative of a brisk season.

The floods also had an effect on the coal mining industry and activities have been hampered to a noticeable extent. Despite this, however, there existed a shortage of labour in the coal mines, and while the mines the last week in June were forced to shut down this was on account of car shortage caused by the interruption of railway traffic, and were expected to be resumed shortly.

The local company, however, announced that some 300 more men could be employed if a sufficient number of haulage hands could be procured. This

would accordingly increase the output of the local mines approximately 1,000 tons daily. Orders for this additional amount were being held in hand.

Nanaimo reported very little change in the labour situation. Wholesale and retail trade was very quiet. The fishing industry was very quiet. Sawmills worked steadily, and logging camps were active. Coal mines in Nanaimo worked steadily, but other mines in the district had more or less off time.

At Nelson labour conditions were improved, especially in the building trades. Bricklayers and plasterers were finding steady employment. On account of the exceedingly high water, some few of the mills were compelled to shut down. The Slocan Star mine at Sandon was making extensive improvements which were expected to add greatly to the daily capacity and general efficiency of the mill. Many improvements also were being made at the Noble Five mine at Sandon. The Granite Poorman mine, near Nelson, B.C., was employing about 40 men, and the twenty stamp mill was running steadily. The smelter at Trail was still running to its full capacity and employing more men than ever before since commencing operations. Building operations and additions to plant were still in progress. A large number of small mines all through the district were working, and altogether mining in British Columbia was very active.

At New Westminster the number of unemployed steadily decreased. During June there were very few who were not working at least part of the time. Very little new work was begun, although a number of building permits were issued. The proprietors of the local shipyards were negotiating for the construction of two ocean going vessels, which will necessitate increasing the capacity of the yards and also a large increase in number of employees. Fishing was not very brisk in the river, although prices were fair.

Lumbering was going on as usual, although it was reported that the loggers

were going to close down during July, it being claimed that the market was becoming glutted with logs. Lumber and shingle mills were running full time with a good demand for all products. Factories were also running full time; box factories working overtime.

At Prince Rupert labour, both skilled and unskilled, was fairly well employed. The fishing industry continued good. The demand for halibut has been greater than the supply, thereby again increasing the price paid to fishermen. Salmon was appearing on the market in increased quantities, and canneries were expected to be in full operation shortly.

Mining in the district contiguous to Prince Rupert was increasing with the result that shipments of ore to smelters at Trail and outside points were becoming greater. An effort was under way to have a smelter located at Prince Rupert, which it was thought would benefit not only nearby shippers but also those from Alaskan points. The lumbering industry was still very active. A new mill at Sewall on the Queen Charlotte was started during the past week. Fifteen men will be employed to start with.

At Vancouver there was an improvement in the labour market over last month, and a distinct improvement as compared with June last year. This was due not so much to demands for labour within the city, but from up-country and interior points. With the opening of the season a good deal of railway construction which had been suspended for practically two years has been started up again on the Pacific Great Eastern Railway, as the result of a Provincial Government guarantee of \$6,000,000 loan to this concern. The demand for men for this work is said to have been greater than the supply which offered. To meet the deficiency there has been a demand from certain quarters that the Order-in-Council preventing workmen from foreign countries entering British Columbia be suspended to permit the entrance of men from Washington State.

This demand for men for certain kinds of work was reflected by full "Men Wanted" boards at the employment agencies, and calls made on the city relief and employment office. There has also been much activity in the logging industry this spring, and this has absorbed a good deal of labour. It was, however, stated in logging circles that there were many more logs available than the market could take up, and there was talk of a general cessation of logging for one month.

This situation was partly due to lack of ships, and mill owners generally stated that if they could charter bottoms to transport manufactured lumber in large volume they could supply many heavy demands which they could not at present entertain. The necessity for building lumber-carrying vessels with Vancouver as their home port has, in consequence, become a question of first importance. A measure brought down at the recent session of the Provincial Parliament has for its object the assisting and stimulation of this industry, and at North Vancouver yards bottoms have already been laid down and building was in active progress.

The new Workmen's Compensation Act has also been passed into law, and will become operative January 1, 1917.

During the month a vote of the rate-payers of the city was taken on the question of the most suitable day as a compulsory weekly half-holiday for retail stores. The choice was between Wednesday and Saturday. By a large majority Saturday was chosen, the new law to become operative Saturday, July 1. The legislation covering this is provincial, and was introduced at the recent session of parliament, leaving the choice of day to the voters in the various municipalities and country districts.

Building during May was slack. The outlook was dull. Relief was given by the city during the month to 175 families and 65 physically unfit single men at an approximate cost of \$2,000. A

very disastrous fire completely destroyed the plant of the New England Fish Company, and it was understood that the industry would not be re-established at Vancouver, but would be transferred to Prince Rupert.

Coal, which during the past winter was raised from \$6.50 to \$7.50 and \$8 per ton, was being offered at \$7 per ton. The high price of fuel oil was causing a reversion to the use of coal for heating purposes in many large buildings.

The demand for female labour continued fair and general conditions for women compared more than favourably with June of last year. In two occupations the demand was greater than the supply, namely, domestic help and operators for garment making.

Among measures passed by the Provincial Legislature of interest to women was one conferring the parliamentary franchise on women, also the right to sit in parliament on the same qualifications as men. This bill is to be submitted to a referendum of the male electorate at the time of the provincial elections in the fall, and if passed by the electors will become operative January 1, 1917.

The question of the employment of white help in hotels being made a condition of the granting of a license was again raised at the annual meeting of the Board of License Commissioners by representatives of the Vancouver Trades and Labour Council, and a resolution was passed by the Board to the effect that after January 1, 1917, hotelkeepers must employ only such as were British subjects or eligible to become so. This was changed to a resolution to postpone action until such time as the city solicitor could give a ruling as to the legality of excluding Orientals from particular employments.

With the closing of the schools for the summer vacation a number of resignations have been handed in by teachers. These vacancies, however, will not be filled, the School Board having decided to enlarge classes and cut down expenses on teachers' salaries.

The supply of domestic help continued to decrease, some difficulty being experienced in obtaining either competent domestics or young untrained girls. The latter prefer work in stores or as telephone operators, and will only take domestic work when any other kind is not obtainable.

The demand for general domestic help at an average wage of \$20 per month was difficult to supply. Secretaries of employment agencies, both commercial and free, reported business poor through lack of domestics.

Factory help was well employed and some difficulty was experienced by employers in obtaining operators to work on Government orders. Conditions were so bad for skilled operators during the year 1915 that a great many left the city going to Eastern Canada or to the United States, which accounts for the lack of supply to meet the increased demand along these lines.

Whilst telephone operators were fairly employed, no pupils were taken on at the school where the company trains its operators.

Stenographers were finding employment more easily than for many months past, also bookkeepers and office help. Department stores were not quite so busy as in spring months, more activity being looked for during the July sales.

Fruit canning starting during the past month has provided employment to a number of women. The supply was away below the demand, the growers, especially of strawberries, offering an increase of nearly 30 per cent on the crate for picking.

The Free Women's Employment Bureau placed 81 women in positions during the month.

The British Columbia Telephone Company received 24 applications and placed half of these in positions. Two typewriter companies had applications from 168 persons and placed 107 of these.

Labour conditions at Victoria during June were somewhat better than for

several months previous, the logging, lumbering and salmon canning industries having absorbed a considerable number of men. The building trades continued dull, while work in nearly all the iron trades was fairly brisk.

Commencing with the first Saturday in July all stores, both wholesale and retail, will close at 1 o'clock on Saturdays throughout the year. Fruit, candy, tobacco and florists' stores are exempt from the law.

At the recent session of the Legislature an Act was passed to assist the ship-building industry in British Columbia. As a result of this legislation a new shipyard has been opened and in a few weeks construction will be commenced on three wooden ships, to cost \$125,000 each, which will give work to a considerable number of skilled mechanics and labourers.

Work was progressing rapidly paving the roads and installing a water system in the adjoining municipality of Saanich. A force of about 250 men were employed.

The City Council has refused to accede to the request of the Trades and

Labour Council to restore the minimum wage of \$3.00, which was reduced to \$2.50 per day shortly after the outbreak of the war.

Owing to unfavourable weather conditions the strawberry crop in this district has averaged only half a crop. Consequently the fruit is higher than last year, retailing at \$2.25 per 18 lb. crate, or 10 cents per box. The wages paid to pickers (Chinese) was \$1.50 per day, without board.

The hay crop, owing to lack of rain, was much below the average.

The lumber industry at all points on Vancouver Island continued to show increased activity. Shipments to the Prairie Provinces, which consume about 60 per cent of the province's output, were increasing steadily, due to some extent to the work carried on by the Forest Branch of the Lands Department in developing there a market for British Columbia lumber products.

A special effort is being made to increase the membership and develop a keener interest in the work of the Victoria Board of Trade, which is meeting with considerable success.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS DURING JUNE, 1916

DURING the month of June two reports were received in the Department from Boards of Conciliation and Investigation appointed to deal with disputes between the Acadia Coal Company, Limited, Stellarton, N.S., and employees, and the Brantford Municipal Railway Commission and street railway workers. Both reports were unanimous, and in the latter case a memorandum of the terms of settlement was attached to the report.

Seven applications for Boards received attention during the month. Pending the establishments of Boards, nego-

tiations resulted in a successful termination of two disputes and the applications were accordingly withdrawn. In three cases, proceedings looking to the establishment of Boards were held in abeyance to permit of conferences between the parties concerned, with a view to settlements being arrived at. In one case a Board was duly established, and early in the month of July entered upon its work of conciliation and investigation. The remaining application was under consideration by the Minister at the close of the month.

Particulars of these applications and of the reports above referred to are given hereunder.

Applications Received.

On June 2 an application was received from the maintenance-of-way men in the employ of the Edmonton, Dunvegan and British Columbia Railway Company, the Alberta and Great Waterways Railway Company and the Central Canada Railway Company, to the number of 300 directly and 600 indirectly. The cause of the dispute was given as the demand of the employees for the adoption of a schedule of rules and rates of pay governing their employment, copy of which was appended to the application. The good offices of the Department were utilized through the services of one of its officers in an effort to have negotiations resumed between the parties concerned with a view to an amicable adjustment of the dispute. With the assistance of the departmental officer conferences were arranged between the manager of the companies concerned and a committee representing the employees. These conferences resulted in an adjustment of the dispute and the application was accordingly withdrawn.

On June 6 an application was received in the Department from the electrical workers (outside men) in the employ of the Montreal Light, Heat and Power Company, members of Local Union No. 492, International Brotherhood of Electrical Workers. The number affected by the dispute was given as 250 directly and 1,000 indirectly. The cause of the dispute related principally to the question of wages, but included also hours and conditions of employment as set forth in a proposed agreement which the employees had submitted to the company. In this case direct negotiations for settlement have been resumed and procedure has been stayed.

On June 8 an application was received from the employees of the Halifax and South Western Railway Company, members of the Canadian Brotherhood of Railroad Employees, to the number of 175. The dispute grew out of a demand for increased rates of pay,

shorter hours, and improved working conditions. In this case also direct negotiations have been resumed and procedure has been stayed.

Reference was made in the June issue of the *Labour Gazette* to an application from the employees of the Consolidated Mining and Smelting Company of Canada at Trail, B.C., members of Trail Mill and Smeltermen's Union, No. 105, Western Federation of Miners, to the number of 1,200 directly and 50 indirectly. The principal cause of the dispute was the employees' demand for increased wages. A proposed schedule of agreement was appended to the application. On June 9 the Minister established a Board, Messrs. A. C. Flumerfelt, Victoria, B.C., and David Rees, Fernie, B. C., being appointed members thereof on the recommendation of the employing company and the employees respectively. On June 12 an application was received from the employees of this same company at Rossland, B.C., members of Rossland Miners' Union, No. 38, Western Federation of Miners. In this case the dispute related to the question of wages and affected 800 employees. As there appeared to be a prospect of settlement by direct negotiation the Departmental Fair Wages Officer, resident at Vancouver, was instructed to visit Trail and Rossland to assist in promoting an adjustment of the dispute by conciliatory means, or, failing that, to have both disputes referred to one Board. Proceedings were accordingly stayed to this end, and before the close of the month word had been received that the dispute affecting the smelter's employees had been amicably arranged with prospects of a similar arrangement in the second case.

On June 24 an application was received from the employees of the mine operators in Cobalt camp and vicinity, members of Cobalt Miners' Union, No. 146, Western Federation of Miners. The dispute affected approximately 2,200 employees and grew out of the latter's demand for increased wage rates and improved working conditions. At the

close of the month the application was under consideration by the Minister.

On June 27 an application was received from the street railway workers employed by the Ottawa Electric Railway Company, members of Division No. 279 of the Amalgamated Association of Street and Electric Railway Employees of America, to the number of 500. The working agreement expired on June 30 and a new agreement providing for increased wages and improved working conditions was drawn up by the employees and submitted to the company for adoption. The application also alleged discrimination against union members. A Board was established by the Minister on June 30, Mr. Geo. F. Henderson, K.C., and Mr. A. E. Fripp, K.C., M.P., both of Ottawa, were appointed members on the recommendation of the employing company and the employees respectively, and on the joint recom-

mendation of the foregoing members, Mr. Hamnett P. Hill, also of Ottawa, was appointed chairman of the Board.

On June 28 an application was received from certain workmen at Esquimalt and Victoria, B.C., in the employ of Yarrows, Limited, being members of Victoria Lodge, No. 191, of the International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America. The trouble arose in connection with repairs to be made to H.M.S. *Newcastle*, the men demanding an increase in wages and shorter hours. The dispute affected 90 employees directly and 120 indirectly. Through the efforts of the departmental officer resident on the Pacific coast, conferences were arranged which resulted in the men applying for a Board. The application was later withdrawn by the employees, a settlement having been reached by the parties concerned.

REPORT OF BOARD IN DISPUTE BETWEEN THE ACADIA COAL COMPANY, LIMITED, STELLARTON, N.S., AND EMPLOYEES

ON June 5 the Minister received the unanimous report of the Board which was appointed to deal with a dispute between the Acadia Coal Company, Limited, Stellarton, N.S., and its employees to the number of 1,000. The dispute related to wages, hours and conditions of employment. The employees concerned had declared a strike on April 18, which continued for three weeks, being terminated as a result of the men's decision to refer their differences under the Industrial Disputes Investigation Act. A Board was established by the Minister on May 15 and was constituted as follows: His Honour Judge E. Coatsworth, Toronto, Ont., chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board; Messrs. Wm. H. Chase, Wolfville, N.S., and R. H. Murray, Halifax, N.S., appointed on the recommendation of the employing company and the employees respectively.

The report of the Board dealt with each of the employees' demands as set forth in their application and stated that on each side there was a spirit of good feeling and every desire to arrive at a reasonable settlement. The Board recommended certain wages increases to go into effect on May 15, 1916, and in the case of tonnage, yardage or consideration rates for miners an eight per cent increase, to take effect on the last mentioned date, with a further increase of two per cent after January 1, 1917. As respects the employees' demand for double time rates on Sundays and holidays and time and one-half for overtime, the Board recommended instead the payment of time and one-half for Sundays, holidays and overtime. The Department was informed on behalf of the employees that they had agreed to be bound by the decision of the Board and would, therefore, regard it as the settlement of the dispute.

Report of Board

The text of the unanimous report of the Board in this matter is as follows:

To the

Honourable T. W. Crothers, K.C., M.P.,
Minister of Labour,
Ottawa, Ont.

IN THE MATTER of the Industrial Disputes and Investigation Act, 1907, and of a dispute between the Acadia Coal Company, Limited, of Stellarton, Nova Scotia, on the one hand, called the employer, and its employees, on the other hand, hereinafter called the employees.

The Board of Conciliation and Investigation appointed in relation to the difficulties between the employer and the employees in this case met in the Town Hall, New Glasgow, Nova Scotia, on May 27, 1916, and from day to day since said date with the exception of Sunday, May 28, down to the present time.

All the members of the Board were present at each of the sittings thereof, together with representatives of the employer and the employees. Such representation being Mr. Clifford C. Dane for the employees, and Messrs. H. Prudhomme, George Gray and F. Notebaert for the employer.

There were 47 witnesses called, 44 by the employees and three by the employer. The views of both parties were duly presented. All the witnesses were duly sworn and statements were made, and full opportunity was given to both sides to discuss the case in all its branches, which was very fully done. On each side there was a spirit of good feeling and every desire to arrive at a reasonable settlement. The employees submitted a statement showing the wages and conditions under which they desired to work, and the same together with the reply of the employer thereto was the basis for our consideration of the matters referred to us.

After full consideration of all the evidence, arguments, statements and exhibits presented, the Board desires to make the following report, and in doing so it will be convenient to take up the items contained in the claims made by the men on the application for Board of Conciliation in the order as they appear in that statement.

1. All employees ask for an increase of 25 per cent in pay on the rates prevailing on April 1, 1916. This applies to all existing rates, whether time or tonnage, or yardage rates.

The Board reports the following:

(a) An increase of 25 cents per day to all men paid by daily rates of \$1.55 or less.

(b) An increase of 20 cents per day to all men paid by daily rates of over \$1.55.

(c) An increase of 20 cents per day to all boys under 18 on common labour.

(d) Ten per cent to be added to all tonnage, or yardage or consideration rates for miners, of which 8 per cent is to go into operation on May 15, 1916, the same to be increased to 10 per cent after January 1, 1917.

(e) The above rates go into operation from May 15, 1916, with the exception of the 2 per cent part of the 10 per cent, which is to go into operation on January 1, 1917.

2. The docking system be abolished. Employees are not to be required to sign the identification cards at present in use.

We report the following:

Referring to the present docking system, it has been mutually agreed between the management of Acadia Coal Company, Limited, and their employees, that the present system as it now exists shall continue during the term of this agreement, but that the company will submit a list of not less than six names to the workmen, out of whom they will select one to be known as a dock inspector and whose services shall be paid

for by the Acadia Coal Company. This officer shall have his duties clearly defined to him by the management and a committee of the men before he assumes charge. If, on any occasion, he considers that the fines by the company's dock man are in excess of what he considers fair and he is unable to adjust matters with the dock boss, he shall have the authority to call the attention of the check weightman, and where no check weightman is employed the attention shall be called of the man appointed by the employees.

All the terms on identification card are to be printed on one side with room for signature. Cards to be read over to men before signing, and copy to be given to each man who signs. Cards to contain no reference to beneficial orders.

3. In cases where men have enlisted for overseas service previously to February 28, 1916, the families of such men are not to be ejected from the houses which they occupy.

The Board recommends this:

4. In cases where the company takes a man out of his place to do other work in the mine, such miners shall be paid the same amount per day for such work as is earned in his place during the same fortnight.

The company agrees to this and the Board reports in favour of this clause.

5. The rates now in force for house rent and coal supplied to employees shall be continued.

The company agrees to this and the Board reports in favour of this clause.

6. There is a complaint from the boys employed by the company that there are frequent shortages in their pay. They ask that a better system of time-keeping be installed and that instructions be given to officials at each colliery to rectify errors when they occur without unnecessary delay.

The company has agreed and the Board reports that such a system shall be employed in the time-keeping as shall rectify the errors when they occur without unnecessary delay.

7. The road distance for putting coal shall be reduced to 300 feet, over this distance this work to be paid extra 5 cents per ton, or 5 cents per cubic yard.

The company agrees and the Board reports as follows:

The distance for putting coal in pillar work and in bords shall be 350 feet and in levels 400 feet. Over and above these distances, up to 500 feet, an extra 4 cents per ton shall be paid. After driving in 350 feet in bords and levels and over these distances up to 500 feet, 4 cents extra per ton will be paid, and when driving is paid on yardage 28 cents per lineal yard will be paid over and above 350 feet. Covering any of the above cases where the distance exceeds 500 feet, special arrangement will be made by the mine manager and the workmen.

8. Where coal is shovelled down more than 40 feet, the men shall be paid 10 cents per ton extra.

The Board, with the agreement of the company, reports that in balances and chutes an extra 5 cents will be paid for shovelling from 45 feet to 65 feet. Over 65 feet and up to 80 feet, 75 cents per lineal yard will be paid plus 5 cents per ton. In shovelling in pillars special arrangements will be made for any distances in excess of 50 feet, providing, however, that 50 feet of the pillar is worked. In chutes and balances the measurements will either be taken between high side and high side or low side and low side, and in measurements in pillars the measurement will be taken on high side.

9. All men are to be hoisted at 3.30 p.m.

The Board, with the agreement of the company, reports that all men are to be hoisted between 3.30 p.m. and 4.15 p.m.

10. Boys shall be paid for all time which they work after cars.

The Board, with the agreement of the company, reports in favour of this clause.

11. The men shall be paid for all timber, every set.

The Board, with the agreement of the company, report in favour of the following:

That the rate of cutting in any place is to include the timbering, all sets placed 4 feet apart; extra timbering is to be paid as follows:

40 cents per complete set, plus 8 per cent until January 1, 1917, and 10 per cent thereafter.

10 cents plus 8 per cent for centre prop until January 1, 1917, and 10 per cent thereafter.

20 cents plus 8 per cent for booms until January 1, 1917, and 10 per cent thereafter.

Any necessary repairs the company agrees to pay for at the rate of 25 cents per hour.

12. All rails, timber and other material shall be placed at the mouth of a man's bord upon request.

The Board, with the agreement of the company, report in favour of this request.

13. The men shall be paid for all dead work.

The Board, with the agreement of the company, report that the following was arranged with the employees; rates to be arranged for all dead work before doing the work. Such arrangement is not to operate to compel the employee to work on such dead work at less than 25 cents per hour.

14. All men working in double shifted places shall be paid 5 cents per ton extra, all men working in triple shifted places shall be paid 10 cents per ton extra.

The Board, with the agreement of the company, recommend that this be adopted.

15. Carpenters, blacksmiths, machinists and all outside labourers shall be allowed to stop work on Saturdays at the same hour as other employees.

The Board, with the agreement of the

company, recommend that this be adopted.

16. The men shall be paid double time for Sundays and holidays and time and a half for overtime.

The Board report that the men regularly employed on Sundays and holidays shall receive time and a half for Sundays and holidays, otherwise the clause is adopted.

17. In case the selling price of coal is further advanced, a reasonable proportionate advance shall be made in wages.

The Board reports that this was not pressed by the employees.

18. All cars or cages used for hoisting men shall be equipped with the best possible safety appliances.

The Board, with the agreement of the company, report that this be adopted.

19. There shall be no discrimination against any of the employees who have taken an active part in the settlement of the present dispute between the company and its employees.

The Board, with the agreement of the company, report in favour of the adoption of this clause.

The Board recommends that the terms herein set out shall be in full force and effect until May 15, 1917.

The Board desires to place on record its thanks for the courtesy of the Town Council of New Glasgow in permitting the sittings of the Board to be held in the Council Chamber.

All of which is respectfully submitted.

Dated at New Glasgow, this second day of June, A.D. 1916.

(Sgd.) E. COATSWORTH,
Chairman.

(Sgd.) W. H. CHASE,
For the Employer.

(Sgd.) R. H. MURRAY,

REPORT OF BOARD IN DISPUTE BETWEEN THE BRANTFORD MUNICIPAL RAILWAY COMMISSION AND STREET RAILWAY EMPLOYEES.

ON June 6 the Minister received the unanimous report of the Board which was established on May 17 to deal with certain differences between the Brantford Municipal Railway Commission and its street railway employees, members of Division No. 685, Amalgamated Association of Street and Electric Railway Employees of America. The dispute affected 27 employees directly and five indirectly, and grew out of the employees' demand for a written agreement with the Brantford Municipal Railway Commission, for increased wages, and for certain changes in the working conditions. The personnel of the Board in this matter was as follows: His Honour Judge Colin G. Snider, Hamilton, Ont., chairman, appointed by the Minister owing to the failure of the other members to make a joint recommendation; Mr. F. W. Frank, Brantford, Ont., the Commission's nominee; and Mr. Jos. Gibbons, Toronto, Ont., the employees' nominee.

The Board, in its report stated that "the members of the Brantford Municipal Railway Commission showed a sincere desire not only to advance the good condition of the railway, but to consider the welfare of the employees, and the employees manifested a pride in discharging their duties well as public servants of this municipal railway." The Board further reported that an understanding had been arrived at. A memorandum of the terms of settlement formed part of the report, being duly signed by the chairman of the Board, the chairman of the Commission, and a representative of the employees, the same to take effect on June 1, 1916, and to remain in effect until June, 1917.

Report of Board.

The text of the unanimous report of the Board in this matter is as follows:

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Brantford Municipal Railway Commission, employer, and its employees, being members of Division No. 685, Amalgamated Association of Street and Electric Railway Employees of America, employees.

To the Honourable,
the Minister of Labour,
Ottawa, Ont.

The Board of Conciliation and Investigation appointed in this matter met with the parties to the dispute pursuant to appointment on Wednesday, May 31, 1916, at the Court House in the City of Brantford, and proceeded to hear witnesses and representatives of both parties, continuing in session for that purpose on the first and second days of June, with the result that after repeated efforts a settlement between the parties was finally come to.

It is a pleasure to the members of the Board to be able to say that good sense and good feeling and courtesy prevailed on both sides throughout. The members of the Brantford Railway Commission showed a sincere desire, not only to advance the good condition of the railway, but to consider the welfare of the employees, and the employees manifested a pride in discharging their duties well as public servants of this municipal railway.

The present condition of the railway and equipment and the service rendered is a credit to the city.

The memorandum of settlement finally made is attached to this report as part thereof, and is duly signed in presence of the Board by the chairman of the Brantford Municipal Railway Commission, and by the representative of the employees before the Board, also being

the President of Division No. 685, Amalgamated Association of Street and Electric Railway Employees.

All of which is respectfully submitted.

Dated at Brantford, the second day of June, 1916.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) FRED. W. FRANK,
For the Employer.

(Sgd.) JOS. GIBBONS,
For the Employees.

*Memorandum of Terms of Settlement
Made Between the Parties.*

Brantford, June 1, 1916.

Messrs. Parmenter and Clemenhausen,
City.

Gentlemen,—

The following resolution regarding adjustment of wages, etc., of motormen and conductors of the Municipal Street Railway, same to take effect June 1, 1916, and to remain in effect until June, 1917. Following schedule:

First month	16c
Following 11 months	19½c
Second year	21½c
Third year	22½c

“Stools to be provided for use of motormen in defined limits. Rigid inspection of cars to be constantly made. With regard to change to be carried by conductors, same to be amply provided by the company. Boxes for coats and caps provided in each car, to be used by motormen and conductors. Open cars to be improved as to storm conditions. Charges against employees to be always open to appeal before the Commission. That one-half cost of uniforms to be borne by the company. Seniority as to duties of employees to be left to the management. All rights and privileges now enjoyed by employees to be continued. No discrimination to be made against any employee on account of his belonging to a labour union.”

This to be placed on the minute book of the company on immediate acceptance by you.

Now agreed to by both sides, after full discussion.

June 2, 1916.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) C. H. HARTMAN,
Chairman.

(Sgd.) ALFRED JOHN PARMENTER,
Representative of Employees.

TRADE DISPUTES DURING JUNE, 1916.

THE number of trade disputes beginning in June was four, as compared with thirteen in May and three in June, 1915. The disputes affected directly 46 firms and 1,682 employees. The month opened with five disputes carried over from May, in which were involved 22 firms and 364 employees. In all nine disputes, old and new, were in existence during June, involving 68 firms and 2,046 employees. The time losses occasioned by the four new disputes of June amounted to approximately 27,654 work-

ing days, while the estimated time losses resulting from the five disputes beginning prior to June were 7,094 working days, or an approximate total of 34,748 working days lost by the employees affected through the nine existing disputes of June. The minimum and maximum duration of the new disputes of June was from 5 to 26 days. Amicable settlements were reported in the case of one old and one new dispute, while in the case of another old dispute the places of the strikers were filled. Six disputes were unsettled at the end of June.

New disputes in June, 1916.—The following table indicates the trades affected by the disputes commencing during June:

TRADES	No. of disputes	No. of firms.	No. of employees.
Building	1	14	41
Metal	2	31	1,271
Clothing	1	1	370
Total	4	46	1,682

Disputes beginning before June.

Two of the disputes carried over from the May record terminated during June; a settlement being effected in the case of one and in the case of another the strike was ineffective owing to the places of the strikers being filled. The disputes referred to are:

Carpenters, Quebec, Que.—Twenty-five carpenters in the employ of the Deakin Construction Company, Limited, working on an extension to the Ross rifle factory at Quebec, Que., ceased work on May 12 owing to their demand for an increase in wages from 30 to 35 cents per hour being refused. The places of the strikers were filled and work on the contract affected proceeded with.

Teamsters, Winnipeg, Man.—About 200 teamsters employed by the Manitoba Cartage Company, the Canadian Northern Transfer Company and the Canadian Express Company went on strike on May 10 owing to their demand for an increase in wages from \$2.25 to \$2.50 per day being refused. Negotiations between the parties resulted in a compromise rate of \$2.35, acceptable to the men, being agreed upon. The teamsters employed by the Canadian

Northern Transfer Company and the Canadian Express Company returned to work on June 19, while those employed by the Manitoba Cartage Company resumed work on June 24.

Disputes beginning during June.

Electrical Workers, Hamilton, Ont.—On June 1, 41 electrical workers (electricians and wiremen), members of Local No. 105 of the Brotherhood of Electrical Workers of America, employed by 14 firms at Hamilton, Ont., went on strike demanding increased wages and other conditions affecting their employment. The strike was still in progress at the end of June.

Machinists, Transcona, Man.—On June 1, 171 machinists employed in the railway shops of the National Transcontinental Railway at Transcona, Man., ceased work owing to their objection to improvers employed in the shops doing machinists' work. Negotiations between the general superintendent of the railway and a committee representing the machinists resulted in the demands of the machinists being acceded to and work was resumed on June 8.

Machinists and tool makers, Hamilton, Ont.—Eleven hundred machinists employed by 30 firms at Hamilton, Ont., went on strike on June 12 for the purpose of enforcing their demand for a nine-hour day. The strike was still in existence at the end of June.

Clothing workers, Montreal, Que.—On June 8, 370 clothing workers employed by the John W. Peck & Company, Limited, clothing manufacturers, Montreal, Que., went on strike, the alleged cause being a change in piece-work arrangements involving a reduction in earnings and a demand for increased rates. The strike was in existence at the end of June.

TABLE OF TRADE DISPUTES IN EXISTENCE DURING JUNE, 1916.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS.

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 34 cities showed a decrease in June as compared with the previous month, the total falling from \$4,757,088 in May to \$4,252,964 in June, a decrease of \$504,124 or 10.59 per cent. Grouping the returns by provinces, increases are shown in all provinces except New Brunswick, Quebec, Ontario and Saskatchewan. As compared with the corresponding month of last year building permits showed an increase amounting to \$2,162 or .05 per cent, the total for June, 1915,

being \$4,250,802. As compared with June of last year there were gains in all provinces except in Quebec and Alberta, where there was a falling off of 22 per cent and 24 per cent respectively. Of the larger cities Montreal showed a slight decrease in June as compared with May, but a marked decrease as compared with June, 1915. Toronto showed a decrease both as compared with May and with June of last year. Winnipeg and Vancouver showed increases over last month. Winnipeg also indicated an increase, but Vancouver a decrease, as compared with June of last year.

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FOUR CITIES.

REPORTS OF EMPLOYMENT BUREAUS.

EMPLOYMENT continued at a high level during May. Reports from 100 employment bureaus,—71 commercial, 11 public and 18 philanthropic,—show that the demand is still rising. The number of vacancies notified to all offices was 35,941, a daily average of 1363.33 as compared with 1043.29* in April. The number of persons placed was 20,041, a daily average of 760.81 as compared with 607.42* in April. As to employment for woman workers, the number of vacancies notified to all bureaus was 8,933, a daily average of 345.83 as compared with 344.17* in April. The number of woman workers placed was 3,439, a daily average of 131.49 as compared with 115.54* in the preceding month. The proportion of vacancies filled to vacancies notified was 55.7 per cent, as compared with 57.6 per cent in April. The proportion of vacancies filled to vacancies notified was 61.5 per cent for men and 38.5 per cent for women, as compared with 69.8 per cent and 30.2 per cent respectively for April.

In the five principal centres of labour distribution,—Montreal, Toronto, Winnipeg, Edmonton and Vancouver,—there was an increased demand for workers except in Edmonton. The increases at Montreal and Winnipeg were especially noticeable. The demand was higher at Quebec, Sherbrooke, Fort William, Brandon, Regina, Saskatoon, Calgary and Victoria. Halifax, St. John, Ottawa and New Westminster were the only points where a decline in the number of vacancies notified was indicated.

The number of persons who obtained casual employment through the Salva-

tion Army and other agencies was 1,449, a daily average of 52.59 as compared with 56.07* in April. The number of casual jobs secured was 3,586, a daily average of 134.51 as compared with 127.76* during April.

IMMIGRATION—EMIGRATION—COLONISATION

IN the present article statistics in regard to immigration and emigration are given only for the United States, information respecting the movement of British subjects between the United Kingdom and British North America not having been received.

(2) Movement of Persons other than Citizens of the United States between the United States and British North America.

Immigration to British North America from the United States.—According to the May bulletin of the Bureau of Immigration of the United States Department of Labour alien residents of the United States to the number of 1,532 departed to take up permanent residence in British North America as compared with 934 in April, 1916, and 1,748 in May, 1915.

Immigration from British North America to the United States.—During May, 1916, 9,394 persons (not including citizens of the United States) left British North America to take up permanent residence in the United States

as compared with 10,520 in April and 7,238 in May, 1915.

Balance.—It appears from the above that in this movement between the United States and British North America the latter had the outward balance of 7,862 in May, 1916, as compared with 9,586 in April, 1916, and 5,490 in May, 1915.

(3) Homestead Entries and Land Patents.

Homestead Entries.—During the month of May, 1916, there were 365 homestead entries in Manitoba; 508 in Saskatchewan; 581 in Alberta, and 20 in British Columbia, a total of 1,474 as compared with a total of 1,018 in April, 1916, and 1,553 in May, 1915.

Letters Patented.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of May, 1916, the number of patents was 1,302 and the number of acres 206,155.01, as compared with 1,555 patents and 259,848.07 acres during April, 1916, and 1,755 patents and 262,046.27 acres for May, 1915.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JUNE, 1916, AND IN OTHER COUNTRIES.

PRICES were higher in livestock, meats, fruits and vegetables, hides, while eggs began to rise. Important declines, however, occurred in grains, fodder, flour, jute, metals, and some building materials and chemicals.

In retail prices the cost of a budget of staple foods averaged \$8.51 as compared with \$8.37 for the previous month

in the sixty cities. Meats, eggs, sugar and beans were upward. Anthracite coal was higher than in the same month in previous years, but soft wood, bituminous coal and coal oil were lower.

In wholesale prices the Department's index number was slightly lower than in May standing at 180.6 as compared with 180.9 in that month, 149.4 in June, 1915,

and 135.3 in June 1914. Important decreases appeared for the month in Grains and Fodder, Textiles, and Metals, but these were partially offset by increases in Building Materials, Drugs and Chemicals, Raw Furs and in Raw Rubber among Sundries. As compared with the same month a year ago all groups were higher except Grains and Fodder and Breadstuffs, while all groups were higher than in 1914 and 1913 except Raw Furs.

More detailed information as to the prices movement may be seen in the accompanying tables. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities of Canada, having a population of 10,000 or over. The quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workmen. All prices are for delivered goods. The rates for rent are for houses in districts inhabited by workmen.

Retail Prices

Meat prices were upward in many cities throughout the Dominion owing to the high prices of livestock, which had passed all previous records on the principal markets. Fish prices were also higher in some cities but were lower in others when the summer lake fish became plentiful. Lard was also higher in sympathy with meat markets.

Eggs advanced in a number of cities but were lower in Ottawa, where the supply was reported large, at Three Rivers, Que., and at Prince Rupert, B. C. At Charlottetown, P.E.I., a considerable export trade was reported and at Moncton, N.B., packers were buying. Milk was lower at Westville, N.S., Three Rivers, Que., St. John's, Que., Sault Ste. Marie, Ont., and Brandon, Man. Butter, however, was lower in many cities throughout the Dominion as a result of the favourable weather for pasture. Old cheese was still advancing and new cheese rose in some cities. A scarcity of rennet was reported as a factor

in the rise at Peterborough, Ont. On the other hand old cheese was lower at Ottawa and London, Ont., while new cheese was lower at a number of points as the season advanced.

Bread advanced at Stratford, Ont., and at Regina, Sask. Flour was upward in some cities but downward in others, there having been a slight decline in some grades from the high levels which had prevailed since the winter. Rolled oats advanced at Victoria, B.C., in sympathy with the oat market. Rice was higher in some cities but lower in others. Tapioca, however, advanced in a number of cities and the rise was reported due to higher ocean freights, which raised the wholesale price some time ago.

Canned tomatoes, corn and peas were higher in several cities as a result of successive advances in wholesale prices, due to the smaller pack last season and unfavourable weather for this year's crop. Beans were also higher, supplies being scarce and wholesale prices high. Evaporated apples and prunes were also slightly upward.

Sugar was higher in many cities in sympathy with the high level of wholesale prices. Tea was reported higher at St. John, N.B., and Windsor, Ont.

Potatoes were higher at several cities, most of them in Ontario or Quebec, but were lower in some localities in the Maritime provinces and the western provinces, where new potatoes affected the market.

Coal, anthracite, was higher at Halifax, N.S., St. John, N.B., at St. Hyacinthe and St. John's, Que., at Brockville, Peterborough, Orillia, Toronto, St. Catharines, Hamilton, Guelph, and Cobalt, Ont. At Halifax dealers desired customers to put in the winter's supply immediately, owing to low supplies, and at Brockville and Cobalt the advance was due to higher prices at the mines. The price was lower at Berlin, Ont. Bituminous coal was higher at Belleville, and Brantford, Ont., but lower at Vancouver, B.C. Wood was higher at Prince Albert, Sask., owing to great distances for supplies. Coal oil was higher at St.

f. Natural gas used. g. Lignite. i. Calculated from the price per 100 lbs. j. Allowing \$1.00 per ton for delivery.

Hyacinthe, Que., but lower at Montreal, Que.

Rent for houses with sanitary conveniences advanced at Brantford and London, Ont.

Wholesale Prices

Grains and fodder.—Manitoba Northern wheat, No. 1, declined to \$1.09¾ per bushel, but rose later to \$1.10⅞. Ontario wheat declined to 97-99c per bushel. Barley, Western, rose from 65c per bush. to 68½c, but Ontario barley eased off to 65-66c. Oats rose to 45-47c at Winnipeg and Ontario oats rose from 48-49c to 49-50c. Corn was up from 76c to 91c per bushel. Flaxseed declined from \$1.66 to \$1.57. Hay was still high at Toronto and Montreal, No. 1 about \$22.00 per ton. Bran declined to \$20.00-21.00 per ton and shorts to \$24.00-25.00.

Animals and meats.—Prime butcher cattle at Winnipeg rose to \$9.35-9.60 per cwt. but eased off slightly. At Toronto choice butchers rose from \$9.00-9.75 to \$9.75-11.10 per cwt. Beef, hind-quarters, rose 50c per cwt, to \$17.00-18.00 and forequarters to \$11.50-12.50. Veal was also up at \$8.50-17.00. Hogs declined to \$9.90-10.00 f.o.b. Ontario points but rose later to \$10.75-11.35. Bacon was up one cent per lb. to 23-24c and ham rose two cents to 21-22c. Lard was easier but firmed again. Sheep declined from \$9.00-11.00 to \$7.50-8.50 per cwt. Fowl were upward about two cents per lb.

Dairy products.—Butter, finest, was down one cent per lb. at Montreal to 29½-30c. Dairy butter at Toronto rose 1c per lb. to 28c but declined later to 27c. Cheese declined from 17¼c-17½c per lb. to 16¾-17c. Eggs fresh were up to 30-32c per dozen at Montreal and Toronto.

Fish.—Fresh whitefish were down to 14c per lb. at Toronto again. The catch of the Lunenburg fleet was reported larger than expected, but the fish were small in size, and as the Cuban and Porto Rican markets, where such grades are marketed, were dull and

well supplied, lower prices than were paid for the earlier catch were predicted. Salt herrings were off the market. The lobster catch was reported good west of Halifax and around Cape Breton Island but poor on the coast east of Halifax. Canned salmon were nearly sold out by the packers on the Pacific Coast and the new pack was expected to be dearer.

Fruits and vegetables.—Canadian strawberries were on the market much later than usual owing to the backward weather, and the first arrivals at Toronto were reported to be damaged by wet. In the last week in June the price was 14-18c per box at Toronto as compared with 7-11c a year before when the season was at its height. Bananas were easier at \$1.75 per bunch but lemons were up to \$4.50 per box and oranges up to \$4.25-4.50. Evaporated apples declined to 8½c per lb. at Toronto. Currants rose from 14-15c to 16-17c. Potatoes were up to \$1.95-2.00 at Montreal and at Toronto to \$1.90 for Ontario stock. Beans rose to \$4.75 per bushel and red onions to \$5.00 per cwt. Canned vegetables were reported firmer and upward by 2½c per dozen in some lines.

Miscellaneous groceries.—Flour, spring wheat, declined 20c per barrel and some winter and blended grades were also lower. Sugar was steady and firm after a slight weakness and a temporary decline made by one company. Glucose was 10c per cwt. lower.

Textiles.—Ontario wool was firmer and two cents to three cents upward. Woollen goods were also upward. Raw cotton was slightly lower than in May. Coloured cottons were upward. Raw silk, Japan, was lower. Jute and hesians were down, the market being affected by labour disputes at Dundee and buyers were not active. Flax sewing twine rose 1c per lb. to 31-33c.

Hides, leather, boots and shoes.—Beef hides rose to 20c at Toronto and calf-skins to 30c. Tallow rose ½c to 9½c per lb. Boots and shoes were higher at the ten per cent advance announced.

Metal and implements.—Owing to greater production iron and steel were

*Nine commodities off the market, fruits, vegetables, etc., one line of spelter was dropped in 1915. a. Strawberries. b. Apples.

not so firm but iron products were advancing on account of the high prices at which the raw material had been bought. Among metals several were weak but aluminum advanced and copper was firmer. Antimony declined 1c. to 43c per lb. and lead was down 1c to 9c per lb. Quicksilver was down to \$68.00 per flask, and spelter from 22c per lb. to 15c. Silver had risen to 76c per oz. in May, but returned to the former level at 63c. Tin was down from 54c per lb. to 46-47c.

Fuel and lighting. — Connellsville foundry coke was somewhat lower, but furnace coke was firmer.

Building materials. — Spruce deals, New Brunswick, declined \$1.00 per M to \$19.00. British Columbia shingles were 10c higher at Winnipeg. Common building bricks have been advanced as demand recovered. Fire bricks rose \$2.00 per M. Wire nails advanced 5c per keg. Sash cord was up 1½c per lb. Copper wire was easier. Wire cloth rose 25c per roll. Linseed oil declined to 76-78 per gallon and turpentine to 63c per gallon.

House Furnishings. — Crockery and glassware advanced ten per cent and table knives and silver-plated ware were also upward.

Drugs and chemicals. — Bleaching powder declined 1c per lb. to 7½c, but copperas continued upward reaching \$1.75 per 100 lbs.

Miscellaneous. — Raw furs eased off, muskrat and mink being slightly lower. Malt rose to \$1.00 per bushel. Paper, newsprint, rose to \$2.40 per cwt. Sulphite pulp rose to \$75.00 per ton for news grade. Raw rubber declined to 58-59c per lb.

Prices in Other Countries.

Retail food prices in the United Kingdom were reported 2½ per cent higher on June 1st than a month before, in the Board of Trade *Labour Gazette*, increases having occurred in meat, eggs, potatoes, butter, while fish declined from

a temporary high level about May 1st. The rise in eggs and potatoes was due to seasonal changes. Bread prices averaged practically the same but reductions occurred in several cities.

On wholesale prices in the United Kingdom at the end of May the *Statist*, continuing Sauerbeck's index number, reported a slight rise but the rate of increase had diminished. In animal food and in tea, coffee and sugar there were further increases, but vegetable foods were cheaper.

In Germany, prices at Berlin were nearly ten per cent higher in April as compared with March, the chief increases appearing in meats, potatoes and lard. The only decrease was in split peas. As compared with prices before the war, prices were five times as high in rice, over three times as high in meats (except pork which was over twice as high) and eggs and lard. The calculations, published in the British Board of Trade *Labour Gazette*, are based upon quotations in the official Prussian journal, *Statistische Korrespondenz* and many of the prices given are maxima, while in many cases only limited quantities of the articles quoted can be obtained at the figures given and in some markets none at all.

In Austria, prices at Vienna were five per cent higher in April than in March, the chief increases being in meats, eggs and onions. In many cases prices showed still greater increases since the beginning of the war than in Germany.

In the Netherlands food prices were slightly higher in April than in March, the chief increases being in beans, rice, butter, soda, starch, syrup and soap.

In the United States wholesale prices declined during June as shown by Dun's index number for July 1st. Breadstuffs were higher though wheat declined and beef lowered the level for meats and provisions. Metals were also lower and decreases in drugs and chemicals lowered the Miscellaneous group. The Dairy and Garden group and the Clothing group were, however, higher.

FAIR WAGES CONTRACTS, JUNE, 1916

THE Department of Labour received for insertion in the *Labour Gazette* six fair wage contracts, five of which were awarded by the Department of Public Works and one by the Department of Railways and Canals. One of the contracts awarded by the Department of Public Works contained a fair wage schedule. All the other contracts contained the fair wage clauses providing for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the regulations for the Suppression of the Sweating System.

Fair Wages Schedules

DEPARTMENT OF PUBLIC WORKS.

Lock gates, etc., East River, N.S.
Name of contractor, Roger Miller and Sons, Toronto, Ont. Date of contract, June 14, 1916. Schedule of prices.

3. No workmen employed upon the said work shall at any time be paid less than the minimum rate of wages set forth in the fair wages schedule following:

Trade or class of labour.	Rate of wages. Not less than the following:	
Foreman carpenter.....	\$3.00	per day of 9 hours.
Carpenters	2.50	" 9 "
Blacksmith.....	2.50	" 9 "
Blacksmith's helpers.....	2.00	" 9 "
Ordinary labourers.....	1.80	" 9 "
Driver with 1 horse and cart.	2.50	" 9 "
Driver with 2 horses & wagon	4.00	" 9 "

Fair Wages Clauses

This contract is made subject to the regulations made by Order in Council dated the third day of March, 1906, under and by virtue of the Public Works (Health Act), 1899.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time

payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

The contracts containing the above clauses follow:

DEPARTMENT OF PUBLIC WORKS.

Freighting of supply for Yukon telegraph line, Hazelton, B.C. Name of contractor, G. M. Beirnes, Hazelton, B.C. Date of contract, May 12, 1916. Contract price, 17 cents per pound.

Dredging, Port Hope, Ont. Name of contractor, The Randolph MacDonald Company, Limited, Toronto, Ont. Date of contract, May 29, 1916. Contract price, 18 cents per cu. yd. (*in situ*).

Freighting of supply for Yukon telegraph line, Telegraph Creek, B.C. Name of contractor, J. F. Callbreath, Telegraph Creek, B.C. Date of contract, June 10, 1916. Contract price, 11 58/100 cents per pound.

Dredging, Port Maitland, Ont. Name of contractor, Confederation Construction Company, Limited, Montreal, Que. Date of contract, June 10, 1916. Contract price, 12 cents per cu. yd. (*in situ*).

DEPARTMENT OF RAILWAYS AND CANALS.

Supply, delivery and installation, complete, of one 500 K.V.A. synchronous

motor-condenser with switch board and control apparatus for the power house of the Intercolonial Railway shops at Moncton, New Brunswick. Name of contractors, Canadian Westinghouse Company, Limited, Hamilton, Ont. Date of contract, May 31, 1916. Amount, \$5,-883.00.

POST OFFICE DEPARTMENT.

During the month of May, payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making rubber stamps	\$ 101.65
Supplying stamping material and repairing stamping pads	894.07
Supplying new mail bags	5,333.05
Repairing mail bags	3,097.04
Supplying mail bag fittings	7,886.05
Making and repairing miscellaneous articles of postal stores	15.50
Repairing railway mail clerks' tin travelling boxes	7.50
Making and supplying letter boxes and parcel receptacles	737.85
Lettering and numbering parcel post hampers	32.95
Supplying cloth for letter carriers uniform ..	8,956.53
Making and supplying articles of official uniform	2,456.96

RECENT INDUSTRIAL AGREEMENTS.

TWO agreements, one relating to web printing and the other to job printing, were made by the master printers and publishers of Regina, Sask., and the Regina Printing Pressmen, Assistants' and Feeders' Union, No. 75, to be in force from July 1, 1916, to August 31, 1918. The terms of these agreements are as follows:

Web Agreement.

The agreement with regard to web printing contains the following provisions:

1. Minimum scale of prices.

Pressmen in charge	\$25.00
Journeymen	12.00
Apprentices—1st year	14.00
“ 2nd year	17.00
“ 3rd year	20.00
“ 4th year	

2. Six days of eight consecutive hours each, or six nights of seven consecutive hours each, shall constitute a week's work.

3. On presses over eight (8) pages, not less than two (2) journeymen shall be employed, one of them to be foreman.

4. The (employer) agrees to employ none but members of the Regina Printing Pressmen, Assistants' and Feeders' Union, No. 75, to do any work that comes under the jurisdiction of said union, provided that Regina Printing Pressmen, Assistants' and Feeders' Union, No. 75, can and will at all times furnish upon

requirement by a member or members of the said firm sufficient competent men for the needs of such members.

It is also understood and agreed that in case of the failure of the Regina P. P. A. and F. U., No. 75, to furnish such number of competent workmen as may be required, then the (company) shall have the privilege of securing and retaining such other help as it may need. The Regina P. P. A. and F. U., No. 75, shall be privileged to unionize these men, and the company agrees that any men engaged by it under these conditions shall be paid the minimum scale of wages set forth in this agreement.

5. The company further agrees that in no event shall the foreman of the press-room be other than a card man, and it further agrees that if it be necessary in order that the union may fulfil its obligations to supply competent help, an apprentice may be temporarily advanced for that purpose, if in the judgment of the foreman the apprentice should be advanced.

6. It is further agreed by the said firm that it will do no work that comes under the jurisdiction of the R. P. P. A. and F. U., No. 75, for any firm that do not employ members of the said union, provided R. P. P. A. and F. U., No. 75, do not allow its members to do the same class of work in non-union shops, unless by mutual consent.

7. The (company) shall be protected under this contract by the R. P. P. A. and F. U., No. 75, against walkouts,

strikes, boycotts or any other form of concerted interference with the peaceful operation of all departments coming under the jurisdiction of said union, and it is further provided that all differences arising in the life of this contract over provisions relating to wages, hours or working conditions and shop practices shall be submitted to an arbitration committee consisting of one representative of the employer, one representative of the union, and a third person mutually agreed on by the two; provided it cannot be settled by conciliation.

A time limit of two weeks shall be allowed for settling of such dispute and, pending final settlement, work shall be continued without interference and under conditions existing before the initiation of the dispute. Should the arbitration committee render a decision which is unsatisfactory to either side or be unable to reach a decision inside of the two weeks, or such further period as may be mutually agreed upon, the whole dispute shall be submitted to a Board under the Industrial Disputes Investigation Act of Canada for settlement, which shall be final and binding upon both parties to the controversy.

Pending this final decision, work shall be continued without interference and all conditions obtaining before the initiation of the dispute shall remain in effect.

No new scale or readjustment of hours shall become effective until one month after notice of desired change is first given.

8. The (employer)) further agrees that the attached laws and regulations of the R. P. P. A. and F. U., No. 75, governing the employing of its members and their working conditions shall be attached to this agreement, and the (employer) shall not be subject to any constitution and by-laws which are not expressed therein. No change shall be made in the constitution and by-laws hereto attached by the R. P. P. A. and F. U., No. 75,

that will affect this agreement, unless assented to by both parties to the agreement.

9. The right of engaging and promoting men shall be at the discretion of the foreman. The foreman shall have full jurisdiction over the pressroom, subject to the management or its representative.

10. The relations of the (employer) with any other branch of organized labour shall not at any time affect the carrying out of this agreement with both parties.

Job Agreement.

1. The foreman pressman shall have full charge of the pressroom, shall hire and discharge employees according to their ability, and execute all work subject to approval of the management.

2. Minimum scale of prices.

Cylinder pressman in charge	
Journeymen, July 1, 1916, to June 30, 1917..	\$22.00
Journeyman, July 1, 1917, to August 31, 1918	23.00
Cylinder feeders, five years and over	15.00
Feeders—First year, at discretion of foreman.	
“ Second year	11.00
“ Third year	12.00
“ Fourth year	13.00

PLATEN PRESSES.

Pressman in charge	
Pressman	17.00
Assistant pressman	15.00

PLATEN FEEDERS' SCALE.

Falcon Press	12.00
Copper Plate Press	12.00
Colts Press	12.00
Gordon Press	11.00
Embossing Press	12.00
Night shifts to be paid \$2.00 per week increase.	

PLATEN APPRENTICES.

Frist year at discretion of foreman.....	
Second year	\$ 8.00
Third year	10.00

Conditions.

1. One pressman shall be allowed to operate one cylinder and three platen presses.

2. Feeders working on both cylinder and platen presses shall be classed as "Cylinder Feeders."

3. It is understood that those now receiving higher wages shall not be reduced under this agreement.

4. Forty-eight hours shall constitute a week's work, all work to be performed between the hours of 7.30 a.m. and 6 p.m., with the Saturday half-holiday from 1 o'clock p.m. All time worked over these hours to be paid for at the rate of time and one-half.

5. Holidays.—New Year's Day, Good Friday, Victoria Day, Dominion Day, Thanksgiving Day, Labour Day and Christmas Day. All work performed on these days to be paid for at the rate of time and one-half. Sunday work, double time.

6. The (company) agree to employ none but members of Regina Printing Pressmen, Assistants' and Feeders' Union, No. 75, to do any work that comes under the jurisdiction of the said union, provided that R. P. P. A. and F. U., No. 75, can and will at all times furnish upon requirement by a member or members of said firm sufficient competent men for the needs of such members.

The firm also agrees that in no event shall the foreman of the pressroom be other than a card man, and it further agrees that if it be necessary in order that the union may fulfil its obligations to supply competent help, an apprentice may be temporarily advanced for that purpose, if in the judgment of the foreman the apprentice should be advanced.

It is also understood and agreed that in case of the failure of the R. P. P. A. and F. U., No. 75, to furnish such number of competent workmen as may be required, then and only until such time as the R. P. P. A. and F. U., No. 75, can furnish competent help, and providing the scale of wages is paid, (the

company) shall be privileged to secure the necessary help for the pressroom elsewhere; and it is further agreed by the said firm that it will do no work that comes under the jurisdiction of the R. P. P. A. and F. U., No. 75, for any firm that do not employ members of the said union, provided R. P. P. A. and F. U., No. 75, do not allow its members to do the same class of work in non-union shops, unless by mutual consent.

7. The (company) shall be protected under this contract by the R. P. P. A. and F. U., No. 75, against walkouts, strikes, boycotts, or any other form of concerted interference with the peaceful operation of all departments coming under the jurisdiction of the said union, and it is further provided that all differences arising during the life of this contract over provisions relating to wages, hours or working conditions and shop practices shall be submitted to an arbitration committee consisting of one representative of the employer, one representative of the union, and a third person mutually agreed upon by the two; provided it cannot be settled by conciliation. A time limit of two weeks shall be allowed for settling such disputes, and, pending final settlement, work shall be continued without interference and under conditions existing before the initiation of the dispute.

No new scale or readjustment of hours shall become effective until one month after notice of desired change is first given.

8. The (company) further agree that the attached laws and regulations of the Regina Printing Pressmen, Assistants' and Feeders' Union, No. 75, governing the employment of its members, and their working conditions, shall be part of this agreement.

9. The relations of the (employer) with any other branch of organized labour shall not at any time affect the carrying out of this agreement with both parties.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1916

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Departments of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the factory inspectors of Ontario and Manitoba, Ontario Railway and Municipal Board, the Building Inspector of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

DURING May 55 workpeople were killed or fatally injured and 357 seriously injured while engaged in their respective employments. The record for May, 1916, was 60 killed and 359 injured, while the record for June, 1915, was 91 killed and 379 injured. Comparing the record for June and May of this year it will be noted that there were five fewer fatal and two fewer non-fatal accidents in June than in May, while a comparison of the June record with that for June a year ago shows there to have been 36 less killed and 22 less injured in June this year.

The following is a record of the accidents of the month by industries and groups of trades:

STATEMENT OF ACCIDENTS DURING THE MONTH OF JUNE, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	3	5	8
Fishing and hunting.....	1	1
Lumbering.....	5	5	10

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING JUNE, 1916.

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
<i>Agriculture:—</i>				
Farmer.....	Woodstock, N.B.....	June 10	1	Fell from and run over by loaded wagon.
Farmer.....	London, Ont.....	" 17	1	Fell from and run over by loaded wagon.
Farm hand.....	Indian Head, Sask.....	" 5	1	Run over by a seeding machine.
<i>Fishing and Hunting:—</i>				
Lobster fisherman.....	Georgetown, P.E.I.....	" 4	1	Drowned, dory capsized.
<i>Lumbering:—</i>				
Sawmill employee.....	(Factory inspector's report, Ontario).....	" 10	1	Crushed by a falling log.
Sawmill employee.....	St. George, N. B.....	" 22	1	Drowned, fell into slip at sawmill.
Sawmill employee.....	Breakeyville, Que.....	" 28	1	Struck by falling lumber.
Logger.....	Port Greville, N. S.....	" 10	1	Crushed by rolling logs.
Loader (lumber camp)....	Campbell River, B.C.....	" 22	1	Crushed by falling log.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING JUNE, 1916.—*Concluded.*

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
<i>Mining:—</i>				
Miner (Col. 14).....	New Waterford, N.S.....	June 28	1	Run over by mine car.
Miner.....	Cobalt, Ont.....	" 9	1	Crushed by falling rock.
Miner.....	Porcupine, Ont.....	" 20	1	Crushed by falling stone.
Miner.....	Nordeg, Alta.....	" 3	1	Fall of rock.
Miners.....	Anyox, B. C.....	" 7	2	Fall of rock.
Miner.....	Coal Creek, B. C.....	" 26	1	Fall of mine roof.
Miner.....	Nanaimo, B. C.....	" 28	1	Fall of coal.
Employee (Ore reduction plant).....	Healey, B. C.....	" 16	1	Drowned, fell into river.
<i>Building Trades:—</i>				
Carpenter.....	St. Thomas, Ont.....	" 5	1	Fell from roof of building.
Laborer.....	Montreal, Que.....	" 8	1	Struck on head by falling crane.
<i>Metal Trades:—</i>				
Millwright.....	Fredericton, N. B.....	" 12	1	Struck by metal bar with which he was repairing.
Millwright.....	St. John, N. B.....	" 29	1	Mangled by sawdust conveyor.
<i>Woodworking Trades:—</i>				
Planing mill employee.....	Toronto, Ont.....	" 26	1	Struck by falling lumber.
<i>Textile:—</i>				
Woolen mill operative.....	Sherbrooke, Que.....	" 26	1	Mangled in shafting of machinery.
Knitting mill employee.....	Woodstock, Ont.....	" 7	1	Fell down elevator shaft.
<i>Food, Tobacco and Liquor Preparation:—</i>				
Cannery employee.....	Simcoe, Ont.....	" 1	1	Fell down elevator shaft.
Ice manufacturing plant employee.....	Toronto, Ont.....	" 9	1	Electrocuted.
<i>Steam Railway Service:—</i>				
Engineer.....	Brandon, Man.....	" 3	1	Collision of light engine and runaway cars.
Engineer.....	Stratford, Ont.....	" 16	1	Deraiment of locomotive.
Fireman.....	Paris, Ont.....	" 21	1	Struck by a train.
Brakeman.....	Montreal, Que.....	" 20	1	Deraiment of locomotive.
Brakeman.....	Veteran, Alta.....	" 9	1	Deraiment of locomotive.
Yard foreman.....	Sudbury, Ont.....	" 30	1	Struck by a locomotive.
Yardman.....	Westport, Ont.....	" 7	1	Run over by a car.
Lineman.....	Vancouver, B. C.....	" 10	1	Electrocuted.
<i>Miscellaneous Transport:—</i>				
Teamster.....	Winnipeg, Man.....	" 14	1	Fell from wagon.
Teamster.....	Hamilton, Ont.....	" 15	1	Buried under slide of gravel in a gravel pit.
Teamster.....	Toronto, Ont.....	" 10	1	Crushed under overturned wagon.
Driver.....	Montreal, Que.....	" 12	1	Fell from and run over by loaded coal cart.
Longshoreman.....	Montreal, Que.....	" 23	1	Drowned, jumping from barge to wharf.
<i>Public and Civic Employees:—</i>				
Captain (fire department).....	London, Ont.....	" 18	1	Motor fire truck struck by railway train.
<i>Miscellaneous Skilled Trades:—</i>				
Explosive factory emp.....	Nobel, Ont.....	" 2	1	Inhalation of acid fumes.
Explosive factory emps.....	Nobel, Ont.....	" 21	6	Explosion of shell charge.
Factory employee.....	Erin, Ont.....	" 26	1	Caught in belt of machinery.
Pulp paper mill employee.....	Three Rivers, Que.....	" 8	1	Crushed by an elevator.
Well borer.....	Pipestone, Man.....	" 6	1	Overcome by gas and fell into well.
Stableman.....	Hamilton, Ont.....	" 22	1	Kicked by a horse.
Elevator operator.....	Toronto, Ont.....	" 2	1	Crushed by an elevator.
Night watchman.....	Toronto, Ont.....	" 22	1	Fell down cellar stairs.
<i>Unskilled Labour:—</i>				
Laborer.....	Quebec, Que.....	" 1	1	Struck by falling piece of structural steel.

TABLE OF NON-FATAL ACCIDENTS DURING JUNE 1916.

TRADE OR INDUSTRY.	CAUSES.																														Total.					
	Mangled by machinery.	Falling and rolling material.	Fall.	Flying materials.	Falling from, run over and crushed by locomotives and cars.	Handling material.	Explosion of shell charge.	Scalded and burned by steam, gasoline, chemicals and acids.	Burned by hot and molten metal.	Mangled by saw and planing mill machinery.	Falling from, run over and crushed by vehicles.	Injured by switches and other railway track appliances.	Injured by mine cars and mine machinery.	Shocked and burned by electricity.	Injured by railway appliances other than locomotives and cars.	Injured getting on and off cars.	Crushed by doors and hatch covers.	Motor fire-truck struck by railway train.	Injured on jagged edge of metal and wood.	Kicked and otherwise injured by horses and other animals.	Struck by locomotives and cars.	Deraillment of locomotives and cars.	Explosion of gas.	Crushed by ore and coal buckets.	Sprain.	Cut by glass.	Crushed by elevators and hoists.	Struck by an electric car.	Stepped on and otherwise injured by nails.	Injured by appliances on railway cars.		Eyes injured by rock dust.	Injured by a turntable.	Struck by dredge "clamshell" digger.	Injured by a pile driver.

ANNUAL CONVENTION OF THE CANADIAN MANUFACTURERS' ASSOCIATION

THE forty-fifth annual convention of the Canadian Manufacturers' Association was held at Hamilton, June 13, 14 and 15. Nearly 500 delegates representing various manufacturing establishments throughout Canada were in attendance. Reports of different committees were presented and discussed and addresses delivered by officers of the Association. As was the case at last year's meeting a great part of the business of the convention was devoted to questions arising out of and affected by the war.

The President's Address

The President, in his address, dealt with some of the problems which manufacturers had to contend with in the production of munitions and with the improvement in business conditions which had resulted from the entry of hundreds of manufacturers into the making of new classes of products, including munitions. He suggested the advisability of national registration to enable Canada to prosecute the war more efficiently and the husbanding of all individual and national resources in order to strengthen Canada's position and that of the Empire. "The question of trade after the war," stated the President, "is occupying the best minds of the allied countries, too, and next to the prosecution of the war itself, this is perhaps the most important and urgent subject that they can study. We must mobilize our industrial forces to show what we produce and we must prosecute a vigorous trade campaign." The President advised co-operation both in manufacturing and in selling, and suggested the need of Government assistance in devising a scientific tariff that would enable

manufacturers to obtain their raw materials on a basis which would permit them to compete with the world. Greater control in regard to future immigration and the necessity of developing the shipbuilding industry in Canada were suggested. In concluding, the President referred to the problems of reorganization which would arise after the war and the part that Canada would play in Empire building.

Report of the Executive Committee

The report of the Executive Committee showed that the total revenue for 1915-16 was \$63,493.27, as compared with \$65,165.33 for the year previous, a shrinkage of \$948.88. The net earnings of "Industrial Canada" accounted for the great part of the decrease. Total expense account for the year was \$54,755.55, as compared with \$58,975.31 for the year previous, a saving of \$4,219.76, this saving resulting almost wholly from a discontinuance of the services of the legal department. The report also pointed out what had been done in increasing the strength and usefulness of the Winnipeg office and what should be done to strengthen the Association in British Columbia.

The report stated that the committee had given a good deal of time to the consideration of plans for providing Canada with facilities to engage in the work of industrial research and reference was made in this connection to the plan developed by the Minister of Trade and Commerce providing for the appointment of a committee of the Cabinet to take this work under its direction, utilizing as far as practicable the equipment possessed by university laboratories. Reference was also made to the work of the economic and development commission presided over by Senator Sir James Loughheed. The report also

dealt with the question of employment for returned soldiers and referred to the governmental machinery that has been provided for handling the returned soldier problem. In this connection the committee had suggested careful study of land settlement, preferably under community system, which would enable the cultivation of the soil to be carried out under supervision; the clearing of land preparatory to such settlement, road building, and other undertakings in which large numbers of men could be absorbed, would, the report suggested, all be fruitful fields for investigation. "For some time past," stated the report, "manufacturers have been assiduously canvassed in an effort to find openings into which returned soldiers can be placed. As a temporary expedient, or as affording an auxiliary channel of employment, this stock-taking of factory openings will unquestionably prove useful. It goes without saying, however, that the large majority of manufacturers will gladly provide employment for those of their men who return to them after having served in the trenches. Not only that, but the large majority of manufacturers will be disposed, in order to furnish work to a man who has done his duty, to make an opening for him by discharging an eligible man who has failed to respond to the call. Under these circumstances it is questionable whether the concentration of effort upon placing returned soldiers in our factories is not to some extent at least misdirected.

"If a record could be kept of the occupation of every soldier prior to his enlistment, and if manufacturers were to assume the responsibility of finding employment for all who had previously been engaged in manufacturing occupations, they would be doing all that should be expected of them, proportionate to other classes of employers.

"There seems to be a disposition on the part of the commissions that have been appointed to place too much reliance upon the absorbing power of our manufacturing establishments and to

pay too little heed to the broader plans which can only be successfully executed by the initiation of large public undertakings. If Canadians are to meet the difficult situation that will soon be upon them, it is of the utmost importance that the commissions referred to should lose no time in the preparation of plans. In this connection your committee have pledged the services of the Association in any capacity in which they can be utilized."

Shortage of Labour

It was stated that the steadily increasing shortage of labour had been the subject of many communications received by the Association, suggesting that steps of one kind or another be taken in an endeavour to alleviate the situation.

"One of the most obvious ways to overcome the difficulty," stated the report, "would naturally be to take full advantage of the offer of the Women's Emergency Corps, which has secured applications from hundreds of women who are ready to take the places of men who have enlisted, both in industrial and clerical occupations. The magnificent spirit that prompts women to make the sacrifices herein involved should be given every encouragement by employers, who in their turn should show a willingness to make sacrifices themselves in order that the women's offer of service may be utilized to the fullest extent. That such a substitution is largely practicable is amply demonstrated by the armies of women now engaged in factory work in England. Should the war be prolonged, it is inevitable that Canada must follow in England's lead, and it would seem to be no more than good business for our manufacturers to anticipate conditions that will sooner or later be forced upon them by beginning to make the change now.

"To some extent the situation might, of course, be relieved by working seven days a week instead of six. This would necessitate a suspension of the Lord's

Day Act. This matter was delegated to the Legislation Committee for handling, and will be dealt with in the report which they will present later.

"It was suggested to your committee that representations should be made to the Government looking to the suspension of the Alien Labour Act and to a relaxation of the Immigration Regulations. After careful investigation no good grounds could be discovered for approaching the Government in this connection. Owing to the brisk demand for labour of all kinds in the United States, it is doubtful if the removal of all immigration barriers would lead many workmen to seek employment on this side of the line. Highly skilled employees, required for new processes or to replace indispensable men who have enlisted, can usually be secured in the United States by an offer of high wages, and to such men the immigration regulations present no difficulty, so long as they are not alien enemies."

The question of forest preservation was also dealt with in the report, and it was pointed out that more than five thousand wood-using industries look to living forests for their sole stock of raw materials, and that in these industries \$40,000,000 a year was paid out to 110,000 employees, and that more than \$260,000,000 of capital is invested in these industries; that out of Canadian forests are derived \$182,000,000 worth of manufactures annually. Attention was drawn in this connection to what the committee considered the urgent duty of Provincial and Federal Governments, namely, to do their utmost to stop the heavy waste of valuable timber year after year from preventable fires. British Columbia was building up a forest-guarding system which assured a steady diminution of its annual losses. The Quebec Government had also shown a willingness to investigate improved plans of forest guarding and had steadily strengthened its forest laws. New Brunswick had entered upon a comprehensive forest survey, but Ontario's forest protective system had witnessed

little alteration in design during thirty years or more and few of the modern improvements which had given excellent results the world over had commended themselves to Ontario. What was needed was a thorough re-building of the Ontario forest protection system from the "head office" control outward to the field workers, a suggested re-organization which had been endorsed by over 22 of the leading Boards of Trade of Ontario.

Report of the Membership Committee

The report of the Membership Committee showed that for the first time since the re-organization of the Association in 1899 the committee had to report a loss. On May 1, 1915, the roll of members numbered 3,061; on May 1, 1916, it numbered only 2,983, a loss for the 12 months of 78 or a little less than three per cent. The resignations which it was found necessary to accept during the year totalled 168; of these 71 were due to discontinuance of business and nine to amalgamations. Hard times and the need for retrenchment accounted for 87 more. To offset these resignations applications were accepted from 90 new firms. The membership by provinces on May 1, 1916, is shown by the following table:

Maritime Provinces	147
Quebec	760
Ontario	1,722
Manitoba	250
Alberta and Saskatchewan	39
British Columbia	65
Total	2,983

Report of the Legislation Committee

The report of the Legislation Committee, after referring to the resignation of the legal secretary, Mr. Wegenast, and the difficulty of carrying on the legal department, reviewed the different legislation which had occupied the attention of the committee. What has come to be known as the "Companies Reference" involving questions touching the relative jurisdictions of the Dominion and the

Provinces over the incorporation of companies was dealt with, also the question whether the Dominion Insurance Act was within the power of the Dominion Parliament. The John Deere and the Bonanza cases, both questions involving the respective jurisdictions of the provinces and the Dominion in regard to the incorporation of companies, were also fully dealt with. The report also referred to the Business Profits Tax Act and to what had been done by the Association towards having this legislation put into the most satisfactory shape.

Reference was made to the report of the first year's operation of the Ontario Workmen's Compensation Act, and the committee was of the opinion that next year some provision would have to be made in the Act to take care of first aid, also that efforts should be made to secure legislative authority for the adoption of the current cost system instead of the capitalized plan. A brief reference was also made to the Nova Scotia Act and Manitoba Act. The report stated that application had been made to the Minister of Justice for an order-in-council to suspend the Lord's Day Act as applied to a limited number of industries during the period of the war, having regard for such restrictions in regard to employment of women and minors as are embodied in provincial statutes. In this connection, the report stated, "while not unmindful of the opposition which such a proposal would meet with in certain quarters, your committee felt that the weight of argument in favour of such suspension was practically unanswerable."

"Dealing first with those difficulties that find their origin in a shortage of labour, it will hardly be disputed that the demand for certain materials necessary to the conduct of the war has been such as would have taxed to their limit the resources of our producers, even had the supply of both skilled and unskilled labour been normal. For months past, however, all kinds of labour have been increasingly scarce. The enrolment of 300,000 for overseas service has not been

accomplished without making heavy drafts upon Canada's working forces, drafts that of themselves would have been sufficient to convert a surplus into a considerable shortage. That shortage has in no sense been relieved by immigration; on the contrary, it has been accentuated by the concomitant growth in the demand for labour needed in the production of war material.

"Side by side with this development there has come to Canada an exceptional opportunity to increase her production in certain lines, such as pulp and paper, for which there is a strong demand in neutral markets, due to the stoppage of imports from belligerents. Having in mind the general economic situation, it would seem desirable to afford Canadian industry every facility to supply the markets thus brought within reach.

"Meanwhile Canada is still committed to raise 200,000 men. The withdrawal of so large a number from a producing force that is already crippled would suggest the wisdom of securing, as far as possible, a larger individual production from those who remain. One of the most obvious means to this end would be the suspension of relaxation of the statute which provides for a cessation on the Lord's Day. However necessary or desirable such a restriction may be under normal conditions, it may easily become a burden to a nation that is at war. The struggle upon which we are engaged is one where economic resources are destined to play fully as important a part as military and naval resources. The Lord's Day cannot be a day of rest for our military and naval forces; your committee submit, therefore, that it should not be a compulsory day of rest for our producing forces.

"Up to the time when this report was prepared, no word had been received from Ottawa as to how your committee's application had been dealt with, though every encouragement was given to hope that the issue would be decided in the light of necessities imposed by the war rather than by considerations to which

heed would have to be given in times of peace."

Dealing with the question of daylight saving, the committee recommended that the Association join in a request to the Government for an Act that would give effect from coast to coast to the principle of daylight saving.

Recruiting and Production.

A report of a special committee on the co-ordination of recruiting and production dealt with the question of raising 500,000 men for the Canadian Expeditionary Force without disturbing manufacturing and production. It was pointed out that in preliminary stages of the war, when enlistments included a large number of unemployed men, the system of recruiting had proved satisfactory, but that as recruiting proceeded it was noticed that thousands of men were enlisting who were urgently needed in Canada, and that business concerns lost large numbers of highly skilled employees whose replacement was difficult. In dealing with the question the report of the committee went fully into an analysis of Canadian enlistments, by provinces, the number of men required from different military districts and the occupations of those who had enlisted. A statement given in the report showed the classes of recruits secured up to February 15, 1916. Of a total of 263,111 men secured up to that date, 170,369 or 64.75 of the whole consisted of persons engaged in manual labour. The classes "Business men," "Clerks" and "Manual labour" composed 85 per cent of the enlistments. While it is true that these broad classes include all kinds of business and industry," stated the report, "it is certain that manufacturing has contributed by far the greatest total."

A section of the report dealt with the efforts which had been made by the manufacturers in several localities to co-operate with the military authorities for the purpose of preventing the enlistment of indispensable men and of encouraging the enlistment of men who could be spared. At a number of places

plans were put into effect by which men who could be spared were enlisted. At Toronto it was felt that the plan should be enlarged to include the employees of establishments other than of manufacturers, such as builders, retailers and bankers, and it was pointed out that the principle to be fair and effective to the greatest extent should be applied to the country as a whole, and that the plan of registering all men available for military service should be made national. Indiscriminate recruiting methods, it was stated, were particularly vexatious and costly to munition factories. Some attention was given in the report to the methods used in other countries to raise armies, and a copy of the schedule used in New Zealand under the provisions of the National Registration Act was given. The report referred to the last census of wage earners taken by the Dominion Government and dealt with the possibility of men from some of these occupations being released for military service and replaced in civilian life by either returned soldiers, rejected men, women and girls and old men and boys. Summing up the question the committee recommended a plan of national registration of all men available for service to the State in connection with the war.

Trade Development

A special committee appointed by the Association on trade development presented a report which referred to the changes in the world's trade which would follow the war, all of which would have important effects on Canada. The reconstruction of Belgium, France and Poland, it was pointed out, would require immense quantities of materials, and orders would cover practically every kind of machinery made, from agricultural implements to the smallest kind of tool, hardware and spinning machinery, and in the supplying of much of this material there would be abundant opportunity for Canada to make her usefulness felt in peace as well as in war. The importance of the Russian market was also dealt with. Canada would have an opportunity never had

before of building up a sound, permanent export trade in manufactured products. Dealing further with the question the report pointed out what had been done to initiate special measures and to co-operate with the business interests of the country, referring to the appointment by the Dominion Government of the Economic and Development Commission, and the subjects to which the Commission was giving consideration. The Minister of Trade and Commerce had also inaugurated a number of new features in his Department in order to prepare for the new conditions. The manufacturers on their part had also taken means to extend trade and secure export orders. Following the annual meeting of the Association a year ago the Export Association of Canada had been organized and was already bringing export orders to Canada through its offices in Great Britain, Australia and New Zealand. This Association had also sent a representative to Siberia with a carload of Canadian samples and catalogues and had also taken other means to secure export orders.

Other Reports

Other reports presented to the meeting were those of the tariff committee, which dealt with tariff questions likely to arise out of the war, and of the transportation committee, dealing with such questions as ocean transportation, freight classification, express matters, etc.

Resolutions Passed

Among resolutions passed by the convention may be mentioned the following:

Resolved, that the Canadian Manufacturers' Association, in annual meeting assembled, express to the Government of the Dominion of Canada its firm conviction that fighting for one's country is the supreme duty cast upon all men in time of war, and that furthermore the burden of such service should be borne equally by all properly qualified men of the nation. The Association also expresses its approval of any scheme, whether under the Militia Act or the Defence of the Realm Act, or otherwise, for the complete and effectual mobilization of the entire resources of Canada in men and material, which in the opinion of this Association should be placed unreservedly at the disposal of our country.

Whereas, daylight saving legislation is now in operation in various parts of the world, with acknowledged benefit to the nations that have adopted it; not alone in the saving of light and fuel which it has been the means of effecting, but in the increased opportunities for recreation it has provided and the improved conditions of health it has promoted;

And, whereas, certain municipalities in different parts of Canada have adopted daylight saving as a local measure, thereby giving evidence of a growing desire to share in the benefits of the reform;

And, whereas, independent action by municipalities that results in variation of time as between place and place can only lead to confusion and business disorganization;

And, whereas, we believe that the adoption of daylight saving as a national measure would be to the general advantage of Canada, and in harmony with the wishes of an increasing proportion of our population;

Therefore be it Resolved, that the Dominion Government be memorialized to introduce, at the next session of Parliament, legislation that will bring this reform into effect with the least possible delay.

Resolved, that the Canadian Manufacturers' Association place itself on record with the Federal Government as requesting the removal of the excise duty, or the Inland Revenue Department's profit on alcohol, always under suitable regulations and restrictions;

- (a) When employed for manufacturing processes in which the alcohol used would be lost or unrecoverable,
- (b) When used by hospitals, asylums and infirmaries for bathing purposes,
- (c) When used in laboratories of educational institutions for purposes of scientific research,
- (d) When used by hospitals and museums for the preservation of specimens.

Resolved, that the Canadian Manufacturers' Association testify its deep interest in and hearty appreciation of the efforts that are being made to bring about a closer economic union of the Allies for their mutual benefit in matters of trade;

That it views with favour an arrangement that will give first care to the development of inter-Imperial trade by means of preferential tariffs, that will next give practical encouragement to the trade of our Allies, that will thirdly give us the protection of our general tariff against neutral countries, and that will lastly place the products of enemy countries under such fiscal and other disabilities as will effectually restrict their sale in our markets.

Resolved, that the Canadian Manufacturers' Association in annual meeting assembled, firm in the belief that this matter should receive immediate and serious consideration at the hands of our Government, places itself unanimously on record as favouring the policy of liberal encouragement, by subventions or otherwise, that will ensure the establishment of a shipbuilding industry in this country on a profitable and permanent basis;

Further Resolved, that it constitutes its general officers, together with all its Past Presidents, a special committee to wait upon the Prime Minister and his colleagues to press for action and to work out details.

Resolved, that the Canadian Manufacturers' Association records its firm belief that the development of Scientific and Industrial Research, on a scale commensurate with our resources and our manufacturing and commercial interests, is one of the most urgent needs of Canada at the present time;

Further Resolved, that it places on record with

pleasure its appreciation of the efforts that are being made in this direction by the Minister of Trade and Commerce, the Economic and Development Commission, the Royal Canadian Institute, the Canadian Pacific Railway Company, and by our various Technical Schools, and pledges its hearty support to these and any other movements calculated to hasten the attainment of the object so much to be desired.

Election of Officers

The following officers were elected:

President, Thomas Cantley, New Glasgow, N.S.

First Vice-President, S. R. Parsons, Toronto.

Second Vice-President, W. J. Bulman, Winnipeg.

Treasurer, George Booth, Toronto.

THE EFFECT OF THE WAR ON BREAD PRICES—REVIEW OF PRICES IN ONTARIO CITIES

THE marked increase in the price of bread since the outbreak of the war, concerning which there has been much comment in the press, has been the occasion of a departmental enquiry, undertaken with a view to ascertaining, so far as possible, the relation which has existed between the price of materials used in baking bread and the price of bread to the consumer. The study covers the period January 15, 1914, to June 15, 1916. It has been confined to Ontario as this is the only province in which the weight of the loaf is regulated by provincial statute. The Bread Sales Act (Ont. R. S. 1914 C. 224), generally known as the Nickle law, provides that all ordinary plain bread manufactured for sale must have either 24 ounces or 48 ounces in the loaf. Small bread may be sold in any weight not exceeding 24 ounces. The Council of every city, town and village is called upon to appoint an inspector to enforce the Act and the Council of every township may appoint an inspector. Certain cities in other provinces have by-laws on this matter, but in general the statement is true that except in Ontario no uniformity in the weight of the loaf is prescribed, and accordingly bakers in other provinces could meet increased cost by selling a smaller loaf rather than by advancing prices. In Ontario the baker has no alternative other than to lower quality.

Table I shows for 24 cities in Ontario the price of bread per pound in each city and the average price in all cities on the fifteenth of each month for the period January 15, 1914, to June 15,

1916. The prices, which are those for plain white bread, are on the double-loaf or ticket basis as householders usually buy on either of these plans. By the ticket plan the price per loaf is practically the same as in buying by the double loaf. For example, when 11 cents is the price for a double loaf of three pounds, the price for a dozen double-loaf tickets would be \$1.30 (\$1.32).

In sympathy with flour, which advanced from \$5.50 to \$6.60 per barrel (Manitoba first patents) despite the fact that many bakers had contracts for flour yet to run, bread advanced in Ottawa, Cobalt, Hamilton, Stratford, St. Thomas and Sault Ste. Marie soon after the outbreak of the war. Peterborough and Orillia followed somewhat later. In the remaining cities, including such important centres as Toronto, London, Brantford, Fort William and Port Arthur, prices were not advanced at the time. Flour advanced further early in 1915, reaching the record price of \$8.10 in February, but receded to \$8.00 and \$7.70 in March and April. Again in May and June \$8.10 was reached. Bread prices were advanced to meet the increased cost of flour in the following 16 of the 24 cities: Ottawa, Brockville, Kingston, Orillia, Toronto, Niagara Falls, St. Catharines, Hamilton, Brantford, Guelph, Berlin, Woodstock, London, St. Thomas, Chatham and Windsor. Prices were not raised at this time in the remaining eight of the 24 cities, assuming, of course, that bakers in these cities continued to give the same quality of bread.

TABLE I.—PRICES OF BREAD PER POUND ON THE 15TH OF EACH MONTH IN CERTAIN CITIES AND TOWNS OF ONTARIO, JANUARY, 1914, TO MAY, 1916.

*Average of two quotations.

†3.6 on 15th. Returned to higher level in few days.

From \$8.10 in June, 1915, flour declined almost to pre-war levels in anticipation of the record wheat crop of that year, reaching \$5.75 in October and November. Bread declined in all cities except Peterborough, Stratford, Owen Sound and Woodstock, and of these the three foremost were among those in which prices were not advanced in the early part of the year when flour rose to the record figure. There was also a decline at Sault Ste. Marie, but only for a few weeks. The average price for all cities fell from the record for the period of the war of 4.5 to 3.9 cents per pound in November. When flour advanced to \$7.00 in January, 1916, and \$7.20 in February, 1916, the price of bread was raised more or less promptly at Ottawa, Toronto, Niagara Falls, St. Catharines, Hamilton, Brantford, London, St. Thomas, Windsor, and more recently at Orillia, Guelph, Berlin and Chatham.

The following formula shows approximately the quantities of the different materials used in manufacturing a barrel of flour into bread:

1 barrel flour, first patents $\frac{1}{2}$ barrel.
second patents, $\frac{1}{2}$ barrel.

Sugar, 2 lbs.

Lard, 3 lbs.

Salt, 2.75 lbs.

Yeast, 1.5 lbs.

Malt extract, 1 lb.

The out-turn from a barrel of flour is about 180 loaves or 270 pounds of bread, sufficient water being added to the formula to produce this amount and cover shrinkage in baking and before sale, which may be placed at from 12 to 15 per cent. By adding more water to the dough bakers get more water back in the weight, but this, of course, gives a poorer quality of bread. Table II shows the cost of producing on the basis of the above formula a pound of bread at the prices shown in the records of the Department as prevailing on the fifteenth of each month. The prices quoted are those for the qualities used in plain white bread and the quantities which

are thought to be those usually purchased by bakers are as follows: Flour, in car lots, per bbl.; sugar, granulated, in bags at Toronto, per cwt.; lard, pure, in tubs at Toronto, per lb.; salt, fine, at Windsor, per bbl.; yeast, Fleischmann's, per lb.; malt extract, Canadian, in bbls., per lb.

In the accompanying chart these cost figures are related to the price of bread. The chart shows the cost of bakers' dough according to the above formula and the average price of bread in cents per pound in the 24 Ontario cities on the fifteenth of each month for the period January 15, 1914, to June 15, 1916, and also the average figures for each year. It will be observed that the cost of dough advanced to a greater degree than the price of bread in the last months of 1914, but to compensate for this, price was maintained at the higher level until August, 1915, while cost declined more or less steadily from February. Cost began to rise again in December, 1915, and during the first six months of the present year has been fluctuating on the higher level. Price reached a slightly higher level in December, where it remained until April. During the past three months, however, it has advanced steadily; nevertheless, the average price per pound for the first six months of 1916 is lower than for the corresponding period of last year. The average price for the first six months of each of the three years is as follows: 1914, 3.87 cents; 1915, 4.44 cents, an advance of 14.7 per cent as compared with 1914; 1916, 4.15 cents, an advance of 7.2 per cent as compared with 1914. While the consumer has had to pay more for his bread in the first half of 1916 than in the same period of 1914, he has enjoyed a better price than in the first six months of last year.

A comparison of the advance in dough and bread as between the six war months of 1914 and the months up to and including June, 1916, may be of interest. For the seven pre-war months of 1914 the average cost for the 24 cities of a pound of dough according to the formu-

CHART SHOWING THE COST OF BAKERS' DOUGH AND THE PRICE OF BREAD IN CENTS PER POUND.

la was 2.26 cents; for the 23 months of war the average cost was 2.80 cents, an increase of 23.8 per cent. Comparing these figures with those of bread it appears that the average price per pound for the 24 cities in the seven pre-war months was 3.87 cents as compared with 4.21 cents for the following 23 months, an increase of 8.7 per cent. However, the spread between dough and bread is likely to be increased when the averages for the 12 months of 1916 are available, as bread prices are showing an upward tendency while flour is falling. Dough advanced more rapidly than bread in the early months of the year, and as in 1915 bakers are endeavouring to compensate by holding prices at the higher level throughout the summer. The price advanced early in the year at Ottawa, Niagara Falls and St. Catharines, and more recently at Orillia, Toronto, Hamilton, Brantford, Guelph, Berlin, Stratford, London, St. Thomas, Chatham and Windsor, with a further advance at St. Catharines in June. Since January, 1916, there have been declines only at Fort William and Port Arthur, where bread dropped from 5.5 to 5 cents per pound, which with the exception of the price of 5.3 at Sault Ste. Marie, is the highest in the province. In some degree

bakers may have been able to meet this increased cost by buying flour at the bottom of the market, but this is not possible for the small baker who buys in small quantities. For the same reason also ordinary householders, many of whom doubtless have been considering the advisability of making bread at home, have to calculate cost on the basis of the prices from month to month.

As to the wages of journeymen bakers, the departmental records indicate that the rate has been practically stationary since before the war. The increased cost of delivery must be considered, however, as hay has risen about 50 per cent and oats about 18 per cent since July, 1914.

Although the present conditions affecting bread prices in European countries are quite different from those in Canada, the following table showing the rise in price in certain countries during the period of the war may be of interest. Figures for France are omitted as the French Government has purchased large supplies of wheat which it sells below cost to the Chambers of Commerce. This has enabled the mayors of the towns to exercise the power which has been theirs since the French Revolution of fixing the maximum price of bread.

**PRICES IN CANADA.—REVIEW OF THE DEPARTMENT'S ANNUAL
REPORT ON WHOLESALE AND RETAIL PRICES FOR THE
CALENDAR YEAR 1915**

THE annual report of the Department on the course of prices in Canada for the calendar year 1915 is now in the press and will soon be ready for distribution. This is the sixth statement of the kind to be issued by the Department, the special report on the period 1890-1909, issued in 1910, having been followed annually by a review of the preceding year.

The report for 1915 is similar in scope and arrangement to the previous issues and includes prices from month to month for over 300 commodities representative of production and consumption in Canada, divided into the following groups: Grains and Fodders, Animals and Meats, Dairy Products, Fish, Fruits and Vegetables, Miscellaneous Groceries, Textiles. Hides, Leathers, Boots and Shoes, Metals and Implements, Fuel and Lighting, Lumber, Miscellaneous Building Materials. Paints, Oils and Glass, House Furnishings, Drugs and Chemicals, Furs, Liquors and Tobaccos, and Sundries. The report includes also index numbers showing the price movement in each commodity and group back to 1890 and analyses of changes during the year with detailed information as to conditions affecting prices, production, demand, trade conditions, &c.

Findings of the Report*

The opening paragraphs of the report are as follows:

"The rise in prices in 1915 brought the general level of wholesale prices in Canada much above any point previously indicated since 1890 by the Department's index number, which includes 272 articles, and possibly higher than at any time during the past century though prices were very high at times between 1850 and 1872, during the Crimean War, the American Civil War and the Franco-Prussian War. The following index numbers show the levels on certain dates.

1890.....	110.3.	1911.....	127.4	July, 1914.....	134.6
1897.....	92.2	1912.....	134.4	Sept, 1914.....	141.3
1900.....	108.2	1913.....	135.5	Jan, 1915.....	138.9
1907.....	126.2	1914.....	136.1	July, 1915.....	150.2
1908.....	120.8	1915.....	148.0	Dec, 1915.....	151.1

"The same upward movement appeared in many other countries throughout the world. In England Sauerbeck's index number, as continued by the Statist, rose to 118.4 by December, 1915, as compared with 96.4 in January, 1915, 82.4 in July, 1914, 85 in 1913, 61 in 1896, 111 in 1873, 105 in 1864 and 1857, and 117 in 1825. In the United States Dun's index number, which has been calculated back to 1860, stood at 137.666 at the end of 1915, as compared with 124.168 at the beginning of the year, 124.528 in January, 1914, 72.455 in July, 1897, 90,191 in 1890, 165.473 in 1870, 312,737 in September, 1864 and 121.631 in January, 1860. In Japan, however, prices had fallen in 1914 from the high levels of 1912 and 1913 and were still lower in 1915, the index number published by the Yokohama Chamber of Commerce standing at 125.27 for 1915 as compared with 131.19 or 1914 and 140.04 in 1913.

THE COURSE OF WHOLESALE PRICES IN CANADA, 1890 TO 1915.*

(Average Prices 1890-1899=100.)

*Number of commodities: 1890 to 1909, 230; 1910 to 1914, 272; 1915, 271.

THE RISE IN THE RETAIL PRICES OF FOODS IN THE UNITED KINGDOM,
AUSTRIA, GERMANY, ITALY, THE NETHERLANDS, AND NORWAY.

(Prices in July, 1914=100.)

reached during the few weeks of uncertainty and speculation which followed its outbreak. The cost of a budget of some thirty staple foods in Canada rose from \$7.42 in July, 1914 to \$8.13 in December, 1914, but part of the increase was due to the difference in seasons as at the beginning of 1914 the budget had cost \$7.729, only 40c less than at the end of 1915.

"The following figures show the percentages of the advance in the retail price of foods in various countries over the level of July, 1914, figures for January, 1914, not being available in all cases.

"But the rising prices had a great effect in the stimulation of industry and trade. Not only did the needs for the prosecution of the war make necessary increased production in many lines and new production in goods never before attempted or thought of, but production was renewed in many lines and in many districts abandoned previously owing to the poor returns normally obtainable. These changes again had great influence in stimulating other branches of industry and trade causing higher prices. This reaction was soon experienced in many lines at first depressed by war conditions. In Canada wheat, oats, flour, cheese, butter, packed meats, pulp and paper first felt the stimulation of increased demand due to war conditions but these were soon followed by wool, fish, leather, zinc, copper, chemicals, New Brunswick lumber, linseed oil, and later iron and steel as well as most metals and metal products. In the latter part of 1915 the upward movement was particularly strong in metals, chemicals and wool, while in jute, silk, rubber, etc., among imported materials the rise was marked.

"Owing, therefore, to the predominating influence of war conditions on all lines of industry and trade, crop conditions had less effect than usual on trade and prices. The short world crop in 1914 was only of secondary importance in raising prices of cereals and again the large crops of 1915 did not reduce prices to anything like normal levels. The war demand for materials more than made up for any reductions in demand which would have been felt as a result of short crops in 1914 just as the great capital expenditure in 1912 made up for the reduced purchasing power due to the short and damaged crops in 1911. Such immediate results, however, are usually offset to a great extent before long by reaction inevitable after such an artificial stimulus, as was experienced (although the effect in lowering prices was only beginning to be felt when war broke out) in Canada in 1913-1914, and will again appear when the demand for war supplies abates, and the readjustment necessary after such expansion of credit and expenditure of capital tests the industrial structure (with considerable liquidation), and makes certain a sound basis before further progress is possible."

The Rise in Wholesale Prices

“At the end of 1914 the general level of wholesale prices, as shown by the index number* based on quotations of 272 commodities, was somewhat higher than a year before but had receded from a higher point reached in September when the index number stood at 141.3 as compared with 137.6 in December. But many materials as well as foodstuffs were already advancing under an increasing demand for war supplies and a growing scarcity in some lines formerly imported from enemy countries or other markets from which supplies were unobtainable during war. Grains rose steeply until February, there being a good export demand and considerable speculation, the latter due largely doubtless to the uncertainty of the Russian wheat crop being marketed in western Europe, owing to the entry of Turkey into the war and the closing of the Straits at Dardanelles. Cheese, butter and eggs were in demand for export and fish markets had recovered. The demand for apples, canned vegetables and other products was improving while beans and dried fruits were rising steeply owing to short supplies. Potatoes, however, were cheap and plentiful. Wool and woollen goods, leathers, and some metals were beginning to rise steeply. New Brunswick lumber was also high and in good demand. Chemicals were upward, especially carbolic acid. Raw Furs were becoming firm as trade conditions improved. The cotton market was also improving and prices firmed rapidly as a great demand for various military purposes developed in addition to a better domestic demand in the United States. But it was the rise in materials for war supplies which showed the greatest and steadily increasing strength. Spelter rose from 6c to 30c per lb. in

All Commodities.																										

*The average of the index numbers for the twelve months, 1915 is higher than that for the year calculated from the average prices during the year of the several commodities, as a number of fruits and vegetables quoted only a few months during the year have a comparatively low price level.

a few weeks and though it receded later was still three times as dear as in normal times owing to the necessity for its use in shell making. Copper, lead, tin and antimony also rose steadily and steeply. Some imported goods such as crockery from England rose owing to greater cost of production and higher freight rates. Glass formerly obtained in Belgium was imported from the United States, but at a greater cost.

"As the year advanced dairy products and some foodstuffs including sugar, potatoes and canned vegetables decreased with the approach of summer and prospects for good crops and finally wheat, flour, oats, oatmeal, etc., declined. Animals and meats also averaged slightly lower. The index number, therefore, indicated a slightly lower general level for September but this was nearly ten points higher than the high point of the year before in the same month. In the autumn, however, advances set in for nearly all groups. Grain markets improved, scarcity of live stock developed, the crops of fruits and vegetables were less than in 1914. But the principal advances were in metals, chemicals and other materials, including wool, cotton, silk, flax products, jutes, hides and leather. Iron and steel markets showed steep and repeated advances as great scarcity developed in many lines of steel. Coke advanced in sympathy with the steel markets. Other metals and metal products including many miscellaneous building materials were upward. Stocks of drugs imported before the war were being exhausted and new supplies cost much more in many lines as new sources had to be developed and were often less productive. The demand for explosives also caused scarcity in many lines or in the raw material from which they were produced. By December the index number had risen to 161.1 as compared with 150.3 in September and 138.9 in January and many lines were still advancing steeply."

The General Movement.

"The accompanying table of index numbers from month to month shows the general advance in prices during the past two years and the rise by groups. The highest levels, as compared with the basis period 1890-1899, were reached in Animals and Meats, Grains and Fodder, Drugs and Chemicals, Hides, Leather, Boots and Shoes, while Metals and Miscellaneous Foods were much higher than before the war, all these groups being particularly affected by war conditions. Raw Furs and Lumber showed considerable recessions from the high levels before the war, as the demand was greatly reduced. Metals had been lowered somewhat early in the year by the falling off in industrial demand but the war demand increased greatly and caused steep rises. Spelter was very high in the summer but receded somewhat. Metal products raised levels in Miscellaneous Building Materials and in Paints, Oils and Glass. Textiles also advanced steeply, Woollens being particularly high. Fish were on high levels early in the year as dry cod and haddock were up but receded later and canned lobsters declined. Fruits and Vegetables were low early in the year as a result of good crops in 1914 but less favourable conditions in the 1915 season caused higher prices, especially in potatoes."

Retail Prices.

Appendix A gives the average prices in each of some sixty cities for each year, 1910 to 1915 inclusive, and for the month of December 1900 and 1905, of some thirty staple foods, coal, wood, and coal oil, and the rent of a six-roomed house. The accompanying table summarizes the results in the form of a weekly budget of expenditure for a family of five, in terms of these average prices for each year, and for each month in 1914 and 1915 in terms of the averages of the prices published each month in the *Labour Gazette*.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING AND RENT, IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.

*Month of December.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING AND RENT, IN TERMS OF THE AVERAGE PRICES IN SIXTY CITIES IN CANADA.—(Continued).

[illegible]

It will be seen that although the cost of staple foods had reached a high level during 1912 and had not declined appreciably in 1913 in the average, still higher levels were reached in 1914 and in 1915. Flour, bread, eggs, butter, cheese, sugar and beans were raised somewhat by war conditions. Meats were up for a time but eased off till the latter part of 1915. Potatoes were lower during the latter part of 1914 and the first part of 1915 owing to the good crop but in the latter part of 1915 were advancing rapidly on account of the short crop.

Coal, wood, and coal oil were slightly lower in the average for 1915 than in previous years.

Rents declined steeply in 1914 and the early part of 1915 but began to recover in the latter part of the year. The chief decreases appeared in the western provinces and in some of the larger centres of Ontario and Quebec. In the Maritime Provinces decreases in rent were few.

THE MOVEMENT BY GROUPS AND COMMODITIES.

Grains and Fodder.

Prices of grain were affected first and to the greatest degree by the outbreak of war in 1914, and did not return to pre-war levels but rose at times to very high points. The crops in various parts of the world were somewhat short in 1914 and the entry of Turkey into the war prevented the large Russian surplus wheat crop from being marketed in western Europe. Prices of all grains began again to advance steeply toward the end of 1914, reaching record levels in February and, after some recession, again in May. Uncertainty as to supplies, shipping, freight rates and war conditions led to considerable speculation, with wide fluctuations in prices on various markets. The reports as to large crops in 1915, due to greater acreage, favourable weather and other food crop conditions caused prices to fall in the summer and autumn. For a time prices were lower than a year before, but, as in 1914, advances set in toward the end of the year.

Animals and Meats.

After rising for a few weeks on the outbreak of war prices of livestock and meats declined to a comparatively low level by the end of 1914. The high prices of feed caused large numbers of hogs to be marketed in Western Canada and cattle also declined considerably. Reports indicated that the demand for meats was considerably curtailed but an increasing demand for army supplies developed, especially in bacon and other pork products. Sheep, mutton, and poultry were also lower but advanced considerably after the spring months of 1915. The high price of wool caused many sheep to be kept off the market. Toward the end of 1915 hog prices reached record levels again and were still advancing. There was a strong demand from packers for army supplies and the heavy marketing a year before had reduced the number. Cattle and beef prices also advanced considerably toward the end of the year, but not to as high points as in recent years. Poultry prices were much better at the end of 1915 than a year before.

Dairy Products.

Prices were on higher levels than even the very high records reached in recent years, as a result of an additional demand for cheese, butter and eggs for export to Great Britain under war conditions. Milk, however, was somewhat lower in some parts of Canada, the demand being lighter. Production was considerably increased in all lines of dairy products, particularly in the prairie provinces. The drought in this section in 1914 caused scarcity and dearth of feed so that milk prices were higher at Winnipeg during 1915.

RELATIVE PRICES OF GRAINS AND FODDER, MANITOBA WHEAT AND WESTERN OATS, 1910-1915.*

Commodities included: Wheat, Manitoba Northern, No. 1, and Ontario Winter, No. 2; Oats, Canada Western, No. 2 and Ontario, No. 2; Barley, Canada Western, No. 3 and Ontario, No. 3; Corn, American, No. 3; yellow; Flaxseed, Northwestern, No. 1; Peas, Ontario, No. 2; Rye, Ontario, No. 2.

(Average Prices 1890-1899=100.)

RELATIVE PRICES OF POTATOES, EVAPORATED APPLES AND CANNED TOMATOES.

(Average Prices 1890-1899=100.)

RELATIVE PRICES OF FLOUR, CATMEAL AND RICE, 1910-1915.
(Average Prices 1890-1899=100.)

Fish.

The export market had been depressed by the war in the latter part of 1914 but great improvement appeared and steadily increased, so that during 1915 a very good demand was experienced for cod and other dried fish. Salt fish markets were also strong. Canned lobsters were in better demand in Europe than expected so that prices did not fall excessively. Canned salmon was in good demand and the relatively small pack of 1914 was disposed of at comparatively high prices. Fresh fish also brought good prices on Canadian markets.

Other Foods.

Food prices averaged higher at the beginning of 1915 in spite of lower levels for fruits and vegetables as flour, sugar, tea and spices had advanced considerably under war conditions. The index number of fruits and vegetables stood at

115.1 for January as compared with 125.2 for January, 1914. For Miscellaneous Groceries, however, the index number in January, 1915, was 133.4 as compared with 112.9 a year before. During 1915 further advances occurred in flour, tea, beans, dried fruits, rice, tapioca and spices so that the general level of food prices continued to rise, though flour and rolled oats declined considerably and sugar was somewhat lower in the summer and autumn. Potatoes and canned vegetables had been down to low levels as a result of the good crops in 1914, but advanced steeply in 1915, crop conditions being unfavourable.

Textiles.

The feature of the year was the great advance in wool prices to record levels, owing to the demand for military supplies, clothing, blankets, etc. On the other hand cotton and cotton goods were substantially lower, having declined steeply on the outbreak of war and recovered only partially by the end of 1915, the demand being better than expected and the United States crop curtailed. Silks were also down but recovered considerably. Flax products advanced very steeply as supplies from Russia and Belgium were kept off the markets to a considerable extent. Jute had fallen but rose considerably as the demand became strong. Floor oilcloth also advanced. The demand for drygoods showed considerable improvement in the latter part of the year but the military demand for woollen goods and some cotton goods was a very important factor throughout the year.

Hides, Leather, Boots and Shoes.

Leather goods were in strong demand throughout the year for war material, but the demand for ordinary uses had fallen off considerably in 1914 and did not revive greatly until the close of 1915. Early in the year fairly large orders for military equipment were placed in Canada and created a good demand for leather and for hides. In the autumn again further orders were placed. The demand for army boots created a good trade in sole leather and upper leather, while the domestic boot trade also improved in the last four months of the year. Tanners were handicapped owing to the high cost and scarcity of tanning materials. The very high price of hides tended to curtail the demand for leather early in the year, but in the latter part, as hides had not fallen appreciably, the demand improved. The demand for harness leather, which had been light owing to less buying in western Canada, improved in the latter part of the year with the assurance of good crops.

Metals and Implements.

At the beginning of the year prices of metals and hardware lines were comparatively low, having receded from the high speculative level of September, 1914. Some lines, however, were still high owing to increased demand and scarcity. The industrial demand in Canada had been greatly curtailed and improvement was not expected owing to war conditions. The demand for metals to be used in the manufacture of munitions was, however, much greater than expected and began to affect the market early in the year. Materials were also required for the manufacture of machines for producing munitions. Antimony, copper, brass, lead, quicksilver, spelter, zinc, solder and tin were chiefly affected in the early months of the year, though some lines of iron and steel were also rising. The additional customs duty of $7\frac{1}{2}$ per cent. (and 5 per cent preferential) was also a factor in the market for some commodities. Spelter and zinc rose steeply in the summer but eased off. In the autumn iron and steel began to advance steeply and frequently owing to a great demand, especially in the latter. Iron products also rose rapidly. The other metals were similarly affected. The

RELATIVE PRICES OF HIDES, LEATHERS, BOOTS AND SHOES.

Hides: No. 1, Steers'; Calfskins, green; Horsehides; Tallow. Leathers: Jobbing; Slaughter Sole; Harness; Heavy Uppers. Boots: Men's Splits; Men's Box Calf; Women's Dongola.

(Average Prices 1890-1899=100.)

RELATIVE PRICES OF METALS, 1910-1915.

FIG IRON, Nova Scotia; STEEL BILLETS, Nova Scotia; OTHER METALS: Antimony; Brass; Copper; Lead; Nickel; Quicksilver; Silver; Tin; Zinc Sheets.

(Average Prices 1890-1899=100.)

index number for the group including 23 lines rose from 112.6 in January to 165.4 in December, but had reached 176.5 in July owing to the high prices of spelter and zinc for a short time in the summer. The Department of Mines reported that the high prices and good demand for metals had a stimulating effect on the metal mining industry in Canada, as well as in other countries, not only causing greater activity in the operation of the already developed deposits but also later in the year leading to the opening up of old and the exploitation of new deposits. The capacities of steel furnaces were also taxed to the utmost to meet the demand for shell steel.

Fuel and Lighting.

Prices were lower in bituminous and anthracite coal and in coal oil but prices advanced considerably in coke, gasoline and matches. Calcium carbide was lower in jobber's prices. A lighter domestic demand accounted for the decreases while the strong demand for iron and steel caused coke to advance. Exports of gasoline and crude oil from the United States and the greater demand in America itself for gasoline caused prices to rise steeply in the latter part of the year. Raw materials for the manufacture of matches rose steeply.

Lumber.

Conditions in the lumber market for the year were described in *Canada Lumberman* as follows:—

The history of the year 1915 so far as the lumber trade of Canada is concerned was dominated and controlled almost entirely by the war situation. At the beginning of the year, trade was very slow. The country had scarcely been able to get its bearings, from a commercial and industrial point of view, during the five months which had elapsed since the opening of the war. Lumber producers were in a quandary regarding their woods operations. Banks had discouraged extensive cutting of timber and numbers of the smaller operators were thus kept out of the ranks of the producers. Firms that were in a position to finance their own operations, however, in many cases foresaw that before many months the war would create an abnormal demand for all kinds of timber and for a great many products of wood. They therefore, in many cases, went into the woods on a fairly extensive scale. They were of course justified by events later in the year.

For the first few months of the year lumber trade conditions were unquestionably slow. Shortly after the opening of spring, however, there appeared to be a revival of confidence which spread throughout Canada. The improvement was due almost entirely to the great quantity of money coming into Canada in payment for munitions of war and military supplies required by the Allied Governments. This condition continued until the fall and by that time the amount of money put into circulation throughout Canada had created a much better industrial situation. With the arrival of fall there was added to the improvement caused by war orders a greatly increased feeling of confidence resulting from the abnormal crops which were then assured to Canada.

In the beginning of the year, prices of lumber and timber were very low and they continued so for some months. The improvement which commenced in the spring was gradual and slight until the middle of the fall. Then there came a great wave of optimism flowing out of the conditions above referred to and prices commenced to rise rapidly. Those lines of lumber which were in special demand for military purposes, and especially the lines used for the production of shell boxes led in the advance. Chief among these were spruce and hardwoods, particularly birch. These lines became so scarce on account of the shell box consumption that substitution of other lines became necessary and the price improvement then became more general.

Miscellaneous Building Materials.

Many commodities of this sub-group had declined to lower levels during 1914 owing to the falling off in demand as building operations were curtailed. The scarcity of supplies, however, in some lines had already caused some advances by the end of 1914 as supplies were affected by war conditions. During 1915 these upward movements were gradually accelerated and extended so that various steep advances occurred in some lines. Fire bricks, lead pipe, nails,

red lead, copper wire, iron wire, wire cloth, and barbed wire fencing were chiefly affected. The index number for the group, which had fallen from 112.7 in 1913 to 111.4 in 1914, averaged 115.9 for 1915, standing at 123.9 in December. Common building bricks, hinges, sash cord and sash weights averaged lower for the year.

Paints, Oils and Glass.

Prices had fallen somewhat in 1914, but an upward movement set in toward the end of the year in some commodities owing to war conditions. During 1915

RELATIVE PRICES OF BUILDING MATERIALS, 1910-1915.

LUMBER: Spruce Deals, N.B.; Shingles, N.B.; Pine, good sidings, shipping culls, box boards, No. 1 cuts; Lath; Hemlock; Spruce; Oak; Birch; Maple; Fir, B.C.; Shingles, B.C. PAINTS, OILS, GLASS: White Lead; Linseed Oil; Turpentine; Benzine; Venetian Red; Paris Green; Prepared Paints; Rosin, white; Shellac; Varnish, furniture; Glue; Window Glass; Putty. MISCELLANEOUS: Bricks, common and fire; Cement; Lime; Plaster of Paris; Pitch; Coal Tar; Soil Pipe; Iron Pipe; Lead Pipe; Red Lead; Nails, cut and wire; Sash Weights; Sash Cord; Hinges; Copper Wire; Iron Wire; Wire Cloth; Wire Fencing.

this continued and the advance was almost general among the fourteen commodities included. Higher prices for raw materials, especially lead, and an active demand for war purposes in some lines and the cutting off of supplies of colours were the chief factors. Prices were higher for the year in linseed oil, Paris green, prepared paints, putty, rosin, shellac, turpentine, Venetian red, white lead, and window glass. Benzine averaged lower, but advanced steeply in the latter part of the year.

House Furnishings.

Owing to further advances in the price of earthenware and table knives the index number for the group averaged higher than in 1914, which was higher than in 1913. Prices of wooden furniture were steady but iron beds declined. Earthenware advanced owing to higher prices in England and higher costs of transportation. Celluloid handled knives were also much higher. Brooms were slightly lower than in 1914 but advanced again. Sad irons also advanced in common with iron goods.

Drugs and Chemicals.

In this group commodities had shown the smallest advances in prices for some years before the war, but some advances immediately appeared owing to the interruption to supplies from Germany and to higher freights in the case of supplies from South America and other distant sources. The demand for material for explosives was also an important factor in an increased demand for many lines, notably, carbolic acid, glycerine, and caustic soda. New sources of supply were developed and the utilization of raw material, previously unused on account of the low yields, afforded partial supplies in some lines but at higher prices, with the possibility that further development would reduce prices but not to the old levels. The index number for the group stood at 113.3 for 1913, had risen to 135.0 by January 1915, and to 228.1 by December, steep advances having occurred in nearly all lines in March and again in the autumn, with rising markets in many lines at the end of the year.

Miscellaneous.

Raw furs had fallen greatly in price in 1914 but improved steadily during 1915. Malt was higher in sympathy with barley. Tobacco and liquors rose on account of increased excise duties. Pulp and paper prices were high early in the year owing to a considerable demand for newsprint in the latter part of 1914. Later, sulphite pulp became very dear as imports into the United States from Europe were reduced. Sisal binder twine was cheaper than in 1914. Manilla rope was down but advanced steeply toward the end of the year. Gunpowder rose considerably on account of the high prices of chemicals. Raw rubber declined but recovered in the latter part of the year. Soap and starch tended higher.

Appendices.

Appendix A deals with retail prices, giving averages of the months for each year from 1910 to 1915 calculated from the quotations published monthly in the *Labour Gazette* for the sixty cities represented. Some thirty staple foods, coal, wood, coal oil and rent for a six-roomed house are included. Similar statistics for December, 1900, and 1905, obtained for the Board of Inquiry into the Cost of Living and published in their report, are also included. Appendix B on prices in other countries gives the available index numbers of prices and abstracts of reports on prices in the United Kingdom, the United States, and many other countries as well as Australia and New Zealand. Appendix C gives the statistics of the world's gold production.

REPORT OF THE MAYOR'S COMMITTEE ON UNEMPLOYMENT, NEW YORK CITY

AS a result of the acute situation with regard to unemployment which confronted the City of New York in the fall of 1914, the mayor appointed on December 2nd a committee on unemployment and relief composed of one hundred leading men and women of the city in the field of business, labour, philanthropy and civic interest. Ex-Judge Elbert H. Gary, chairman of the Board of Directors of the United States Steel Corporation, served as chairman of the committee. The committee's report summarizes its experience in dealing with unemployment conditions during the winter of 1914-1915 and it also contains information regarding similar efforts elsewhere and brings together suggestions for concerted efforts in New York. It is divided into four parts: (1) Work accomplished; (2) programme for dealing with unemployment in New York City; (3) constructive proposals for an immediate programme and (4) appendices.

The Committee was divided into seven sub-committees to deal with the following phases of the problem: facts regarding existing unemployment; immediate private and public employment opportunities; relief needs and measures; unemployment among women; co-operation of business and industry; national, state, and municipal policies and emergency workrooms for men.

To obtain the necessary facts for such a comprehensive investigation a questionnaire was sent to representative employers. A survey of unemployment was made in January and February, 1915, through a canvas of industrial policy holders of the Metropolitan Life Insurance Company and through a census taken under supervision of the United States Bureau of Labour Statistics. A

canvas was made of selected trade unions and a census taken of homeless men. Replies to the committee's questionnaire from 602 employers employing 250,723 workers in December, 1914, showed that the increase in unemployment for the week ending December 19, 1914, as compared with the corresponding week of December, 1913, was about 8 per cent, making approximately 200,000 more unemployed in December, 1914, than in December, 1913. From the figures submitted by the Metropolitan Life Insurance Company it was estimated that the number of unemployed was 434,000 or approximately 400,000. From the Bureau of Labour Statistics the estimate was 398,000. The highest percentage of unemployment were found among the marble and stone cutters, building trades, and among common labourers. A re-survey in August and September showed that the total number of unemployed wage earners had fallen from approximately 400,000 to 164,500 according to the federal census or 218,000 according to that of the Metropolitan Life Insurance Company. From the canvas of trade unions, 80,640 were unemployed in December, 1914, as compared with 32,925 in December, 1913, out of a membership of 129,750.

During the year there was an increased demand upon relief societies. Summing up the data as to the number of families cared for by the four largest relief societies and the amount expended for the fiscal years 1912-1913, 1913-1914 and 1914-1915, the monthly average number of families assisted was 8,192, 10,108 and 12,915 respectively. The amount expended for material relief for these years was \$433,684, \$495,458 and \$668,575. The average number of families under care increased in 1913-1914 and 1914-1915 over the number cared for in 1912-1913, 23 per cent and 57 per

cent respectively, while the expenditure for relief increased 14 per cent and 70 per cent respectively.

To tide over the period of acute distress 22 emergency workrooms were opened which gave employment to about 5,000 daily or a total of 215,429 days work for the period they operated. Work was given for five days a week to those who could not be placed in steady employment. The working hours were from 10 a.m. to 3 p.m. with a wage of fifty cents a day and a noon-day meal in the case of men and sixty cents a day in that of women. The men were engaged in rolling bandages, making other surgical supplies, chair caning, cabinet making, cobbling, furniture repairing, etc., while the women made children's garments. These garments were disposed of through the Children's Aid Society and other organizations, and the revenue from all saleable material was used to employ more men.

Training classes in stenography, office work, book-keeping, clerical work, the trades, needle work and domestic science were organized for unemployed girls. Six thousand dollars were used to provide "scholarships" in the various classes. Over 1000 different girls were reached, 449 of whom were placed in regular employment, some at double their former wages because of the additional training received.

As a result of bundle day, February 4, 1915, over two million articles of clothing were distributed in Manhattan and the Bronx. In this connection an emergency workshop employed about 400 people at \$1.00 a day and a repair shop from 70 to 100. The Committee received and disbursed \$15,526.48.

In securing regular employment, private employers and the police department co-operated with the City and State public employment bureaus. From the date of opening to January 1, 1916, the city bureau registered for employment 66,043 persons and filled 12,306 jobs. Through an appeal to employers, the Building Trades Employers Asso-

ciation adopted the part time movement, and thereby employing 2,400 more men. The police department found jobs for 2,811 men and women in 103 different occupations. It was believed that 89 per cent of these would provide regular employment if the workers proved capable.

In presenting a programme for dealing with unemployment in New York the committee placed the strongest emphasis on the prevention of unemployment. Organization of the employment market is necessary to prevent seasonality in industry from resulting in seasonal unemployment. More support from employers and more publicity for the work of the city employment bureau was required as well as a better co-ordination of all non-commercial employment agencies with the City, State and Federal Bureaus—which would result ultimately in a single system under a single management.

The English schemes for dealing with casual employment such as the Liverpool Docks Scheme, Manchester Cloth Porters, and other schemes dealing with seasonal workers are briefly described, as well as the experience of other European countries and of cities in the United States. Detailed descriptions of British National Insurance Act of 1911 and of the Unemployed Workmen Act of 1905 are also given.

The third part of the report, devoted to constructive proposals for an immediate programme, recommends the formation of a permanent committee to consist of a central committee of 20 members; an executive committee consisting of a general chairman, general secretary and chairman of sub-committees, and five sub-committees to deal with the following definite phases of the problem: investigation, seasonality and irregularity of employment, public policy, industrial training and vocational guidance, and relief and emergency employment.

The appendices contain recommendations on the development of public em-

ployment bureaus and on the methods and means of training the unemployed. The chief recommendations are: the establishment of a juvenile department of the Municipal employment bureau; the enlargement of opportunities for vocational training before children enter upon any kind of work, and the establishment of continuation schools. Appendix III outlines a study of child labour and unemployment in the families

of 1,011 children, and the results of study of 300 unemployed working girls who attended the scholarship classes conducted by one of the mayor's sub-committees are given in Appendix IV.

The committee recommend immediate action along certain specific lines outlined above. Many of their plans have been adopted, among them being the reorganization of the Mayor's Committee in January, 1916.

REPORT OF THE ONTARIO WORKMEN'S COMPENSATION BOARD, FOR THE YEAR 1915.

THIS report covers the first year of actual operation of The Workmen's Compensation Act. At the close of the year 1915 the number of employers included in Schedule 1, which includes only those contributing to the Accident Fund and having no individual liability for accidents, 1,750. The number in Schedule 2, which includes those not contributing to the Accident Fund but liable for payment of compensation fixed by the Board for accidents as they occur, was 1,252. Accidents to workmen in the employ of the province have been referred to the Board and appear in the report as Crown Cases, although the Act does not apply to the Crown. The Provincial Government Railway and the Provincial Hydro Electric Commission are dealt with as if included in Schedule 2. Of 17,033 notices of accidents of all kinds received up to December 31, only 1,117 remained unadjudicated on that date. Although the first year's experience of the Act cannot be regarded as conclusive, it indicates that the financial burden will be less than was anticipated, the assessments for 1915 being in most cases more than sufficient to meet the requirements, and the Board has made

substantial reductions in most classes of industry. A few changes in classification have been made for 1916 (see *Labour Gazette*, May, 1916, page 1163).

In all 9,829 accidents were compensated for (finally or in part) during the year—8,328 in Schedule 1 and in Schedule 2, 1,494 as well as seven Crown cases. Of the total accidents compensated for, 251 terminated fatally, 1,033 resulted in some measure in permanent incapacity and 8,544 caused temporary disability only. Cases of industrial diseases to the number of 13 are included in the list of accidents compensated. There were three cases of anthrax and ten cases of lead poisoning or its sequelae, one of which was fatal. Notice of 6,087 other accidents was received. These were cases of less than seven days' disability or which for some other reason did not come within the provision of the Act.

Of the 9,829 accidents compensated during the year, 1,401 were in Class 8—iron and steel works; 887 were in Class 5—mining; 763 were in Class 10—metal articles; 710 were in Class 1—agriculture; 470 were in Class 11—agricultural implements, etc., and 468 were in Class

33—building. Of the 251 fatal accidents compensated during the year 46 were in Class 1—lumbering; 27 in Class 5—mining; 18 in Class 37—sewer construction, etc., and 17 in Class 8—iron and steel works.

The total time loss represented by the 7,600 accidents finally disposed of amounted to 170,711 days, not taking into consideration the 682 permanent injuries and 135 deaths. York was first among the counties in the number of accidents, having 1,868 of the 7,600 finally disposed of. Wentworth was second with 919, Algoma third with 473, and Sudbury fourth with 468. Among the causes of accidents "falling, rolling and flying objects" stands first with 2,587 accidents or 34.04 per cent; "machinery and its parts" second with 2,098 or 27.61 per cent, and "falls" third with 1,100 or 14.47 per cent. Machinery and its parts was responsible for 72.14 per cent of accidents causing permanent disability, for 8.89 per cent of deaths and for 23.50 per cent of accidents causing temporary disability only.

A fruitful field for accident prevention work is here disclosed. Set screws to the number of 21 were responsible for an accident burden of \$5,619.39. These might have been counter-sunk for about \$7.35 and thereby the husband would have been saved to a widow, the father to a child, and the son to a dependant mother and father. Open shafting and conveyors killed 4, crippled 22, and temporarily injured 55 workmen. Open gearing wounded 66, killed 4 and crippled 37 wage earners. Box covering would have saved the burden. Automatic locks on two elevators would have saved two lives and \$6,179.06 in compensation. Use of appropriate footwear instead of ordinary shoes would have saved 217 feet from burns; the

knocking down of protruding nails or the picking up of broken glass and pieces of metal would have saved 126 injuries; and the wearing of goggles might have saved 38 permanent injuries to eyes and \$42,846.50 in compensation.

Of the 682 persons permanently injured, 140, or about one-fifth, were under the age of 21. It is interesting to note that of these 140, 2 were 11 years of age, 1 was 13, 6 were 14, 14 were 15, and 21 were 16. These 140 minors included 13 girls, of whom 1 was 11 years of age, 1 was 14, 2 were 15, and 3 were 16. Of the accidents in which final awards were made during the year 7,472 were to male and 128 to female employees.

The total amount of compensation for the year (actually awarded and estimated) amounts to \$1,067,804.23. This is made up as follows:

Compensation paid, other than pensions..	\$323,242.29
Pension awards	349,939.33
Special advances under Section 25 (4) ..	1,685.00
Deferred payments, other than pensions..	17,272.17
Estimated balance for continuing claims in which partial awards have been made	167,623.64
Estimated for pending claims and unreported accidents	208,041.80

As has been noted in a previous issue of the *Labour Gazette* (May, 1916, page 1164) a section was added to the Act in 1915 which authorized the Board to provide special surgical treatment in cases where in the judgment of the Board this is the only means of avoiding heavy payment for permanent disability. The payments under this section for the part of the year during which it was in operation amounted to only \$250.30, but it is stated that the provision is being found increasingly beneficial and the expenditure under this head is now largely increasing.

REVIEWS.

United Kingdom.—Returns of Accidents and Casualties as Reported to the Board of Trade by the Several Railway Companies in the United Kingdom During the Year ending December 31, 1915. London, 1916. 41 pp.

The number of persons killed and injured on railways in the United Kingdom in the course of public traffic during the year 1915 was 1,364 and 9,268, being an increase of 249 and 1,418 respectively over the year 1914. From movement of trains the number of passengers killed numbered 162, and injured 2,355; servants of companies and of contractors, 403 killed, 4,962 injured; other persons, 521 killed and 334 injured. In accidents to trains 278 persons were killed and 1,617 injured. Of this number 269 passengers were killed and 1,432 injured, 9 servants killed and 183 injured and 2 other persons injured.

The number of persons killed or injured on railway premises otherwise than in accidents to trains or by the movement of railway vehicles was: servants of companies, 59 killed and 21,202 injured; passengers, 6 killed and 708 injured; others, 40 killed and 562 injured, making a total of 105 killed and 22,472 injured,—an increase of 25 in the number killed and a decrease of 917 in the number injured during the year 1914. The Dock Companies and Harbour Authorities reported 4 killed and 84 injured on their own railway lines as compared with only 57 injured during the year 1914.

United States.—Wages and Hours of Labour in the Cotton, Woollen and Silk Industries, 1907-1914. Bulletin of the United States Bureau of Labour Statistics. Who'e Number 190. May, 1916. 241 pp.

In the cotton goods manufacturing industry full time weekly earnings of employees were 1 per cent higher in 1914 than in 1913, 2 per cent higher than in 1912, and 11 per cent higher than in 1911 and 1910. Regular full-time hours per week were 1 per cent lower in 1914 than in 1913 and 1912, and 3 per cent lower than in 1911 and 1910. The average rate of wages per hour in 1914 was 2 per cent higher than in 1913, 3 per cent higher than in 1912 and 14 per cent higher than in 1911 and 1910.

The full-time weekly earnings in cotton goods finishing in 1914 were 2 per cent higher than in 1913, 1 per cent higher than in 1912 and 3 per cent higher than in 1911. Regular full-time hours per week were 2 per cent less in 1914 than in 1913 and 1912; and 3 per cent less than in 1911. The average rate of wages per hour in 1914 was 3 per cent higher than in 1913 and 1912, and 5 per cent higher than in 1911.

In the manufacturing of woollen and worsted goods full-time weekly earnings were stationary in 1914 as compared with 1913. They were 2 per cent lower in 1914 than in 1912 and 9 per cent higher than in 1911 and 1910. Regular full-time hours per week were 2 per cent

Woollen and
Silk Industries**

lower in 1914 than in 1913 and 1912, 4 per cent lower than in 1911, and 3 per cent lower than in 1910. The average rate of wages per hour in 1914 was 2 per cent higher than in 1913, 1 per cent higher than in 1912, and 14 per cent higher than in 1911 and 1910. The reduction in hours between 1913 and 1914 balanced the increased average hourly rates, leaving the average weekly earnings the same.

In silk goods manufacturing full-time weekly earnings were 2 per cent lower in 1914 than in 1913, 3 per cent higher than in 1912, 6 per cent higher than in 1911, and 7 per cent higher than in 1910. Full-time hours per week were 2 per cent lower in 1914 than in 1913 and 1912, and 3 per cent lower than in 1911 and 1910. The average rate of wages per hour in 1914 was the same as in 1913, 6 per cent higher than in 1912, 11 per cent higher than in 1911, and 12 per cent higher than in 1910. On account of the reduction of hours the weekly earnings in 1914 were less than in 1913, although the hourly rate was the same.

United States. — Industrial Accident Prevention. Special Bulletin No. 77 of the State of New York Department of Labour, issued under the direction of the Industrial Commission, prepared by the Bureau of Statistics and Information. 54 pp.

The bulletin presents the results of an investigation of the accident experience of a number of manufacturers and public service corporations which was undertaken to ascertain whether or not any of the employers in New York State were reducing their accidents, and, if so, what means they were employing. In Part I the accident experience of the American Locomotive Company, the Eastman Kodak Company, the Rochester Railway and Light Company, the New York Edison Company, the Lackawanna Steel Company, the General Electric Company and other concerns is charted. These records, although somewhat meagre, demonstrate that progress is being made by those giving attention to the

prevention of accidents. In Part II means of preventing accidents are considered, and it is stated that one large steel plant has estimated that the efficiency of its safety work is distributed as follows:

Organization	45%
Attitude of officers	20%
Safety committees	20%
Inspection (workmen)	5%
Education	30%
Instruction of men	15%
Prizes	9%
Posting signs	3%
Lectures	3%
Safeguarding	25%
Safety devices	17%
Lighting	5%
Cleanliness	3%

It is pointed out that the reduction of accidents depends first of all upon the attitude of the employer and he must enlist his foreman in the cause of accident prevention as the foreman is constantly with the workmen, he is their teacher and their example, and it is especially to the foreman that we must look for results. As to safety and output it is stated that there are so-called guards on machines in some factories which not only hamper the operator but increase rather than decrease the accident hazard. Guards and safety practices should not diminish the efficiency of the workman. In most cases this is not necessary, and in many cases guards actually increase output. In a section on mechanical guards the principles upon which proper guarding of machines should be based are suggested. Shops should be laid out according to a plan which will give ample room between machines. Lighting should have close attention as insufficient light is sometimes as potent as unguarded machinery in causing accidents. As it has been demonstrated that more accidents occur about the middle of the forenoon and about the middle of the afternoon than at any other periods of the day because at these times the accumulation of worn-out tissues of the body is sufficiently large to produce a state of physical fatigue, some employers shut down the plant for five minutes each hour or

each hour and a half. Others have an intermission in the middle of the forenoon and again in the middle of the afternoon, while others use a fire drill at these times.

Other sections of the bulletin deal with welfare work and safety, the responsibility of the employee, the mental hazard, educating the new man, and kindred topics. It is argued that "spasmodic safety campaigns, launched with a blare of trumpets, and dropped soon after, cannot produce lasting results. If our industrial accidents are to be prevented or even materially reduced in number and seriousness, our efforts must be directed by well studied plans and they must be continuous and persistent. We must realize also that after we have eliminated the grossly unnecessary accidents, the fruits of our efforts will be less apparent from year to year. But having attained a satisfactory record we must persist in our safety campaigns in order to maintain it."

United States.—Unemployment Among Women in Department and Other Retail Stores of Boston. Bulletin of the United States Bureau of Labour Statistics, Whole Number 182. January, 1916. 72 pp.

This study was undertaken in connection with the Massachusetts Minimum

**Unemployment
of Woman
Workers in
Boston Stores**

Wage Commission which published a report in 1915. Wage records were available from fifteen department and other retail stores having on their pay-rolls 5,985 regular employees and about 5,600 "extras" during the year ended July 31, 1914. This "extra" is one of the striking features brought out by the report. Of the 1,763 women and girls interviewed, 1,156 or 65.6 per cent were regular employees; 346 or 19.6 had employment as "extras" but had also some employment during

the year as "regulars" either in retail stores or in some other industry, and 261 or 14.8 per cent had no employment at all except as "extras." To this group belonged school girls, married women or single women not entirely dependent on their earnings.

The average period of possible employment for the 1,156 regular employees was 49.6 weeks and the average unemployment during this period was 6.4 weeks. Sickness accounted for 30.2 per cent of the unemployment and affected 78.5 per cent of the women employed as regulars. All sick leave during which the worker received pay is excluded from these figures. To lay-offs was due 16.1 per cent of the lost time. Inability to find work and unpaid vacations accounted for 15.8 per cent and 13.1 per cent of the unemployment respectively. About 11 per cent was caused by sickness in the family of the worker. The remaining 14.2 per cent was distributed almost equally between home responsibilities and other causes. Although the extent of involuntary unemployment among these women is shown to be of large importance, conditions in this respect are probably better than in many other industries employing large numbers of women, because retail store business is not sharply seasonal.

Ontario.—Report for 1915 of the Workmen's Compensation Board, including also report for 1914 covering organization. Printed by order of the Legislative Assembly of Ontario. Toronto: King's Printer, 1916. 46 pp.

A summary of this report appears elsewhere in this issue.

New York.—Report of the Mayor's Committee on Unemployment, January, 1916. 109 pp.

A summary of this report appears elsewhere in this issue.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The widow of a deceased locomotive fireman, who was killed in a yard of the Grand Trunk Railway Company by one of the cars that was being shunted to the engine he had just left, was recently awarded the sum of \$2,000, with interest and costs, under the Workmen's Compensation Act, by a Montreal judge.

Death of fireman leaving engine for drinking water held to have occurred in course of employment. Compensation awarded

The defence set up was that as the deceased left his engine without the leave of the engineer, his superior officer, the accident did not happen to deceased by reason of, or in the course of, his work for the company defendant, and that he was guilty of inexcusable fault, and, therefore, not entitled to damages under the Workmen's Compensation Act.

Mr. Justice Weir, before whom the case was tried, pointed out that the purpose for which deceased left his engine was to get some drinking water, of which there was none at the time on the locomotive. On previous occasions he had been in the habit of going to a shanty for the water, and no complaint had ever been made of the custom of thus getting off the engine without leave. It was pointed out by the Judge that the 'work' of a workman begins as soon as he is at the disposal of the employer and ends when the workman has left the place of work and regains his complete liberty of action. On the occasion in question, deceased was still at the disposal of the company defendant, and in the place where was being carried on the extensive and intricate operations connected with the making up and movement of freight trains in which he was associated as a fireman. The fact that while waiting for the moment when cer-

tain of these operations were to be completed and his own task as fireman should recommence, he left his own particular post of labour and was killed through the operation of some of the connected work of defendant's business as a railway company, was not a basis for the assertion that his widow was thereby deprived of the protection accorded by the Workmen's Compensation Act for the fatal act in question. Judgment, therefore, was awarded in favour of the plaintiff. (*Quebec—Rae v. Grand Trunk Railway Company.*)

A driver of a delivery wagon in the employ of a firm of wholesale grocers, while delivering goods, was struck by an automobile. He had both legs fractured, several ribs broken, and was unable to resume work for over a year. His salary was \$12 a week, and he claimed from his employers an annuity of \$312, the parties themselves having fixed the amount if the courts decided that the case came under the Workmen's Compensation Act.

Plaintiff submitted that the case came under this Act because the defendants were by the delivery of their goods engaged in the transportation trade, a business which was specifically embraced in the clauses of the Workmen's Compensation law. The Court of Review, however, ruled this plea out, as they claimed that all business of transportation was not as yet included within the Workmen's Compensation Act, and that consequently the plaintiff could not recover under this Act.

The plaintiff, however, did not base his claim solely on the submission that his employers were engaged in the transportation trade. He claimed further

that the accident happened at the moment when he was unloading the wagon. Therefore, he claimed, the defendants must be considered as being engaged in the work of "loading and unloading" within the meaning of the Workmen's Compensation Act. In ruling out this plea, the Court pointed out the circumstances which existed in this case could not be submitted to the special legislation applicable to granting compensation to injured workmen. The plaintiff's plea was in vain as the defendants were not engaged in the transportation trade and much less engaged in the business of "loading and unloading." The judgment of the previous Court was confirmed and plaintiff's appeal dismissed with costs; the plaintiff's rights to sue the author of the accident under the common law was still reserved to him. (*Quebec—Rosenbloom v. Lavut & Sons.*)

bridge giving way, and the plaintiff brought action for \$500, being the damages which he claimed to have suffered.

The trial judge found that the cause and without any negligence on the part of the plaintiff.

Under the Municipal Act, however, the council of any municipality could pass by-laws regulating the passage of traction engines or other heavy vehicles over bridges and highways. The defendant municipality had passed a by-law "that many big outfits of traction engines and threshing machines are going over the bridges and that the owners of these outfits do not carry the necessary planks to protect the bridges, and that these bridges have not been able to carry such heavy engines, and that something should be done for their protection"; and the enacting part of the by-law provided "that all owners of traction engines and outfits shall carry 3-inch planks to be placed over the bridges to protect them." The trial judge held that reading the whole of said by-law, the by-law was sufficient and that having imposed a duty on owners of traction engines to lay planks over bridges before crossing same, the plaintiff having failed to do so could not succeed. The Court of Appeal dismissed the plaintiff's appeal with costs. (*Manitoba—Marion v. Rural Municipality of Montcalm.*)

The plaintiff was crossing over a bridge with his threshing machine, weighing about thirteen tons, when the engine went through the bridge. The plaintiff, who was the owner of the engine, did not carry planks nor did he place any planks on the bridge before crossing. The engine was broken by reason of the

THE LABOUR GAZETTE

AUGUST, 1916

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Industrial conditions in July continued active, and in some respects showed improvement over those of the previous month. There was a greater demand for farm labour and for factory and general help. While there were several more trade disputes than in the month previous, the number of men affected by strikes recorded in the table was smaller, though large bodies of men were concerned in intermittent pit-head strikes in the Crow's Nest Pass coal mining district. Several disputes which had been referred under the Industrial Disputes Investigation Act were adjusted by negotiations between the parties, and in one case a Board brought about an agreement. Special articles give the results of adjustments arranged at Trail and Rossland, and at Edmonton, through the efforts of departmental officers. Prices showed a downward tendency. The cost of a budget of staple foods was \$8.46, compared with \$8.51 in June. The Department's index number of wholesale prices stood at 178.8 for July as against 180.6 in June. Fuller details of prices, the labour market and other subjects will be found in the General Review. A special article similar to that which appeared in the April issue of the *Gazette* deals with unemployment among members of trade unions as reported at the end of June.

Several applications for Boards of Investigation under the Industrial Disputes Investigation Act were received during July and a number of Boards established. The Board appointed in the case of the Ottawa

Industrial Disputes In- vestigation Act Cases

Street Railway Company and its employees reported that an agreement had been brought about between the parties providing for a reduction in hours and an increase in wages.

The applications received affected maintenance-of-way employees on the Canadian Northern Railway, telegraphers of the Great Northwestern Telegraph Company, and asbestos miners at Thetford Mines. In the first two cases mentioned Boards were established, and in the case of asbestos miners opportunity was given the workmen to take up the questions in dispute with each of the companies concerned in accordance with a conference which took place between the parties in the office of the Minister of Labour.

An account is given elsewhere in the present *Gazette* of the settlement, without Boards and by the mediation of departmental officers, of difficulties affecting smelter employees and metal miners at Trail and Rossland, B.C., and of a dispute affecting employees of railway companies in Northern Alberta. In the case of two applications for Boards made prior to the previous month affecting railway employees at Halifax and electrical workers at Mont-

real, procedure was stayed to permit direct negotiations between the parties. These negotiations in the case of electrical workers at Montreal resulted in a satisfactory settlement.

Reference has been made in various issues of the *Gazette* to Workmen's Compensation measures in

**Workmen's
Compensation
Measures
brought into
effect**

Nova Scotia, Manitoba and British Columbia, which were to take effect from a date mentioned in the Act or to be proclaimed. By pro-

clamation dated May 22, 1916, part one of the Nova Scotia Act becomes effective as from and after October 1, 1915. The application of the British Columbia measure as between employers and workmen and as to the payment of compensation in respect of injuries to workmen is to take effect January 1, 1917, the various other provisions of the Act relating to the constitution of the Board, etc., to come into force on October 1, 1916. The Manitoba Act which provides for its coming into force on proclamation of the Lieutenant Governor-in-Council has not yet been put into effect.

* * *

The following persons have been appointed to the Board recently established by the Federal Government for the purpose of enquiring into the

**Appointment of
Board to
Enquire into
Railway situ-
ation in Canada**

railway situation in Canada: Alfred H. Smith, President of the New York Central lines,

chairman; Sir George Paish, the well known British financial authority, and Sir Henry Drayton, Chairman of the Board of Railway Commissioners of Canada.

The Board will give its attention to the general problem of transportation in Canada, the status of the large transcontinental lines, the service which each is capable of performing in the general scheme of transportation, branch lines and feeders, connections in the United

States, steamship connections, capitalizations, fixed charges and earnings and probable future development. The commissioners will also report to the Government upon the reorganization of any of the transcontinental railway systems or their acquisition by the State. The Board is constituted under the Enquiries Act by order-in-council, and it is recommended that the Provincial Government, the Board of Railway Commissioners, the Commission of Conservation and other like bodies co-operate with and assist the Board in its enquiry.

The Seamen's Act of March 4, 1916, of the United States, applying to all foreign vessels of 100

**U. S. Seamen's
Act Causes
Changes in
Canadian Law**

tons gross and upwards which may depart from any port of the United States as from March 4, 1916, provides, among

other things, that a percentage of the vessel's deck crew running from 40 per cent in the first year after March 4, 1916, to 65 per cent after the fourth year shall be of a rating not less than able seamen, and makes provision also regarding the definition of able seamen and their physical fitness. This legislation has caused a new arrangement between the Canadian and United States authorities regarding the treatment of Canadian shipping in United States ports.

The Dominion Department of Marine and Fisheries issued a circular to steamship inspectors, collectors of customs, and owners and masters of vessels, calling attention to the provisions of the United States measure and enjoining the exercise of care in the selection of deck crews which would insure compliance with the requirements of the American Act in case of a muster of the crew in United States ports as provided in the new statute. Later the Dominion Department issued instructions to collectors of customs and others concerned, providing that an applicant for the position of able seaman would require to present to the

collectors of customs declarations to the effect that he was of the full age of nineteen years or upwards, had served at least eighteen months on deck at sea or on the inland or minor waters of Canada, on a vessel of 100 tons gross or upward, including decked fishing vessels. A certificate by a duly qualified medical practitioner to the effect that the applicant had passed the physical examination as prescribed by the United States Act was also required. The various forms required were also attached. Upon the presentation of the declarations and certificates mentioned collectors of customs are authorized to issue applicants certificates of qualification as able seamen. These certificates are carried by the seamen for presentation at United States ports when necessary.

* * *

At the recent session of the British Columbia Legislature an Act entitled

Early Closing Act in British Columbia "An Act to Provide for a Weekly Half-holiday for Store Employees" provided for the closing of every shop not later

than one o'clock in the afternoon on one week day in every week with certain exemptions such as bakeries, barber shops, cigar stands, drug stores, newspaper stands, restaurants and shops or stands for the sale of fresh fruits, vegetables, etc., and such other trades or businesses as may be declared exempted by order-in-council. The Act provided for the taking of a special vote in the cities of Victoria, Vancouver and New Westminster as to whether these cities were in favour of Wednesday or Saturday for the half-holiday. In other municipalities it is provided that the weekly half-holiday shall be observed on the day appointed in any by-law passed under the provisions of the Shops Regulation Act, and in case there is no by-law the weekly half-holiday is to be observed on such day as may be agreed upon by employer and employee. Provision is also made for a referendum at the municipal elections to be held in January, 1917, as to

whether the weekly half-holiday shall be on Saturday or some other day in the week. Following the passage of the Act the city of Victoria decided in favour of the Saturday half-holiday. Vancouver and New Westminster also decided in favour of Saturday. At Prince Rupert under an arrangement made between the retail clerks and the Retail Merchants' Association Saturday was also decided upon. The measure is reported to be operating satisfactorily, and both merchants and employees are apparently satisfied with the working of the law. The citizens are also co-operating by doing their week-end shopping on Friday night and Saturday morning.

* * *

Forest fires during the last few days of July resulted in the complete destruction of a number

Forest Fires in Northern Ontario of towns and villages along the line of the Temiskaming and Northern Ontario Railway

and of the loss of several hundred lives. The towns of Cochrane, Matheson, Nashka, Iroquois Falls and Porcupine Junction suffered very heavy damage, some of them being practically burned out. Railway, lumbering and mining interests sustained heavy losses, and many settlers' and farmers' homes, barns and crops were destroyed. Appeals for assistance were quickly responded to and preparations for rebuilding in some of the burned out districts were being made. The fire occurred in what is known as the "Great Clay Belt" of Northern Ontario and visited districts which sustained large losses through fires several years ago.

* * *

In the July issue of the *Labour Gazette* reference was made to a demand

Unrest in Western Coal Mines by coal miners in the Crow's Nest Pass district for a ten per cent increase as a war bonus

and to counter proposals of the Western Coal Operators which became the subject of a referendum vote of all the local unions. This referendum vote re-

sulted in a majority against the operators' proposal. - Following the rejection of these proposals a number of pit-head strikes occurred at different places in the districts, and while several of these were adjusted at the end of the month the miners of Fernie, Michel and Coalhurst were idle, though representatives of the miners and operators remained in Calgary endeavouring to bring about a resumption of negotiations, the operators taking the stand that they would not be parties to any joint negotiations until all hands returned to work. Mr. J. D. McNiven and Mr. F. E. Harrison, fair wage officers of the Department, visited Fernie and other points and at the end of the month were aiding in an adjustment of the difficulties.

* * *

The Trades and Labour Congress of Canada has issued its convention call for the thirty-second annual session of the Congress, to be held at Toronto commencing September 25, 1916. After refer-

ring to the various places at which annual conventions have been held in recent years, the attention of labour organizations is drawn particularly to that part of the constitution dealing with the introduction of resolutions, it being pointed out that all resolutions for the consideration of the Congress should be received by the Secretary-Treasurer not later than ten days prior to the opening of the Convention, the same to be printed and issued at the opening session of the Congress. Resolutions submitted contrary to the section making this provision can only be introduced and dealt with by the Congress on a two-thirds vote of the delegates present. Referring to the subjects with which the convention is likely to deal the call emphasizes par-

ticularly "the means to be taken to protect resident labour when, the war being over, this country will have to meet the vast influx of foreign labour; the returning of wounded or otherwise incapacitated soldiers, and the providing for them work that will not interfere with the interests and rights of the regular labouring classes in Canada." It is also stated that the convention will consider a new Industrial Disputes Investigation Act, drafted by Mr. J. G. O'Donoghue, solicitor for the Congress. The call, in conclusion, points to the necessity of labour bodies perfecting their organization and of appointing their delegates to the convention without delay.

The Canadian Federation of Labour has also issued a call for its annual convention to be held at Quebec commencing September 11. Organizations associated with the Federation are urged to make every effort to have delegates at the convention, and to forward resolutions which they may desire to submit to the secretary-treasurer at least two weeks before the date of the convention.

* * *

A recent order-in-council under the War Measures Act, 1914, in order to make greater provision for safety in explosives factories, provides that every person who takes or attempts to take or assists in taking any matches into any explosives factory or into any building, enclosure or place wherein the manufacture of explosives is being carried on, or has matches in his possession while in any such factory, building, enclosure or place is liable to a fine not exceeding \$100 or to imprisonment for any term not exceeding six months or to both fine and imprisonment.

Safety in Explosives Factories

INDUSTRIAL CONDITIONS DURING JULY, 1916

I. — GENERAL REVIEW

The labour market continued steady, nearly all industrial districts reporting

**The Labour
Market**

active conditions and practically no unemployment. A shortage of labour, both skilled and unskilled, male and female, was evident in many localities, and the demand for farm labour increased. Practically all branches of manufacturing continued to show activity, which was especially marked in some departments of the metal trades. Transportation, both rail and water, showed no falling off from the activity of the previous month and the earnings of the large railway companies kept up well. Mining, both metal and coal, was very active, though there was some reduction in coal outputs as the result of labour shortage in the Maritime Provinces and on account of general unrest and pit-head strikes in the Crow's Nest Pass district in British Columbia and Alberta. Building and construction was maintained steadily in the Maritime Provinces and improved in Ontario and Western Provinces. Lumbering was active, though destructive forest fires in Northern Ontario seriously affected the industry in that district. Agricultural operations were carried on actively with a heavy demand for farm help. Fishing on the Atlantic coast was fair and with the commencement of the sockeye run towards the end of the month salmon fishermen and canneries became active in British Columbia.

Reports of employment bureaus for the month of June indicated a slight decrease in the demand for workers. The number of vacancies notified showed a daily average of 1312.16 as compared with 1465.72 in May. The daily average of persons placed was 655.67, compared with 772.68 in May. There was an in-

crease in the vacancies notified for women workers, the daily average being 349.31 as compared with 345.49 in May. The number placed, however, showed a daily average of 133.50 compared with 131.49 the preceding month. The proportion of vacancies filled to vacancies notified was 50.2 per cent as compared with 55.7 per cent in May. The five principal centres of labour distribution, Montreal, Toronto, Winnipeg, Edmonton and Vancouver, showed a decrease in the demand for workers except at Edmonton. Decreases were very marked in Montreal and Toronto. At St. John, Quebec, Brandon, Saskatoon, New Westminster and Victoria, however, there was an increase in the number of vacancies. Returns received from trade unions as reported at the end of June indicated that 2.1 per cent of the numbers covered by reports were unemployed, as compared with 8.7 per cent reported December 31. The material embraced in the reports as of June 30 is more comprehensive than for the previous report, returns having been received from a little over 70 per cent of the total trade union membership for the June report, as compared with 40 per cent in the report of December. Very great improvement was indicated in mining and quarrying, manufacturing and transportation. In building and construction the improvement was also marked, the percentage of unemployed being less than 9 per cent as compared with 28 per cent in December.

The strike record for July continued fairly high, seven new disputes being reported as compared

**Trade
Disputes**

with four the month previous. The numbers of firms and men affected, however, were considerably less than in the strikes which occurred in the pre-

vious month. The number of strikes in existence during July was 14, involving 45 firms and 1,303 employees, as against nine in existence in the previous month, affecting 68 firms and over 1,900 employees. The trades affected by the new disputes of the month were clothing, food and tobacco preparation, general transport and unskilled labour, the greatest number of employees affected being in the latter class. Of the seven new disputes five were settled, and with the adjustment of three of the disputes commenced prior to July six disputes were left on the strike record as unsettled at the end of the month. Several pit-head strikes occurred in the Crow's Nest Pass district, arising out of the demand of the miners for a ten per cent increase as a war bonus, and there was general unrest in the district pending the result of negotiations between the miners and operators, no decision in regard to which had been reached at the end of the month.

Prices again showed a downward tendency, both the budget of retail food prices and the index number of wholesale prices being down

Prices

slightly. A list of 30 staple foods cost \$8.46 as compared with \$8.51 in June, \$7.80 in July, 1915, and \$7.42 in July, 1914. The wholesale prices index number stood at 178.8 for July, as compared with 180.6 in June, 150.2 in July, 1915, and 134.6 in July, 1914. In retail prices mutton, salt pork, milk, butter, potatoes, beans, evaporated apples and prunes declined slightly, but beef advanced somewhat. In wholesale prices, fodder, cattle and beef, sheep, fresh fruits, soda, raw silks, jutes, tallow, metals, chemicals and raw furs averaged lower, but grains, hog products, dairy products, vegetables, breadstuffs, woollens, cottons, flax products, leather, implements, paints, oils and glass, iron beds, and sundries averaged higher. Retail prices of coal and wood also averaged higher. As compared with July last year, prices were higher in all groups except Grains and

Fodder. In the retail prices of foods all commodities were higher than in July, 1915 and 1914, except milk. Rent, however, averaged lower.

The upward trend of wages continued during July, half of the increases being in favour of civic employees. Labourers in coal mines at Corbin, B.C., to the number of

Changes in Wages and Hours

75, received an advance from \$2.47 to \$2.60 per day. About 500 plumbers at Toronto were granted an increase from 35 cents per hour to 47½ cents for the first year and 50 cents for the second year. About 200 building labourers at Windsor, Ont., had their wages advanced from 25 cents to 30 cents per hour. By an agreement entered into between most of the publishers of London, Ont., and the London Typographical Union, an increase of \$1 per week was granted to all employees of the composing rooms, both news and job, who were receiving the minimum scale of wages, about 90 men being affected. The working hours of about 500 street railway employees at Ottawa, Ont., were reduced from ten to nine, and their hourly wages were correspondingly increased to make the same rate per day. A general advance in the pay of civic firemen was made in London, Ont., where 42 men were affected, and in Vancouver, B.C., where 167 men were affected. At Hamilton, Ont., the policemen, numbering 65, were granted an increase of \$60 per year, the new scale being \$1,060 per year for 1st class men, \$960 for 2nd class men and \$860 for 3rd class men. At Victoria, B.C., 80 park and boulevard men received an increase in wages from \$13.50 to \$15.00 per week. At Calgary, Alta., the wages of 50 street sweepers were advanced from 28 cents to 30 cents per hour. According to the Civic Employment Bureau at Toronto increases in wages were general in many trades. Wages of labourers were reported to have gone up from 25 to 30 cents per hour; concrete workers from 30 to 35 cents; men handling coal and ice from

25 to 30 cents, and farm hands from \$25. to \$45 per month.

Four fair wage contracts given out by the Department of Public Works and two by the Department of Railways and Canals, a total of six for the month, were received for publication in the *Labour Gazette*. Two of the contracts awarded by the Public Works Department contained fair wage schedules. One of these contracts was for a retaining wall and back-filling at West St. John, N.B., and the other for the construction of a riding school for the Royal Military College at Kingston. Two other contracts contained the usual fair wage clause providing for the payment of the wages current in the locality where the work is to be performed. The Post Office Department also let a number of contracts for supplies containing regulations for the suppression of the sweating system.

The total imports of merchandise for consumption in Canada for June, 1916, amounted to \$66,788,276, as compared with \$70,330,181 in the month of May, 1916, and \$35,784,276 in June, 1915, an increase of \$31,004,000. Domestic exports of merchandise for June, 1916, amounted to \$95,635,862, as compared with \$42,805,846 in June, 1915, and \$94,654,295 in May, 1916. For the six months ended June 30, imports entered for consumption amounted to \$365,949,513 in 1916 as compared with \$207,793,312 in 1915, while the exports for the same period amounted to \$475,458,982 and \$216,174,740 respectively. Increases in exports of products of the mine, the fisheries, forests, animals and their products, agriculture, manufacturers and miscellaneous merchandise were shown.

The following table gives the latest official summary of Canadian imports entered for consumption and domestic exports:

Total 16 Cities.....	864,715,470	864,637,297	578,090,067	- 78,173	- .009	+ 286,547,230	+ 33.14

Bank clearing as indicated by returns received from 16 cities were practically stationary in July, 1916, as compared with the previous month, the total falling from \$864,715,470 in June to \$864,637,297 in July, a decrease of \$78,173 or .009 per cent. Grouping the returns by provinces increases were shown in all provinces except New Brunswick and Ontario. As compared with the corresponding month of last year bank clearings showed an increase amounting to \$286,547,230, or 33.14 per cent, the total for July, 1915, being \$578,090,067. As compared with July of last year there were gains in all the provinces. Of the larger cities Montreal showed a slight

increase as compared with June, but a marked increase as compared with July, 1915. Toronto showed a decrease as compared with June, but a decided increase as compared with July of last year. Winnipeg and Vancouver showed increases both as compared with June and with July last year.

Canadian revenue for the month of June, 1916, amounted to \$17,600,149.34, as compared with \$11,433,970.54 for June, 1915, an increase of \$6,166,178.80. The expenditure on capital account for June, 1916, amounted to \$13,813,939.32, which comprised \$12,439,187.93 for war purposes, and \$1,374,751.39 for public works, including railways and canals.

The bank statement for June, 1916, showed the paid-up capital of the chartered banks of Canada to be \$112,846,435, as compared with \$112,832,765 for the month of May, 1916. Deposits payable on demand for June, 1916, amounted to \$428,117,340, as compared with

\$412,301,481 for May, 1916. Notes in circulation for June, 1916, amounted to \$123,373,395, as compared with \$114,847,323 in May. Loans to cities, towns, municipalities and school districts during June amounted to \$46,773,032, as compared with \$43,924,036 during May, 1916.

II. THE INDUSTRIES AND TRADES

Nearly all lines of manufacturing continued to show activity, and the demand for factory help, experienced and inexperienced, and both male and female, was marked. In a number of instances the filling of orders was delayed through inability to get sufficient help to finish the work. Activity in canning factories, which in some instances reported an increase of 35 per cent in trade over last year, afforded employment to considerable numbers of men and women.

Metal manufacturing in a number of special lines was very active, and in many regular lines as well. The large steel works at Sydney and Sydney Mines were exceptionally busy in all departments. Farm implement factories at Hamilton reported a heavy year, with a big demand for their manufactures. Stock was entirely sold out in some lines, and with a shortage of labour it was found difficult to fill new orders promptly. One foundry company at St. Thomas reported that employment could be given to 25 men if available. At Windsor all factories were active with the exception of the Ford Motor Company, which on account of the taking of the annual inventory laid off a number of men for a few weeks. Brockville reported unusual activity in steel, iron and brass industries. At Victoria work in shipyards was brisk, with good prospects for the future. Progress was being made in the establishment of new ship-

yards for building lumber-carrying vessels, and the number of employees was increased.

Furniture and wood-working factories in some localities were reported active, with a demand for some trades reported at Woodstock and Berlin. Boot and shoe and clothing manufacturers were busy at Montreal and Berlin. Shirt and collar factories in the latter city were very busy, with a shortage of female labour. Tanners at Montreal complained that a shortage of labour was seriously affecting outputs.

Factories engaged in the preparation of food reported continued activity and biscuit factories in a number of instances advertised for help. Flour and cereal mills were very busy. Other miscellaneous factories reported a fair amount of activity. There was marked quiet in the manufacture of flint glass and members of the trades engaged in this work at Montreal not having worked at their trade since February, 1914, were obliged to seek employment at other points or engage in some other occupation.

Textile and woollen factories were reported busy from most centres. At Truro and Moncton underwear and textile factories advertised for additional female labour and other help. At Montreal manufacturers of textiles had orders ahead and were laying the foundation for a continuance of activity after the war. Galt also reported textile and woollen factories very busy.

Railway traffic was reported active from all points and the monthly statements of the large transcontinental railways continued to show high earnings.

Transportation

Gross earnings of the Canadian Pacific Railway Company for June were \$11,892,609, as compared with \$7,512,033 for the same month of 1915, an increase of \$4,380,576. Earnings of the Canadian Northern system were \$3,377,200, compared with \$3,088,900 the previous month. Grand Trunk gross revenues for June, 1916, were \$3,930,310, as against \$3,533,542 in June, 1915, an increase of \$396,768.

Points in the Maritime Provinces reported heavy rail shipments. At Moncton very active conditions prevailed in the Canadian Government Railway shops owing to the large amount of repair work in hand and the construction of new coaches and cars, and much overtime was made. All classes of railway operating help were especially active owing to the large number of specials required to handle freight and passenger traffic. Montreal also reported railways exceptionally active during July. Toronto reported steam and street railway employees busy, with a shortage of men. Firemen, freight handlers and trackmen were particularly scarce and local railway officials engaged Chinese and women for the work of cleaning passenger coaches. Hamilton reported railway business still continuing active with an increase in freight and passenger business and electric lines also showing heavy traffic. At St. Thomas slightly less activity was reported in railway shops, particularly in those of the Pere Marquette Railway, but railwaymen generally were busy. London reported railways busy and the summer passenger traffic good. Western points such as Calgary, Edmonton and Medicine Hat also reported railway traffic in all lines brisk. At Edmonton the power company which took over the city plant made a reduction in the number of employees, and under a new

schedule in operation on the municipal street railway some 40 employees were thrown out of work.

Steamboat traffic continued good at both ocean and lake ports. At Montreal a large number of ships were coming to the harbour, and although the Lachine canal was blocked for some time the grain brought down was considerably more than in the same month last year. Toronto reported that sailors, longshoremen and others engaged in navigation had an active month. At Brockville steamboat traffic was unusually brisk. At Hamilton navigation lines reported freight and passenger business good.

Both metal and coal mines continued active during July, though in coal mines

this activity was lessened in some degree by a shortage of some hands in Nova Scotia fields, and by unrest arising out of a demand for a war bonus by miners in the Crow's Nest Pass fields.

Asbestos mines at Thetford Mines and Black Lake, Que., were running full time, also chrome iron mines. Copper mines at Eustis also were active. There was some feeling of unrest at Thetford Mines where the men applied for a Board of Investigation under the Industrial Disputes Investigation Act, but at the end of the month the parties were negotiating and no cessation of work had occurred. In the Cobalt, Porcupine, Boston Creek and Kirkland Lake camps there was a greater tonnage of ore mined than at any time in the history of Northern Ontario. Many mines were making changes in their mills to add to capacity. Labour conditions were very satisfactory, and some companies were obliged to pay higher than the average rate of wages in order to get and hold their workmen. At times there was a scarcity of miners, but this was lessened by numbers of men coming in from other camps. Metal mining in British Columbia was reported active in nearly all mining centres. At Nelson

Mining

mining was still on the increase and at Rossland mines were working steadily. Active conditions prevailed at the Trail smelter and in the construction of dwellings and additions to plant. Smelter workers at Trail and miners at Rossland both received increases in wages based on the selling price of metals.

Coal mines in Nova Scotia fields worked steadily, though suffering diminished outputs in some cases owing to shortage of labour. Some companies announced that owing to the increased cost of mining the price of coal would advance 25 cents per ton. One or two mines in the Westville district which had lain idle for some years were opened up and put in shape to resume operations. At Lethbridge coal mining was reported very active, all the mines working full time and more men required. Fernie reported the demand for coal and coke was extremely brisk, but pit-head strikes in various mines associated with the demand of the various miners' associations for a ten per cent increase as a war bonus resulted in a lessened output. This unrest was extending to all mines whose employees are embraced within District 18 of the United Mine Workers of America, and although efforts were being made to bring the parties together no adjustment of the difficulty had been effected at the end of the month. Nanaimo reported coal mines in the city working steadily and an improvement in mines in the district which previously had been on slack time.

Building and construction in the Maritime Provinces from all points

Building and Construction with the exception of Sydney, where building was quiet, though there was sufficient work for those left in the district, was reported active. Halifax reported building operations brisk and labour in good demand. Some contractors reported a difficulty in securing skilled mechanics. Good progress was made in the building of the ocean terminals and of a new concrete pier for the Furness-Withy Company.

At Moncton a large number of residences were in course of erection, besides much alteration and repair work. St. John also reported considerable building going on. Newcastle and Fredericton also reported activity in building. Sherbrooke, Que., reported that several large manufacturing establishments were building additions to their plants and a number of new houses in course of construction. At Toronto, while house building was quiet, a number of large commercial and industrial structures provided employment for building trades. Niagara Falls, Galt and Peterborough reported the construction of new buildings for manufacturing plants or alterations and additions, with operations being hampered to some extent by lack of labour. A building boom was reported at Timmins in the Cobalt district and mining companies were also employing a considerable number of carpenters. Many other Ontario cities reported activity in building.

Reports from western cities showed continued improvement in building. Edmonton reported but little being done, though building trades were employed in other lines, but other western cities such as Brandon, Calgary, Saskatoon, Regina, Prince Albert and Medicine Hat all reported active or fairly active conditions in building. Railway construction continued fairly active in Northern Alberta and in British Columbia. Work on portions of the Edmonton, Dunvegan and British Columbia Railway and on the Pacific Great Eastern was continued, men for construction work being reported scarce. Considerable ballasting and repair work was done on eastern railways and transcontinental lines.

Most lumbering districts reported continued activity, although in Northern Ontario considerable damage was done to the industry through ruinous forest fires which destroyed timber and sawmills. At Newcastle, N.B., mills were very active and pro-

Lumbering

vided a great deal of work for unskilled labour. In the St. John district, also, active conditions prevailed. Quebec reported mills running to capacity, and on account of a late start owing to high water likely to run on well into the fall. At Three Rivers mills were busy. At Prince Albert, Sask., mills were running day and night and were expected to continue so until freeze-up. Edmonton reported an increased demand for all classes of finished lumber and higher prices. At Fernie, despite the difficulties of fires and floods, the outlook was reported favourable. Post and pole dealers reported the demand keeping up well. New Westminster reported mills active, with a good demand for lumber and shingles.

Crop prospects at the end of the month seemed to indicate good average yields in most districts.

Agriculture Hay was a very heavy crop in practically every district from which reports were received. Western grain reports were favourable and fruit prospects were excellent.

Farm labour was reported scarce in nearly all districts. Points in the Maritime Provinces reported men hard to secure, and in one or two places in Ontario farmers were reported to be paying as high as \$3 per day and board for experienced help. In a number of districts men were released from local military units to assist in haying and other agricultural work. In the Western Pro-

vinces, also, farm help was scarce, and steps were being taken by various bodies to ensure a supply. Calgary reported the United Farmers' Association was gathering information as to the number of men available and the number required for the harvest. No serious shortage was reported in this district. The Provincial Bureau at Regina was opening its office about the end of the month for the procuring of farm help. New Westminster reported that many men were leaving that district for work on the harvest fields of the Prairie Provinces.

Fishing continued fairly active. At Yarmouth favourable conditions prevailed, and Charlotte-

Fishing town reported fishing brisk, with large catches of cod and haddock coming in. Sydney reported that apart from lobsters fishing was not good this year; that the catch of haddock was only 40 per cent of last year's, codfish 60, and mackerel 20 per cent. Lobsters were better than last year, though fewer people were engaged in the business. At Port Arthur fishing was active. New Westminster reported the sockeye season late, commencing July 20. Fishing the early part of the month was poor, but improved later. Cannerymen paid 50 cents per fish, but not enough were being taken to enable canneries to run steadily. Prince Rupert reports were favourable, but Nanaimo reported fishing quiet. Reports from the various whaling stations indicated a very good season.

III.—LABOUR AND INDUSTRY IN THE PROVINCES AS INDICATED IN REPORTS OF CORRESPONDENTS AND OTHER SOURCES

THE active industrial conditions reported in the different provinces last month were on the whole continued during July. In the Maritime Provinces the coal mining industry was active, though short of miners, and outputs in some mines were decreased on this account; building was active, and fishing

showed a good season. Sawmills ran steadily with capacity crews. In Quebec manufacturing was active in most lines, with a shortage of help in a number of localities. Lumbering continued active. In Ontario the chief industrial centres reported a continuation of the activity of the previous month, with a steady

demand for factory and farm help. Women workers also continued in demand. Activity in mining prevailed in the Cobalt and Porcupine districts. In the Western Provinces industrial conditions generally were satisfactory. Building improved in a number of localities and crop conditions were favourable. There was an active demand for farm labour and women help. In British Columbia there was an improvement in coal mining on Vancouver Island, but in the Crow's Nest Pass unsettled negotiations between miners and mine operators in regard to a war bonus and several pit-head strikes threatened to seriously affect the industry in that district. Fishing towards the end of the month became fairly active and canneries were commencing to be busy. Metal mining everywhere continued active.

Nova Scotia

At Halifax building operations were brisk and labour in good demand. In addition to larger contracts, many new residences were under construction. Some contractors reported a difficulty in securing skilled mechanics. Good progress was made at the ocean terminals and also on the new concrete pier for the Furness-Withy Steamship Company. Prohibition went into effect June 30, closing about 40 licensed saloons and throwing out of employment about 150 men. Farmers were complaining of the shortage of help. Retail merchants reported trade fully up to the mark of an average year.

At Sydney all classes of labour were well employed, and except in the coal mines the labour supply was equal to the demand. The larger industries continued active without interruption and with good prospects ahead. The steel trade was exceptionally busy in all departments, and reports from Sydney and Sydney Mines were all good. The coal industry continued active, although the daily output was still low owing to a scarcity of unskilled labourers. The building trades were quiet, but with

sufficient work for those who were left in the district. Woodworkers were fairly active. Rail and water transportation was heavy. Apart from lobsters, fishing was not good this year. The catch of haddock was only 40 per cent of last year; codfish, 60 per cent; while mackerel ran as low as 20 per cent of last year's catch. Lobsters were better than last year, but fewer people were engaged in the business.

At Westville general labour conditions remained unchanged. The supply in all classes fell far short of the demand. It was practically impossible to procure unskilled labour and farmers were being seriously handicapped in the harvesting of their crops on this account. Railway traffic continued very busy, but ample equipment and a large working force insured prompt deliveries. Wholesale and retail trade continued as busy as last month, and without exception an unprecedented volume of business was reported. All coal mines worked full time, but still the supply failed to fill the demand. Owing to the increased cost of mining the companies operating in this vicinity have advertised an advance of 25 cents per ton on the price of coal, and a further advance is expected. The Intercolonial Coal Mining Company resumed work on a small scale at the old Acadia mines at Westville. A small mine at Coalburn, which has not been operating for a few years, was also being put into shape to resume. Shipments from the Intercolonial and Acadia companies continued about the same as last month.

At Amherst the general condition of the labour market was somewhat slacker about July 1, but with the starting of hay-making every available man could find employment at good wages.

At Truro all classes were steadily employed. There was a brisk demand for unskilled labour and farm help. All industries were busy and a textile factory advertised for youths. The building trades were steadily employed. Railway operators, all branches, were working full time. Lumbering oper-

ations were especially brisk. Midsummer trade, both wholesale and retail, was satisfactory, as were bank clearings and customs receipts. There was an upward tendency in the prices of several commodities, chiefly farm products. At the end of the month a further increase was announced in soft coal.

Prince Edward Island

At Charlottetown all classes of labour, especially carpenters, were busy. Dock labourers were active. Fishing was brisk, and large catches of cod and had-dock were coming in.

New Brunswick

At St. John the trades were well employed except ship labourers. Building operations of some importance were being carried on in the city and suburbs, the supply and demand of labour being about equal. Customs duties, inland revenues and bank clearings all showed increases. There was a marked shortage of farm labour. Sardine fishing has been poor this season, only about 75 hogsheads being taken in local weirs. The heavy rains during June made good stream driving and logs that had been stranded were in safe waters.

Labour and commercial conditions at Moncton were of a highly satisfactory character, maintaining the standard of activity reported in the previous month and well up to the average of the corresponding period of last season. In nearly all local manufacturing plants, particularly active conditions prevailed, and in three factories night shifts were employed in the effort to increase their output sufficiently to meet accumulated orders. The Atlantic Underwear Company and Marvin Biscuit Factory, both large employers of female labour, were advertising for additional help. In the Canadian Government Railway shops very active conditions prevailed owing to the large amount of repair work on hand, together with the construction of a large number of new vans and cars,

and a considerable amount of overtime was made by employees. All classes of railway operating help were especially active owing to the large number of specials required to handle increased freight and passenger traffic. Building operations continued active and a large number of residences were in course of construction besides much alteration and repair work. Civic work expected to furnish employment to a number of labourers for about three months. Work upon the sub-structure of the Petitcodiac bridge was well advanced; the bridge will be ready for superstructural work in September. Real estate was active, and the number of sales much in excess of last year. June customs receipts showed an increase. Retail trade fell off during the month considerably owing to the departure of a large number of citizens to the various summer resorts. Wholesale trade remained satisfactory. Cheese, lard, bacon, sugar and molasses were the principal staple articles which reached advanced prices and showed no sign of decrease. Farm labour was very scarce and in some sections could not be obtained.

At Newcastle all classes of labour were well employed, noticeably men employed along the waterfront where a large number of steamers and sailing vessels were loading lumber for the United Kingdom. Building trades also were exceptionally active. The new sawmill (the largest in the Miramichi) of the Fraser Lumber Company at Nelson commenced operations July 10, and one-half of the mill was in operation. Machinery was being installed, and when completed this mill will employ about 300 men. Farm labour was very scarce. Fishermen have had a very good season. Large catches of salmon were taken and disposed of at the same price as last season. Lumber mills were especially active, and provided ample work for unskilled labour. Almost the entire output is being shipped to the United Kingdom. All other local industries were working steadily.

At Fredericton very prosperous conditions prevailed and during July there was little unemployment. The building trades were all well employed, while machine shops and manufacturing plants were well stocked with orders. Farmers were busy with hay-making and reported a heavy crop. They reported a scarcity of labour, however, and expected to be somewhat backward in gathering the crop. Wholesale and retail merchants reported trade very good.

Quebec.

At Montreal activity was continued, and in some lines a shortage of labour was reported. Most manufacturers of domestic textiles had orders for some time ahead, and were laying the foundation for a continuance of their activity so far as possible after the war. Tan-ners complained that the shortage of labour was seriously affecting their out-put, and their prices increased from month to month. Boot and shoe manu-facturers usually begin laying off hands in May, but every mail was bringing or-ders from jobbers and retailers so that they were kept working to capacity. The cutting off of German supplies of hardware and the fact that a large number of manufacturers were making other articles resulted in many lines of hardware being difficult to obtain. Orders for paints and oils came in daily during July. The railroads all report-ed exceptional prosperity, and a large number of ocean ships reached Montreal harbour during July. Although a break in the sides of the Lachine canal inter-rupted traffic for ten days, the grain brought down was 122,503 bushels more than for July, 1915. Customs receipts were almost a million dollars in excess of the total for July, 1915, and inland revenue receipts were \$35,000 in excess of the same month a year ago.

There were no changes affecting woman workers. The large stores gave their employees the usual weekly half-holiday on Saturday afternoon, which

will be continued during August. Sum-mer trade has been good owing to the extent of tourist travel. Restaurants and laundries have been particularly busy on account of the unusually hot weather. The Bell Telephone Company has leased a large country house as a summer outing camp for its young wo-men employees. Two new milk stations have been inaugurated within the past month. The latest step taken by the Municipal Health Department was the establishment of open air nurseries. Owing to the many efforts made of late years to combat infant mortality, the latest figures compiled show a decided improvement.

At Quebec the demand for labour in the building trades was very good. Fac-tories were working full-handed and full time. About 70 builders' labourers in the employ of three contractors demanded an increase of 5 cents per hour, and, failing to obtain it, went on strike. Some of them were replaced. Employees of other firms remained at work on the promise that if the increase were made general their employers would grant it. Farmers were busy hay-making. Saw-mills were running to full capacity. They made a late start this spring, due to too much water, and were trying to catch up. The season's cutting will in most cases go on until late in the fall.

At Sherbrooke all kinds of labour were in great demand. Several large manufacturing establishments were building additions to their plants and a number of new houses were in course of construction. Farm labourers were very scarce. Sawmills were all busy and prices for lumber improved. The asbes-tos mines at Thetford and Black Lake were running full time, also the chrome iron mines. Copper mines at Eustis were busy and manufacturing plants in all lines were active.

St. Hyacinthe reported labour condi-tions satisfactory during the month. There was considerable new building and repair work, and the various local industries were busy. Unskilled labour was actively employed, both on

city and private work. Business, both wholesale and retail, was good, with bright prospects for the fall trade. A shortage of farm help was anticipated for the harvest season in spite of the high wages being offered. All crops looked well, and potatoes in particular were expected to give a large yield.

At Three Rivers the general condition of the labour market was very good and showed a marked improvement over the corresponding month of last year. Several establishments were increasing the capacity of their plants. Activity prevailed in every lumber mill and in nearly all factories. Fishing was rather quiet.

Hull reported farmers had much difficulty in finding men for the harvest in spite of the high wages offered. The hay crop was about double the average. Labour, skilled and unskilled, was well employed, with wages higher than before the war. Trade was very active. Mills and factories were working full time.

In St. John's and Iberville manufacturers were running full time and with full staffs. There was little to do in the building line, but men of that trade found work in the factories.

At Sorel there was a great demand for both skilled and unskilled labour. All industrial establishments were very busy, and the building trades were better employed than for the same period last year.

Ontario

At Toronto labour conditions during July were similar to those which prevailed during the previous month, except that the shortage of labour in many lines was considerably more pronounced. The scarcity of skilled labour was especially noticeable in the metal trades, and female labour was being employed more extensively in some branches. The building trades were active. House building was quiet, but a number of large commercial and industrial structures were in progress or shortly to be started. Woodworkers and

upholsterers were active. Piano workers had plenty of work with a shortage of men, and printers and bookbinders had steady employment. Leather and harness workers were active. Stenographers and other female office help was much in demand owing to the number who had obtained positions in banks and brokers' offices. Domestic help was very scarce. Railway and street railway employees, teamsters and others engaged in transportation were busy with a shortage of men in nearly all departments. Firemen, freight handlers and truckmen were especially scarce. Local railway officials engaged Chinese and women for the work of cleaning passenger coaches. Sailors, longshoremen and others engaged in navigation had an active month. Farmers were busy haying, the crop being unusually heavy and wheat harvesting was begun. Garment workers were busy, with a shortage of female help. Boot and shoe and hat and cap workers were active. Furriers had plenty of work towards the end of the month. Scarcity of help for the work of harvesting was general.

Women were well employed and there was still a demand for both experienced and inexperienced women for factory work. Skilled operators, especially those working on women's wear and in clothing factories were in demand. Knitting, overall, whitewear, box and bag factories were active, in fact no industry was reported slack. Laundries were busy, owing to hot weather and boat traffic, and drug and perfume companies were preparing for their Christmas orders. Canning establishments had a busy month. School girls were employed for short periods in picking over fruits. Workers in the boot and shoe industry were employed full time and at satisfactory wages. In response to an appeal from Toronto housekeepers a new market was opened in North Toronto as an experiment. This was expected to prove a great convenience to residents in that section of the city, as well as to farmers and producers. Twenty-five employees, half of them

women, were thrown out of work as the result of a fire in Fordell-Callendar Company. The firm expected to open again in about two months.

At Hamilton there was a steady demand for both skilled and unskilled labour. Ice dealers throughout the city were being put to great inconvenience because of the scarcity of drivers. Notwithstanding the fact that the ice-men were being paid an average of \$18 or \$20 a week, about \$9 more than they received last year, one company had five teams standing idle. Local dealers were not able to give as good service as usual because the majority of the men were inexperienced. Other firms who employ teamsters were also very short-handed, one cartage company had 45 teams standing idle and another 27. Owing to the scarcity of labour the city was doing only necessary repair work. Building trades were all active and all tradesmen were employed with the exception of the electrical workers who were still on strike. The hay crop in the district was a record crop, $2\frac{1}{2}$ to 3 tons to the acre being reported in many cases. Farm help was very scarce. The fruit crop was fair, considering the lack of rain; berries, plums, cherries and peaches being a fairly heavy crop. The fall wheat crop promised to be very large and equal to that of last year, which was a banner year for wheat. Two large farm implement companies reported a heavy year. The demand for haying machines and repairs has been strong, and for grain machinery the stock has been entirely sold out, and with the shortage of labour new orders cannot be filled promptly. Canning factories were very busy and reported the Canadian trade showed an increase of 35 per cent over the same season last year. Railway business still continued active with increased freight and passenger business. Electric lines also showed heavy traffic. The Inland Navigation Line reported both freight and passenger business the best that they have ever had

at the port. Inland revenue and customs receipts for June showed increases.

Great industrial activity continued at Niagara Falls during July. A scarcity of unskilled and farm labour was a feature of the month, and farmers, building contractors and other employers were hampered in consequence. Railway traffic, wholesale and retail trade and financial conditions were good. New buildings of several manufacturing establishments were completed and work on others was being rushed. Lack of labour delayed the erection of one factory. Hay yielded heavily, grains promised well, and fruit crops were good. Berry-pickers were in demand. The piece-work rate for picking strawberries, which had been a cent per "quart box" for many years, was raised to a cent and a half. All sorts of agricultural labour was in great demand. Manufacturing concerns continued busy. Seventeen reported "busy" or "very busy," and five wanted more operatives.

At Welland industrial conditions continued good. Labour generally and farm labour particularly was in demand. Building permits and customs receipts continued to show increases.

At Ottawa a scarcity of labour was reported despite the fact that female workers were being employed as much as possible in many instances. Particularly marked was the demand for men to help with the crops, and local military corps have granted leave of absence to members on this account. Skilled labour of all kinds was in demand, particularly in view of the number of workmen to be needed in connection with the rebuilding of the Parliament Buildings. It is estimated that in the rebuilding of the Parliament Buildings, from three to four hundred stonecutters will be employed for about two years. The demand was increased by the call for labourers, skilled and unskilled, for local forestry and construction battalions, as well as for rivermen and boat workers. The build-

ing trades were particularly busy, as were the iron trades and the pulp and paper makers. In general, conditions in July were much improved as compared with June. Following negotiations by a Board of Conciliation requested by the street railway employees, the latter have been granted a nine-hour day and a wage increase of 3 cents per hour. The rate formerly was 27 cents per hour for a ten-hour day. A request by civic labourers for a wage increase of 5 cents per hour has been made. The present rate is 25 cents per hour.

At Brockville all classes of labour were well employed and some industries found it difficult to obtain a sufficient supply. Unusual activity prevailed in the steel, iron and brass trades; other factories were fairly active. Railway traffic was unusually brisk, also steamboat traffic. Farmers found it difficult to obtain farm help and were offering as high as \$3 per day with board.

At Kingston all kinds of outside work was suffering from lack of unskilled labour, more especially municipal work, and it was thought that some paving work, which was laid out for this year, would have to be postponed until labour was more plentiful. Exports to the United States for the last six months showed a large increase over the same period last year. Continued fine weather improved conditions in the rural districts. There was a bumper crop of hay, but it was expected to be offset somewhat by the fact that little corn was sown, which will necessitate the use of hay for fodder. The early potato crop was practically a failure. Fall grain had progressed rapidly and promised a good crop. Pastures were keeping up well and the local factories reported large quantities of milk.

At Belleville there was employment for all who desired it and employers had little or no difficulty in securing the necessary help. Manufacturing concerns were active, some of them working day and night. Business generally

was good. While city building operations have not been as extensive as in former years, building trades were busy.

At Peterborough all manufacturing concerns were very busy, but found it difficult to get both skilled and unskilled help. The civic works department also found it difficult to get sufficient men. Building trades were very active. While there were not many dwelling houses being erected, a number of factories were making large extensions to their plants and a considerable amount of repair work was being done. Shoe repair men have advanced prices on their work, claiming they were losing money owing to the high price they had to pay for leather. Farmers were finding a scarcity of farm help. Sawmills were running to full capacity and flour and cereals mills were particularly busy.

At Galt and adjacent places labour was in demand. Several new industrial plants were in course of erection, as well as new schoolhouses and a telephone exchange, the work being more or less hampered by lack of skilled mechanics and labourers. Textile and woollen mills were still very busy.

At Brantford there was practically no change except in the demand for agricultural labour which was very strong. Farmers were offering from \$75 to \$100 per month for help during the harvest. All industries were running full time and boys out of school for the holidays were being employed.

At Berlin factories were all very busy with a shortage of mechanics in most of them. Furniture, button, boot and shoe, glove, rubber factories, twine factory and tanneries were all busy and looking for help, while the Dominion tire factory and Pollock factory and the breweries of Berlin and Waterloo were working overtime. The robe and clothing factory was the only industry working five days per week and that only the last few weeks of the month. Shirt and collar factories were very short of female operators. Carpenters were in demand and labourers were all

employed and were much in demand. Bicycle workers, sash and door and planing mill employees and cigarmakers were all well employed. Wholesale trade was very good and freight traffic heavy. Most farmers were short of labour and as high as \$3 per day was offered for help.

At Guelph employment continued active in practically all occupations, with a shortage of labour in many lines and wage tendencies upward. Machinists and iron workers generally were in demand and a scarcity of labourers was reported. Farmers reported a decided shortage in farm help. Customs returns for June showed an increase over the corresponding month of last year and trade generally was satisfactory.

At Stratford there was a strong demand for all classes of labour, especially in some branches of manufacturing and the building trades. The paving of streets and construction of sewers provided employment for unskilled labour. Customs and inland revenue returns showed increases. Manufacturing industries were active.

At Woodstock there was a general scarcity of all kinds of labour. There was an urgent demand for various skilled mechanics, and factories were reported ready to utilize a number of unskilled labourers if they could be had. Wagon factories reported business brisk. Woodworkers of all kinds were in demand, also blacksmiths and painters. Manufacturers of organs and pianos were also busy and in need of cabinet makers, bench-hands and unskilled labour. The furniture factories were utilizing all the labour they could secure. Manufacturers of stoves and furnaces were preparing for a heavy fall trade. Moulders and stove-mounters were especially needed. Farmers who were busy with haying also complained of a scarcity of labour. Generally speaking, crops were excellent. Shopkeepers reported business good and money fairly plentiful but help was scarce.

At London labour continued to be employed to the fullest extent. Civic

work was being pushed ahead rapidly, and a large percentage of the permanent pavements, sidewalks, curbs, gutters, etc., to be laid this year were already completed. Very little was being done in the building trades. Factories and foundries were working to fullest capacity. Railroads continued very busy, and summer passenger traffic was better than ever. The city fire department received various increases in wages, and printing pressmen received an increase of \$1 per week each. London Typographical Union signed a three-year agreement with the employers providing for various increases.

At St. Thomas labour was well employed. There was slightly less activity in railway shops, particularly in the Pere Marquette shops, where an accident to the dynamos threw a considerable number of men out of work, but railway men generally were busy. The building trades appeared more active than during the previous month. There was a steady demand for unskilled labourers; farm hands were also in good demand. The property of the Noble Biscuit Works was sold to a syndicate of Toronto men who will re-open the plant for the manufacture of candies. The Canadian Iron Foundry reported a scarcity of labour and that employment could be given to 25 men were they available.

At Chatham labour conditions were satisfactory, there being a great demand for unskilled labourers owing to the large amount of city work. The building trades were very active. Railway freight traffic was very heavy, and all factories were running to full capacity. Merchants reported trade satisfactory, with sales in advance of 1915. Rents remained firm with few vacant houses. While there were several changes in wages, contractors and manufacturers were compelled to advance wages to retain their men. Labourers benefitted greatly, many of them receiving as large an increase as skilled mechanics.

At Windsor there was good demand in all lines for labour, and at the end

of the month the supply was sufficient to meet all requirements. Exceptional activity was noticeable in the building trades. The demand for these trades was well supplied. Imports for June showed about 300 per cent increase over the same month in 1914. Factories were very active in all branches, with the exception of the Ford Motor Company, which has been taking the annual inventory, a number of employees being laid off for two or three weeks.

At Owen Sound the labour market during July was fairly active. Hay crops were heavy and farm labourers scarce. Factories found it difficult to obtain a supply of suitable workmen. Retail and wholesale trade was generally good. In some cases retail trade was reported 20 per cent better than for the similar period last year. Building was quiet, but those engaged in the trade found work elsewhere or in other lines.

At Orillia all kinds of labour continued to find steady employment. In fact, in almost every department of industry the difficulty was to find labour to meet the demand. On the farms the situation has been relieved somewhat by the soldiers who have been given furlough to assist in the harvesting.

There was a greater daily tonnage of ore being mined in the Cobalt, Porcupine, Boston Creek and Kirkland Lake camps than at any time in the history of Northern Ontario. Many of the mines in Cobalt and at Porcupine were making changes in their mills or building additions that will increase the milling capacities. In this connection may be mentioned the two largest operators in Porcupine camp, the Hollinger and the Dome. Some of the mining companies in the Porcupine camp have been obliged to pay higher than the average rate of wages in order to secure and hold the help required. Of the various trades carpenters appeared to be in the greatest demand. There was great activity in building in Timmins and district, and towards the end of the month the Abitibi Power and

Paper Company was advertising for 50 carpenters at Abitibi Townsite. The various mining companies that have mill construction and building under way were also employed a considerable number of carpenters. There was at times some evidence of a scarcity of miners, but recently numbers of miners from other camps have come in.

At Sault Ste. Marie the commencement of the new power canal was giving employment to every man wanting work. Workshops were all full handed and on full time. There was an improvement in all lines, especially in the foundries and machine shops.

At Port Arthur and Fort William all available labour was employed and probably more could have been employed if available. This was accounted for by the fact that all machine shops, elevators, freight sheds, sawmills, were on their summer run, and also by the reduced supply of available workmen. Many men thrown out of employment in their regular occupations were working on the land and on occasional repair and jobbing work, particularly amongst carpenters, plasterers and builders' labourers. The erection of elevators in both Port Arthur and Fort William was affording employment for many labourers and rough carpenters, and sawmills were operating steadily. Fishermen were busy.

Manitoba

At Winnipeg industrial conditions generally were very satisfactory. Building trades showed improvement and other skilled trades showed marked activity. Agricultural conditions were good and satisfactory arrangements have been made for the harvesting of the grain. Several trade disputes affecting printers and garment workers occurred during the month. All the disputes were brought to satisfactory conclusions through the efforts of Mr. Edward McGrath, secretary of the newly formed Bureau of Labour of Manitoba.

Employment for women during July was reported record breaking in the de-

mand and numbers actually employed as compared with one, two and even three years ago. The Winnipeg Free Employment Bureau was unable to fill many vacancies for female domestic labour; the bureau has, however, been able to supply the demand for waitresses and for factory help, which has not been large. Stores were busy, and the usual dropping off during July has not occurred. Good saleswomen were in demand, also office girls and mail order girls. Stenographers were so much in demand that practically every inexperienced stenographer found at least temporary employment. Bookbinders were somewhat slack, but prospects were very bright. The number of women employed by the Manitoba Government Telephones in the city has increased, there being 581 on the payroll at the end of the month. Nurses were fairly busy. The Department of Education states that the demand will be brisk for public school teachers, especially in the country districts. Some of the high schools in the city will likely be closed, however, owing to decreasing enrolment following the unusual demand for young girls and boys in various industrial activities.

At Brandon the demand for all kinds of labour continued good and for building tradesmen brisker than during any month since the commencement of the war. There was a steady demand for farm help and with the splendid crop prospects it was expected a severe shortage of harvest help would be experienced.

Saskatchewan

Regina reported labour well employed. Carpenters were busy, a large number of men being wanted for country work. Bricklayers were not so busy, although nearly all working; their wages were increased from 70 cents to 75 cents per hour on July 1. Wholesale houses reported a steady amount of business. Crops were looking well. The prospects were that harvest help would be hard to secure. The Provincial Bureau

of Labour opened its employment office for the securing of farm help on August 1.

At Moosejaw there was a good demand for labour and men were hard to obtain. Nearly all employers of labour found the supply small and with the approach of harvest additional efforts were being put forth by farmers to obtain help. Hotels, restaurants and theatres had an extremely busy month. There was a considerable quantity of grain from last year's crop still in the hands of the farmers and this was being marketed to make room for the 1916 crop. Indications pointed to only an average crop. During June the growth and rainfall was encouraging and sufficient, but hot weather in July affected the land sown to stubble and the crop on lighter lands. In addition there are fewer berries to the head than last year and the heads are not filling out as well. Rust had not made its appearance to cause any serious damage as yet. Hail has caused considerable loss. The oat crop will be light, and barley, though only a small acreage was sown, will not yield a very heavy crop. A certain amount of ballasting was being done by the railroad companies. Practically no construction work was projected.

At Prince Albert lumber mills were still running day and night shifts. Sewer and water extensions gave work to a number of men. Alterations and repairs gave a fair amount of employment to building tradesmen, but there was no demand for help in this line from outside the city. It was not expected there would be any shortage of farm help for the harvest.

At Saskatoon labour conditions were active in the usual lines, though there could not be said to be any serious labour shortage. Some street and paving repairs were being carried on. Some warehouses were being erected and quite a few elevators were being built in the district. Local business, wholesale and retail, continued brisk. Customs receipts were about double those of a year ago. Plenty of rain and warm weather

has given a good stand of grain and prospects for a good crop were excellent. Some hail damage was recently reported.

Alberta

At Medicine Hat there were practically no idle men and a scarcity in some lines. Retail and wholesale merchants reported business good. Building trades were fairly busy. Bank clearings and customs returns showed increases over those of the previous month. Railway traffic was reported brisk in all lines. Reports received from the country districts indicated a large grain crop again this year.

At Lethbridge there was a demand for labour in most lines with the exception of the building trades. The demand for labour on farms was being met, although farmers had difficulty in securing experienced help. There was a great demand for female help that was not being met. Coal mining was very active. All the mines were working full time, but were short of miners. Farmers were busy haying. Crops were all in splendid condition.

At Calgary July brought an increased demand for labour and there were but few unemployed. Some buildings were commenced, and there was also a demand for labour from outside points. Conditions were on the whole about normal, and with the approach of harvest a continued demand was expected. The United Farmers' Association was obtaining information from the district as to the number of men available and number required for the harvest. There was no serious shortage of labour reported. The Calgary Petroleum Products Company has erected a refinery at the oil fields and started operating July 21. No settlement was reached between the mine operators and mine workers of the district, the miners' request for an increase being still under consideration. Wholesale and retail merchants reported a slight improvement in trade. The Associated Charities reported giving relief to 44 British

families and six foreign families. Crop conditions were excellent.

At Edmonton labour generally was more fully employed than at any time for the past two years, and much better than for the corresponding month last year. In the building trades very little was being done, but the surplus help was being absorbed in other lines. Farm help was in good demand, and better wages were being offered than a year ago. Garment workers were well employed. Under an agreement entered into with the city the Alliance Power Company took over the city power plant July 15 for a period of five years, and made a reduction in the number of employees. Freight shipments increased during the month. Wholesale and retail trade was good. The annual conference of the Western Canada Typographical Unions was held in Edmonton during the month. Owing to a new schedule put in operation by the Municipal Street Railway some 40 employees were thrown out of employment. Crop reports were very favourable. The growth is not as heavy but the yield is expected to equal that of last year. The demand for all classes of finished lumber was good in the country. Prices on lumber increased during the month. Ballasting was progressing favourably on the Edmonton-Dunvegan Railway; 300 men were reported working on the extension from Spirit River to Pouce Coupee. Track laying was being done in the yards at the town of Peace River.

British Columbia

At Fernie labour was well employed, there being a general scarcity of work-people in nearly all local industries. Conditions in this respect were completely reversed as compared with the corresponding month last year. Complications have arisen in the coal mining industry, which have not been reconciled, and an acute condition of unrest prevailed in the industry throughout the entire district. There was increased industrial activity in local public works,

including the restoration of the city's main water supply. There was little or no construction under way and the building trades were quiet. Changes in the rates of wages during the past month became effective in some localities, but the proposed increase offered by the coal mining operators in lieu of the 10 per cent war bonus demand was rejected by an overwhelming majority. Negotiations with a view to an amicable settlement of this dispute have been in progress practically continuously since July 10, but a series of pit-head strikes has prevented any success in this direction. While no increases have been reported in the lumbering industry, the shortage of labour in this district, together with the advent of the harvesting season in the prairie provinces, where higher rates prevail, would, it was expected, force employers in the lumbering industry and its branches to advance rates in order to retain or augment the numbers employed. In lumbering, despite the difficulties which had to be contended with in the form of floods and fires, the outlook was favourable for a brisk demand. The labour shortage, however, has had a tendency to curtail activities. Post and pole dealers reported that the demand has kept up remarkably well all season with no prospect of diminishing. The demand for coal and coke from the mines of the district was extremely brisk, as at this season of the year orders are placed for supplying storage coal for the coming winter.

At Nelson there was a slight improvement in labour conditions and building prospects for the coming month appeared brighter. The wholesale and retail merchants reported business better than for some time past. All sawmills in and around Nelson were running to full capacity and the demand for lumber was increasing. Mining was still on the increase, and some prospectors were taking advantage of the new legislation providing for the building of trails and roads to mining districts. The zinc output at the Consolidated Company's electrolytic plant at Trail

has been increased. Additions have been made to the already large plant, and with the increase of population additions have been made to the school. The Blue Bell at Riondel, B.C., has had the damage to its dam and pipe line repaired and has resumed work. The Granite-Poorman mine near Nelson has been taken under bond by Spokane capitalists who are employing a large number of men and making extensive improvements.

At Vancouver there was a demand for men, yet there was some unemployment, although it was not nearly as extensive as at the same period of the two previous years. In the city itself the labour demand was distinctly quiet, but for work at up-country points, especially in the nature of logging and railroad construction there was a steady demand for men. Advertisements to this effect were appearing continuously in the newspapers, and on the labour bulletin boards at the employment agencies and the city relief offices. The chief slackness in the city itself was among building tradesmen and the less transient workers. In the lumber mills there was continuous activity. Mill men all reported heavy demands from the prairies for manufactured lumber, and that they have orders booked which will keep them busy at capacity output well into the winter, with prospects of that condition continuing through to next spring. This they attribute to good crop prospects. One result has been an increase of wages to mill workers; the figure of this increase is set by large mill owners at 50 per cent over last winter's rates. Orientals in particular are participating in this rise; men who six months ago were earning 75 cents and \$1 per day, now drawing from \$1.75 to \$2 per day; mills are running 24 hour shifts. An official of the Department of Agriculture in Saskatchewan was at Vancouver for the purpose of arranging for harvest hands to go to that province and announced that 20,000 men were needed. The city relief officer informed him that he

did not anticipate being able to secure many men from the city, but he thought about 500 might be secured from the neighbouring farming districts. Relief figures show a substantial decrease, 125 families being maintained at a monthly cost of \$1,200 and 62 incapacitated single men at a monthly cost of \$750. As the result of a shortage of lumber carrying vessels there is considerable building of wooden lumber carriers under way at North Vancouver. It is announced that later the building the steel vessels is to be undertaken. There has been some demand for coal miners for the Crow's Nest Pass district. The sockeye salmon run has started, but catches have been small. It is announced that the New England Fish Company, which was burnt out recently, will rebuild in Vancouver instead of at Prince Rupert as was considered likely. Business conditions generally in the city were quiet. Some war work was going on, but civic expenditures were being kept as low as possible.

Labour conditions for women continued to improve, a slight shortage of help being reported in two or three lines of work. This shortage was due to an increased demand, coupled with the fact that many women previously working at such trades during the period of unemployment and depression of last year left the city and their places had not been filled with newcomers. The opening of a restaurant and cafeteria by the Hudson Bay Company in its new building provided employment for some 30 waitresses, while increased sales provided openings in other of the firm's departments for sales clerks. Reports from employment bureaus, free, philanthropic and commercial, show that the supply of domestic help has decreased, some difficulty being experienced in filling positions offered, neither experienced or skilled help being available to fully fill the demand. A slight increase in wages was also noted. Tailoresses, milliners and dressmakers were fairly well employed, also sales clerks. A number of women went out of the city to pick

fruit, the fruit growers failing to get as many women as were needed. Boys not at school because of the vacations were also engaged and sent out to the fruit growing district some twenty miles from the city. Laundry workers and boot and shoe workers were fully employed, and overtime was worked in the can making industry. For the first time in nearly two years the reports from typewriting companies operating employment bureaus showed an increased demand for stenographers and office help. So many stenographers having left the city during the prolonged depression, the increased demand was not easily met, especially for experienced help.

At New Westminster labour conditions showed considerable improvement over those of June and there was practically no unemployment during July. White labour has been gradually becoming scarcer; many men have gone south across the boundary and a number have gone to the prairie provinces for the harvest, so that although there has been no marked opening of new work there were few idle men. Some have found employment among farmers, others in fishing on the river. Fishing during the early part of the month was very poor, the sockeye season being late and very few spring salmon were taken. Many of the fishermen quit the river and sought work in the lumber camps and mills. The sockeye began to arrive about July 20, and though only a few were taken at first the catch was better later. The canners opened the season by paying 50 cents per fish, but there were not enough fish to enable the canneries to run steadily. Lumbering was going on briskly, with a good demand for lumber and shingles.

At Victoria labour conditions in all lines of industry (with the exception of the building trades) showed more improvement during July than for many months past. Work in the shipyards has been brisk with good prospects for the future. Good progress was being made with establishing the new shipyard for

building wooden, lumber-carrying vessels; 50 mechanics were employed and the number was being increased weekly. Reports from the various whaling stations indicate that the present season will be a record one; up to the end of July over 200 whales were taken. The lumber industry continued in a healthy condition, and should the crops in the Prairie Provinces prove as good as expected it will benefit the lumber industry very materially this coming fall and winter. Work on the Patricia Bay branch of the Canadian Northern Railway was almost completed, and trains were expected to be running in a short time.

At Nanaimo the labour market showed a marked improvement over last month. Some of the coal companies and some logging camps wanted men. Building trades, however, were quiet. There were no changes in rates of wages or hours of labour during the month, but the men of the Western Fuel Company are meeting soon to discuss a new agreement as the present one expires in September. Fishermen were quiet.

At Prince Rupert the fishing industry continued active and the cannery men were busily engaged with the salmon pack for the season, although the run was later than in previous years. Reports from mining centres adjacent to Prince Rupert continued favourable. A number of holdings were bonded or changed hands. The tourist trade between southern ports and Alaska was at its height; Prince Rupert was being made one of the ports of call by nearly all the larger boats. Freight shipments showed a slight increase. During June 1,778,000 pounds of halibut were received, giving Prince Rupert the lead for the month on the Pacific coast, Seattle being second. The Booth Fishing Company has opened its new warehouse on the Grand Trunk Pacific wharfs. At Ocean Falls about 375 men were employed and this number will be increased as fast as the work can be done; it was reported that 1,000 men will be employed if they can be secured. Advertisements were running in the local newspapers for carpenters to go to Ocean Falls at 40 cents and 45 cents an hour.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS DURING JULY, 1916

DURING the month of July the report was received in the Department of the Board of Conciliation and Investigation appointed to deal with the dispute between the Ottawa Electric Railway Company and its employees. The report was unanimous and was to the effect that an agreement had been signed between the parties concerned, effective until June 30, 1918, and from year to year thereafter unless and until either party desired to change and notified the other party.

Applications Received.

An application was received on July 3 on behalf of the employees in the

Maintenance-of-Way Department of the Canadian Northern Railway System east of Port Arthur, including trackmen, bridge and building employees and water supply employees, members of the International Brotherhood of Maintenance-of-Way Employees. The number directly affected by the dispute was given as 1,000 and 3,000 indirectly. The application related to a demand on the employees' part for the adoption of a proposed schedule of rules and wage rates governing the service of maintenance-of-way employees on this portion of the Canadian Northern System. The establishment of a Board was withheld until July 22 to permit of a resumption of direct negotiations. As the latter did not, however, dispose of all of the

points at issue the Board was authorized on that date, Mr. G. D. Robertson, of Welland, Ont., being appointed a member thereof on the employees' nomination. The membership of the Board had not been completed at the end of July.

An application was received on June 19 for the establishment of a Board of Conciliation and Investigation to deal with matters in dispute between the Great North Western Telegraph Company and certain of its telegraph operators. The application being, however, defective in form, was returned to the applicants and a new application in the same matter was received in the Department on July 13, to which was attached the terms of proposed rules and a schedule of wages to govern telegraphers employed by the G.N.W. Telegraph Company. In this application it was stated that the dispute affected directly 240 male employees over 21 years of age, 30 female employees under 21 years of age, and 55 female employees, making 325 in all; also that 1,800 other employees were affected indirectly. The applicants declared themselves to be members of the Great North Western Division No. 43 of Commercial Telegraphers Union of America. It was stated that efforts to agree upon the above mentioned rules and schedule had been unavailable. A Board was established by the Minister on July 19, Mr. David Campbell, of Winnipeg, being appointed a member thereof on the employees' nomination. In the absence of any nomination from the employing company, Mr. E. H. McGuigan, of Toronto, was appointed a member of the Board on the company's behalf, and the Board was completed on August 8 by the appointment of His Honour Judge Colin G. Snider, of Hamilton, as chairman, the last named appointment being made on the joint recommendation of the other Board members.

On July 21 an application was received from the employees of five of the asbestos mines operated at Thetford Mines, Quebec, namely: The Asbestos

Corporation, The Johnson Mines, The Jacob Mining Company, Limited, The Bell Asbestos Mines, Limited, and Martin Bennett, Limited. The application was made on behalf of the employees of Local Union No. 143 of the Western Federation of Miners, and affected, it was claimed, 900 directly and 500 indirectly. This dispute grew out of a demand on the employees' part for increased rates of wages. Before action was taken on the Board application, the Department advised that the workmen concerned should first take up the matters in dispute with each company separately, in accordance with an understanding to this effect which had been reached at a conference between representatives of the employing industries and of the workmen concerned in the office of the Minister of Labour in Ottawa.

Other Proceedings under Act.

Reference was made in the July issue of the *Labour Gazette* to an application from the employees of the Consolidated Mining and Smelting Company at Rossland, B.C., members of the Rossland Miners Union No. 38 of the Western Federation of Miners, and to the efforts made by Mr. J. D. McNiven, one of the departmental fair wages officers, to secure an adjustment of the same by conciliatory means. The fair wages officer was successful in bringing about a mutual understanding between the parties interested, and by so doing the reference of the dispute under the Industrial Disputes Investigation Act was not required, and the employees' application for a Board was accordingly withdrawn. The agreement made between the Consolidated Mining and Smelting Company, Le Roi No. 2 Consolidated Mining and Smelting Company of Canada, and Le Roi No. 2, Limited, of Rossland, is for a period of three years.

Reference was made in the July number of the *Labour Gazette* to an application from the Halifax and South Western Railway Company employees, members of the Canadian Brotherhood

of Railroad Employees, growing out of a demand on the latter's part for increased rates of pay, the shortening of the working day, and other proposed alterations in labour conditions. The procedure on this Board was suspended during the month of July to permit of direct negotiations of the parties concerned.

Reference is made in the July number of the *Labour Gazette* to an application from the electrical workers in the employ of the Montreal Light, Heat and Power Company, members of the Bro-

therhood of the International Brotherhood of Electrical Workers, No. 492, relating to a demand by the employees bearing on wage rates and other employment conditions. Procedure was, however, stayed on the Board application to permit of direct negotiations between the parties concerned, and word was received in the Department on July 23 to the effect that a satisfactory settlement had been reached as a result of negotiations between the employing committee and a committee of the workmen concerned.

Report of Board in Dispute between the Ottawa Electric Railway Company, of Ottawa, and its Employees

ON July 12 the Minister received the unanimous report of the Board of Conciliation and Investigation which had been appointed to deal with a dispute between the Ottawa Electric Railway Company and its employees to the number of about 500, members of the Amalgamated Association of Street and Electric Railway Employees of America, and comprising motormen, conductors, shop and shed men and others. Attached to the Board report was a copy of an agreement which had been signed between the parties concerned, effective until June 30, 1918, and so "from year to year after unless and until either party thereto desires a change." This dispute grew out of a demand on the employees' part for increased rates of pay and improved working conditions, the employees also charging that discrimination and intimidation was being employed against union men. The Board was established on June 30, Messrs. Geo. F. Henderson, K.C., and A. E. Fripp, K.C., M.P., both of Ottawa, being appointed members thereof, on the nomination of the employing company and the employees respectively. The Board was completed on July 4 by the appointment of Mr. Hamnett P. Hill, of Ottawa, as chairman, on the recommendation of the other Board members. The

agreement referred to provides for a change from a ten hour to a nine hour working day, with an increase of 3 cents per hour in the employees' rate of pay, and provision for the payment of the Sunday rate on holidays. The Board members in their report point out that "it is proper to state that the company was induced to consider this increase in consideration of the fact that during this particular season their source of labour supply is the identical class of men who are expected to offer their services to the defence of the Empire, and it was, therefore, eminently desirable that nothing should occur that would tend to strain relations between the company and its men."

Report of Board.

The text of the Board report is as follows:

July 10, 1916.

The Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa.

Dear Sir,—

We, the undersigned members of the Board of Conciliation and Investigation under the provisions of the Industrial

Disputes Investigation Act, 1907, in the matter of certain differences between the Ottawa Electric Railway Company and its employees, have pleasure in reporting that we have succeeded in working out an agreement between the company and the men, an original of which is appended hereto.

It will be noted that the outstanding feature of this agreement is a change from a ten hour to a nine hour day, coupled with an increase of 3 cents per hour in the rate of wages of the men, together with a provision for payment of Sunday rate on holidays. The granting of this increase by the company, of course, involves a large expenditure, and it was not without considerable difficulty that we were able to bring about this result. The change to a nine hour day with the increase above stated means that the older men get the shorter day without any loss of income, while the younger men get a substantial increase of income.

It is proper to state that the company was induced to consider this increase in consideration of the fact that during this particular season their source of labour supply is the identical class of men who are expected to offer their services in the defence of the Empire, and it was therefore eminently desirable that nothing should occur that would tend to strain relations between the company and its men. We have reason to believe that the men will now appreciate the fact that the company has acted in such a way as to justify the continuance of the conspicuously harmonious relationship between this company and its men, of which the men have been in the past perhaps even more proud than the officers of the company.

Yours very truly,

(Sgd.) H. P. HILL,

Chairman.

(Sgd.) A. E. FRIPP.

(Sgd.) G. F. HENDERSON.

THIS AGREEMENT entered into the tenth day of July, A.D. one thousand nine hundred and sixteen, between the Ottawa Electric Railway, hereinafter called "the Company," Party of the First Part, and the motormen, conductors, shop and shed men employed by the said company, represented by the parties who sign this agreement, Parties of the Second Part.

Witnesseth that for the purpose of enabling harmonious operation of the company's system for the period hereinafter set out, the parties hereto mutually agree as follows, that is to say:

1. The company agrees that its general superintendent or acting superintendent will receive a committee of the Parties of the Second Part, hereinafter called the "Grievance Committee," at any reasonable time to discuss any matters arising out of this agreement or any other matters which may arise and which may appear to be not provided for by this agreement.

2. For motormen and conductors all runs shall be divided into regular and relief runs, and shall conform as nearly as possible to a nine hour day.

3. The superintendent of the company will prepare as soon as possible and post in the men's waiting room a list of employees in order of seniority, together with a schedule of runs. Motormen and conductors shall then have the right, subject always to the satisfaction of the superintendent, to choose such runs as they may prefer, the senior men on the list to have first choice and so from time to time until all have chosen. Any man failing to make his choice within a time satisfactory to the superintendent shall forfeit his right to make such choice and may be allocated to such route as the superintendent may think proper.

4. Employees who are members of any committee of the employees or who are officers of any association of the employees, or delegates to conventions of street railway men, shall be entitled to

leave of absence for the purpose of attending conventions or of doing such committee work or other work as may be necessary, without losing any privilege of seniority.

5. Clothing for conductors and motormen shall consist as follows:

Summer—Full suit, coat, vest and trousers.

Winter—Trousers every year, overcoat every second year.

All conductors and motormen must be so provided, the company to pay full cost of such clothing for all men in service over one year, and half the cost of those in their service first year, said uniforms to be supplied not later than first of May and fifteenth of October in each year. After any article of clothing has been in the possession of a conductor or motorman for a period of three months, it shall become his absolute property.

All uniform caps and badges will be supplied by the company without charge.

6. In the case of an employee being guilty of violating the rules of the company he shall be warned, when off duty, by the superintendent, against a recurrence of the same offence, and in the event of the employee being suspended his case shall be dealt with by the superintendent, save that any employee suspended or discharged shall have the right to appeal to the President in person, or through the Grievance Committee of the employees, and any employee suspended or discharged and who, upon investigation, is found not guilty of sufficient cause to warrant such suspension or discharge, shall be reinstated to his former position and be paid in full for all lost time caused by such suspension or discharge.

7. That cars shall be sent out each morning and night for the purpose of conveying employees to and from their work. Said cars to be run on Somerset, Bank, Hull, St. Patrick, Sussex and Gladstone lines.

8. The company shall, where practicable and subject to regulations of the company, provide suitable seats for motormen and conductors on all cars, and where seats of a fixed design are used, said seats shall be placed in a position where convenient for motormen and conductors' use in the proper discharge of his duty.

9. All cars shall be equipped each morning, before taken out, with sand, switch bars, brooms, dusters, or any other necessary articles, and all cars, cushions and windows shall be cleaned and in proper condition to go upon the street each morning, said equipping and cleaning of cars to be done by shed men employed for that purpose.

10. Employees shall be given free transportation at all times and on all lines of the Ottawa Electric Railway.

11. That the company will not call on any conductor or motorman to perform extra work in excess of his regular schedule day's work of nine hours except in cases of necessity. Men will not be expected to work beyond a full day's work unless they are agreeable to do so.

12. Motormen and conductors who consent to run extras or trippers before or after day's work shall be paid double time for same.

13. All spare men who show up at the shed for work at six o'clock in the morning or six o'clock in the evening and who fail to procure work shall be allowed one hour for so turning up at either morning or evening.

14. Any shop or shed man who works upon a Sunday and who gives at least one day's notice of his desire to be allowed off for one day during that week shall be so allowed, or, if practicable, in the opinion of the superintendent.

15. Conductors and motormen required to work on the following holidays, viz.: New Year's Day, 24th May, Dominion Day, Christmas Day, Civic Holiday, Thanksgiving Day, Labour Day, will be paid at Sunday rate.

16. The company will supply conductors with tickets and change to the extent of thirty-five dollars (\$35). All students practising as conductors shall be required to furnish their own change.

17. The company agrees to furnish a bulletin board in the conductors' and motormen's waiting room upon which employees are to be permitted to post notices of meetings of employees or of any other matters affecting the welfare of employees.

18. Wages for conductors and motormen shall be as follows:

First year's service—26 cents per hour for week days.

Second year's service—27 cents per hour for week days.

Third year's service and upwards—30c per hour for week days.

In addition to the foregoing rates, 4 cents per hour extra to be paid for Sunday work.

19. Nine hours shall constitute a day's work for all shop and shed men, and the schedule of time shall be so arranged as to allow one hour off for dinner. No shop or shed men shall be required to work more than the regular day's work of nine hours except in case of necessity. The present shop rules will not be amended except after conference with the Grievance Committee.

20. Shop and shed men working on Sundays shall receive 4 cents per hour in addition to their regular rate of wage. No man shall work out of his regular turn unless at the request of a representative of the company, and in the event of his so working on Sunday out of his regular turn he shall be paid one and one-half time.

21. Should any shop or shed men be required to work all night he shall be paid double time from 6 p.m. to 6 a.m.

22. Shop and shed men shall be paid

Sunday rate of 4 cents per hour extra for work on all legal holidays.

23. All shop and shed men shall receive an increase of 3 cents per hour in excess of the wages which they are receiving at the date of this agreement. Any shop or shed men called upon to work for more than nine hours in any day shall be paid at the rate of time and a half for such excess service, except in the event of his being required to work all night when he shall be paid as required by Section 21.

24. The company has no objection to any employee being a member of Division 279 Amalgamated Association of Street and Electric Railway Employees of America, and will not discriminate against any employee by reason of his being a member of that organization.

25. Sunday hours of conductors and motormen are to remain as they are at present.

26. The pits in the sheds shall be equipped with board platforms.

27. The schedule of running times shall be so rearranged as to provide for a lay-over of two minutes at the end of each run.

28. All conductors and motormen shall be entitled to not more than three months' leave of absence in any one year without losing seniority, provided, however, that no conductor or motorman shall receive leave of absence unless his reason for applying for such leave is satisfactory to the superintendent and is for a time which is satisfactory to the superintendent, and further provided that the number applying for leave of absence shall not at any time, in the opinion of the superintendent, interfere with the practical working of the company's system.

29. The paying of the men shall be commenced at two o'clock in the afternoon instead of at four o'clock as heretofore.

30. This agreement and the provisions hereof shall continue in force and shall

be binding on the respective parties hereto until the last day of the month of June, A.D. one thousand nine hundred and eighteen (1918), and so from year to year after unless and until either party hereto desires a change in this agreement or any portion thereof, in which case such party shall notify the other party hereto of the desired change at least thirty (30) days prior to the ending of any year. A notice given to the Minister of Labour under the provisions of the Industrial Act, 1907, and amendments thereto shall be treated as a notice under this section.

In witness whereof the parties hereto have signed.

(Sgd.) THE OTTAWA ELECTRIC RY. CO.
By T. AHEARN, *President*.

Signed on behalf of the motormen, conductors, shop and shed men, by

(Sgd.) W. J. DEEVY.

(Sgd.) FRED. GOLDING.

Signed, sealed and delivered in presence of

(Sgd.) B. BARON.

TRADE DISPUTES DURING JULY, 1916.

THERE were in existence during July fourteen strikes, involving directly 73 firms and 1,303 employees. Seven of these disputes commenced during the month and affected twelve firms and 407 employees, while 61 firms and 896 employees were involved in the other seven disputes which commenced prior to July. The time losses resultant from the new and old disputes of the month are estimated at approximately 17,557 working days; of this total 5,568 working days are chargeable to these new disputes. A number of pit-head strikes occurred at various points in the Crow's Nest Pass coal mining district, arising out of the demand for a ten per cent increase as a war bonus, but in most instances the men were out for a few days only. Negotiations between the miners and mine operators were still in progress at the end of the month. Particulars of these disputes are held over until next month.

New disputes in July, 1916.—In the following table are indicated the trades

affected by the strikes which commenced during July:

TRADES	No. of disputes	No. of firms.	No. of employees.
Clothing	3	3	112
Food, Tobacco and Liquor Preparation...	1	6	70
General Transport	1	1	20
Unskilled Labour.....	2	2	205
Total	7	12	407

Disputes beginning before July.

Three of the strikes beginning prior to July terminated during the month, settlements being reached in each case as the result of negotiations between the parties concerned. These disputes are as follows:

Coal miners, Minto, N.B.—On June 26, 1916, about 200 coal miners employed in the mines of the Minto Coal Company, Limited, at Minto, N.B., went on

strike owing to their demand for increased wages being refused by the company. The company offered the men a counter proposition stipulating that a bonus of $2\frac{1}{2}$ cents per box would be paid at the expiration of every two months to any miner whose production exceeded a specified number of boxes in that period. A majority of the miners accepted the offer and returned to work on July 12.

Clothing workers, Montreal, Que. — On June 8, 1916, about 370 clothing workers employed by the John W. Peck & Company, Limited, clothing manufacturers, Montreal, Que., went on strike, the alleged cause being a change in piece-work arrangements involving a reduction in earnings and a demand for increased rates. The strike was settled on July 12 following negotiations between representatives of the workers and the management of the firm, which resulted in a satisfactory agreement as to working conditions, including increased wages, being reached.

Restaurant employees, Edmonton, Alta. — On May 16, 1916, fifty-three employees (cooks, pantrymen, waiters, waitresses and dishwashers) employed in four restaurants, namely, the Arcadia Café, Phoenix Café, We Should Worry Café and the Broiler Café, went on strike for increased wages. During June the management of the Arcadia Café acceded to the demands of seven of the employees and twenty-seven of the other employees were reported to have obtained work elsewhere. The month of July opened with three restaurants and 19 employees still involved. During the month the management of the Broiler Café came to an agreement with their staff, eight in number. The strike was reported to have definitely ended on July 14 with two cafés, the Phoenix and We Should Worry, operating as non-union establishments.

Disputes beginning during July.

Clothing workers, Hamilton, Ont. — Twenty-nine employees of the clothing manufacturing firm of Davis Bros., at Hamilton, Ont., went on strike on July 14 owing to their objection to a "tabulation" system introduced by the firm for the purpose of checking their factory output and which the workers alleged involved a reduction in earnings. The strike was still unsettled at the end of July.

Cap makers, Winnipeg, Man. — On July 17, fourteen cap makers in the employ of the Echlin Cap Company went on strike for increased wages and better working conditions. The strike was settled on July 20 as a result of the employers granting the demand of their employees.

Garment workers, Winnipeg, Man. — Seventy garment makers in the employ of the firm of Stobart, Limited, garment manufacturers, went on strike on July 20 for increased wages and better working conditions. The employers acceded to the demand of their employees, who resumed work on July 27.

Bakers, Winnipeg, Man. — On July 6, about 70 employees of six bakery establishments at Winnipeg, Man., went on strike to enforce their demand for the recognition of their union and also for increased wages. On July 17 a settlement was reached resulting in the recognition of the union and the granting of increased wages.

Freight handlers, Stratford, Ont. — About twenty freight shed porters in the employ of the Grand Trunk Railway at Stratford, Ont., went out on strike on July 1 for increased wages, from \$1.85 to \$2.25 per day. The company offered an increase of 15 cents per day, which was acceptable, and the men resumed work on July 8.

Labourers, Hamilton, Ont. — On July 10, about 150 labourers in the employ of the Steel Company of Canada, Lim-

ited, at Hamilton, Ont., went on strike for increased wages. The company refused to grant the wages demanded, and, after being out on strike for 19 days, the men returned to work on July 31 at the rates prevailing before the strike.

Labourers, Hamilton, Ont.—On July 7, 1916, about 55 labourers in the employ of the Dominion Steel Foundry Company went on strike for increased wages. The strike was unsettled at the end of July.

TABLE OF TRADE DISPUTES IN EXISTENCE DURING JULY, 1916.

SETTLEMENT OF DISPUTE AFFECTING MAINTENANCE-OF-WAY EMPLOYEES ON THE EDMONTON, DUNVEGAN AND BRITISH COLUMBIA AND OTHER RAILWAYS.

IN the July issue of the *Labour Gazette* reference was made to difficulties affecting maintenance-of-way employees on three newly constructed roads centring at Edmonton, and to the fact that a settlement had been made without the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, for which application had been made.

Since the above note was published the Department has received the report of Mr. F. E. Harrison, Fair Wages Officer for the Prairie Provinces, who visited Edmonton and lent his assistance to the disputing parties, and it is now possible to give details of the settlement effected.

During the month of May the maintenance-of-way employees employed on the Edmonton, Dunvegan and British Columbia Railway, the Alberta and Greater Waterways Railway and the Central Canada Railway presented an agreement to the management of these railways involving a new schedule of wages and other conditions. This agreement, however, was not agreed to by the companies affected, and after several conferences between the parties, which failed to adjust the dispute, the maintenance-of-way employees applied for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act.

As the circumstances of the case seemed to indicate that personal intervention might be of assistance in adjusting the differences, and while the question of the establishment of a Board was pending, Mr. Harrison was instructed to visit Edmonton and offer his assistance to the disputing parties. Mr.

Harrison succeeded in arranging conferences between the parties, and after several meetings and a number of proposals and counter-proposals, a definite arrangement was reached. Although no formal agreement was entered into, the manager of the Edmonton, Dunvegan and British Columbia Railway issued a signed bulletin setting out the arrangement as agreed to between the parties. This bulletin, it is stated, is to apply only to the Edmonton and Dunvegan Company and not to the other railways concerned, which, it was stated, had not yet been taken over from the construction companies. As soon as this is done, however, these railways are to be included in the arrangement, and in the meantime the amended rates of pay and working conditions obtain over the three railways. The matter having been settled in this way the necessity for action under the Industrial Disputes Investigation Act disappeared and the application for a Board was accordingly withdrawn.

- The following is the text of the bulletin above mentioned:

"1. By 'Permanent Maintenance-of-Way Employees' is meant those employees who take their orders from the roadmaster and bridge and building master in such parts of the line as are open for traffic, and have been in the maintenance-of-way service continuously for nine months or more; or, who have nine months' accumulative service during the two years immediately preceding, and will hereinafter be referred to as 'The Employees.'

"Labourers and extra gangs, unless those practically engaged all the year round, will not be ranked as permanent employees.

"2. Ten (10) hours shall constitute a day's work, from 7 a.m. to 6 p.m., with one hour for lunch.

"3. Time and one half shall be paid for Sundays, Christmas Day and New Year's Day, and all work performed after nine (9) o'clock p.m.

"4. All overtime shall be authorized by the proper authority, except in cases of emergency.

"5. In case of emergency after ten (10) p.m., a minimum of four (4) hours straight time will be allowed; but in no case shall an employee be required to suspend work in the schedule working hours to equalize overtime.

"6. In emergency, employees will not be required to work more than twenty-four (24) hours continuously without a rest of eight (8) hours.

"7. Foremen will be allowed straight time for wet days, providing they hold themselves in readiness for duty.

"8. Employees will be promoted on their respective superintendent's division in order of seniority, provided they are qualified.

"9. All employees shall be advised of vacancies or of any new appointment that may occur in the departments in which they are employed, and their application, if presented within ten (10) days will be considered.

"10. A list of all employees will be prepared for each superintendent's division, and such list will show seniority standing of each employee. The list will be revised from time to time to agree with the length of service and promotions made, and a copy will be furnished representatives of the employees upon request. They will be open for correction upon proper representation by an employee to the head of his department.

"11. In the event of a reduction in the number of men employed, those longest in service shall have a preference of employment, provided their service

has been satisfactory; and in case of re-employment, those who have had previous service will be re-engaged according to seniority, if possible.

"12. Should an employee at any time consider himself unjustly treated for any cause whatsoever, he shall be entitled to a fair and impartial investigation within thirty (30) days from the date of complaint by him to his superior officer, and a decision shall be given in writing as soon as possible thereafter.

"13. Section foremen, or any other foremen, taken from their gang for any reason for three or more days, will be relieved from the duties of foreman during their absence, and the relieving foreman will be paid the rate of the foreman he relieves during the absence of the regular foreman, and be held responsible during the absence of the regular foreman.

"14. The company will keep section houses in good repair, the cost of repairs, other than ordinary wear and tear, will be charged to the occupants. Regular section houses shall be for the use of section foremen and their families and employees of the company.

"15. As far as practicable employees will be offered the opportunity of visiting their places of residence, and furnished transportation when requested from proper authority and when it will not interfere with the company's business.

"16. In the event of the extension of the line under operation creating new positions included in this schedule, the same rates and conditions will apply.

"17. McLennan is to be considered as an intermediate point.

"18. Section foremen who perform water service duties are to pay \$2.50 rent per month for section houses or combined stations which are not used as stations.

"19. Free rent, fuel and light will be

provided at combined stations or station houses used as stations.

"20. The conditions and rates of pay herein stated will become effective on the first of July, 1916, and will not become ineffective until sixty (60) days' notice in writing has been given by either party concerned.

"21. Bridge and building carpenters or bridgemen working at intermediate points will be permitted two hours after six p.m., on straight time, after obtaining proper authority, except in emergency cases, when said authority will not be required.

RATES OF PAY

Trackmen

Foremen at Edmonton Yard.....\$90.00 per month
(Straight time will be allowed for all overtime)

Section Foremen at intermediate points.....\$70.00 per month
(Fuel, light and rent extra where occupant occupies section houses;
Section Foremen who occupy shacks will be allowed rent free.)

Sectionmen who are permanent employees. .20c per hour.

Bridge and Building Men

Yard and Shop Foreman.....36½c per hour.

Extra Foreman Carpenter.....32½c per hour.

Carpenters who are ranked as permanent employees.....30c per hour.

Carpenters who are not ranked as permanent employees.....27½c per hour.

Foreman Painter.....35c per hour

Painters.....30c per hour

Pump men.....\$25. per month

SETTLEMENT OF WAGE DIFFERENCES AFFECTING SMELTER WORKERS AT TRAIL AND MINERS AT ROSSLAND, B.C.

IN the July issue of the *Labour Gazette* a brief reference was made to disputes in southwestern British Columbia affecting metal miners and smelter men and to the successful adjustment of one of these through the efforts of an officer of the Department in bringing about conferences between the parties without the necessity of having recourse to an investigation under the Industrial Disputes Investigation Act, applications for Boards in these cases having already been made. Since this reference the Department has received from Mr. J. D. McNiven, its Vancouver representative, a full report in regard to the arrangements made in settlement of the dispute at Trail and also at Rossland.

The dispute at Trail arose as the result of an agitation in March last among the men employed at the smelter for an increase in wages, their claims being based on the increased cost of living, the high price of metals and the general advances which had been made at other smelters in the province

and in the neighbouring States. During April a committee from the union waited on the management of the smelter and submitted a wage scale and general agreement which provided for a cumulative increase in pay based on the price of silver and lead, a voluntary check-off and a three-year agreement with the union. The company did not accede to the union's proposal, but on May 1 announced an advance to all employees of 25 cents per day. This offer was submitted to a referendum vote of the union and was rejected. Negotiations were continued further, but without result. On June 17, Mr. McNiven, by the Minister's instructions, visited Trail and assisted in bringing about a resumption of negotiations, and finally on June 27 the company submitted a proposal which on the referendum vote of the union was accepted, and which resulted in an increase in wages to all employees in and about the smelter of 40 cents per day. The number of men affected or provided for in the increase is given as 1,520, nearly one-third of whom were employed on the construction of new buildings and equipment. The text of the memorandum of the settlement is as follows:

"On and after July 1, there will be

an increase of 15 cents per day to all men employed at or around the smelter, so long as the Montreal price of lead remains at 8 cents or better, and the Montreal price of copper remains at 25 cents per pound or better; with our guarantee that this additional 15 cents per day will be paid for at least three months from the first of July, 1916, no matter what the current prices of lead and copper may be. We are able to do this through having sold our lead production to the Munitions Board for the first three months at a fixed price.

"This increased rate shall continue so long as lead remains above 8 cents, and copper above 25 cents.

"If and when after the first of October lead falls below 8 cents and copper below 25 cents, but lead is still above 7 cents and copper above 22 cents, the increase will be 10 cents per day instead of 15 cents per day.

"If and when after the first of October, 1916, lead falls below 7 cents and copper below 22 cents, but lead is still above 6 cents and copper above 18 cents, the increase shall be 5 cents per day instead of 15 cents per day.

"If and when the Montreal price of lead is below 6 cents and the Montreal price of copper is below 18 cents, the company reserves the right to revise the wage scale according to conditions prevailing at that time, having special regard to the prices current for necessities at that time. So long, however, as the Montreal price of lead is 6 cents or better and the Montreal price of copper is 18 cents or better, the company will pay a minimum wage of \$3 per day to all employees.

"Except as notified by this letter, the scale made effective on the first May, 1916, shall prevail."

Following the settlement of the smeltermen's dispute at Trail, Mr. McNiven proceeded to Rossland where the Rossland Miners' Union had made a demand

upon the Consolidated Mining and Smelting Company and Le Roi No. 2, Limited, for a general increase in wages of 25 cents per day and an agreement to include the check-off covering a period of three years. After a number of conferences between the mine managers and a committee from the union, and several propositions and counter-propositions on both sides, the following arrangement was reached on July 16:

"When the price of copper shall be below 16 cents per pound the scale of wages shall be the minimum scale.

"When the price of copper shall have been at or above 16 cents per pound for a period of one month, wages underground shall be advanced by 25 cents per day and wages on the surface shall be advanced 15 cents per day.

"When the price of copper shall have been at or above 18 cents per pound for a period of one month, wages underground shall be advanced by a further 25 cents, or a total bonus of 50 cents per day, and wages on the surface shall be advanced 10 cents per day, or a total bonus of 25 cents per day.

"Should the price of copper advance to 25 cents per pound or over, and remain at 25 cents for one month or longer, at the next period when the copper reduces to below 18 cents per pound, the 50 cents bonus shall continue to men underground and 25 cents bonus shall continue to men on surface for a period equal to that in which the price of copper remained at 25 cents per pound or over, but should the price of copper reduce to below 16 cents per pound during the aforesaid period, the bonus paid to both underground and surface men shall be 25 cents above the minimum scale for the aforesaid period.

"This agreement shall date from January 1, 1916, and shall continue for a period of three years and thereafter until terminated by two months' notice on either side."

REPORTS OF EMPLOYMENT BUREAUS.

DURING June there was a slight decrease in the demand for workers as shown by the reports from 111 employment bureaus,—80 commercial, 11 public and 20 philanthropic. The number of vacancies notified to all offices was 33,862, a daily average of 1312.16 as compared with 1465.72 in May. The number of persons placed was 16,999, a daily average of 655.67 as compared with 772.68 in May. As to employment for woman workers, the number of vacancies notified was 8,903, a daily average of 349.31 as compared with 345.49 in May. The number of women workers placed was 3,243, a daily average of 122.50 as compared with 131.49 in the preceding month. The proportion of vacancies filled to vacancies notified was 50.2 per cent as compared with 55.7 per cent in May. The proportion of vacancies filled to vacancies notified was 55.1 per cent for men and 36.4 per cent for women as compared with 61.5 per cent and 38.5 per cent respectively for May.

The five principal centres of labour distribution, Montreal, Toronto, Winnipeg, Edmonton and Vancouver, showed a decrease in the demand for workers except in Edmonton. Decreases are very marked in Montreal and Toronto. In St. John, Quebec, Brandon, Saskatoon, New Westminster and Victoria an increase in the number of vacancies is indicated.

The number of persons who obtained casual employment through the Salvation Army and other agencies was 1,489, a daily average of 58.78 as compared with 52.80 in May. The number of casual jobs secured was 3,777, a daily average of 157.76 as compared with 134.51 during May.

THE PRESENT STATE OF THE LABOUR MARKET AS REPORTED BY FAIR WAGES OFFICERS

DURING the months of June and July the Fair Wages Officers of the Department had very favourable opportunity of observing the state of the labour market in their different districts because of the number of labour disputes coming before the Department and the work of the officers in connection with these disputes. With this in mind they were instructed to submit reports indicating in general outline the state of employment in the different industries as they had found them and from these reports the following summary has been prepared.

In the Province of Quebec general activity prevailed. At Sherbrooke, St. Hyacinthe, Quebec, Thetford Mines, Three Rivers and Shawinigan steady employment was being afforded in the various manufacturing plants, and a considerable amount of overtime was being worked. There was also fair activity in the building trades. Farmers were finding difficulty in securing help despite the high wages offered and the difficulty of securing workers in all lines was such that wages in general were showing an upward tendency. In Montreal some of the building tradesmen could not find employment at their trades, but the great majority of these had been absorbed by the munitions plants which were working in many instances night and day. Great activity prevailed on the harbour front and long-shoremen were well employed. This activity in the export trade was reflected in railroad employment; railroad companies were short of men in all classes of service other than trainmen and enginemen, and it was expected that even in this class there would be a shortage at the time of the moving of the crop. They also reported a lack of workers in the iron and wood trades and a grave shortage for track work, this latter con-

dition being particularly acute north of Lake Superior. They found the greatest scarcity of workers in Ontario and the West, this condition being not so marked in the Province of Quebec.

In Ontario many of the manufacturers engaged in the production of munitions of war and military equipment have been unable to secure the labour required. As a result of the war new industries have been established and others have been rapidly developed, and in connection with these there has been a demand for skilled workers which has not been fully supplied. Unskilled labour is also reported in demand, and it is thought that the lumbering industry will have difficulty in securing the number of men required.

In Winnipeg and Brandon no surplus of labour existed in any lines; while the building trades and a few other lines were slack the tradesmen affected were easily able to secure employment in other occupations. It was thought that conditions were not quite so favourable in Fort William and Port Arthur. Farmers were not seriously affected as it was the time between seeding and harvesting and the demand for harvest help had not begun. The railways were finding a shortage of track labourers throughout the West, and bridge men and painters were scarce. The railroads were enjoying a larger volume of freight business than ever before in Saskatchewan, and railroad employment was accordingly at its best. In Saskatoon there were good prospects of a heavy crop and a strong demand for farm labour was anticipated. It was expected that the greatest difficulty would be experienced in obtaining sufficient harvest help. The Provincial Government labour bureau at Saskatoon reported that already there was a very fair demand for farm hands and that from \$40 to \$50 per month was being

offered and work by the day at from \$1.75 to \$2.00 with board. Other employment offices also reported a steady demand for farm and railroad labour, and there was also a very good demand from the rural districts for experienced carpenters as the good crop of last year was having the effect of increasing the amount of building on the farms. There seemed to be no surplus of labour in any of the towns and villages of the province and the City of Saskatoon was finding difficulty in obtaining men for its ordinary work. The amount of building at Saskatoon was showing a substantial increase over last year, and plumbers who had experienced slackness for some time were finding ample employment.

In the coal fields of Alberta employment was exceptionally good for this season of the year. The railroad activity was a strong factor in increasing the demand for coal as the railroads were storing supplies for the autumn and winter. In the Canmore district several of the coal companies reported business in excess of other seasons; they were working at full capacity and were making efforts to increase output. Officials of miners' unions reported members working full time and conditions generally satisfactory. A large proportion of the English-speaking miners had enlisted and the mining companies had found it necessary to employ Oriental labour, especially on surface work. In the coal mines west of Edmonton a serious shortage of labour existed, there being an increased demand for all classes of help. In the Drumheller coal mining district where eleven mines were in operation, production was being gradually increased and it was expected that owing to the increased demand full working time would begin about August 1, a month earlier than usual. No Asiatic labour was employed at any of the mines in this district, but nearly 80 per cent of the employees were foreign-born, a large proportion of the British-born having enlisted. Numbers of homesteaders had been employed in

previous years but these workers were no longer seeking employment at the mines because of the improved conditions of their farms. It was anticipated that the heavy demand for farm workers would still further reduce the available labour supply. In the Alberta section of the Crow's Nest Pass district employment conditions in the coal mines were very satisfactory. At Frank and Bellevue it was anticipated that the mines would soon be operating to full capacity. The percentage of foreign-born labour which before the war constituted about 60 per cent of the labour force had been increased in some instances to 85 per cent.

In British Columbia a shortage of labour in some lines was reported, particularly in the unskilled class. The railroads were offering \$2.50 and \$2.75 per day for track-laying, grading and ballasting work and were finding difficulty in securing the numbers required. Logging camps were also finding the supply of workers inadequate, although the lowest wage offered was \$2.75. Paper and pulp mills were also calling for men, offering \$3.00 per day. The general demand for unskilled labour was evidenced by the increased wage rates which were from \$2.50 to \$3.00 per day as compared with \$2.00 and \$2.25 a year ago. There is still a surplus of building tradesmen and these workers have had to take unskilled or semi-skilled employment at lower wages. In the metal trades men were in demand, particularly machinists, tool-makers, pattern-makers and boilermakers. The supply of moulders, blacksmiths, coppermiths, etc., was equal to the demand. In the printing and publishing trades employment was not quite sufficient to absorb all the workers. In the tobacco trades employment was poor, but many of these workers had been placed in other lines. There was also a surplus of bakers and confectioners. In the clothing trades, tailors and garment workers were fairly well employed, while the one large shoe factory of the province was being operated to capacity on war orders. There

was a demand for men from the railroads and also from the marine service, particularly for marine engineers. The fishing companies were also engaging large numbers of men, but for the most part these were Orientals and Indians. Longshoremen were well employed. There was a demand for skilled men in all the coal mining districts of the province with perhaps one exception, while

in the metalliferous mines production was at its highest point. In the Fernie coal mining district labour conditions were very satisfactory; no unemployment was reported, and indeed there was a shortage of competent miners owing to the enlistment of English-speaking employees. Perhaps the only class suffering seriously from unemployment was clerical and office help.

IMMIGRATION—EMIGRATION—COLONISATION

IN the present article statistics in regard to immigration and emigration are given only for the United States, information respecting the movement of British subjects between the United Kingdom and British North America not having been received.

(2) Movement of Persons other than Citizens of the United States between the United States and British North America.

Immigration to British North America from the United States.—According to the June bulletin of the Bureau of Immigration of the United States Department of Labour, alien residents of the United States to the number of 1,851 departed to take up permanent residence in British North America, as compared

with 1,532 in May, 1916, and 1,965 in June, 1915.

Immigration from British North America to the United States.—During June, 1916, 8,986 persons (not including citizens of the United States) left British North America to take up permanent residence in the United States, as compared with 9,394 in May, 1916, and 7,022 in June, 1915.

Balance.—It will be seen from the above that in this movement between the United States and British North America, the latter had an outward balance of 7,135 in June, 1916, as compared with 7,862 in May, 1916, and 5,057 in June, 1915.

The following statement gives the detailed figures for the second quarter of 1916, with a comparison of figures for the same period in the preceding year:

IMMIGRATION AND EMIGRATION BETWEEN CANADA AND THE UNITED STATES.

Month.	Persons (other than United States Citizens) admitted to United States from British North America.		Persons (other than United States Citizens) departed from United States to British North America.		Balance (—) Outward (+) Inward	
	1915	1916	1915	1916	1915	1916

June.....	7,022	8,986	1,965	1,851	— 5,057	— 7,135
	21,034	28,900	4,698	4,317	— 16,336	— 24,583

(3) Homestead Entries and Land Patents.

Homestead entries.—During the month of June, 1916, there were 294 homestead entries in Manitoba; 535 in Saskatchewan; 640 in Alberta, and 26 in British Columbia, a total of 1,459, as compared

with a total of 1,474 in May, 1916, and 1,865 in June, 1915.

The following statement shows by provinces and nationality the number of those who took up homesteads during the second quarter of the calendar year, 1916:

Lands patented.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of June, 1916, the number of patents was 1,257 and the number of acres 196,565.26, as com-

pared with 1,302 patents and 206,155.01 acres during May and 1,254 patents and 237,338.57 acres for June, 1915.

The following statement gives details of lands patented during the second quarter of the present year, with a comparison of the figures for the same period of 1915:

TRADE UNION REPORTS ON UNEMPLOYMENT

IN its April issue the *Labour Gazette* published an article dealing with unemployment among the members of local trade unions as reported for December 31, 1915. It is now planned to publish quarterly articles of this kind, and in pursuance of this plan the present article deals with unemployment among organized workers as reported for June 30, 1916, comparisons being made with the figures given in the report in the April issue.

The present report is more representative than the last as returns were received from 1,103 unions with 100,621 members, slightly over 70 per cent of the total union membership as compared with a representation of about 40 per cent in the report for December 31. Members unemployed on account of trade disputes or disability were not included. The number of members reported unemployed on June 30 was 2,153 or 2.1 per cent, as compared with 4,584 or 8.7 per cent on December 31. Taking the returns by provinces the percentages of unemployment are as follows:

Province.	June 30, 1916	December 31, 1915
Nova Scotia.....	.10	.18
Prince Edward Island.....	4.6	3.2
New Brunswick.....	.8	.7
Quebec.....	1.8	9.9
Ontario.....	1.7	8.1
Manitoba.....	1.2	3.2
Saskatchewan.....	2.6	7.0
Alberta.....	3.03	4.3
British Columbia.....	5.3	14.3

The percentages for the four largest cities were: Montreal, 2.6; Toronto, 1.8; Winnipeg, 1.9; Vancouver, 8.4, as compared with 10.6, 10.6, 2.6 and 18.0 respectively for December 31. The returns for the different trade groups are given in the following tables:

Occupations	Number reporting		Unemployed		
	Unions	Members	Members	Percentages	
				June 30, 1916	Dec. 31, 1915
Mining and quarrying.....	44	8,786	106	1.2	5.9
Building and construction.....	205	14,886	1,282	8.6	28.3
Transportation....	448	43,428	258	.5	3.0
Manufacturing....	286	25,810	285	1.1	3.1

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS.

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 34 cities showed a decrease in July as compared with the previous month, the total falling from \$4,359,864 in June to \$3,117,118 in July, a decrease of \$1,242,676 or 28.5 per cent. Grouping the returns by provinces, Saskatchewan and British Columbia showed marked increases, the value of permits rising over 200 per cent and 100 per cent in these provinces. As compared with the corresponding month of last year, building permits showed a substantial gain, amounting to \$450,225 or 16.88 per cent, the value for

July, 1915, being \$2,666,873. As compared with July of last year there were gains in Quebec, Ontario and Saskatchewan, the latter province showing a gain of over 300 per cent. Of the larger cities the highest individual return was from Toronto. Montreal was second and Windsor third. Montreal showed a decrease as compared with June, but an increase over July, 1915. Toronto showed slight increases over both the previous month and July of last year. Winnipeg showed decreases both as compared with June and July of last year. Vancouver showed an increase over June, but a decrease as compared with July, 1915.

PRICES, RETAIL AND WHOLESALE, IN CANADA, JULY, 1916, AND IN OTHER COUNTRIES

THE general movement in prices was again downward for the month, the weekly budget of retail food prices and the index number of wholesale prices both showing slight decreases.

In retail prices the cost of some 30 staple foods for a week was \$8.46, as compared with \$8.51 in June, owing to slight decreases in mutton, salt pork,

milk, butter, potatoes, beans, evaporated apples and prunes. Beef, however, advanced slightly. Coal and wood, however, averaged somewhat higher. In July, 1915, the same list of foods cost \$7.80, and in July, 1914, \$7.42. All commodities included in the list except milk were higher than a year and two years ago. The rent of a six-roomed

f. Natural gas used. g. Lignite. h. Calculated from the price per 100 lbs. i. Allowing \$1.00 per ton for delivery. \$New potatoes.

house averaged \$4.04, the same as in June, as compared with \$4.10 in July, 1915, and \$4.83 in July, 1914.

In wholesale prices the index number, including 271 commodities, based on the average prices during the decade 1890-1899, stood at 178.8, as compared with 180.6 for the previous month, 150.2 for July, 1915, and 134.6 for July, 1914. The chief decreases for the month were in fodder, cattle, beef, sheep, fresh fruits, soda, raw silks, jute, tallow, metals, and chemicals. Advances, however, occurred in grains, hog products, dairy products, vegetables, breadstuffs, woollens, cotton, flax products, leathers, implements, oils, iron beds, and newspaper. As compared with the same month in 1915 all the groups were higher except grains and fodder, and as compared with July, 1914, all the groups were higher except fish and raw furs.

More detailed information as to the prices movement may be seen in the accompanying tables. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities of Canada having a population of 10,000 or over. The quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workmen. All prices are for delivered goods. The rates for rent are for houses in districts inhabited by workmen.

Retail Prices

Meats advanced in several localities, advances being general at Charlottetown, P.E.I., at Ottawa, Ont., and at Edmonton, Alta., while some lines were up at Toronto and Berlin, Ont. The high price of cattle in the early part of the month was reported as the cause of the advances. At Calgary and Vancouver meats were lower owing to large supplies. It was reported, however, that the cattle being marketed were grass fed and therefore unsuitable for the best quality of meat. At Montreal round steak and rib roast were lower in price.

Mutton was down in British Columbia cities, but was higher in some cities in the other provinces. A shortage was reported at Regina. Both fresh and salt pork were upward at Edmonton and Moosejaw, and fresh pork was higher in some eastern cities also. Bacon and lard advanced in several cities. Fresh fish also advanced.

Eggs advanced in 35 out of 60 cities, but declined at Ottawa, Saskatoon and at Fernie, and at Vancouver, B.C. Milk declined at Sorel, Que. Butter was lower in a number of cities throughout the Dominion, as a result of good pasture. Cheese was down at Westville, N.S., at Newcastle, N.B., Brockville and St. Catharines, Ont., and at Edmonton, Alta., but was up in Amherst, N.S., Sorel, Que., London and St. Thomas, Ont.

Bread was higher at Kingston, Belleville and Woodstock, Ont., and at New Westminster, B.C. Scarcity of labour was reported as a factor in the rise. Flour was higher in price at St. John, N.B., Three Rivers, Que., and Victoria, B.C., but declined at Charlottetown, P.E.I., Lethbridge, Alta., and Vancouver, B.C. Rice and tapioca advanced in several cities.

Canned tomatoes, peas and corn advanced in a number of cities, and it was reported that the crop for the pack this year would be short, also that large shipments to Europe were being made.

Sugar rose at Quebec, St. John's and St. Hyacinthe, Que., but declined at Moncton, N.B., Belleville, Ont., and at Vancouver and Victoria, B.C.

Potatoes were lower in price in a number of cities and new supplies were coming on the market.

Anthracite coal advanced at Halifax, N.S., Charlottetown, P.E.I., Three Rivers and St. Hyacinthe, Que., Peterborough, Orillia, Niagara Falls and Owen Sound, Ont. At Port Arthur and Fort William, Ont., prices were down for the summer. Soft coal advanced at Charlottetown, P.E.I., St. John, N.B., Three Rivers, Que., and Orillia, Ont. Lignite coal was also higher at Edmonton, Al-

berta. Wood was higher at Toronto, the scarcity of labour being reported as the cause. Prices were also higher in Owen Sound, Ont.

In rent no changes were reported.

Wholesale Prices

Grains and fodder.—Manitoba Northern wheat, No. 1, had declined to \$1.10 in June, but rose in July to \$1.25 in the last week. Unfavourable reports of crop conditions in the United States and anticipated scarcity in other countries due to smaller crops than usual were factors in the advance. Ontario winter wheat rose from 97-98c to \$1.03-1.05. Other grains were higher in sympathy with the wheat market. Western barley rose from 71c to 75c. American corn rose from 82c to 93c per bushel. Flaxseed advanced from \$1.58 to \$1.83. Ontario peas rose from \$1.70 to \$1.75-1.85. Ontario rye rose from 94-95c to 96-97c. Oats, however, were in poor demand and declined to 44½c at Winnipeg. Hay declined at Montreal to \$20 per ton and at Toronto to \$16-17. The new crop was reported to be very large. Baled straw declined to \$6-7 per ton. Bran and shorts were steady.

Animals and meats.—Western cattle had risen to high prices at Winnipeg in June for the best quality, being as high as \$9.60 per cwt. In July, however, no choice cattle were offered and good butchers were bringing only \$7.75. At Toronto, cattle declined considerably, choice steers being down from \$11.10 per cwt. to \$8.50. The demand was light during the hot weather. Dressed beef declined, hindquarters being down from \$18.00 per cwt. to \$16.00, and forequarters from \$12.50 to \$12.00 per cwt. Hogs eased off slightly at the middle of the month, but rose later to \$11.50 per cwt. Bacon and hams rose to 25c per lb. Lard declined from 17¼c to 17c. Sheep had declined in the last week in June and were slightly lower in July at \$7.00-8.25.

Dairy products. — Butter had advanced ½c per lb. the first week in July

to 30½c at Montreal, but declined ¾c the next week. In the last two weeks of the month the price rose gradually to 31½c. At Toronto, creamery solids rose 2c per lb. in the last week to 30-31c. Cheese, early in the month, was down in price owing to a lack of orders for export, but the demand improved about the middle of the month and prices rose, reaching 17¾c per lb. at the close. Fresh eggs were up to 35c per doz. at Montreal and Toronto.

Fish.—The Lunenburg catch of cod during the summer season was expected to be about the average and better prices than usual were expected as a good demand was anticipated. The supply of shore fish marketed at Halifax was reported extremely light on account of the poor weather for drying the fish during June and early in July. Later in July the weather was more favourable. The export markets were reported favourable, improvements being reported in Porto Rico. The market for salt fish was also very strong and supplies were short. The catch of spring herring and alewives was below the average. Spring mackerel were selling for \$15.50 per barrel, ex-vessel at Halifax, as compared with \$8.60 last year. Alewives were selling for \$5.00 as compared with \$3.25 per barrel last year, and herring at \$4.50 as compared with \$3.75 a year ago. The market for canned lobsters was improved by the withdrawal of the embargo in France on imports of lobsters. The pack of salmon in British Columbia was reported to be disappointing.

Fruits and vegetables. — Canadian cherries came on the market at 60-75c per basket of 11 quarts and rose to 75-90c. Red raspberries came on at 15-17c per box and declined to 13-15c. Strawberries were down to 7-12c in the first week of the month and the season closed with prices at 8-10c per box. Bananas were 25c per bunch lower at \$1.50-2.25. Lemons advanced from \$4.50 per box to \$5.00, and later in the month were again advancing. Evaporated apples were firm at 8½-9c per lb. Potatoes were steady at \$1.90-2.00 per bag for old stock at

INDEX NUMBERS OF WHOLESALE PRICES BY GROUPS OF COMMODITIES FOR JULY, 1916, JUNE, 1916, JULY, 1915,

*Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. †Cherries, raspberries and strawberries. §Strawberries. ‡Corrected.

Toronto and Montreal. Beans advanced to \$5.00 per bushel. Onions and turnips were off the market. Canned vegetables advanced $2\frac{1}{2}$ c per dozen, corn and peas being up to \$1.00 per dozen and tomatoes \$1.20.

Miscellaneous groceries.—Flour was steady during the month, but toward the end was rising in sympathy with the advancing wheat markets. Some grades of winter wheat flour, however, had risen 10c to 20c per barrel early in the month. Oatmeal advanced to \$3.25 per bag of 98 lbs., and rolled oats to \$2.95 per bag of 90 lbs. Yellow sugar rose to \$7.91 per cwt. at Toronto. Later in the month, however, both granulated and yellow sugar declined 20c per 100 lbs. Glucose rose 10c per cwt. in sympathy with corn. Salt was higher again, fine salt being up from 95c to 99c per barrel and table salt from \$2.43 to \$2.52. Baking soda declined 10c per cwt.

Textiles.—Ontario washed wool rose from 41-45c in June to 47-52c, and unwashed wool rose 4c to 34-37c per lb. A line of woollen underwear advanced 75c per dozen garments. Raw cotton was slightly higher than in June. Coloured cottons and prints averaged slightly higher. Raw silk, both Italian and Japanese, was slightly lower. Jute and hessians were easier. Flax products were up again, sewing twine and linen rope rising 2c per lb.

Hides, leather, boots and shoes.—Hides were steady, but tallow declined to 8c per lb. Leather had advanced again, sole leathers being up to 50-60c per lb. Some lines of leather were also becoming very scarce, so that certain lines of boots and shoes were being discontinued.

Metals and implements.—Iron and steel markets were steady, but some lines of manufactured goods were still advancing owing to high cost of raw material. In other metals many decreases occurred. Aluminium declined 1c per lb. Antimony was down from 35c to 25c per lb. Copper was down 4c at $28\frac{1}{2}$ c per lb. Lead was $\frac{1}{4}$ c easier at 9c. Silver averaged 1c per ounce lower. Spelter declined from 15c to $12\frac{1}{2}$ c per

lb. Tin was down 4c to 42c-43c per lb. Quicksilver, however, recovered part of the decline in June and stood at \$80-83 per flask. Axes rose to \$10.00 per dozen.

Fuel and lighting.—Anthracite coal advanced 10c per ton at Montreal. Connellsville coke was slightly higher at \$2.75 per ton at the ovens. Calcium carbide declined \$5.00 per ton.

Building materials.—In the lumber market there was a good demand for stock for shell boxes. Hard woods were reported quiet but firm. Some shortage was reported in basswood. The demand from farmers in Ontario for building was reported to be less than expected. The lumber market in Montreal was quiet. Exports to United States were only moderate. The demand for lumber for export to England was less, although freight rates had declined considerably. Lead pipe declined 1c per lb. to 13c. Sash cord was higher at 35c per lb. Heavy hinges advanced to \$2.64 per dozen pairs, size 8 in. Copper wire was 3c lower at 30c per lb. Iron wire was higher at \$4.25 per cwt. Galvanized barbed wire fencing was down to \$4.50 per cwt. Linseed oil was firmer at 79-84c for boiled. Shellac was higher at \$2.15 per gallon.

Drugs and chemicals.—Several lines of chemicals showed downward tendencies. Alum declined from \$6.50 to \$6.40 per cwt. Bleaching powder was down $\frac{1}{2}$ c a lb. to 7c. Soda ash fell from 4c per lb. to $3\frac{3}{4}$ c. Carbolic acid was down to \$1.25 per lb. in bottles.

Miscellaneous.—In raw furs, mink advanced, but skunk declined. Hops were slightly easier. Newsprint paper rose to \$2.50 per cwt. Sulphite pulp rose to \$150 per ton. Raw rubber was slightly firmer at 59c per lb.

Prices in Other Countries.

In the United Kingdom the retail prices of foods on July 1 were only slightly higher than a month before, there being a net decrease apart from potatoes, which rose 30 per cent. Flour

a. July of each year. b. Foods.

and bread were about 5 per cent lower, but eggs were up 15 per cent on the average.

In wholesale prices a decline was shown by the Sauerbeck index number, continued by the *Statist*, the first notable decline since the beginning of the war. The greatest fall was in foodstuffs, particularly in meats, but was fairly general except in textiles, which advanced. The fall in wheat and flour was pronounced. The declines were reported to be due mainly to the favourable progress of the war, which induced holders of goods to sell them as protection of stocks for future needs would appear to be less necessary.

The index number of the Economist was also much lower at the end of June than a month earlier, all groups being lower, with the greatest decreases in the principal foodstuffs and minerals.

In Australia the index number of retail prices for foods and groceries in 30 towns declined for April and the index number of wholesale prices of New South Wales produce averaged the same in April as in March, pastoral products being slightly lower and metal products higher.

In New Zealand prices of foods and groceries in May were slightly higher than in April, groceries being lower, but meat and dairy produce up.

In Germany, prices in Berlin were reported on in the British Labour Gazette as follows:

A slight fall (1.7 per cent) was registered in the general level of retail food prices in Berlin during May, according to the returns published in the Prussian official journal *Statistische Korrespondenz*. As a result, the percentage rise since July, 1914, stood at 116.0 in May, as against 119.8 in April. In calculating these percentages allowance is made for the relative importance of the various articles of food in working-class consumption.

The most noteworthy change since April was in the price of beef, for which there came into operation for the first time in May maximum retail prices fixed at a level well below that previously obtaining in the uncontrolled retail trade. On the other hand, meat was so scarce in Berlin in May that a system of rationing was put into force similar to that already in operation as regards bread, flour, butter, sugar and potatoes. According to the *Vossische Zeitung* of May 21 the weekly ration per person had just been fixed at a maximum of $\frac{1}{2}$ lb. of fresh meat or fresh fat, or of both combined.

In Austria retail food prices in Vienna, as published in the official journal *Warenpreisberichte*, were higher in May than in April, the chief increases being in margarine, pork, eggs, potatoes.

In Italy out of the seven commodities included in the index number, bread, flour, beef and milk were lower in April than in March, but bacon and table oil were higher, while macaroni was unchanged.

In the United States at the middle of April retail prices of 15 foods were slightly higher than in March, increases appearing in meats, butter, onions, and sugar, while eggs, cheese and potatoes were lower. In wholesale prices in the United States important decreases appeared in all the published index numbers for July, the greatest decreases appearing in metals and chemicals, but foods were also lower.

INVESTIGATION INTO PRICES OF WHEAT, FLOUR AND BREAD BY THE NEW ZEALAND BOARD OF TRADE UNDER THE COST OF LIVING ACT, 1915.

UNDER the provisions of the "Cost of Living Act, 1915," to establish a Board of Trade and to make provisions for the regulation of trade, the first investigation made by the Board was into "*the prices of wheat, bran, pollard, flour and bread for two years before the outbreak of the war, the fluctuations of*

prices subsequently, and the reasons for fluctuations, present prices and the reasonableness of the present prices."

Under the Act the Board of Trade consists of the Minister of Industries and Commerce, who is President, and three appointed members. The Secretary and other officers of the Board are appointed by the Public Service Commissioner.

DUTIES AND POWERS OF THE BOARD.

The Board of Trade is empowered:

- (a) To investigate and report to the Governor upon any case in which it is alleged that there has been an infringement of any of the provisions of the Commercial Trusts Act, 1910;
- (b) To inquire into and report to the Governor upon matters affecting the cost of living, or upon any other question referred to it by the Governor relating to the supply, demand or price of commodities;
- (c) To inquire into and report to the Governor upon any complaint that the price of any class of goods is unreasonably high;
- (d) To consider, inquire into and report upon any question relating to the trade, commerce or business of New Zealand which may be referred to it by the Governor;
- (e) To institute inquiries in reference to markets for goods produced or manufactured in New Zealand, to report the result of such inquiries to the Governor, and to make recommendations to the Governor in regard to trade with other countries;
- (f) To make recommendations to the Governor for legislation in relation to matters referred to it for consideration; and
- (g) Generally to advise the Governor as to how the trade, industries and commerce of New Zealand can be best encouraged, developed and protected.

The Commercial Trusts Act, 1910, which forbade trusts, combines, associations, etc., for the purpose of affecting the supply, demand or prices of or restraining trade in agricultural implements, coal, petroleum or other mineral oil, tobacco, and also meat, fish, sugar, flour and milling products, was amended by substituting any article of food for these last. The Governor in Council was also empowered to make regulations authorizing and controlling borough councils in the carrying on of business in milk, cold storage, fish trawling, bakeries and brickmaking.

For the purpose of conducting any inquiry the Board was empowered to delegate its powers or functions to one or more members or to any fit person or persons with the approval of the Governor in Council. It was also invested with the powers of a Commission of Inquiry.

The investigation into prices of flour, bread, etc., was conducted by the appointed members of the Commission, who held ten sittings *in camera* owing to the

highly confidential nature of the matters considered, and examined 39 witnesses on oath. Statistics were obtained as to prices in New Zealand and abroad. Attention was concentrated on Canterbury as the chief market and on the west coast of the south island and Nelson.

It was found that the price of wheat was advancing somewhat before the war, but then rose steeply until April, 1915, when it reached 7s. 2d. per bushel, as compared with 3s. 7d.-3s. 8d. for some months before the war. The prices of bran and pollard were found to depend entirely on the demand for feed. The price of bread in Christchurch rose from 6½d. per 4 lb. loaf to 7d. in April, 1914, and reached 7½d. in September. In January, 1915, the price reached 8½d., and in March, 10d. By September gradual declines brought the price to 8½d., where it remained until the investigation began in March, 1916.

Evidence was taken as to the cost of producing bread and for delivery and other expenses. It was found on the average that 670 4lb. loaves could be made from 2,000 lbs. of flour. The following tables show the cost of milling a ton of flour and of making this into bread. At 8½d. per loaf only a reasonable profit was believed to be made.

"Taking as the basis of calculation 46 bushels of wheat to a ton of flour, the cost of a ton of flour will work out as follows:

	£	s.	d.
46 bushels at 4s. 10d.....	11	2	4
Cost of manufacture*.....	1	7	6
Railage to f. o. b.....	0	3	7½
Commission and discount as on selling price of £13.....	0	13	0
	£13	6	5½
Less allowance for offal at mill.....	1	7	8
	£11	18	9½

"Interest on capital has not been included in the above calculation, and no allowance has been made for bad debts.

"The above shows a profit to the miller of £1 1s. 2½d. per ton. If 48 bushels is taken as the basis the profit would amount to 9s. 8d. less.

"Turning now to the manufacture of the flour into bread, and taking the conditions in Christchurch as a standard, we find the cost to be as follows:

*Includes wages, sacks, power, depreciation, interest on stocks, management and clerical, rates and taxes, and other charges.

	£	s.	d.
Flour.....	12	13	6
Potatoes.....	0	8	0
Yeast.....	0	3	6
Salt.....	0	2	0
Improvers.....	0	5	0

Incidental.....	0	2	6
	£17	17	6
Delivery.....	4	2	6
	£22	0	0

"On the outbreak of the war, however, world prices soared rapidly, due to five main causes:

- (a) There was an immediate rise in freights between wheat-exporting countries and England, due mainly to increased war risks and the withdrawal of tonnage from mercantile to war purposes.
- (b) There was an obstruction of supplies not only in the zone of conflict but in Eastern Europe, due to the closing of the Dardanelles.
- (c) The shortage of supplies mentioned above was now generally known, the amount of the world shortage being at least 10 per cent in comparison with the year immediately preceding.
- (d) There was an actual destruction of growing supplies in both France and Poland by the invading Germans.
- (e) Lastly, the psychological factor—the fear of famine prices—caused somewhat of a panic in the chief wheat markets.

"In normal times increase of price of a commodity induces economy in its use and automatically attracts further supplies, and thereby tends to provide its own remedy. In the case of flour, however, where consumption varies little, notwithstanding price, these considerations do not apply. In the abnormal and unprecedented conditions prevailing from August to December, 1914, a serious crisis would probably have occurred if the distribution of available stocks had been left to the ordinary working of the law of supply and demand. No doubt a little economy in consumption was practised, and the high price of wheat proved a sufficient inducement to farmers to increase the acreage under wheat cultivation, but long before these factors could have affected the situation the poorer classes would have been faced with prices beyond their ability to pay. What undoubtedly steadied the market was the Government purchase of Canadian and Australian wheat, as it acted immediately on what we termed the psychological factor, and lessened, if it did not entirely end, the demand due to 'panic' orders.

"In considering the question of reasonableness of the prices prevailing to-day for wheat we have come to the conclusion that although substantially higher than pre-war prices, they are no higher than prices at which foreign wheat could be landed in New Zealand, and in this sense they are reasonable. We have come to the conclusion from the evidence before

us that no proportion of the prices of flour and bread is attributable to the existence of definitely constituted 'rings' or close corporations among either millers or master bakers, but there are evidently opportunities of conference among these chiefly concerned which do in effect commonly lead to concerted action with respect to prices. For the purposes of comparison, the Board had hoped to append a statement showing the wholesale prices of the commodities dealt with in the report not only in New Zealand, but in London, the Dominion of Canada, and the Commonwealth of Australia. Owing, however, to the lack of statistical information in New Zealand, the Board has not been able to obtain the complete information. The data will, however, be collected and published later.

"The millers in Christchurch comprising those selling through the New Zealand Flour and Produce Company (Limited) and the other local millers are, owing to lack of outside competition, able to obtain from 10s. to £1 per ton more in the Christchurch market than they can obtain in markets supplied by sea carriage where the price is fixed in competition with mills in other parts of the Dominion. The difference in the cost of flour in Christchurch and f.o.b. Timaru and Lyttelton—namely, from 10s. to £1 per ton,—appears to be unwarranted."

RECOMMENDATIONS.

"The impression left upon our minds by the evidence and information before us is that the distribution of the food-supply of the Dominion cannot safely be left in a time of crisis to the working of an unregulated system of supply and demand; and we consider that the situation as regards prices of flour and by-products of wheat should be closely and continuously watched with the aid of returns that should be periodically furnished through the Government statistician to the Board of Trade. We therefore recommend that it be enacted that millers and recognized dealers in grain should be registered with the Board of Trade, and should furnish from week to week quantities of wheat purchased and prices paid. Appropriate penalties should be provided for omitting to furnish, or furnishing false returns. It would be the duty of the Board, in conjunction with the Government statistician, to collate the information thus supplied, and weekly to publish an official quotation of the actual market prices. At present the leading newspapers publish weekly quotations, and we are in possession of evidence that the publication of unreliable information by speculators has on occasions artificially raised the price of wheat to genuine dealers, and detrimentally affected the industry generally. We further recommend that the threshing mill proprietors be required to register with the Board of Trade, and send weekly returns of quantities of grain threshed to the Government statistician. Appropriate penalties should be provided for failure to comply.

"We have considered the question whether the fixation of maximum prices by legal enactment for wheat, flour and bread, or by the method of 'recommended prices,' which was adopted in England shortly after the outbreak of the war, would be best suited to the conditions prevalent in New Zealand. There are difficulties to be encountered under either system, but on the whole we prefer the latter method, and suggest that the following table should be the recommended prices, subject to alterations by the Board of Trade as may be required by changing conditions from time to time:

Wheat (delivered at Mill)			Flour (f. o. b.)		Bread (Cash over Counter)
	s. d.	s. d.	£	s. d.	d.
At.. .. .	3 9		9	10 0	6
"	3 9	to 4 0	10	0 0	6
"	4 0	" 4 3	10	10 0	6
"	4 3	" 4 6	11	5 0	6½
"	4 6	" 4 9	11	15 0	6½
"	4 9	" 5 0	12	5 0	6½
"	5 0	" 5 3	13	0 0	7

"As pointed out, the majority of master bakers discourage over-the-counter sales of bread by charging the customer who purchases his requirements in the shop the same price as for delivery. We recommend that a relative over-the-counter price be made compulsory. This provision should apply to the four main centres and the secondary towns."

An appendix to the report covers the results of the investigation carried further in other parts of the Dominion. It was found that in these parts automatic baking was more fully developed and if automatic establishments were run full time it would enable a reduction in the price of bread to be made.

"The price of flour manufactured in the Auckland Province is fixed in keen competition with flour from the southern mills, and consequently nothing in the nature of a ring or combine exists.

"The price of bread is governed by the price of flour, but, as the figures given in a subsequent paragraph will show, did not rise during the early part of 1915 proportionately as high as flour. Two explanations were offered in evidence.

- (a) Bakers feared the result of public opinion on their business if bread were retailed at a higher figure than 5d. per 2 lb. loaf.
- (b) It was thought that the high price of flour was only temporary.

"Flour, however, remained at a high price during the first eight months of the year, and we are satisfied that during this period the bakers lost money. When flour commenced to fall in price in August, 1915, bread was not immediately reduced in sympathy. No reduction took place until November, when a drop of ½d. per a lb. loaf (delivered) occurred in Auckland City, but not in the outlying districts.

"As flour is considerably lower now than it was from February to September, 1915, a drop in the price of bread should follow in the towns outside Auckland. In fact, during our visit to Thames the bakers voluntarily agreed to bring thier prices into line with the prices prevailing in Auckland, and we are of the opinion that in the country districts the same price should be charged as in the city, as cheaper rents, horse-feed, etc., would counterbalance railway freights on flour.

"In all the towns visited there are associations of bakers who fix retail prices; but no compulsion appears to be used to ensure that the arranged price should be adhered to. There is nothing to prevent any one who thinks that undue profits are being made from commencing business on his own account. In Auckland City a number of firms are outside the association and sell at a lower price than the association. These firms, from the evidence submitted, appear to be generally short-lived."

FAIR WAGES CONTRACTS, JULY, 1916

SIX fair wage contracts were received by the Department of Labour for insertion in the *Labour Gazette*, four of which were awarded by the Department of Public Works and two by the Department of Railways and Canals. Two of the contracts awarded by the Department of Public Works contained fair wage schedules and the other four contained the fair wage clause providing for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post

Office Department subject to the Regulations for the Suppression of the Sweating System.

Fair Wages Schedules

DEPARTMENT OF PUBLIC WORKS.

Backfilling and retaining wall, West St. John, N.B. Name of contractor, The Maritime Dredging & Construction Company, Limited, St. John, N.B. Date of contract, July 15, 1916. Schedule of prices.

Trade or class of labour.	Rate of wages. Not less than the following rate:
Foreman carpenter.....	\$ 3.50 per day of 8 hours
Carpenters.....	3.00 " 8 "
Blacksmith.....	2.50 " 9 "
Blacksmith's helpers.....	1.80 " 9 "
Ordinary labourers.....	22½c. per hr., 9 hours per day.
Driver with 1 horse and cart..	3.00 per day of 9 hours
Driver with 2 horses & wagon	5.00 " 9 "
Dredge captain.....	150.00 pr. m'th. & board
First dredge engineer.....	150.00 " "
Dredge fireman.....	60.00 " "
Tug captain.....	110.00 " "
Tug engineer.....	85.00 " "
Tug fireman.....	50.00 " "
Scow and deckhands.....	55.00 " "
Dredge craneman.....	106.00 " "
Cook (male).....	40.00 " "

Building for riding school for Royal Military College, Kingston, Ont.—Name of contractor, Kingston Construction Company, Limited, Kingston, Ont. Date of contract, July 24, 1916. Amount, \$29,000, and for additional concrete \$8 per cubic yard and for additional facing stone \$10 per cubic yard.

Trade or class of labour.	Rate of wages. Not less than:
Stonecutters.....	50c. per hour, 8 hrs. pr. day
Masons.....	50c. " 8 " "

Man, horse and cart.....	\$3.50 per day of 9 hours
Man, two horses and wagon..	5.00 " 9 "

Fair Wages Clauses

This contract is made subject to the regulations made by Order in Council dated the third day of March, 1906, under and by virtue of the Public Works (Health Act), 1899.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

The contracts containing the above clauses follow:

DEPARTMENT OF PUBLIC WORKS.

Boarding house on forest nursery station, Sutherland, Sask. Name of contractor, R. B. McLeod and R. B. Arrand, Saskatoon, Sask. Date of contract, June 24, 1916. Amount, \$3,665.

Dredging the channel, Grand River, Port Maitland, Ont. Name of contractor, Great Lakes Dredging Company, Limited, Port Arthur, Ont. Date of contract, July 20, 1916. Contract

price: Class "B," 12 cents per cu. yd. (*in situ*).

The said contractors further agree and bind themselves to pay to the workmen engaged in the said work such rates of wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district where the work is to be carried on, and if there are no current rates of wages in the district, then fair and reasonable rates; in the event of a dispute arising as to what is the current or a fair and reasonable rates of wages for any of the classes of labour required, it shall be determined by the Minister of Labour, whose decision shall be final.

DEPARTMENT OF RAILWAYS AND CANALS.

Construction of a branch line of railway from a point on its line as located, situated near the Spirit River Settlement, to and through the Grande Prairie Land District, Alberta; not exceeding 60 miles. Railway company, The Edmonton, Dunvegan and British Columbia Railway Company. Date of subsidy agreement, July 12, 1916. Amount of subsidy, \$384,000.

General Clauses.

Manufacture and erection of the steel superstructure and the timber floor of the Kettle Rapids Bridge, situated on the line of the Hudson Bay Railway at

the crossing of the Nelson River, three hundred and thirty-two miles from Le Pas, in the Province of Manitoba. Name of contractor, The Canadian Bridge Company, Limited, of Walkerville, Ont. Date of contract, July 14, 1916. Amount, schedule rates.

General Clauses.

POST OFFICE DEPARTMENT.

During the month of June, payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 874.56
Making and repairing rubber dating stamps and type; also other stamps.....	91.47
Supplying stamping material and repairing stamping pads.....	1,711.77
Repairing post office scales.....	34.85
Supplying mail bags.....	1,844.94
Repairing mail bags.....	2,247.98
Supplying mail bag fittings.....	713.75
Repairing parcel post hampers.....	30.75
Repairing railway mail clerks' tin travelling boxes and steel portable letter boxes....	54.65
Repairing miscellaneous articles of postal stores.....	17.55
Making and supplying articles of official uniform.....	442.50

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN CANADA DURING THE SECOND QUARTER OF 1916

IN the accompanying statistical table detailed information is presented relating to changes in rates of wages and hours of labour reported to the Department of Labour during the second quarter of 1915. In this period there were in all 46 changes, affecting over 18,800 employees, all of whom received increases in wages. About 60 employees were also granted a reduction in hours. The number of changes was 28 more than in the first quarter of the present year and 31 more than in the second quarter of 1915. The number of employees affected was about 7,000 more than in the previous quarter, and about 13,600 more than in the corresponding period of 1915.

The following table shows the approximate number of employees affected by changes which took place in the different trades and industries:

Trade or Industry.	No. of Changes.	No. of Employees affected.
Lumbering.....	1	40
Mining.....	5	10,980
Building trades.....	7	835
Metal trades.....	5	4,154
Clothing trades.....	1	317
Food and tobacco preparation....	1	375
Printing trades.....	2	300
Leather trades.....	1	...
Street railway employees.....	6	256
Railway service.....	8	992
General transport.....	5	415
Civic employees.....	1	24
Miscellaneous trades.....	2	7
Unskilled labour.....	1	17
Total.....	46	18,812

Changes in Industries and Trades

The following is a statement of changes in wages and hours according to the industry affected:

Lumbering.—Forty deal carriers at Newcastle, N.B., received an advance from \$2 to \$2.25 per day.

Mining.—On May 1 the Cobalt Mine Managers' Association voluntarily increased the wages of all underground workers by 25 cents a shift, and in addition declared they would give a bonus of 25 cents a shift to both underground and surface men, when the price of silver averages over 70 cents per oz. for the previous month. About 1,200 men were affected by the change.

On May 1 an increase of 5 cents per day was granted by the Nova Scotia Steel and Coal Company to 480 coal miners at Sydney Mines, N.S., and on June 1 a further increase of from 5 to 10 per cent was granted by the same company to 1,600 coal miners and pier men, including those who had received the 5 per cent increase on May 1.

On May 15 an advance of 20 and 25 cents per day and 8 per cent on tonnage or yardage was granted to 1,000 coal miners at Stellarton, N.S., by the Acadia Coal Company, in accordance with the findings of a Board under the Industrial Disputes Investigation Act.

On June 1 an advance of 6 per cent was granted in the wages of the employees of the Dominion Steel Company,

which affected about 6,700 coal miners and piermen at Glace Bay, N.S.

Building trades.—On June 1, 100 bricklayers and masons at Windsor, Ont., were granted an advance from 62½ to 65 cents per hour. An increase from 35 to 40 cents per hour was granted on June 1 to 150 carpenters at Ottawa employed on Government work. On May 1, 200 carpenters at Hamilton, Ont., received an increase from 40 to 42½ cents an hour, and 130 carpenters at Niagara Falls obtained an increase from 45 to 50 cents per hour. On April 18 the wages of 45 carpenters employed by the city of Calgary were advanced from 45 to 50 cents per hour. During April 60 painters, decorators and paperhangers at Halifax, N.S., received an advance in wages from 37½ to 40 cents per hour, and a reduction in hours from nine to eight per day. On May 1, 150 painters, decorators and paperhangers at Hamilton, Ont., were granted an increase from 35 to 37½ cents per hour.

Metal trades.—On May 22 about 39 machine fitters and drillers at Peterborough, Ont., received an advance in wages amounting to \$2.75 per week as the result of a strike.

On May 1, 35 moulders and helpers at Brockville, Ont., received an increase of 10 per cent for piece work, representing an advance in earnings from \$20 to \$22 per week, and an advance of 25 cents per day for day work, being from \$16.50 to \$18 per week.

On May 1 the wages of 73 sheet metal workers at Hamilton, Ont., were advanced from 37½ to 40 cents per hour.

About 4,000 steel workers at Sydney, N.S., had their wages advanced 6 per cent by the Dominion Steel Company on June 1.

On June 5 seven labourers in a shrapnel factory at Dundas, Ont., received an increase of 25 cents per day, raising their weekly earnings from \$11 to \$12.38.

Clothing trades.—During April, customs tailors of 15 establishments in

Montreal were granted an increase in piece work prices, raising their wages from about \$10 to \$14 or \$15 per week. About 317 journeymen tailors benefitted by this increase.

Food and tobacco preparation.—On May 12 a general increase of 10 per cent was granted to 375 employees of a cereal and flour mill at Peterborough, Ont.

Printing trades.—As the result of a friendly conference, about 300 printers working on the six daily newspapers of Toronto were granted an increase in wages. Those working on morning papers were granted an advance from \$23 to \$24 a week, and those on evening papers from \$21 to \$22 a week. Apprentices are to receive an increase of \$1 per week every six months. The agreement is to run for one year from June 1, 1916.

A new agreement was signed between the Ottawa Printing Pressmen and Assistants' Union and twelve employing firms, to remain in force from April 17, 1916, to September 2, 1918. By this agreement the wages of pressmen are advanced \$2 per week, and the rates for feeders and assistants are advanced \$3 per week.

Street railway service.—On June 1 the wages of 27 motormen and conductors at Brantford, Ont., were advanced 2½ cents per hour, from 17, 19 and 20 cents per hour to 19½, 21½ and 22½ cents respectively. The change was brought about by conciliation under the Industrial Disputes Investigation Act.

On May 1, 20 motormen, conductors and brakemen of Chatham, Ont., received an advance of 2 cents per hour in their wages.

On June 10 the wages of the employees of the Hull Electric Railway Company, at Hull, Que., were advanced on their request. Sixty motormen and conductors were advanced from a scale of 20 to 23 cents to a scale of 22 to 25 cents per hour; 20 trackmen from a rate of 18½ to 23 cents to a rate of 19 to 24

cents; 23 car repair men from a rate of 20 to 30 cents to a rate of 22 to 32 cents per hour, and 12 power house men from a rate of \$47.50 to \$57.50 to one of \$52.50 to \$62.50 per month.

On June 1 the wages of 40 motormen and conductors of Fort William, Ont., and a similar number at Port Arthur were granted an increase in wages from a scale of 24 to 32 cents to a scale of 26 to 33 cents per hour.

On April 15, 40 motormen and conductors of St. Thomas, Ont., received an advance in wages from 22 to 25 cents per hour.

Railway service.—On April 1 the wages of sectionmen on the Michigan Central lines and the Toronto, Hamilton and Buffalo lines in Ontario were increased. In the case of the former company, 91 section foremen were advanced from a scale of \$62.50 to \$82.50 to a scale from \$70 to \$87.50 per month. One assistant foreman was advanced from \$72.50 to \$87.50 per month, and four from \$67.50 to \$75 per month. The wages of 585 section men were advanced from a scale of \$1.75 to \$1.80 per day to one from \$1.85 to \$1.90 per day. In the latter company, 24 section foremen earning \$67.50 and \$82.50 per month were advanced to \$72.50 and \$87.50, and the pay of 65 section men was raised from \$1.75 to \$1.90 per day.

The following changes took place at Hamilton, Ont. Eleven watchmen were advanced from \$42.50 to \$45 per month, eight gatemen from \$45 to \$50 per month, 50 porters and freight handlers from 17½ to 21 cents per hour, and 50 freight handlers, door checkers and checkers from 17 cents to 20 cents per hour, from 18 cents to 21 cents per hour, and from \$50 to \$65 per month respectively.

On April 1, 81 porters and freight handlers at London, Ont., were advanced from 18 cents to 20 cents an hour, and on the same date 22 freight handlers

at Niagara Falls, Ont., were advanced from 18½ to 20 cents per hour.

In April roundhousemen and trackmen at Truro, N.S., received an increase of 10 cents per day and 5 cents per day respectively.

General transport.—Seamen on the Pacific coast, including 100 quarter-masters, 20 winchmen, and 300 able-bodied seamen, received advances of \$5 per month. On May 8, 40 drivers of milk wagons at Hamilton, Ont., were granted an increase from \$12 to \$13 per week, with a two per cent commission on sales. Seven coal handlers at Brockville, Ont., had their wages raised from \$2 to \$2.25 per day. On April 1 the Kingston Board of Works increased their pay to teamsters from 40 cents to 50 cents per hour for man and team. These men are hired from time to time as the city does not own teams. On June 19 an increase in wages was granted by the city of Winnipeg to teamsters and drivers employed in scavenging; 25 teamsters received an advance from \$15.12 to \$17.55 per week, one teamster from \$16.50 to \$18.50 per week, and 22 drivers with one horse were advanced from \$15 to \$17 per week. Sunday attendance at the stables was also abolished except for three men each week, who received \$3 extra for Sunday work, the men taking this work in turn.

Civic employees.—The salaries of police constables at Windsor, Ont., were increased by various amounts, but they ceased to receive fees for arrests. Twenty-four men were affected by these increases.

Miscellaneous trades.—On May 31, seven theatrical stage hands at Hamilton, Ont., were granted an increase from \$16 to \$20 per week and 10 cents per hour extra for overtime.

Unskilled labour.—On May 10, 17 unskilled labourers at Peterborough, Ont., were granted an advance from 20 to 25 cents per hour.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY, 1916

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Department of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the Inspector of Factories of Ontario, Ontario Railway and Municipal Board, the Bureau of Labour of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

DURING July, 1916, industrial accidents were responsible for 74 fatalities and 415 workpeople being seriously injured. The record for the month of June was 55 killed and 357 injured, and that for July, 1915, was 64 killed and 440 injured. A comparison of the July and June records shows that there were 19 more workpeople killed and 58 more injured in July, and a comparison with July of a year ago indicates an increase of ten fatalities and a decrease of 25 in the number of workpeople injured this year.

The following is a record of the accidents of the month by industries and groups of trades:

STATEMENT OF ACCIDENTS DURING THE MONTH OF JULY, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	3	11	14
Lumbering.....	3	8	11
Mining.....	6	13	19
Railway construction & canal	2	1	3
Building Trades.....	4	27	31
Metal Trades.....	9	149	158
Woodworking Trades.....	10	10
Printing and allied trades...	2	2
Clothing.....	2	2
Textile.....	3	3
Food, Tobacco and Liquor Preparation.....	2	8	10
<i>Transportation:—</i>			
Steam Railway Service...	18	82	100
Electric Railway Service..	3	2	5
Navigation.....	8	6	14
Miscellaneous.....	10	40	50
Public Employees.....	8	8
Miscellaneous Skilled Trades	3	34	37
Unskilled Labour.....	3	9	12
Total.....	74	415	489

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING JULY, 1916.

Trade or Industry.	Locality	Date	Number	Cause of fatality.
<i>Agriculture—</i>				
Farmer.....	Effingham, Ont.....	July 7	1	Fell from load of hay.
Farmer.....	Hanna, Alta.....	" 24	1	Run over by a disc harrow.
Farm labourer.....	Norwood, Ont.....	" 15	1	Crushed by falling whey barrel.
<i>Lumbering—</i>				
Sawmill employee.....	Ste-Anne de la Pêrade, Que.	" 4	1	Struck by flying piece of lumber.
Sawmill employee.....	Nakusp, B.C.....	" 28	1	Mangled by circular saw.
Donkey tender.....	Roche Point, B.C.....	" 18	1	Struck by a falling tree.
<i>Mines, metalliferous works and quarries—</i>				
Miner.....	Thetford Mines, Que.....	July 6	1	Struck by falling box of rock.
Miner (Dom. Col. No. 1)...	Glace Bay, N.S.....	" 3	1	Fall of rock.
Miner (Col. No. 15).....	New Waterford, N.S.....	" 14	1	Fall of rock.
Miner (Reserve mine).....	Glace Bay, N.S.....	" 24	1	Fall of rock.
Miner.....	Blairmore, Alta.....	" 6	1	Fall of rock.
Miner.....	Coal Creek, B.C.....	" 23	1	Crushed by runaway mine cars.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING JULY, 1916 (Cont'd)

Trade or Industry.	Locality.	Date	Number	Cause of fatality.
<i>Railway & Canal Construction—</i>				
Conductor.....	West Bay, N.S.....	" 13	1	Falling from and runover by construction train
Construction foreman....	(C.N.R. Tunnel) Montreal.	" 22	1	Run over by a locomotive.
<i>Building trades—</i>				
Building contractor.....	Montreal, Que.....	" 12	1	By a fall.
Structural iron worker....	Donnacopa, Que.....	" 4	1	Struck by falling iron bridge girder.
Carpenter.....	St. Claude, Que.....	" 12	1	Fell from barn roof.
Painter.....	Verdun, Que.....	" 25	1	Overcome by intense heat.
<i>Metal, engineering and ship-building trades—</i>				
Metal worker.....	Hamilton, Ont.....	" 5	1	Struck by a crane.
Metal worker.....	Toronto, Ont.....	" 13	1	Electrocuted.
Steel Worker.....	Longue Point, Que.....	" 6	1	By a fall.
Cartridge factory emp....	Brownsburg, Que.....	" 19	1	Accidentally shot, while acting as marker during ammunition test.
Lineman.....	Calgary, Alta.....	" 12	1	Electrocuted.
".....	Trail, B.C.....	" 8	1	"
".....	New Glasgow, N.S.....	" 14	1	"
".....	Kingston, Ont.....	" 10	1	"
".....	Quebec, Que.....	" 26	1	Fell from pole.
<i>Food, tobacco and liquor preparation—</i>				
Sugar refinery employee...	Halifax, N.S.....	" 20	1	Electrocuted.
Abattoir employee.....	Toronto, Ont.....	" 17	1	Fell from gang-plank.
<i>Steam railway service—</i>				
Conductor.....	London, Ont.....	" 26	1	Rear-end collision.
Fireman.....	Stratford, Ont.....	" 11	1	Crushed between locomotive and a car standing "foul" on siding.
Brakeman.....	Hamilton, Ont.....	" 5	1	Struck by a train.
".....	Cornell, Ont.....	" 28	1	Fell from locomotive.
".....	Windsor, Ont.....	" 18	1	Crushed between cars.
".....	London, Ont.....	" 26	1	Rear end collision.
".....	Shelburne, N.S.....	" 31	1	Crushed between cars.
".....	Victoriaville, Que.....	" 2	1	Runover by locomotive.
Yardman.....	Ottawa, Ont.....	" 7	1	Runover by cars.
Yardman.....	Toronto, Ont.....	" 28	1	Struck by a locomotive.
Car repairer.....	Chatham, Ont.....	" 12	1	Crushed by a car.
Sectionman.....	Salisbury, N.B.....	" 11	1	Deraiment of hand car.
Sectionman.....	St. Andrews, Que.....	" 21	1	Crushed by falling earth.
Employee.....	M.P. 25, Mountain, S.D.....	" 2	1	Fell from and runover by train.
".....	M.P. 47, Brandon, S.D.....	" 8	1	Struck by a train.
".....	Maple Creek, Sask.....	" 12	1	Runover by a train.
".....	St. James, Man.....	" 11	1	Runover by a locomotive.
".....	Westminster, B.C.....	" 16	1	Fell from and runover by a train.
<i>Electric railway service—</i>				
Conductor.....	St. Louis de Courville, Que.	" 10	1	Fell from a car.
Conductor.....	Chatham, Ont.....	" 24	1	Fell from a car.
Employee.....	Toronto, Ont.....	" 11	1	Fell, attempting to board a moving car.
<i>Navigation—</i>				
Canal Pilot.....	Lock 20, Welland Canal...	" 2	1	Fell through hatchway of barge.
Deckhands.....	Quyon, Que.....	" 27	4	Burned in fire which destroyed steamer.
Deckhand.....	Lachine, Que.....	" 29	1	Drowned, fell between vessel and wharf.
Deckhand.....	Montreal, Que.....	" 26	1	Drowned, fell from wharf.
Dredgehand.....	Quebec, Que.....	" 8	1	Drowned, struck by a dredge cable, and knocked into the water.
<i>Miscellaneous transport—</i>				
Express driver.....	Winnipeg, Man.....	" 23	1	Thrown from wagon.
Carter.....	Montreal, Que.....	" 23	1	Overcome by intense heat.
Warehouse employee.....	Toronto, Ont.....	" 17	1	Fell from railway car.
Night wharf clerk.....	Kingston, Ont.....	" 16	1	Drowned, fell from wharf.
Longshoremen.....	St. John, N.B.....	" 12	3	Crushed by falling bags of sugar in hold of [vessel.
".....	Montreal, Que.....	" 24	1	Drowned, fell from gang-way.
".....	Campbellton, N.B.....	" 28	1	Drowned, fell from vessel.
".....	Montreal, Que.....	" 31	1	Fall.
<i>Miscellaneous skilled trades—</i>				
Factory employee.....	Dragon, Que.....	" 28	1	Mangled in a cotton separator.
Hotel Bell boy.....	Montreal, Que.....	" 10	1	Crushed by an elevator.
Messenger Boy.....	Ottawa, Ont.....	" 12	1	Crushed by an elevator.
<i>Unskilled labour—</i>				
Labourer.....	Hamilton, Ont.....	" 12	1	Overcome by intense heat.
".....	Longue Pointe, Que.....	" 6	1	Crushed by falling earth as the result of cave-in trench.
".....	Montreal, Que.....	" 10	1	Runover by a wagon.

TABLE OF NON-FATAL ACCIDENTS DURING JULY, 1916.

TRADE OR INDUSTRY.	CAUSES.																															Total.			
	Falling and rolling material.	Machinery.	Fall.	Struck by flying objects.	Burned and scalded.	Falling from locomotives and cars.	Falling from, run over and crushed by horse and motor driven vehicles.	Handling tools.	Struck, run over and crushed by locomotives and cars.	Derrailment of locomotives and cars.	Horse and motor-driven vehicles struck by electric street cars.	Kicked and otherwise injured by horses.	Nails, wire and sharp-edged objects.	Overcome by smoke and noxious fumes.	Cut by glass.	Overcome by intense heat.	Collision of locomotives and cars.	Explosions.	Injured by elevators.	Overstrained.	Injured by trucks, lorries, wheelbarrows.	Handling material.	Injured by farm machinery.	Struck protruding object passing same on cars.	Injured by appliances on locomotives and cars.	Injured by mine cars and mine machinery.	Shocked and burned by electricity.	Injured handling fire hose.	Crushed by a car door.	Septic poisoning.	Collision of vehicle with street pole.		Collision of horse and motor-driven vehicle.	Injured by whip handle.

REVIEWS.

United States.—Union Scale of Wages and Hours of Labour, May 1, 1915. Bulletin of the United States Bureau of Labour Statistics. Whole Number, 194. May, 1916. 295 pp.

This bulletin presents the union scale of wages and hours of labour prevailing on May 1, 1915, in the principal trades and occupations in 47 important industrial cities in the United States. Within these 47 cities

live approximately one-fifth of the total population, two-fifths of the urban population and one-third of the total number of persons engaged in gainful occupations (not including those in agricultural pursuits) in continental United States. The figures cover 676,571 union members. The trades and occupations covered are divided into 11 groups, as follows:

Bakery trades.
Brewery and bottling-house workmen.
Building trades.
Chauffeurs, teamsters and drivers.
Freight handlers.
Granite and stone trades.
Metal trades.
Millwork.
Printing and publishing: book and job.
Printing and publishing: newspaper.
Soft-drink establishment employees.

Table I shows for each trade and for each year for which data are available the per cent of increase in rates of wages per week on full time in 1915 as compared with each of the eight years preceding in all cities covered, taken collectively. In the bakery trades the increase in 1915 was 1 per cent as compared with 1914, and 3 per cent as compared with 1913. In the brewery and bottling-house trades there was no change in 1915 as compared with 1914 for coopers, elevator men and packers (bottle beer). The per cent increase for 1915 as compared with 1914 for other workmen of this group ranged from 1

per cent for brewers, chauffeurs and drivers, engineers, firemen, stablemen, washers, wash-house men and watchmen to 3 per cent for bottlers and labelers (bottle beer) and 4 per cent for miscellaneous occupations. In the building trades the rate of wages per week for full time was 1 per cent lower in 1915 than in 1914 in the case of building labourers. Sixteen of the 34 trades in this group reported increases of from 1 to 4 per cent, while in the remainder there was no change. In the chauffeurs, teamsters and drivers' group, teamsters and drivers received an increase of 1 per cent in 1915 as compared with 1914, while chauffeurs and miscellaneous occupations reported no change. The freight handlers' group also reported no change. In the granite and stone trades, stone cutters received an increase of 1 per cent in 1915 as compared with 1914, while for granite cutters wages remained the same. In the metal trades 9 of the 10 groups reported no change, and for the other, blacksmiths' helpers, no data was available. In mill work, carpenters received an increase of 1 per cent, and painters, hardwood finishers, a 4 per cent increase. In printing and publishing, book and job, 7 of the 10 trades reported no change, compositors received an increase of 1 per cent, electrotypers, battery men and builders an increase of 3 per cent, electrotypers, finishers and molders an increase of 2 per cent. In printing and publishing, newspaper, 7 of the 12 groups reported no change, while compositors (day work), linotype operators (day work), linotype operators (night work), pressmen, web presses (day work), and pressmen, web presses (nightwork), reported an increase of 1 per cent. In soft-drink establishments, bottlers received an increase of 3 per cent, chauffeurs and drivers of 1 per cent, and miscellaneous occupations 3 per cent.

Reductions in full time hours per week in 1915 as compared with 1914 were reported by bottlers, brewers, elevator men, labelers (bottle beer), maltsters, packers (bottle beer), washers and wash-house men in the brewery and bottling house trades. In the building trades, shorter hours were reported by elevator constructors, elevator constructors' helpers, inside wire men, fixture hangers, lathers, plasterers, and tile layers' helpers. Chauffeurs, teamsters, and drivers also reported shorter hours. No reductions were reported by freight handlers, granite and stone trades, metal trades, mill workers, and the printing and publishing trades. Among soft-drink establishment employees there was a reduction in hours for the bottlers and miscellaneous occupations.

The following table of index numbers of union wage rates and hours of labour and of retail prices of food, 1907 to 1915, shows an advance in the retail price of food considerably greater than in rates of wages per hour and in full-time week-ly wages:

(1915=100)

Year.	Rates of wages per hour.	Full-time hours per week.	Rates of wages per week, full time.	Retail prices of food
1907.....	87	103	90	81
1908.....	89	103	91	83
1909.....	90	102	91	87
1910.....	92	102	93	91
1911.....	94	101	94	90
1912.....	95	101	96	96
1913.....	97	101	98	98
1914.....	99	100	99	101
1915.....	100	100	100	100

As wages advance, more food can be bought by wages if food remains the same in price. If food advance and wages remain stationary, the quantity of food purchasable by wages diminishes, and if wages and food advance in an equal extent the amount of food purchased by wages remains the same. The

following table of index numbers of the purchasing power of union wages as measured in food shows that while wages and food have both advanced between 1907 and 1915 the advance in the retail price of food has been greater, and a diminishing purchasing power of wages is therefore indicated:

(1915=100).

Year.	Purchasing power measured in retail prices of food.	
	Of rates of wages per hour	Of rates of wages per week, full time.
1907.....	108	111
1908.....	107	109
1909.....	103	105
1910.....	101	102
1911.....	103	104
1912.....	99	100
1913.....	99	100
1914.....	99	99
1915.....	100	100

United States.—Statistics of Industrial Accidents, 1914. Special Bulletin of the State of New York Department of Labour, issued under the direction of the Industrial Commission. No. 75. Prepared by the Bureau of Statistics and Information. 77 pp.

Part I of the report presents statistics of industrial accidents reported to

the Department of Labour for the year ending September 30, 1914.

Knowledge of Machine Guards is still Elementary While the total number reported for 1914 was

greater than for any preceding year, this does not mean a proportionate increase in the number of accidents, as a part of the increase was due to more complete reporting. It is believed that the reports for 1914 are more complete than for any previous year.

Of the 88,314 reported accidents, 26.7 per cent were chargeable to power machinery; 24.4 per cent to weights and falling objects; 19.1 per cent to miscellaneous causes such as knocking against objects, stepping upon or striking against nails, handling sharp objects,

flying objects whose source is unknown; poisonous gases, etc. Hand tools were responsible for 10.8 per cent; 9.6 per cent were due to fall of the person; 6.9 per cent to heat and electricity; and 2.5 per cent to vehicles and animals. In factories 31.7 per cent of all accidents were chargeable to power machinery, while in mines and collieries 48.0 per cent were chargeable to weights and falling objects. In the building trades 36.0 per cent were due to this cause.

Part II discusses the relation of guards to accidents in a selected number of investigated cases. The accidents selected for investigation were either serious cases resulting in death, dismemberment or long-time disablement, or cases where violation of the law might be suspected. With due recognition of certain limitations the findings of the investigation may be summarized as follows: (1) in over one-third of all accidents investigated and in over one-half of those occurring at two kinds of machinery — gearing and elevators — no guards were provided at the time of the accident; (2) in over one-tenth of all accidents investigated and in over one-quarter of those occurring at planers and jointers, guards were provided but were not in use at the time of the accident; (3) over one-third of all accidents investigated and nearly one-half of those occurring at saws, planers and jointers, happened in spite of the fact that according to the reports of the inspectors the machines were guarded as fully as possible at the time of the accident; (4) the inspectors reported that in over one-sixth of all accidents investigated and in nearly one-third of those occurring at stamping machines and miscellaneous machines, guards were not practicable.

These findings lead to the conclusion that neither employers nor employees recognize the necessity of utilizing to the fullest extent the known means of guarding machinery to prevent accidents, and also that our knowledge of practicable and effective machine guards is still elementary.

Part III deals with causes of fatal industrial accidents. In considering fatal accidents those caused by three catastrophes are omitted as it is more desirable to know the normal expectancy of fatal accidents than to know the catastrophe expectancy. With these limitations the per cent distribution of 1,081 fatal accidents in factories for the four years from 1911 to 1914 inclusive is as follows: mechanical power 42.3, heat and electricity 23.9, fall of person 18.4, weights and falling objects 7.5, and miscellaneous 7.9.

Three very complete tables are appended giving a detailed analysis of the causes of factory accidents.

United States.—Seventeenth Annual Report of the Bureau of Labour Statistics of the Illinois Free Employment Offices and the Supervision of Private Employment Agencies for the year ending September 30, 1915. Springfield, Illinois, 1916. 70 pp.

The State of Illinois established free employment offices in Chicago, 1899; in Peoria, 1901; in East St. Louis, 1907; in Springfield, 1909; in Rock Island - Moline, 1913; and in Rockford, 1913. An amendment in the law governing

these offices became effective July 1, 1915. The revised Act creates a General Advisory Board which is directed to appoint Local Advisory Boards for each of the offices. The amended Act also creates, in place of the three former free employment offices in Chicago, each with its superintendent and with practically no co-operation between them, a central office and such branch offices as may be deemed necessary, not, however, to exceed three at any one time, with a general superintendent in charge. The new central office and one branch were opened in August, 1915. The central office will take care of all female and skilled labour and the branch office of all unskilled labour. A comparison of the record of the Chicago office for the four months ending December, 1915, with the corresponding period of 1914, shows an increase of 66 per cent in the

number of applicants for employment; 90 per cent in the number of calls for help, and 82 per cent in the number of positions secured.

The number of applications for employment received at all offices in the year ending September 30, 1915, was 81,486. The number of positions se-

cured was 38,140 and 43,346 applications were unfilled. Applications for help during the year numbered 43,026, of which 4,886 were unfilled.

Copies of the laws relating to free employment offices and private employment agencies are appended to the report.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

An action was brought by a father and mother to recover damages for the death of their son, caused, it was claimed, by reason of the insufficiency of a door guarding an elevator shaft. The deceased, a boy of sixteen years, who was in the employ of the defendants as a messenger boy, and another messenger boy, also in the employ of the defendants, were in a room on the premises of the defendants, one one side of which was the door of an elevator used by the defendants in their business. The two boys commenced playing and wrestling and struck the door, which flew open, and one of them fell down the shaft and was killed. The doors were of corrugated steel plate, apparently strongly built; they were hung upon chains and were opened and shut automatically by the elevator cage in ascending and descending. They were kept in place by moving up and down in slots constructed on each side of the doors on the inside of the brick walls which formed the shaft, and these slots held the edges of the doors by one-half to one-eighth of an inch on each side, and thus prevented them from swinging inwards. There was some evidence that one of these slots was loose to a certain extent at the place of the accident, and that it was warped.

At the trial the jury returned a verdict in favour of the plaintiffs to the amount of \$1,500, of which the mother was to receive \$1,000 and \$500 to the

father. The defendant company appealed from the verdict upon several grounds, the principal being that they were not guilty of negligence. It was urged by the appellant that the deceased had himself by his negligence caused the accident. It was argued that it was negligence upon the part of the deceased to engage in a wrestling bout with the other boy in close proximity to the door of the elevator shaft, that in so doing the deceased was not engaged in his master's business but was occupied with his own amusement, that it was in short the act of the deceased which brought about the accident. It was held, however, that neither deceased nor the other boy were doing anything wrong, they were not committing a breach of any rule or order of their employers. It was pointed out that if the boy had tripped and fallen against the doors whilst he was engaged in his master's business and had in that way suffered the accident, there could be no doubt that the master would be liable. If, therefore, at the close of the day's work, and before he left the premises, the boy had engaged in a playful struggle with another boy and fell against the door, which gave way and the accident took place; it was reasonable to claim that the accident was caused by the employers' failure to fulfil the statutory duty imposed on them and to provide a door sufficient to sustain the pressure caused by a person accidentally falling against it. The former judgment was allowed to stand and the appeal was dismissed. (*Manitoba—Owen v. Sauls & Pollard et al.*)

An appeal was recently heard in the Manitoba Court of Appeal from the judgment in an action taken by a workman against his employers to recover damages for injury to his hand caused by a machine while he was engaged in his work.

**Removal of
Guard from
Jointer Neg-
ligence. Worker
Given Damages
for Injuries.**

The action was brought both under the Employers' Liability Act and at common law. The facts of the case were as follows: The defendants' shop was a small one in which five men, including the working foremen, were employed. The shop contained certain machinery used in doing carpenter and joiner work. One of these machines was a jointer. It consisted of a table fitted with revolving knives and was used in shaping pieces of lumber. The machine was known to be dangerous, and the defendants designed and provided a guard which was adjustable to the machine, but could be removed. This guard seems to have been approved by the inspector under the Manitoba Factories Act.

On the day on which the accident took place the plaintiff was ordered by the foreman to do some work which involved the use of the jointer. It was then within a few minutes of closing time and the work was to be done that evening. Just before this the foreman himself had been working on the jointer with a man who acted as a helper. The foreman had removed the guard from the machine so as to operate it more easily. The foreman had been called away, leaving the helper at the machine, and the plaintiff proposed to go and help him do the rest of the work, which was almost finished, and that the helper would assist him with his, the plaintiff's work. This was agreed to, and while they were both engaged on the work which the foreman and the helper had been performing the plaintiff's hand was caught by the knives and the injury was caused. The guard had not been replaced on the machine after the fore-

man had removed it. The jury found the defendants were guilty of negligence as it was shown that the plaintiff was not aware that such a guard existed to prevent accidents occurring, and awarded the plaintiff the sum of \$800 under the common law and \$800 under the Employers' Liability Act. The appeal was dismissed. (*Manitoba—Fornell v. Nelson & Foster, Limited.*)

A labourer sued under the Alberta Workmen's Compensation Act for damages for an accident

**Frost Bite Held
Accident Under
Alberta Work-
men's Com-
pensation Act.**

while working for a railway construction company, alleging the following facts: The plaintiff was chopping with an axe under the orders of a foreman in cutting a road-way for teams working on the construction of a railway right of way, his hours being from seven a.m. to six or seven p.m., during which time he was not under shelter. On the day of the accident the temperature was about 60 degrees below zero. On his return to camp after being exposed all day it was found that his feet were very badly frozen, notwithstanding that he was then wearing two pairs of woollen socks and a pair of felt boots and rubbers, though the boots were not in a very good condition. It was contended that when the plaintiff met with the accident he was a workman within the meaning of the Workmen's Compensation Act, and that the injury occurred from an accident arising out of and in the course of his employment. It was shown that the frost bite, as it happened in this case, was an accident within the terms of the Act, and it was also found that the plaintiff was, by reason of his employment, exposed to a greater risk of frost bite than any other person. Judgment was given in favour of the plaintiff, and an appeal entered by the defendant company was dismissed with costs. (*Alberta—Nikkiczuk v. McArthur.*)

THE LABOUR GAZETTE

SEPTEMBER, 1916

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

The industrial activity which has been reported in recent months was continued in most lines during August. In the West it was thought that the supply of harvest help would be adequate to the requirements, but a shortage was reported from different points in Ontario. While there was about the same number of trade disputes as in July, the loss of time was greater than in the previous month, as was also the number of employees affected. The settlement of eight disputes was reported during the month. Retail prices showed a decided upward tendency. The cost of the weekly budget of staple foods rose to \$8.63 as compared with \$8.46 in July. The Department's index number of wholesale prices, however, showed a slight decline, being 178.5 for August as compared with 178.8 for July. Prices, the labour market and trade disputes are summarized in the General Review. A special article summarizes the provisions of the Acts of the United Kingdom under which numbers of establishments in which munition work is being carried on have been declared controlled and also outlines the Rules, Orders and Instructions which have been issued in connection therewith by the Ministry of Munitions. There is also an article on prices during the war which analyzes the recent trend of prices in Canada and certain other countries.

**In this
Issue**

Three applications for Boards of Investigation under the Industrial Disputes Investigation Act were received during August, and in all cases railway companies and their employees were concerned. The applications received affected the Algoma Central Railway Company and its trainmen, the Canadian Government Railways and federated shop trades and the Grand Trunk Railway System and its maintenance-of-way employees. Boards were established in the case of the Algoma Central Company and the Grand Trunk Company; the question of establishing a Board to deal with the dispute on the Canadian Government Railways was under consideration of the Minister at the end of the month. A Board was also established during the month in the case of the Canadian Northern Railway Company and its maintenance-of-way employees in response to an application received in July. The Board appointed in July to deal with a dispute affecting the Great North Western Telegraph Company and its telegraph operators reported a settlement, and an adjustment was also reached in regard to matters at issue between the Halifax and South Western Railway Company and its maintenance-of-way and shop employees. This dispute had been referred to the Department for a Board, which, however, was not established pending negotiations between the parties.

**Industrial
Disputes
Investigation
Act Cases**

The difficulties arising out of a request for a war bonus in coal mines in the Crow's Nest Pass district were adjusted by negotiations brought about between the parties by fair wage officers of the Department. The dispute affecting asbestos miners at Thetford Mines in which case an application for a Board had been received in July, was adjusted after enquiry by a Royal Commission. Full particulars of both these settlements appear elsewhere in this issue.

The Electrical Workers' Union of Medicine Hat has drafted a bill to provide safer working conditions for electrical workers in Alberta, which will probably be brought before the Alberta Legislature. In some detail the proposed

Act treats of measures for the prevention of the various kinds of accidents to which electrical workers are exposed in the course of their employment. Provision is made for the better insulation and carrying of wires or cables of high voltage on posts and poles and for improvement in the placing of telephone, telegraph and call-bell wires where these are carried in proximity to high voltage lines. Provision is also made for the proper support and placing of transformers and the proper insulation of wires on curves or corners. Poles must be provided with steps in certain cases and fixtures for the support of wires on roofs of buildings must be of sufficient strength; guy wires must be insulated and circuit-breakers provided in certain cases where trolley wires are used and the proper grounding of wires in certain cases is also provided for. All generators, motors, transformers and switches must have name plates giving the capacity in volts and amperes; warning cards in red are to be placed near switches and persons opening switches must record particulars in regard thereto on the card. Provision is made for the proper insulation and sanitation of

manholes for underground wires and for the stationing of watchmen when workmen are employed therein. It is provided that public service companies, the province and municipalities shall furnish rubber gloves and shields to their employees when working on wires of over 110 volts and every gang of men is to be furnished with an emergency kit for use in case of accident. Public service companies must also instal a pulmotor and have at least one man instructed in its use constantly on duty. Provision is made for the posting up of the Act in conspicuous places and for the altering or changing of apparatus to conform to its provisions within five years from the date of its enactment. Public utility commissioners, however, are given power to require the provision of guards and other protective devices at some prior date when in their opinion such a course is desirable. A penalty of \$1,000 is provided for each offence.

A booklet recently issued by the Department of the Interior gives a number

of interesting facts and figures in regard to immigration to Canada during the fiscal year ended March 31, 1916, and for previous years. The total immigration to Canada during the period July 1, 1900, to March 31, 1916, was 3,099,348. Of this number 143,095 were destined for the Maritime Provinces; 493,952 for Quebec; 810,332 for Ontario; 455,236 for Manitoba; 834,577 for Saskatchewan and Alberta, and 348,945 for British Columbia. The destination of 13,211 was not shown. The total immigration for the fiscal year ended March 31, 1916, was 48,437, as compared with 144,789 for the previous year. The total British immigration for 1916 was 8,664 compared with 43,276 the previous year. Immigration from the United States totalled 36,937 in 1916, compared with 59,779 in the fiscal year 1915. The number of immigrants from other countries was 2,936 in 1916, compared with 41,734 the year previous. There were 1,243 deportations in 1916

compared with 1,734 the previous fiscal year. During the period included in the calendar year 1897 to the fiscal year ended March 31, 1916, 18 per cent of the British immigrants, 30 per cent of those from the United States and 28 per cent of the immigrants from other countries made entry for homesteads in Western Canada. In addition large numbers of farmers and farm labourers of the immigrant class settled on farms other than homesteads in various parts of the Dominion.

The expenditure on immigration during 1914-15 was \$1,662,878 compared with a total expenditure of \$1,859,671 in 1913-14. In 1914-15 \$386,230 was spent in the British Isles; \$340,814 in the United States; \$24,905 in continental countries, and \$910,020 in Canada.

The well-known firm of Swift & Company have announced a pension plan

**Swift and
Company's
Pension Plan**

for all their employees, which became effective August 1. It is estimated that there are more than 2,000 employees of the company at its various branches in Canada, over 800 of these being in Toronto, in addition to those in the United States. To inaugurate the plan the company has created a fund of \$2,000,000 and may make additional contributions from time to time. The employees do not contribute. The fund is administered by a Board consisting of five members, officers or employees of the company. No pension is to be less than \$240 a year and not more than \$5,000 a year. Male employees who have been in the company's employ for 25 years or longer and have attained the age of 60 years, and women who have been employed by the company for 25 years and have attained the age of 50 years, may, in the discretion of the Board be pensioned. Male employees who have served 25 years or longer and have reached the age of 65, and women who have served 25 years or longer and reached the age of 55, are entitled to pensions under the plan. Disabled em-

ployees who have been in the service of the company continuously for 15 years or longer may also be pensioned. Employees who were 40 years of age at the time of entering the company's service are not eligible for pensions. The pensions of those retired on account of age and long service, and of those after service of 25 years, but prior to the age of retirement, will be one-half of the average salary for the five years preceding retirement; the pension of those retiring on account of incapacity after from 15 to 25 years of service will be computed on a basis of one and one half per cent of the average salary for the five-year period preceding retirement for each year of continuous service. The widow and children of a pensioned employee will receive one-half of the pension to which such employee was entitled at the time of his death and pensions may be paid to the widow or dependents of an employee whose death occurred after he had been 15 years or more in the employ of the company. The establishment of the pension plan, it is stated, is intended only to declare the present policy of the company and to give authority to their officers to carry out such policy and is not to be held to create a contract or to give employees a right to be retained in the service or any right to any pension allowance; the company reserves its right to discharge without liability other than for wages due and unpaid any employee whenever the interest of the company may in its judgment so require. The scheme also provides that in case of the payment of pensions under the laws of any state or country, the pension payable under the company's plan shall be the excess of the company's pension over that provided by the State.

The position of commissioner under the Workmen's Compensation Act of Manitoba which, it will be remembered, was enacted at the last session of the Provincial Legislature has been filled. Announce-

**Recent Labour
Appointments**

ment has recently been made of the appointment of Mr. W. H. Curle, a well-known lawyer of Winnipeg and a member of the legal firm of Andrews, Andrews, Curle, Burbidge and Bastedo.

In Ontario, Walter A. Riddell, Ph.D., has been appointed Superintendent of the new Trades and Labour Branch in the Provincial Department of Public Works. Legislation for the establishment of this branch was passed at the last session of the Ontario House in view of the recommendations of the Ontario Commission on Unemployment. Among the duties of the branch are included the collection of statistical and other information respecting trades and industries in the province and the establishment of employment bureaus to assist in the distribution of labour. Dr. Riddell is a graduate of the University of Manitoba and pursued his post-graduate studies at Columbia University.

* * *

According to recent cable despatches the Trades Union Congress of Great

Proposed Ministry of Labour in the United Kingdom held in Birmingham early in the present month of September, adopted a resolution in favour of the establishment of a Ministry of Labour. It is presumed that the resolution was substantially the same as that adopted by the Congress in Bristol last September which, besides calling for the appoint-

ment of a Minister of Labour with cabinet rank and the co-ordination of all departments of labour under the Minister's supervision, suggested the establishment of a statistical department which should take an industrial census of the United Kingdom and should prepare monthly statements giving the number of persons casually and regularly employed and the number unemployed in any one week. Statements should also be prepared indicating the average wages of persons permanently employed and irregularly and casually employed as well as changes in wages and conditions of employment. It was suggested that factory Acts, regulations in regard to mines, docks and railways, and provisions in regard to dangerous and unhealthy occupations should be supervised by the Minister who should also administer labour exchanges and registration agencies. The resolution also called for the establishment of a national department of industrial arbitration and conciliation and of a legal department to deal with trade union law and all measures affecting the industrial life of the workers. It was also suggested that the Minister of Labour should have the administration of schemes dealing with unemployment, unemployment insurance and afforestation, coast erosion, land reclamation, canal restoration, military roads and other forms of useful work, as well as of provisions for the relief, feeding and housing of the unemployed.

INDUSTRIAL CONDITIONS DURING AUGUST, 1916

I.—GENERAL REVIEW

The scarcity of labour which was becoming marked in many industrial centres during July was more pronounced in August, owing to some extent to the large numbers of men who left other occupations to take advantage of the usual harvest

excursions to the West and the high rates of wages being paid for harvest work. Civic work in a number of localities was delayed or discontinued owing to inability to secure sufficient unskilled labour. Female help continued in demand and was difficult to secure in some industries. There was a slight falling

off in employment in metal manufacturing at a few centres owing to delay in receiving material, but in most branches manufacturing continued active. Transportation by rail and water was active and afforded a maximum volume of employment. Mining, with greater development work in metal mines and the settlement of labour troubles in Crow's Nest Pass coal mines, showed greater activity than in the previous month. Sawmills continued running in most of the large lumbering centres and a scarcity of loggers was reported in some localities. Farm labour was reported scarce in Eastern Canada, but the western supply was believed sufficient to handle the crop which suffered damage by hail and rust in a number of districts and was not expected to show more than a fair average. Fishermen were quiet on both the Atlantic and Pacific coasts, in the latter case owing to the prospect of about a three-quarter salmon catch.

Returns from employment bureaus for July showed a large increase in the demand for workers. The daily average of vacancies notified was 1616.34 as compared with 1298.74 in June. The number placed showed a daily average of 732.79 as compared with 639.75 in the preceding month. The proportion of vacancies filled to vacancies notified was 42.33 per cent for men and 36.6 per cent for women as compared with 55.3 and 36.0 per cent respectively for June. The number of vacancies notified for women workers showed a daily average of 370.39 as compared with 349.31 in June. The five principal centres of labour distribution, Montreal, Toronto, Winnipeg, Edmonton and Vancouver, showed large increases in the demand for labour, particularly Winnipeg and Edmonton. Substantial increases were also noted in St. John and Saskatoon. Quebec and Brandon showed decreases.

The August strike record showed the same number of disputes in existence as in the previous month, but the number of employees affected and the loss of time in working days was greatly in excess of the same figures in July. Serious disputes in the mining industry were largely responsible for this, over 4,500 employees being affected by disputes in the coal mines of the Crow's Nest Pass district and about 900 asbestos miners at Thetford Mines. These difficulties fortunately were terminated before the close of the month and satisfactory working agreements arranged. Special articles elsewhere in this issue give in detail the questions at issue, the negotiations conducted between the parties and the settlements reached. The greatest number of employees concerned in disputes outside of the mining industry was in the metal trades, where nearly 900 men were affected. Of the 14 disputes existing during the month, eight were terminated, leaving six disputes still on the record as unsettled at the end of the month. The number affected by these strikes, however, was comparatively small, with the exception of a strike of cigarmakers at London which involved over 300 men.

In prices the movement was marked by two divergent trends, foods, fuel and rent tended higher, while materials which had advanced continually for over a year to very high levels in May continued a decline which then set in, although in some lines advances still occurred. The upward movement and the recessions afterwards were most conspicuous in metals and chemicals. In foods, beef, mutton, pork products, eggs, butter, cheese, bread, flour, rice, beans and sugar had advanced substantially during the war, while potatoes were unusually cheap during the season 1914-1915 and very dear during 1915-1916. In tea prices had risen, but the rise was considerably offset by the use of lower grades. For August there was a sub-

Strikes

Prices

stantial increase in the cost of the weekly budget of staple foods, which rose to \$8.63 as compared with \$8.46 in July, \$7.78 for August, 1915, and \$7.68 for August, 1914. In fuel and light advances occurred in anthracite coal, with slight rises in soft coal, wood and coal oil. Rent also averaged slightly higher. In wholesale prices the Department's index number, based on 272 commodities, including farm products, foods, raw materials and manufactured goods, stood at 178.5 for August as compared with 178.8 for July, 151.5 for August, 1915, and 136.3 for August, 1914, and 134.1 for August, 1913. There were considerable increases in grains and dairy products, but a number of metals declined again; while animals and meats and vegetables averaged somewhat lower.

Wages continued to advance during August, the following being the most important changes of the month. About 4,500

Changes in Wages and Hours coal miners and coke oven hands in the Crow's Nest Pass district in Alberta and British Columbia received an increase of 8 per cent in their wages. An increase of 15 per cent was granted to 260 shipbuilders at Quebec after a strike. The hours of 137 boilermakers and iron shipbuilders at Esquimalt, B.C., were reduced from 54 to 48 per week and their wages were slightly advanced; at the same place the hours of 130 blacksmiths, helpers, etc., and 50 machinists were similarly reduced, as the result of a strike. An increase in wages averaging from 2 to 3 cents per hour was granted to men in the Canadian Pacific Railway shops from Fort William to the Pacific coast. About 100 civic teamsters at Vancouver, B.C., were granted an increase of 35 cents a day. Employees of the Guelph Radial Railway received an increase of 1 cent per hour, bringing the minimum wage to 23 cents per hour. An advance of 15 per cent in piecework rates was granted to 25 pant machine operators at Hamilton, Ont. An increase was granted to about 72 cigar-

makers at London, Ont., the increase averaging from \$1.50 to \$4.00 per thousand. An increase of 7 per cent was granted to all employees of the City of Brandon receiving less than \$100 per month salary. About 200 millers and labourers in a flour mill at Port Colborne, Ont., were granted an advance in wages, the increase for millers amounting to \$4.00 per week, from a rate of \$16 to \$20 to a rate of \$20 to \$24 per week, and the increase for labourers being from a rate of 20 and 22½ cents per hour to 27½ and 30 cents per hour. About 70 dock labourers at Vancouver, B.C., were granted an advance from 25 to 30 cents per hour for a day of nine hours, and 35 cents per hour overtime.

Four fair wage contracts were received for insertion in the *Gazette* during August, two from the Department of Railways and Canals for work at Carleton Point, P.E.I., and on the Welland Canal, containing fair wage schedules; and two from the Department of Public Works for post office fittings at Hull and Cornwall containing the usual clauses providing for the payment of the wages current where the work is being performed. A number of contracts containing anti-sweating regulations were also awarded by the Post Office Department.

The total imports of merchandise for consumption in Canada for July, 1916, amounted to \$64,026,689, compared with \$66,768,276 in June, 1916, and \$37,366,309 in July, 1915, an increase of \$26,660,380. Domestic exports of merchandise for July, 1916, amounted to \$104,964,270, as compared with \$95,635,862 in June, 1916, and \$45,590,038 in July, 1915. For the seven months ended July 31, 1916, imports entered for consumption amounted to \$429,976,202 in 1916, as compared with \$245,159,621 in 1915,

Trade and Finance

while the exports for the same period amounted to \$580,423,252 and \$261,764,778 respectively. Increases in exports of products of the mine, the fisheries, the forest, agriculture and manufactures were shown, while decreases

were noticed in animals and their produce and miscellaneous merchandise.

The following table gives a convenient summary of Canadian imports entered for consumption and domestic exports:

Bank clearings as indicated by returns from 16 cities showed a decrease in August as compared with the previous month, the total falling from \$864,637,297 in July to \$842,595,842 in August, a decrease of \$22,041,455 or 2.54 per cent. Grouping the returns by provinces increases were shown in all the provinces except Nova Scotia, Quebec and Ontario. As compared with the corresponding month of last year bank clearings showed an increase amounting to \$286,587,577, or 34.0 per cent, the

total for August, 1915, being \$556,008,265. As compared with July of last year there were gains in all the provinces. Of the larger cities Montreal showed a decrease as compared with July, but a marked increase as compared with August, 1915. Toronto showed a considerable decrease as compared with June, but a decided increase as compared with August of last year. Winnipeg and Vancouver showed increases both as compared with July and with August last year.

BANK CLEARINGS IN SIXTEEN CANADIAN CITIES FOR THE MONTH ENDED AUGUST 31, 1916.

Canadian revenue for the month of July, 1916, amounted to \$16,856,031.19, as compared with \$12,655,085.66 for July, 1915, an increase of \$4,210,945.53. The expenditure on capital account for July, 1916, amounted to \$31,471,796.14, which comprised \$29,151,429.45 for war purposes and \$2,320,366.69 for public works, including railways and canals.

The bank statement for July, 1916, showed the paid-up capital of the chartered banks of Canada to be \$112,852,-

038, as compared with \$112,846,435 for the month of June, 1916. Deposits payable on demand for July, 1916, amounted to \$431,958,188, as compared with \$428,117,340 for June, 1916. Notes in circulation for July, 1916, amounted to \$123,530,451, as compared with \$123,373,395 in June. Loans to cities, towns, municipalities and school districts during July amounted to \$42,385,096, as compared with \$46,773,032 during June, 1916.

II.—THE INDUSTRIES AND TRADES

No diminution was reported in the activity which prevailed in most lines of manufacturing during

Manufacturing

July, except in some branches of metal manufacturing, where delay in the supplying of material had the effect in a few localities of temporarily suspending or slackening operations. Labour, both male and female, was greatly in demand in a number of localities. Some manufacturers stated they would employ woman workers if they could be secured in sufficient numbers to justify them in making necessary changes to provide separate accommodation for women. In a number of instances wages were increased by manufacturers either to secure or hold employees.

Sydney reported the steel trade very brisk. The two large mills at Sydney and Sydney Mines were keeping up large outputs and had heavy stocks of material for the winter season. Montreal reported structural steel manufacturers busy with good orders from outside points, but general foundrymen were not very well employed. The Angus shops, in addition to active operations on special work, were busy turning out refrigerator and box cars. Sherbrooke reported metal manufacturing active, with some companies making additions to plant. At Windsor automobile factories were very busy. Toronto, Stratford and Peterborough reported foundries and brass works very busy. The International Nickel Company was reported to have obtained options on several hundred acres of land on the lake shore, and it was expected ground would be broken at an early date for the erection of a large refining plant.

Furniture and woodworking factories were active and at Kitchener (formerly Berlin) there was a demand for machine hands in furniture factories. At Woodstock where many furniture and

woodworking factories are located, a great labour shortage was reported. Toronto reported woodworking and piano factories busy.

Boot and shoe factories at Montreal were active, with plenty of orders ahead. Kitchener also reported shoe factories busy, with a demand for experienced men. At Toronto also, boot and shoe workers were fairly active. Clothing factories were busy, with a pronounced shortage of female labour in shirt and collar and whitewear factories reported at Kitchener. Textile factories were busy in a number of localities, but quiet was reported in this branch of industry at some points. Manufacturing in miscellaneous lines was reported active in most centres.

Railroad traffic continued brisk, and the large railway companies continued to show increased earnings.

Transportation

Gross earnings of the Canadian Pacific Railway for July were \$12,247,440, as compared with \$7,895,375 for the same month of 1915, an increase of \$4,352,064. Grand Trunk gross revenues for July were \$4,196,982, as against \$3,612,875 in July, 1915, an increase of \$584,107. Gross earnings of the Canadian Northern Railway for a period of about two months from July 1 were \$8,228,000 as compared with \$4,401,800 for the same period last year, an increase of \$3,826,200.

Moncton reported railway shops and operating departments very active and other points in the Maritime Provinces reported railway traffic busy. In Quebec and Ontario centres, also, freight and passenger traffic was well maintained. Peterborough reported heavy shipments of last year's grain over the Grand Trunk Railway from Midland. At Brockville railway traffic was active. St. Thomas reported conditions in shops

normal. Some difficulty arose in the Michigan Central shops over the introduction of a new piece-work schedule, but the matter was adjusted without a strike. At Chatham railway freight traffic was reported exceptionally heavy, and passenger business was improving. Western points also reported activity on railways, and in the Crow's Nest Pass district, with the settlement of labour difficulties at the coal mines and the movement of lumber to the Prairie Provinces the volume of railway freight traffic was considerably increased.

Water traffic also continued active. Conditions along the waterfront at Halifax for longshoremen and freight handlers were fairly active. Fairly large shipments of lumber were made from New Brunswick ports, though activity in this direction was diminished at times on account of scarcity of tonnage. Most of the lake and river ports reported water traffic active.

There was greater activity in metal and coal mining during August than in the previous month, due to greater development work and improvements

Mining

to mills in metal mining and to the resumption of operations in the Crow's Nest Pass coal mining district, where most of the mines had been shut down for a time pending a settlement of matters in dispute between miners and operators. There was some revival of metal mining activity in New Brunswick. A tungsten mine on the Southwest Miramichi was being developed and work was being carried on at the old copper mines at Dorchester which had been closed for a number of years. A considerable number of labourers was being employed in this locality, and it was expected the mines would be operating by winter. Asbestos mines at Thetford were adversely affected for a short time by a strike which involved several hundred employees. The dispute, however, was settled before the end of the month and activity was restored. Copper and chrome iron mines in the Sherbrooke dis-

trict continued active. Cobalt reported that the shortage of help was a serious problem, especially at the gold mines, many of which found it difficult to maintain their full production. All of the Cobalt silver-mining companies, owing to the high price of silver, were running at maximum capacity and outlying properties were being developed. Gold mines were also taking steps to increase their output. Metal mining in British Columbia continued very active. The Trail smelter and Rossland properties were very busy and a scarcity of skilled miners was reported in some districts. Prince Rupert reported metal mines in the district very active with a shortage of labour in some camps.

Coal mines were active, though outputs, both in Eastern and Western fields, were reported suffering from scarcity of labour. Sydney reported mines active, labour scarce and shipments to St. Lawrence ports lower than for many years. At Westville conditions were active with a shortage of men and the demand for coal exceeding the supply. Considerable improvement was noticeable at Lethbridge, where the mines were working full time but not to capacity on account of lack of experienced help. All available men were being taken on. At Fernie and other points in the Crow's Nest Pass district the demand for coal and coke was increasing, railways and retail yards commencing to put in winter stocks. Quiet was restored in labour matters with the settlement of the dispute between miners and operators in regard to a war bonus, which was arranged on a compromise basis, the men, who had requested a ten per cent increase receiving advances approximating eight per cent. A full report of the negotiations and settlement in this matter appears elsewhere in this issue. Edmonton reported that fear of a labour shortage in coal mines created a good demand for coal. Nanaimo reported coal mines in the city working steadily and those in the district showing marked improvement. The demand for miners was absorbing most of the unemployed

and in some quarters a scarcity of skilled men was in evidence.

With the exception of Sydney, where building was quiet, building trades at all points in the Maritime Provinces were reported active. At Truro unusual activity prevailed, and at Newcastle building operations exceeded those of many previous years. Fredericton reported building trades busy, though there was no great amount of new work. Nearly all points in Quebec reported activity, with the possibility of its continuation for some time. Montreal reported an improvement, both in the construction of new residences and factories and difficulty in securing good builders' labourers. Every point in Ontario from which reports were received reported either active or steady conditions in the building trades, and in some localities exceptional activity was noted. At Ottawa about 1,500 men were employed in the reconstruction of the Parliament Buildings. Toronto reported more houses being erected and a demand for men. At Hamilton and Kitchener general activity prevailed in the building of dwellings and factory extensions. Unusual activity was reported at Windsor, there being a very heavy demand for dwelling houses, a number of which were being rushed to completion. At Port Arthur the erection, enlarging and repair of elevators absorbed every available man in the building trades, and owing to a scarcity of building tradesmen wages showed a tendency to advance. Cobalt reported a temporary quiet following the destructive forest fires, but that during the last few weeks of the month rebuilding had commenced and a considerable demand for carpenters and other building tradesmen had been created. Active conditions were reported from Peterborough and Lindsay and from Belleville, St. Catharines, Galt, Chatham, St. Thomas, Stratford, Guelph and other cities. Western cities, also, reported an improvement in building. Brandon and Regina reported

building trades working full time. At Saskatoon heavy storms and the destruction of crops curtailed a considerable amount of building, but a number of elevators were being constructed, and there was a steady volume of building being carried on in rural districts. Medicine Hat reported building trades busy, with a scarcity of men. At Lethbridge there was little new building but alterations and repairs kept carpenters and painters busy. Calgary reported building trades fairly well employed, a large number of elevators being constructed throughout the province. Edmonton reported carpenters in demand for country work and wages better than a year ago. From some British Columbia points reports indicated quiet in building operations, but Vancouver reported considerable improvement.

There was not much change in railway construction. Work on new lines being constructed in Northern Alberta and British Columbia continued fairly active, though difficulty was experienced in obtaining labour. A fair amount of work was being done in the Maritime Provinces and at points in Quebec and Ontario. St. John reported good progress on track work at Bay Shore and new yards at West St. John. At Three Rivers the city traction company was laying a few miles of rail to extend its road to Cap de Madeleine. Hamilton reported steel was being laid on, the extension of the Toronto, Hamilton and Buffalo Railway from Dunnville to Port Maitland and that the line was expected to be in operation in September. At Port Arthur tracks were being laid to elevators and there was the usual amount of repair and maintenance work. Moosejaw reported work trains busy ballasting and a few miles of new work being done. Work on the extension of the Edmonton, Dunvegan and British Columbia Railway from Spirit River to the British Columbia boundary was progressing satisfactorily, though a difficulty was experienced in obtaining an adequate supply of labour. On the Canadian Northern Railway branch line

from Oliver to St. Paul de Metis grading was in progress, fifty men and teams being employed. Railway contractors reported some difficulty in securing the necessary supply of labour owing to the demand for harvesters. The Canadian Northern Railway commenced the erection of a large machine shop at Edmonton and work was being done at the new stockyards. Victoria reported good progress being made on improvements to the outer wharf.

Lumbering was reported active from many centres, though there was some quiet in a few localities in the Maritime Provinces owing to mills closing down for lack of vessels to make shipments. Westville reported conditions quieter than in the previous month, but at Truro lumbermen were busy and help scarce. At Fredericton mills continued busy, and at Newcastle mills were running full time with large crews; men were also being sent into the woods to prepare for the next season's cut. Large lumber shipments were being made from North Shore points. At St. John, owing to a scarcity of vessels for transportation, some of the mills closed down for an indefinite period. In Quebec districts activity was well maintained, though at Montreal a weakened demand was reported from the United States and Europe. At Three Rivers mills were very active, and Quebec reported mills busy, with the possibility of more men being sent into the bush than last year. Hull reported mills working full time and that shantymen's wages had increased nearly 50 per cent, \$50 to \$55 per month being paid. At Port Arthur mills were running and while lumbering was reported quiet it was much better than last year. Prince Albert reported that unless the large number of men who went to the harvest fields returned there would be a shortage of men for the lumber camps. Lumber operators announced that several camps would be opened. Mills were running day and night and making regular ship-

ments. At Vancouver mills were busy and logging companies complained of inability to secure men. New Westminster reported lumbering brisk, with a good demand for all classes of lumber and a shortage of labour. Wages advanced somewhat owing to scarcity of men. Nanaimo reported mills working steadily and logging camps busy. At Prince Rupert there was a shortage of loggers.

While practically all points in Eastern Canada reported farm labour scarce, farmers were able in

Agriculture

most instances to gather their crops in good condition. Soldiers allowed on furlough in order to work on farms assisted materially in harvesting operations. Crops except hay, which was plentiful everywhere, were expected to be somewhat short of the returns for an average year, particularly in the case of potatoes, which were reported a failure in many districts and were selling for as high as \$2 and \$3 a bag. The Western grain crop was damaged in a number of districts by rain and hail and many localities reported rust. Owing to partial crop failures in various parts there was not as heavy a demand for farm help as was expected, and the number of harvesters sent from British Columbia, the United States and Eastern Canada was expected to be ample. Some 5,000 men went from British Columbia, between 15,000 and 20,000 from Eastern Canada and several thousand from the United States. Wages averaged \$2.50 per day, with higher rates obtaining in some instances.

Fishing was fairly quiet. Sydney reported a poor month despite good weather. St. John reported

Fishing

sardine fishing active, with a good demand. At Charlottetown fishing was fairly active. Westville reported the salmon fishing season which ended August 15 a very good one. The catch on Lake Erie was reported the smallest in years and

at Port Stanley a number of tugs ceased making trips. Port Arthur reported fishing stations and tugs busy. On the Pacific coast salmon were not expected to yield more than a three-quarter pack. On some of the rivers the pack was nearly a full one, while on others not

more than half a pack was expected. From New Westminster fishing was reported very poor—the worst season for sockeye in the history of the Fraser. Canneries on the river were very quiet, although the price to fishermen had advanced to 50 cents per fish.

III.—LABOUR AND INDUSTRY IN THE PROVINCES AS INDICATED IN REPORTS OF CORRESPONDENTS AND OTHER SOURCES

INDUSTRIAL activity in the various provinces was well maintained during August. In the Maritime Provinces building was reported very active; coal mining, while busy, showed diminished outputs owing to a scarcity of labour; lumbering continued active, but fishing was quiet. In Quebec satisfactory conditions were reported in manufacturing and lumbering. The chief industrial centres of Ontario showed no falling off from the activity of the previous month except in some instances where delay in the receipt of materials and a shortage of help retarded operations. Mining in the Cobalt and Porcupine districts was more active than in the previous month owing to greater development work and improvements to plant. The commencement of harvesting in the Western Provinces gave employment to large numbers of farm labourers and improved business conditions. A great deal of elevator construction and the erection of farm buildings in considerable numbers improved conditions in the building trades and in some localities a scarcity of building tradesmen was evident. The settlement of labour troubles and the resumption of operations in coal mines brought about great activity in the Crow's Nest Pass district in Alberta and British Columbia and improved railway traffic. Salmon fishing in British Columbia was quiet and the canneries were not expected to put up more than a three-quarter pack.

Nova Scotia

At Halifax fairly extensive operations provided employment for building tradesmen and unskilled labour. Factory employees were busy, with a shortage of help, both male and female, in confectionery and biscuit factories. Work on the Halifax Ocean Terminals showed much progress, and it was expected that one or two berths would be in readiness for the coming winter's shipping if required. The new Furness line pier was also advanced considerably. Longshoremen and freight handlers were fairly well employed.

Labour conditions continued active in the Sydney district, and labour generally was well employed. Building trades were quiet. The larger concerns reported a shortage of skilled and unskilled trades, particularly the latter. This shortage continued to reduce coal outputs and the volume of shipments up the St. Lawrence. Prospects continued bright in all industries. The steel trade was very busy, with large outputs. All departments of the Sydney and Sydney Mines works produced up to capacity. Both companies were well ahead with large stocks of iron-ore and lime-stone for the winter season. Transportation by rail and water continued brisk. Wholesale and retail business was fairly good. August was a poor month for fishermen. Bait was scarce and dogfish plentiful, and although the weather was good, the catch was small.

At Westville unskilled labour continued scarce. The closing down during the greater part of August of some plants relieved the situation somewhat, and enabled farmers to procure help during the harvesting. Rail, freight and passenger service was busy. Wholesale and retail trades continued active. Coal mines worked full time, the demand for coal exceeding the supply. Lumbering was somewhat quieter than during the previous month.

At Amherst all branches of labour were well employed, with the exception of machinists, who, during the greater part of the month, were laid off owing to some changes in machinery.

All classes of labour at Truro were well employed, with the exception of the employees of a steel company which was closed for two weeks waiting for material. Lumbermen were busy with a scarcity of help. Railway transportation men were well employed. Builders and builders' labourers were unusually busy. The town has taken over the plant of the Chambers Electric Light and Power Company, Limited, and the franchise, which was a 99 years' lease, for \$862,500, and will operate it. Business, wholesale and retail, was satisfactory.

Prince Edward Island

At Charlottetown all trades were well employed. Local dealers received notice from the agents of the Albion Coal Company that on September 1 their prices would advance 40 cents per ton. Fishing was reported quiet.

New Brunswick

At St. John all trades were busy. Good progress was being made on the track work at Bay Shore and in the new yard area at West St. John so that everything may be in readiness for the heavy traffic expected during the coming winter season. Owing to the scarcity of vessels for the transportation of lumber some of the mills were closed down

for an indefinite period. Harbour dues during July were higher than during the same month last year. Customs and inland revenue receipts for July also showed an increase. Biscuit manufacturers advanced the price of biscuits of all kinds one-half cent per pound on August 15. Flour has increased in price, Manitoba selling at \$9.25 and Ontario at \$8.40. The advance in flour since July 25 on Manitoba is \$1.90, and on Ontario \$1.80. Early cobbler potatoes are being shipped from Carleton county, the buyers paying \$2 per barrel. Turnips are also being shipped in large quantities to the Boston market. Sardine fishing was very good during August, and prices ranged from \$9 to \$12 per hogshead. There was good demand for local fish. Construction work on the Valley Railway bridge at Nerepis was being pushed vigorously. The work which has been in progress at the Copper mines near Dorchester since the early spring of this year was nearing completion and it was expected that the mines would be in operation this fall.

At Moncton all the local supply of labour was utilized to its full extent, and importations from outside points were found necessary to meet the increased demand and practically no unemployment existed. In all local fields of labour such as manufactories, machine shops, railway shops and railway operating circles, special activity was observable as evidenced by the employment of night shifts, overtime work and increase of additional help. Building trades also continued active, and the demand for bricklayers, masons, carpenters and builders' labourers was good. Commercial conditions continued satisfactory. Customs receipts for July showed an increase over those of the same month in 1915. Retail trade owing to the absence of many families from the city was quieter than usual, but wholesale conditions were reported satisfactory. Real estate continued active and the transfers recorded were in excess of those of last year. Labour was scarce and farmers had much difficulty in se-

curing sufficient help; haying and harvesting operations were much delayed. The National Chemical Copper Company has taken over the development of the old copper mines near Dorchester which have been closed for a number of years. A considerable number of labourers were employed, and it was expected to have the mines in operation at an early date.

At Newcastle all men able and willing to work were busy. Activity in building trades was more marked than for many years. Shipping circles were very active, large shipments of lumber being made for all North Shore ports. Wholesale and retail trade was very good. The salmon fishing season which ended August 15 was a very good one. All local lumber mills were working full time with large crews. Men were also being sent into the woods to prepare for the season's cut. All local industries were working full time.

At Fredericton the general condition of labour during August was quite as good as during the preceding month, and there were few idle men. The building trades were kept busy although there was no great amount of new work started and conditions were not any too promising for later in the season. Manufacturing lines were busy, and in some cases more workmen were taken on. There was some shortage of unskilled labour. The hay crop was the best in years. Farm labour was scarce. Wholesale and retail trade showed an improvement over the preceding month. Railway traffic continued about normal. Lumber mills were all busy.

Quebec

Montreal reported few changes in labour conditions during August. The usual activities were maintained, and there was even some improvement in the building trade, both in the construction of new residences and factories. Builders found it very difficult to get good labourers, although they advanced prices considerably. Structural steel workers reported good orders from outside

points. Local paint manufacturers reported a well maintained output and some considerable shipments were made to Australia and New Zealand. Boot and shoe factories were getting orders freely and many jobbers placed large orders for next season. Manufacturers of woollens, cottons and knitted goods were working to capacity but they also had difficulty in getting sufficient labour. General foundrymen were not very well employed, though special orders were still keeping many large firms fully employed and many men in work. The Angus shops were turning out in addition to other work ten refrigerator cars a day and had a special order for 2,000 box cars. Lumbering men reported a weakened demand both from Europe and the United States for their product. The journeymen barbers and master barbers of Montreal were discussing at the end of the month the making of a contract which would give barbers a minimum weekly wage of \$12, and which would make closing at 8 o'clock compulsory except on Saturday night, when 11 o'clock would be allowed. The Charity Organization Society returns show that 300 families were assisted in July.

Woman workers at Montreal were not affected by any change in conditions during August, which were better than in the same month in 1915. About 100 persons are likely to be affected by Swift and Company's pension scheme, reference to which appears elsewhere in the present issue of the *Gazette*. The sum of \$80,806.32 is the result for the first six months of 1916 of the tax of one cent imposed by the city on each ticket of admission to all places of amusement. It will be distributed among the hospitals and other charitable institutions having at least 25 free beds permanently at the disposal of the public.

At Quebec the demand for labour was well maintained. The tourist trade, although slack as compared to other years for the month of July regained activity in August. The only labour difficulty was one occurring in the Levis

dry dock, some 260 men being affected. After the men were out about a week the difficulty was adjusted. A full account of this strike appears in the regular article on trade disputes. In the lumbering industry it was expected there would be more men sent into the bush this winter than last year.

At Sherbrooke the labour market was still very active and manufacturers found difficulty in getting sufficient help. There was a good deal of building going on. A number of manufacturing establishments were making additions to their plants. Lumbering was good and asbestos, copper and chrome iron mining active. A strike which lasted about a week occurred at Thetford Mines and after investigation by a Royal Commission was adjusted on a compromise basis.

At St. Hyacinthe the general condition of the labour market was better than at the same time last year. The building trades were well employed. All local industries were active, and in some cases the supply of labour was not sufficient to meet the demand. A large number of men were employed on city work such as street paving and sewers.

At Three Rivers labour conditions were as good as during the corresponding month of last year. Manufacturing generally showed activity. Commercial activity in general showed an increase over the corresponding month of last year. The Three Rivers Traction Company was laying a few miles of rails and ties to lengthen its road to the village of Cap de la Madeline.

Hull reported very satisfactory conditions, the demand for labour exceeding the supply. Shantymen's wages advanced nearly 45 per cent, from \$50 to \$55 per month with board, being offered for this class of labour. Potatoes and other vegetables suffered considerably from lack of rain. Mills and factories were working full time.

St. John's reported a great demand for labour. Local factories were active and working full time. Customs receipts during July amounted to \$25,691.48, as

against \$22,166.92 during the same month last year, an increase of \$3,524.56. Large quantities of lumber were exported to the United States by way of St. John's. Hay gave a very large crop. Fishing on the Richelieu was active.

At Sorel labour conditions were very satisfactory. All industrial establishments were running to full capacity, most of them night and day and there was a great demand for labour. Lumbering was quiet.

Ontario

Labour conditions at Toronto during August showed little change as compared with July except that the shortage in all classes of labour was more pronounced. A large number of workers have gone west as harvesters, and many others have been absorbed by the transportation systems. The building trade has been steady with a demand for more men though continuing light as compared with normal conditions. The metal and engineering trades were busy, with increasing activity in ordinary lines, including engines and machinery. Woodworkers, including piano makers, were active. Printers, bookbinders and stereotypers were well employed. The clothing trades were active with the exception of custom tailors, who were rather quiet. Boot and shoe workers were well employed. Leather and harness workers were active. The provision trades were steady, showing increased activity during the latter part of the month. Cigarmakers were quiet and brewery workers unsettled owing to the Prohibition Act which goes into effect on September 16. Hotel and restaurant work was fair during the early part of the month but busy later. There has been a considerable influx of building tradesmen into the city owing to the increase in manufacturing industry causing a steady demand for small houses. Of late there has been a great scarcity of four-, five- and six-roomed houses with conveniences, few of which

are to be obtained except in the more distant suburban localities. Larger houses of a modern type in residential neighbourhoods were also scarce. As money for building purposes was easier there was expected to be a revival of house building activity during the fall. The receipts of the Toronto Railway Company for July were \$469,845, as compared with \$449,108 for July, 1915, the city's share being \$93,969, as against \$89,821. The Swift Canadian Company has adopted a pension system for their employees which became effective August 1. The employees are not required to contribute. The minimum amount of an old age pension is fixed at \$240, and the widow and children of an eligible employee will receive half the pension to which he was entitled at the time of his death. In Toronto alone some 800 persons will come under the system.

A great shortage in female labour of a satisfactory kind was reported in nearly all industries. In some firms there has been a general increase in wages of from 25 to 50 per cent in the last few months. Some employees claim that this is necessary in order to compete with factories engaged in special work. To cope with the difficulty of keeping steady labour many firms are trying out the bonus system as an encouragement to girls to stay with their employers. The laundries suffered from lack of help during the hot weather. On account of increase in wages and the price of materials one laundry raised its flat rate from \$1 a hundred to \$2 a hundred.

The general labour conditions in Hamilton during August were very good. In the building trades general activity prevailed, especially in the building of dwellings and factory extensions. There was a big demand for labourers and builders. Labourers were commanding 35 cents per hour. The City Council at a regular meeting decided to revert to standard time on August the thirteenth at 10 o'clock. The street railway employees and employers of a number of factories protested against day-

light-saving time which had been in force since June. The continued dry weather has retarded the root and small fruits crops and there was not such a demand for farm labourers as the farmer and his family have been trying to look after their own work. There was, however, a demand for fruit pickers. On account of the shortage of male help a Woman's Emergency Corps has been formed in Hamilton, the object of the organization being to fill positions left vacant by men who have gone to the front by giving employment to women. In response to a circular letter to manufacturers the association has received a number of encouraging letters stating they would give employment to women. Customs collections, inland revenue receipts and the bank clearings all showed increases.

At Niagara Falls working people of all classes were fully employed during August and overtime was the rule in many industries. City works were delayed by lack of labour. Commercial, financial and transportation conditions were satisfactory. Farmers were busy threshing. Wheat turned out better than expected. Oats are light, corn late and poor. Apples are a light crop also plums. Peaches are plentiful. Potatoes are a poor crop. Farm labour was in constant demand. Seventeen loading manufacturing concerns reported "busy" or "very busy." A number of them advertised for more hands. Rails were being laid on the extension of the Toronto, Hamilton and Buffalo Railway from Dunnville to Port Maitland and the line will be in operation in September.

At Port Colborne the International Nickel Company obtained options on 340 acres of land on the lake shore and it was expected that ground would be broken at an early date for the erection of a \$4,000,000 refining plant.

At St. Catharines the labour market during August showed a marked improvement over that of the previous month. Conditions in the building trades were considerably improved.

At Ottawa a steady improvement in the labour situation was maintained during August. A large demand for farm help among other causes rendered unskilled labour particularly scarce, while the building trades were particularly busy with about 1,500 workmen employed in the reconstruction of the Parliament Buildings. Iron workers and leather workers were all fully employed, mainly on war contracts; pulp and paper makers were busy and conditions in the other trades were fair. Iron workers on contracts other than those for war purposes were handicapped by delayed delivery of steel but all were busy. Farm help continued in demand during the month and several hundred harvesters left the Ottawa district for the West.

- At Brockville there was a scarcity of labour in many lines of work, trades engaged in steel, iron and brass manufacture and all outside labour being hard to obtain. Railroad and steamboat traffic was brisk in both freight and passenger departments but unusually heavy in passenger traffic on boats. The prevailing wage for unskilled labour has increased owing to the demand for help and 25 to 50 cents per hour was being paid for outside work, while inside men were getting 20 to 25 cents per hour. Women were being employed and firms were advertising for them at \$1.50 per day. Potatoes were very high, selling for \$2 per bushel and one milk company has notified its patrons of an advance of 1 cent per quart. Farmers were finding difficulty in obtaining sufficient help. Manufacturing was very active. Customs collections for July showed a large increase over the corresponding month a year ago.

At Kingston the scarcity of labour was reported acute and indirectly the cause of quietness in some classes of work. All factories were very active, some working overtime to meet their orders which owing to the scarcity of labour would otherwise be behind. At a meeting of the Trades and Labour Council, August 3, it was decided to

start a co-operative bakery in Kingston and, if a city wharf can be secured, a co-operative coal yard. This action was taken on account of the recent increases in the price of bread and coal which were considered unnecessary by the Council.

At Belleville building trades were quite brisk and mechanics and labourers were in fairly good demand. Improvements have been made to several manufacturing establishments. Brass workers were active and the various foundries were busy.

At Peterborough labour conditions during August were much the same as last month, the demand being in excess of the supply. All factories, foundries and manufacturing establishments were very busy. The building trades showed increased activity. There was a good demand for unskilled labour. The railroads were very busy. The Grand Trunk Railway grain line from Midland was exceptionally active, about 200 cars of last year's crop of wheat per day passing through Peterborough. The price of bread increased on August 28 from 6 cents for 1½ pound loaf to 7 cents. Cheese also was high. The potato crop was not very good and the price per bag was \$3. Lumbering was very active.

At Lindsay there was considerable activity in real estate operations. The construction of a number of dwellings and the rebuilding of a woollen factory destroyed by fire afforded employment to building tradesmen.

All the large factories in Galt and vicinity were still working day and night shifts on special work, while one big shop was running an extra shift from seven a.m. until ten p.m. Women for some special factory work were being offered \$1.60 per day of eight hours. Bread has gone up to 7 cents a loaf of 24 ounces and bakers are making a loaf of 12 ounces for 5 cents. Milk has gone up to 8 cents, while potatoes were selling at 60 cents a peck and scarce at that price. The building trades were

busy and workers were very much in demand.

At Brantford labour was very active. Manufacturers were still advertising for men in all branches. Street paving, owing to lack of unskilled labour, was being delayed. The canning factory and textile works at Burford were very busy. Textile companies at Paris were also very busy.

At Kitchener (formerly Berlin) all classes of labour were well employed, with a shortage of machine hands in furniture factories, experienced shoe makers, rubber-shoe makers, girls for button factories, shirt and collar factories, whitewear factories, rubber footwear factories and paper-box factories, skilled mechanics for foundries and unskilled labourers for tanneries and breweries. All factories were busy and in a month's time the sugar factory will open. It will need about 400 men, half for each shift of twelve hours. Building trades were kept busy in the construction of dwellings and additions to plants. Rents were somewhat higher than they were during last winter but this did not affect very many as the majority of the workingmen own their own homes. Farmers were short of help in some instances. The potato crop was reported to be small owing to lack of rain. Milk was raised to 8 cents per quart and butter was up to 38 cents for creamery prints, the increase being attributed to poor pasture.

Labour conditions at Guelph and vicinity continued active, with a steady demand for both skilled and unskilled labour. Factories were all very busy, with a shortage of mechanics in most of them. Building trades were active, carpenters being in demand. The civic works department found it difficult to get sufficient men for sewerage construction and other civic works. The Radial Railway Board has granted an increase of 1 cent-per hour to motormen and conductors. A scarcity of help for harvesting and threshing was general. Root crops are suffering for want of rain and the apple crop will be light.

Customs returns for July showed an increase over those of the corresponding month last year. In order to meet the demand for houses for workingmen the Town Council of Fergus has subdivided a block of land and will sell lots for \$25 to any one who will build a house thereon of not less than \$1,000 in value.

At Stratford labour of all classes was well employed during August. The building trades, city outdoor workers, agricultural labourers and men employed in foundries were particularly active, some of the foundries maintaining night gangs. Wholesale and retail merchants reported business good and money seemed plentiful. Customs returns showed a large increase. Farmers reported little difficulty in securing help. Owing to the dry weather potatoes were poor.

Woodstock reported a continued shortage of labour of all kinds. Knitting and confectionery factories, which employ female labour, largely utilize the available supply and are constantly looking for more. Notwithstanding the shortage of labour in the country farmers seemed to be getting along very well with their work. Shopkeepers reported business very good. They were also suffering from a shortage of help. Practically all factories reported business good.

At London labour generally was fully employed and numbers of the large manufacturers would have engaged more men if they had been available. Trade of all kinds was on the increase, with London wholesale houses making heavy shipments. Cigarmakers employed by a large number of firms presented a new bill of wages and, failing an agreement with employers, went on strike at the end of the month. Chestnut coal went up from \$8 to \$8.50 a ton, while stove and furnace increased from \$7.75 to \$8.25. Flour also took an upward turn, the 25-pound bag which formerly sold for 90 cents selling for \$1. The extra dry summer has dried up the pastures and in consequence butter was selling at the highest summer price known, 39

cents per pound. Potatoes showed a very poor yield. The price was higher than last winter or about \$3 per bag. Summer apples were plentiful and sold for 35 cents a bushel. Milk was raised August 1 from 7 cents to 8 cents a quart. Along Lake Erie the catch of fish was smallest in years and at Port Stanley a number of tugs have quit going out for fish.

At St. Thomas labour was in good demand. General conditions were slightly better than during the previous month and decidedly better than during the corresponding month of last year. There was a scarcity of unskilled labour, particularly of outside workers and men for foundry work. Traffic employees had a good month. The building trades were better employed than during the previous month. Wholesale and retail trade was fair. Conditions in railway shops were normal. Michigan Central car builders, chiefly outside workers, threatened to quit work during the month because of the introduction of a new piece-work schedule, known as the "All Point" schedule. The difficulty was adjusted on the understanding that the old schedule would be in effect until satisfactory arrangements could be made for the introduction of the new schedule. A committee of car builders was sent to Toledo to see how the new schedule was working out at that point. Local industries reported a normal month. The Noble biscuit factory which closed some time ago has re-opened under new management and will manufacture all grades of candies. In the neighbourhood of 50 hands will be employed at the commencement.

At Chatham labour conditions were very active. Several of the largest manufacturing concerns were advertising for skilled mechanics. The cement companies and the sugar company were calling for labourers, the sugar company offering 30 cents per hour with a guarantee of three months' work. The building trades were very active. The city board of works was unable to complete the amount of work laid out for lack

of labourers. Freight traffic was exceedingly heavy and passenger traffic steadily increased. Merchants reported trade excellent with few asking for credit. Farmers had a very busy month but were handicapped by a lack of help. This was overcome, however, to a great extent by employing soldiers who were granted a month's leave.

At Windsor there was a good demand for all classes of labour, which was fully met by the local supply and the numbers coming into the city from other localities. Building trades were very active. The demand for houses still continued and many dwellings were being erected. Automobile factories were exceptionally busy and other manufacturing establishments were active.

At Owen Sound labour of all kinds was in good demand, and in some cases the supply was not quite sufficient. Building was quiet, but contractors were busy elsewhere or engaged on repair work. Factories were all active and running full time. Retail business was good. There was a shortage of farm help, partly owing to enlistment and partly owing to the call of the West, but all crops were harvested in good condition.

At Orillia an influx of labour from outside points helped to overcome the shortage, though the demand was still strong. A number of boys have been working in the factories during the summer vacation. The Water, Light and Power Commission has made arrangements with the Ontario Hydro Electric Commission for a supply of 2,000 h.p. of electrical energy in order to provide for the requirements of Orillia's factories pending the completion of the town's new power plant at the Ragged Swift Rapids. In order to supply the power, the Hydro is constructing a transmission line from Eugenia Falls to Collingwood. The most outstanding change in the cost of living was the advance in the price of bread to 16 cents for the three-pound loaf. Butter was scarce and the price high for the time of year. Potatoes were bringing the

farmer \$2.50 a bag and more, an unprecedented price in the district. Farmers were busy and received considerable help from soldiers.

At Cobalt the shortage of labour was reported as becoming a serious problem, especially at the gold mines; so many men having enlisted or gone West on the harvest excursions that some of the mines found it difficult to maintain their full production. All of the Cobalt silver-mining companies, encouraged by the continued high price of silver, were running at maximum capacity and many of the outlying properties were being developed and explored with encouraging results. Two of the largest gold mines in the country were getting in a position to greatly increase their output. Both the Hollinger and Dome mines were enlarging and improving their present mills and doing more extensive underground work. The hay crop this year was remarkably good and the grain crop a good average, despite the unfavourable year. A great many farmers, however, lost all their hay and grain in the big forest fires which occurred in July and August. Most of the hay was cut and harvested and considerable grain in the barns before the fire. Even the standing crops were so badly damaged by fire and smoke that what had not been ripe at the time was expected in many cases to be scarcely worth cutting. Following the two big bush fires a temporary quiet prevailed. Within the past two weeks of the month, however, rebuilding commenced and created considerable demand for carpenters and others in the building trades. In the last fire about August 22, the plant and buildings of the Casey Cobalt Mining Company were completely destroyed as well as the farm homes and outbuildings of some 95 farmers in the oldest settled and most improved sections of Northern Ontario, around New Liskeard. Apart from the loss of life, variously estimated at between 175 and 225, the material gain was reported very great, in so far as land clearing is concerned; while

much valuable timber was destroyed, approximately 1,500 square miles being burned over, settlers estimated their land as worth \$20 an acre more since the fire, stating that the burning left the land in such good condition that clearing the remaining rubbish would be a comparatively easy task.

At Fort William and Port Arthur all labour was fully employed. There was considerable activity in the shipbuilding trades. The erection and enlargement of elevators absorbed every available man in the building trades. One business block in Port Arthur was just being completed and another started. Owing to the scarcity of men wages advanced. Carpenters were receiving 40 cents an hour and labourers from \$2.50 to \$3 per day for a ten-hour day. The usual summer fishing has been in progress since May and the various fishing stations along the coast were all busy and fishing tugs fully engaged. Lumbering was quiet but much better than last year for the same period and the two mills in Port Arthur were both running. Railway construction was confined to the usual repair work, extensions and maintenance, also the laying of tracks to new elevators.

Manitoba

Winnipeg reported labour conditions very satisfactory. Nearly all the skilled trades found ample employment and in many instances difficulty was experienced in securing help, experienced or otherwise. The demand for harvest help was fully met. Crop conditions in Manitoba were poor. Sultry weather, prevailing at a time when all the sunshine possible was required, was responsible for some crop failures. A noticeable percentage of the crop will be left in the ground for the reason that the cost of its removal would be considerably higher than the exchange value of the crop itself. The average wage for harvest help was good, being slightly over \$2.50 per day. The cost of bread increased from 5 cents per loaf to 6 cents. During the latter part of

the month the cost of butter increased from 35 cents to 37 cents per pound. The local district Council of Carpenters and the Winnipeg Builders' Exchange signed an agreement regarding working operations and rates of pay.

Women were employed in much larger numbers during August than in the same month last year and to about the same extent as during July. The domestic help problem continues acute, though the demand was slightly decreased on account of families being out of the city on summer vacations. Farm positions were numerous and wages offered were \$25 and \$30 a month. There was a demand for housekeepers, both in the city and country but the supply is fairly good. There was not much demand for hotel help. Bookbinders were very busy and it was impossible to secure experienced help. Garment workers were all busy, working full time. Milliners were not very busy, August being a holiday month. Store help has been employed much better than a year ago. August is looked upon as a slack month in stores but this year has been above the average. Young girls have taken boys' places in many departments.

At Brandon the demand for labour continued active. Building trades were busy and there was a demand for unskilled labour. The demand for harvest help was not nearly so great as usual owing to partial failure of the wheat crops. Had the crop been normal the shortage of help would have been serious. Wholesale and retail business was good. During the month a new industry employing 15 hands tanning hides and skins was commenced. The grain crops in the district have been badly affected by rust and a yield of low grade wheat was expected. Local industries were busy.

Saskatchewan

At Regina labour was fully employed, harvesting absorbing any men who had been out of work. The harvest was progressing very well with favourable weather. Farmers have experienced no

difficulty in securing men as the excursions from the East brought in a large number and numbers of soldiers were given a month's furlough. Construction work suffered in some degree through men leaving to go harvesting, the Provincial Bureau of Labour having sent over 1,200 hands from Regina before the excursions arrived. The help received by the Bureau from Eastern Canada at the end of the month numbered 13,576 hands with two more trains yet to arrive. Building trades were busy, all men working full time. The Prairie Biscuit and Confectionery Company commenced the erection of a new factory which will cost about \$20,000. Machinery warehousemen were very busy distributing agricultural implements. Wholesale groceries reported a marked increase in business. A great many reports regarding black rust were said to be exaggerated; farmers claim they will have a good average crop.

At Moose Jaw the supply of harvest help was sufficient, though there was no surplus, and the demand was expected to increase with the commencement of threshing. Seventy-five per cent of grain cutting was completed. Red and black rust was reported to have done considerable damage in this district and the yield was expected to be about half that of 1915. There was not much demand for men in other lines except upon the railroads which needed experienced trainmen and engineers. Work trains were busy ballasting track and some new construction work was being done.

At Prince Albert farmers were busy harvesting their crops and had no trouble securing help, as many soldiers have gone out on harvest leave. In the city men could not be obtained as so many had gone to the harvest fields, and a shortage of labour for the lumber camps during the coming winter was expected. Representatives of the lumber industry announced that several camps would be opened so that a good cut could be obtained to supply a brisk demand for lumber from points south of Prince Albert. The lumber mills were still run-

ning night and day shifts and making regular shipments. The demand for the completion of the Grand Trunk Railway into the city has at last received attention and officials have been over the grade which was made a few years ago to ascertain the work needed to put it in shape for the laying of the track. Plans of the station and yards have been approved by the City Council. Flour advanced 20 cents per sack early in the month and later another 20 cents was added, making a total advance during the month of 40 cents. Coal was also dearer and cordwood showed a tendency to increase in price.

At Saskatoon heavy destruction of crops by hail curtailed a large amount of building and had a noticeable effect in diminishing the harvest operations. Harvesting was just beginning, and it was expected there would be an adequate supply of help if not a surplus as numbers of harvest workers were coming in from the United States and by excursion from the East. There was some rust in the Hanley district and other localities. A number of elevators were being built and the city was doing some repair work on the old traffic bridge as well as completing the new one. A steady volume of building was still being carried on in the country.

Alberta

At Medicine Hat labour conditions showed considerable improvement and most of the local industries reported business brisk. Building trades were very busy with a scarcity of labour. Freight and passenger traffic was active, and wholesale and retail merchants reported a good month's business. Grain was expected to be a little later in maturing this year, but reports of excellent crops were coming in from all parts of the surrounding country. It was expected there would be a shortage of harvest labourers. The Lake of the Woods Company are progressing rapidly with their new mill which is to replace the one destroyed by fire. The mill and elevator when completed will

have a much larger capacity than the old plant. Grading operations on the Canadian Northern Railway were well under way.

At Lethbridge labour conditions showed an improvement over those of last month; coal mines were working full time and taking on all available labour. The cutting of the grain crop had commenced, but was not yet general because of unfavourable weather. On account of rain there were many idle men, about 300 waiting to go on the fields. Hail and rain caused some damage, but a good harvest was expected. There was a great shortage of female help, both in the country and the city. There was no new building, but many repairs and alterations were being done and carpenters and painters were kept busy. Flour milling was active.

Calgary reported no general increased demand for mechanics in the building trades, though reports from the various trade groups showed that all were fairly well employed. The Alberta Farmers' Co-operative Elevator Company have 14 elevators under construction in different parts of the province. Although harvesting was not yet general, there was a considerable demand for harvest help during the latter part of the month; with an influx of labour from the East and West the supply was expected to be equal to the demand, wages being about the same as last year. Arrangements have been made for shipping the men at the 1 cent per mile rate for harvest work. A compromise has been reached between the miners of District 18 and the operators; the basis of the agreement is a war bonus of 8 per cent for the unexpired period of the present working agreement. Work has been resumed in all the camps and there has been a considerable demand for skilled miners throughout the province. An agreement has been reached between the Canadian Pacific Railway Federated Trades and the Canadian Pacific Railway officials calling for a wage increase of 3 per cent in the boiler shops and an increase of 2½ and 2 per cent in

other departments, with several improvements in the working conditions. Wholesale and retail merchants reported trade good.

At Edmonton the demand for labour was reported greater than in the previous month, particularly in the rural districts. Carpenters for work in the country were in demand and the wages offered were better than a year ago. The Canadian Northern Railway commenced the erection of a \$60,000 machine shop during the month and a considerable amount of building work was being done at the new stock yards. At the first of the month it was expected there would be a shortage of harvest hands, but with the large numbers coming to the Prairie Provinces from both East and West, and with the assistance of the soldiers, it was thought at the close of the month that all the help required was available. Harvesting was well under way in the last week of the month, and within a radius of 50 miles very little damage was reported by hail or frost. The Peace River country reported crops considerably affected by frost, something unusual for that part of the province. Hail caused some damage south and east of Edmonton. Railway contractors reported some difficulty in securing the necessary supply of labour owing to the brisk demand for harvesters. A fear that there might be a shortage of labour the coming fall and winter in the mining industry created a demand for coal, especially from points that suffered from the same cause last winter; dealers stated that the price would be increased in September. Work on the extension of the Edmonton, Dunvegan and British Columbia Railway from Spirit River to the British Columbia boundary was progressing satisfactorily considering the difficulty in obtaining a sufficient supply of labour. On the Canadian Northern branch line from Oliver to St. Paul de Metis grading was in progress, fifty men and teams being employed.

British Columbia

At Fernie labour conditions generally were very satisfactory, and, with the settlement of the unrest in the coal mining industry, the outlook for a period of activity throughout the fall and winter months was favourable. Railway freight traffic, owing to more extensive operations in the mines and the movement of products of the lumber industry to the prairies was considerably improved. Quiet again prevailed in labour matters throughout the district, as the coal mining controversy was terminated by the operators conceding a scale of advances for all coal mines and coke oven labour in the form of war bonuses from August 15 until March 31, 1917, when the existing working contract expires. (A special article elsewhere in the present issue gives full particulars of the settlement effected.) The demand for coal was rapidly increasing, railways and retail yards commencing to put in winter stocks. The lumbering industry was fairly active, there being a slightly increased demand for lumber during August.

At Nelson there was little change in labour conditions. There were very few idle men and a scarcity of skilled miners was reported. Wholesale and retail trade was active. Mining activity in the Sandon district is said to be greater than for many years and other metal mining districts reported great activity. At Trail continued activity prevailed. Rossland mines were active and generally mining throughout the district was steadily improving.

At Vancouver the general labour situation has improved steadily since the beginning of the year and some activity in real estate was in evidence. Houses were renting better and retail stores and other lines of commercial activity reported a slight but definite improvement in trade. This was reflected in the labour market, where there was a disposition on the part of the men in some occupations to seek a return to the rates of wages prevalent before the de-

pression. In the city itself, while there was a general quietness, workmen willing to go to jobs up country at better wages than have been offered for two years were hard to obtain. The employment department of the City Relief Office was advertising for 200 labourers for work on the building of a paper plant at \$3 per day, 90 cents to be charged each man per day for board, transportation advanced, but the department was experiencing difficulty in securing the men. Through the relief office the city is giving relief to 130 families at a cost of \$1,000 per month, and to 65 infirm single men at monthly cost of \$600. The building trades which have been very dull for two years have shown signs of improvement during the past two months. The Building Trades Council, which has been disbanded for two years, has been reorganized with a membership of five trades, viz., carpenters, painters, labourers, sheet metal workers and plumbers. Conditions were considered by the carpenters to have so far improved as to justify the placing of an organizer in the field to increase the membership of their organization. During the month men have gone from Vancouver in large numbers to harvest work on the Prairies, many of these coming from the farming and logging districts. Railway companies through the city relief department gave special harvesters railway rates of 1 cent per mile. The number who registered for this work was 3,940. Of these 2,600 actually left for the harvest fields. Lumber mills and logging camps were busy. Logging firms complain of inability to secure men and have sent to the city relief department a list of the number and classes of workers required. Fifty electrical workers employed by the British Columbia Electric Railway Company ceased work on August 24 owing to disagreement with employers over a new wage scale; the matter was still unsettled at the end of the month. The sixteenth Biennial Convention of the Federated Association of Letter Car-

riers was held in Vancouver during August.

Improvement in labour conditions for woman workers was maintained at Vancouver during August and the supply of workers was below the demand. Reports from employment agencies show that some difficulty was experienced in filling all positions offered along the lines of domestic help. More and more women are giving up domestic employment for work of another kind, the cessation of immigration from Britain further cutting down the usual supply. Wages for this kind of work show a tendency to increase, but, even so, there is a disinclination on the part of women to take domestic work when other employment is available. Garment workers were fully occupied, and in some cases working overtime. Boot and shoe workers were all busy, chiefly on Government orders. All lines of factory work showed activity, and sales clerks and department store employees were steadily engaged. Stenographers, clerks and office assistants were fully employed, a little difficulty being experienced in filling the positions offered for skilled stenographers. A number of women and boys went from the city for fruit picking and canning, fruit growers and packers complaining that they were unable to obtain all the help they needed. Tailoresses, milliners and dressmakers were not fully employed, it being the between-seasons period in these occupations. Telephone operators and waitresses were fully employed.

At New Westminster there were practically no idle men; many went to the Prairies for the harvest and local employment absorbed the remainder. Some building work was being done and the city was doing some street paving. Fishing has been poor, this having been the poorest season for sockeye salmon in the history of the Fraser river. The canneries had little to do, although the price to fishermen was advanced to 50 cents per fish. Lumbering was brisk, with a good demand for all classes of lumber mainly from the Prairie Pro-

vinces; a shortage of cars was noticeable, however, at the end of the month. Wages in the lumbering industry showed a tendency to advance owing to the inadequacy of the supply of this class of workers.

At Victoria labour conditions continued to improve, the demand and supply being about equal in all branches of industry, except in the building trades, which continued quiet. During the first three weeks of the month the boiler-makers and iron shipbuilders employed at the two local shipyards were on strike to enforce an eight hour day and some other minor concessions. The strike was settled on August 23, the eight hour day being granted. The machinists, blacksmiths, iron moulders and allied workers were also granted the eight hour day after being on strike for a few days, so that both shipyards will be operated on that basis in future. Three hundred and thirty harvest hands left for the prairies to assist in harvesting the crops, the railways giving a rate of one cent per mile. It is estimated that about 5,500 have gone from the province. The salmon pack this season for British Columbia as a whole will not amount to more than a three-quarter pack. On some of the rivers the pack was nearly a full one, while in others not more than half a pack will be put up. Good progress was being made in Victoria's outer harbour project and it was expected that the end of the year will see the completion of this undertaking. Good progress was also being made on the pier contract.

At Nanaimo labour market conditions showed a marked improvement over those of last month. While the trades have not shown much improvement, the demand for men in the mines has taken up the surplus of unemployed, and in most of the mines in the district there

was a demand for more skilled men. Coal mines in the city worked steadily and the rest of the mines in the district showed a marked improvement. Fishermen are quiet. Sawmills were working steadily and logging camps were busy.

In and about Prince Rupert were signs during August that labour conditions were improving. Merchants reported more money in circulation than during the past few months and buying more general. This was partially due, it was claimed, to the conclusion of the fishermen's strike on the Pacific coast in the settlement of which it was decided that fishermen should receive payment where catches were disposed of. The fishing industry as far as halibut shipment is concerned was steadily improving. Salmon fishing, however, was falling short of a full pack. Street improvements afforded employment to a number of men. The lumbering industry was active. The Skeena river mill, idle for the past three years, has been bought by Vancouver interests and, it was reported, would be put in operation and might possibly be enlarged. Mining was very active. There was a shortage of labour reported from a number of the camps and advertisements for help appeared in the local press. The mining property known as the South Easter, near Skidegate, was being developed and it was expected would soon ship ore. Development work was also being carried on at Lockport, Tasso, Jedway and other points on Moresby Island. The Ikeda mine at Ikeda Bay was shipping 100 tons of ore per month to the Granby smelter at Amyox. Recently a rich strike of 20 per cent copper was made in this mine. Boring operations were proceeding on the Swede group at Lockport by the Granby Company. The tourist traffic was still good, but was beginning to fall off with the advance of the season.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907. — PROCEEDINGS
DURING AUGUST, 1916.

DURING the month of August there were three applications received for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with disputes in the following cases: (1) dispute between the Algoma Central and Hudson Bay Railway Company and its conductors, baggagemen, brakemen and yardmen; (2) dispute between the Canadian Government Railways and their federated shop trades; and (3) dispute between the Grand Trunk Railway System and its maintenance-of-way employees.

The report was received of a Board which had been established to deal with a dispute between the Great North Western Telegraph Company and certain of its employees, being telegraph operators. The report in this case showed that a settlement had been made between the parties of the matters at issue.

A settlement was also reached during August by negotiation of certain matters at issue between the Halifax and South Western Railway Company and its employees in the maintenance-of-way and shop departments. In this last named case it was not necessary under these circumstances to establish any Board under the Industrial Disputes Investigation Act.

Apart from the foregoing, a Board was completed during the month to deal with differences between the Canadian Northern Railway System and maintenance-of-way employees on its eastern lines.

Applications Received.

An application was received on August 15 for the establishment of a Board to deal with a dispute between the Algoma Central and Hudson Bay Railway Company and its conductors, baggagemen, brakemen and yardmen, members of the Order of Railway Conductors and the

Brotherhood of Railroad Trainmen respectively. The dispute in question grew out of a demand on the employees' part for a revision of the existing schedule of rates of pay, rules, etc., and was stated to have affected directly 45 employees and indirectly 150 others. A Board was established by the Minister in this case on August 23, and is made up as follows: Mr. David Campbell, of Winnipeg, appointed on the nomination of the employees; Mr. F. H. McGuigan, of Toronto, appointed on the nomination of the employing company; and His Honour Judge Colin G. Snider, of Hamilton, appointed as chairman on the recommendation of the other Board members.

An application was received on August 15 for the establishment of a Board to deal with a dispute between the Canadian Government Railways and their federated shop trades, members of the International Association of Machinists, International Brotherhood of Blacksmiths and Helpers, Brotherhood of Railway Carmen of America, International Brotherhood of Boilermakers and Helpers, International Association of Steamfitters and Plumbers, and International Brotherhood of Electrical Workers. The dispute grew out of a demand on the employees' part for a revision of the schedule governing these employees, for the introduction of an eight hour day and for increased rates of pay, and was stated in the application to affect altogether 3,000 employees. This application was still under consideration by the Minister of Labour at the end of August.

An application was received on August 17 for the establishment of a Board to deal with a dispute between the Grand Trunk Railway System and its maintenance-of-way employees, members of the International Brotherhood of Maintenance-of-Way Employees, to the num-

ber of 3,200. This dispute grew out of a demand on the employees' part for an increased scale of pay. A Board was established on August 21 and was made up as follows: Mr. G. D. Robertson, of Welland, appointed on the recommendation of the employees; Mr. F. H. McGuigan, of Toronto, appointed on the recommendation of the employing company; and His Honour Judge R. D. Gunn, of Ottawa, appointed as chairman on the recommendation of the other Board members.

Other Proceedings under Act.

Reference was made in the July¹ and August² numbers of the *Labour Gazette* to an application from the Halifax and South Western Railway Company employees, members of the Canadian Brotherhood of Railroad Employees, growing out of a demand on the latter's part for increased rates of pay, the shortening of the working day and other proposed alterations in labour conditions, and to the suspension of procedure on this application by the Minister of Labour to permit of direct negotiations between the parties concerned. The Minister of Labour received word on

August 10 to the effect that a settlement had been reached between the parties interested; and, accordingly, no further procedure was taken under the Industrial Disputes Investigation Act.

Reference was made in the August³ number of the *Labour Gazette* to the establishment of a Board to deal with a dispute between the Canadian Northern Railway System in Eastern Canada and its employees in the maintenance-of-way department, including trackmen, bridge and building employees and water supply employees, members of the International Brotherhood of Maintenance-of-Way Employees, the number of employees affected being given as 1,000 directly and 3,000 indirectly. Mr. G. D. Robertson, of Welland, was appointed a member of this Board on July 22, and the Board was completed during August by the appointment of Mr. Fred. H. Richardson, of Toronto, on the nomination of the employing company, and the appointment of His Honour Judge R. D. Gunn, of Ottawa, as chairman on the nomination of the other Board members. The dispute in this case grew out of a demand on the employees' part for the adoption of a proposed new schedule of rules and rates of pay.

REPORT OF BOARD IN DISPUTE BETWEEN THE GREAT NORTH WESTERN TELEGRAPH COMPANY OF CANADA, AND CERTAIN OF ITS EMPLOYEES, BEING TELEGRAPH OPERATORS

DURING the month of August the report was received in the Department of the Board of Conciliation and Investigation appointed to deal with a dispute between the Great North Western Telegraph Company of Canada and certain of its employees, being telegraph operators. The report was unanimous and was to the effect that "after many efforts earnestly made by the parties, assisted by the members of the Board, to come to some common understanding,

we are pleased to be able to report that the parties have finally agreed upon a set of rules and schedule of wages. The differences and misunderstandings which seemed to have arisen and to exist between the employer and employees have now been quite removed and there is every reason to expect that no further trouble will be met. Harmony and good-will was expressed by both and we are glad to be able to say that both employer and employees seem to think the

rules and schedule agreed upon will be found to work well."

The application from the employees for the establishment of a Board in the above matter was received in the Department in the month of June, but not being in proper form was replaced by a second application under date of July 12. The estimated number of employees affected was given in the application as follows:

	Directly.	Indirectly.
Males 21 years or over	240	1,600
Males under 21 years	30	100
Females	55	100

Attached to the application was a schedule of proposed rules and rates of wages to govern between the parties.

The Board was established on July 19 and was made up as follows: Mr. F. H. McGuigan, of Toronto, appointed by the Minister in the absence of any recommendation from the employing company; Mr. David Campbell, of Winnipeg, appointed on the recommendation of the employees, and His Honour Judge Snider, of Hamilton, appointed as chairman on the recommendation of the other two Board members.

Report of Board

The text of the Board report is as follows:

IN THE MATTER of the Industrial Disputes and Investigation Act, 1907, and of a dispute between the Great North Western Telegraph Company of Canada, employer, and certain of its employees, being telegraph operators, employees.

To the Honourable,
The Minister of Labour,
Ottawa, Canada.

The Board of Conciliation and Investigation appointed by you in this matter met pursuant to appointment in the City Hall, Toronto, on Monday, the fourteenth day of August, 1916, and all being present, proceedings were commenced in which the company was re-

presented by the general manager, Mr. Geo. D. Perry, and Mr. C. E. Davies, traffic superintendent, while the employees were represented by Mr. S. J. Konenkamp, Mr. Chas. E. MaLette and Mr. Thomas B. Murray.

Considerable difference between the parties appeared in the beginning, but as a readiness to discuss the matters in difference was manifested by both sides members of the Board concluded that in time we might hope to get some sort of an agreement.

Having gone over the proposed rules, schedules and other matters for consideration item by item we succeeded in eliminating those as to which an agreement could be made in the first instance. Proceeding in this way we were engaged in hearing evidence and in hearing the parties and in frequent endeavours to secure a settlement by consultations on the sixteenth and following days until the twenty-second day of August.

After many efforts earnestly made by the parties, assisted by the members of the Board, to come to some common understanding, we are pleased to be able to report that the parties have finally agreed upon a set of rules and schedule of wages. The differences and misunderstandings which seemed to have arisen and to exist between the employer and employees have been now quite removed and there is every reason to expect that no further trouble will be met. Harmony and good-will was expressed by both and we are glad to be able to say that both employer and employees seem to think the rules and schedule agreed upon will be found to work well.

The memorandum of settlement made between the parties and the schedule of rules, etc., are attached to this report as part thereof. These documents have been duly signed in the presence of the Board by the general manager of the employing company and by the representative of the employees.

All of which is respectfully submitted.

Dated at Toronto, this twenty-second day of August, 1916.

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) F. H. MCGUGAN,
For the G.N.W. Tel. Co.

(Sgd.) D. CAMPBELL,
For the Employees.

Schedule of Rules governing telegraph operators employed by the Great North Western Telegraph Company at functional offices. (Functional offices are those where a chief operator and at least three additional telegraphers are employed.)

1. Right of promotion will be governed by seniority where ability is equal and sufficient.

Vacancies will be filled by appointment of the senior competent telegrapher who makes application; the superintendent to be the judge of qualification.

Vacancies created through leave of absence for a period of exceeding fifteen (15) days will be filled during such leave of absence according to the rules.

Any telegrapher employed will, after 30 days' continuous satisfactory service, be considered a permanent employee.

A list showing the seniority of telegraphers employed at each office will be kept by the chief operator, and available for examination by any telegrapher on such list. This list will be subject to correction, on proper representation by any telegrapher whose name appears on such list.

2. In case of reduction of force, otherwise than for personal cause, the telegrapher or telegraphers last employed will be first dispensed with.

Any telegrapher, in good standing, whose services have been dispensed with on account of reduction of force, will be given a certificate and preference in filling new positions or vacancies.

3. Telegraphers declining promotion do not forfeit any right to the same or other position they may be entitled to when a vacancy occurs, but will rank

junior to the telegrapher receiving the promotion.

A telegrapher absent on leave when a vacancy occurs to which he is entitled will not be debarred on return within thirty (30) days from claiming the position.

Any telegrapher required to perform the duties of a sub-chief for a period exceeding thirty (30) days will, during the time he is so employed, be considered a sub-chief and receive the salary allotted at the time to the position.

4. A telegrapher will not be suspended or discharged until after investigation and the charges sustained. He may have the assistance of any co-telegrapher whom he may choose, and the particulars of the charge will be furnished in writing on request. He will also have the right to appeal from the local to the general officers of the company.

5. Telegraphers, after four years' continuous service, will, on request in writing, be granted two weeks' leave of absence each year with pay at regular rating, during which time they shall not take service as telegraphers anywhere. (Continuous service as telegrapher with the commercial department of the Canadian Northern Railway prior to January, 1915, will be considered the same as Great North Western Telegraph Company's service.)

Applications for leave of absence, filed in January of each year, will be given preference in the order of seniority, and applicants will be advised as early as practicable of date allotted them. January applications will have preference over later applications, and the company will, so far as business conditions permit, arrange vacations between May 1 and September 30, when so desired.

6. Extra time will be paid for all time worked on Sunday. On the following public holidays: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day and Christmas, five hours on day shifts or four and a half hours on night shifts will entitle telegraphers to full day's

pay, additional time to be paid *pro rata*.

Telegraphers called upon for duty at other than their regular place of employment will suffer no loss of regular time and will be paid reasonable necessary expenses incurred while travelling.

7. Where telegraphers are required to use typewriters, if so requested, the company will rent them to telegraphers at the actual cost to the company of furnishing.

8. The hours of duty will be as follows:

Nine hours will constitute straight day duty beginning and ending between seven (7) a.m. and six (6) p.m.

Eight hours will constitute a day's work on all split tricks and no trick will be split more than once.

Seven and one-half hours will constitute early and late night tricks.

Telegraphers will be entitled to two (2) short reliefs of ten (10) minutes each on every trick, for which they will make application in writing and be given relief as early as practicable.

Overtime will be computed at the rate of seven (7) hours per day.

9. A telegrapher discharged, or leaving the service in good standing, will be paid in full, and given a certificate

stating length and character of service, and if discharged, the reason therefor. In case of delay he will be paid regular wages for each day detained in excess of two days.

Telegraphers leaving the service of their own accord will be required to give the company fifteen (15) days' previous notice in writing.

Before dispensing with the services of a telegrapher other than when discharged, the company will give the telegrapher fifteen (15) days' previous notice in writing.

A telegrapher leaving the service in good standing will be given preference in re-employment over other applicants when a vacancy occurs.

At non-functional salaried offices telegraph operators will have the rights of seniority and of appeal from the local to the general officers of the company as covered by the above rules, and after four years' continuous service will be granted one week's leave of absence each year with regular pay.

(Sgd.) GEO. D. PERRY,
General Manager.

(Sgd.) C. E. MALETTE,
Representative of Employees and General Chairman.

SETTLEMENT OF LABOUR DISPUTES AFFECTING CERTAIN ASBESTOS MINES IN THE THETFORD MINES DISTRICT, QUEBEC

REFERENCE was made in the August issue of the *Labour Gazette* to an application which was received in the Department of Labour on July 21 for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a dispute between The Asbestos Corporation of Canada, The Johnson Mines, The Jacob Mining Company, Limited, the Bell Asbestos Mines, Limited, and Martin-Bennett, Limited, and the workmen employed in these mining properties, members of Local Union No. 143

of the Western Federation of Miners. The application claimed that 900 employees were directly concerned in the demand which had been made for an increased wage scale and the recognition of the Western Federation of Miners through the "check-off" system, and 500 others indirectly.

Before the foregoing Board application was received the Minister of Labour had endeavoured to promote a settlement of the matters at issue by a conference in his office of representatives of the employing interests concerned and of the

workmen affected, and had advised that the outstanding differences should be taken up with each company separately through committees of its workmen.

However, a general strike of the workmen employed in the above mentioned mines occurred on August 3. On the same date Mr. C. A. E. Blanchet, barrister, of Ottawa, was appointed by Order-in-Council as a Royal Commissioner under the Inquiries Act, to inquire into the existing unrest in the asbestos mining industry in the Thetford Mines district and the nature and causes thereof, with a view to the establishment of more harmonious and satisfactory relations between employers and employees in question. Mr. Blanchet spent some days in the district with the foregoing objects in view, and reported that a settlement was reached on August 23 of the labour difficulty in question. The settlement referred to was embodied in a signed agreement in the terms following:

In the matter of the strike now existing among the employees of the following firms:

- (a) The Asbestos Corporation of Canada, Limited,
- (b) The Bell's Asbestos Mines Company,
- (c) The Martin-Bennett Asbestos Mines, Limited,
- (d) The Jacob's Asbestos Company, Limited,
- (e) The Johnson's Company,

the following settlement has been made:

- (1) An increase of $2\frac{1}{2}$ cents per hour will be granted to all employees, except those that are on contract work and those who receive monthly wages;
- (2) As to these, as conditions differ in each mill,

separate agreements will be made with them within ten days from the date hereof;

(3) The above wages shall stand so long as the present conditions of the trade obtain and so long as the work of the employees shall be satisfactory;

(4) This settlement is made with the employees individually, regardless of any union to which they may belong, and shall be executed by two of the said employees of each mine on behalf of them all;

(5) The said employers are to have a free hand and an absolute discretion in the engagement or re-engagement of their employees;

(6) The employees who will be re-engaged agree to use their best efforts to render their services as productive and effective as possible, in order to give satisfaction to their employers;

(7) The different mines shall re-open on Thursday, the twenty-fourth August instant.

(One marginal note good.)

For the King's Mine:

- (Sgd.) CYPRIEN MORISSET.
- (Sgd.) HERMERIAGILE LAIGNON.

For the Johnson Mine:

- (Sgd.) ISAAC ROUSSEAU.
- (Sgd.) WILLIAM SHARPE.

Pour la Martin-Bennett:

- (Sgd.) LOUIS VERMETTE.
- (Sgd.) ARCHILAS MORIN.

Pour la Mine Beaver:

- (Sgd.) ALPHONSE MARTINEAU.
- (Sgd.) ALFRED GAGNE.

For the Bell Mine:

- (Sgd.) JOSEPH VALLEE.
- (Sgd.) WM. McKEEN.

For the Jacob's Mine:

- (Sgd.) CHARLES LABRANCHE.
- (Sgd.) ARTHUR LAPPER.

For the said Companies:

- (Sgd.) J. A. LANG.

For the Department of Labour:

- (Sgd.) CHAS. A. BLANCHET,

Commissioner.

Thetford Mines, August 23rd, 1916.

INVESTIGATION AND SETTLEMENT OF DISPUTE BETWEEN WESTERN COAL OPERATORS ASSOCIATION AND THE MINERS OF THE CROW'S NEST PASS AND SOUTHERN ALBERTA, REGARDING THE LATTER'S DEMAND FOR A TEN PER CENT WAR BONUS

THE good offices of the Department of Labour were invoked in connection with a dispute which grew out of a demand on the part of the coal miners of the Crow's Nest Pass and Southern Alberta on the mine owners for a ten per cent war bonus in addition to the wage rates fixed in the agreement of March 31, 1915, between District 18 of

the United Mine Workers of America and the Western Coal Operators' Association, which is current until March 31, 1917. The dispute in question, which affected approximately 5,000 mine workers of various classes, continued over a period of several weeks and threatened serious consequences to the domestic and industrial life of West-

ern Canada and to the public interest at large. Conferences between the parties concerned were arranged through the efforts of Messrs. J. D. McNiven and Frederick E. Harrison, resident fair wages officers of the Department of Labour at Vancouver and Calgary, respectively, which finally resulted on August 5 in the conclusion of a compromise agreement, which was later ratified by referendum vote of the mine workers affected.

The war bonus demand was originally put forward at a meeting of the miners employed at the Coal Creek Mines of the Crow's Nest Pass Coal Company on May 4, when a resolution was passed requesting the district officers of the United Mine Workers of America to approach the Western Coal Operators' Association, comprising in its membership various coal mining companies of the Crow's Nest and Southern Alberta Districts, for a ten per cent increase in wages to all haulage hands, to be considered as a war bonus. Shortly afterwards the Michel local of the U.M.W.A. passed a resolution requesting the district officers to ask the Operators' Association for a ten per cent increase for all employees in the district. Copies of the latter resolution were also forwarded to all the other locals in District 18, with a request for their endorsement of the demand. The resolution was duly ratified by all of the locals with the exception of Bankhead. It was claimed on behalf of the miners that their war bonus request was justified by the increased cost of living in the various mining camps. In addition to the war bonus feature many outstanding grievances were brought forward with attendant complications.

Another important feature of the situation was the shortage of labour due to the large number of men who have enlisted for military service. The enlistment in question naturally affected almost the entire English-speaking element amongst the mine workers, with the result that the proportion of foreigners to English-speaking men in the

various camps throughout the district was said to range between sixty-five and eighty-five per cent.

The war bonus demand was presented on June 16 in Calgary by the district officers of the U.M.W.A. to the officers of the Western Coal Operators' Association. The miners' officials placed their men's demand for a straight 10 per cent increase for all mine labour, which increase was to be regarded as a war bonus, before the operators, the arguments in favour of the granting of this demand being based upon the following:

- (1) Increased cost of living, which made it impossible for the mine employees to exist on the present scale of wages.
- (2) The present scale of wages had been based upon the conditions existing at the time it was negotiated, but since since that time a phenomenal change had transpired which warranted the readjustment of the wage scale.
- (3) Similar bonuses have been granted by the operators of coal mines in the Old Country and in America, despite the fact that equally as binding working agreements existed, wherein specific rates for each class of labour were stipulated.
- (4) Shortage of mine labour, particularly that classification known as the haulage hands.
- (5) Company upon taking miners from the occupation of digging coal and employing them as occasion demands to act as drivers (one section of the haulage hands) they were obliged to pay the men so temporarily employed at the rate of \$3.30 per 8 hour shift, in accordance with the terms of the contract, while the specified rate for the qualified drivers was only \$3.03 per shift of 8 hours.

The foregoing request was, however, refused by the Western Coal Operators' Association, who offered instead a counter proposal of a five per cent increase up

to March 31, 1917, and an additional increase of two and one half per cent from that date up to the March 31 following the end of the war. This offer was made contingent upon the miners agreeing to sign an extension of the agreement for the period mentioned. The employers' counter proposal was submitted to a referendum vote of the membership throughout District 18 and was rejected on July 10 by an adverse majority of 895, in a total vote of 3,449, as follows:

Local.	Local No.	Yes.	No.
Fernie	2314	309	227
Michel	2334	54	334
Carbondale	2227	55	85
Coleman	2633	198	59
Blairmore	2163	38	104
Frank	1263	60	68
Hillcrest	1058	15	137
Bellevue	531	91	256
Lethbridge	574	61	283
Coalhurst	1189	31	195
Chinook	1126	7	108
Taber	102	3	33
Canmore	1487	72	74
Georgetown	3026	45	20
Bankhead	29	108	31
Drumheller	1746	18	40
Nordegg	1087	112	118
		1,277	2,172

The reason assigned for the men's rejection of the companies' foregoing offer was the indefinite duration of the proposed agreement, namely, until the end of the war. Although the above vote was taken on July 10, earlier in the month murmurs of impending dissatisfaction among the mine workers were heard from different quarters, and an actual three or four days' cessation of work occurred at Blairmore during the beginning of the month. The day after the ballot, or July 11, the coke oven employees of the International Coal and Coke Company at Coleman laid down their tools and demanded an increase before they would resume work. This stoppage lasted ten days, or until July 20, when an adjustment was secured through the good offices of Mr. Frederick E. Harrison, one of the departmental fair wage officers.

The United Mine Workers' Association's officers in communicating the fore-

going expression of their membership reiterated the demand upon the operators for a ten per cent increase. This was in turn refused by the operators, who renewed their former offer, or as an alternative suggested that the matter be referred to arbitration. It was at this point that the two fair wages officers of the Department of Labour arrived in Fernie on July 21 and placed themselves in communication with the parties respectively concerned.

A mass meeting of the Fernie miners was held on Sunday afternoon, July 23, at which the following communication was read from the Western Coal Operators' Association:

Calgary, Alberta, July 21, 1916.

To A. J. Carter,
Secretary, District No. 18, U.M.W.A.,
Fernie, B.C.

Dear Sir,—

Re Repeated Demand for Ten Per Cent War Bonus.

The operators, as represented by their Executive Committee, met with the representatives of your organization on June 16 last and explained to them fully the reasons why it was impossible at that time to grant the request of the miners for a 10 per cent war bonus.

Without going into details, it was shown at that time:

(1) That the operators had not received any increase in the selling price of coal.

(2) That there were not increased profits; therefore there was nothing to grant a "war bonus" from.

(3) That provided a war bonus of 10 per cent could be granted, and an equivalent amount added to the selling price of coal, it could only have the effect of curtailing the market and reducing production on account of competition from competitive fields, and thereby make less work for the miners.

(4) That contracts were now in existence for the largest part of our production for the term of our agreement with you. These contracts were based upon the scale of wages in the agreement and it is impossible to make any advance on these contracts.

(5) That the operators at this time were under increased cost which they have to bear; this increased cost being caused on account of increased cost of supplies, the average of which is from 50 to 60 per cent.

(6) That a strong argument of the United Mine Workers of America always has been that to make an agreement with them for a given term would mean that so far as labour cost is concerned the operators could always figure what this would be for the given term and could sell their coal accordingly.

(7) That to grant a 10 per cent war bonus at this time, when obligations are outstanding to supply coal at a given figure, would in some instances work such hardship as to possibly close down some of the mines in this district, which in turn would mean less work for the miners of this district.

Upon the request contained in your telegram of the fourteenth instant, asking us to reconsider your request of a 10 per cent war bonus, I beg to advise you that at a meeting of the Association your telegram was carefully considered, and I am instructed to advise you that as there has been no change in conditions as they existed on June 16 last, when your former request was considered, and for the reasons as set out at that time we are sorry we are unable, on reconsidering your request, to grant same.

On June 22 we made you a proposition, the purport of which was that we would at that time grant you a five per cent war bonus, with a further war bonus of two and one half per cent on April first next, subject to an extension of the agreement which expires on March 31 next, until March 31 after the European war was over.

As explained to you at that time, the operators in granting any increase at this time, owing to their output having been contracted for, would of necessity have to bear the cost of this advance themselves, as it was impossible for them to increase the selling price; thus the reason, as explained to you, why it was necessary to have an extension of agreement in order that they would, after the expiration of their present contracts, be in a position to make up their losses that they would of necessity have to bear on account of the proposed war bonus.

The operators entered into an agreement with your organization for a period ending March 31, 1917. They entered into this agreement in good faith, and have made contracts for their output upon this agreement. However, owing to conditions arising from the war, and wishing to do all possible to alleviate, in a measure, these conditions, we made our proposition of June 22, and I have been instructed to inform you that the proposition as made June 22, 1916, re offer of 5 per cent war bonus now and a further war bonus of 2½ per cent April 1 next, will be adhered to by them if it is reconsidered and accepted by your organization.

I am further instructed to advise you that in the case of your organization again refusing our proposition of June 22 that the operators are willing to submit the questions which we have been considering to arbitration.

Yours truly,
(Signed) W. F. McNEILL,
Secretary.

It was the desire of the district officers that no action should be taken by the miners until the United Mine Workers' Association's Executive Board of District 18 had considered the foregoing letter. However, on the following afternoon the Fernie miners did not turn out to work and the mines were accordingly closed for that day. The District Executive Board met on the same afternoon for conference regarding the existing situation. Messrs. McNiven and Harrison obtained permission to appear before the Executive Board and suggested that another conference should be held with the operators, provided such a meeting could be arranged, or that, failing the foregoing, the matters at issue

should be referred to an arbitration board under the terms of the existing agreement or to a Board established under the provisions of the Industrial Disputes Investigation Act. The District Board of the U.M.W.A. expressed itself as favourable to another meeting with the operators, which the latter would not, however, consent to until the striking miners had returned to work. Through the efforts of the district officers work was resumed in the Fernie mines on July 26, although the working force did not come up to its normal strength until the twenty-eighth.

On the last named date arrangements were made by the fair wages officers for a conference at Calgary on the following day between the Western Coal Operators' Association and the district officers of the U.M.W.A. In the meantime, however, a strike occurred at Lethbridge and two officials of the District Executive Board proceeded to the latter place for the purpose of inducing the men to resume their duties. The Western Coal Operators' Association's representatives reiterated their refusal to join in the proposed conference at Calgary until the striking miners returned to work. The trouble at Lethbridge was terminated at the end of the week, but on the Sunday following, July 30, the Fernie miners of the Crow's Nest Pass Coal Company in a mass meeting resolved to cease work until the result of the Calgary conference was made known. Work in the Fernie mines accordingly ceased on the following day. Matters were still further complicated by the miners ceasing work at Coalhurst on August 1 and at Lethbridge and Kipp on August 2. The miners at Nordegg decided to go out on August 1, but reconsidered their action on the following day. The week from July 31 to August 5 was, however, marked throughout by the most acute labour unrest. The efforts of the district officers to induce the miners to return to work proved unavailing, whilst the Western Coal Operators' Association absolutely declined to treat with the union until the miners re-

turned to work. The fair wages officers finally succeeded in obtaining a meeting between committees of the operators and operatives, but without any immediate result, the former still demanding that work must first be resumed in the Fernie mines before they would discuss terms of settlement.

Throughout August 1 and 2 the fair wages officers were in constant communication with the officers and miners with the hope of securing a conference, but without avail. They also offered to convey any proposals which either party wished to make to the other. The operators were in session throughout the Wednesday following and on Thursday morning submitted further wage proposals to the fair wages officers for conveyance to the United Mine Workers' Association's representatives. This was met, however, by a counter proposal on the part of the United Mine Workers' Association, which was submitted in turn to the operators. Further proposals and counter proposals were transmitted between the parties on the same day, and a joint meeting was held privately between the officers of the Western Coal Operators' Association and the United Mine Workers' Association District Board. Notwithstanding this renewal of negotiations little progress was made, and the private conference referred to had, indeed, broken up without any well defined understanding whether another meeting would be held. Direct negotiations were, however, again renewed through the efforts of the fair wages officers, but without any progress being made in that way.

The United Mine Workers' Association's officers expressed the view that there was little use of continuing direct negotiations and called on the fair wages officers to again take up the role of mediators between them and the Western Coal Operators' Association. An amended proposal submitted by the miners on August 5 to the operators through the fair wages officers was accepted by the latter that evening, provided the

same was ratified by the United Mine Workers' Association's membership. The amended proposal in question was to the following effect:

Five per cent on all contract miners' rates.

Eight per cent on all contract coke oven rates.

Twenty-seven cents per day on all \$3.03 rates.

Thirty cents per day to all make-up miners.

Twelve and half per cent on all day wage rates below \$2.47.

Ten per cent on all day wage rates from \$2.47 to \$3.03.

All men receiving \$2.47 per day to receive \$2.75.

Twenty-five cents per day on all other day wage rates above \$3.03.

The foregoing rates to be considered as a war bonus and to terminate with the present agreement.

Between August 6 and 10 the draft agreement was laid before the seventeen local unions of the United Mine Workers' Association throughout District 18 by the district officers, and explained in full, the referendum vote being taken on the last named date with the following result:

Local.	Local No.	Yes.	No.
Fernie	2314	251	243
Michel	334	88	83
Carbondale	2227	148	51
Coleman	2633	231	36
Blairmore	2163	104	49
Frank	1263	169	25
Hillcrest	1058	70	122
Bellevue	531	260	125
Lethbridge (Galt)	574	216	163
Coalhurst	1189	110	116
Chinook	1126	26	89
Taber	102	24	81
Canmore	1387	119	29
Georgetown	3026	29	32
Bankhead	29	106	32
Drumheller*	1746	24	147
Nordegg	1087	127	118
Total		2,078	1,394

Majority for: 684.

*Owing to the management of these mines withdrawing from the Western Coal Operators' Association and making a private arrangement with the men, the vote of this local was not counted.

Work was resumed in all of the mines in the district on August 7, with the exception of Michel and Lethbridge, where operations were not resumed until the following day on account of inability to the union officials to place the proposition before the union membership.

The total number of mine employees affected by the new agreement is about 5,000. During the course of negotiations which preceded the present agreement the operation of the various mines were affected as follows:

Coal Creek	9 days.
Michel	6 "
Galt	7 "
Coalhurst	3 "
Chinook	1 "
Nordegg	1 "
Drumheller	3 " (Newcastle)
Total	30

The Hon. Lorne A. Campbell, Minister of Mines for the Province of British Columbia, was present during the greater part of the negotiations and materially assisted in bringing the matter to a satisfactory conclusion.

The terms of the agreement between the Western Coal Operators' Association and the United Mine Workers' Association,

under which the mines of the Crow's Nest Pass and of Southern Alberta have been operating since April 1, 1915, will be found in the April, 1915,¹ number of the *Labour Gazette*, with the exception of the wages scale, which constituted a renewal of the rates fixed by agreement between the parties concerned dated November 17, 1911.²

One of the principal features of the modified agreement which has just been made between the Western Coal Operators' Association and District 18 of the United Mine Workers' Association is a provision for a minimum rate of \$3.30 per day per shift in place of \$3.00 per day per shift when a miner's working place becomes deficient owing to any abnormal conditions preventing him from earning the minimum wage. In the case of miners taken from contract work to do company work a rate of wages of \$3.55 is substituted for the one of \$3.30 per day previously in force. The following is a comparison of the outside wage rates existing under the previous agreement with those which will now take effect; also of the old and new rates for inside work on coke ovens and in the briquette plant:

OUTSIDE WAGES.

Occupation.	Hours per day.	Old day wage.	New day wage.
Bottom men	10	\$2.89	\$3.18
Slate pickers (boys)	10	1.37	1.54

CONTRACT RATES.

An increase of five per cent is allowed under the new agreement on all of the previously existing contract miners' rates,¹ the old and new contract rates in the mines of the Crow's Nest Pass Coal Company at Coal Creek and Michel being as follows:

CONTRACT PRICES COAL CREEK (FERNIE) COLLIERY.

Mining rates per gross ton of .52 ½c, .55c, .58c,

.60c and .62 ½c will, under new proposal, be increased to .55 1/8c, .57 ¾, .61c, .63c and .65 5/8c respectively.

CONTRACT PRICES MICHEL COLLIERY.

Mining rates per gross ton of .55c, .57 ¾c and .60c will, under new proposal, be increased to .57 ¾c, .60 5/8c and .63c.

All other classes of work performed by the contract miners such as timbering, yardage, brushing, track-laying, etc., will be advanced five per cent on the present scale.

¹See December, 1911, number of *Labour Gazette*, pp. 541 to 564.

INVESTIGATION OF LABOUR CONDITIONS THROUGHOUT THE COBALT MINING CAMP

AN application was received on June 24 for the establishment of a Board of Conciliation and Investigation to deal with a dispute which was said to affect approximately 2,200 workmen employed by forty-two mining and milling companies in the Cobalt Camp and Casey Township. It was stated in the application that the dispute arose out of a demand on the men's part for increased wage rates and improved conditions of employment. The employees affected were members of Cobalt Miners' Union of the Western Federation of Miners, and the application was signed by the president and secretary-treasurer respectively of the last named union. It was further represented in the application that the workmen affected had endeavoured to bring about conferences with their respective employers and also with the Mine Managers' Association in Cobalt but that their efforts to these ends had been unavailing.

Without the mutual consent of the various companies concerned, the terms of the Industrial Disputes Investigation Act would not apparently permit the establishment of a single Board to deal with a dispute affecting so many different employers. This consent being withheld, a Board of Conciliation and Investigation could not be established. After discussion with the parties and preliminary inquiry in the Cobalt district by two Departmental Officers, a Royal Commission was appointed under the Inquiries Act to report upon the existing unrest and the nature and causes thereof, with a view to making such recommendations as in their opinion might serve to promote amicable relations between the employers and employees affected and to remove or lessen the friction now existing. The Royal Commission of Inquiry was appointed on August 18, and was made up as follows: His Honour Judge Emerson Coatsworth, of Toronto, Junior Judge of York County, chairman; Mr.

E.T. Corkill, Safety-Officer of the Canadian Copper Company, Copper Cliff, Ont.; and Mr. Joseph Gibbons, Business Agent of the Amalgamated Street and Electric Railway Employees of America, Toronto, Ont. The Order in Council bearing on this matter was in the terms following:

P. C. 1976.

The Committee of the Privy Council have had before them a report, dated 18th August, 1916, from the Minister of Labour, representing that, whereas there is considerable unrest in the mining industry in the Cobalt District, in the Province of Ontario, and there is reason to believe that such unrest may result in serious injury to public interests;

Therefore, with a view to the establishment of more harmonious and satisfactory relations between employers and employees in question, it is advisable that an inquiry be made into and concerning such unrest and the nature and causes thereof.

The Minister, therefore, recommends that it be referred to a Commission under the provisions of Part I of Chapter 104, Revised Statutes of 1906, commonly called the Inquiries Act, composed of His Honour Judge Emerson Coatsworth, Junior Judge of the County of York, in the Province of Ontario; E. T. Corkill, Safety Officer, Canadian Copper Company, Copper Cliff, Ontario, and Joseph Gibbons, Business Agent for the Amalgamated Street and Electric Railway Employees of America, Toronto, Ont., to hold and conduct such inquiry, with all the powers conferred by the foregoing statute upon the Commissioners.

The Minister further recommends that the Commissioners have the right to determine the manner of conducting the proceedings in respect of such inquiry and to make inquiries and investigation concerning the relations between employers and employees in the said

industry, with a view to making such recommendations as in their opinion may serve to promote amicable relations between employers and employees and may be calculated to remove or lessen the friction now existing.

The Minister further recommends that the said Judge Coatsworth be appointed Chairman of the said Commission, and that the report of the Commissioners be presented to the Minister of Labour.

The Minister further recommends

that all fees and expenses payable to the Commissioners, or to witnesses or other persons who may under their authority be concerned in the proceedings of the Commission, shall be governed by the provisions as to such matters of the Industrial Disputes Investigation Act, 1907, as if the Commission had been a Board of Conciliation and Investigation, established under that statute.

The Committee concur in the foregoing recommendations and submit the same for approval.

TRADE DISPUTES DURING AUGUST, 1916

DURING August there were 14 strikes in existence involving directly 72 employers approximately and 6,900 employees. Seven of these strikes commenced during the month while seven were carried over from July. In the seven new disputes of the month, 15 employers and 2,129 employees were involved, and 57 employers and 4,770 employees were involved in the disputes which commenced prior to August. The time losses occasioned by the 14 strikes amounted to approximately 50,178 working-days, 22,188 of which are chargeable to the eight new disputes and the balance, 27,990 working-days, were lost through the seven old disputes. During the month, four of the old and four of the new disputes terminated, the result of the settlement in the case of three of the old disputes being in favour of the employees and in the case of one a compromise agreement was effected. In the case of the four new disputes, two were in favour of the employees and two resulted in a compromise arrangement. There were six disputes still unsettled at the end of August.

New disputes in August, 1916.—The following tables show the various trades affected by the strikes which commenced during August:—

TRADES	No. of disputes	No. of firms.	No. of employees.
Mining	1	5	900
Building Trades	1	1	9
Metal	4	4	895
Food, Tobacco and Liquor Preparation...	1	5	325
Total	7	15	2,129

Disputes beginning before August

Four of the disputes commencing before August terminated during the month, settlements being effected in two cases as the result of the employers conceding the demands of their employees and in two other cases through negotiations. These disputes are:—

Coal miners, Crow's Nest Pass district.—A number of strikes arising out of a demand for a ten per cent war bonus affected mines in the Crow's Nest Pass district and embraced within the Western Coal Operators' Association, during July, particulars in regard to which, however, were not received in time for publication in the *Labour Gazette* for August. On July 11 coke oven employees of the International Coal and Coke Company at Coleman went on strike,

but returned to work July 20. July 24 the haulage hands in the Fernie mines refused to work and thereby suspended operations at the local mines. A mass meeting held in the afternoon of July 25 passed a resolution that all mine employees should resume operations on July 26, in order that negotiations might be continued between representatives of the miners and the mine operators, the latter having refused to negotiate while men were on strike. On the evening of July 25 the matter was complicated by coke oven employees at Fernie ceasing work demanding a settlement of local grievances and the application of the ten per cent war bonus. Contrary to the decision of the mass meeting the coke oven employees did not return to work and only a limited number of the haulage hands returned to work on July 26. On July 26, the miners at Lethbridge went on strike, and by July 27 matters reverted to practically a complete cessation. July 28, the haulage hands at Fernie went to work and operations were resumed at the mines the morning of that day. The dispute at Lethbridge was also adjusted and the men returned to work July 29. On July 31 the Fernie miners claiming that negotiations between the parties had not been resumed ceased work again. Their action was followed a day or two later by miners at Michel, Coalhurst, Nordegg, Lethbridge and Kipp, and the week from July 31 to August 5 marked temporary and permanent cessation all through the district. On August 5 the operators submitted a new proposal amounting to an eight per cent increase which was approved by the miners' representatives and all local unions were notified. August 10 was set as the date for the referendum vote and in the meantime practically every mine in the district resumed operations on a satisfactory basis. The result of the referendum vote was in favour of an acceptance of the operators' offer. Full particulars of the negotiations between the parties and of the settlement effected are given elsewhere in the present issue of the *Gazette*.

Carpenters, St. Catharines, Ont.—On May 2, about thirty-five carpenters went on strike owing to the building contractors refusing to grant the demanded increase in wages from 43 to 50 cents per hours. Subsequently a majority of the firms conceded the 50 cents per hour, and on August 18 the strike was declared settled, 50 cents per hour being regarded as the established rate.

Clothing workers, Hamilton, Ont.—Twenty-nine employees of the clothing manufacturing firm of Davis Bros., at Hamilton, Ont., went on strike on July 14, owing to their objection to a "tabulation" system introduced by the firm for the purpose of checking their factory output and which the workers alleged involved a reduction in earnings. The strike was settled on August 7, as the result of negotiations between the firm and representatives of the employees by which the firm agreed to abolish the "tabulation" system.

Labourers, Hamilton, Ont.—On July 7, about 55 labourers in the employ of the Dominion Steel Foundry Company went on strike for increased wages. The strike was settled on August 2, as the result of the Company granting the labourers a ten per cent increase in wages.

Disputes beginning during August

Asbestos miners, Thetford, Mines, Que.—On August 3, about 900 asbestos miners in the employ of five asbestos mining companies, namely, The Asbestos Corporation of Canada, Ltd.; The Bell Asbestos Mines Company; The Martin-Bennet Asbestos Mines, Ltd.; The Jacob Asbestos Company, Ltd.; and The Johnson Company, went on strike for an increase in wages from \$2 to \$2.50 per day. The strike was settled on August 24 and work resumed by the miners at a compromise rate of \$2.25 per day, the working agreement being effected by mediation of the Department of Labour.

Carpenters, Old Welland Canal, Ont.—On August 8, nine carpenters employed by the Department of Railways and Canals on the old Welland Canal went

on strike for an increase in wages from 30 to 40 cents per hour. The strike was still unsettled at the end of August.

Boilermakers and iron shipbuilders, Esquimalt, B.C.—On August 1, a number of boilermakers and iron shipbuilders with their helpers employed in the shipbuilding yards of Yarrows Ltd.; Esquimalt, B. C., went on strike to enforce their demand for an eight-hour day-at 50 cents per hour. On August 15, the machinists, blacksmiths and helpers employed by the same firm also went on strike for an eight-hour day. The total number of mechanics affected being 325. On August 23, all the employees had returned to work, the company having conceded their demands.

Boilermakers, machinists, iron shipbuilders, blacksmiths and helpers, Esquimalt, B.C.—On August 14, about 260 employees of the Dominion Government naval yard at Esquimalt, B. C., went on strike as a protest against the employment of non-unionists by Yarrows Ltd., to replace those who had gone on strike. The strike was settled

on August 18, the non-union workers objected to being dismissed.

Machinists, rivetters, carpenters and labourers.—On August 17, about 260 employees of the Davie Shipbuilding and Repairing Company, Ltd., at Levis, Que., went on strike for an increase in wages of 5 cents per hour. The strike was settled on August 23 through the intervention of the Department of Labour, a compromise rate being agreed upon and accepted by the employees.

Linemen, Vancouver, B.C.—On August 24, about 50 linemen in the employ of the British Columbia Electric Company went on strike for increased wages and recognition of the union. The strike was unsettled at the end of August.

Cigar makers, London, Ont.—About 325 cigar makers employed by five cigar manufacturing establishments, namely Brener Bros., McLeod, Nolan & Co., Geo. E. Coleman Company, J. J. Dyer and John McNee & Sons, went on strike on August 29 for an increased scale of wages. No settlement had been reported up to the end of August.

REPORTS OF EMPLOYMENT BUREAUS

DURING July there was an increase of 25 per cent in the demand for workers as compared with June as shown by reports from 111 employment bureaus,—83 commercial, 9 public and 19 philanthropic. The number of vacancies notified to all offices was 46,020, a daily average of 1,616.34, as compared

with 1,298.74 in June. The number of persons placed was 18,979, a daily average of 732.79, as compared with 639.75 in the preceding month. The proportion of the total vacancies filled to the total vacancies notified was 41.2 per cent as compared with 50.2 per cent in June. As to employment for women and girl

workers, the number of vacancies notified was 9,514, a daily average of 370.39 as compared with 349.31 in June. The number of such workers placed was 3,482 as compared with 3,311 in the preceding month. The proportion of vacancies filled to vacancies notified for men and boys was 42.3 per cent, and for women and girls 36.6 per cent, as compared with 55.3 and 36.0 per cent respectively for June.

The five principal centres of labour distribution, Montreal, Toronto, Winnipeg, Edmonton and Vancouver, showed large increases in the demand for labour, particularly Montreal, Winnipeg and Edmonton. Substantial increases are also noted in St. John and Saskatoon. Victoria has a small gain in the demand, while Quebec and Brandon show decreases.

The number of persons who obtained casual employment through the Salvation Army and other agencies was 1,291, a daily average of 49.65, as compared with 58.78 in June. The number of casual jobs secured was 3,293, a daily average of 126.62, as compared with 157.76 during June.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed a very considerable increase in August as compared with the preceding month, the total value of building permits rising from \$3,274,688 in July to \$4,321,601 in August, an increase of \$1,046,913 or 31.9 per cent. Grouping the returns by provinces, British Columbia, Alberta, Manitoba and Ontario showed marked in-

creases, the value of permits rising 255, 101, 117 and 39 per cent respectively in these provinces. As compared with the corresponding month of last year building permits in August showed the remarkable increase of \$1,913,613 or 79.47 per cent, the value for August, 1915, being \$2,407,988. As compared with August of last year there were gains in all provinces except New Brunswick and Saskatchewan. In British Columbia a

very large increase—355 per cent was indicated, and in Ontario there was a gain of 140 per cent. Of the larger cities Montreal showed an increase of 10 per cent in August as compared with July, and an increase of 94 per cent as compared with August of last year, while Winnipeg showed an increase of 74 per

cent as compared with July and of 8 per cent as compared with August of 1915. In Toronto and, in a marked degree, in Vancouver, large increases, both as compared with the preceding month and with August of last year, were indicated.

MIGRATION AND SETTLEMENT

THERE is a dearth of statistical information at present with regard to migration. The monthly statements issued by the British Board of Trade and the Canadian Immigration officials are being withheld for various reasons, and as to the movement of persons between the United States and Canada the information available does not include United States citizens. With regard to persons other than citizens of the United States in the movement between that country and British North America 1,682 such persons left the United States in July to take up permanent residence in British North America as compared with 1,851 in June. On the other hand 7,725 persons (other than citizens of the United States) departed from British North America in July to take up permanent residence in the United States as compared with 8,986 in June, indicating for British North America an out-

ward balance of 6,043 in July on this class of persons as compared with an outward balance of 7,135 in June.

Homestead Entries and Land Patents

Homestead entries. — During the month of July, 1916, there were 258 homestead entries in Manitoba; 477 in Saskatchewan; 635 in Alberta, and 28 in British Columbia, a total of 1,398 as compared with a total of 1,459 in June, 1916, and 2,032 in July, 1915.

Lands patented. — According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of July, 1916, the number of patents was 892 and the number of acres 136,523.63, as compared with 1,257 patents and 196,565.26 acres during June and 1,441 patents and 232,265.08 acres for July, 1915.

PRICES, RETAIL AND WHOLESALE, IN CANADA, AUGUST, 1916, AND IN OTHER COUNTRIES

THE prices movement in Canada during the month was marked by higher tendencies in foods, fuel and rent, while materials continued to decline somewhat from the high points reached in May, as a result of repeated advances, particularly in metals, chemicals and certain other materials since the early part of 1915. In some materials, however, the markets were still rising slightly. Wheat, followed by other grains

and flour, advanced considerably as a result of unfavourable crop reports, while dairy products were rising rapidly with the advance of the season and some shortage in all fodders except hay.

In retail prices of foods a substantial increase appeared in the weekly budget which includes 32 staple foods. For August the cost was \$8.63 as compared with \$8.46 in July, \$7.78 in August, 1915, and \$7.68 in August, 1914. In

fuel and light, anthracite coal averaged higher and there were slight rises in soft coal, wood and coal oil. Rent was also upward in some localities. As compared with prices last year higher levels appeared in all the foods except milk. Potatoes were considerably higher than a year ago, but not much higher than in 1914. Rent averaged nearly the same as in 1915, but lower than in 1914.

In wholesale prices the Department's index number was again slightly lower, standing at 178.5 for August, as compared with 178.8 for July, 151.5 for August, 1915, 136.3 for August, 1914, and 134.1 for August, 1913. The considerable increases in grains and dairy products were offset by declines in metals and some chemicals, while animals and meats and fruits and vegetables also averaged lower.

All groups were higher than in August, 1915 and 1914, and when compared with August, 1913, all were higher except raw furs.

The accompanying tables give details as to the prices movement during the month and as compared with the same month in previous years. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts inhabited by workingmen.

The weekly budget shows the cost per week of a specified quantity of certain staple foods for the month, and as compared with the same month in previous years, and the average for each year from 1910 to 1915. The table also includes the average cost in 60 cities of a specified quantity of coal, wood and coal oil, and the rent per week. It is estimated that a large proportion of the income of workingmen is spent upon these items. Statistics as to prices of clothing and for other goods are difficult to keep on a uniform basis from time to time

owing to changes in quality, style, etc. Further it is held by many authorities that the expenditure on such items is determined by the amount of income left after foods, fuel and rent are provided for. The Department's index number of wholesale prices, which has been published from month to month in the *Labour Gazette* since 1911, was designed "to afford a means of measuring tendencies in the cost of living and an interpretation of the current trade situation as reflected in prices. For the former purpose . . . retail prices are theoretically preferable. The present investigation, however, is confined to wholesale prices, because of their greater availability and accuracy and because over long periods they show fairly enough the general trend of living expenses." *Wholesale Prices, Canada, 1890-1909, p. 437*. By the summer of 1915, however, the prices in certain materials, particularly metals for war purposes, had risen so greatly as to cause the index number of wholesale prices to indicate greater increases in the general levels of prices than in the cost of living, thus fulfilling the second purpose mentioned above. To more accurately fulfil the first purpose, namely, to measure the rise in the cost of living, the publication of the weekly budget was begun in the *Labour Gazette* for August, 1915.

Retail Prices

Prices of meats were up in some localities but down in others, in beef the easier tendency predominating. In pork, however, prices advanced in many localities. On the hog markets prices were the highest ever recorded.

Eggs and butter advanced throughout the Dominion. Milk was up in Brantford, Ont., and was expected to advance later at Kitchener (Berlin), Ont., on account of poor pasture.

Bread advanced in price at Brockville, Orillia, Brantford, Owen Sound, Sault Ste. Marie, Port Arthur and Fort William, Ont., at Winnipeg, Man., at

f. Natural gas. g. Lignite. h. Calculated from the price per 100 lbs.

i. Allowing \$1.00 per ton for delivery.

Regina and Prince Albert, Sask., and at Vancouver and Prince Rupert, B.C. The price of flour was higher throughout the Dominion, the wholesale price being up over \$1.00 per barrel. Other ingredients in making bread were also reported to be rising in price. The rise in flour followed record prices for wheat as a result of unfavourable crop reports throughout the world.

Rice and tapioca advanced in several cities. Canned tomatoes, peas and corn were advancing, following rises in the wholesale prices and unfavourable crop conditions. Beans were also higher and evaporated apples advanced at Montreal, as last year's supplies were sold out. Prunes advanced at St. John, N.B.

Sugar declined in several localities following a drop in the wholesale price.

Potatoes were higher in many localities, the new potatoes coming on at high level. Old potatoes, however, were declining where any were on the market. Unfavourable reports as to crops were made from several localities. Moreover, the season was unusually late and early potatoes were late coming on the market. In some localities the wet weather in the spring had damaged the crop and again dry weather in the summer lessened the yield.

Coal, both anthracite and bituminous, advanced in several localities, the former in Ontario and Quebec and the latter in the Maritime Provinces, Quebec and Ontario, while lignite coal rose at Edmonton, Alberta. Wood was also upward.

Rents advanced at Peterborough and Kitchener (Berlin), Ont., as houses were becoming scarce.

Wholesale Prices

Grains and fodders.—Manitoba wheat advanced from \$1.25 at the end of July to \$1.37 in the first week in August, and reached \$1.60, but declined 10c in the last week. Reports as to short crops in United States, Canada, and other parts of the world accounted for the rise. Winter wheat at Toronto rose from \$1.05 to \$1.15 and later was up to \$1.22, but

declined 6c. The new crop came on the market at \$1.25 for No. 2 quality. Other grains were upward in sympathy with wheat. Western barley reached 80c and Ontario barley 68c. Western oats rose above 51c per bushel and Ontario oats reached 52c. American corn rose to 98c per bushel, but eased off somewhat. Flaxseed rose to \$1.99, but eased off. Ontario peas were up to \$1.95 and went off the market. Ontario rye rose to \$1.07 for new crop. Hay at Montreal eased off to \$18.50-19.00 for No. 1, old crop. At Toronto the new crop was down to \$10.00-12.00 for No. 1. Bran and shorts were up considerably, bran reaching \$24.00 per ton and shorts \$27.00.

Animals and meats.—Choice butcher cattle were very scarce at Winnipeg, the best butchers bringing only \$7.00-7.25 per cwt. At Toronto, choice steers rose to \$9.00 per cwt., but declined to \$8.50. Dressed beef, hindquarters, declined to \$15.50 per cwt., but rose \$1.00. Fore-quarters declined \$1.00 to \$9.50-10.50. Hogs reached record levels at \$12.00-12.15 per cwt., f.o.b. shipping points in Ontario, but declined \$1.00 per cwt. Dressed hogs advanced \$1.50 per cwt., to \$16.50. Bacon and hams were steady at 25c and 23c respectively. Lard rose to 17¼c per lb. in tierces. Sheep rose to \$8.00-8.75, but declined 50c. Spring lamb declined from 23-25c to 18-20c, and veal declined 2c per lb.

Dairy produce.—Finest creamery butter reached 35c per lb. at Montreal, being up 5c. At Toronto, creamery solids reached 34c, and dairy prints were up to 30c. Cheese rose to 20c per lb., the highest price on record. Wholesale prices of milk were rising, on account of poor pasture and the shortage of fodder, except hay, and the high prices of grains. Fresh eggs rose to 38c per dozen at Montreal and to 37c at Toronto. Storage eggs were also upward 2c.

Fish.—Lake trout and whitefish were down 1c at Toronto. The spring catch of dried cod was sold at Lunenburg at \$7.25 per quintal, reported to be the record price. The quantity caught was

*Six commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

somewhat less than previous years and the export market was good. The shore fisheries on the Gaspe coast and throughout the Maritime Provinces was reported to be disappointing.

Fruits and vegetables.—Potatoes came on the market at Montreal at 60c to \$1.00 for early Canadian varieties as compared with 40-50c last year. Pears came on earlier than a year ago, but were higher in price, being up to 50-60c. Plums came on at 45c for a small basket. Raspberries were on the market in the early part of the month at 13-18c per box as compared with 8-12c a year before, when the quality was poor. Lemons were up to \$9.00 per box for Verdellis, a record price. California Valencia oranges were also high at \$5.50 a box. New potatoes came on at Montreal at \$1.60 for an 80 lb. bag, but rose to \$1.70-1.75. Old potatoes were still quoted at Toronto at \$1.90 per bag. Beans advanced to \$5.50 per bushel. Tomatoes were up to \$1.00-1.50 per basket, the first week as compared with 75-85c a year before. At the end of the month, however, the price was down to 35-60c per bag, as compared with 25-30c a year before. Canned peas advanced to \$1.25 per dozen and canned tomatoes to \$1.40.

Miscellaneous groceries.—Spring wheat flour, first patents, advanced \$1.60 per barrel, reaching \$8.20 at Montreal. Winter wheat flour was also up \$1.00 to \$1.40 per barrel. Soda biscuits rose $\frac{1}{2}$ c per lb. to $8\frac{1}{2}$ c. Oatmeal rose 5c per bag and rolled oats advanced 10c per bag. Sugar declined 40c per cwt., granulated being down to \$7.91 per cwt. in barrels at Toronto. Glucose rose 40c per cwt., in sympathy with corn. Maple sugar was easier at 9-12c per lb.

Textiles.—Ontario wool was slightly lower, washed being down 3c to 3c at 44-47c per lb., and unwashed at 32-35c. Raw cotton advanced over 1c per lb., to 14-30c. Coloured cottons and prints averaged higher. Raw silk advanced 75c per lb. for Japanese filatures and 50c per lb. for Italian classical. Jute rose 50c per cwt., as there was improvement in buying. Hessians advanced

nearly 1c per yard. Fine tow tended higher. Flax sewing twine rose 3c per lb. to 36-38c.

Hides, leather, boots and shoes.—Hides and leather were steady, but green calfskins eased off to 25c per lb.

Metals and implements.—Iron markets continued firm. Aluminium was slightly firmer. Antimony, however, declined to 16c per lb. Copper and brass were steady. Lead eased off to $8\frac{1}{4}$ c per lb. Quicksilver declined to \$75 per flask. Silver was slightly higher, being up to 67c per ounce. Spelter continued to decline, being down to 12c. Zinc sheets were also lower at 25c per lb.

Fuel and lighting.—Anthracite coal advanced 10c per ton at Montreal, making the price \$6.85 as compared with \$6.50 a year before. Connellsville coke was higher for furnace grades, being up to \$2.75-2.85 at the ovens. Prices of coal and coke tended higher in the Crow's Nest Pass district. Gasoline declined 1c, being down to $30\frac{1}{2}$ c.

Building materials.—The lumber market at St. John, N.B., was quiet owing to a scarcity of ships and stocks were piled up on the docks. The local markets were also dull. At Montreal local trade was slightly better. The sash and door business and box making showed improvement. In Ontario there was good demand for B. C. shingles. Orders for shell boxes improved the demand for hard wood. Common building bricks continued easier than in the spring. Fire-brick advanced again. Lead pipe declined 1c to 12c per lb. Wire nails advanced 10c per keg. Sash weights eased off to $33\frac{1}{2}$ c per lb. Heavy strap hinges advanced to \$3.05 per dozen pairs for 8 inch size. Copper wire was steady. Barbed wire fencing declined 25c to \$4.25 per cwt. White lead was down $\frac{1}{2}$ c per lb. Linseed oil rose nearly 10c per gallon to 90c for raw and 93c for boiled. Turpentine was 1c easier at 69c per gallon. Benzine was down 1c per gallon. Venetian red advanced again, rising from \$2.75 per cwt. to \$4.00. Shellac was up 10c per gallon. Window glass rose at Toronto to \$5.85 per box.

House furnishings.—No changes were reported.

Drugs and chemicals. —Brimstone, ground, was easier at 2c per lb. Caustic soda was down at 70c per lb. Soda ash was also lower at 3½c per lb.

Miscellaneous.—Raw furs were steady. English hops were 1c per lb. lower at Montreal at 32-36c per lb. Newsprint paper was easier at \$2.40-2.50 per cwt. Wrapping paper was slightly higher at \$5.50-6.25 per cwt. for No. 1 Manilla. Sulphite pulp was higher at \$90 per ton for news grade. Raw rubber was easier at 58-58½c per lb. Starch rose to 6½c per lb.

Index numbers of prices in other countries available for recent date are shown on p. 1583.

For the United Kingdom, retail prices of foods were reported on in the British Board of Trade *Labour Gazette* as follows:

Between July 1 and August 1, 1916, the general level of retail prices of food showed a slight decrease, mainly owing to the decline in the price of potatoes, though there was also a general reduction in the price of cheese, and imported meat was a little cheaper on August 1 than a month earlier.

Although the decrease in the general level of prices was quite small, it is noteworthy as being the first decline reported since August, 1914.

Wholesale prices in the United Kingdom were lower as shown by the index numbers of both the *Economist* and *Statist* for the end of July, declines having also occurred in June.

In Australia retail prices of foods and groceries were only slightly higher in May than in April as shown by the index number of the Commonwealth Statistician. The index number of wholesale prices was, however, appreciably higher, the index number standing at 1315 for May, as compared with 1298 for April, advances appearing in all groups except meat.

In New Zealand the index number of retail food prices averaged 1276 for June, as compared with 1269 for May and 1190 for June, 1915.

In Sweden the index number of retail prices of foods, groceries and fuel stood at 148 for the second quarter of 1916, as compared with 143 for the first quarter, and 121 for the second quarter of 1915, the price level in July, 1914, being the base and equal to 100.

THE RISE IN PRICES DURING THE WAR.—AN ANALYSIS OF PRICE TENDENCIES IN CANADA AND IN OTHER COUNTRIES.

FROM the outbreak of war in Europe at the end of July, 1914, prices in general showed an almost uninterrupted movement upward in nearly all commodities until the summer of 1916 when important recessions occurred on the chief markets in many lines of materials and in some foods. The rise early in the war was most marked in foods, but in the spring and autumn of 1915 and during the first part of 1916 very steep advances occurred in materials needed for war supplies. In previous wars index numbers have similarly indicated steep advances in prices. The Sauerbeck index number of prices in England,

the oldest record of this nature, and which averaged 85 in 1912 and 1913, was high during and after the Napoleonic wars, rising to 189 in 1809, falling then to 110 in 1816, and averaging 160 in 1818. During the American Civil War the Sauerbeck index number rose to 105 in 1864, and, in 1873, after the Franco-Prussian War, it reached 111. The index number of wholesale prices of the United States Bureau of Labour Statistics, based on the decade 1890-1899, was as high as 317.5 in 1864, and stood at 190 for 1872. Dun's index number similarly showed high price levels in the United States at these dates.

During war, conditions of production and marketing are so disturbed that the factors entering into the determination of prices act and react in very different relations from those obtaining during peace. Certain commodities become of supreme importance and advances in prices to almost any height are possible. Again, the supply of many commodities, some of which may be necessities in war, may be completely cut off. Substitution for articles not obtainable is not always as easy as during peace and in some cases is quite impossible. The great staples immediately and prospectively become relatively more valuable than other commodities which are not so universally useful or capable of long keeping and distant transportation. As compared with other goods, wheat, the source of bread, "the staff of life," immediately becomes in war time of greater value than during peace, and prices naturally rise quickly. This increase in value is usually further increased by the psychological fear of famine and interruption to food supplies, a feeling sometimes accompanied, even in countries normally exporting wheat and flour, by the inclination of the population to lay in stocks of flour in anticipation of higher prices, or to safeguard the domestic supply.

The purchases of food supplies by governments for armies usually coincide with these greater demands from individuals and further tend to raise prices. In meats the same forces are at work, as these are necessities for efficient military operations. Further, the soldier on active service consumes more meat than in his normal occupation, and during the present war, when such great proportions of the people in many countries have been called out for military service, this has become a very important influence on the markets. Again, when great sections of the population of many countries are engaged in the production of munitions and other war supplies, sometimes under considerable pressure, more intense application and longer hours, the consumption of food

is necessarily increased if supplies are available. This is especially true of those classes normally not employed, or engaged only at light work, so that a light diet is sufficient. To secure the great supplies of food thus necessary, Government intervention is frequently resorted to. In many parts of Europe, maximum prices for wheat, flour, bread, and other foods were named, and governments took part in the buying, storing and transportation of grain, meats, sugar, etc. Great Britain, having access by sea to the world at large, found comparatively few measures of this nature necessary, the purchase of sugar supplies and the regulation of the transportation of grain and meats being its most striking departures from the normal.

Turning from foods to materials we find similar conditions affecting the lines necessary for war supplies, especially metals, chemicals, coal, wool, leather, etc. Embargoes on exports, regulation of shipments, Government control of production, bounties, etc., are measures which have been adopted. In all such Government measures to control prices and safeguard supplies the authorities endeavour to interfere as little as possible with normal conditions, as in the complications of modern industry and trade the effect opposite to that intended may be produced. For instance, establishing maximum prices for wheat may cause the production to be curtailed in favour of the cultivation of crops thus made relatively more profitable. Such conditions tend to force Governments more and more into the complete control of industry and trade, for which the machinery is usually lacking.

In Canada and the United States, comparatively distant from the scene of conflict and relatively self-contained in industry and trade, very few measures of this kind have been adopted. The most important aspects of the rise in prices have been the great demand for exports of food and military equipment at a price which made increased production profitable and exerted a stimu-

lating influence on trade and industry in nearly all branches; this industrial activity was in turn accompanied by considerable increases in the cost of output, in the prices of food and the cost of living generally. Greater production at profitable prices, constant employment and wage increases in some instances partly offset these conditions. The advances were most noticeable in wheat, flour, meats, butter, eggs, leather, wool, metals and chemicals, the export demand at high prices drawing strongly on the supplies of these commodities. Imports of goods from Europe and other countries were also dearer in most cases, but were usually not necessities of life.

Again, during war, the influence of the money supply tends greatly to advance prices. In previous wars, over-issues of paper currencies, notably in the United States during the Civil War, caused very great advances in prices. In the present war this has been a factor to some extent, particularly in Germany, Austria and Russia. In other countries an important influence in the same direction has been the expansion of credit, due perhaps to the great expenditure by many governments in their own and other countries, and made possible by great loans. The purchasing power and demand for commodities thus created exercise a great influence on all prices and, coinciding with scarcity and special war demands for some of the most important commodities, are accompanied by advances in most lines, many only remotely affected by war conditions.

The general increases in ocean freight rates and insurance constitute an additional factor in raising prices, and taxation in various forms is a further influence. An important feature of price movements during war is the fact that when governments are buying necessities for their national existence there is an absence of the normal influence which finally stops the rise in prices, namely, the existence of a point at which it is no longer possible for high prices to be profitable, or even perhaps to be paid at all. Governments purchasing for an

entire nation will not quickly find the point at which it is not worth the cost to obtain certain supplies or at which credit is no longer obtainable.

From the upward movement of prices which set in on the outbreak of war in nearly all parts of the world, important recessions did not occur until the early summer of 1916. There had been declines in some lines in September, 1914, which proved to be merely readjustments from the speculative levels reached as it became certain that the war would not be quickly ended. Again, in the summer of 1915, prices of many foods were easier on account of good crop prospects, while at the same time some materials were reacting from the speculative levels reached in the spring of 1915, when the immense scale on which the production of war material had been undertaken was exerting considerable influence on the markets. Toward the close of 1915 the full effect of these great preparations began to be felt on the markets, particularly in the metals and chemicals used in the manufacture of guns and shells. During the early part of 1916 this phase continued, production being under the greatest stimulation for war contracts. Toward spring of the present year, however, there were signs that production was overtaking demand in some lines as prices rose less steeply, then ceased to rise, or even fell. These conditions gradually extended to other lines of goods until in June there was almost a general fall in the prices of materials. Food-stuffs also eased off in many lines on various markets so that on the whole the general movement of prices was reversed for the first time since the beginning of the war in many commodities and on important markets.

The *Statist*, London, July 15, commented as follows on the fall in prices appearing at the end of June in Great Britain:

Our index number, which we give elsewhere, shows that in June the prices of 45 commodities declined 4.1 per cent, which is the first decided reaction since war began nearly two years ago. The fall occurred in nearly all commodities other than textiles, and

* Preliminary figures.

appears to have been due mainly to the progress of the allied armies, and the hope that the end of the war is now within sight. No one can deny that the importance of recent events is very great, for it is evident that the allied armies are now fully equipped with men and with munitions, and are now able to take the offensive. In these circumstances a further fall in the prices of commodities seems to be inevitable. In some measure the great rise in prices has been brought about by purchases not only by the Government, but by private individuals, who have sought either to protect their future needs by buying in anticipation, or have bought for speculation, in the hope of gaining a profit from the constant advance in prices. As the fortune of war is now moving in favour of the Allies, and as the end of the war is thus being brought nearer, it is now probable that the holders of goods will seek to sell them, and that merchants and retailers will buy from hand to mouth, as they will not wish to be left with large stocks of goods bought at high prices on their hands at the end of the war. In other words, the fall in prices reflects the world's opinion of the probable duration of the war. From July, 1914, until May, 1916, the Allies were merely preparing for the great struggle before them, and as no one could predict how long the war was likely to last, prices of commodities steadily rose throughout the period, and the index number advanced from 81.2 to 135.4, while now that the preparations of the Allies are completed, and the allied armies are gaining the mastery, prices of commodities have begun to fall. Probably it will be found that if the allied armies meet with any decided check prices will temporarily recover, only to fall again as the Allies become stronger and stronger and victory becomes more and more assured. Between June, 1914, and the end of May, 1916, the advance in the prices of 45 commodities was as much as 66.7 per cent, and after the decline of 4.1 per cent in June the net rise in prices is still as much as 61.1 per cent. The greatest rise in prices has been in vegetable foods, where the advance is still as much as 80 per cent. How far prices will fall before peace is declared no one can form an opinion. In a large measure it will depend upon the stocks of goods, that have been accumulated in the hands of merchants and of retailers in anticipation of an advance in prices. As far as we are able to gauge the situation, however, there are substantial stocks of goods in the hands of retailers, whose profits during the war have been very large, and who have used those profits to increase their stock-in-trade. And if retailers permit their stocks to run down to a very low level, as they may do with the war going favourably, then the demand upon manufacturers will be less pressing, and the latter will reduce their purchases of raw materials, with the result that stocks may accumulate in the hands of the ultimate producers, and there may be greater desire to sell than has been shown since the summer of 1914.

In Canada as well as in other countries wheat, flour, sugar and tea were among the first commodities to advance owing to the effect of the war in interrupting normal trade and supply; a demand for army supplies contributed to the rise in meats. Metal markets were also disturbed as there was speculation in material for war supplies, but it was expected that the decrease in the demand

for industrial purposes would more than offset the war demand. In rubber, coke, gasoline, lumber, raw furs, wool and cotton markets, similar influences lowered prices for a time, especially in the last. A financial crisis and a brief holding back of shipment by sea in some parts also tended to stop trade and lessen production, at the same time making the supply of some commodities uncertain for a time. Orders for military equipment soon caused advances in wool, leather, etc., as well as in foods and later in metals. In the latter a great demand first developed for machines for the manufacture of munitions, and as these were finished metals and explosives for munitions were in still greater demand. As Germany had been the chief source of supply of many chemicals and dye-stuffs, great scarcity developed in these, and was only partially relieved by the establishment of new factories and sources of supply. The great expenditure on war supplies increased purchasing power in all directions and led to firmer markets in many commodities at first depressed. Food prices continued to rise, there being a great demand for army supplies and for export to the United Kingdom and Europe. In wheat and other grains the high prices led to increased areas being sown for the 1915 crop; and as weather conditions were favourable record crops were harvested in most countries.

Prices, however, continued high except for a few months during the summer of 1915, as the demand, immediate or prospective, continued good. In meats, supplies could not be increased as readily and large numbers of livestock had been sacrificed in Canada in the autumn of 1914 owing to the scarcity of feed. In sheep the high price of wool tended to keep stock off the market. The crops of vegetables in Eastern Canada were smaller in 1915 than a year before and prices were therefore higher, especially in potatoes and canned goods. An additional export demand for cheese, butter and eggs caused higher prices. Wages advanced in industries where

employment was good and scarcity of labour developed. Higher ocean freight rates caused high price levels for many imported goods and exerted some influence in lowering prices for export goods to Europe, but this was offset to a great extent by the fact that freight rates from all countries were relatively high and therefore the increases were added to the cost of goods in England. The *Statist*, London, which continues the Sauerbeck index number, estimated that half the rise in prices in England was due to higher freight rates.

The movement reached its height in Canada and the United States in the spring. Bradstreet's, New York, April 15, 1916, commented as follows:

To say that price movements, disregarding comparatively isolated recessions, are progressively upward, is to utter what has become a commonplace. The broad continuously rising sweep is, it need scarcely be said, only in line with expectations. Barring slight reactions, which have been of the character of barely perceptible eddies in a steadily widening stream, the movement of commodity prices has been upward since the European war broke out—a war that has thrown inordinate demands into our markets, while keeping oversea products from coming here. But to again discuss the basic causes for dear commodities would be a work of supererogation.

It is, however, apropos to say that domestic developments have been accentuated by widespread prosperity which has caused merchants to divorce themselves from a long practiced policy of buying frequently but in small lots on each occasion, and the reaction in the opposite direction has superinduced demands that considerably exceed floating supplies. There exists the fear that supplies may become still scarcer, that prices may go even higher, and with such factors prevailing price is not being considered. Indeed, the situation has got around to the point where numerous commodities are marked by what are usually designated runaway conditions, with goods virtually selling themselves, as it were, and with some manufacturers evincing a disposition to jack up prices to stay insistent demands. Indeed, the more prudent are questioning whether prices on many commodities have not gone high enough, and whether there has not been more or less over-buying. Obviously, fears of a shortage of goods have caused some consumers to order more goods for future delivery than they normally use over a period unmarked by extraordinary conditions, and when these high-priced goods are made up into manufactured articles the real test will come. At this time it is a rather far cry to next fall, but when that season arrives it will be interesting to make observations as to the effects not only of high prices but of present feverish buying for delivery in the season named, the ordinary inference being that contracting for subsequent periods will experience some reaction. Of course prosperity may continue, and the land, already fat, may wax still fatter, and in that event inferences, however plausible, are likely to fall to the ground. Just now high prices merely aid and abet buying.

The rise in the cost of food has been much more pronounced in some countries than in others. The least rise in food prices appeared in the United States, a country which produces nearly all its food supplies, having great diversity of climate and yet comprising a territory almost undivided geographically, with complete means of communication by land and sea; moreover, it normally exports large supplies of foods and had bumper crops both in 1914 and 1915. In Japan, however, prices were not upward but rather the reverse, having reached high levels in 1912 and 1913, from which recessions occurred in 1914 and 1915. The greatest increase in prices has been in Austria and in Germany, so far as records are available. With imports by sea and from Russia shut off and with large parts of their populations in the army and producing munitions, supplies of food were short and prices more than doubled though maximum rates were established in many lines and consumption was restricted as well by a government system of rationing. In the United Kingdom foods were estimated to be 65 per cent higher in July, 1916, than before the war, as shown in the Board of Trade Labour Gazette. The following figures as to the rise in the cost of living since July, 1914, were given to the House of Commons by the British Government on August 8, showing the advance in each group by percentages:

	Food	Rent	Clothing	Fuel and light.	Miscellaneous	All.
1915						
July....	35	nil	25	20	10	25
Sept....	37	2	30	25	10	30
Dec.....	46	2	35	30	15	35
1916						
March..	51	nil	50	30	15	40
June....	62	nil	55	40	30	40-50

In Italy seven foods averaged nearly 34 per cent higher in May, 1916, than in July, 1914. In Holland, Denmark, Norway and Sweden, rises of from 40 to 80 per cent occurred. Statistics of

price advances in materials in these countries are not available, but in the United Kingdom, France, the United States, New Zealand, Australia and Canada statistics showed that most lines were considerably higher in price. In Canada, in retail prices the cost of some 30 staple foods rose from \$7.42 for July, 1914, to \$7.98 for July, 1915, \$8.46 for July, 1916, and \$8.63 for August, 1916. In wholesale prices the general index number rose from 134.6 in July, 1914, to 150.2 in July, 1915, 178.8 in July, 1916, and 178.5 in August, 1916, but had reached 180.9 in May, 1916. Great advances in metals and chemicals as well as in wool, jute, flax products, hides and leathers accounted to a great extent for the rise but the food groups were also up considerably.

In Canada the rise in food prices has been offset to some extent by declines in rent in the western provinces and in some cities in Ontario and Quebec. In the Maritime Provinces, however, rents have been very steady. Fuel and light also declined somewhat, but anthracite coal rose considerably in the spring and summer of 1916. In the prices for clothing and other household goods prices in many lines were not up as much as might be expected from the high prices of raw material as manufacturers and dealers had in many instances stocks on hand sufficient for some time before the new goods at high prices were marketed.

As pointed out in the *Statist*, farther on in the discussion of the prices situation partly quoted above, prices were tending downward before the war.

"But for the war many people would in the past two years have migrated from the cities and towns to the land and would thus have increased the world's supplies of food and of raw materials; but owing to the war the natural course of events has been interfered with, and instead of the great increase in the agricultural population and production of the world which should have taken place there has been an influx of population into the towns for the production of munitions and manufactured goods, while large numbers of men have been withdrawn from agriculture in order to take part in the war. Thus the inability of the world to make its normal preparations for increasing the world's supply of food and raw materials during the war will probably cause prices of those commodities to be maintained at a relatively high level after the peace is declared."

Though the recession in many prices in the early summer of 1916 was important as showing the new tendency in the market for metals, chemicals, some other materials and some foods, there are indications of upward movements in many important commodities. In reporting on the prices situation at the end of July as shown by its continuation of the Sauerbeck index number, the *Statist*, London, Aug. 12, 1916, said:

"It is too early in the month to forecast what the index number for August will be, but it is evident from the trend of prices since the end of July that a marked rise in the number may be recorded for this month."

Prospective prices, crop conditions and meat supplies were commented on in *The Economic World*, New York, Aug. 26, 1916, as follows:

The fact must be faced that there is real cause for apprehension lest the cost of the chief articles of food will be higher during the coming twelvemonth than the country's population has known since the period of inflated prices succeeding the Civil War. Two apparently irresistible causes are clearly operating to bring this undesirable condition of things about. The first, and lesser, cause is an undeniable tendency towards the inflation of the values of commodities, though not of course the vicious inflation, due to fiat money, which was a consequence of the Civil War. Our present inflation is in its nature a credit, rather than a currency inflation, and has been gradually coming about through the immense increase of our stock of gold—and hence of our potential banking reserves—by reason of the vast imports of gold for the account of the belligerent countries of Europe.

The second and immediately effective cause of the rise in the price of articles of food in the United States is the conjunction of relatively short crops in this country with an international food situation which is severely strained, to say the least. Not a single one of the major grain-producing countries of the world seems to have had favourable crop conditions during the past twelve months, or to be in a position to contribute its usual quota to the requirements of the major food-importing countries. Russia is perhaps an exception, but the virtual isolation of Russia by the war makes it of no practical consequence to the rest of the world what her crops have been. And with one or two exceptions the important food-importing countries require more this year than they normally do; for their own crops have been decidedly below par. Italy alone among the wheat-importing countries has a normal crop, while the British wheat crop is disappointingly small, and that of France is hardly better than a disaster.

And what is true of the international supplies of grain is equally true of the international supplies of meat and meat products. The great meat-exporting countries, aside from the United States, i.e., Australia and the Argentine, with the adjacent smaller South American countries, have been going through the severest reverses in their cattle and sheep production. Australia has lost no less than 12,000,000 sheep through drought in the past year; and

droughty conditions in South America have made fearful inroads upon the Argentine, Paraguayan and Uruguayan herds.

The whole consuming world, then, apart from Germany and Austria-Hungary which are fenced in, will almost certainly be scrambling for food from now until another summer. And we may be sure that so long as there are supplies in the United States that can be bought, irrespective of our domestic needs, hands will be reached out for them from all directions, without much regard to price. The fact that our Department of Agriculture's prognostication of our season's wheat crop puts it at barely enough to supply our normal domestic consumption and seed requirements—the wheat crop expert, Mr. Snow, put it at 14,000,000 bushels less than these requirements—will not prevent European buyers from exporting our wheat as rapidly as they can. Only an embargo, which our international commercial position puts out

of the question, could stop this. And in varying degrees this will also be true of our meat products, our dairy products, our poultry and eggs, our fruits and vegetables.

The only possible result will be a severe enhancement of prices for all articles of food. The recent violent advances in the price of wheat are familiar to everybody, because of the notoriety given them in the public press. But other grains are almost equally affected; and the end is not yet. On Wednesday of this week, hogs sold in Chicago at the highest price on record, 11.30 cents per pound, live weight. It is greatly to be feared that the price of wheat and the price of hogs are only forerunners of similar price advances throughout the list of articles of food. It goes without saying that careful men of affairs must take into consideration the possible effects of these phenomena upon the country's industrial and commercial prosperity.

FAIR WAGES CONTRACTS, AUGUST, 1916

DURING August the Department of Labour received for insertion in the *Labour Gazette* information relative to four fair wage contracts, two of which were awarded by the Department of Railways and Canals and contained fair wage schedules and two containing fair wage clauses awarded by the Department of Public Works. The fair wage clauses provides for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the Regulations for the Suppression of the Sweating System.

Fair Wages Schedules

DEPARTMENT OF RAILWAYS AND CANALS.

Contracts awarded by the Department of Railways and Canals and which received the signatures of both parties to them during the month of August, 1916, together with the minimum rate of wages to be paid to the labourers engaged upon the work as set out in the fair wages schedule inserted in the contract.

Erection of station, water tank, engine house, transfer platform, standpipe pit, ashpit and turntable foundations for the Carleton Point car ferry terminal, P.E.I. Name of contractors, Daniel R. Morrison and Robert H. Morrison, of Summerside, P.E.I. Date of contract, August 1, 1916. Amount, schedule rates.

Trade or class of labour.	Minimum rate per day of 10 hours.
Foreman carpenters.....	\$3.00
Foreman for labourers.....	2.00
Foreman for concrete mixing..	2.00
Labourers.....	1.50
Bricklayers.....	2.50
Carpenters.....	2.50
Plumbers.....	3.00
Steamfitters.....	3.00
Blacksmiths.....	2.50
Blacksmiths' helpers.....	1.80
Painters.....	2.25
Hoistmen.....	2.50
Derrick engineers.....	2.50
Watchman.....	1.50
Timekeeper.....	2.00
Driver, 1 horse and cart.....	2.50
Driver, 2 horses and wagon ..	4.00

Repairs to the southerly end of the elevator mooring dock at Port Colborne, on the Welland Canal. Name of contractor, K. A. Morrison, Ottawa, Ont. Date of contract, August 22, 1916. Amount, schedule rates.

Trade or class of labour.	Rate of wages. Not less than
Dredge engineer.....	\$140.00 per month 12 hours
Dredge craneman.....	115.00 " 12 " per day
Dredge fireman.....	65.00 " 12 "
Tug captain.....	100.00 " 12 "
Tug engineer.....	90.00 " 12 "
Tug fireman.....	40.00 " 12 hours
Tug deckhand.....	40.00 " 12 " per day & board
Stationary engineer.....	.35 per hour, 10 hours
Stationary firemen.....	.25 " 10 " per day
Blacksmiths.....	.30 " 10 "
Steam drillers.....	.22½ " 10 "
Carpenters.....	.40 " 9 "
Labourers.....	(Time and one-half for overtime and double time for Sundays and holidays.) 22½ per hour, 10 hours per day

Fair Wages Clauses

This contract is made subject to the regulations made by Order in Council dated the third day of March, 1906, under and by virtue of the Public Works (Health Act), 1899.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time

payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

The contracts containing the above clauses follow:

DEPARTMENT OF PUBLIC WORKS.

Alterations and additions to post office fittings, Renfrew, Ont. Name of contractor, Jos. Bourque, Hull, Que. Date of contract, August 1, 1916. Amount, \$1,125.

Post office fittings in public building, Cornwall, Ont. Name of contractor, The Berlin Interior Hardwood Company, Limited, Berlin, Ont. Date of contract, August 25, 1916. Amount, \$1,687.

POST OFFICE DEPARTMENT.

During the month of July, payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 422.82
Making and repairing rubber dating stamps and type; also other stamps.....	56.72
Supplying stamping material and repairing stamping pads.....	854.50
Supplying mail bags.....	5,048.72
Repairing mail bags.....	3,111.07
Supplying mail bag fittings.....	827.50
Repairing and supplying railway mail clerks' tin travelling boxes and steel portable letter boxes.....	232.35
Making and supplying parcel receptacles.....	265.50
Repairing miscellaneous articles of postal stores.....	32.50
Making and supplying articles of official uniform.....	6,339.42

RECENT INDUSTRIAL AGREEMENTS

Winnipeg Builders' Exchange and Carpenters

AN agreement was made between the Winnipeg Builders' Exchange and the members of the Winnipeg District Council of Carpenters, to be effective from August 14, 1916, to August 14, 1918. The agreement provided for a day of nine hours and a minimum rate of wages of 50 cents per hour, but a carpenter's helper may be employed at a maximum rate of 35 cents per hour, ten hours per day. There shall be no class of workman using carpenters' tools paid a wage between 35 and 50 cents per hour. Members of the Brotherhood of Carpenters shall have preference of employment, and their authorized agent shall be allowed on jobs once a week during working hours for the purpose of furthering the interests of the organization, if permission is obtained from the superintendent of the work. The usual provisions are made for payment of time and one-half for overtime, and for the observance of the usual holidays.

Canadian Government Railways and Maintenance-of-Way Employees

A new schedule and set of rules governing maintenance-of-way employees on Canadian Government railways became effective on June 1. The schedule provides for the following rates of pay per day:

	East.	West.
Yard foremen.....	\$3.00	\$3.75
Section foremen.....	2.60	3.25
Section men.....	2.00	2.20
Extra gang foremen.....	3.50	3.50
	to	to
	3.75	4.15
Bridge and building foremen.....	3.35	4.20
	to	to
	3.70	4.35

All other classes receive an increase of 20 cents per day, except monthly rated men, who receive an advance of \$5.00 per month.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST, 1916

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Department of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the Inspector of Factories of Ontario, Ontario Railway and Municipal Board, the Bureau of Labour of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

ACCORDING to the industrial accident record of the Department 78 work-people were killed and 389 seriously in-

jured in the course of their respective employments during August. The record for July was 74 killed and 415 injured, and the record for August, 1915, was 77 killed and 243 injured. Thus it may be noted that there were four more industrial fatalities in August than in July and one more than in August a year ago, while a comparison of the non-fatal accident record shows that there were

26 fewer accidents in August than in July and 146 more than in August, 1915. Two industrial catastrophes occurred during August, entailing in one case the death of 12 coal miners and in the other 10 employees of a powder manufacturing establishment were fatally burned, while 11 other employees were severely burned. On the night of August 8 a terrific explosion occurred in No. 3 mine of the Crow's Nest Pass Coal Company at Michel, B.C., resulting in the death of 12 coal miners. The cause of the explosion has not been ascertained. As the result of a fire originating in the powder blending house of the Aetna Chemical Company's powder factory at Drummondville, Que., on Sunday morning, August 20, 10 employees were fatally and 11 others seriously burned. The cause of the fire was stated to have been due to a spark of static electricity from a conveyor belt igniting the powder in one of the bins.

The following is a record of the accidents of the month by industries and groups of trades :

STATEMENT OF ACCIDENTS DURING THE MONTH OF AUGUST, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry	Killed	Injured	Total
Agriculture.....	5	16	21
Fishing and Hunting.....	1	1
Lumbering.....	4	5	9

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING AUGUST, 1916.

Trade or Industry.	Locality.	Date	Number.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Erin, Ont.....	Aug. 9	1	Kicked by a horse.
".....	Kimmount, Ont.....	" 9	1	Kicked by a horse.
".....	Peterborough, Ont.....	" 1	1	Fell from hay mow.
".....	St. Clet, Que.....	" 16	1	Gored by an ox.
".....	Maplebush, Sask.....	" 19	1	Falling binder.
<i>Fishing and hunting—</i>				
Fisherman.....	Cherry Hill, N. S.....	" 8	1	Struck by lightning.
<i>Lumbering—</i>				
Sawmill employee.....	Port Moody, B. C.....	" 15	1	Struck by a falling plank.
Sawmill employee.....	Cutler, Ont.....	" 10	1	By a fall.
Feller.....	Surf Inlet, B. C.....	" —	1	Struck by a falling tree.
Logging foreman.....	Summit Lake, B. C.....	" 31	1	Struck by a log.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING AUGUST, 1916.—*Concluded.*

Trade or Industry.	Locality.	Date	Number.	Cause of Fatality.
<i>Mines, metalliferous works and quarries—</i>				
Asbestos Miner.....	Thetford Mines, Que.....	Aug. 24	1	Struck by falling rock.
Miner.....	Coalhurst, Alta.....	" 11	1	Tangled in haulage rope.
Miners.....	Michel, B. C.....	" 8	12	Explosion in a mine.
Miner.....	Comox, B. C.....	" 3	1	Fall of rock.
<i>Railway and canal construction—</i>				
Canal Laborer (Welland Canal)	St. Catharines, Ont.....	" 3	1	Drowned.
<i>Building trades—</i>				
Carpenter.....	Walkerville, Ont.....	" 1	1	Fall—scaffold collapsed.
Roofers.....	Dundas, Ont.....	" 31	1	Electrocuted.
Plumber.....	Quebec, Que.....	" 10	1	Fell into elevator shaft.
Painter.....	Trail, B. C.....	" 14	1	Struck by travelling crane.
Stationary engineer.....	Hamilton, Ont.....	" 22	1	Struck by falling beam.
Electrician.....	Quebec, Que.....	" 29	1	Electrocuted.
Builders' laborer.....	Toronto, Ont.....	" 7	1	Fall.
<i>Metal, engineering and shipbuilding trades—</i>				
Machinist.....	London, Ont.....	" 9	1	Struck by flying piece of emery wheel.
Machinist.....	Weston, Man.....	" 1	1	Mangled by machinery.
Power house employee.....	Niagara Falls, Ont.....	" 17	1	Electrocuted.
Tinware factory employee.....	Hamilton, Ont.....	" 4	1	Crushed by an elevator.
Power house employee.....	Niagara Falls, Ont.....	" 17	1	Electrocuted.
Metal worker.....	Welland, Ont.....	" 31	1	Mangled by machinery.
<i>Steam railway service—</i>				
Engineer.....	St. Therèse, Que.....	" 16	1	Crushed by falling ballast in ballast pit.
Fireman.....	Chatham, Ont.....	" 8	1	Run over by locomotive.
Brakeman.....	Belleville, Ont.....	" 2	1	Struck by a train.
Brakeman.....	Longue Point, Que.....	" 4	1	Run over by a train.
Yardman.....	Swift Current, Sask.....	" 17	1	Crushed between cars.
Machinist.....	Montreal, Que.....	" 10	1	Struck by a leverage bar.
Employee.....	Moncton, N. B.....	" 24	1	Run over by locomotive.
Employee.....	Applehill, Ont.....	" 31	1	Rear-end collision.
Employee.....	Federal, Alta.....	" 6	1	Crushed under overturned locomotive.
Employee.....	Trenton, Ont.....	" 8	1	Run over by a train.
Employee.....	Vancouver, B. C.....	" 10	1	Struck by a train.
Signalman.....	Westfield, N. S.....	" 19	1	Struck by derailed track velocipede.
Laborer.....	St. Therèse, Que.....	" 16	1	Crushed by falling ballast in ballast pit.
<i>Electric railway service—</i>				
Car repairer.....	Victoria, B. C.....	" 25	1	Struck by falling armature.
<i>Navigation—</i>				
Deckhand.....	Montreal, Que.....	" 3	1	Fell into hold of vessel.
Deckhand.....	Montreal, Que.....	" 3	1	Scalded by steam.
Deckhand.....	Newcastle, B. C.....	" 18	1	Drowned—fell from vessel.
<i>Miscellaneous transport—</i>				
Carter.....	Nelson, B. C.....	" 9	1	Thrown from wagon.
Teamster.....	Montreal, Que.....	" 22	1	Thrown from wagon.
Teamster.....	Toronto, Ont.....	" 30	1	Kicked by a horse.
Teamster.....	Hamilton, Ont.....	" 25	1	Wagon struck by an electric car.
<i>Miscellaneous skilled trades—</i>				
Papermill employee.....	Merritton, Ont.....	" 16	1	Struck by falling tackle.
Pulp and paper mill employee.....	Hawkesbury, Ont.....	" 1	1	Mangled by machinery.
Well repairer.....	Otterville, Ont.....	" 15	1	Overcome by well-gas and fell to bottom of well.
Powder factory employees.....	Drummondville, Que.....	" 20	10	Died from burns received when powder in blending house of powder factory took fire.
Cement Works employee.....	Longue Pointe, Que.....	" 12	1	Struck by machinery.
Furnishing house employee.....	Montreal, Que.....	" 12	1	Fell down elevator shaft.
<i>Unskilled labour—</i>				
Laborer.....	Cedar Rapids, Que.....	" 8	1	Run over by locomotive.
Laborer.....	St. Catharines, Ont.....	" 1	1	Struck by iron bar with which he was opening a car door
Laborer.....	Ottawa, Ont.....	" 30	1	Struck by falling sand bucket.

TABLE OF NON-FATAL ACCIDENTS DURING AUGUST, 1916.

GOVERNMENT CONTROL OF MUNITION-MAKING ESTABLISHMENTS IN THE UNITED KINGDOM.

THE Ministry of Munitions of the United Kingdom has prepared a Handbook mainly for the purpose of providing firms whose establishments have already been declared "Controlled" under the Munitions of War Act, 1915, with a convenient reference to the provisions of the Acts and the various rules, orders and instructions which have been issued in connection therewith. It is also thought that the volume will be of service to owners of non-controlled establishments who contemplate making application for their establishments to be declared controlled. The Handbook indicates in detail the procedure of the Ministry of Munitions in respect to controlled establishments and also shows the effects of an order of control on persons employed in the establishment and on the owners. The Minister of Munitions may declare controlled any establishment in which munitions work is carried on and which, in the view of the Minister, should be declared controlled for the purpose of the successful prosecution of the war. The main purpose and object of control is the increase of the output of munitions of war and it has been found that control has an excellent effect in rendering the labour conditions in the establishment more settled; the limitation of the profits of controlled establishments helps to remove the apprehension of workmen that increased exertion on their part may have the effect of giving the employer an excessive profit.

By an order of control the Government does not, as is sometimes supposed, take over the establishment or the management thereof nor does the Government take any responsibility for the financial position of the establishment or its owner. The order does not entail any change in the ownership or general direction of the establishment and the owner or manager does not become in any sense an agent of the Government.

His legal rights and liabilities remain unchanged except in the matters with which the Act specifically deals. While the Ministry endeavours to control as far as practicable all firms of a similar class in any particular industry it has not been the practice to control very small establishments, although exceptions are made in special circumstances as for example where the product of a particular establishment is of peculiar importance. The number of controlled establishments as at June 3, 1916, was 3,591.

An order of control places certain obligations both on the owner of the establishment and on the workmen employed in it. Employees must under penalty suspend any rule or practice not having the force of law which tends to restrict production. The Act, however, declares that departure from any such practice shall only be for the period of the war and that no change in practice made during the war shall prejudice the position of the workmen or their trade unions in regard to the resumption of any such rules after the war. An appeal may be made to the Board of Trade on the question as to whether any suspended rule tends to restrict production and the decision of the Board of Trade upon the issue or of any arbitration tribunal to which it may be referred by the Board of Trade is conclusive. The workmen under penalty must comply with rules relating to order, time-keeping, discipline and efficiency which the owner of a controlled establishment is required to post conspicuously in his establishment. The Minister, however, will consider applications for any variation from the approved rules which the owner of a controlled establishment may think essential in view of special conditions which obtain in his works. For the use of firms employing Belgian workmen copies of the rules have been printed in French and Flemish. The Act pro-

vides that due notice shall be given to the workmen concerned wherever practicable of any changes of working conditions which it is desired to introduce as the result of the establishment becoming controlled and that opportunity for local consultation with workmen or their representatives shall be given if desired.

The intention of the Act is that all profits above a reasonable limit in a controlled establishment shall go to the State. In fixing this limit the Act provides that the average profits of two completed years of the establishment before the war are to be taken as a "Standard Period" and the average annual amount of profits of the "Standard Period" forms the "Standard Amount of Profits of the Controlled Establishment." In cases where it appears that this period does not afford a fair standard of comparison, the Minister may fix what appears to him to be a fair standard by agreement with the owner or in default of such agreement by a referee or board of referees appointed by the Minister. The State, of course, does not guarantee that any profits will be made and if the profits fall short of the "Standard Amount" they will not be made up by the State. If, however, profits are made beyond the "Standard Amount" the owner will be allowed to keep, in addition to the "Standard Amount" a sum equal to one-fifth of that amount (not one-fifth of the extra profit). As the main purpose of the Act is to increase the output of munitions rather than to limit profits, allowances are to be made in respect of any increase of capital employed or of any increase in the volume of output, the same to be added to the Standard Amount of profits either in lieu of or, at the discretion of the Minister, in addition to the one-fifth above-mentioned. Adjustments may also be made in respect of exceptional wear and tear of plant, buildings and machinery and other similar matters. The excess of the net profits of the controlled establishment over the amount divisible under the Act is to be paid into the Exchequer.

The Ministry has also devised a procedure designed to regulate the productive capacity of the country on munitions work so that such work shall have the proper order of priority in accordance with its importance. Three broad classifications have been adopted. Class A includes work or material wholly required for a Government war contract, certified war work or merchant shipping work certified by the Board of Trade to be munitions work. Class B includes work or materials wholly required for repairs to industrial machinery essential to continuity of operations, for machinery necessary for the transport of general freight, or for other similar needs which are specified. Class C includes all work not included in Classes A or B.

As to wages in controlled establishments it is contemplated that negotiations on wages questions shall proceed in the ordinary way between the parties themselves. If they cannot agree the resulting proposals are to be submitted for the consideration of the Minister who may give or withhold his consent or, if the negotiations result in deadlock, the matter may be referred to an arbitration tribunal by the Board of Trade and the award of the tribunal is binding on both parties. No advance in wages to classes of employees can be given without reference to the Minister except in certain cases such as changes for giving effect to Government conditions as to fair wages or to wage agreements made before June 23, 1915. Advances to individual employees, however, may be given without reference to the Minister. The Minister has issued a communication to the press stating that he is prepared to exercise his powers if necessary in order to prevent the reduction of piece rates as a consequence of the increase of output due to the suspension of restrictions.

As to Sunday labour and overtime it is stated that it is necessary both in the interests of the workers and production that a weekly rest period, preferably Sunday, should be secured to all employees. The Ministry considers that

not more than 12 shifts per fortnight or 24 hours where double shifts are worked should be arranged and that where three eight-hour shifts are worked not less than two shifts should, wherever possible, be omitted on the Sunday. It is pointed out that where overtime is worked in the week Sunday labour is held to be undesirable and that it is preferable to work a moderate amount of overtime in the week rather than to work continuously from day to day. In the case of firms engaged upon processes requiring continuous labour it is suggested that all workers should, even if on different days, have a regular period of rest and that where it is necessary to work continuously throughout the week, the aim should be to work three eight-hour shifts rather than two twelve-hour shifts and by employing the necessary extra number of workers to provide that each individual worker shall obtain a day off every week. In the case of women and young persons a day off each week ought always to be provided.

It is also considered important that controlled establishments should facilitate arrangements for the adequate provision of food and refreshment to the workers in their employ and in the event of an industrial canteen being provided by the owner the Minister, in arriving at the profits of the establishment, will be prepared to give full consideration to capital expenditure incurred by the owner in providing the canteen.

As to the employment of women, owners of controlled establishments are instructed to press forward with dilution of labour as extensively as possible and without delay. The dilution of labour implies that the employment of skilled men should be confined to work which cannot be efficiently performed by less skilled labour or by women; that women should be employed as far as practicable on all classes of work for which they are suitable and that semi-skilled and unskilled men should be employed on any work which does not necessitate the employment of skilled men and for

which women are unsuitable. The managements of controlled establishments are advised to communicate through the labour exchange with the chief labour officers of their districts on the changes in workshop practices which may be involved by adopting a policy of dilution. The full support of the Minister in carrying out this policy is assured to the firms. An illustrated publication has been issued to controlled establishments by the Minister showing some of the processes upon which women can be employed in connection with the manufacture of munitions of war. Directions have been given by orders of the Minister as to the employment and remuneration of women and of semi-skilled and unskilled men on munition work of a class which prior to the war (a) was not recognized as women's work in districts in which such work was customarily carried on, or (b) was customarily undertaken by skilled labour. Women of 18 years of age and over employed on time, on work customarily done by men, are rated at £1 per week, reckoned on the usual working hours of the district in question for men in engineering establishments. In the case of women employed on work customarily done by fully-skilled tradesmen, they are to be paid the time rates of the tradesmen whose work they undertake. Overtime and night-shift and Sunday and holiday allowances payable to men shall also be made to women. When women are employed on piece work they are to be paid the same piece-work rates as are customarily paid to men for the job. In case women are prevented from working owing to break-down, air raid or other causes beyond their control they shall be paid for the time so lost at the rate of 15s. a week unless they are sent home.

The Handbook also gives the regulations with regard to armed guards for factories as well as those with respect to the employment of war munitions volunteers and of discharged soldiers. The procedure for the release of men from the colours for munitions work is also outlined.

REVIEWS

Ontario.—Sixteenth Report of the Bureau of the Province of Ontario for the year ending December 31, 1915. Toronto, 1916; pp. 267.

The Bureau announces that during the year the Honourable Findlay G. Macdiarmid, the new Minister of Public Works and Labour of the province, has placed "the long requested fair wage clause" in all contracts under his jurisdiction. The Bureau operates employment offices in Berlin, Brantford, Hamilton, London, Ottawa and Walkerville, and another was opened in St. Thomas in May, 1915. Owing to the number of enlistments and the fact that the Hamilton branch was inactive for three months there were fewer persons placed in employment in 1915 than in the previous year. The following is a summary of the work for the year:

	Male.	Female.
Applications for work	2,147	2,148
Help wanted	1,647	202
Situations filled	1,121	69

Municipalities of the province reported 21,318 new buildings erected in 1914 at a cost of 53,316,942 as compared with 26,253 buildings, costing 68,824,692 in the previous year. There was also a similar decrease in the expenditure on permanent improvements. Municipalities to the number of 250 reported public utilities owned and operated valued at \$63,185,019, being an increase of \$9,-473,845. Returns from 546 local unions gave a membership of 49,398. Returns from 856 manufacturing establishments indicated the number of employees in the year 1914 as 60,874 and the aggregate number of days in operation as 226,446 as compared with 234,504 in the previous year. The amount of wages paid

in 1914 was \$32,497,244 as compared with \$34,681,997 in 1913. The average wage rate for the year was 533.85, and per day \$2.02, as compared with \$530.01 and \$1.92 in the previous year. The report also contains a statement dealing with co-operative societies in Canada, a chronology of Ontario labour laws, and a section on Dominion legislation affecting labour; a section on recent legal decisions affecting labour in Ontario is reprinted from the *Labour Gazette*. In view of the advocacy of land settlement as a partial solution of the unemployment problem, the report prints as an appendix a description given by the Provincial Agricultural Department of some of the opportunities available in Northern Ontario for taking up land.

United States.—Proceedings of the American Association of Public Employment Offices. Bulletin of the United States Bureau of Labour Statistics. Whole Number 192. May, 1916; 177 pp.

This bulletin publishes the proceedings of the American Association of Public Employment Offices at the first three annual meetings held at Chicago, December 19 and 20, 1913, at Indianapolis, September 24 and 25, 1914, and at Detroit, July 1 and 2, 1915. At the first meeting W. M.

Leiserson, Superintendent of the State of Wisconsin employment offices, and now of Toledo University, gave a paper on public employment offices in the United States in which he outlined their development and present condition. He stated there was little uniformity and practically no co-operation among the various offices even within a State. Massachusetts and Illinois, which had the largest appropriations, were doing

the most effective work. The late Professor Charles R. Henderson of the University of Chicago outlined the labour exchange system in Germany, France, Austria, Belgium, Denmark, Italy, Switzerland and Great Britain. The information given was based on the Bulletin trimestriel de l'Association internationale pour la lutte contre le chômage, July-September, 1913. The distribution of alien and citizen labour was treated by the late Walter L. Sears, Superintendent of the Free Employment Office at Boston, and afterwards Superintendent of the New York City Public Employment Bureau. Mr. Sears set forth a plan designed to "get the people away from centers where there is greatest unemployment to places where there is genuine scarcity of labour." Other papers given at this meeting were: the women's department of a free employment office, by Mrs. W. L. Essman, and the handling of immigrant workers, by H. J. Beckerle, Superintendent of the Free Employment Office, Milwaukee. There was also discussion on various phases of the work of public employment offices.

The second annual meeting was opened by Dr. Royal Meeker, United States Commissioner of Labour Statistics, who stated that in view of all the difficulties they have had to overcome, the public employment offices of the United States had accomplished great things. They had forced a reluctant and unbelieving public to recognize partially, at least, the fact of unemployment and the principle of public responsibility for the existence of unemployment and for the furnishing of work to all the workless. He urged the importance of statistics in the work of bringing employee and employer into profitable contact. "You can no more successfully conduct your

employment offices without statistics than a farmer can farm without a plow." W. F. Houk, Commissioner of Labour, Minnesota, spoke on the wrong way to conduct a system of employment offices in which he emphasized the fact that public employment offices must be free from control by political, labour or other organizations. L. D. M'Coy, Secretary of the Bureau of Labour Statistics, Illinois, advocated a Government labour exchange, with a central office located in Chicago, from which might radiate branch offices and clearing houses, covering the entire field of labour. Policies and methods of employment agencies maintained by employers' associations was the subject treated by Andrew J. Allen, Secretary of the Associated Employers of Indianapolis and the Indianapolis Branch of the National Metal Trades Association, while Charles B. Barnes, Director of the New York State Bureau of Employment, gave a report on the condition and management of public employment offices in the United States, together with some account of the private employment agencies of the country. He stated that existing public employment offices were largely failures, their statistics were poor, they catered to inefficient workers, they were badly housed, and they had not lessened the abuse of private agencies. They did not exchange information with one another even when closely located and they failed to bring themselves to public attention. Their superintendents were inactive and they had failed to arouse the slightest public interest in their work. In the way of improvement Mr. Barnes suggested the appointment of all employees by civil service, impartiality as between employers and applicants, the appointment of

advisory committees, the establishment of a uniform system of reporting, and the appointment of capable superintendents free from the influence of labour organizations and of employers. Other papers given at this meeting were the regulation and control of private employment agencies by Prof. M. B. Hammond, of the Industrial Commission of Ohio, the distribution of labour and the problem of transportation by the late Walter L. Sears, a plan for gathering and distributing harvest hands in the grain States by W. G. Ashton, Commissioner of Labour, Oklahoma, and a women's employment office by Agnes L. Atwood, Assistant Superintendent of the Duluth Free Employment Bureau.

At the third meeting, Mr. Barnes dealt with some problems in reorganizing the New York State system of employment offices and W. F. Hennessy, Commissioner of Employment, Cleveland, outlined experiences in extending and improving the work of the State-city labour exchange at Cleveland. This office has taken over four private employment agencies, making them part of the exchange and is steadily accomplishing its aim of a centralized labour market. Mr. Beckerle spoke on the developing of a farm-hand business, and Charles M'Caffree, South Dakota, President of the National Farm Labour Exchange, outlined the work of that organization which tries to handle the help necessary for the grain harvest in the Middle Western States. Other papers at this meeting were the placing of women by public employment offices, by Louise C. Odencrantz, Superintendent of the Women's Department of the New York State Employment Department of Brooklyn; the immigrant worker and the public employment bureau, by Anne

Erickson, of the Immigrant Protective League of Chicago; the immigrant and the industrial world, by W. F. Hennessy, and Vocational Guidance and public employment offices, by Hilda Muhlhauser, of the Girls' and Women's Bureau, Cleveland. The association's committee on standards submitted a report on a system of records, registration and filing, and there are four appendices which gave the resolutions adopted at each meeting, a list of the Federal, State and municipal employment bureaus in the United States, statements on public employment offices in Great Britain and Germany, and on the present status of unemployment insurance on the basis of official sources and of reports prepared for the general convention at Ghent of the International Association on Unemployment.

New Zealand.—Twenty-fifth Annual Report of the Department of Labour. Wellington, 1916; pp. 21.

The report covers the financial year April 1, 1915, to March 31, 1916. There were fewer applicants for work in this year than during any other of the Department's history and the Department's employment bureaus were able in most cases to offer employment, both Government

**Employment
Offices, Acci-
dents, Trade
Disputes and
Workers'
Dwellings in
New Zealand**

and private, to all classes of workmen. An unusual feature was the extensive employment of girls in the places of men in various avocations, notably in banks. The facilities of the Department's employment bureaus were placed at the disposal of the Discharged Soldiers' Information Department and a number of returned men were assisted to employment. During the year 2,549

persons were sent to private employment and 3,429 to Government works. Of the amount of £384 repayable by workers for fares advanced, 96.5 per cent had been repaid. During the previous eight years there has been a decrease year by year in the number of boys and girls that have sought employment in factories. For the year 1915-16, however, there has been an increase of 275, viz., from 2,088 to 2,363, comprising 1,100 boys and 1,263 girls. This increase is due to the fact that employers generally, but chiefly in the clothing trades, have had their staffs greatly depleted by enlistments. The total number of accidents in factories in 1915-16 was 1,065, of which three were fatal, as compared with 967, of which three were fatal, in the previous year. Of the 177 disputes dealt with by the Commissioners and Councils of Conciliation, 134 or 75 per cent were settled or substantially settled. One strike of some magnitude, besides a few of a minor nature, took place during the year. Unions of employers showed a decrease of eight, with a membership decrease of 101, as compared with last year, while the number of workers' unions decreased by 14 and the total membership by 6,330. Reports of Proceedings under the Shearers' and Agricultural Labourers' Accommodation Act, the Scaffolding Inspection Act, the Workers' Compensation Act, and the

Footwear Regulation Act are also given. The amount of arrears of wages recovered for workers under various Acts during the year amounted to slightly over £1,688. With regard to the cost of living it is stated that an interesting experiment designed to lower the price of bread had been reported from one locality where the master bakers had formed themselves into a company, thereby reducing the number of delivery carts from 22 to 12. The company had divided the district into twelve blocks, and one cart was allocated to each block, thereby doing away with the overlapping that had previously occurred. The net expenditure of the Department during the year was £31,676 9s. 4d.

In Appendix B, dealing with proceedings under the Workers' Dwellings Act, 1910, it is stated that during the year the erection of 100 dwellings was authorized; £3,123 was expended in acquiring land for workers' dwellings, £1,704 in preparing land for workers' dwellings, and £51,065 in erecting dwellings. The total expenditure in connection with workers' dwellings during the year was £58,170. The number of dwellings erected in all settlements under this Act since its enactment was 553, the amount of arrears outstanding as at March 31, 1916, was about £1,251, an average arrearage of £1 10s. 9d. per dwelling.

RECENT LEGAL DECISIONS AFFECTING LABOUR

A member of a Mutual Benefit Society, the holder of a \$1,000 certificate, enlisted on July 28, 1915, and went to the front. Later on he sought to obtain a writ of *mandamus* requiring the Society to accept payment of his dues, which it had refused to receive. The defendant society claimed that according to its

Member of a Mutual Benefit Society enlist- ing against the Rules may be excluded from the Association

Rules and Regulations soldiers on active service are not admissible as members and, under Art. 9 of the same, an active member leaving the profession he was exercising at the time of his admission into the society, in order to exercise one of the professions prohibited by said Rules and Regulations, may be expelled. The Superior Court sustained this view, holding such a rule not contrary to public order, and dismissed the application. (*Quebec — Ainslie v. L'Union St. Pierre.*)

The plaintiff had been hired to work as a cook on board the barge *Pennington* for the 1915 season of navigation, from May 28 to November 28, at the rate of \$50 per month. He was laid off at Montreal on September 5, without any cause, and claimed from the proprietors of the barge the sum of \$125, representing the amount of wages he had lost. The defendant company claimed that the plaintiff had been discharged with the other members of the crew, as the barge ceased navigating on September 5, and that the plaintiff was not entitled to more than one month's wages as an indemnity, and moreover that the Superior Court had no jurisdiction in the matter. Sir F.

Member of a Crew discharged with- out cause is entitled to damages

X. Lemieux, Chief Justice, held that according to the Merchant Marine Act a member of a crew would only be entitled to a full month's wages and an indemnity representing one month's wages if he had worked less than one month and had then been discharged; but in the present case the plaintiff was not suing for his wages, but for damages for loss of time caused by his illegal dismissal, and consequently the Common Law, not the Maritime Law, applied. Judgment was rendered in favour of the plaintiff, the Court, however, reducing the amount of damages to \$100. (*Quebec—Simard v. Canada Steamship Company.*)

A labourer, who had his feet frozen while clearing out a sewer trench, sued the City of Montreal for damages under the Workmen's Compensation Act. Plaintiff was engaged by the city on sewer construction work.

Civic labourer recovers damages for frozen feet

The day was one of the coldest during that winter. In fact it was so cold that the workmen protested to the foreman and asked him to suspend operations. Not only did the foreman refuse to accede to the demand, but, it was alleged, threatened to discharge anyone who objected to continue the work. As a result of continuing the operations plaintiff had his feet so badly frozen that he was afterwards confined to his bed and had five toes of the left foot and one-half his right foot afterwards amputated. Plaintiff then sued the city for \$517 compensation. The city contested the action and pointed out that as the damages that plaintiff might have suffered were not through any accident the action could not stand under the Workmen's Compensation Act. The Court awarded the plaintiff \$117,

representing one-half of the salary he had lost owing to the accident, and also condemned the city to pay to plaintiff an annuity of \$168.75 by quarterly payments for the rest of his life. The whole costs of the action were payable by the city. (*Quebec—Boisseau v. The City of Montreal.*)

The Second Division of the Court of Review at Montreal recently reversed the judgment of the Superior Court which had dismissed the action of a widow of a machine engineer seeking \$15,000 damages for the death of her husband while working on a building. The Judges upheld the widow's action and condemned the defendant company, for whom the deceased worked, to pay to her

**Elevator
accident due
to defect in
signalling
system.
Damages
awarded on
appeal**

\$8,000, being \$3,500 in her own interest, and \$4,500 in the interests of the infant child of the deceased. At the time of the accident the building was near completion. There were two elevators running for the benefit of the workmen on the building and it was on one of these that deceased met his death. The Superior Court sustained the plea of the defendants that the accident was due to the fault of the deceased. The Court of Review held that the accident was due to a defect in the system of signalling and running the elevator, and for this the defendant company were held liable for the fatality to the extent of damages stated above. (*Quebec—Robillard v. Nortross Brothers Company.*)

THE LABOUR GAZETTE

OCTOBER, 1916

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Industrial activity was well maintained during September, the only slackening being in cases where there was a shortage of labour or delay in the delivery of materials.

The demand for harvest and threshing help in the West was fairly well met in some districts, but a serious shortage was reported in others. Trade disputes in September showed a large falling off from those of the previous month. Retail prices continued upward, the cost of a weekly budget of staple foods being \$8.97 as compared with \$8.63 for August. The Department's index number of wholesale prices also showed an increase, standing at 180.7, as compared with 178.5 in August. Summaries of prices, strikes and industrial agreements appear in the General Review. Accounts of the annual conventions of the Dominion Trades and Labour Congress and of the Canadian Federation of Labour are given in special articles, as well as an outline of the recent eight-hour day controversy between the United States railways and their trainmen.

* * *

During September six applications for Boards of Investigation under the Industrial Disputes Investigation Act were received, all affecting either steam or electric railways. The employees of the following companies were concerned: The Fredrickton and Grand Lake Coal and Railway Company and the New Brunswick

Coal and Railway Company, the Edmonton Radial Railway, the Quebec Railway, Light, Heat and Power Company, the Moosejaw Electric Railway, the Canadian Pacific Railway, and the Sandwich, Windsor and Amherstburg Railway. Boards were established in the case of the Quebec Railway, Light, Heat and Power Company and the Moosejaw Electric Railway. In the case of the other applications the question of establishing a Board was either under consideration of the Minister at the end of the month or action was deferred to permit negotiations between the parties. The Board appointed to deal with a dispute between the Algoma Central Railway and the Hudson Bay Railway Company and conductors, baggagemen, trainmen and yardmen sent in an unanimous report during the month, stating that by conferences and negotiations between the parties, assisted by members of the Board, the matters in dispute were compromised and an agreement signed between the parties covering rates of payment and rules of employment.

* * *

Under date of August 1, 1916, the Board of Railway Commissioners issued an order designed to lessen the danger to which locomotive engineers and firemen have been exposed on account of the lack of hand-rails and the small size of the foot rests on the outside of locomotive cabs. The order is also designed to meet the contention that engineers and firemen have

**Railway Commission Orders
Safety Devices
for Locomotives**

been exposed to the danger of slipping off when passing over the tender or when the locomotive was taking coal or water because of the lack of proper railings on the tender. The order directs that the railway companies subject to the jurisdiction of the Commission shall equip all locomotives of 100,000 pounds or over with hand rails on the sides of cabs and, where the running boards do not project beyond the side of the cab, an additional piece is to be added to project not less than one inch from the side of the cab and running the full length of same. The tenders of all such locomotives are to be equipped with a railing on both sides on top of the copping. Detailed specifications of these new attachments are given, and it is ordered that plans showing the proposed foot rests and the railing on tenders shall be filed for the approval of the Board.

* * *

At the meeting of the British Trade Union Congress at Birmingham on September 5 the delegates rejected a recommendation from the Parliamentary Committee of the Congress that they should accept an invitation from the American Federation of Labour to take part in an international labour congress to be held at the same time and in the same place as the conference of the belligerent nations, which will settle the terms of peace. While the delegates thought that labour was entitled to express its views on the terms of settlement, they took the position that they could not meet delegates from Germany and her allies at a congress which was to advise the plenipotentiaries of Great Britain and her allies upon the terms of peace. In addition to the resolution calling for the establishment of a ministry of labour, which was noted in the last issue of the *Labour Gazette*, the Congress passed a resolution authorizing the summoning of a special congress if, after the war, trade union customs and

practices suspended during the war were not re-established, and directing that Ministers who had given pledges on the subject should be invited to attend. The Congress also discussed an elaborate programme drawn up by the parliamentary committee for the reorganization of industry after the war by the nationalization of railways, mines and land. The administration of army pensions and a number of proposals with regard to employment and industrial peace after the war were also considered.

* * *

Two important labour laws were enacted in August by the Government of the United States — the Child Labour bill, for which the National Child Labour Committee has campaigned for some years, and a federal Workmen's Compensation bill, the passing of which has been urged for three years or more by the American Association for Labour Legislation. President Wilson took an active interest in both measures. In February last the House of Representatives passed a child labour bill which prohibited the shipment in Interstate Commerce of the products of any establishment into which the labour of children had entered. The bill which was passed by the Senate, August 8, and which it is understood was drafted by Owen R. Lovejoy, Secretary of the National Child Labour Committee, goes further in that it excludes from Interstate Commerce the products of mills, factories, canneries, workshops, mines and quarries employing children below the standards fixed in the bill, whether the products are made by children or adults. It is expected that a test case will be brought.

The Kern-McGillicuddy Federal Workmen's Compensation bill, which passed the Senate August 19 by a unanimous vote, affords protection to the 480,000 employees of the United States Govern-

**Resolutions at
the British
Trade Union
Congress**

ment. The Act is said to have been drafted according to the most advanced principles of workmen's compensation legislation. It provides compensation during disability at the rate of two-thirds the wage loss as well as medical attendance and death benefits.

* * *

According to the *Bollettino dell'Ufficio del Lavoro*—the journal of the Italian Department of Labour — a Vice-regal decree was issued under date of May 1, 1916, placing certain obligations upon employers in

**Obligations of
Employers to
Mobilized Em-
ployees in Italy**

favour of employees called to the colours.

In the case of persons who have been employed for at least one year by concerns which permanently employ more than two persons the employment contracts of employees called to the colours are to be regarded as being only in suspension until the expiration of military service. The employer is bound to reinstate any such employee if within a month of the date of his discharge from the army he declares his desire to resume his civil employment. In the case of business concerns employing more than three persons the owner is required to grant allowances of one-half of the wages in the case of married men or widowers with young children and of one-third to employees other than these. This, however, applies only to employees who have been in the service of the firm for more than ten years. The allowance to employees whose length of service is from five to ten years is one-third of the wages in the case of married men or widowers with young children and one-quarter for others. All questions as to the application of these and the other provisions of the Decree are to be decided by tribunals on which the employer and employee classes have equal representation. Appeal may be made from decisions of provincial tribunals to a central tribunal.

There has been a marked increase in the number of woman workers employed in factories and workshops in Russia since the outbreak of the war, according to the Journal of the Central Committee for War Industries of Petrograd.

**Increase of
Woman
Workers in
Russia since
the Beginning
of the War**

The engagement of women upon work ordinarily performed by skilled men was at first considered only as an experiment, the first women fitters being employed in the autumn of 1914 by a private firm in Petrograd. Following the success of the experiment other firms and government workshops began to employ women in the places of men at lathes and on drilling, planing, milling and other machines. It is estimated that the total number of women employed in factories and workshops in Petrograd exceeds 50,000 or from four to five times as many as before the war.

Returns obtained by the British Board of Trade indicate that at the end of

**Co-operation
in Agriculture
in the United
Kingdom**

1914 there were at work in the United Kingdom 975 registered co-operative societies engaged in agricultural distribution and production.

Of these societies 895, which were engaged wholly in agricultural operations, had an aggregate membership of 117,044, an increase of 4,898 or 4.4 per cent over that of the previous year. The total share, loan and reserve capital amounted to £1,155,393, an increase of £123,996 or 12 per cent on the amount in 1913. The aggregate sales of these 895 societies amounted to £6,849,945, an increase of £779,685 or 12.8 per cent over those of 1913. The number of persons employed was 3,413 and the amount paid in wages was £178,805, an increase over 1913 of 118 and £16,132 respectively. The sales of all the 975 distributive and productive societies and departments amounted in 1914 to £7,186,388.

In the year 1914 there were also at work 147 co-operative small holdings and allotments societies with a total membership of 16,205 compared with 131 societies and 14,471 members in 1913. Their total capital was £49,665 and they held 15,432 acres of land. A number of these societies have formed trading departments for the purchase of members' requirements and for the sale of their produce.

A statement recently issued by the Victoria Branch of the British Columbia Returned Soldiers' Commission shows the number of returned soldiers reported, the number who have applied for positions and the number receiving employment, to July 31, 1916. The total number of men who have reported at the discharge depots was 418, while 394 men have reported to the various committees. 62 at the Convalescent Hospital, Esquimalt, and six at Tranquille Sanitarium. The total number of applications for employment was 280, and of these 234 were filled, 46 remaining unfilled. The statement gives a list of the

**Employment
for Returned
Soldiers**

results at various cities in the province, the number reported, number of applications for work, and the number for whom employment was found. The greatest number of soldiers reported at Vancouver, where 185 men reported, 121 applied for work and 109 secured employment. At Victoria 126 men reported, 119 applied for work, and 109 were given employment. Kamloops, New Westminster and North Vancouver were the other principal centres affected.

* * *

The Provincial Workmen's Association held its thirty-eighth annual meeting in Halifax during the month. Both the membership and finances showed an increase. The Grand Council again endorsed the war policy of the Federal Government, and approved the action of the executive officers, who during the year invested the funds of the order in war bonds to the amount of \$10,000. Questions affecting increases of wages were discussed, and a resolution was passed asking the Federal Government to investigate the recent increase in prices.

of Provincial
Workmen's
Association**

INDUSTRIAL CONDITIONS DURING SEPTEMBER, 1916

I.—GENERAL REVIEW

The labour market during September continued to show a shortage in many lines of industry, principally in agricultural operations, coal mining, and in some branches of manufacturing. The demand for farm labour in the West was fairly well met in some districts, though in other parts threshing was reported seriously interrupted and delayed through a shortage of labour. The supply of female help was still reported inadequate in a num-

**The Labour
Market**

ber of manufacturing lines. Freight shipments by rail and water kept transport workers busy, but passenger traffic had almost ceased on the lakes. Active operations continued in metal and coal mining, though in the latter industry a shortage of labour continued to curtail outputs. Sawmills in practically all lumbering districts continued to run steadily, but there was some falling off in logging operations in British Columbia owing to over-production earlier in the season and the scarcity and compara-

tively high wages of labour. Fishing continued quiet. According to returns (given in this issue) received from eight city corporations employment on civic works has been decreasing in volume since July as indicated both by the number of employees temporarily employed and the amount of wages paid such employees in the first fortnight of the month. During August there was an increase of 23 per cent in the demand for workers as compared with July, as shown by reports from employment bureaus. The number of vacancies notified to all offices showed a daily average of 2,235.15 as compared with 1,825.61 in July, and the number of persons placed, a daily average of 1,124.26, compared with 762.84 in the preceding month. The proportion of the total vacancies filled to the total vacancies notified was 49.32 per cent, as compared with 41.46 in July. Figures as to vacancies notified for woman and girl workers showed a daily average of 362.84, as compared with 382.73 in July, and the number placed, a daily average of 126.53, compared with 133.14 for the previous month.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Toronto only showed a decrease in the demand for workers. Winnipeg and Vancouver showed the largest gains. Noticeably larger demands were also recorded in Saskatoon, Edmonton and Ottawa. Victoria showed a slight decrease.

There were only 10 strikes in existence during September, as compared with 14 in the previous month, and but three new strikes, compared with seven in August. The chief dis-

pute arising during September affected barbers at Montreal. Some 300 men were concerned, but the strike was settled within a few days after its commencement. The other strikes of the month occurred in the building and metal trades. Of the 10 strikes in existence during the month four were settled, and at the end of the month but six disputes remained unsettled, and these altogether concerned less than 150 employees.

The prices movement was marked by a sharp advance in the index number of wholesale prices to a level nearly as high as in May when the peak

Prices

of the steeply upward movement which set in last autumn was reached. In metals and certain other materials there was a recovery in many lines from the decreases which lowered the index number each month since May, while in grains, dairy products and certain other foods the advances experienced during the summer continued. In wholesale prices the index number for September stood at 180.7 as compared with 178.5 for August, 150.3 for September, 1915, 141.3 in the same month in 1914, and 134.4 in 1913. In May the index number had reached 180.9, but fell gradually until August. In retail prices the weekly family budget of staple foods cost \$8.97 as compared with \$8.63 for the previous month, \$7.74 for September, 1915, and \$7.83 for September, 1914. The principal increases appeared in potatoes, eggs, butter, cheese, bread and flour, while slight advances occurred in several other lines, but sugar was somewhat lower. Coal and wood were also higher.

Strikes

The wages of employees of the British Columbia Electric Railway Company, which had been reduced after the outbreak of war by about 25 cents per day, were restored to their former rate with 15 cents per day added to compensate for certain concessions which were withdrawn. The wages of electrical workers employed by the British Columbia Telephone Company were also restored to the rates which prevailed in 1912-13, the scale having been reduced by 25 cents, and in some cases 44 cents, after the war began. A Saturday half-holiday was also granted. Conductors, baggagemen, brakemen and yardmen of the Grand Trunk Railway System were granted an increase in wages of from five to eight per cent under an agreement for one year from September 1. About 4,500 men were affected. An agreement between the Esquimalt & Nanaimo Railway Company and its shopmen at Victoria, B.C., provides for a new scale of wages effective from August 1, by which 25 employees of certain classes received advances of from $3\frac{1}{2}$ to $4\frac{1}{2}$ cents per hour. About 1,300 employees in two agricultural implement factories at Hamilton, Ont., were granted an increase of 10 per cent in their wages. Cigarmakers in 17 shops at London, Ont., were granted an increase in piece rates of from \$1.00 to \$3.00 per 1,000 cigars. A clothing factory at Hamilton, Ont., granted an advance of five per cent to

10 male coatmakers earning from \$12 to \$18 per week, and an advance of 13 per cent to 32 female coatmakers earning from \$7 to \$9 per week. Twenty theatrical employees at Ottawa were granted a new scale of wages, by which nine were advanced from \$1 to \$1.25 for each performance; nine previously paid by performance were granted \$18 per week, one was advanced from \$17 to \$20 per week and another from \$12 to \$15 per week.

The total imports of merchandise for consumption in Canada for August,

	1916, amounted to \$72,-
	331,014, compared with
Trade	\$64,026,689 in July,
and Finance	1916, and \$40,832,822 in

August, 1915, an increase of \$31,498,192. Domestic exports of merchandise for August, 1916, amounted to \$96,090,028, as compared with \$104,964,270 in July, 1916, and \$41,094,154 in August, 1915. For the eight months ended August 31, 1916, imports entered for consumption amounted to \$486,059,319 in 1916, as compared with \$284,307,367 in 1915, while the exports for the same period amounted to \$677,142,923 and \$302,858,211 respectively. Increases in exports of products of the mine, the fisheries, the forest, animals and their produce, agriculture and manufactures were shown, while a decrease was noticed in miscellaneous merchandise. The following table gives a convenient summary of Canadian imports entered for consumption and domestic exports:

Bank clearings as indicated by returns from 16 cities showed a decrease in September as compared with the previous month, the total falling from \$842,595,842 in August to \$808,277,577 in September, a decrease of \$34,318,265, or 4.07 per cent. Grouping the returns by provinces, New Brunswick, Quebec, Manitoba and Alberta showed decreases, while Nova Scotia, Ontario, Saskatchewan and British Columbia showed increases. As compared with September, 1915, bank clearings showed an increase of \$232,895,199, or 40.48 per cent, the total for September, 1915, being \$575,382,378, all provinces showing gains. Of

the larger cities, Montréal, while showing a slight decrease comparing the September, 1916, figures with those of the previous month, showed a large increase over the figures of September, 1915. Toronto showed not only an increase over the figures of August, 1916, but also over those of September, 1915. Winnipeg showed a large falling off during September, 1916, over the figures of the previous month, but an increase over September, 1915. At Vancouver the figures for September, 1916, showed a slight increase over those of the previous month and a fairly large increase over those of September, 1915.

Canadian revenue for the month of August, 1916, amounted to \$16,546,872.83, as compared with \$14,240,844.06 for August, 1915, an increase of \$2,306,028.77. The expenditure on capital account for August, 1915, amounted to \$26,690,859.26, which comprised \$24,986,258.57 for war purposes, \$1,526,420.28 for public works, including railways and canals, and \$178,180.41 for railway subsidies.

The bank statement for August, 1916, showed the paid-up capital of the char-

tered banks of Canada to be \$113,018,937, as compared with \$112,852,038 for the month of July, 1916. Deposits payable on demand for August, 1916, amounted to \$443,317,275, as compared with \$431,958,188 for July, 1916. Notes in circulation for August, 1916, amounted to \$122,656,083, as compared with \$123,530,451 in July. Loans to cities, towns, municipalities and school districts during August amounted to \$39,882,811, as compared with \$42,385,096 during July, 1916.

II.—THE INDUSTRIES AND TRADES

Manufacturing in most lines continued active during September, and from many industrial centres reports of increased business and of additions to plant were received. Where any slackening of activity was noticeable this was in nearly every in-

stance attributed to lack of labour or delay in the receipt of materials.

Establishments engaged in metal manufacture continued active. Some shortage of steel rails was reported, due to the fact that the large steel mills which under normal conditions are large producers of steel rails, were engaged in the

manufacture of other lines. The steel works at Sydney and Sydney Mines worked to full capacity. At Westville, also, metal manufacturing was active. Quebec and Sherbrooke also reported the iron and steel trade busy. At Montreal general foundrymen were only fairly well employed, but employees in other metal trades were busy. The value of unfilled orders of the Canadian Car and Foundry Company at the end of September was said to be \$15,000,000. Automobile factories at Brockville and Windsor were very busy. Chatham reported foundries working overtime. At Kitchener foundries and machine shops were active. A machine shop at Galt was employing female labour and working three shifts of eight hours. At Toronto metal factories were busy and were calling for skilled labour despite the continued influx of labour from outside. At Woodstock stove manufacturers reported a demand for iron workers. At Stratford foundries and machine shops were very active, some of them employing day and night shifts.

Furniture and woodworking factories in most localities reported continued activity. The peg and ribbon works at Stewiacke near Truro were closed down owing to dullness in foreign demand but other points in the Maritime Provinces reported woodworking industries busy. At Toronto woodworking and piano factories were fairly busy, and at London a piano company was obliged to curtail outputs owing to a shortage of skilled workers. Furniture factories at Stratford and at Woodstock were active, and in the latter city were reported seriously handicapped by lack of labour. Manufacturers of wagons and sleighs at the same place were also falling behind in orders for the same reason, and piano and organ manufacturers stated that they were unable to accept many orders

because of the difficulty of securing help. Furniture and piano factories at Kitchener were very busy, some establishments being short of machine hands. Chatham and Brockville reported carriage and wagon factories busy. Planing mills, sash and door factories were reported active in nearly all districts and at New Westminster box factories were particularly active.

Boot and shoe and clothing factories were reported busy in most instances. At Montreal clothing manufacturers reported good orders coming in, with a scarcity of skilled operatives, and shoe manufacturers continued fairly busy for the season. There was a scarcity of rubber footwear and manufacturers in this line had difficulty in getting help. At Toronto clothing manufacturers were active and labour was much in demand. Boot and shoe factories had plenty of orders. At Kitchener, also, clothing factories, shirt and collar and whitewear factories were very busy, with an active demand for women operatives. Textile factories at Montreal were reported busy and knitting mills at Woodstock were short of woman help.

Manufacturing in miscellaneous lines continued active. The sugar factory at Kitchener was about to begin operations and expected to employ 400 men in two shifts. At Niagara Falls 20 establishments were reported very busy and seven of these were advertising for more hands. Ottawa reported pulp and paper manufacturers very busy on account of the shortage of paper. Hamilton reported all industries active with a number of establishments making additions to plant. Flour mills at Chatham were running 24 hours a day. Every industry in Orillia was running to full capacity, and a number of factories were adding to their equipment as rapidly as material could be obtained. Lethbridge reported all local industries active, with labour hard to secure. Work on the building of wooden sailing ships at Vancouver and Victoria gave employment to several hundred men.

Railway transport conditions were active during September, and statements issued by the large railway companies showed increased passenger and freight business. Gross earnings of the Canadian Pacific Railway for August were \$13,270,467 as compared with \$8,801,451 for the same month last year, an increase of \$4,469,016. The same figures for the Grand Trunk Railway were \$4,621,172 and \$3,645,972, an increase of \$975,200.

In the Maritime Provinces railway traffic was reported active. Sydney reported rail traffic heavy, and at Westville, although there was some falling off as compared with the previous month, conditions were still active. Fredericton reported general traffic above the average and tourist travel fully equal to that of previous years. At St. Thomas railway traffic crews were busy and shopmen reported a normal month. London reported railways very busy and additional train crews and freight handlers were being employed. At Stratford unusual activity prevailed in the Grand Trunk shops and at Brantford freight was reported congested for a time owing to a scarcity of freight handlers. Winnipeg reported transport workers fully employed and at Regina railways were becoming increasingly busy with the shipment of new grain. Prince Albert reported railways doing a fair business.

Water traffic was fair in the East and brisk in the West. Sydney reported conditions fairly active and at Halifax work along the waterfront was reported fair. Three Rivers reported a fair amount of activity in the harbour with a scarcity of ships for the lumber carrying trade. At Toronto navigation was active in the movement of freight, though passenger traffic had almost ceased. Port Arthur reported transport workers active with the movement of grain and coal. Victoria reported steamboat traffic heavy during the past two months.

Both metal and coal mining showed no falling off from the activity noted in the previous month, and in metal mining this activity was augmented

Mining

by further development work, the reopening of old properties and additions to mill capacity at many of the large mines in the Cobalt and Porcupine district. The Sherbrooke district reported asbestos, chrome iron and copper mines very active, and at Thetford asbestos mines men were in demand. Cobalt reported all the gold and silver mining companies adding to their mill capacity and new companies were opening up new properties or developing old ones and offering higher wages as an inducement to get crews. Shipments from Cobalt were considerably higher than usual. Within the last few weeks a considerable number of skilled labourers, mainly plumbers and steamfitters, came to the camp from the United States. There was still a scarcity of unskilled labour and the demand for muckers at the mines was unsatisfied. There was some shortage also of machine drill runners and as a result production in some cases was curtailed. Active conditions were reported in the Sudbury district and at Port Colborne a by-law was passed granting fixed assessment for a number of years to the International Nickel Company for its refining plant. Metal mining districts in British Columbia also showed sustained or increased activity, though labour shortage in some instances curtailed operations. The British Columbia Copper Company's smelter at Greenwood was unable to blow in more furnaces on account of a shortage of coke at Coleman and Fernie, which it was claimed was due to the inadequate supply of workers. At Trail there was a large amount of building still in progress and there was still a demand for small dwellings. The copper refinery was nearing completion. Prince Rupert reported mining active. The new prospects which were being investigated afforded an increased amount of development work, which was causing

a shortage of mine labour. Reports from Surf Inlet mines showed prospects improving. Permanent quarters for workers were about completed and an ample supply of labour was available at all times while other camps were reporting a shortage.

Coal mining was carried on actively in the different fields, though from practically all districts a shortage of labour was reported. Sydney reported active conditions but limited outputs owing to lack of labour. At Westville all coal mines worked full time, though owing to a scarcity of men not up to capacity, and many large orders for coal remained unfilled. At Chignecto coal mines which had been idle for some years were about to open. A few men were getting places in shape, and it was expected coal would be taken out shortly. Lethbridge reported coal mines very busy, with a continued shortage of mine workers. At Fernie coal mining, with the approach of winter was increasing in activity, and all the mines were working to the capacity of the crews obtainable. There was an increased demand for coke but the industry was somewhat hampered by a shortage of suitable labour. Coal mines in Nanaimo and the district were nearly all working full time and some required more men. The Western Fuel Company and its employees renewed their expiring agreement at the old rates but employees were given a bonus of five per cent during the continuance of the war and free transportation to the Reserve mines, for which they had previously paid \$2.50 per month.

Building in many parts of the country continued fairly busy and most localities reported fairly active or improved conditions. **Building and Construction** Sydney reported building quiet, though tradesmen had sufficient work of other kinds to keep them busy. A number of places in Quebec reported building trades fairly well engaged. Nearly all localities in Ontario reported building either fair or active. At Toronto building trades were

reported more active than in the previous month, the demand for houses having stimulated building operations. Conditions in the West were fairly active. Winnipeg reported building trades had a very satisfactory month and that contractors for small jobs experienced difficulty in getting labour, though this condition was not of a serious nature. Brandon also reported activity. At Calgary building trades were well employed with the exception of stonecutters and structural steel workers. There was a good demand from country districts for building tradesmen. Moosejaw reported building quiet, but at Medicine Hat tradesmen were actively engaged. At Lethbridge building trades were busy on repairs and additions in the city and on new buildings in farming districts. Saskatoon reported a steady amount of building being carried on in the country and small towns. Vancouver and Nanaimo reported an improvement in the demand for building tradesmen.

Railway construction was continued on a number of lines, though a shortage of labour for this work was reported in some instances. The Hudson Bay line was reported to be hindered somewhat on this account, though grading was progressing favourably on the last 40 miles to Port Nelson. Track laying had reached mileage 300 and was expected to reach Kettle Rapids, the second crossing of Nelson River, by October 20. The track has received the first lift of ballast to mileage 280 and the telegraph line has been erected up to the same point. Wet weather and labour shortage impeded progress somewhat. Some work was being done on the extension of the Pacific Great Eastern Railway from Clinton to Prince George, B.C. Excavations at the Dorchester terminal site of the Canadian Northern Railway, Montreal, were expected to begin in November for the new Lagauchetiere street station, and it was expected that trains would be running under the mountain into the new station by May next. Prince Albert reported that contractors were having difficulty in obtaining help to make the

road and lay steel into the city before the close of the season. Canadian Northern officials stated they would commence work on a new line north of the city if labour could be obtained. Construction on the new Welland Canal was continued steadily.

Lumbering continued active in most centres, though there was some slackening of logging operations in British Columbia owing to an extra output earlier in the season. Lumbering districts in the Maritime Provinces were active. Truro reported a scarcity of labour and at Newcastle very active conditions prevailed in the mills. At this point, also, crews were being sent into the woods. At Fredericton work on the booms in the river was drawing to a close and workmen were leaving for the woods. Sherbrooke reported a good market for lumber and operators making arrangements for winter work. At Three Rivers the mills were working full-handed and full time. A scarcity of vessels for lumber shipments was reported. At Peterborough mills were working full time. At Prince Albert mills were running day and night shifts and getting supplies ready for lumber camps. At Vancouver logging firms announced they would close their camps for the winter, giving as a reason the scarcity and high price of suitable labour. Saw and shingle mills at New Westminster were running to capacity, but work in the camps slackened off considerably. In the Fernie district difficulty in procuring suitable labour for sawmills had the effect of raising the wages of labourers to a minimum of \$3 per day of ten hours. Even at this rate it was found difficult to procure white labour and in some cases Orientals were placed at work in the sawmills.

Western grain crops were expected to prove better than was at first expected, though it was thought the grade in many localities would be low. Many points in Ontario reported very

dry weather which hindered farmers preparing the ground and seeding. Farm districts in Eastern Canada reported a scarcity of help, though in most localities the shortage was not serious. In some parts of the West, however, the labour problem was a serious one and threshing was being carried on with difficulty. Brandon reported a poor crop but a big demand for harvest help with high wages. At Saskatoon there was a brisk demand for labour but there was apparently enough help responding to thresh the crop in seasonable time. Grain was not expected to be high grade and only a fair yield per acre was looked for. Medicine Hat reported the demand for harvesters and threshers fairly well met and that a fairly good crop was expected. At Calgary there was a steady demand for labour but no shortage. Companies distributing farm implements from this city reported business exceptionally good. Moosejaw reported there was no acute shortage of help but that men seeking employment were readily hired.

Fishing during September was only fair. At Sydney, when bait was plentiful, large catches of cod

were taken. Charlottetown reported fishing fairly active and the local market well supplied. At Newcastle fishing was very quiet. Port Arthur reported fishing fleets busy along the north shore of Lake Superior, but seas were heavy and the weather cold for the time of year. At points on the Pacific coast, with the exception of Prince Rupert where fishing conditions were reported satisfactory, fishing was quiet. New Westminster reported a very poor season and at Nanaimo the industry was dull. The salmon pack in British Columbia showed a heavy falling off. The total pack of sockeye salmon was reported to be 200,000 cases as against an average pack of 660,000 in the past three years. Reports from the whaling stations indicated the catch would equal if not surpass the record catch of 1914.

III.—LABOUR AND INDUSTRY IN THE PROVINCES AS INDICATED IN REPORTS OF CORRESPONDENTS AND OTHER SOURCES

Nova Scotia

In Halifax labour conditions were very active. All trades connected with building and construction work were busy, fine weather contributing to the progress being made in the many large works under way. Good progress was made at the Allan terminals, and the regular forces were being added to in an effort to have two piers ready for this winter's business. Work on the Furness-Withy pier, also, was being carried on as quickly as possible. The new pier and buildings of the French Cable Company on the Dartmouth side of the harbour were well under way, and a considerable force of men was also employed at Woodside on the Imperial Oil Company's new plant. Employment along the waterfront was fair.

At Sydney all workmen were well employed with a scarcity of labour in some of the leading industries. The weather was favourable to outdoor work and to farmers. Both coal and steel works at Sydney Mines were active and operated to capacity. The Dominion Steel Corporation reported a sufficient number of ships for their carrying trade. Coal outputs, however, were still low owing to lack of labour. Transportation by rail was very heavy, and water transportation fairly brisk. Building was quiet, but tradesmen had sufficient work of other kinds to keep them busy. Fishing was fair and where bait was plentiful large catches of cod were taken. Swordfish were not so plentiful as last year.

At Westville the supply of labour in all trades, more especially carpenters and miners, was still short of the demand. Although somewhat handicapped by the scarcity of labour, a large amount of building was being done. Railway traffic while showing some falling off in comparison with last month still con-

tinued active. Wholesale and retail trade reported business good and money circulating freely. All coal mines worked full time, though not up to capacity, owing to scarcity of men, and many large orders for coal remained unfilled. The woollen industry was quiet. Metal manufacturing and woodworking establishments were active.

At Amherst the general condition of the labour market was better than at any time for two years. The coal mines at Chignecto which had been idle for the past few years were about to open again. A few men were making the necessary preparations and it was expected coal would be taken out shortly.

At Truro all branches of labour were well employed. Builders and builders' labourers, painters, printers, railway men, farm hands, clerks, stenographers, iron and steel workers, garment workers worked full time and all industries operated steadily, some of them overtime. Lumbermen were complaining of scarcity of help. In fact there was shortage of all kinds of labour, skilled and unskilled. Wholesale and retail business was good and customs receipts and bank clearings satisfactory. The peg and ribbon wood works at Stewiacke remained closed owing to dullness in foreign demand.

Prince Edward Island

At Charlottetown labour in all industries was reported fairly active and carpenters were busy. Fishing was fairly brisk and the local market well supplied. Lumber mills were busy.

New Brunswick

At St. John labour generally was well employed. The building trades were busy and skilled mechanics in demand. Customs and inland revenue continued to show increases.

At Moncton all the various classes of labour were steadily and actively employed. In several lines the local supply was inadequate to meet the requirements of demand and additional help had to be sought from outside sources. In the outlying agricultural districts this shortage of labour was particularly acute and farmers were seriously handicapped in haying and harvesting work. In the paving of streets and building of foundations difficulty in securing of both experienced and unskilled labourers was encountered. Building continued brisk. The potato crop was considerably in excess of last year both in quantity and quality. Prices paid by shippers ranged from \$1.75 to \$2.00 per barrel with active demand. Real estate continued active and wholesale and retail trade was satisfactory.

At Newcastle all classes of labour were well employed and there was special demand for unskilled labour. Building trades continued active, with a scarcity of skilled tradesmen. Fishing was very quiet after the close of the salmon season. Sawmills were working full time and crews were being sent to the woods to prepare for the season's cutting. Local industries were working steadily with full staffs.

At Fredericton there was an active demand for labour in nearly all branches of industry. Factories were working to full capacity, and in some cases a shortage of labour was reported. Both freight and passenger traffic by water and rail was above the average, while the tourist traffic was fully equal to that of previous years. Work on lumber booms was drawing to a close for the season and men were leaving for the woods.

Quebec

In general employment conditions at Montreal were good throughout September, although building construction remained quiet. Business continued steady and orders for dry goods, hardware, groceries and all staple articles came in freely for the spring trade. A

considerable shortage in woollen goods both in quantity and variety was reported. Manufacturers of waterproof and other clothing reported good orders coming in. Deliveries on both domestic and imported goods were complained of and dry goods houses stated it was hard to get supplies to fill their orders. Cotton mills were well occupied with orders, but clothing manufacturers were short of skilled operators. Shoe manufacturers continued fairly busy for the season but with some delay in deliveries. There was a scarcity of rubber footwear and factories in that line had difficulty in getting help. American shoe manufacturers placed some large orders with Montreal tanners for leather, expecting an advance in prices which was made later. Manufacturers of paints still reported good business at the advanced prices. Sales of pig iron were only moderate and general foundrymen were only fairly well employed because of the little construction work going on. Manufacturing machinists were very busy, and most of the other industries were well employed. At a meeting of the directors of the Canadian Car and Foundry Company, Limited, on September 25, it was stated that the value of unfilled orders on the Canadian books of the company and its subsidiaries amounted to more than \$15,000,000, and that this amount might be increased. The great scarcity of bottles was proving a serious handicap to manufacturers of pickles, jams, etc. Ocean freights on lumber were so high that demand from England had ceased. Excavations at the Dorchester street terminal site of the Canadian Northern Railway were expected to begin in November for the new Lagauchetière street station. It was expected trains would be running under the mountain into the new station by May next. Prices on the wholesale market show how greatly the cost of living has advanced in food in the past year. Flour went up 55 per cent in a year, butter 23 $\frac{1}{3}$ per cent, cheese 40 per cent to reach the highest price ever known in the trade, eggs 46 per cent,

potatoes 131 per cent and beans 74 per cent. Canned goods were also selling at higher prices. Three hundred barbers went on strike in 100 establishments in the city on September 11. All but 30 had gone back by the end of September, the master barbers agreeing to close at 8 o'clock. To make the rule binding on non-union shops the master barbers are asking the provincial government to include barber shops in the list of establishments which may be regulated as to hour of closing by municipal by-law. All the railroads show increased passenger and freight business.

The demand for female labour was satisfactory during September, and greater than in 1915, owing principally to women being actively employed in factories engaged on war orders. At the Women's War Registry 43 names were registered during the first week the bureau was opened. Negotiations were carried on during September between the fur trade interests and representatives of the Workers' Union, the latter presenting a number of demands involving increased wages, shorter hours, abolition of piece-work and recognition of the union. Compromise arrangements were made in most instances.

At Quebec factories were working to full capacity, the iron shipbuilding and repairing industry being particularly busy.

At Sherbrooke the labour market was very active and employers found difficulty in securing sufficient help. All factories were busy, a number of them adding to their plants. Several parties from the United States have been in correspondence with the Board of Trade in regard to sites for extending their business in Canada, and some of them have visited the city and looked over the sites obtainable. Farmers were very busy but found it hard to get labourers. Lumber was selling well and lumbermen were commencing to make arrangements for their winter work. Owing to the increase in industrial operations there was a scarcity of dwellings and builders

were busy. Mining was very active. At Thetford miners were still in demand.

At St. Hyacinthe the general condition of the labour market during September was very good, with a shortage of labour. Building operations were fairly active, with good prospects for plenty of work during the winter season. The various local industries had a busy month. Civic street work will keep labourers employed until late in the fall; their wages have been increased from \$1.85 to \$2.00 per day. Policemen's wages also have been raised \$50 per year. Wholesale business was good and increasing, money circulating more freely and the rural dealers being in a better position to meet their payments. Retail business also was very good.

At Three Rivers the general condition of the labour market was very satisfactory. There was considerable work in the building trade and every factory and lumber mill was working full-handed and full time. Several steamships were in port during the month, but there has been a scarcity of ships to send lumber consignments to England.

At Hull labour conditions remained unchanged since the previous month in spite of the fact that the E. B. Eddy and Gilmour & Hughson mills closed down for the season; all the men who were employed in these establishments readily found employment elsewhere. Low water in the Ottawa and Gatineau rivers was expected to prevent the floating down of logs.

At St. Johns and Iberville labour conditions were about the same as during the preceding month. Industrial establishments were busy, with a shortage of hands in some of them. There was little activity in the harbour during the last week of the month. A number of American boats, however, came down the Chambly canal on their way to the lower St. Lawrence, while others were returning to United States ports loaded with cordwood and lumber.

At Sorel factories were busy and un-

usual activity prevailed in the building trades.

Ontario

At Toronto conditions were much the same as in August with a more pronounced shortage of labour in several lines. The building trade showed slightly increased activity, the demand for houses having stimulated operations. The number of vacant houses showed a decrease. The metal and engineering trades were busy and though there was a continued influx of labour from outside places the supply of skilled workmen was inadequate. Employers were endeavouring to procure labour from Quebec Province, one company securing 75 men from Montreal. Woodworkers were active; piano makers fair. Printers, bookbinders, stereotypers and lithographers were active. Harness and leather workers had steady employment. The clothing trades were active and labour much in demand. Furriers had a good month; boot and shoe workers had plenty of work.

The Prohibition Act which went into force September 16 had the effect of closing a number of hotels and many bar-tenders and other employees went to the United States. Railway men, street railway employees, expressmen and teamsters were active. Wages of teamsters employed by the railway transport companies were increased by \$3 a month, bringing them up to \$59 per month, with extra pay for work on Sundays and holidays. Navigation was active in connection with freight movement, though passenger traffic had almost ceased.

Labour conditions among women in Toronto were not changed materially in the past month and compared favourably with September of last year. All factories were active and many firms were working on Christmas orders which will require night work two or three times a week for the next three months. A general lack of factory workers, both experienced and otherwise, was reported. Candy and box factories were busy and manufacturers of woollens and knitted

goods were working to capacity. Women in the boot and shoe and glove industries were well employed. In the clothing trades women had a busier month than in August and dressmakers and milliners were better employed on fall and winter work. Owing to the number of exhibition visitors in the city retail clerks and store employees were steadily employed.

The increase in the price of hard coal by 50 cents per ton on September 1 occasioned a revival in the movement for the establishment of a municipal coal yard. The Board of Control received reports on the project by various civic officers to the effect that although the charge of \$8.50 per ton was excessive it was inadvisable at present to undertake to establish a municipal coal yard as the city had no property suitable for a coal terminal with facilities for delivery by water and rail. On September 25 the City Council adopted a resolution for the appointment of a special committee to be named by the Board of Control to investigate the cost of food and fuel.

The report of the House of Industry for the quarter ending with August showed 68 new families assisted during the three months in addition to casual poor to the number of 150. There were at the close of the quarter 132 inmates of the House.

At Hamilton labour conditions continued active in all branches of trade. A number of extensions were being built to factories and warehouses and a number of dwelling houses were being erected. All industries were very active. Domestic help continued scarce and it was impossible to fill the demands for either domestic help or charwomen. Steam laundries were very busy in consequence. Farm help was also inadequate, although the dry season has lessened the demand for this class of help except on fruit farms where peaches and grapes were equal to expectations. Female help of all kinds was greatly in demand. Garment workers were all employed, trade in this line being very active. Dressmakers, mantlemakers and

milliners were having an exceptionally busy season. During August there was an increase in outward freight tonnage on the Grand Trunk Railway, the Toronto, Hamilton and Buffalo Railway, the Canadian Pacific Railway, the Michigan Central Railroad and the Inland Steamship Lines, including the Hamilton and Toronto Steamship, Montreal and Fort William, of 5,800 tons over the August of last year. A big falling off in the shipping of pig iron was noted on account of local production of steel. Customs and inland revenue receipts both showed increases.

At Niagara Falls labour appeared to be fully employed during September. In a number of industries there was a continuous demand for workpeople and some factories were running overtime. Commercial, financial, transportation and real estate reports were good. The Provincial Natural Gas and Fuel Company warned consumers to expect a shortage of gas during extreme cold weather. Expenditure on the county good roads' system was small on account of unfavourable weather and shortage of labour. Farmers and fruit growers were very busy and there was a great demand for men and women for agricultural work. The heavy fruit crops ripened quickly, adding to the difficulty of picking and packing. Dry weather hindered ploughing and the acreage of fall wheat will be restricted. Factories in general were busy. Twenty concerns reported "very busy" and of these seven were advertising for more hands. At Port Colborne contracts were let for the erection of the International Nickel refining plant. At Welland the Canadian Steel Foundry secured large contracts and commenced enlargements of its plant. Many more men will be employed.

At St. Catharines there was greater activity than in the previous month. The building trades were well employed. All factories were busy, some of them working overtime. Canning factories were very active. City improvement work was carried on extensively and

canal construction continued steadily. At Thorold, Merritton and Port Dalhousie all classes of labour were generally well employed.

At Ottawa unskilled labour was greatly in demand and the supply of men for such work as railway construction was reported particularly inadequate. Metal workers and leather workers continued busy on war orders and building activity was maintained. Pulp and papermakers, in view of the shortage of paper, were busy. Local pulp and papermakers voted against a proposal for Sunday work in a referendum submitted to all the locals in Canada and the United States, the suggestion having arisen through the shortage of paper. The Ontario Temperance Act which closed the bars on September 16 affected about 80 bar-tenders locally, many of whom have secured similar employment in Hull.

At Brockville all trades were fairly active with a scarcity of labour in some instances. The carriage, motor car, steel, iron and brass trades were unusually busy and railway passenger traffic and freight shipments were fairly brisk. Ice drivers received an increase of 25 cents per day as a voluntary concession from the ice dealers.

At Kingston there was very little change in labour conditions during September. The different factories and manufacturing plants were calling for more help and some overtime was worked. A few houses were being built, although building operations were nearly over for the season.

At Peterborough labour of all kinds was in good demand. Manufacturing plants were busy and while building operations were not as active as in former years building tradesmen who could not secure employment in their trades were working in factories and there were no idle men. The sawmills were working full time. Woman labour was in demand and some factories found it hard to get sufficient help; stores and offices were employing girls in places formerly occupied by men.

At Galt the large industries were very busy and working overtime. All mechanics were fully employed. Machinists, pattern-makers and moulders were very much in demand. One factory was employing female help in special work in three shifts of eight hours each.

At Brantford labour was employed to about the same extent as last month with still a shortage of unskilled workers. Street paving was at a standstill and has been discontinued until next year and proposed street railway extensions to outlying parts of the city have also been postponed. Freight was congested owing to a scarcity of freight handlers. Factories were all busy.

Little change was reported in labour conditions at Kitchener, Waterloo and Elmira. Factories were all busy, some working overtime, and all short of help. Girls for shirt, collar, whitewear factories, as well as shoe and rubber factories, were in great demand. The Dominion Sugar factory will begin operations in a short time and will need men on double shifts of 12 hours each, 200 men to each shift. Farmers were hauling beets to the factory. Furniture factories were all busy, some being short of machine hands and finishers. Rubber factories were busy as well as all shoe factories. Foundries, machine shops, button factories, glove factories, piano and organ factory, suspender factory, shirt factories, whitewear factories, felt factories, felt shoe factory and breweries, both in Kitchener and Waterloo, were very busy. The building trades were also busy. In Elmira the furniture factory, the shoe factory, the felt factory and the foundry were all busy and all were advertising for help—men, boys and girls being wanted.

Labour conditions at Guelph continued active; all factories were busy, those employing female help being particularly active and in a position to engage more workers if available. The building trades were well employed. The Board of Works will be unable to complete the amount of work laid out for the season on account of lack of labour-

ers. Wholesale and retail merchants reported business good.

At Stratford all classes of labour were well employed and some industries found it difficult to obtain a sufficient supply. Unusual activity prevailed in the Grand Trunk Railway shops. Day and night gangs were employed in some foundries and machine shops. Customs and inland revenue returns showed increases over the figures for the corresponding month last year. All manufacturing establishments were active, especially foundries and furniture factories.

At Woodstock there was a scarcity of labour, male and female, skilled and unskilled. Furniture factories were seriously handicapped. Manufacturers of wagons and sleighs were falling behind in their orders. Manufacturers of organs and pianos stated a good deal of work was going to the United States because it could not be done in Canada. There was an urgent demand for metal workers, especially in the stove trade. Knitting mills were complaining of the scarcity of female labour. Business generally was very good and money plentiful.

At London there was no lack of employment and a shortage of skilled help in many lines was reported. The railroads were exceedingly busy, and additional train crews and freight handlers were being employed. The closing of some hotel bars left a number of bartenders out of work, but they were securing employment in other lines. A number of factories were adding to their plants and a piano and organ company reported its output curtailed owing to a shortage of skilled workers.

At St. Thomas the general condition of the labour market was less active in September than during the previous month, though there was still a decided scarcity of unskilled workers, particularly those desired for heavy rough work. Bricklayers were well employed; other building tradesmen were quiet. Railway trainmen were busy, railway shopmen reported employment normal.

Wholesale and retail trade was quieter than during the previous month, also manufacturing in some lines.

At Chatham the demand for labour was keen in all industrial establishments. Flour mills were running 24 hours per day, while several planing mills and foundries were working overtime. Carriage and wagon factories were very busy. Freight and passenger traffic improved considerably. Wholesale trade was very fair and retail trade brisk. Many men left for the West to assist in the harvest and farm help was in demand in the district.

Tilbury, Bothwell, Ridgetown, Blenheim and Wallaceburg, towns in the Chatham district, reported business brisk and building trades active.

At Windsor there was a good demand for all classes of labour and a fair supply. There was some activity in the building trades and planing mills and other factories supplying builders were very active. Automobile manufacturers also were busy. Railway traffic was fairly brisk.

At Owen Sound there was a good demand for both skilled and unskilled labour. Factories were all busy, with orders ahead. Building was quiet. Corporation labourers had their wages raised from 20 cents an hour to 25 cents. Bankers reported cash easy, collections good and deposits on the increase. Merchants reported September one of the best months in their experience.

Every industry in Orillia was running to full capacity and a number of factories were adding to their equipment as rapidly as machines could be obtained. Houses were scarce and rentals showed an upward tendency. Building continued brisk and all classes of building tradesmen were in demand.

In the Cobalt district both in the silver and gold camps increased mill capacity was still the object in view with the larger mines. At the Dome mines, with the increased equipment, the mill was expected to handle 1,500 tons daily. At the Hollinger foundations were completed for the addition to the present

mill, which will raise the capacity from 1,900 tons to 3,500 tons daily. The Buffalo mines at Cobalt have completed the installation of the new 600-ton oil flotation plant which will give a closer extraction of silver and raise the capacity from 100 tons daily to 600 tons daily, and treat material profitably that was formerly considered waste. In the outlying districts new companies have been continually starting up and exploring or developing prospects, some of them with good results. The opening of these new properties draws from the labour supply of the older established mines and in many cases the new companies offer larger pay as an inducement to get their mine crews. Shipments of ore from the Cobalt Camp were considerably higher than normal and mining was on a very sound basis. Within the past two weeks of the month a considerable amount of skilled labour came into the camp, principally plumbers and steamfitters, and practically all from the United States. The local mills and mines, however, were expected to be able to absorb all of this class of labour, there being usually a demand for pipe-fitters around the mills. There was still a scarcity of unskilled labour, and the demand for muckers at the mines remained unsatisfied. Some of the large mines were short not only of muckers but of machine drill runners and as a result production in some cases was curtailed.

At Sault Ste. Marie there were very few changes from last month. There was a demand everywhere for unskilled labour which unemployment offices were unable to satisfy.

At Port Arthur and Fort William all workmen were busy. Employment along the water front was increasing in volume and elevators, coal docks and freight sheds were busier. During the month wages of carpenters at the Western Dry Docks were increased from 32½ to 35 cents an hour; at the elevators in construction the rate paid carpenters was 40 cents an hour. With the exception of elevator construction there was very little being done in the building trades.

The men engaged on elevator construction in Port Arthur, where two elevators were in course of erection, were working in two shifts and the work was going on continuously under arc lights at night and all day Sundays. A steady repair trade kept members of the building tradesmen busy, particularly carpenters, plumbers, steamheaters, painters and electricians. All the engineering and repair shops were working full time, while the railroad shops and machine shops were running under normal conditions. At the Western dry dock, Port Arthur, the keels of two freight boats were laid down some time ago and 400 to 600 men were working a ten hour day. One of these boats has been successfully launched and the other was expected to be launched in about three weeks. All transportation workers were busy and expected to continue so until the close of navigation. Unskilled labour has been absorbed in the various foundries and industries of the two cities. The fishing fleets were busy along the north shore of the lake and among the bays and islands, and the visiting tugs brought in the catches to Port Arthur for exportation. The seas have been heavy and the weather unusually cold for this season.

Manitoba

At Winnipeg industry was generally active. The building trades had a very satisfactory month. Contractors for small jobs experienced difficulty in getting labour, but this condition was not serious. In the shops of the Canadian Pacific Railway working hours were reduced to eight per day towards the end of the month. Inclement weather seriously retarded threshing operations in almost every part of Manitoba. Wholesale houses reported a fairly good business and transportation workers were fully employed throughout the month.

With regard to employment for women, experienced departmental stores have not experienced difficulty in securing the help required to meet the fall

trade, although in some cases they have had to employ less experienced workers than usual. Single-line stores, which do not as a rule employ many girls, reported some increase of staffs. A great shortage of domestic help existed. Garment workers and bookbinders were busy. Experienced factory help was not to be found, but it was not difficult to secure beginners. Dressmakers, milliners and tailoresses were busy.

At Brandon the demand for all kinds of labour was very good, unskilled labour and building tradesmen being particularly active. Though the grain crops were poor, owing to damage by rust, the demand for harvest help could hardly be met and wages ruled higher than for several years. Retail and wholesale business was good and bank clearings continued to increase.

Saskatchewan

At Regina labour was well employed with the exception of threshers who lost some time through wet weather. The Imperial Oil Company's works were nearing completion, the refining of oil having already commenced. The railways were beginning to get busy hauling out grain. Wholesale houses reported a good volume of business for the month. The crop yield which it was believed would be very low owing to rust was turning out better than was expected and farmers appeared satisfied with threshing returns. The building trades with the exception of plumbers and steamfitters were actively employed.

At Moosejaw there was a good demand for men and there appeared to be no surplus. The work offered was largely in the harvest fields, but there was also considerable work in other lines with the exception of the building trades. The men employed on the Moose Jaw Electric Street Railway have made demands on the company and the proceedings have reached the stage where a Board has been asked for and appointed. There were a number of stormy days which interfered with harvest operations

and only about 20 per cent of the crop was threshed. There was no acute shortage of help, but men were readily hired when seeking employment.

Prince Albert reported a growing scarcity of men in the city and district. Contractors working on the grade of the Grand Trunk Pacific were having difficulty in obtaining help to get the road made and steel laid into the city before the close of the season. Canadian Northern Railway officials recently in the city stated that if they could only get the necessary labour they would start work upon a line running north from the city. Railways were doing a fair business and the local lumber mills were still running night and day shifts. Building was quiet. Farmers in the district report fairly good yields from threshing. Supplies were being got ready and moved out for the fishing and lumbering camps where a busy season was expected. The right of way for the Grand Trunk Pacific was being cleared and several houses were being moved ready for the laying out of the yards and roundhouse. The building trades were quiet, but the few men of each trade left in the city were finding plenty to do. Labourers were scarce.

At Saskatoon, the threshing season being well started, there was a brisk demand for labour, and there was apparently enough help in sight to thresh the crop in a seasonable time. Some civic repairs and road building were carried on through the month, also a steady amount of building in the country and small towns. The better fields were yielding from 22 to 25 bushels per acre, but many fields on account of hail and rust were giving 7 to 12 bushels. The grain was not expected to average a high grade.

Alberta

At Medicine Hat there was greater activity with a marked shortage of labour in many lines. The building trades were actively engaged. Local industries reported business good, some working

day and night, but the labour supply was inadequate. Wholesale and retail merchants reported business brisk. Railway traffic and freight shipments were reported active. Farmers were well advanced with grain cutting, the demand for harvesters being fairly well filled by soldiers. A few cases of black rust were reported, but a good crop was expected in most districts. Redcliff reported business very good. The glass works were closed down for repairs, but were expected to start operations again in a short time.

At Lethbridge the volume of employment was at its maximum for the past two years. Coal mines were active with a continued shortage of mine workers. Farmers were very busy and the call for help was not being met. Building trades were busy at repairs and additions in the city and in the farming districts. There was no new building under way in the city, but considerable in the country. The crop was reported to be as good as last year. The hay crop was very heavy and help on the hay fields scarce.

At Calgary there was a general demand for labour and building trades were well employed, with the exception of stonecutters and structural steel workers. There was also a steady demand for mechanics and building tradesmen for country districts. The metal trades were well employed. Harvest work was favoured with good weather; there was a steady demand for labour and no shortage was reported. Crop conditions were good. The coal mines of the district were busy, there still being a shortage of miners. Wholesale and retail merchants reported trade fair, and implement firms stated business was exceptionally good. The Associated Charities reported giving relief to 56 British and three foreign families during September.

British Columbia

At Fernie labour was fully employed and there was a noticeable shortage of coal mined and also of unskilled labour. While no changes in the rates of wages

have been authoritatively announced other than the war bonuses to the coal mine employees which was made effective last month, difficulty in procuring suitable labour for sawmills has enhanced the rates for labourers to a minimum of \$3 per day of ten hours. Even at this rate, however, it has been impossible to procure white labour and in some cases Orientals have been placed at work in the sawmills. The demand for lumber products has continued to increase, but the difficulty of procuring labour has prevented operators taking full advantage of the increased demand. Coal mining activity was increasing with the approach of winter. All the mines were working to the capacity of the crews obtainable. There was an increased demand for coke, although the industry was already somewhat hampered by the shortage of suitable labour.

At Nelson labour conditions were much improved. Some of the mills and mines were having difficulty in securing a sufficient number of men. The British Columbia Copper Company's smelter at Greenwood was unable to blow in any more furnaces on account of a shortage in the supply of coke at Coleman and Fernie, due, it was claimed, to a scarcity of men. At Trail there was a large amount of building in progress and there was still a demand for small dwellings. The copper refinery at Trail was nearing completion. The Surprise mine at Sandon has started its new plant, which it was expected would bring the saving of zinc values up to 95 per cent instead of 50 per cent as under the old system.

At Vancouver there was a steady demand for labour at up-country and outside points. At the city relief office and the employment agencies there were enquiries for loggers, shingle-bolt cutters, concrete workers, cooks, railway construction workers and others, but all of this employment was out of the city. In the building trades also there was a slight improvement in the demand for men. In the city itself the labour situation was better than it had been for the

past three years. This was chiefly due to many men having left the city during that time. The change was reflected in demands for increased wages from several classes of workmen, notably city employees and street railway men.

As the result of negotiations between the British Columbia Electric Railway Company and its employees wages have been restored by signed agreement to the rates which obtained before a reduction made in September, 1915. In all approximately 1,500 men distributed in Vancouver, New Westminster and Victoria were affected. The approximate number affected in Vancouver was 850. During the month a strike of electric linemen employed by the same company occurred, about 50 men being involved. The cause of the trouble was stated to be the refusal of the company to recognize the Electrical Workers' Union. The dispute was settled by the company agreeing to recognize the union and an agreement to that effect was signed. Six hundred city labourers requested a raise in wages from \$2.25 per eight hour day to \$3.00, which was the rate which formerly prevailed. The City Council granted a raise to \$2.50 per eight hour day. Fifty teamsters in the employ of the city were also raised from \$2.25 to \$2.60 per day. These advances followed a request made by the Civic Employees' Union. Some logging firms announced that they would shortly close their camps for the winter season, giving as one of their reasons for doing so the scarcity of suitable labour and the high wages demanded.

Labour conditions for women changed but slightly during September, the improvement noted for the previous months being maintained.

Acting on the representations of various women's organizations the City Council at its last meeting decided to again appoint a woman health inspector, who will act under the instructions of the Medical Officer of Health, visiting stores and workshops which do not come under the jurisdiction of the provincial inspector of factories, in the interests of

the girls and women employed therein. In particular employments reports show there was some difficulty in filling the demand for domestic help, due chiefly to the falling off in the number of immigrants from Britain from whose ranks the supply of domestic help is usually obtained. The increased demand for woman labour in other lines of employment also enables the large number of girls and women, who will only take domestic work when no other kind is available, to choose the work they prefer. In factory employments women were fully occupied, some difficulty being experienced in obtaining operators for power machines in the garment industry. Boot and shoe workers were fully occupied. Candy and biscuit workers and workers in jam and pickle factories were busy. Those working in dressmaking, millinery and tailoring were not fully employed as the "fall" season does not commence in these occupations until October. Laundry workers and employees in knitting factories were busy, while an increased demand for waitresses was noted. The demand for stenographers was not quite so high as during the previous months, the vacation season being at an end fewer substitute workers were needed. The demand for regular employees remained fair, skilled stenographers being quickly placed, those on the waiting list being mainly beginners. The replacing of male clerks who have enlisted by women was steadily continued in most of the banks of the city during the past month, some of the managers stating that some 20 per cent of their staff had been replaced in this way; the understanding being, however, that those men who had enlisted would be taken back on their return from the front or from overseas, although it is expected that some of the more experienced women will be retained.

At New Westminster labour generally was well employed, although there was no noticeable increase in the volume of local employment. The city carried on some street work and a small amount of building and repairing was being done.

Threshing which was well under way in the rural districts afforded some employment. Fishing was very poor throughout the season. Sawmills and shingle mills were running to capacity. Work in the lumber camps slackened off considerably owing to an extra output of logs earlier in the season. Box factories were busy and sash and door factories were fairly active.

At Nanaimo labour conditions showed steady improvement, with an increasing call for men at most of the mines. The different trades, especially the building trades, showed an improvement over the conditions of last month. Wholesale and retail merchants reported business as very quiet, owing largely to the number of foreigners and Asiatics employed by the large companies. Fishing was quiet. Sawmills and logging camps were working steadily. Coal mines in the city and district were nearly all working full time and some of them needed more men. The Western Fuel Company and its employees have renewed their expiring agreement at the same rates, with a bonus of 5 per cent during the continuance of the war and free transportation to the Reserve mine, for which they had previously paid \$2.50 per month. The Pacific Coast collieries were also negotiating with their men in regard to increased rates of wages.

At Victoria labour was fairly well employed in most trades, the building trades excepted, and everything considered conditions were better than they were a year ago. Employment in all branches of the iron trades has been brisk and the indications were that these conditions would continue for the next month or two at least. The building of three wooden sailing ships, commenced two months ago, was progressing satisfactorily, the keel of the third vessel being laid during the month. About 100 men were employed in the yards. Steamboat traffic during the past two months has been heavy, a large number of tourists journeying to Northern points. During the month the various employees in the operating and mechanical depart-

ments of the British Columbia Electric Railway received an increase in wages from 2 to 3 cents per hour, the rate of wages prevailing during 1913 being restored. There has been a heavy falling off in the British Columbia salmon pack this year. The total pack of sockeye salmon is given as 200,000 cases, as against an average of 660,000 in the past three years. Reports received from the various whaling stations in British Columbia indicate that results this year will equal, if not surpass, the record catch of 1914. Up to the middle of September 360 whales had been taken at three stations. Large quantities of oil

and fertilizer were being shipped to foreign ports.

Labour conditions in Prince Rupert and district were little changed. Mining was still very active. New strikes of ore were being made and investigated, resulting in an increased amount of development work, which was causing a shortage of mining labour. Reports from the Surf Inlet mines were to the effect that prospects were improving every day. Permanent quarters for workmen were about completed and the supply of labour was adequate. Rich silver ore was being shipped from the Hudson Bay Mountain, near Hazelton. Fishing conditions were reported very satisfactory.

INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS DURING SEPTEMBER, 1916.

DURING the month of September there were six applications received for the establishment of Boards of Conciliation and Investigation under the Industrial Disputes Investigation Act in the following cases: (1) dispute between the Fredericton & Grand Lake Coal and Railway Company and the New Brunswick Coal & Railway Company and their engine, train and yard hands; (2) dispute between the Edmonton Radial Railway and their street railway men; (3) dispute between the Quebec Railway, Light, Heat and Power Company, Limited, and their motormen and conductors; (4) dispute between the Moose Jaw Electric Railway Company and their conductors and motormen; (5) dispute between the Canadian Pacific Railway Company and their maintenance-of-way employees; (6) dispute between the Sandwich, Windsor and Amherstburg Railway Company and their conductors, motormen and other employees.

The report was also received during the month of a Board of Conciliation and Investigation which had effected a settlement of certain matters at issue between the Algoma Central and Hud-

son Bay Railway Company and its conductors, baggagemen, brakemen and yardmen.

Applications Received.

An application for the establishment of a Board of Conciliation and Investigation was received on August 31 on behalf of the railway engineers, firemen, conductors, brakemen and yardmen in the employ of the Fredericton & Grand Lake Coal & Railway Company and the New Brunswick Coal & Railway Company, to the number of 20, members of the Brotherhood of Locomotive Engineers and the Brotherhood of Railroad Trainmen. The application grew out of a demand on the employees' part for the same rules and rates of pay as were in effect on the Canadian Pacific Railway System. Action on this application was, however, withheld by the Minister to permit of further negotiations between the parties interested.

An application for the establishment of a Board of Conciliation and Investigation was received on September 2 from the street railway men employed on the Edmonton Radial Railway by the Cor-

poration of the City of Edmonton, being members of Local No. 569 of the Amalgamated Association of Street and Electric Railway Employees of America. The application stated that approximately 250 employees were affected by this dispute and gave as the cause thereof the employees' unsuccessful attempts to open negotiations with the city for a renewal of the agreement which had been in existence for the past five years. In the course of correspondence exchanged between officials of the city and the Department of Labour the former signified a willingness to negotiate with the men regarding an agreement. The Department also instructed Mr. F. E. Harrison, its resident officer at Calgary, to proceed to Edmonton and use the good offices of the Department of Labour in an endeavour to effect a settlement of the matters at issue. Word was later received from Mr. Harrison to the effect that the negotiations between the parties concerned had resulted in an adjustment of most of the disputed points. In the meantime the Board application was held in abeyance.

An application for a Board of Conciliation and Investigation was received on September 4 from the motormen and conductors in the employ of the Quebec Railway, Light, Heat & Power Company, Limited, being members of the *Fraternité Nationale des Employés de Tramway de Québec*, to the number of 260 directly and 305 indirectly. It was stated in the application that the dispute grew out of the employees' demand for increased wages and improved working conditions.

On August 30 the employees concerned had gone out on strike but returned to work on the evening of the same day as a result of the parties agreeing to refer their differences to a Board under the Industrial Disputes Investigation Act.

A Board was established by the Minister on September 8. Messrs. J. L. Perron, K.C., of Montreal, and Hector

Laferté, of Quebec, were appointed members thereof on the recommendation of the employing company and the employees respectively, and on September 12 the Board was completed by the appointment as chairman of the Honourable Mr. Justice C. E. Dorion, of Quebec, this appointment being made on the joint recommendation of the foregoing members of the Board.

On September 5 an application for a Board of Conciliation and Investigation was received from the motormen and conductors employed by the Moose Jaw Electric Railway Company, members of Division No. 614 of the Amalgamated Association of Street and Electric Railway Employees of America, to the number of 36. The application stated that the dispute grew out of the employees' demand for an agreement with the company which would provide for increased wages, shorter hours, improved working conditions and recognition of the union.

The services of Mr. F. E. Harrison, the officer of the Department of Labour resident at Calgary, were utilized in an endeavour to have the parties come to some satisfactory arrangement. These efforts, however, proved unavailing, and on September 14 the Minister established a Board. The Board was later constituted as follows: Mr. J. H. Wellington, of Moose Jaw, chairman, appointed by the Minister in the absence of any joint recommendation from the other members of the Board; and Messrs. Jas. Thompson and Jas. Somerville, of Moose Jaw, appointed on the recommendation of the employing company and the employees respectively.

On September 19 an application for a Board was received from the maintenance-of-way men in the employ of the Canadian Pacific Railway Company, members of the International Brotherhood of Maintenance-of-Way Employees. The application gave as the cause of the dispute the employees' demand for the adoption by the company of a schedule of agreement providing for increased wages and improved working conditions,

copy of which was appended to the application. The number of employees affected was given as 6,000 directly and 17,000 indirectly. This application was under consideration by the Minister at the end of the month.

An application for the establishment of a Board of Conciliation and Investigation was received on September 27 on behalf of the conductors, motormen and other employees of the Sandwich, Windsor and Amherstburg Railway Company and the Windsor and Tecumseh Railway Company, members of the Amalgamated Association of Street and Electric Railway Employees of America, to the number of 150. Attached to the application was a proposed memorandum of agreement which had been submitted

to the company by the employees but not accepted by the company.

Reference was made in the September¹ issue of the *Labour Gazette* to an application from the federated shop trades of the Canadian Government Railways for the establishment of a Board of Conciliation and Investigation to deal with a dispute growing out of a proposed revision of the conditions governing the employment of these trades on the Canadian Government Railways System. The establishment of a Board was withheld at the employees' request to permit a continuance of negotiations between the employing interests and the workmen concerned.

¹See *Labour Gazette* for September, 1916, p. 1545.

REPORT OF BOARD IN DISPUTE BETWEEN THE ALGOMA CENTRAL AND HUDSON BAY RAILWAY COMPANY AND ITS CONDUCTORS, BAGGAGEMEN, BRAKEMEN AND YARDMEN

THE report was received in the Department of Labour on September 14 of the Board of Conciliation and Investigation which had been established on August 23 to deal with a dispute between the Algoma Central and Hudson Bay Railway Company and its conductors, baggagemen, brakemen and yardmen, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen. The report was signed by all three members of the Board and went to show that by conferences and counter propositions exchanged between the parties concerned, aided by the assistance and encouragement of the Board members, the matters involved in the above mentioned dispute were compromised and an agreement signed between the parties, covering rates of pay and rules to govern the employment of the conductors, baggagement, brakemen the conductors, baggagemen, brakemen September 1, 1916, and to continue in force until terminated by 30 days' notice in writing.

The application from the employees' representatives in the above matter for the establishment of a Board of Conciliation and Investigation was received in the Department of Labour on August 15 and was accompanied by a proposed schedule of agreement, providing for certain increases in pay and improved working conditions. The number of employees affected by the application was given as 45 directly and 150 indirectly.

The Board was constituted as follows: Mr. F. H. McGuigan, of Toronto, appointed on the recommendation of the employing company; Mr. D. Campbell, of Winnipeg, appointed on the recommendation of the employees, and His Honour Judge Colin G. Snider, of Hamilton, chairman, appointed on the recommendation of the foregoing members of the Board.

Before the Board entered upon its duties the conductors and brakemen ceased work on August 29 for some days on account of a disagreement with company officials regarding promised increases to the latter.

Report of Board

The text of the Board report in this matter is as follows:

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Algoma Central and Hudson Bay Railway (employer) and certain of its employees, being conductors, baggage-men, brakemen and yardmen (employees).

The Honourable
the Minister of Labour,
Ottawa.

Sir,—

We, the members of the Board of Conciliation appointed by you to investigate and if possible conciliate the parties in this dispute, met at Court Room No. 1 in the City Hall in Toronto on Thursday, the seventh day of September instant, and continued in session on the eighth, ninth and tenth days of this month. We were attended throughout by G. A. Montgomery, general manager of the A. C. and H. B. Railway; I. L. Godfrey, controller, and T. F. Rahilly, trainmaster, acting for the employer, and Thomas Booth, a conductor; J. A. Dent, chairman Trainmen's Union, and James Murdock, V.P., of the Brotherhood of Railway Trainmen, acting for the employees.

A full statement of the views of each side on the various rules proposed by the employees, and of the special conditions of this railway, financial and otherwise, and of the increase in wages demanded, was heard by us.

By conferences and counter-propositions on each disagreement as it arose and aided by such assistance and encouragement as the members of the Board were able to give, the differences were compromised and an agreement covering the whole subject was made and

signed in our presence and is returned herewith as part of this our report.

All of which is respectfully submitted."

(Sgd.) COLIN G. SNIDER,
Chairman.

(Sgd.) F. H. MCGUIGAN,
For the Company.

(Sgd.) D. CAMPBELL,
For the Employees.

Toronto, September 11, 1916.

Rates of Pay and Rules Governing the Employment of Conductors, Baggage-men, Brakemen and Yardmen on the Algoma Central and Hudson Bay Railway, Effective September 1, 1916.

ARTICLE "A."

The rates of pay in passenger train service shall be:

Conductors	2.60 cents per mile.
Baggagemen	1.50 cents per mile.
Brakemen	1.50 cents per mile.

With a minimum of \$3.12 between the Soo and Franz, or vice versa.

Overtime on a speed basis of 20 miles per hour. The first 30 minutes not to be counted.

ARTICLE "B."

The rates of pay in all freight and mixed train service (except otherwise specified) shall be:

Conductors	3.85 cents per mile.
Brakemen, senior . .	2.60 cents per mile.
Brakemen, junior . .	2.30 cents per mile.

ARTICLE "C."

The rates of pay for trainmen employed on the Michipicoten Branch shall be:

Conductors37 cents per hour.
 Brakemen, senior31 cents per hour.
 Brakemen, junior23 cents per hour.

(Ten hours or less to constitute a day's work.)

ARTICLE "D."

The rates of pay for yardmen shall be:

Conductors37 cents per hour.
 Brakemen, senior31 cents per hour.
 Brakemen, junior23 cents per hour.

(Ten hours or less to constitute a day's work.)

RULE 1.

In all freight and mixed train service, including pusher or helper service, 100 miles or less or 10 hours or less shall constitute a day's work.

On runs of 100 miles or less, overtime shall be paid for that time used in excess of the time necessary to complete the trip at an average speed of 10 miles per hour. The working time of trainmen shall begin at the time they are required to report for duty, and do so report, and shall continue until they are relieved from duty at the end of run. Overtime shall be computed for each employee on the basis of actual overtime worked, or held for duty, and be paid for at the rate of 10 miles per hour.

RULE 2.

Trainmen required to perform yardmen's work in any one yard where yardmen are regularly employed, in excess of two hours in any one day, will be paid at yardmen's rates per hour for the actual time occupied, and such time will be in addition to mileage or hours made on trip.

RULE 3.

In work, construction, snowplow or wrecking train service, trainmen shall be paid freight rates, 100 miles or less, 10 hours or less, shall constitute a day's work. Overtime computed on the basis

of actual overtime worked, or held for duty *pro rata*.

Trainmen while assigned to work train service will be paid a minimum of 100 miles for each working day exclusive of overtime previously earned.

When work trains run 40 miles or more to or from loading or unloading point they will be paid time or mileage, whichever amounts to the most in addition to actual time loading or unloading.

Trainmen on wrecking trains will be paid mileage to and from place of wreck, and work train rates per hour while working at wreck with a minimum of 100 miles for the combined service.

RULE 4.

Mileage or overtime will be paid for when trainmen are run one mile or more off the main track.

A minimum of one mile will be paid for plowing or flanging side tracks and three miles for a wye.

RULE 5.

Trainmen will be paid for work or wreck train service en route when time occupied exceeds one hour, and time so paid for will not be included in computing overtime.

RULE 6.

Trainmen deadheading or travelling passenger will be paid the same mileage as the corresponding men on train on which they travel and at the same rate.

Trainmen running with light engine or with engine and caboose will be paid full freight rates.

RULE 7.

Trainmen acting as pilots will be paid the same rate as conductor of train which he pilots.

When a pilot, as defined in the Operating Rules, is required, a competent man will be supplied in addition to the regular crew. A man unfamiliar with the physical characteristics of the road will not be required to go.

RULE 8.

Through freight rates per hour will be paid for time occupied in switching at terminals and turn-around points, not less than three of the train crew being used, except that in all freight and mixed train runs of less than 100 miles when the combined actual mileage, including overtime made and the time in terminal switching at 10 miles per hour exceeds the total time on duty, trainmen will only be paid for such excess time occupied in terminal switching at one-tenth of the daily rate per hour.

Example:—Crew comes on duty at 6.00 a.m., runs say 28 miles to turn around point, switches four hours, and returns to original point, and is relieved from duty at 4.00 p.m., has earned

Mileage 56 miles
Switching 40 miles

and will be paid for 100 miles. If on same run the time occupied in switching was six hours the crew has earned

Mileage 56 miles
Switching 60 miles

or 116 miles as a total.

RULE 9.

When trainmen come on duty and are not required they will be paid through freight rates with a minimum of 30 miles and will stand first out. Trainmen held for duty and not used, and their vans have been sent out, will be paid 100 miles for each 24 hours while they are waiting for the return of van.

RULE 10.

Freight crews will be run first in first out of the terminal on their respective sub-divisions.

When a deadhead crew is required the first crew out will be called to deadhead and will hold its turn out at the distant terminal.

Points on current time-table where one or more trains end are terminal points for such trains.

RULE 11.

When unassigned crews are available and are run around at terminals they will be paid 50 miles for each run around and hold their turn out.

RULE 12.

Trainmen held for train service after arrival of train at final terminal or end of run will be paid for time so held, provided minimum daily mileage or time has been exceeded.

RULE 13.

Time or mileage made in doubling or assisting other trains will be paid for at freight rates.

RULE 14.

Trainmen while shovelling coal for tenders en route will be paid 30 cents per hour, and this time will not be deducted in computing overtime.

Trainmen will not be required to do this work when sectionmen are available.

RULE 15.

Trainmen held off on company's business or on company's orders will be paid schedule rates for mileage or time lost and reasonable expenses when away from home.

Trainmen relieving yardmen will be paid at yardmen's rates.

RULE 16.

Trainmen will not be compelled to ride on snowplows or flangers, but will be supplied with a van or other suitable car properly equipped.

RULE 17.

Trainmen assigned to work train service will not be considered absent from the time work is through on Saturday night until the starting hour Monday, unless notified before being laid up on Saturday that they will be required.

Trainmen will be allowed to go home on Sunday if train service permits and their absence will not interfere with the work train service.

RULE 18.

The company will arrange its way freight service to avoid the handling of shed freight at night. Trains leaving terminals between 4 a.m. and noon will not be considered night trains.

Way freight trains will not be given greater tonnage than can be started from any point on ruling grades.

RULE 19.

Trainmen will be advised the reason and without unreasonable delay if mileage or time claimed is not allowed.

RULE 20.

Trainmen assigned to regular runs will not be considered absent from duty after arrival at final terminal at end of day's run, but if called for service will be given their turn out with unassigned crews.

Trainmen employed on regular runs will be allowed to go home for Sunday provided the regular train service permits.

RULE 21.

Except in case of wrecks, washouts, snow blockades preventing crews being returned to their home terminals, unassigned crews laid up at other than their home terminal longer than 18 hours (exclusive of Sunday) without being called for duty will be paid 10 miles per hour for the first 10 hours in each subsequent 24 hours thereafter, time to be computed from the time crews go off duty until one hour before the departure of the train on which they resume duty. When men book rest of their own accord the time so booked will not be included.

RULE 22.

No trainman shall be disciplined or dismissed without having a fair and impartial trial.

The accused may have his committee or fellow employee attend the hearing with him, and such hearing shall be held within three days, when the evidence against him will be stated.

If the decision in his case is not satisfactory an appeal may be made to a higher official within 10 days. The accused shall not be considered guilty until it has been so proven.

RULE 23.

When a trainman has been discharged or resigns he shall, as soon as possible, be paid and given a certificate stating his term of service and capacity in which employed.

RULE 24.

All passenger and mixed trains will have at least one train baggageman and one brakeman.

One brakeman or baggageman on each train must have at least six months' experience, and the same or another man must be acquainted with the road.

A conductor will not be required to take out an incompetent brakeman.

RULE 25.

Trainmen who have been on duty 12 hours or more will not be called again if they have booked rest on arrival, the men to be judges of their own conditions, and not less than eight hours' rest to be booked at any terminal.

RULE 26.

The number of crews regularly maintained in service shall be so arranged as to permit senior men to make reasonable mileage per month. Less than 2,600 miles per month will not be considered reasonable mileage. This will not apply to spare men.

RULE 27.

The superintendent will prepare seniority list and have same posted the first day of January and July in each year. Said list will be posted in a conspicuous place at all terminal registering points and employees whose standing is not correctly shown must protest in writing within 90 days or no action will thereafter be taken.

RULE 28.

Permanent vacancies or new runs created will be bulletined as far in advance as possible and will be given to the senior qualified man applying therefor. In the event of a reduction in staff the junior man will be reduced.

RULE 29.

Senior freight brakeman will be required to pass an examination for conductor in turn. Brakemen refusing promotion to conductor, or failing to qualify for the same within 30 days of the date set for their examination will thereafter rank junior as conductor to the men promoted in their stead.

RULE 30.

Trainmen will not be compelled to clean cars, light or extinguish lights, couple or uncouple hose bags on passenger trains or freight trains where car repairers or car cleaners are employed.

RULE 31.

Trainmen will call the attention of their immediately superior officer to any violation of the Articles in this Schedule, and if necessary refer the matter to the higher officials.

RULE 32.

Trainmen will not be compelled to handle cars the draft gear of which is defective and requires to be chained, further than to take a car of perishable freight or live stock that may become disabled en route to the first terminal. Under no circumstances will trainmen be compelled to handle cars behind van other than official cars or flangers.

RULE 33.

All way freight trains on main line handling more than one car of way freight shall have three brakemen in addition to the conductor. All other trains shall have at least one conductor and two brakemen.

RULE 34.

The company will at all times hire experienced men when available, but when experienced men are not available and it becomes necessary to hire inexperienced men, such men shall hold no rights for the first six months' service, after which they shall rank as brakemen from the date they enter the service.

RULE 35.

If a spare yardman is called for work when an older man is available who could have been called, the older man shall put in a time slip and will be paid for five hours and shall stand first out.

RULE 36.

Trainmen will not be punished in any way for serving on committees.

Trainmen will be given leave of absence when the service will permit and satisfactory reasons are given for such request, but the leave of absence will not exceed 30 days except in case of sickness of the employee or his family.

RULE 37.

All bulletins, circulars or other special instructions will be re-issued on the first days of January and July in each year. Bulletins not so re-issued will be regarded as annulled.

RULE 38.

Conductors having charge of trains and responsible therefor shall not be required to take out two inexperienced brakemen or a brakeman whom they prove to be incompetent.

No yard crews shall be required to work short-handed when men are available longer than two hours, and if no spare men are available they will not be required to work longer than one day or ten hours.

RULE 39.

Trainmen assigned to work train service and held away from home shall be allowed 10 hours for each calendar day

so held, Sundays excepted, except that when crews are held away from home more than one consecutive Sunday, they shall be allowed 10 hours' pay for each additional Sunday so held away from home.

RULE 40.

Yardmen will not be required to remain on duty over six hours without a meal, but if held longer they will first be allowed 30 minutes and will be paid for one hour. Opportunity will be afforded yardmen to eat their meals between 11.30 a.m. and 1 p.m. or between 11.30 p.m. and 1 a.m.

Train crews shall be allowed a reasonable time for meals, which under any circumstances should not exceed 30 minutes.

RULE 41.

Yardmen will not be required to work with an engine not properly equipped with grab irons and other safety appliances.

Road engines in yard service shall have their pilots removed and foot boards substituted, and foot boards will also be placed on the back of tender of such road engines within 24 hours after the time such engines are placed in yard service.

Yard crews shall not regularly be held longer than 12 hours on duty.

RULE 42.

When changes of division or runs are made requiring trainmen to change their place of residence, they shall be furnished free transportation for their household goods and the members of their family.

RULE 43.

The principle involved in certain Articles referring to trainmen in this Schedule shall be considered as applicable to yardmen even although yardmen are not specifically mentioned.

RULE 44.

This schedule of rates and rules for trainmen and yardmen will continue in effect until terminated by 30 days' notice in writing.

The foregoing rules and schedule of wages are agreed upon by the parties to the dispute.

For the Algoma Central and Hudson Bay Railway Company:

Chairman for B. of R. T.

REPORT OF ROYAL COMMISSION APPOINTED TO INVESTIGATE UNREST IN THE MINING INDUSTRY IN THE COBALT DISTRICT

THE Minister of Labour received on September 25 the report of a Royal Commission which had been appointed by Order in Council on August 28 to inquire into existing unrest in the mining industry in the Cobalt district and to make investigation "concerning relations between employers and employees in the said industry, with a view to making such recommendations as in their opinion may serve to promote ami-

cable relations between employers and employees and may be calculated to remove or lessen the friction now existing." The report of the Commission was signed by His Honour Emerson Coatsworth, chairman, Junior Judge of the County of York, and Mr. E. T. Cor-kill, of Copper Cliff, Ont., who had been appointed on behalf of the employing interests. The majority report was accompanied by a minority report from

Mr. Joseph Gibbons, of Toronto, Ont., who had been appointed on behalf of the employees.

The labour unrest in the Cobalt mining district has apparently existed since the early part of the present year and in the month of June an application was received by the Minister of Labour from the officers of Cobalt Miners' Union of the Western Federation of Miners for the establishment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act to deal with a demand on the mine workers' part for increased wage rates and the improvement of their conditions of employment. The application purported to be made on behalf of approximately 2,200 mine workers in the employ of 42 different mining companies. Reference to this application was made in the July¹ and September² issues of the *Labour Gazette*. Under the provisions of the Industrial Disputes Investigation Act it was impossible for the Minister to establish a single Board to deal with matters affecting 42 different companies without the consent of the employing as well as of the employed interests concerned. The employers' consent to this course was not given and under these circumstances the Board application was not proceeded with, the Royal Commission of Inquiry being, however, instead instituted under the provisions of the Inquiries Act. The terms of the Order in Council relative to the appointment of this Royal Commission will be found in the September³ issue of the *Labour Gazette*.

Causes of Unrest

The Royal Commission held in all 15 sittings in the town of Cobalt and one sitting in the town of Haileybury from August 31 onwards. Seventy-nine witnesses were produced and examined on behalf of the employees and eight witnesses on behalf of the mine owners and

that the men's grievances were limited to two, namely: a demand for increased wages and a demand that the employers should recognize and confer with a committee appointed by the men. The claim for increased wages was urged very strongly by the employees' witnesses and just as strongly resisted by the mine managers. An increase of 25 cents per day had been granted by the mining companies on May 1, 1916, to all of their underground workers and also to some of the surface workers, representing in all probably three-fourths of the total employees, numbering in the neighbourhood of 2,800 men. A bonus was also given at this time of another 25 cents per day to all employees when the price of silver should be 70 cents or upwards per ounce. The commissioners in their report have concluded that they are not prepared at the present time to recommend an increase in wage rates but expressed the view that the bonus should be based on silver at 65 cents an ounce instead of 70 cents "as this will more fully meet what the mine managers intended in the way of advantage to the employees."

On the question of recognition of the workmen's committee, the Royal Commission found that the employing interests had disregarded a request which had been made to them for a meeting in the month of May last as they had considered that such a meeting would constitute a recognition of the Western Federation of Miners which they desired to avoid. - The commissioners expressed the opinion "that in view of the fact that the committee in question consists entirely of local men, miners and mine workers, it would have been in the interests of all parties concerned to have conferred with the men as to the possibility of making any change in the rate of wages."

Mr. Gibbons' Minority Report

Mr. Joseph Gibbons, in his minority report, expresses the view that both the surface and underground employees should have received an increase of 50

¹See *Labour Gazette* for July, 1916, pp. 1360-1361.

²See *Labour Gazette* for Sept., 1916, pp. 1558-1559.

³See *Labour Gazette* for Sept., 1916, pp. 1558-1559. managers. The commissioners found

cents per day on account of the large increase which has taken place in the cost of living. With respect to the bonus, Mr. Gibbons pointed out that the men only received this bonus for one month when the price of silver fell below 70 cents. Judge Coatsworth and Mr. Corkill had recommended in their majority report that the bonus should be paid when silver is at 65 cents or over. Mr. Gibbons contends, however, in his report that the wage of the employee necessary for his maintenance should not be dependent upon the fluctuating price of any product, especially when that product has no bearing on the cost of living.

Text of Majority Report

The text of the report of Judge Coatsworth and Mr. E. T. Corkill in this matter is as follows:

To the Hon. T. W. Crothers, K.C., M.P.,
Minister of Labour,
Ottawa.

Report of Royal Commission consisting of Emerson Coatsworth, Junior Judge of the County Court of the County of York, in the Province of Ontario; Edward Thomas Corkill, of Copper Cliff, in the said province, Esquire, Safety Officer of the Canadian Copper Company, and Joseph Gibbons, Esquire, of the said City of Toronto, Business Agent for the Amalgamated Street and Electric Railway Employees of America, appointed to investigate the unrest in the mining industry at Cobalt, in the Province of Ontario, and the nature and causes thereof, the appointment of the said commissioners being dated the twenty-eighth day of August, A.D. 1916.

Meetings.

Your commissioners immediately upon their appointment arranged to meet in the Town Hall at Cobalt, Ontario, at 2 o'clock p.m. on the thirty-first day of August, 1916, and held 15 sittings

in the Town of Cobalt, and one sitting in the Town of Haileybury. Generally speaking, the meetings were held at 10 a.m. and 2 p.m., but on one occasion, in order to accommodate some of the witnesses, an evening sitting was held. At the first meeting held as above stated on the thirty-first day of August, Messrs. Davidson, Joyce and Gorman appeared as representatives for the employees of the mines. No person appearing on behalf of the employers, to represent them, your commissioners ordered that a notice be sent to each of the mine managers, between 35 and 40 in number, notifying them of the dates and hours of meetings, and inviting them to attend and hear the case presented on behalf of the men and to give such evidence as they thought fit in reply, and a further notice to all persons concerned was inserted by advertisement in the "Cobalt Daily Nugget" on the second, fifth, sixth and seventh days of September, notifying any person interested to attend the meetings and give evidence, or take such other part as they might see fit. No person, however, appeared for or on behalf of the employers or Mine Owners' Association until the seventh September, when Mr. Bateman, the general manager of the La Rose Mine, appeared and gave his evidence, and on the following day, by appointment, a number of the mine managers came forward and testified for your commissioners, giving their statements as to the right of the employees to have their demands recognized.

Grievances and Evidence.

There were in all 79 witnesses produced and examined on behalf of the employees and eight witnesses produced and examined on behalf of the mine owners and managers in reply.

With regard to the grievances of the men, they were limited to two; one, a demand for increased wages; two, a demand that the employers recognize and confer with a committee appointed by the men.

Your commissioners are very pleased to be able to report that so far as all other conditions of working in the mine are concerned the miners were united in expressing their satisfaction, and except for the two matters above specified, no complaints whatever were made, though one or two matters of small importance were brought forward by individuals, not affecting the miners generally.

As to the two matters brought forward on behalf of the miners, it is desirable to deal with them separately, giving the report of the investigation together with the evidence taken before the commissioners, and their opinion thereon.

Claim for Increased Wages.

The matter of increased wages was urged very strongly by all the witnesses brought before your commissioners on behalf of the employees, and just as strongly resisted by the mine managers. The agitation for increased wages began in the early part of the present year, 1916, and was based, as the employees claim, on the increased cost of living. The agitation began probably in March or April, 1916. The Local Union, called the Cobalt Miners' Union, No. 146, took the matter up and held several meetings. On the first day of May, 1916, the managers anticipated any action by granting an increase of 25 cents a day to all underground workers, and also some of the surface workers, representing in all probably three-quarters of the total employees, who would number in the neighbourhood of 2,800 men, and also giving a bonus of another 25 cents a day to all the employees when the price of silver should be 70 cents or upwards per ounce. The complaint of the men with regard to this was that the direct increase of 25 cents a day should be extended to the whole of the employees, because the lower paid men were the most needy, and it was they who did not receive the increase, and

also so far as the bonus was concerned, that the price of silver, on which it was based, was so high, that they have only since received the bonus for one or two months, and consequently, it has proved of trifling advantage to them. Very much evidence was brought forward by and on behalf of the men to prove the increased cost of living, particularly within the last two or three years, some complaining that the increase was as high as 30 per cent or 40 per cent and others running from 20 per cent to 30 per cent. The employers in their answer to this part of the claim of the employees admitted the increase in the cost of living, but claimed that from figures gathered by them from the reports of the Labour Department the increased cost of living for the last two or three years was only about 10 per cent, and this was adequately met by the increase made in wages and the bonus above mentioned. It will, therefore, be seen that the fact of the increased cost of living was not in dispute between the employers and the employees, but only the percentage of increase, and your commissioners are bound to say that the evidence adduced on both sides was very strong on behalf of the employees to show the increase up to 30 per cent, and of the employers keeping it down to about 10 per cent, and it is somewhat difficult in view of the conflicting evidence, to determine exactly what the percentage of the increased cost of living may be. The mine managers also claimed that the conditions under which they are operating and the prospects for the future are such as did not justify them in granting any further increase in wages.

Your commissioners, upon reviewing the whole of the evidence and the statements made to them, and weighing the same carefully, and having in mind all the conditions bearing upon the claim for increased wages, have concluded that they are not prepared at the present time to recommend an increase in the rate of wages, but they confirm what the mine managers have already done,

including the bonus to the employees, but in their opinion the bonus should be based on silver at 65 cents an ounce instead of silver at 70 cents an ounce, as this will more fully meet what the mine managers intended in the way of advantage to the employees.

Recognition of Committee.

The other grievance laid before your commissioners was that the mine managers refused to pay any attention to or hold a conference with the committee appointed for the purpose of interviewing them in regard to the matter of wages. The recent history of this matter is as follows: In the month of April the Local Union of Miners, which then consisted of between 400 and 500 miners and has gone up since the agitation to about 1,500 members, held several meetings to consider the question of the rate of wages and to take some steps to have them increased, and after holding two or three meetings on or about the fourteenth May, they called an open meeting in the Grand Theatre for all mine employees for the purpose of discussing the matter, and at this meeting there were present between 700 and 800 miners and other employees of the mines, and the matter of the demand for increased wages was fully and freely discussed, and a committee appointed to meet with and interview the mine managers, or the Mine Managers' Association, with a view to bringing about some satisfactory arrangement with regard to wages, and at this meeting the following were appointed as the committee: Joseph Gorman, Secretary of Local Union, chairman; Wesley Morrison, carpenter; Patrick Redmond, Assistant Secretary Local Union; J. M. Gillis, pipe-fitter; Lyman McFadden, blacksmith's helper, and James Wilson, mill-worker. A few days after the appointment of this committee, the following notification was sent to Mr. Robert Livermore, the President of the Mine Managers' Association, and also to each of the mine managers:

Cobalt Miners' Union, No. 146,
of the
Western Federation of Mines.

Cobalt, May 22, 1916.

Mr. Robert Livermore,
Manager, Kerr Lake Mining Company,
Cobalt.

Dear Sir,—

On behalf of the members of Cobalt Miners' Union, No. 146, W.F.M., we are writing you to request a conference at the earliest convenience between the Mine Managers' Association and a committee of the Miners' Union, to discuss and if possible to arrange an increase of wages for underground and surface men in this camp. We are writing you as President and Mr. Thompson as Secretary of the Mine Managers' Association. Hoping for an early reply, we are,

Yours truly,

(Sgd.) JOSEPH GORMAN,
Cobalt Miners' Union, No. 146, W.F.M.

Generally speaking, there was no answer made by any of the 35 or 40 mine managers, but two replies were received stating that the managers declined to have anything whatever to do with the Union. The matter remained in this position until your commissioners were appointed. When the employers came before your commissioners and were asked why they objected to a conference with the above committee, they stated their reason to be that they regarded this committee as a committee of the Western Federation of Miners, and that they objected to having anything to do with that Federation. They stated distinctly and positively that they had no objection whatever to meeting with their own men, and that in their judgment it was a perfectly proper thing for the miners and mine workers to organize, and their sole objection to meeting was as above stated, that they considered such a meeting would be a recognition

of the Western Federation of Miners, and this they desired to avoid. It should be pointed out that there was at this juncture evidently some misunderstanding because the committee above mentioned consisted of local miners and mine workers, and was apparently just such a committee as the mine managers were prepared to meet, and there was evidently misunderstanding of the nature and scope of this committee.

Your commissioners are, therefore, of the opinion that in view of the fact that the committee in question consists entirely of local men, miners and mine-workers, it would have been in the interest of all parties concerned to have conferred with the men as to the possibility of making any change in the rate of wages.

All of which is respectfully submitted.

(Sgd.) E. COATSWORTH,
Chairman.

(Sgd.) E. T. CORKILL.

Toronto, September 12, 1916.

Text of Minority Report

The text of the minority report of Mr. Joseph Gibbons in this matter is as follows:

To the Hon. Thomas W. Crothers,
Minister of Labour,
Ottawa, Ont.

I herewith submit to you my report as a member of the Royal Commission appointed to investigate the grievances of the mines in Cobalt district. I differ materially with my colleagues as you will perceive, and submit a minority report.

I am in accord with the report made

by the majority of the commissioners, His Honour Judge Coatsworth and E. T. C. Corkhill, Esq., as far as page 3, and ending with the words: "their opinion thereon." I am not in accord with their findings as expressed under the caption, claims for increased wages. I submit in place thereof the following:

The employees, both underground and surface, should have received an increase of 50 cents per day, owing to the large increase that has taken place in the cost of living since their present rate of wages established, and the fact that the large increase in the price of silver would have enabled the mine owners to have paid the increase and still have a larger profit than at former prices.

The employees claim that the cost of living has increased 30 to 40 per cent since their present standard of wages was fixed, and in support of their claim presented a cost of living for family of five, and also brought forward a number of the leading merchants of Cobalt, who submitted invoices in some cases as far back as 1908 (the time that the present rate of wages was established). A few comparisons might be interesting to the public: Beef, 1914, \$11 per hundred, now \$17 per hundred; pork, 1914, \$12 per hundred, now \$18. Canned and cured meats increased in proportion. Cheese, 1914, 14½ cents per pound, now 21 cents; butter, 28 cents, now 38 cents; lard, 13 cents, now 18 cents; sugar, 1914, \$4.50 per hundred, now \$7.85; flour, 1913, \$2.82, now \$4.20; beans, \$1.95 per bushel, now \$5.00; potatoes, \$1.00; now \$2.25. Invoices were also submitted showing that furniture, carpets, oil-cloths, etc., had increased 25 per cent; boots and shoes, 25 per cent, and woollens 40 per cent.

The mine managers admitted an increase, but contended the increase was only 10 per cent, citing figures from the *Labour Gazette* as their authority, and claimed that the 25 cents per day granted covered this increase.

I desire to point out here that the 25 cents per day increase was not given to the surface men, who are the low paid men, and consequently the most in need of the increase, as it takes as much to maintain the family of the man who works overground as it does to maintain the family of the man who works underground, and overground men are just as necessary for the carrying on of the work as the underground men.

The fact that the mine owners paid a

bonus of 25 cents per day to all men in addition to the 25 cents per day, making an increase of 50 cents for underground employees, demonstrates the fact that the 50 cents per day increase was a just request. The bonus was paid when silver was 70 cents per ounce or over. The men only received the bonus for one month when silver went below the 70 cent mark. The majority report recommends that the bonus be paid when silver is 65 cents or over. I contend that the wages of the employee necessary for his maintenance should not be dependent upon the fluctuating price of any product, especially when that product has no bearing on the cost of living.

(Sgd.) JOSEPH GIBBONS.

TRADE DISPUTES DURING SEPTEMBER, 1916

THERE were ten strikes in existence during September in which were involved approximately 124 employers and 857 employees. Three of these strikes commenced during the month, while seven began prior to September 1. In the three disputes commencing during September 102 firms and 352 employees were concerned, while 22 firms and 505 employees were involved in the seven old disputes. The ten disputes were accountable for time losses estimated at 5,517 working-days, 1,952 of which were occasioned by the three new disputes of the month, while the seven old strikes were responsible for an approximate loss of 3,555 working-days. Two disputes beginning before September 1 and two disputes beginning during September were terminated during the month. The settlement of these four dis-

putes was effected through negotiation between the parties concerned and in three cases resulted in favour of the employees, while in the other a compromise arrangement was affected. Six disputes remained unsettled at the end of September.

New disputes in September, 1916.—The table following indicates the trades affected by the three new disputes of the month:

TRADES	No. of disputes	No. of firms.	No. of employees.
Building	1	1	25
Metal	1	1	27
Miscellaneous Skilled Trades	1	100	300
Total.....	3	102	352

Disputes beginning before September

Two of the disputes commencing in August were settled during September. As stated previously, the termination in both cases was brought about by negotiations, the employees benefitting by the result. These disputes are:

Linemen, Vancouver, B.C. — On August 24, 1916, fifty-five linemen and groundmen, members of Local No. 213, International Brotherhood of Electrical Workers of America, in the employ of the British Columbia Electric Railway Company, went on strike owing to the refusal of the company to recognize the union officials for the purpose of discussing and arranging a new schedule of wages and working conditions. Recognition of the Electrical Workers' Union was brought about through the threatened action of the Street Railwaymen's Union. The dispute was settled on September 19 following conferences between representatives of the company and the Electrical Workers' Union resulting in the company granting the employees a new agreement and wage scale providing for increased wages.

Cigarmakers, London, Ont. — On August 29, about 350 cigarmakers in the employ of five cigar manufacturing concerns, namely, John McNee & Sons, McLeod, Nolan & Company, Geo. E. Coleman, J. J. Dyer and Vallens & Company, Limited, went on strike to enforce their demand for an increased scale of wages. The four first mentioned firms

above granted in part the demands of their employees, but Vallens & Company ceased negotiations with their employees with the intention of operating an "open-shop" establishment. The cigarmakers employed by the firms with which a settlement had been made had all resumed work on September 6.

Disputes beginning during September

Machinists, Hubalta, Alta.—Twenty-seven employees of the Buckeye Machine Company, Limited, at Hubalta, Alta., ceased work on September 1 owing to the employment of unskilled workers on certain machine work. The employees returned to work on September 9, following a compromise arrangement.

Journeyman barbers, Montreal, Que.—On September 11, about 300 journeymen barbers employed in 100 barber shops at Montreal, Que., went on strike demanding a new agreement with the master barbers. The strike terminated on September 16, the master barbers acceding to the demands of their employees, which will result in earlier closing of shops on week days and Saturdays.

Structural iron workers, Hamilton, Ont.—On September 5, 25 structural iron workers in the employ of the Hamilton Bridge Works Company, Limited, at Hamilton, Ont., went on strike to enforce their demand for a nine-hour day. The strike was unsettled at the end of September.

TABLE OF TRADE DISPUTES IN EXISTENCE DURING SEPTEMBER, 1916.

Occupation	Locality	Alleged Cause or Object	Number affected		Date of Commencement	Date of Termination	Method of Settlement	Result

REPORTS OF EMPLOYMENT BUREAUS

DURING August there was an increase of 23 per cent in the demand for workers as compared with July, as shown by reports from 122 employment bureaus—90 commercial, 10 public and 22 philanthropic. The number of vacancies notified to all offices was 59,647, a daily average of 2,235.15 as compared with 1,825.61 in July. The number of persons placed was 29,415 a daily average of 1,124.26 as compared with 762.84 in the preceding month. The proportion of the total vacancies filled to the total vacancies notified was 49.32 per cent as compared with 41.46 in July. As to employment for women and girl workers the number of vacancies notified was 9,713, a daily average of 362.84 as compared with 382.73 in July. The number of such workers placed was 3,387, a daily average of 126.53 as compared with 133.14 for the previous month. The proportion of vacancies filled to vacancies notified for men and boys was 52.4 per cent and for women and girls 34.87 per cent as compared with 46.3 and 37.6 per cent respectively for July.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver,—Toronto only showed a decreased in the demand for workers. Winnipeg and Vancouver showed the largest gains. Noticeably larger demands were also recorded in Saskatoon, Edmonton and Ottawa. Victoria showed a slight decrease.

The number of persons who obtained casual employment through the Salvation Army, Young Women's Christian Association, and other agencies was 1,456, a daily average of 53.93 as compared with 49.65 in July. The number

of casual jobs secured was 3,418, a daily average of 126.59 as compared with 126.62 in the preceding month.

EMPLOYMENT FOR CIVIC EMPLOYEES IN EIGHT CITIES.

THE Department has been trying to arrive at some measurement of the volume of employment afforded by the larger city corporations in Canada and to ascertain to what extent civic employment is seasonal. The officials in twelve of the larger cities were communicated with by letter and they were also interviewed by correspondents of the *Labour Gazette*. They were requested to give monthly the number of employees temporarily employed and the amount of wages paid to these workers in the first fortnight of the month. The correspondents of the *Labour Gazette* were also instructed to secure the same information with regard to the employees of contractors on civic work. Employees temporarily employed were

the only class included in the inquiry as employment for such civic employees as policemen and firemen who are on a permanent basis fluctuates but slightly. Already returns have been received from nine cities but in one case the information was not sufficiently definite to be included. It is hoped that the Department will soon be able to secure returns from all of the twelve cities.

The statements received are summarized in the following table. It appears that employment on civic works has been decreasing in volume since July as indicated both by the number of employees temporarily employed and the amount of wages paid such employees in the first fortnight of the month.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY EIGHT CITY CORPORATIONS, JULY-SEPTEMBER, 1916.

CITY.	No. of employees temporarily employed in first fortnight in:			Amount of wages paid employees temporarily employed in first fortnight in:

(1) Contract work not included.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed a decrease in September as compared with the preceding month, the total value of building permits falling from \$4,321,601 in August to \$3,422,658 in September, a decrease of \$898,943 or 20.8 per cent. Grouping the returns by provinces, Nova Scotia, Manitoba, Saskatchewan and Alberta showed increases, the value of permits rising 178.51; 5.09; 18.33 and 67.98 per cent respectively in these provinces. As compared with the corresponding month of last year building permits in September showed the very consider-

able increase of \$882,624 or 34.75 per cent, the value for September, 1915, being \$2,540,034. As compared with September of last year there were gains in all provinces except New Brunswick, Quebec and Manitoba. In British Columbia and Saskatchewan increases of 592.99 per cent and 802.45 per cent were indicated, while Nova Scotia showed a gain of 103.99 per cent. Of the larger cities Montreal showed a decrease both in comparison with August, 1916, and with September, 1915; Winnipeg showed an increase of 41.85 per cent as compared with August and a decrease of 20.27 per cent as compared with September

of last year. Toronto and Vancouver showed increases of 24.0 per cent and 833.51 per cent respectively over September, 1915; both these cities, however, showed decreases as compared with last month's returns.

MIGRATION AND SETTLEMENT

NEITHER the British Board of Trade nor the Canadian immigration officials have resumed the issuing of monthly statements in regard to immigration, and the only information available deals with the movement of persons, not U. S. citizens, between that country and Canada. Of persons other than citizens of the United States 1,436 left the United States in August to take up permanent residence in British North America as compared with 1,682 in July. On the other hand 8,728 such persons (departed citizens of the United States) departed from British North America in August to take up permanent residence in the United States as compared with 7,725 in July, indicating for British North America an outward balance of 7,292 in August of this class of persons as compared with an outward balance of 6,043 in July.

Homestead Entries and Land Patents

Homestead entries.—During the month of August, 1916, there were 198 homestead entries in Manitoba; 382 in Saskatchewan; 488 in Alberta, and 16 in British Columbia, a total of 1,084 as compared with a total of 1,398 in July, 1916, and 1,549 in August, 1915.

Lands patented.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory for the month of August, 1916, the number of patents was 1,428 and the number of acres 232,021.54, as compared with 892 patents and 136,523.63 acres during July, and 1,101 patents and 174,081.74 acres for August, 1915.

PRICES, RETAIL AND WHOLESALE, IN CANADA, SEPTEMBER, 1916 AND IN OTHER COUNTRIES

THE rise in prices of many lines of foods continued during the month, although there were recessions in some lines of meats, with a decline in sugar, while dairy products, breadstuffs and potatoes continued upward. In materials, metals appeared to have reached the bottom of the decline and slight advances occurred in several lines. Cotton was also advancing considerably, though wool was easier.

In retail prices the cost of a family budget of staple foods averaged \$8.97 in 60 cities as compared with \$8.63 in August, \$7.74 in September, 1915, and \$7.83 in September, 1914. There were slight advances in nearly all the lines, but the principal increases appeared in potatoes, eggs, butter, cheese, bread and flour. Coal and wood also advanced in

the average. As compared with September in 1915 and 1914 prices were higher in all lines, except rolled oats and coffee. Rent averaged nearly the same as a year ago but 50 cents per week lower than in 1914, there being decreases in Nova Scotia, Ontario and the Western Provinces, with slight increases in the other provinces.

In wholesale prices the Department's index number advanced for the first time since May, reaching 180.7 for September, as compared with 178.5 for August, 150.3 for September, 1915, 141.3 for September, 1914, and 134.4 for September, 1913. In May the index number had reached 180.9, but decreases in materials, especially in metals and chemicals, had caused gradual recessions until August. Advances in grains and fod-

f. Natural gas used. g. Lignite. h. Calculated from the price per 100 lbs. i. Including \$1.00 per ton for delivery.

der, dairy produce, fish, miscellaneous foods, metals, fuel and house furnishings caused the increase for September, but there were some decreases in animals and meats. As compared with the same month in previous years all groups were higher.

The accompanying tables give details as to the prices movement during the month and as compared with the same month in previous years. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities in Canada having a population of 10,000 or over. Quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for six-roomed houses in districts inhabited by workingmen.

Retail Prices

In meats, decreases appeared in a number of cities, especially in roast beef, veal and mutton, but in pork and bacon several advances occurred. Sirloin steak was not reported higher in any city and round steak was higher only in Sorel, Que. Rib roast and medium shoulder roast advanced at New Westminster, B. C. Fresh pork was lower in St. John, N.B., and Montreal, Que. Canned salmon was higher in a number of cities. Lard also advanced. Supplies of beef and mutton were reported larger as the grazing season came to an end and stock was put on the market. Fresh fish was reported very scarce, and the catch of salmon for canning was also short.

There was a general advance in eggs throughout the country, also in butter and cheese. Milk advanced during the month in 11 cities east of Winnipeg. The dry season, poor pasture, short crop of roots and corn, together with the good export demand for cheese, were reported as the chief factors in the advance. In eggs a large export trade was reported.

Bread advanced in 18 cities throughout the Dominion, while there was a general advance in flour. The higher costs

of materials for bread, especially flour, due to the short crops of wheat, were reported as the causes. Rolled oats was also advancing on account of the short crop. Rice and tapioca advanced in several cities.

Canned tomatoes, peas and corn advanced in a number of cities through the Dominion, as a result of short crops and small pack. Beans continued to advance.

Sugar declined in a number of cities following declines in wholesale prices in which a large beet sugar crop in United States was an important factor.

Potatoes declined in several cities as the new crops came on the market, supplies from New Brunswick being plentiful though prices were still comparatively high.

Coal, both bituminous and anthracite, advanced in a number of cities. Higher prices at the mines, higher freight rates, wages and cost of cartage were reported as the causes. Wood advanced at Port Arthur and Fort William and the higher price was reported due to better conditions on the local labour market. At Brandon wood was dearer as a result of labour shortage and short stores on account of heavy snows last winter, which prevented the getting out of supplies.

Rent.—An advance occurred at Brockville, Ont., as there were very few vacant houses.

Wholesale Prices

Grains and fodders.—Manitoba wheat had fallen back to \$1.50 per bushel at the end of August, but rose steadily to the middle of September, and after a slight recession of 5 cents advanced further to \$1.66 $\frac{3}{4}$ in the last week of September. Ontario winter wheat had fallen to \$1.19-1.21 for the new crop, No. 2, winter, and rose each week to \$1.40-1.42. Short crops in different countries and unfavourable reports as to the crop in Argentina were the chief factors in the advances, together with speculation and other factors, such as the entry of Roumania into the war and the buying of

*Five commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915. †Revised.

wheat for export from time to time. Barley rose from 80c to 90c a bushel at Winnipeg and also at Toronto. Western oats rose to 55c per bushel and Ontario oats also reached that figure. American corn advanced to 98c per bushel, but eased off slightly. Flaxseed was also higher at \$1.97. Ontario peas reached as high as \$2.25 per bushel and rye was up to \$1.20. Hay was steady at Toronto, but straw was \$1.00 higher. Bran and shorts advanced \$2.00 per ton to \$26.00 and \$29.00 respectively.

Animals and meats.—Western butcher cattle receded somewhat in the early part of the month but were firmer again at \$7.25 per cwt. At Toronto choice butcher steers reached \$8.80 per cwt., but eased off somewhat with heavy receipts. Dressed beef also eased off, hind-quarters being down to \$14-15 per cwt., and forequarters down to \$9-10 per cwt. The latter, however, advanced 50c per cwt. in the last week. Plate beef rose to \$22.50-23.00 per barrel. Hogs were down to \$11.15 per cwt. at country points in Ontario, but rose to \$11.65 in the third week. Dressed hogs had receded slightly but advanced to \$16.50-17.00 per cwt. for the best. Bacon and hams were firm and upward. Sheep eased off to \$6.50-8.00 but later advanced and declined again. Dressed lamb was down to \$16.00-19.00 per cwt. Fowl was lower at 16c per lb. with good receipts on the market, and turkeys, old stock, also declined.

Dairy produce.—Butter continued the advance it had begun early in August, the price rising 1c per lb. each week during September, as had occurred also in August. Creamery solids were 36-37c in the last week at Toronto and 36¾-37c at Montreal. Dairy prints similarly advanced to 27-35c. Cheese continued to advance, with fluctuations, and reached 21c per lb. The wholesale prices of milk in various cities were higher than in previous years for the winter season on account of crop shortage. At Montreal 25c per gallon was the price set as compared with 24c last year. At Toronto \$2.00 per 8-gallon can was set as

compared with an average of \$1.65 last winter. Fresh eggs rose to 45c per dozen at Montreal and 42-43c at Toronto. Storage eggs came on the market at Toronto at 36c per dozen for No. 1. A year ago the price was 26-27c.

Fish.—Prices advanced in nearly all lines owing to scarcity. Canned salmon was put on the market at higher prices for the new pack owing to a short run, higher prices paid to fishermen for fish, and also greater cost for materials. Sockeye salmon was up to \$9.00 per case of four dozen 1 lb. talls as compared with \$8.25 last year. Cohoe salmon was \$6.50 per case as compared with \$4.75, and pinks \$3.90 as compared with \$3.25. Fresh whitefish was up to 15c per lb. at Toronto and lake trout up to 12c. Fresh halibut rose to 11c per lb. at Canso, N.S. Dried cod rose from 6½c per lb. to 7c and dried haddock from 4½c to 5c per lb. Salt mackerel rose from 7c to 8c per lb. The catch of the Lunenburg bank fleet was reported better than expected and averaged about 1,600 quintals per vessel as compared with 1,100 quintals last year. The number of vessels, however, was reported at about 75, as compared with 106 a year ago. The total summer catch was therefore estimated at 120,000 quintals as compared with 109,000 quintals last year. The price for bank fish was up to \$7.50 per quintal, and was expected in some quarters to advance. The catch on the Gaspé coast was reported to be only half or three-quarters of an average. The Labrador catch was said to be larger, but the Newfoundland shore catch was about the same as last year. The Porto Rico market was rather dull owing to supplies from the United States. Other West Indies markets were better and the Southern Brazil market was good. The catch of herring was reported small. Fall mackerel were very scarce.

Fruits and vegetables.—Early fall apples were on at \$3.50 per barrel at Toronto as compared with \$2.50-3.50 last year. Grapes were down to 17½-20c per basket at the end of the month, as compared with 20-25c a year before.

Peaches declined to 35-65c per basket, about the same price as last year, but were higher in the month than last year, and the market was expected to be still higher later. Pears were down to 20-30c per basket, but rose to 35-50c in the last week as compared with 25-45c last year. Plums fell to 20-30c as compared with 30-50c a year before. Bananas advanced to 1.75-2.25 per bunch, as compared with \$1.25-1.75 a year before. Lemons were down to \$7.00 per box, as compared with \$3.50-4.00 a year before. Oranges declined to \$4.00-5.75 as compared with \$5.00-6.00 per box a year ago. Evaporated apples were slightly higher than a year ago at 8½-9c per lb. Currants advanced again, reaching 16¾-17½c per lb. as compared with 10½-11½c last year. Prunes were lower at 8c per lb., as compared with 9-9½c last year. California Valencia raisins were down to 9c per lb., European varieties being off the market. Potatoes came on the market at Montreal, Green Mountains from New Brunswick being down to \$1.40-1.45 per bag, as compared with 60c per bag last year, owing to the short crops, particularly in Ontario. At Toronto, Ontario potatoes were selling at \$2.10-2.20 per bag as compared with 75-80c last year. Beans were still high at \$5.50 per bushel owing to the short crop. Canadian onions came on at 2c per lb., the same price as a year ago. Tomatoes were down to 20-25c per basket at Toronto the first week of the month, but reached 35-50c in the last week. Canned corn advanced to \$1.15 per dozen and canned tomatoes reached \$1.40. The pack in all lines of fruits and vegetables was reported to be short.

Miscellaneous groceries.—In flour a further advance of 50c per barrel occurred and the market was still firm owing to the high price of wheat. Manitoba first patents reached \$8.80 per barrel at Toronto and winter wheat patents reached \$7.70. Bread advanced in a number of cities. At Victoria, B.C., the weight of the loaf was reduced again, the pound loaf now being down to 12 ounces. Oatmeal rose to \$3.40 per bag

of 98 lbs., and rolled oats to \$3.12 per bag of 90 lbs. Coffee was higher at 20-21c per lb. for Rio. Tea was also rising on the primary markets. In sugar another decline occurred, granulated being down to \$7.50 per cwt. in barrels at Toronto. A light demand and heavy crop of beet sugar in United States were reported as factors in the decline. Molasses rose from 54c to 62c per gallon as the Barbados output had been sold. Glucose advanced in sympathy with the price of corn. Honey was lower slightly at 11-11½c per lb. Maple sugar rose somewhat steeply to 12-13c per lb., owing to purchases of large supplies by United States buyers.

Textiles.—Ontario washed wool was slightly easier at 43-46c per lb. The prices were still higher than a year ago when 39-43c was the level. Raw cotton advanced nearly 1½c per lb., being up to 15.6c as compared with 9.75c last year, as a result of a short crop. Coloured cottons averaged higher. Japan raw silk was slightly lower, but Italian raw silk was steady. Jute and hessians were steady as the British Government took over the supply. Table and floor oil-cloth advanced about 5 per cent.

Hides, leather, boots and shoes.—Leather markets were still strong owing to the scarcity. Harness leather advanced to 59c per lb., and sole leather was reported 2c per lb. higher.

Metals and implements.—There were no further declines in metals, but advances occurred in antimony, copper, lead, silver, tin and zinc. Some lines of semi-manufactured iron goods were higher, such as black sheets and boiler plates, but wrought iron, old material, was \$1.00 per ton lower. Axes advanced again to \$7.75-10.50 per dozen. Grindstones rose to \$1.60 per cwt.

Fuel and lighting.—Anthracite coal advanced 10c per ton, to \$6.95 at Montreal. In the Crow's Nest Pass district prices for coal and coke were higher owing to higher wages and the increased cost of supplies. Connellsville coke was slightly higher at the ovens. Gasoline

and coal oil were down 1c per gallon. Matches rose to \$6.00 per gross.

Building materials.—New Brunswick spruce deals rose to \$20.00 per M, the market being firmer as a result of purchases by the British Government. The lumber markets in Ontario were somewhat firmer owing to a demand from farmers and short supplies in some lines. Black iron pipe, sash cord and hinges were higher, but sash weights and barbed wire fencing were lower. Linseed oil and benzine were lower, but prepared paints advanced 10c per gallon. Window glass was also higher.

House furnishings.—Prices of wooden furniture have been rising for some time owing to the scarcity of skilled labour and higher prices for glass and for metal trimmings. Advances averaged about 10 per cent. Tank glass tumblers rose about 1½c per dozen owing to the higher cost of glass, due to the higher price of soda ash and higher wages. Celluloid handled knives were off the market.

Drugs and chemicals.—Soda ash rose from 3½c to 4c per lb.

Miscellaneous.—English hops were 1c per lb. lower at 31-35c. Malt rose 10c per bushel to \$1.20. Newsprint paper eased off to \$2.25-2.40, but advanced again. Pulp and paper markets were very firm and still further advances were expected. Wrapping paper, No. 1, Manilla, rose to 7-8c per lb. Ground wood pulp was up to \$24.00 per ton. Bleached sulphite pulp rose from \$150 to \$165 per ton. Raw rubber rose 3c to 61-62c per lb.

Prices in Other Countries

The accompanying table shows the prices movement in other countries as indicated by index numbers of prices, retail and wholesale, available for recent dates and for some years back.

For the United Kingdom the Board of Trade Labour Gazette reported retail food prices on September 1, 4 per cent higher than on August 1, as butter, bread, flour and bacon had increased from 5 per cent to 10 per cent, and fish,

cheese, sugar and milk were slightly higher. Eggs were up 19 per cent and potatoes declined as steeply, these movements being largely seasonal.

In wholesale prices in the United Kingdom the index numbers of the *Statist* and the *Economist* at the end of August showed advances, after declines in June and July. The rises were principally in foods, but textiles were raised chiefly by cotton, and minerals by lead.

At Berlin, Germany, prices of foods in July were only slightly higher than in June, as shown in the calculations from figures in the Prussian official journal *Statistische Korrespondenz*, published in the British Labour Gazette. The average advance over July, 1914, was, however, 117.6 per cent. The only noteworthy rise in recent months appeared in beef, while eggs declined. All the articles included in the calculation, however, had been brought under the system of rationing at fixed prices, while the quality of bread and flour was greatly inferior to that obtaining in peace time.

In Italy, slight decreases in food prices occurred in June as shown in the Journal of the Italian Department of Labour, the only increase appearing in milk.

In Denmark, the Statistical Department has published returns showing prices of family supplies 35.9 per cent higher in July, 1916, than in July, 1914, foods being 45.9 per cent higher, clothing, boots and washing 60 per cent, fuel and lighting 75 per cent.

In Switzerland, retail food prices in June, 1916, were 40.6 per cent higher than in June, 1914, while other necessities had risen 29 per cent, as shown by the calculations published in the Journal of the Swiss League for Reducing the Cost of Living.

In the United States, prices of food in July averaged the same level as in June, beef and potatoes being down, but pork, lard, eggs and beans advanced.

The advance in wholesale prices in the United States as shown by *Bradstreet's* index number for Sept. 1 was described as follows in the issue of September 16:

INDEX NUMBERS OF PRICES IN CANADA, THE UNITED KINGDOM AND CERTAIN OTHER COUNTRIES.

a. July of each year.

b. Foods.

c. 1901=1030.

* Quarter beginning that month.

A world-wide upward sweep occurred in commodity prices during August, and, of course, this country participated in the procession. In England price levels are the highest ever known, and in that respect the United States keeps the older country company. In England the propelling factor is the war, whereas with us a combination of circumstances influence the advancing process. We are supplying a large part of the world's needs, the United States being the one leading, ever open, free market for the neutrals as well as the belligerents.

Another important factor is the deterioration in wheat and other crop yields, while the high price of raw cotton is still another, and about the first of the current month embargoes on railway freight because of fears of strikes by operating employees caused hurried calls for merchandise, thus raising some commodities to high marks. Of course, the

increased wage rates paid tend to advance costs, but as both levels seem to be pursuing a somewhat similar direction, and as the country is enjoying prosperity, loud complaints are not heard. Indeed, it makes little difference whether one tests quotations of wheat or flour, livestock, beef, mutton, milk, eggs or cheese, cotton or gingham, the trends on essentials are practically alike—that is, upward.

Speaking statistically, *Bradstreet's* index number as of September 1 last, \$11,7853, establishes a new high record, one that represents an advance of 3 per cent over August 1, while bringing to a sharp stop the slight downward movements that had been in progress during the four months prior to September 1. The current level is a fraction of 1 per cent higher than the previous high mark, \$11,7598, touched on April 1 last and discloses increases of 20 per cent over September 1, 1915 and 1914.

FAIR WAGES CONTRACTS, SEPTEMBER, 1916

THE Department of Labour received during September for insertion in the *Labour Gazette* five fair wage contracts, four of which were awarded by the Department of Public Works and one by the Department of the Naval Service. Of the four contracts awarded by the Department of Public Works, one contained a fair wage schedule and three the fair wage clauses. The contract awarded by the Department of the Naval Service contained a fair wage schedule. The fair wage clauses provides for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the Regulations for the Suppression of the Sweating System.

Fair Wages Clauses

This contract is made subject to the regulations made by Order in Council dated the third day of March, 1906, under and by virtue of the Public Works (Health Act), 1899.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and, if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like rights in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract, and the amounts so paid shall be deemed payments to the contractor.

The contracts containing the above clauses follow:

DEPARTMENT OF PUBLIC WORKS.

Alterations to heating plant, central post office, Montreal, Que. Name of contractor, Thos. O'Connell, Montreal, Que. Date of contract, August 22, 1916. Amount, \$10,527.

Supply and delivery of 200 four-cap drawer metallic vertical filing cabinets for public buildings generally, Ottawa, Ont. Name of contractor, Office

Specialty Manufacturing Company, Limited, Ottawa, Ont. Date of contract, September 5, 1916. Amount, \$8,630 and \$4.85 extra per cabinet for locking device and \$3 extra per drawer for substituting document, etc., and \$1.75 extra per cabinet for enamelling in different colours.

Dredging, St. Maurice River, Que. Name of contractor, La Cie Générale d'Entreprises Publiques, Levis, Que. Date of contract, September 27, 1916. Contract price, .09 cents per cubic yard (scow measure).

POST OFFICE DEPARTMENT.

During the month of August payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages and the performance of the work under proper sanitary conditions.

RECENT INDUSTRIAL AGREEMENTS

Employees in Mechanical and Car Departments on Western Lines of Canadian Pacific Railway

AN agreement was made between the Canadian Pacific Railway Company and Federated Trades governing employment in the mechanical and car departments on the Western Lines, to be effective from July 1, 1916 to April 30, 1917, and from year to year thereafter unless thirty days' notice is given prior to that date in any year. The general rules are for the most part the same as in the previous agreement, but the duties of the various classes of trades are more fully defined. Coremakers were abolished as a separate class, but it was provided that moulders must have served an apprenticeship or had four years' varied experience in moulding and core-making. The rates of pay were increased by about five per cent.

British Columbia Electric Railway Company and Employees

An Agreement was made between the British Columbia Electric Railway Company and the Amalgamated Association of Street and Electric Railway Employees of America, supplementing the one dated September 1, 1915. It was provided that the agreement should terminate on June 30, 1918, or six months after the end of the war, whichever date comes first.

The following rates of wages are substituted for the previous rates, the change dating from September 16:

(a) Motormen and conductors on city and suburban lines.

First year.....	27c.
Second year.....	29c.
Third year.....	31c.
Fourth year.....	33c.
After fourth year.....	35c.

(b) Motormen and conductors in work train service shall received 1½ cents per hour in addition.

(c) On interurban lines.

First year.....	28½c.
Second year.....	30½c.
Third year.....	32½c.
Fourth year.....	34½c.
After fourth year.....	36½c.

(d) Brakemen, trolley men and baggage men.

First six months.....	27c.
Second six months.....	28c.
Second year.....	29c.
Third year.....	30c.
Fourth year and after.....	31c.

(e) Shop and barn employees.

Car cleaners.....	28c.
Motor car repairers, amature winders' helpers, blacksmiths' helpers, carpenters' helpers, machinists' helpers and sawyers.	
First year.....	27c.
Second year.....	29c.
Third year.....	31c.
Fourth year.....	33c.
After fourth year.....	35c.
Freight car repairers.....	30c.
Freight car repairers' helpers.....	27c.
Freight car inspectors.....	33c.
Painters.....	43c.
Freight car and rough painters.....	29½c.
Brush hands.....	27c.
Carpenters.....	43c.
Freight car carpenters.....	35c.
Machinists.....	46c.
Babbiter.....	36½c.
Trolley retriever repairer.....	38c.
Blacksmiths.....	46c.
Car wiremen.....	40c.
Air brake fitters.....	40c.
Armature winders:	
First class.....	46c.
Second class.....	43c.
Third class.....	40c.
Leading hand while so acting to receive 3 cents extra per hour.	
Apprentices:	
First year.....	17c.
Second year.....	20c.
Third year.....	24c.
Fourth year.....	30c.

(f) Freight shed department.

Checkers.....	30c.
Truckers.....	28c.

(g) Maintenance-of-way men.

Track maintenance men:	
First nine months.....	27c.
After nine months.....	29c.
Track greasers.....	29c.

(h) Meter men.

House meter installers, testers and cleaners:	
First year.....	31c.
Second year.....	33c.
Third year and after.....	35c.

Meter installers driving autos to receive 1c extra per hour.	
Meter installers-high tension.....	40c.
Meter repairers:	
First class.....	42c.
Second class:	
First year.....	31c.
Second year.....	33c.
Third year and after.....	35c.

(i) Employees paid monthly.

Baggage room men (Vancouver).....	\$85.
Baggage room men (New Westminster)....	75.
Teamsters.....	70.
Interlocking tower men.....	65.
Are lamp repair men.....	85.

Outside carpenters:

Bridge and building masters maintenance gang,	
43c. per hour.	

A number of changes in working conditions were made at the request of the men. The practice followed by the Canadian Pacific Railway with regard to lost property was adopted. Passes on Vancouver or Westminster City lines were granted to trackmen on District No. Two, and the Company promised to issue a reasonable number of passes over District Three and the Saanich Line for week-ends and holidays.

The following clause was added with regard to track maintenance men:

"In the event of day gangs being required to do night work for a period of two nights or less, they shall not on that account be compelled to lose a day prior to the commencement of that night work, and they shall be paid overtime rates for the two nights.

When a day gang is required to work three nights or more in succession, it shall be considered to have been transferred to night work for the time being, but shall be paid at overtime rates for the first night's work.

Provided that the foregoing shall not apply to extra men taken on for emergency work in connection with snow trouble."

British Columbia Electric Railway Company and Electrical Workers

On September 16, an agreement was entered into between the British Columbia Electric Railway Company, with

which were associated the Vancouver Power Company and subordinate companies, and the International Brotherhood of Electrical Workers. The agreement is to be in force until June 30, 1918, or until the expiration of six months after the end of the war, whichever date shall arrive first, and thereafter unless terminated by thirty days' notice in writing.

The terms of the agreement are as follows:

The company recognizes the International Brotherhood of Electrical Workers, and agrees to employ only members of the International Brotherhood of Electrical Workers for the various classes of work hereinafter mentioned, except Substation Operators and Trimmers, and will not discriminate against any Substation Operator or Trimmer who is or shall become a member of the International Brotherhood of Electrical Workers, and the International Brotherhood of Electrical Workers will not in any way interfere with or limit the right of the company to discharge or discipline an employee, where sufficient cause can be shown, except for being a member of the International Brotherhood of Electrical Workers.

WORKING RULES AND SCHEDULE OF WAGES.

These rules shall apply only to employees listed in Section 14, and shall be posted for the information and government of all employees.

Hours of Work.

Section 1.

(a) Eight hours shall constitute a day's work. Ordinary working hours, 8 a.m. to 12 noon and 1 p.m. to 5 p.m.

(b) Employees to go from storeroom to storeroom and camp to camp on company's time.

(c) Men detailed on jobs out of the city limits will return to the city limits on company's time, or the company provide meals, either alternative to be at the company's option.

(d) Employees held waiting orders four hours or less shall be paid four hours; for over four hours shall be paid eight hours, except when relieved due to their own request or fault. The foregoing shall not apply when weather conditions prevent work being done.

Overtime.

Section 2.

(a) Overtime computed at double time of standard rate will be paid for all time worked at other than the employee's regular assigned hours, and shall continue (excepting intermission for meals) until the employee is relieved from duty. Employees being relieved from duty shall be relieved for at least a period of eight hours, except when employees report for work between four o'clock a.m. and eight o'clock a.m. and such overtime does not equal eight regular working hours, employees will be allowed to work the following eight hours at straight time.

(b) All work done on holidays will be computed at double time of standard rate.

Holidays.

Section 3.

(a) Holidays shall be as follows: Sundays, New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day and Saturday Afternoons.

(b) When any of the above holidays fall on Sunday, the following Monday shall be considered a holiday.

(c) Employees entitled to vote shall be allowed time to vote, with pay, voting hours for the employees to be designated by the Superintendent in charge. Election days are in no case to be considered holidays.

Board and Lodging.

Section 4.

(a) Expenses of board and lodging will be allowed all foremen when sent away from headquarters.

(b) Expenses of board and lodging will be allowed all lead cable splicers and helpers when sent away from headquarters.

(c) All other employees detailed for work away from headquarters upon a temporary job will be allowed expenses of board and lodging. Twenty days will be considered a temporary job; more than twenty days will be considered a permanent job, for which no board and lodging expenses will be allowed. All employees shall be notified before being sent away whether the work shall be classified as a temporary or permanent job. If classified as a temporary job and the work exceeds twenty days, board and lodging will be provided until the return to headquarters. If classified as a permanent job, and a return to headquarters (except in case of dismissal or resignation) is made in less than twenty calendar days, board and lodging will be allowed. Headquarters will be considered where men are actually engaged for work.

(d) Where employees affected by the schedule desire that their board and lodging will be paid by the company, or where working conditions compel the company to provide board and lodging, the rate will be \$1.00 per day less than the schedule below, except in the case of foremen and temporary jobs. This applies to out of town work only.

Transportation.

Section 5.

(a) The company will furnish to all employees affected by this schedule all necessary transportation.

(b) Employees affected by this schedule resigning from work while away from headquarters will not be allowed transportation to headquarters. Should the completion of the work render the services of the employees no longer necessary, transportation to headquarters, or an amount equivalent to the cost of such transportation will be allowed.

Payment of Wages.

Section 6.

(a) Employees shall be paid semi-monthly, payment to be made on the morning of the 24th of the month for wages up to and including the 15th of the current month, and on the morning of the 1st of the month for wages due up to and including the last day of the preceding month. Employees away from headquarters to be paid semi-monthly, not later than two days after those at headquarters.

(b) Employees dismissed while away from headquarters must be paid in full all wages due them. Should lack of sufficient funds prevent this, transportation must be allowed to the point where payment will be made.

Classification.

Section 7.

(a) *Foreman*.—An employee having charge of more than three journeymen or apprentices or more than twelve labourers. All foremen shall have at least three years' experience in one or all branches of the trade.

(b) *Sub-Foreman or Head Gangman*.—An employee having charge of not more than three men, who may be journeymen, apprentices, groundmen or truck drivers, or a combination of such classes, or an employee assisting a foreman in the direction of men affected by this schedule.

(c) In no case shall a foreman be permitted to handle tools or do that class of work which is required of a journeyman while employed in the capacity of a foreman.

(d) *Journeyman*.—An employee who has had three years' experience in one or all branches of the trade as listed herein:—Linemen, cable splicers and jointers, station wiremen, repairmen, inspectors and troubleshooters.

(e) *Apprentices*.—An employee who has not had three years' experience in one or all of the foregoing branches of the trade, and he shall be an employee who is actually engaged in performing work and handling tools in the particular branch of the trade in which he is employed and as specified hereafter. All apprentices must serve three years actual time in the business before they can be rated as journeymen.

(f) During the last twelve months of their apprenticeship apprentices will be expected to perform the same class of work as journeymen.

(g) Except when journeymen are not to be obtained the ratio of apprentices to journeymen for each classification specified shall not exceed one to four. In branches employing less than four journeymen, one apprentice will be allowed.

(h) Apprentices shall not be allowed to work on high voltage wires, except during the last six months of their apprenticeship.

(i) Cable splicers shall at no time be allowed to work unless attended by a helper. When working in the vicinity of high voltage wires cable splicers' helpers shall be journeymen linemen. All joining, splicing and terminating of lead covered cable shall be under the jurisdiction of cable splicers.

High Voltage.

Section 8.

(a) All wires carrying a voltage of 675 volts or over shall be classed as high voltage wires.

(b) When work is being done on high voltage wires two journeymen must be assigned to the job, and are not allowed to work on two different wires at the same time.

(c) In station work two journeymen are required to work on wire carrying a voltage of 675 volts or more.

(d) In case of trouble on high voltage wires or where work is hazardous, two or more journeymen must be sent out to repair trouble. If only one man is available he may be sent out to watch until another man can be obtained and the first man may cut the wire to clear it.

High Poles.

Section 9.

Working on poles, timbers, bridges, towers or fixtures of an elevation of 95 feet or over, time to be computed at two times the standard rate as per schedule.

Auto Drivers.

Section 10.

Men driving auto wagons shall not be classified as foremen. Men driving automobiles shall receive one hour extra per day at standard rate.

Trouble Work.

Section 11.

(a) Employees called out on emergency work or trouble shall receive not less than four hours pay, computed at straight rate.

(b) If required by the company, not more than two men in each of the company districts, to work Saturday afternoons on straight time for trouble only; men to work in turn.

(c) Troublemakers on trolley and electric light work, working shift work, will be paid at straight time for any eight consecutive hours out of the twenty-four hours for trouble only.

(d) Emergency crews to work on trouble only.

Sub-Station Operators.

Section 12.

(a) Stations shall be graded as follows:

<i>First-class</i> —	All power houses. Vancouver sub-station. Rock Bay sub-station.
<i>Second-class</i> —	New Westminster Sub-Station. Burnaby " " Point Grey " " North Vancouver " " Horne-Payne " " Haro Street " " Earls Road " "
<i>Third-class</i> —	Tod Inlet (Victoria). F. V. sub-station. Lulu Island sub-station. Portable sub-stations.

(b) In all first-class sub-stations the shift will be worked by what is known as the "revolving watch," with an operator and floorman on each shift.

(c) Senior operators shall have not less than three years' experience.

Junior operators shall be operators with less than three years' experience.

Junior operators after they have had three years' experience shall be classed as senior operators.

(d) Operators shall be entitled to two days off each month and two weeks vacation annually, with pay.

General.

Section 13.

(a) At least three journeymen linemen will be used in all and every gang pulling in underground cable and in erecting poles or structures taking the place of poles.

(b) Linemen to have jurisdiction over assembling and erecting of towers, framing and setting poles.

(c) Nothing herein shall be construed to reduce the pay of an employee now getting a higher rate of pay.

(d) Any committee of employees or grievances from the local union affected will be given a hearing. Business agents or other officials of the union may accompany such committee.

(e) On new buildings, other than those controlled by the company, station construction wiremen or linemen, when doing work chargeable to a customer which would otherwise be done by outside contractors, shall receive not less than the minimum wage fixed by the International Brotherhood of Electrical Workers for those classes of work in the locality in which the work is being done.

Rates of Pay.

Section 14.

(a) Foreman.....	\$5.25 per day.
Sub-foreman.....	4.75 "
Journymen.....	4.50 "
Station wiremen.....	4.50 "
Repairmen.....	4.50 "
Troublemakers.....	4.50 "
Inspectors.....	4.50 "
Lead covered cable foreman.....	6.40 "
Cable splicers.....	5.50 "
Groundmen.....	3.15 "
Apprentices, begin.....	3.00 "
" after 6 months.....	3.25 "
" " 12 ".....	3.65 "
" " 18 ".....	4.00 "
" " 24 ".....	4.25 "
" " 36 ".....	4.50 "
Foremen patrolmen.....	5.25 "
Patrolmen.....	4.50 "

Patrolmen to be provided with proper transportation.

(b) Sub-station operators.

Senior operators—

First-class stations.....	\$114.00 per month
Second-class stations.....	105.00 "
Third-class stations.....	£5.00 "

Junior operators—

First-class stations.

First year.....	92.50 "
Second year.....	£7.50 "
Third year.....	114.00 "

Second-class stations—

First year.....	87.00 "
Second year.....	£2.50 "
Third year.....	105.00 "

Third - class stations—

First year.....	80.00 "
Second year.....	87.00 "
Third year.....	£5.00 "

Load dispatchers..... 125.00 "

Oilers at power houses..... 73.00 "

Floormen: First-class..... 70.00 "

" Second-class..... 65.00 "

Trimmers: First year..... 70.00 "

" Second year..... 75.00 "

" Third year..... 85.00 "

British Columbia Telephone Company and Employees

On September 8, an agreement was signed by the British Columbia Telephone Company and the International Brotherhood of Electrical Workers through the Pacific District Council No. 1 of the Third District. During the negotiations Mr. McNiven of the Department of Labour was in close touch with both parties and was called in on several occasions to consult with company and union officials in an advisory capacity. This is the first occasion on which a signed agreement has been executed by this company and the union. The chief features of the agreement were the restoration of the rates of wages prevailing in 1912-13, the scale having been reduced 25 cents (and in some cases 44 cents) per day after the outbreak of war: the granting of the Saturday half-holiday, and the privilege of going to and from work during the winter on the company's time. The agreement is to be in force for one year from September 1, 1916, and thereafter unless terminated by ninety days' notice in writing. The following are the terms of the agreement with regard to conditions of labour and wages:

WORKING RULES AND SCHEDULE OF WAGES.

These rules shall be posted for the information and guidance of all employees:

Hours of Work.

Section 1.

(a) Eight hours shall constitute a day's work in city exchange and the ordinary working hours shall be from 8 a.m. to 12 a.m. and from 1 p.m. to 5 p.m.

(b) Employees working on the eight-hour basis shall go to and from point of work on their own time within the established city limits, except that from November 1 to April 1, employees to go two ways on company's time, reporting at such storerooms, main or branch offices, as the company may designate from time to time.

(c) Nine hours shall constitute a day's work in suburban exchanges, or on toll, suburban or farmers' lines, working hours to be from 7 a.m. to 12 a.m. and from 1 p.m. to 5 p.m. Employees to go to and from point of work on the company's time.

(d) Men detailed on jobs out of the city limits will return to the city limits on company's time, or the company provide meals, either alternative to be at the company's option.

(e) Shift hours shall be those that the demands of the service require to be filled regularly and an assignment to shift hours shall not be for less than 20 days, except in the case of temporary relief of a permanent shift employee on account of illness or accident, when overtime will apply to the first shift relief only, when the employee relieving has already worked eight hours.

(f) Shift hours are to be any eight consecutive hours (except intermission for meals) of the 24 and such hours on Sundays and holidays as the service requires.

(g) Where employees request, on account of working conditions or seasons, a change in the ordinary or shift hours, such change to be made for not less than one month's time, and upon the approval of their immediate supervisor.

(h) Employees held waiting orders four hours or less shall be paid for four hours; for over four hours shall be paid for eight hours, except when relieved due to their own request or fault. Employees whose assignment of work requires them to report in person at the office on Sundays or holidays shall receive not less than two hours' time, and employees called for duty outside of regular hours shall receive not less than two hours' time computed at double time of standard rate.

Overtime.

Section 2.

(a) Overtime shall be computed on the basis of eight hours per day and at the standard rate the employee is entitled to in Section 11.

(b) Overtime computed at double time of standard rate will be paid for all time worked at other than the employee's regular assigned hours, and when following the regularly assigned hours shall continue (excepting intermission for meals) until the employee is relieved from duty.

(c) An employee called for work before 5 a.m. shall be entitled to overtime until relieved from work (except intermission for meals); after 5 a.m. and before 8 a.m. he shall be entitled to overtime until 8 a.m.; after 8 a.m. straight time only will be allowed.

(d) All overtime worked on Sundays and holidays will be computed at double time of standard rate. Overtime when travelling away from headquarters will be computed as follows:

(e) Time when travelling, when the accommodation of a berth on days other than holidays shall be paid the straight time rate for all time spent travelling, except intermission for meals and sleep.

(f) Time when travelling without the accommodation of a berth on days other than holidays shall be computed at double time of standard rate, except intermission for meals, and excepting regular working hours, (8 a.m. to 12 a.m. and 1 p.m. to 5 p.m.) which shall be paid for at straight time rate.

(g) Sleeping intermission shall be from 10 p.m. to 6 a.m. If, when travelling under Paragraph "f" train or boat arrivals or departures are such as to include any time 10 p.m. and 6 p.m., such time shall be computed at double time of standard rate; one hour at double time to be added to the actual time so included.

(h) Time travelling on Sundays and holidays to be paid for at double time of standard rate (except intermission for meals and sleeping).

Holidays.

Section 3.

(a) Holidays shall be only as follows: New Year's Day, Good Friday, Victoria Day, Dominion Day, Labour Day, Thanksgiving, Christmas Day and Saturday afternoons.

(b) Saturday afternoons shall be considered as shift hours for such positions as the demands of the service require to be filled constantly, including, when deemed necessary by the company, one troubleman in each of the larger exchanges, and straight time only shall be paid for such hours. Assignment of men to Saturday afternoon shift hours shall be made, as far as possible, so that every employee shall be off duty at least three Saturday afternoons out of every four. All time worked other than shift time, as defined above, shall be paid at double time of standard rate, in accordance with Section 2.

(c) When any of the above holidays fall on Sunday the following Monday shall be considered a holiday.

(d) Employees entitled to vote shall be allowed time to vote, with pay, voting hours for the employees to be designated by the supervisor in charge. Election days are in case to be considered as holidays.

Board and Lodging.

Section 4.

(a) Expense of board and lodging will be allowed all foremen, cable splicers, apprentice cable splicers and cable splicers' helpers, when sent away from headquarters.

(b) The expense of board and lodging will be allowed all head gangmen when sent away from headquarters when head gangmen are in direct charge

of a gang and not working under the immediate supervision of a foreman.

(c) All other employees detailed for work away from headquarters upon temporary jobs will be allowed expense of board and lodging. Twenty calendar days will be considered a temporary job. More than twenty days will be considered a permanent job, for which no board and lodging expense will be allowed. Employees shall be notified before being sent away whether the work will be classified as temporary or permanent job. If classified as a temporary job and work exceeds 20 calendar days, board and lodging will be allowed until return to headquarters. If classified as a permanent job and a return to headquarters (except in case of dismissal or resignation) is made in less than 20 days, board and lodging will be allowed.

(d) Where employees affected by this schedule desire that their board and lodging shall be paid by the company or where working conditions compel the company to provide board and lodging, the rate will be one dollar (\$1.00) less per day than schedule below, except in the case of temporary jobs, where the rate specified will prevail, and except as provided for foreman, head gangman, cable splicers, etc., in Section 4, paragraphs "a" and "b."

Transportation.

Section 5.

(a) The company will furnish all means of transportation.

(b) Where carfare during working hours is deemed necessary by the company, same shall be advanced to the employees, and where transportation is considered necessary by the company, beyond the 5 cent limit, the company will advance the same to employees affected by this schedule.

(c) Employees affected by this schedule resigning or dismissed from work while away from headquarters will not be allowed transportation to headquarters. Should the completion of the work render the service of employees no longer necessary, transportation to headquarters, or, at the company's option, the equivalent amount such transportation would cost the company, will be allowed.

Payments.

Section 6.

(a) Employees shall be paid by cheque semi-monthly, payment to be made on the twentieth of the month for all wages due up to and including the fifteenth of the current month, and on the fifth of the month for wages due up to and including the last day of the preceding month.

(b) Employees discharged while in the field must be paid in full for all time due them. Should lack of sufficient funds prevent this, transportation must be allowed to the point where payment will be made.

Classification.

Section 7.

(a) Foreman: An employee having charge of more than three journeymen or apprentices or more than twelve labourers.

(b) Head gangman: An employee having charge of three or less journeymen or apprentices or twelve or less labourers, or an employee assisting a foreman in the direction of men affected by this schedule.

(c) In no case shall a foreman be permitted to handle tools or do that class of work which is required of a journeyman while employed in the capacity of a foreman.

(d) Journeyman: An employee who has had three years' experience in one or all branches of the trade as listed herein: lineman, cable splicer, switchboardman, installer, cable tester, repairman, troublemen, inspector and repeaterman. All rackmen, powermen, battery men and testboardmen shall be rated as switchboardmen.

(e) Apprentices: An employee who has not had three years' experience in one or all of the foregoing branches of the trade, and he shall be an employee who is actually engaged in performing work and handling tools in the particular branch of the trade in which he is employed and as specified hereafter. All apprentices must serve three years' actual time in the business before they can be rated as journeymen.

(f) During the last twelve months of their apprenticeship apprentices will be expected to perform the same class of work as journeymen.

(g) Except where journeymen are not to be obtained the ratio of apprentices to journeymen for each classification specified shall not exceed one to four. In exchanges employing less than four journeymen, one apprentice will be allowed.

(h) Cable splicers' helper: An employee assisting a cable splicer or galvanometerman. During the first six months of service they shall not be required to do any work upon poles, aerial cables, or other like structures.

Auto Drivers.

Section 8.

Men driving auto wagons shall not be classified as foremen. Men driving automobiles shall receive one hour extra per day at standard rate.

Section 9.

(a) All pole framing, painting and stepping of poles shall be done by linemen.

(b) All pole setting gangs shall have three journey-men linemen.

(c) All cable pulling gangs shall have three jour-ney-men linemen or cable splicers assisting same.

(d) The splicing and connecting of lead armoured cable, to and including their respective terminals, shall be done by cable splicers. This shall not be construed to include lead armoured cable between the main frame and switchboard, nor linemen, in-spectors or installers testing cable after cable repairs have been connected to terminals by the cable splicer.

Wire Chief.

Section 10.

Wire chief: An employee having charge of or directing work in an office or offices employing jour-ney-men, as specified in Section 11.

A wire chief shall be considered as a working foreman and be capable of handling tools and doing that class of work required of journeymen switch-boardmen, when the demands of the service require such work.

Wire chief "Class B": An employee having charge of an office or offices employing regularly three or less journeymen or apprentices shall be paid a monthly rate equal to or in excess of a head gangman—\$180.00.

Wire chief "Class A": An employee having charge of an office or offices employing regularly more than three journeymen or apprentices shall be paid a monthly rate equal to or in excess of a foreman—\$150.00.

Rate of Pay.

Section 11.

Foreman	\$5.50
Head gangman	4.75
Cable splicer	5.00
Linemen	4.25
Switchboardmen	4.25
Installers	4.25
Cable testers	4.25
Repairmen	4.25
Troublemn	4.25
Inspectors	4.25
Repeatermen	4.25

	3	18	24	27	36
Apprentices	Beginns.	Mo.	Mo.	Mo.	Mo.
	\$	\$	\$	\$	\$
Linemen.....	3.00		3.25	3.50	4.25

Repairmen.....	3.00		3.25	3.50	4.25
Groundmen.....			\$3.00		

General.

Section 12.

(a) Exchanges having 100 or more telephones are designated as city exchanges.

Less than 100 telephones, suburban exchanges.

(b) Headquarters shall be considered as the point where men are actually engaged for work.

(c) While it is presumed that wire chiefs, foremen, etc., to obtain economical results, will assign employees to work to which they have been trained, there is nothing in these rules which means that employees shall do only the class of work for which they have been employed, nor that certain classes of work shall be performed by only certain classes of men. Should, however, an employee be assigned to work which pays a higher rate than that for which he is employed, he shall be paid the schedule rate for such work while he is engaged upon it.

(d) Nothing herein shall be construed as affecting conditions or wages of isolated repairmen where eight consecutive hours are not required.

(e) Nothing herein shall be construed to reduce the rate of pay of any employee now getting a higher rate of pay for work classified in Section 11.

(f) No discrimination against employees of this company on account of any affiliation or relations they may or may not have will be permitted. Managers, wire chiefs, foremen, etc., must take every precaution to see that this is not violated.

(g) Any committee of employees or grievance from the local union affected will be given a hearing. Business agents or other officials of the union may accompany such committee.

(h) No deviations from these rules will be permitted.

(i) No rate of pay in excess of the amount listed will be allowed except upon the proper approval of the general superintendent of plant.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1916

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Department of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the Inspector of Factories of Ontario, Ontario Railway and Municipal Board, the Bureau of Labour of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

The following is a record of the accidents of the month by industries and groups of trades:

STATEMENT OF ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry	Killed	Injured	Total
Agriculture.....	9	16	25
Lumbering.....	3	1	4
Mining.....	4	18	22
Railway Construction.....	1	1	1
Building Trades.....	18	37	55
Metal Trades.....	7	155	162
Woodworking Trades.....		9	9
Printing and Allied Trades.....		2	2
Textile.....		2	2
Food and Tobacco Preparation.....	1	3	4
Leather.....	1	1	2
<i>Transportation:—</i>			
Steam Railway Service...	11	76	87
Electric Railway Service...		7	7
Navigation.....	1	5	6
Miscellaneous.....	4	28	32
Public Employees.....		6	6
Miscellaneous Skilled Trades	5	38	43
Unskilled Labour.....	2	10	12
Total.....	66	415	481

THE industrial accident record for September shows there to have been 66 workpeople killed and 415 seriously injured during their respective employments. The record for August was 78 killed and 389 injured, while that for September, 1915, was 70 killed and 438 injured. A comparison of the above figures for the periods indicated shows that there were 12 fewer workpeople killed and 26 more injured during September than during August and there were four less killed and 23 less injured in September this year than in September a year ago.

The most regrettable accident of the month occurred on September 11, when, owing to the collapse of the centre span of the new Quebec bridge which was being placed in position, 13 workmen were killed and 10 seriously injured.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING SEPTEMBER, 1916.

Trade or Industry.	Locality.	Date	Number.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Guelph, Ont.....	Sept. 5	1	Crushed by falling chimney.
".....	East Zorra, Ont.....	" 6	1	Fell from hay mow.
".....	Harrow, Ont.....	" 16	1	Gored by a bull.
".....	Jarvis, Ont.....	" 4	1	Thrown from manure spreader.
".....	Speedville, Ont.....	" 9	1	Mangled by threshing machine.
".....	Syphers Cove, N.B.....	" 2	1	"
".....	St. Paul, Man.....	" 27	1	Fell from loft ladder.
Farmhand.....	Stratford, Ont.....	" 6	1	Struck by flying circular wood saw.
Farmhand.....	Galt, Ont.....	" 21	1	Mangled by gasoline machine.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING SEPTEMBER, 1916—Continued.

Trade or Industry.	Locality.	Date	Number	Cause of Fatality.
Lumbering—				
Sawmill engineer.....	Sapperton, B. C.....	Sept. 3	1	Burned—Sawdust in fuel bin ignited from boilers.
Sawmill engineer.....	St. Elphège, Que.....	" 25	1	Clothing caught in circular saw.
Logger.....	Hotham Sound, B.C.....	" 25	1	Struck by end of broken cable.
Mines, Metalliferous Works & Quarries:				
Miner.....	Allan Mine, N. S.....	" 25	1	Fall of coal.
Quarry worker.....	Chateau Richer, Que.....	" 20	1	Buried under blasted rocks and earth.
Miner.....	Comox, B. C.....	" 11	1	Fall of rock.
Miner.....	Greenwood, B. C.....	" 12	1	Crushed by mine car.
Building Trades—				
Structural steel worker.....	Thorold, Ont.....	" 9	1	Crushed by falling girder.
Structural steel worker.....	Timmins, Ont.....	" 6	1	Fell from scaffold.
Structural steel workers (Bridgemen)	Quebec, Que.....	" 11	13	Fall of centre span of Quebec bridge.
Cement workers.....	Chatham, Ont.....	" 30	3	Fall—Collapse of chimney on which they were working.
Metal, Engineering and Shipbuilding Trades—				
Machinist.....	Toronto, Ont.....	" 2	1	Fell from a ladder.
Steel worker.....	Hamilton, Ont.....	" 13	1	Crushed between car of steel and projecting girder.
Steel worker.....	Lauson, Que.....	" 6	1	By a fall.
Electrician.....	Hamilton, Ont.....	" 1	1	Burned by electricity.
Power house employee.....	Hochelaga, Que.....	" 29	1	Electrocuted.
Stationary fireman.....	Regina, Sask.....	" 20	1	Fell into automatic stoker.
Lineman.....	Niagara Falls, Ont.....	" 29	1	Electrocuted.
Food, Tobacco and Liquor Preparation:				
Biscuit factory employee.....	Woodstock, Ont.....	" 9	1	Crushed by elevator.
Leather—				
Tannery employee.....	Quebec, Que.....	" 18	1	Drowned—Fell into tank of liquid lime.
Steam Railway Service—				
Engineer.....	Redditt, Ont.....	" 5	1	Derailment.
Brakeman.....	Dorval, Que.....	" 21	1	Struck by a train.
Brakeman.....	Darmody, Sask.....	" 9	1	Run over by cars.
Brakeman.....	Actonville, Que.....	" 13	1	" "
Brakeman.....	Sutherland, Sask.....	" 8	1	Fell from and run over by cars.
Brakeman.....	Premier, Sask.....	" 9	1	Derailment of motor car.
Car repairer.....	Sherbrooke, Que.....	" 4	1	Run over by cars.
Car cleaner.....	Winnipeg, Man.....	" 24	1	Run over by locomotive.
Section foreman.....	Tilbury, Ont.....	" 20	1	Struck by a train.
Sectionman.....	Applehill, Ont.....	" 9	1	Struck by a train.
Sectionman.....	Farnham, Que.....	" 21	1	Struck by a train.
Navigation—				
Sailor.....	Vancouver, B. C.....	" 27	1	Asphyxiated by sulphur fumes.
Miscellaneous Transport—				
Driver.....	Hamilton, Ont.....	" 20	1	Fell from wagon.
Driver.....	Brockville, Ont.....	" 25	1	Run over by wagon.
Stableman.....	Sarnia, Ont.....	" 24	1	Trampled by a horse.
Grain handler.....	Port Arthur, Ont.....	" 29	1	Smothered by grain in hold of vessel.
Miscellaneous Skilled Trades—				
Pulp and paper mill employee.....	Hull, Que.....	" 1	1	Struck by flying piece of pulp wood.
Messenger boy.....	Vancouver, B. C.....	" 1	1	Struck by a motor (jitney) car.
Shorehouse employee.....	"	" 14	1	Fell down elevator shaft.
Cement plant employee.....	Longue Point, Que.....	" 1	1	Crushed by falling machinery.
Cement plant employee.....	Soo Inlet, B. C.....	" 25	1	Electrocuted.
Unskilled Labour—				
Labourer.....	Hamilton, Ont.....	" 14	1	Struck by broken belt on stone crusher.
Labourer.....	Sherbrooke, Que.....	" 27	1	Cave-in of sides of excavation.

**TRADES AND LABOUR CONGRESS OF CANADA—PROCEEDINGS OF THE
THIRTY-SECOND ANNUAL CONVENTION, HELD AT TORONTO,
SEPT. 25 TO 30**

THE thirty-second annual convention of the Trades and Labour Congress of Canada was opened in Toronto, Ont., on Monday morning, September 25, 1916, the business of the Congress not concluding until midnight of Saturday, the thirtieth. The opening ceremony was preceded by a procession of the delegates from the Prince George Hotel to the Toronto Technical School, where the preliminary session was held, and which was presided over by Mr. Walter Brown, chairman of the local convention committee. The remaining sessions were held in the Labour Temple. Hon. Finlay MacDiarmid, Minister of Public Works and Acting Premier of Ontario, extended the welcome of the Ontario Government. His Worship Mayor Thomas Church welcomed the delegates on behalf of the city of Toronto, while Mr. Wm. Houston, chairman of the Board of Education, and Mr. David Carey, chairman of the Separate School Board, and a former President of the Congress, extended a welcome on behalf of their respective bodies. The greetings of organized labour of the city were given by Mr. J. Richards, President of the Toronto District Trades and Labour Council. The addresses were replied to by the President, Mr. J. C. Watters. Others who contributed to the opening exercises were Miss Mary Anderson, of Chicago, Ill., fraternal delegate from the National Women's Trade Union League of America; Mr. Harry P. Corcoran, of Wheeling, W. Va., fraternal delegate from the American Federation of Labour; Mr. J. E. Williams, of London, Eng., fraternal delegate from the British Trades Union Congress; Mr. P. M. Draper, and Mr. Alex. Watchman, Secretary and Vice-President respectively of the Congress.

The final report of the Credential Committee showed that there were 288 delegates in attendance, three of which were fraternal; 26 international organizations were represented by as many delegates; one provincial federation was also represented; 26 trades and labour councils had 45 delegates, and 131 local branch unions were represented by 213 delegates.

Reports Presented

The following is a synopsis of the reports of the Executive Council, the parliamentary representative, the provincial executive committees, provincial federations and fraternal delegates.

REPORT OF EXECUTIVE COUNCIL.

The first clause dealt with the memorial to the Federal Cabinet in reference to wages boards, immigration, amendments to Industrial Disputes Investigation Act, extension of half day off for postmen, and the abolition of the patronage system in the appointment of postmen.

(2) Under the caption of "The War," the Executive Council re-affirmed the declaration of the convention of 1915 in which it was stated that it was the duty of the labour world to lend every assistance possible to Great Britain and her allies. . . . It was the desire of the Congress to co-operate with all the great labour bodies of America and Europe in bringing about the proposed peace conference, and the Congress should have representatives in such convention.

(3) In reference to conscription the Executive recommended that a protest should be made against its introduction.

(4) The Executive had urged the Government to undertake the manufacture of munitions in Government-owned

shops. The position of the Government and the arguments of the Executive were given.

(5) Extension of the scope of the Industrial Disputes Investigation Act to cover the manufacture of war supplies. This had been done to meet the demands which had been made for the establishment of a fair wages board to determine the rates of wages, etc., on work undertaken for both the Imperial and Dominion Governments.

(6) In reference to conditions after the war, and as a means of partially solving the problem or of at least ameliorating conditions, the Executive Council suggested the following: (a) the nationalization of railways, mines and other public utilities; (b) the building of an extensive system of highways; (c) the adoption of a policy for land settlement which will provide sufficient aid to guarantee the settlement on the land of those adapted to, or adaptable for, farming, and that such policy provide for close settlement so that social amenities be enjoyed to the greatest possible extent; (d) shortening of the work-day to provide for the employment of every unemployed person; (e) the disbanding of enlisted men to be gradual, covering a period of at least two years after the termination of the war, to enable their being absorbed into the industrial life of the country through immediate employment after discharge.

(7) The Executive recommended the establishing in Ottawa of a permanent headquarters at a cost not exceeding \$20,000.

(8) The appointment by the Dominion Government of a commission on industrial relations was also recommended.

(9) It was again recommended that legislation be sought for the protection of union labels.

(10) In addition to recommending that representations be made to the Government with respect to rendering financial assistance to industrial training and technical education, the Executive further recommended that as a step in the

direction of free high school and university education the various Provincial Governments make provision for scholarships in the public schools.

(11) Under the heading of "Old Age Pensions and Pensions for Mothers with Children," the recommendation was made that a commission be appointed to consider these questions.

(12) The Executive expressed approval of the Government in making more generous provision for disabled soldiers and the dependents of soldiers, and suggested that instructions be given to seek an increase in the pensions to totally incapacitated men, to be based on the cost of living; narrowing of the margin between the pension paid to a private and that of an officer; increasing the rates of special allowance for children and by making no distinction between the child of a private and that of an officer.

(13) Reference was made to the workmen's compensation acts which have been passed in several provinces, and it was urged that renewed efforts be made to secure similar laws in the remaining provinces.

(14) Attention was directed to the draft of industrial disputes act which the Executive had had prepared.

(15) The Executive referred to the work of the labour press and urged more encouragement.

(16) Reference was made to the high cost of living and it was suggested that the Government be appealed to to regulate prices under the War Measures Act.

The report concluded with a statement on the cancellation of the charter of the Moncton Trades and Labour Council and expressions of good-will to the fraternal delegates.

REPORT OF PRESIDENT AND PARLIAMENTARY REPRESENTATIVE.

In addition to the joint report of the Executive Council, Mr. J. C. Watters, the President, submitted a statement of the several matters with which he had

dealt during the year and the questions which were of interest to labour which had been brought before the last session of Parliament. By subjects these were as follows: Commission to inquire into and report upon conditions of employment in the production of war supplies; coaling of Japanese warships in Esquimalt, B.C.; strike of employees of American Bank Note Company; release on parole of Wilfred Gribble; imprisonment of John Reid; release of interned Austrians at Edgewood, B.C.; release of interned aliens for work in mines in Cobalt district; war widows; labour bureaus; immigration; Prisons and Reformatories Act; woman suffrage; system of national banking; prohibition; higher rates of pay to employees on I.C.R.; labour on reconstruction of Parliament Buildings; loans to railways; taxation of profits and soldiers' pensions.

REPORT OF PROVINCIAL EXECUTIVE COMMITTEES.

Ontario.—The Executive Committee had waited on the Provincial Government on January 31 and May 17 and submitted the following matters for consideration: Proportional representation and taxation of land values; abolition of property qualification for municipal office; licensing of stationary engine firemen; amendments to Workmen's Compensation; semi-weekly pay day; prohibiting the making of clothing in the homes of wage earners; appointing of station engine inspectors; protection for state employees; licensing of private detectives; suitable lunch rooms in factories and shops, and franchise for women; the awarding of contracts to fair employers of labour by the Provincial Hydro-Electric Commission; the question of establishing a separate department of labour was also introduced.

Quebec.—The Executive Committee reported that an interview had been held with the Provincial Government on January 26, and representations made as follows: The appointment of a special commission on "Workmen's Compensation"; that the Government increase the

appropriation for the Provincial Department of Labour, and the appointment of a Deputy Minister of Labour; protesting against permission being granted for the use of the provincial technical schools for manufacturing purposes; requesting legislation abolishing the system of yearly leasing of dwelling houses; prohibition of the making of clothing in private homes under contract; protesting against the use of the Provincial Police for the assistance of strike-breakers; demanding the institution of "free and compulsory education" throughout the province, and requesting that a census of all illiterates be taken; reiterating a former demand that the provincial authorities print, and issue at a cost price, all school books; requesting legislation for the fusion of all Catholic School Commissions in the City of Montreal; requesting legislation for the compulsory adoption of the principle of "First Aid" in all mining, lumber and construction camps throughout the province; request for legislation forbidding the custom of superimposing of wallpaper upon old and unsanitary paper; requesting the Government to insert in all future contracts and sub-contracts a clause calling for the payment of "union wages" in each trade employed, and the provision of the necessary authority to see that same is carried into effect; legislation had been passed prohibiting the licensing of stationary engineers by municipalities, which will eliminate the duplication of licenses. Another enactment was granting to municipalities the right to regulate the hours of barber shops. Reference was made to the establishment of two labour papers in the province.

Manitoba.—The Executive Committee reported the election of Mr. R. A. Rigg, Secretary of the Winnipeg Trades and Labour Council, to the Legislature. Among the legislations of interest to labour which had been passed at the last session of the Legislature was the Bureau of Labour Act, Workmen's Compensation Act, Shops Regulation Act, Factories Act, Bake Shops Act, and a law protecting the wages of workmen em-

played on public works. It was reported that labour was well employed, several strong unions had been organized, and it was suggested that the time was opportune for organization work.

Saskatchewan.—The Executive waited on the Provincial Government on January 21, and presented the undermentioned programme of proposed legislation: State accident insurance as in Ontario; compulsory inquests on all fatal accidents; minimum wage for women of not less than \$8 per week; equal suffrage, men and women over 21 years of age; abolition of election deposit; enact law providing for direct legislation; abolition of all private employment agencies; union label on all Government printing, including school books, and that all Government printing, ruling and binding, in so far as possible, be done in the province, and that contracts for Government printing should contain a clause stating that all work be done in the province; Building Trades' Protection Act be amended so as to compel workmen in infectious work to be disinfected before taking up other work; Act licensing all plumbers; that the "Cities' Act" be amended; compulsory contribution for patriotic purposes; enforcement of regulations for protection of electrical workers; pamphlet printed showing rights of farm labourers and harvest labourers; Justices of Peace be compelled to hear all cases brought before them; Bureau of Labour to have control of granting licenses of moving picture operators; standardization of all school text-books, the said books to be made free or sold at actual cost. School attendance to be enforced; medical, surgical, dental and optical treatment be made free to all school children, and that no school board be allowed to make vaccination compulsory; situations advertised as vacant shall in all cases state name of prospective employer; that the teaching of the English language in all schools in the province be made compulsory, and that the "Factories Act" be amended. A few of the requests were granted and in others investigations are to be made.

Labour conditions had been fairly active, except in the building trades. Through the activity of labour bodies representatives had been elected to the municipal councils in Regina, Saskatoon and Prince Albert. The chairman of the Executive Committee had been appointed a member of the Saskatchewan Division of the Military Hospital Commission which had urged an increase in the allowance to disabled soldiers.

Nova Scotia.—No organized efforts toward securing legislature had been made by the Executive Committee. Among the legislations passed by the Legislature was an Act regulating the payment of wages to employees of coal companies. Trade conditions during the year had been satisfactory and substantial improvements in wages and working conditions had been secured.

PROVINCIAL FEDERATIONS.

The British Columbia Federation of Labour reported on the passage by the Legislature of a Workmen's Compensation Act, which is to come into force on January 1, 1917. Other legislations passed was an Act to provide for the examination and licensing of moving picture machine operators and an Act to assist in reducing the number of Asiatics in coal mines. Assistance had been given to retail clerks in securing a law providing for a weekly half-holiday. Reference was made to the revival of metal mining and the improvement in labour conditions in the province. The report from the New Brunswick Federation of Labour stated that an interview with the Provincial Government was held on March 15, when the following requests were made: That Compensation Act (1903) be amended, making the employer liable, provided the employee was not wilfully negligent, and the Government to appoint a commission to prepare a new Act on the lines of Ontario Act for next session; an Act to provide for minimum wages for women and minors; for additional factory inspectors, one to be a female, and for seats for female help in stores; only practical plumbers

to be appointed as plumbing inspectors, and that boards of examiners be established; amendment to Fair Wage Act providing for schedule similar to Dominion Government schedule; that legislation be enacted providing for the control of detective agencies by local police authorities; legislation prohibiting any system of compulsory insurance in any industry; that preference be given returned soldiers in any land settlement scheme introduced; that all possible aid be given to further industrial education; training of motormen and conductors on street cars; that the Government give effect to the Bureau of Labour Act and a separate department be established, the head of such department to be a member of Executive Council. During the last session of the Legislature the Compensation Act was amended in the interests of injured workmen; the demand for seats for female help in stores had been acceded to; the City of St. John had been granted authority to build homes for workingmen, and provision had been made for inspection of theatres.

REPORTS OF FRATERNAL DELEGATES.

Mr. Fred. Bancroft, of Toronto, fraternal delegate to the American Federation of Labour, submitted a synopsis of the proceedings of the convention held in San Francisco, Cal., in November, 1915, dealing more particularly with the important phases on international relations.

Mr. James Simpson, of Toronto, fraternal delegate to the British Trades Union Congress, in presenting his report of the convention held in Birmingham, England, in September, 1916, dealt in a comprehensive manner with the more important matters which had been before the convention. The British Congress had declined to take part in the proposal of the American Federation of Labour for a conference of trades union representatives at the close of the war, objection being taken to sitting with representatives of trade unions in the countries composing the Central Powers.

Report of Committee on Officers' Reports

All the above reports were referred to the Committee on Officers' Reports, together with a number of resolutions which referred to subjects dealt with by the Executive Council. The clauses of the report of the Executive were considered *seriatim*. On clause 1, re wages board for munition workers, the Executive was criticized for not having pressed for a labour representative on the Munitions Board. The President defended his position and explained what the Executive had done in order to protect the workers in munitions factories, after which the clause was concurred in. Clauses 2, 3 and 4 were approved. A resolution dealing with representation at the proposed peace-conference was approved by the committee, but on motion the appointing of representatives was left in the hands of the Executive Committee. On clause 5 the Executive was questioned as to its knowledge of the extension of the Industrial Disputes Investigation Act. The Executive denied having any previous intimation until the scope of the Act was extended. With this explanation the clause was adopted. In recommending approval of clause 6 the committee added a demand that the Government be asked to take control of privately owned cold storage plants, abattoirs and flour mills. The remaining clauses, except No. 14 (Industrial Disputes Act) which was dealt with separately, were also approved, together with three resolutions dealing with the high cost of commodities, and a motion was endorsed asking that the Government pass an Order in Council under the War Measures Act restricting the price of all necessities of life. The other reports were all concurred in by the committee and approved by the convention.

Report of the Secretary-Treasurer

Mr. P. M. Draper presented his report as Secretary-Treasurer of the Congress, which showed that the receipts

from all sources, including the balance from the previous year, amounted to \$13,646.64; expenditures were \$10,888.95, leaving a balance of \$2,757.69, in addition to which there is \$10,000 in the reserve fund. The membership of the Congress was reported as 66,573, a decrease of 4,846 as compared with last year. There are 48 international and one national central body affiliated, which, with 12 federal unions chartered direct, makes a total of 1,150 local unions included in the membership of the Congress. The Audit Committee, to which the financial statement was referred, reported having found the accounts correct, and commended the work of the Secretary-Treasurer. An increase of \$5 per month was recommended in the salary of the stenographer. The report was adopted.

Appropriations

The Wages and Means Committee report recommending the following appropriations was approved: To the assistant secretary, \$50; messenger, \$25; doorkeeper, \$25; caretaker, \$20; assistant caretaker, \$10; translator, \$25; payment of the hotel expenses of the fraternal delegates from the American Federation of Labour, British Trades Union Congress and the National Women's Trade Union League. The fraternal delegate to the American Federation of Labour was granted \$300 and the delegate to British Trades Union Congress \$600.

Increase in Executive Council

Five resolutions having for their object a rearrangement of the officers and their duties were referred to the Committee on Constitution and Law. In the main the suggestions were not approved. The convention, however, by a roll call vote of 127 to 98, decided to increase the Executive Council to five members by adding two more Vice-Presidents. It was also decided to empower the provincial executive committees to submit the name of a member as

parliamentary representative in the provincial legislatures, when in the opinion of the Executive Council such was necessary and the funds of the Congress would permit, such representative to receive \$5 per day and expenses.

The per capita of federal labour unions, which has been at the rate of 36 cents per annum, was reduced to 18 cents.

The Executive Council was empowered to lease or purchase a building suitable for the headquarters of the Congress.

Union Labels

The report of the Label Committee recommended a more extensive support by the members of organized labour of all union labels. It was also recommended that all delegates must have at least three union labels on their person before being seated; that the Executive Council publish in report of proceedings a list of all union labels which have been indorsed by the American Federation of Labour, and further, that the Executive press for legislation giving protection to union labels. All the recommendations were adopted.

Vote of Thanks

The Committee on Thanks, whose report was approved, extended thanks to the Toronto District Trades and Labour Council, local unions, reception committee and the City Council for the entertainment provided; to the press for reporting the proceedings of the convention; to the Labour Temple Company for the arrangements made, and to the Department of Labour for the generous supply of reports and literature for the use of the delegates.

Fraternal Greetings

The morning session of Thursday was taken up almost exclusively by the messages of the fraternal delegates and others who desired to address the convention.

Miss Mary Anderson, of Chicago, Ill., fraternal delegate from the National Women's Trade Union League of America, gave an outline of the platform of the league. Miss Anderson reported that the Teachers' Federation had been formed in the United States for the purpose of securing better consideration for the teaching profession. Strong opposition had been offered to this new organization and many teachers had been dismissed on account of their connection with it. The Canadian workmen were urged to press forward unitedly for the eight hour day and for the enfranchisement of women.

Mr. J. E. Williams, of London, England, Secretary of the National Union of Railwaymen, fraternal delegate from the British Trades Union Congress, in extending greetings to the delegates, referred to the effect which the war had had on British trades unions, and averred that the war must be won. The wage-earners must perfect their organizations, and in order to take their proper place at the close of the war should elect their own representatives to Parliament. The union regulations had been relaxed during the war, and it was stated that they would not be re-introduced unless the unions were prepared to back up their demands. Mr. Williams explained how, since 1911, the railway men had been amalgamated, and now had in one organization 320,000 members, more than double the number when amalgamation took place. The railway men, as a result of the consolidation, had been able to materially improve their conditions. Referring to the high cost of commodities, the delegate instanced many cases of enormous profits being made in England, and he believed the same conditions prevailed in Canada. The trade unionists of Great Britain had party members in the British Parliament, and it was through their efforts that the workers hoped to secure the trade union conditions which prevailed before the war.

Mr. Harry P. Corcoran, of Wheeling, W. Va., ex-President of the West Vir-

ginia State Federation of Labour, fraternal delegate from the American Federation of Labour, briefly recounted the progress of the A. F. of L. since its formation in 1881. Great things had been accomplished for the skilled and unskilled workers through the instrumentality of the federation, and many legislative enactments in the interests of labour had been secured. Mr. Corcoran stated that 4,000,000 women in the Middle Western States have the franchise; twenty States have enacted mothers' pension laws, and compulsory education had been adopted in many States. Much progress had been made in securing the eight-hour day in the United States, which would, before long, be universally adopted through the economic power of organized labour. Referring to the war, Mr. Corcoran stated that it was the duty of every man to fight for his country, and the man who would not was not worthy to be a citizen.

Among others who addressed the convention were Mr. Edward Flore, of Buffalo, N.Y., President of the Hotel and Restaurant Employees' International Alliance and Bartenders' International League; Rev. Dr. J. G. Shearer, Secretary of the Social Service Council of Canada; Mrs. Ormsby, of Toronto, of the Ontario Equal Franchise Association; Mrs. Constance Hamilton, of Toronto, of the National Equal Franchise League; Miss Laura Hughes, of Toronto, and Miss Rose Henderson, of Montreal.

Fraternal greetings were received from the Order of Railway Conductors, United Brotherhood of Carpenters and Joiners, International Ladies' Garment Workers' Union and a number of local unions.

The fraternal delegates and the chairman and secretary of the local Convention Committee were the recipients of presents subscribed for by the delegates in attendance.

Resolutions Submitted

There were about 70 resolutions dealing with a variety of subjects submitted to the convention. These were referred

to the Resolutions Committee for consideration, except where other committees were dealing with matters to which the resolutions referred. In a few instances resolutions were withdrawn, but in the main the resolutions were favourably reported to the convention, and adopted. In some cases resolutions covered questions in the officers' report and were adopted when the reports were approved. In this summary only such resolutions as were concurred in are taken into account.

Thetford Mines Dispute

The Thetford Mines difficulty was brought before the convention in a resolution which protested (1) against the Minister of Labour not granting a Board of conciliation and investigation under the provisions of the Industrial Disputes Investigation Act to inquire into the dispute; (2) against discrimination being shown to the men who went on strike; and (3) against the opposition of the religious authorities to the establishment of an international union in Thetford Mines. The debate on the resolution was taken part in by a number of the delegates, including the chairman of the Resolutions Committee, which body had recommended concurrence in the first clause of the resolution. The second clause was covered by a resolution, and the third was withdrawn on a suggestion by the committee that the matter be referred to the Executive Council and the Quebec Provincial Executive. The conditions which had and were prevailing in the Thetford mines were referred to at length, and the opinion of the speakers was that the request for a Board should have been granted. Hon. Mr. Crothers, Minister of Labour, who occupied a seat on the platform as a guest of the Congress, replied to the criticisms which had been made against the Department of Labour, and pointed out that under the law it was not possible for him to comply with the application and appoint a single Board which would embrace all the mines in the district, the different mine owners having

the right to name different representatives and showing no disposition to agree on the same person. A further unusual and difficult feature of the situation was the existence of two unions, only one of which was behind the application. When the Minister found he did not have the power to meet the men's wishes, a commissioner had been appointed to investigate and conciliate, and as a result of such action an agreement had been reached, whereby the men were to receive \$2.25 per day, an increase of 25 cents per day. The agreement was signed by 12 men, two from each mine, and comprising members of both the unions indicated. (During the debate on this subject a delegate stated that the commissioner appointed by the Minister was a shareholder in the mines concerned. The Minister caused enquiries on this point to be made immediately, and the commissioner stated that he had no interest either directly or indirectly in any of the mines in question, and had never had any such interest.) The recommendation of the committee was adopted.

Request Repeal of Industrial Disputes Investigation Act

Consideration of the Industrial Disputes Investigation Act was set for a special order of business, and came before the convention on Wednesday morning. It was explained that in accordance with the instructions of the previous convention the Executive Council had had a draft bill prepared, and that a copy had been sent to every affiliated trades and labour council and local union. Two resolutions had been submitted asking for the repeal of the Act; these, together with the draft bill, were placed before the convention for action. The Congress solicitor, Mr. John G. O'Donoghue, of Toronto, explained at length the object of the various amendments, pointing out that he had endeavoured to remedy what were considered to be objectionable features of the present Act and the amendments proposed by the Minister of Labour.

During the discussion the solicitor was asked if there was no provision in the Act to permit of a Board being appointed where more than one employer was concerned in the dispute, the Thetford Mines dispute being cited. The solicitor stated that there was no provision in the Act covering the point, and no doubt the Minister of Labour was right in his contention; an amendment, however, could be made covering the point. It was then moved and seconded that the convention approve of the solicitor's draft bill. After some arguments urging the repeal of the Act it was proposed that a referendum be taken on (1) the approval of draft bill of the solicitor, (2) the approval of the proposed amendments of the Minister of Labour, and (3) the repeal of the Act. This proposal was not seconded. The discussion occupied the remainder of the morning session, and was resumed again on Thursday afternoon. At this session it was moved but not seconded that the Congress ask for the repeal of the Act, and failing to secure its repeal that the Government be notified by the Executive that the trades covered by the Act would ignore its provisions. After further discussion an amendment was proposed referring the draft bill to a committee of three to amend certain clauses. This, too, failed to get a seconder, as did also a motion that the Act be amended to embrace only those trades which desired to come under its provisions; failing which, that a request be made for the repeal of the Act. It was then moved in amendment and seconded that resolutions No. 50 and 60, asking for the repeal of the Act, be concurred in, and this was adopted.

To Standardize Pensions

The following resolution having for its object the securing of the Canadian rate of pensions for all army and navy reservists who were domiciled in Canada at the outbreak of the war was recommended for adoption:

"Whereas, prior to the outbreak of

war, Canada had many army and navy reservists, who returned for duty overseas in the cause of the Empire, and whereas the said reservists upon returning (if disabled) will be at a great disadvantage under the provisions of the Imperial Pension Scale, be it resolved that the Trades and Labour Congress of Canada urge upon the Dominion Government the advisability of suggesting to the governments of the allied nations in whose armies and navies Canadians are fighting the necessity of increasing the Imperial pension to the Canadian standard for said reservists."

The resolution was amended by providing that in the event of the demand being refused that the Dominion Government be asked to supplement the allowances of the governments of the allied nations. With this addition the resolution was approved.

In Favor of the Sale of Light Wines and Beers

A protracted discussion ensued on the following resolution which was recommended for adoption by the Resolutions Committee: Resolved, that this convention of the Trades and Labour Congress of Canada instruct its incoming Ontario Executive to petition the Ontario Government to amend the Ontario Temperance Act so as to permit of a license for the retail sale of light wines and beers; and, be it further resolved, that when a referendum is submitted to the people of Ontario on the prohibition question it be taken separately in the several municipalities, thereby giving each municipality local autonomy in the matter, and that a separate ballot be taken on the question of beer and wine licenses.

Of the fifteen delegates who took part in the discussion nine supported the recommendation and six opposed. A motion to table the resolution was defeated. The debate was finally brought to a close by the previous question being called for and sustained. The resolution was then adopted.

Want Sunday Excursions

A resolution which created some discussion was one having for its object the repeal of a section of the Lord's Day Act so as to permit railway companies to run excursion trains on Sunday. The speakers on both sides were about evenly divided, but when the vote was taken the resolution was adopted by a good majority. The resolution as presented was as follows: Whereas, the only opportunity afforded to a large number of families of the working class to enjoy a whole day holiday at pleasure or health resorts is on the few holidays that come during the summer months; and, whereas, Chapter 153, Section 8, of the Revised Statutes of Canada—being the Lord's Day Act—expressly makes it illegal for transportation companies to carry passengers for amusement or pleasure on Sunday, thus denying to the working class the privileges of pleasure and health-seeking which are available and taken advantage of to a general degree by those fortunate enough to own automobiles; therefore, be it resolved, that the Executive Council of the Congress be and is hereby instructed to use every available influence to secure the repeal of Section 8, Chapter 153, Revised Statutes of Canada.

Desire Investigation into Conditions of People

Believing that social and economic changes will be brought about as a result of the war, the convention adopted a resolution asking for a commission to inquire into the industrial, social and economic conditions of the people, with the view of eliminating the evils of the present system. The resolution was as follows: Whereas, the possibility of great social and economic changes will be brought about by causes due to the present war, which will create new conditions in our present industrial system, this having a serious bearing on the future welfare of the workers in the Dominion of Canada; and, whereas, the Government of this Dominion has ap-

parently recognized the seriousness of the situation by appointing commissions to investigate trade and commerce and economic development to meet these changed conditions, and are overlooking the industrial field; therefore, be it resolved, that this convention of the Trades and Labour Congress of Canada demand of the Federal Government the appointment of a Royal Commission of representative men to fully investigate the industrial, social and economic conditions of the people of this Dominion, with a view to presenting to the parliament and legislatures of this country, and to the people, the true conditions of its industrial population, so that measures will be advanced to create new conditions that will eliminate the many evils of our present system.

Want Pension Regulations Revised

The question of soldiers' pensions was brought before the convention in the President's report and also by resolution. The resolution stated that there were many inequalities in the present regulations and that the pension of the rank and file is inadequate. Complaint was made that there is too big a margin between the pension of a private at \$480 and that of a colonel at \$1,890 per year; also that the allowance to the child of a private should be the same as that given to the child of an officer. The resolution recommended (1) re-classification of pensions, (2) changes in the regulations providing for allowances to children, (3) that the pension fund be administered by a commissioner, and that all medical boards be composed of civilians, so as to make administration of the fund non-military. The resolution was amended by providing that the rate of pension should be based on the cost of living in the locality where the pensioner resided, and with this alteration was approved.

Against Asiatic Labour

The Resolutions Committee recommended concurrence in the following resolution: Whereas, Asiatic labour is

being imported and used in the industries in Ontario to take the place of men seeking better conditions of labour and also of those who are away in the country's service; be it therefore resolved, that this Congress record its protest against this despicable action and that the delegates from Ontario be asked to carry this to their local unions requesting them to give all moral support to secure the elimination of such labour from this province. A few of the delegates opposed the resolution on the ground that the international union should not recognize race divisions; but rather that the Asiatics should be encouraged to join the unions. This contention, however, was opposed, the argument being that the introduction of any class of people who would lower the standard of living of the local workers should be combatted. The resolution was adopted.

Vancouver Labour Temple

The financial difficulties of the Vancouver Labour Temple was brought before the convention in the following resolution: Whereas, the Vancouver Labour Temple has, through industrial depression due to the war, been unable to meet its financial obligations; and, whereas, the policy of labour organization has been to foster the growth of the movement by encouraging the ownership of Labour Temples by the organizations of labour; and, whereas, the Vancouver Temple stands second to none on the continent and represents, on a conservative valuation, an investment of \$295,000, with an indebtedness of approximately \$125,000, leaving an equity to the shareholders of \$170,000; therefore, be it resolved, that this Congress believes the Vancouver Temple should be saved for organized labour; be it further resolved, that the Executive Council be directed to ask for a voluntary assessment on the affiliated membership of 25 cents for the purpose of assisting in saving the Vancouver Temple. It was pointed out that about \$12,000 was needed to meet the immediate liabilities of the company.

After the matter had been carefully considered, it was decided to refer the question to the Executive Council to work out a plan whereby some arrangement could be made to meet the obligations of the Temple directors.

Other Resolutions

The following is a synopsis of other resolutions of a miscellaneous character which were adopted:

In favor of legislation abolishing the practice of making clothing in the homes of wage-earners.

Reiterating the demand for uniformity of school books for all schools under the control of the same school commission in the Province of Quebec.

In favor of amendment to the Election Act whereby the voters' lists in Northern Ontario will be compiled within 60 days preceding election.

In favor of continuance of Government grant of land to only bona fide settlers and Government assistance to same; that all land held by corporations and speculators be taxed at its real value and that the unearned increment be appropriated by the state.

In favour of election day being made a public holiday.

In favor of legislation by the Ontario Government compelling employers to grant their employees 24 hours off duty out of every seven days, and that such employees be compelled to take the time off.

Endorsing the candidature of Jas. H. McVety, of Vancouver, as a member of the Workmen's Compensation Board of British Columbia.

In favour of inspectors being appointed on all Government work to report weekly on conditions; protesting against the releasing of interned aliens for the purpose of strike-breaking; that the maximum charge for doctors' fees on all public works be 50 cents per month, and that the workmen be given the right to select their own physician; and also that the Government be asked to legislate in favour of a weekly pay-day.

In favour of improved uniforms for letter carriers; extension of the Saturday half-holiday to every week in the year except Christmas, and the granting of an immediate increase in the pay of letter carriers of not less than 25 cents per day.

In favour of the installation of proper and efficient exhaust systems in all factories where metal polishing is carried on.

In favour of legislation compelling the removal of old wall paper before new paper is applied.

In favour of the inspection of all buildings occupied by working people in order to provide against accidents to occupants.

In favour of legislation providing for more adequate protection for those employed in factories where products dangerous to the health of the workers are manufactured.

In favour of a special officer being appointed by the Quebec Government to supervise all employment bureaus in the province.

In favour of a larger appropriation to the Labour Department of the Province of Quebec; appointment of a Deputy Minister of Labour, and an increase in the number of inspectors; improvement of the staff by providing pensions to inspectors 15 years in the service; establishing a salary scale, and providing for examination of inspectors.

Urging the passage of legislation by the Provincial Legislatures enacting sanitary laws and laws regulating the fitness of barbers to follow the trade, so as to ensure safety to patrons of barber shops.

In favour of urging the Dominion and Provincial Governments to establish a system of agricultural credit to the homesteaders who are settled on the land.

In favour of asking the Quebec Provincial Government to appoint a commission to enquire into and report on a more adequate workmen's compensation act; one of the commissioners to be a member of organized labour.

In favour of asking the American Federation of Labour to appoint an organizer for the province of Quebec who can speak both English and French.

Protesting against the closing down of the work on the Welland Canal.

In favour of the appointment in Ontario of inspectors of licenses of hoisting or portable engineers, and also asking for the appointment of a member of the International Brotherhood of Steam Engineers on license board.

In favour of legislation providing for the examination and licensing of stationary firemen in the Province of Ontario.

In favour of more effective fair wage clauses in Ontario Government contracts.

In favour of legislation granting to hotel, restaurant, club and eating house employees a six-day week.

Requesting organized labour not to patronize restaurants, cafés, etc., conducted by Asiatics.

In favour of urging upon all municipalities the necessity for stricter measures of sanitation and hygiene in all allied food trades.

In favour of a fortnightly pay day for employees in the allied food trades and that wages be a first charge in case of failure of an employer engaged in the restaurant or café business.

In favour of requesting the Quebec provincial authorities to put into effect the law providing for safety of theatrical stage employees.

In favour of legislation which will provide for the disinfecting of clothing of workmen who are employed in buildings where patients suffering from contagious diseases are confined.

In favour of convicts being employed in productive and useful occupations, the products to be used to relieve distress, the same to be distributed through charity organizations.

In favour of legislation being passed by the Dominion Government establishing an eight hour day.

In favour of the Congress using every effort to have the workmen's compensa-

tion acts of the various provinces conform with that of the Province of Ontario.

In favour of legislation for the better protection in theatres of performers and employees.

In favour of co-operating to secure an ample supply of labour for the production of war material.

In favour of an additional clause to the Immigration Act to prohibit certain classes of musicians from coming to Canada to accept employment.

In favour of the Executive Council instructing the Alberta Federation of Labour to hold a convention.

In favour of amendment to the Ontario Workmen's Compensation Act to provide for payment to cover the cost of first aid in case of accident, and also to have all employees in the building trades covered by the Act.

In favour of referring to local unions the question of the prohibition of the premium system now in force in many large industries in the Dominion.

In favour of legislation for the closing of barber shops in Ontario on public holidays.

In favour of temporary letter carriers and other employees who are filling the places of men who have enlisted being granted immediately a minimum of \$2.50 per day and that they receive the statutory increases for the position in the grades they are filling.

In favour of amendments to the mining laws of Ontario prohibiting employees from working more than eight hours out of every twenty-four, and providing for a safety cage in mines exceeding 200 feet in vertical depth; also making for Government support for a doctor with modern medical appliances in sparsely settled mining camps.

In favour of equal civil, political and religious rights being accorded to the Jews as are enjoyed by native-born populations in all countries, and that the Executive Council take such action as necessary to secure such rights as part

of the terms of peace at the close of the war.

Instructing the Executive Council to consider the advisability of establishing a labour party and to report at the next convention.

Reaffirming the position of the Congress in favour of the locked out pottery workers in St. Johns, Que.

Officers, 1916-1917

The following are the names of the officers elected for the year 1916-1917:

President—J. C. Watters, Ottawa, Ont.

Vice-President—James Simpson, Toronto, Ont.

Vice-President — Alex. Watchman, Victoria, B.C.

Vice-President—R. A. Rigg, Winnipeg, Man.

Secretary-Treasurer—P. M. Draper, Ottawa, Ont.

Provincial Executives—Nova Scotia: chairman, R. V. Eisnor, Halifax; committee, Clifford C. Dane, New Glasgow; A. J. McDonald, Pictou; Michael Murphy, Halifax. Quebec: chairman, John T. Foster, Montreal; committee, Adolphe Garipey, Montreal; Zotique Lesperance, Montreal; Michael Walsh, Quebec. Ontario: chairman, Wm. Gloeking, Toronto; committee, H. J. Halford, Hamilton; W. Lodge, Ottawa; John Sutherland, Toronto. Manitoba: chairman, A. W. Puttee, Winnipeg; committee, Percy Cann, Winnipeg; C. W. Kennedy, Winnipeg; J. W. Wilson, Winnipeg. Saskatchewan: chairman, R. H. Chadwick, Moosejaw; committee, J. B. Judson, Prince Albert; J. D. Wallace, Saskatoon; H. Perry, Regina.

Fraternal delegate to American Federation of Labour—Thos. A. Stevenson, Toronto, Ont.

Fraternal delegate to British Trade Union Congress—David Rees, Fernie, B.C.

Ottawa, Ont., was selected as the convention city for 1917.

THE EIGHT-HOUR CONTROVERSY ON THE UNITED STATES RAILWAYS AND THE EIGHT-HOUR LAW FOR RAILWAY TRAINMEN

THE threatened strike on the railroads of the United States, which promised to paralyze 200,000 miles of railroad, has been averted for the present at least. The strike was to have begun at 7 a.m. of Labour Day, but Congress on September 1 passed a law providing that after January 1, 1917, eight hours shall be deemed a day's work for employees engaged in the operation of trains in inter-state transportation. The bill was signed by President Wilson on September 3.

In June, 1916, there was a conference in New York City between the representatives of the 400,000 trainmen in the four brotherhoods—locomotive engineers, enginemen and firemen, railway conductors, railroad trainmen—and the National Conference Committee of the railways. The brotherhoods asked for what they called a basic 8-hour day in freight service with the payment of time-and-a-half for overtime. The men were willing to work longer than eight hours if necessary, but they asked that trains should be operated at such a speed that they might complete a run of 100 miles, which is considered a day's run in freight service, in the standard time of eight hours. Where the terminals were more than 100 miles apart the men did not ask for the payment of overtime after eight hours if the standard rate of $12\frac{1}{2}$ miles an hour were maintained. A statement issued by the Publicity Bureau of the brotherhoods throws light on this point:

"If a division is 100 miles long, overtime would begin after 8 hours; if 125 miles long, after 10 hours; if 150 miles long, after 12 hours, and so on. The number of hours after which overtime would begin is arrived at by simply dividing the number of miles by $12\frac{1}{2}$."

The railroads replied that it would be impossible to increase the standard-

time minimum of freight trains which is now 10 miles an hour to $12\frac{1}{2}$ miles an hour. It would be impossible, they said, to speed up the trains so as to reach the terminals within the 8-hour limit nor could the terminals be moved nearer together so as to complete a working day in 8 hours on the present basis of 10 miles per hour. They took the position that the brotherhoods were aware of this situation and were not making their demands in good faith. They were merely endeavouring to add between 70 and 100 millions annually to their wages, which according to the railway officials would be quite out of proportion to railway earnings unless rates were correspondingly advanced and they asserted that 45 per cent of the gross revenues of the roads was already being paid to labour on account of wages. They conceded, however, that long hours are required in freight service, the average working day being in the neighbourhood of 12 hours. The brotherhoods quoted evidence to the effect that 78 per cent of through and regular trains in the freight service in the United States regularly travelled 100 miles in 8 hours or less and they were of the opinion that a large proportion of the remaining runs could readily be brought within the 8-hour limit and that the expenditure for overtime would therefore be a relatively small amount. In reply to the statement of the officials that wages were already unduly high the brotherhoods stated that the hourly wage rate was low although at times the monthly earnings were high because so much time had to be worked.

The National Conference Committee of the railways proposed that the matters at issue should be submitted to arbitration by the Interstate Commerce Commission. They argued that this was the only body sufficiently intimate with the

facts to protect the rights of the committee and it was also able to provide the additional revenue necessary to meet the added cost of operation. When this proposal proved unacceptable to the brotherhoods the railroads suggested arbitration under the Newlands Act. The brotherhoods, however, objected to arbitration. A. B. Garretson, president of the conductors, insisted that arbitration in the past had been generally unsatisfactory to the men. Speaking for the four brotherhoods he is quoted as saying "the attitude of the men as long as arbitration was an untried theory was in favour of it but our experience with arbitration has driven most of the men to be against it because of the difficulty of obtaining neutral arbitrators who knew the intricacies of the issue." Mr. Garretson said that the neutral member of the board of arbitration was usually swayed by his associations with railroad or other corporate interests or by his investments in railroad securities no matter how honest his effort to be unbiassed. He also took the position that the demand for the 8-hour day could not be arbitrated. It was a minimum in a dangerous calling like railroading and the time-and-a-half pay — "punitive overtime?"—was an essential part of the 8-hour proposal.

It was announced on August 8 that the railway trainmen had authorized their representatives to call a strike, the lowest percentage of the vote in favour of a strike being 84.3 by the conductors of the Western district. At a meeting in New York early in August, Elisha Lee, of the Pennsylvania lines, chairman of the National Conference Committee of the railroads, gave out the statement that the railroads again refused to grant the demands of the brotherhoods and called upon the United States Board of Mediation and Conciliation to prevent a strike. The brotherhoods refused to join in a request for mediation but agreed to consider any proposals the Federal Board might make. The members of the Board of Mediation—Wm. L. Chambers, chairman, Martin A. Knapp and

G. W. W. Hangar—were in New York at the time and immediately went into conference with the railroad managers and later with the 600 delegates representing the railway-train crews of the country.

Mediation in the dispute definitely failed, however, and the brotherhoods were again requested to submit the whole matter to arbitration by a method provided in the Newlands Act in order to overcome the objection of the men that they did not obtain an adequate representation upon a small board. The new proposal called for a board of 14 arbitrators, four to be chosen by the railway men, four by the railroads, and these eight to select jointly the remaining six members.

When it was found that an agreement could not be reached, President Wilson summoned the committees for each side to Washington. The President proposed that the railroads should grant the 8-hour day, and that the demand of the men for time-and-a-half for overtime and certain counter proposals of the railroads should be withdrawn until a Federal Commission could investigate and determine the cost of the change. President Wilson's proposal was not accepted by the committee of railroad managers who again suggested that the whole question be arbitrated. The President then called the 50 railroad presidents to Washington and it was rumoured for a time that the 8-hour day might be granted by the railroads if the President would give assurances that the Interstate Commerce Commission would take favourable action upon an application to increase freight rates. On August 26, however, it became known that the railway presidents in their reply to President Wilson would again propose that all the points at issue should be arbitrated and that pending the decision of the arbitrators the amounts due to the men on the basis of time-and-a-half after 8 hours should be recorded and that if the arbitrators should decide in favour of the men's

demands these payments should be made retroactive.

Having learned that the railroads would not accept the President's proposal and would still insist on arbitration the 600 brotherhood chairmen left Washington for their homes on Sunday, August 27, carrying the strike orders to be made effective on receipt of word from the four chiefs who remained in Washington. President Wilson then turned to Congress, and on August 29 addressed the two Houses in joint session asking for the adoption of legislation designed to deal with the situation and to protect the public interests in future controversies of the kind. The proposed legislation provided for the enlargement and administrative reorganization of the Interstate Commerce Commission in order that it might act with greater promptness and thoroughness; the establishment of the 8-hour day as the legal basis of work and wages for all railway employees actually engaged in the operation of trains in interstate transportation; the creation of a commission to study the effect of the 8-hour day in railway transportation; explicit approval by Congress of the consideration by the Interstate Commerce Commission of an increase in freight rates to meet the additional expenditures rendered necessary by the adoption of the 8-hour day if the facts disclosed should justify the increase; an amendment of the existing federal statutes providing for mediation, conciliation and arbitration of such controversies, so that a strike or lockout should be illegal pending the outcome of a government inquiry, and a measure giving the President power in case of military necessity to operate the railroads, with authority to draft into the military service such railway employees as the circumstances might require. Speaking of the 8-hour day, President Wilson said:

"It seemed to me, in considering the subject matter of the controversy, that the whole spirit of the time and the preponderant evidence of recent eco-

nomie experience spoke for the 8-hour day. It has been adjudged by the thought and experience of recent years a thing upon which society is justified in insisting as in the interest of health, efficiency, contentment, and a general increase of economic vigour. The whole presumption of modern experience would, it seemed to me, be in its favour, whether there was arbitration or not, and the debateable points to settle were those which arose out of the acceptance of the 8-hour day rather than those which affected its establishment."

Concerning his urging the railroads to concede the 8-hour day and to arbitrate the other questions the President said:

"The representatives of the brotherhoods accepted the plan, but the representatives of the railroads declined to accept it. In the face of what I cannot but regard as the practical certainty that they will be ultimately obliged to accept the 8-hour day by the concerted action of organized labour, backed by the favourable judgment of society, the representatives of the railway managements have felt justified in declining a peaceful settlement, which would engage all the forces of justice, public and private, on their side to take care of the event."

On August 30 a bill was introduced embodying the President's recommendations with respect to the 8-hour day and a commission of investigation. These were the only two of the proposed measures which were enacted into law. The bill passed the House of Representatives on September 1 and the Senate on September 2. On the evening of September 2 the order calling off the strike which was to have begun September 4 at 7 a.m. was issued by the four brotherhood chiefs after they had received assurances that the President would sign the bill as soon as it reached him.

The law provides that after January 1, 1917, 8 hours shall be deemed the measure or standard of a day's work for the purpose of reckoning the compensation of all railway employees engaged in the work of operating trains in interstate transportation or in the District of Columbia, such employees to receive as compensation 50 per cent increase for each hour's work in excess of 8 hours. The President is required to appoint a wages commission of three members, two of whom shall be persons recommended respectively by the railways and their employees. The commission is to observe the effects of the 8-hour day for a period of from six to nine months and shall report its findings to the President and to Congress. Pending the report of the commission and for a period of 30 days thereafter the compensation of railway employees subject to the Act for a stand-

ard 8-hour working day is not to be reduced below the present standard day's wage and for all necessary time in excess of eight hours such employees shall be paid not less than the pro rata rate for such standard 8-hour working day. In other words the men are to get the present 10-hour rate for 8 hours' work and payment for overtime is to be reckoned on a straight time basis. It will be noted that the Act does not require any reduction in hours of labour from the present legal maximum which is a day of 16 hours. Statements in the press indicate that there is some intention on the part of the railroad managements of planning a test case of the Adamson 8-Hour Act as it is called. One railway president was quoted as saying that his company would not comply with the Act "unless compelled by the Supreme Court of the United States."

EIGHTH ANNUAL CONVENTION OF THE CANADIAN FEDERATION OF LABOUR.

THE eighth annual convention of the Canadian Federation of Labour was held at Quebec commencing September 11. About 25 delegates representing various unions affiliated with the Federation were present.

The President, Mr. Charles Pepper, in his address, stated that the Federation had added to its numerical strength during the year, despite the fact that many members of local and affiliated unions had enlisted for active service. Since the last convention the Federation had entered British Columbia and had affiliation with a number of unions there; the election of a Vice-President for that province was recommended. The Provincial Workmen's Association had furnished nearly 1,100 men for active service since the war started, but had an average increase for the year of about

25 per cent. Membership in Ottawa and Toronto had decreased to some extent owing to the war and purely local causes. Montreal city had become more active and had instituted a new trades council besides adding to its membership. The President pointed out that many Canadian unions had not yet affiliated with the Federation and suggested these should be sent a circular calling attention to the advantages of affiliation with the Federation. Referring to the war the President alluded to what Canada had done to strengthen and support the empire, and while as a body the Federation had declared against conscription he thought the only way to avoid it was for every man who was physically fit and able to do so to volunteer. The work of readjustment after the war would require the hearty co-operation of every

citizen of Canada, and practical and honest effort should be put forth to build up the Dominion upon a solid foundation. The Federation was free to further every effort to develop and utilize the many natural resources of the Dominion, and he thought the Federation should declare itself in this connection. Referring to legislation the President pointed out that the time of governments had been so occupied with war matters that little legislation in the interest of the wage-earners had been dealt with since the war started, and legislation on such subjects as technical and vocational training, old age pensions, the enlargement and amendment of the Industrial Disputes Investigation Act and similar measures had been left in abeyance for the present. The Ontario Workmen's Compensation Act, the President said, appeared to be giving satisfaction. While work was plentiful in almost every line of industry the wages being paid were not keeping pace with the cost of living; the prices of foodstuffs and other necessities were so high that the wage-earner with a family was finding it impossible to properly provide for them. The Government should be urged to take advantage of every means available to prevent undue prices being charged for the articles that were required to feed, clothe and shelter the people, and that some relief would be necessary if labour troubles during the war period were to be avoided.

Following the President's address the Secretary-Treasurer, Mr. G. G. Mercure, read his annual report, which showed a slight increase in revenue. While conditions with the Provincial Workmen's Association were improving it was probable the Association would not be re-

presented at the meeting. The per capita, however, paid by some of the Association's lodges showed an increase over last year. Charters had been issued to five new organizations and a Canadian Trades Council had been formed in Montreal composed of four locals of the Canadian Society of Engineers, Tile Setters, Fruiterers, Pressmen and Printers. The charters of seven unions had lapsed.

Vice-President Tumpane in his report referred to a number of matters connected with organization and the workings of the Federation and discussed the proposed amendments to The Industrial Disputes Investigation Act as proposed to be amended. Generally he approved of the provisions of the Act, but he thought it should provide, as in the case of Australian and New Zealand legislation, for the compulsory enforcement of awards. The report of the executive was to the effect that the Bill should be recommended for approval of the convention with certain changes making the Act applicable to all government employees except those coming under the Civil Service Act and applying the measure to all industries instead of to public utilities only. It was also suggested that the word "strike" should be defined as applying to cases in which 50 per cent of the employees were concerned instead of ten or more as suggested in the proposed amendment. The report also mentioned the principal changes in the Act which the executive recommended for endorsement. After a full discussion the report of the executive in regard to the Act was adopted.

The convention adopted, amongst others, the following resolutions:

A resolution stating that the time was opportune for the formation of a national labour party and that the question be thoroughly considered by the convention.

That direct political action be henceforth given prominence in all literature and in the addresses of speakers.

That in the granting of pensions to Canadian soldiers, officers and privates be treated with absolute equality.

That the Federation take up the question of unemployment insurance and impress the necessity of it upon the Dominion Government.

That the Federation should get in communication with the labour party in Great Britain with the view of having labour represented at the peace conference when the war is over.

That the Dominion Government should pass legislation to prohibit international unions from discriminating against Canadian union men.

That the Federation should take up the question of old age pensions with the Dominion Government.

A resolution asking for the nationalization and municipalization of public utilities.

That it would be advisable for the Federation to secure Dominion registration, and that the matter be inquired into.

A resolution endorsing the action of the Military Hospitals Commission in providing for the technical training and education of returned soldiers who by reason of active service at the front have been rendered incapable of taking up their former occupations.

That the Federation request the Federal Government to pass a law regulating and limiting the price of necessities of life.

The election of officers resulted as follows: President, C. G. Pepper; Vice-President, M. F. Tumpane; Secretary-Treasurer, Geo. Mercure; Executive, Geo. Marois, F. Flatman; Vice-President for Ontario, T. Morton; Vice-President for Quebec, E. Pepin; Vice-President for Nova Scotia, S. B. McNeil; Vice-President for British Columbia, E. Prendergast.

As Ottawa, Peterborough, Kingston and Hamilton were all suggested for the next convention it was left to the Executive Committee to decide the place of meeting.

REVIEWS

United Kingdom.—Report of the British Departmental Committee on the Danger in the Use of Lead in the Painting of Buildings. Bulletin of the United States Bureau of Labour Statistics. Whole Number 188. March, 1916. 207 pp.

This bulletin reproduces the full text of the report of the British Departmental Committee which was appointed January 20, 1911, to study the danger attendant on the use of paints containing lead to the health of persons engaged in painting buildings. To another committee appointed at the

same time was assigned the study of the painting of coaches and carriages. Besides the chairman the committee consisted of two members of Parliament, the medical inspector of factories and two representatives each of employing painters and of working painters. The report is based upon evidence of 118 witnesses, of whom 93 were representatives of employers, painters, paint manufacturers, chemists, physicians and others with special knowledge of lead poisoning. The remaining 25 witnesses were brought forward by the white lead cor-

roders' section of the London Chamber of Commerce, and included witnesses from France, Germany, Austria, Belgium, Holland and Switzerland.

The committee recommended a law prohibiting the importation, sale or use of any paint material which contained more than 5 per cent of its dry weight of a soluble lead compound and the procedure by which the lead contained is to be determined is indicated. Certain special classes of colours such as those used by artists are exempted and it is also suggested that it would be desirable to provide power of granting exemptions in cases where it could be shown to the satisfaction of the Secretary of State that the use of lead paints containing more than 5 per cent of soluble lead cannot as yet be dispensed with. In these cases, however, it is suggested that the Secretary of State should be empowered to enforce such adequate precautionary measures as the abolition of dry rubbing down, provision of overalls, mess rooms, cloak rooms, lavatories and medical examination. The committee recommend that the restriction of the amount of lead in paints to not more than 5 per cent of soluble lead should not be brought into force until three years have elapsed from the date of publication of the report so that paint grinders and others may be given adequate time to arrange for supplies of non-poisonous materials and to make such other rearrangements as may be necessary.

The committee call attention to the possible danger to health arising from the vapours of linseed oil and turpentine or turpentine substitutes used in ordinary paint and it is stated that experiments on animals subjected to tur-

pentine vapours have shown that when a sufficient quantity of turpentine vapour is inhaled it may produce severe symptoms and even death. The committee is of the opinion that in any bill to be laid before Parliament to give effect to its recommendations, powers should be provided for the Secretary of State to make regulations, if he finds it necessary, similar to those which he is now authorized by law to establish in factories and workshops. The committee is of the opinion that it is quite impossible to deal with the situation by regulation of the industry and that therefore the use of lead must be restricted within very narrow limits and this method was favoured by a majority of employers who appeared before the committee. The evidence convinced the committee that leadless paints are suitable not only for interior work but also that they had been used successfully on exterior surfaces and that considerable supplies of these paints were already obtainable.

One of the eight members of the committee, a representative of the association of master painters, did not sign the report but submitted a minority report. He insists that the evidence indicates that the great source of the danger in painting resides in the lead dust created by sandpapering and dry rubbing down and that other possible sources of lead dust are very slight. In this connection he draws attention to the findings of the commission appointed by the Dutch Government to find an alternative to white lead as a base for white paint. He states that they conclude that on lintels, sashes, cornices and window sills, zinc oxide would not give as good results as white lead. He is of the opinion that

the total prohibition of dry rubbing down would remove the source of 90 per cent of the trouble.

United States.—Unemployment in the United States. Bulletin of the United States Bureau of Labour Statistics. Whole No. 195. July, 1916. 115 pp.

In order to meet the demand for information on unemployment in the United States during the winter of 1914-1915 the Bureau of Labour Statistics during January and February, 1915, undertook a survey for the purposes of determining the amount of unemployment in New York City. About the same time the Metropolitan Life Insurance Company of New York made a similar investigation by ascertaining the number of unemployed in those families in New York City holding industrial insurance policies in that company. The results obtained tallied very closely with the results of the investigation made by the Bureau of Labour. The findings of both these studies were published in Bulletin No. 172 of the Bureau of Labour Statistics. The Metropolitan Life Insurance Company was then employed to make further studies in other cities.

The second investigation included 16 cities in the East and Middle West, the canvass being made during March and the first part of April, 1915. In 401,548 families canvassed in the 16 cities, with a total of 1,694,895 members, there were 647,394 wage earners, of whom 74,218, or 11.5 per cent, were out of work. In addition to the number wholly unemployed, 107,494, or 16.6 per cent of all wage earners worked only part time.

The third survey, which was also made by the Metropolitan Life Insurance Company, covered 12 cities in the Rocky Mountain and Pacific Coast States, the investigation being made during June and July, 1914. In the 36,537 families canvassed in these 12 cities with a total

membership of 137,901 persons, there were 49,333 wage earners of whom 6,373 were out of work, the number unemployed being 12.9 per cent of all wage earners in the families. In addition to the number wholly unemployed there were 9,971, or 20.2 per cent of all wage earners covered by the survey, who were employed only part time.

The fourth investigation was a second survey of New York City in August and September, 1915, conducted by the Bureau of Labour Statistics and the Metropolitan Life Insurance Company. The Bureau of Labour Statistics covered the same 104 city blocks studied in the earlier investigation. It was found that unemployment conditions had changed to a remarkable degree in the interval between the two surveys. There were 56,539 families with 6,529 unemployed wage earners scheduled in the second investigation as against 54,849 families with 15,417 unemployed wage earners in the first survey. In February the number unemployed per hundred wage earners was 16.2; by September this rate had dropped to 6.7 per hundred.

On re-canvassing its policy holders the Metropolitan Life Insurance Company found that the unemployment rate had dropped from 18 per cent in January to 9.1 per cent in September.

The following table gives the estimated number and percent of unemployed wage earners in New York City, January and September, 1915:

Time of survey	MALES		FEMALES		TOTAL	
	Estimated unemployed.	Per cent of wage earners	Estimated unemployed.	Per cent of wage earners	Estimated unemployed.	Per cent of wage earners.
January, 1915	351,249	19.6	90,751	13.5	442,000	18.0
Sept., 1915...	177,417	6.7	46,877	7.0	224,294	6.1

RECENT LEGAL DECISIONS AFFECTING LABOUR

In a decision recently given by the Quebec Court of Appeal at Montreal it was held that an alien of enemy nationality had, as a resident of Canada, a right to action before the civil courts of the country. The circumstances of the case were as follows:

Alien of enemy nationality in Canada has right to immediate action in civil courts

An Austrian workman employed by the Montreal Harbour Commissioners entered action for damages against the commissioners claiming damages under the Workmen's Compensation Act for injuries alleged to have been received in an accident while at work for the commissioners. The commissioners set up in defence that the plaintiff was an alien of enemy nationality and as such had no standing before the court, and asked that the action be dismissed. The plaintiff's answer to this plea was that although he was a subject of an enemy country he himself was not guilty of any hostile act towards His Majesty the King or any of his subjects; that he was a peaceable citizen and had conformed to the regulations concerning aliens of enemy nationality resident in the province. The question was argued in various phases before different courts, and in the Superior Court Mr. Justice Bruneau held that while the plaintiff had the right to plead before the civil courts this right must, as plaintiff was an alien of enemy nationality, be considered as held in reserve until the end of the war. Accordingly the court suspended adjudication upon a petition of the plaintiff against the Harbour Commissioners asking that the commissioners be condemned to pay the petitioner a provisional allowance of \$1.50 a day during the pendency of his action seeking damages under the Workmen's Compensation Act.

The Court of Appeal reversed the judgment of the Superior Court and held that the Austrian workman, although an alien of enemy nationality, had, as a resident of Canada, right of action before the civil courts during the war. The Chief Justice in giving judgment stated that the test of enemy character was residence and not nationality. Subjects of enemy states resident in Canada, if their conduct were good—and they would not retain their liberty if it were not—were considered as alien friends, whereas those resident in an enemy country were alien enemies. The Court of Appeal did not pronounce on the merits of the action, but ordered that it be referred back to the Superior Court to hear the evidence and decide if damages should be paid the plaintiff on his claim against the Harbour Commissioners under the Workmen's Compensation Act. (*Quebec—Ragusz v. Montreal Harbour Commissioners.*)

In a recent decision handed out by Mr. Justice Greenshields in the Superior

Quebec Workmen's Compensation Act. Claimant must first seek annual rent—not capital sum

Court at Montreal it was held that an injured workman, even when he charges inexcusable fault against his employer, is not entitled to claim judgment for a capital sum in his favour to the extent and upon the same grounds as though he had taken action under the common law. The question arose under the following circumstances: A workman employed in a machine and foundry shop at Montreal claimed he had suffered permanent disability through an accident and claimed the sum of \$4,442 under the Workmen's Compensation Act, alleging inexcusable fault on the part of the defendant company. While claiming he

was partially and permanently incapacitated he did not ask that the court should award him an annual rent, but simply for a condemnation in damages generally as though the action were taken under the common law and not in virtue of the Workmen's Compensation Act. Mr. Justice Greenshields pointed out that under the Workmen's Compensation Act the only thing the court could do in the event of permanent incapacity was to fix the annual rent to be paid the injured person, and in the case of

inexcusable fault the court might increase the rent beyond the statutory limit and thus indirectly increase the capital of the rent. The first thing to be done, however, was to fix the rent. Consequently he held that the plaintiff had not the right to demand payment of a lump sum. The plaintiff was given opportunity to amend his statement of claim and ask the court to fix the amount of rent he was entitled to in the event of his action being maintained. (*Quebec — Waters v. Cape.*)

THE LABOUR GAZETTE

NOVEMBER, 1916

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

October showed no falling off from the active industrial conditions of the previous month except in certain seasonal industries and in instances where it became necessary to curtail operations on account of a shortage of labour, a condition which was apparent in some localities in coal mining, lumbering and agriculture, and in certain branches of manufacturing. Only two new disputes were reported and these affected a comparatively small number of employees. Prices were steeply upward, the Department's index number of wholesale prices rising 7 points—from 180.7 in September to 187.2 as compared with 152.4 in October, 1915. Retail prices also rose, the cost of the weekly budget of staple foods advancing from \$8.97 in September to \$9.30 in October. The usual summaries of prices, strikes and changes in wages appear in the General Review and conditions in the industries and trades are given more detailed treatment than in previous issues. A special article deals with the United States child labour law and the compensation law for injured employees of the United States, and among the reviews is a summary of the interim report of the Committee on Prices of the United Kingdom.

* * *

During October reports were received from Boards of Investigation appointed to deal with disputes affecting conductors and motormen of the Moosejaw Electric Railway Company and maintenance-of-way employees of the Grand Trunk Railway system and of the Canadian

**Proceedings
under the In-
dustrial Dis-
putes Investi-
gation Act**

Northern Railway on lines east of Port Arthur. Two applications were also dealt with during the month, one from the maintenance-of-way employees on the Canadian Northern Railway lines west of Fort William and the other from the Canadian Pacific Railway Company in connection with a dispute affecting conductors and trainmen on the entire system. In the former case a Board was established, and in the latter negotiations resulted in a settlement without a Board inquiry. In respect of applications received prior to the beginning of the month a Board was constituted in the case of the Fredericton and Grand Lake Coal and Railway Company and the New Brunswick Coal and Railway Company, negotiations between the parties having failed. A Board was also completed in the case of the Sandwich, Windsor and Amherstburg Railway Company and the Windsor and Tecumseh Railway Company. No further departmental action was taken in the case of the Edmonton Radial Railway and its employees, an agreement having been reached between the parties after negotiations brought about by a representative of the Department.

The Government of the Province of Nova Scotia has recently announced the names of the officials who are to constitute the Workmen's Compensation Board, for the administration of the new Workmen's Compensation Act. The officials chosen are V. J. Paton; K.C., of the legal firm of Maclean, Paton, Burchell and Ralston, of Halifax; Fred. W. Armstrong,

**Nova Scotia
Workmen's
Compensation
Board Chosen**

Glance Bay, and John T. Joy, business agent of the 'Longshoremen's Union. Mr. Paton will be chairman of the Board. By proclamation dated September 20, 1916, the provisions of Part I of the Workmen's Compensation Act respecting the payment of compensation and the right of the workmen thereto, are to become effective January 1, 1917. It will be remembered that the provisions of Part I, relating to the organization of the Board, the classification of industries and the levying and collecting of assessments became effective October 1, 1916, according to a proclamation of May 22, 1916. It is expected that the Board will soon enter upon its duties.

A draft of an act for a system of unemployment insurance in Massachusetts has just been published by the Massachusetts Committee on Unemployment. The proposed act is largely based on principles embodied in the Unemployment

Proposed Plan for Unemployment Insurance in Massachusetts

Insurance system of Great Britain. Following the British plan it is proposed that unemployment insurance shall be compulsory for certain trades under state administration and that employees shall contribute as well as employers and the State. A test of unemployment, which in the United Kingdom is secured by the registration of the worker at the labour exchange, must in some way be provided. As in great Britain it is proposed that administration shall be through existing organizations as far as possible and also that there shall be every inducement upon employers and the State to furnish steady work. The workmen included in the proposed plan are those over 18 years of age receiving \$25.00 or less per week and employed in the following industries: the building trades, leather, textile, rubber, tobacco, clothing, paper, printing, quarrying, vehicles, engineering construction and hauling. It is proposed that the benefit for workmen with a wage of \$8.00 per week or less shall be \$3.50 per week,

the dues to be 10 to 15 cents per week, divided between the workman, the employer and the state; for workmen receiving \$8.00 to \$12.00 per week the benefit should be \$5.25 and the dues 18 to 22 cents per week, while the benefits for workmen receiving \$12.00 or more per week should be \$7.00 per week, the dues 20 to 26 cents per week. It is proposed that administration of the scheme shall be vested in a commission.

The first Annual Report of the Board of Child Welfare of the City of New York, which was appointed in August, 1915, has recently been issued. According to the report

a budget of over \$450,000 was granted for allowances to widows with children. During the year 9,099 applications were received and allowances were granted to 1,084 widows with a total of 3,315 children. The average monthly allowance per family was \$22.80, the total monthly pay-roll on August 1, 1916, amounting to \$24,164.86. The majority of the families received between \$30 and \$50 per month, only 34 receiving the maximum amount, which is between \$50 and \$60. The report states that 210 children were removed from institutional care and when it was thought that the mother was doing too much work outside the home, increases in the allowance were made. Each widowed mother who receives assistance is informed that "this allowance is not granted to you as a matter of charity but in accordance with the laws of the State."

* * *

There were 216 co-operative credit associations—14 urban and 202 rural—at work in the United Kingdom at the end of 1914. Their aggregate membership was 22,273 as compared with 22,671 in 223 associations in 1913. The amount of loans advanced by these associations in 1914 was £71,700 and the amount re-

Agricultural Co-operation and Tenants Co-partnership Societies in the United Kingdom

paid (including interest) was £77,108 as compared with £72,308 advanced and £81,307 repaid in 1913. The total capital in 1914 was £170,301 as compared with £168,700 in 1913 and the amount owing by borrowers was £113,537 as compared with £113,693.

In addition to the co-operative societies engaged in agricultural distribution and production there were in England and Wales, in 1914, 63 registered societies for the mutual insurance of the pigs and cattle belonging to their members. Registered societies of this kind, however, constitute only a small minority of the total number as there were about 1,200 unregistered pig and cattle societies in England alone.

In 1914 there were also at work 58 tenants' co-partnership societies with an aggregate membership of 4,735, a total share, loan and reserve capital of £2,151,138, receipts for rents £111,927, and a profit, before reduction of interest on share capital, of £13,546. The aggregate cost and value of the lands and buildings owned by the societies was £2,172,623. In 1913 the number of societies was 46 with an aggregate membership of 4,206.

According to the Third Annual Report of the Winnipeg Free Employment

**Winnipeg
Municipal
Employment
Bureau
Annual Report**

Bureau for the year ending September 30, 1916, there was an increase of 1,651 in positions filled as compared with the previous year.

The effect of the war on the labour supply is evidenced by the fact that only 84 per cent of the positions offered were filled, as compared with 88 per cent in the previous year. There has also been a decline in the positions filled by English-speaking work-people. The increased demand for labour is also evidenced by the lesser number of persons given employment by city departments as compared with 1915 — only 317 persons being given civic employment as compared with 3,831 dur-

ing the previous year; this is due in some measure, however, to a discontinuance on the part of the city departments of the policy of securing all work-people from the Bureau.

The following is a summary of the year's work:

	1913-14	1914-15	1915-16
Positions offered in city for men.....	6,137	8,634	9,891
Positions filled in city for men.....	5,983	8,361	9,196
Positions not filled.....	154	273	695
Positions offered out of city for men.....	1,432	1,810	515
Positions filled out of city for men.....	1,149	1,524	296
Positions not filled.....	283	286	219
Positions offered in city for women.....	6,054	6,697	9,575
Positions filled in city for women.....	5,051	5,406	7,537
Positions not filled.....	1,003	1,291	2,038
Positions offered out of city for women.....	260	721	447
Positions filled out of city for women.....	111	251	164
Positions not filled.....	161	470	283
Total positions in city for men and women.....	12,191	13,767	16,733
Total positions out of city for men and women....	1,602	1,775	460
	13,883	15,542	17,193

The Women's War Register of Montreal which was organized September 11, 1916, has issued a report covering the work from that date to October 15. In this period

**Registration
of Women
for War Work
at Montreal**

117 women have registered, 213 others having registered at the temporary office during June and July. Circulars have been sent to manufacturers, banks and insurance companies, and while no lack of unskilled woman workers is reported, replies from munitions works indicate that there is a shortage of women experienced

in industrial work. Applications are being continually received from munitions plants and a number of women on the register have been placed, a few in positions of responsibility; all the women placed have received the rate of wages ordinarily paid to men for the same work. One establishment in Montreal has found that women can be employed on several of the processes in connection with the manufacture of munitions of war and this firm is employing a considerable number of them. Those in charge of the register anticipate that the demand for woman workers will steadily increase.

* * *

At Calgary a movement for the improvement of the working conditions of

domestic servants has just been organized as the Calgary Housekeepers' Association. Among the objects of the association may be noted the securing of a better recognition of the position of servants or housekeepers and the obtaining of proper conditions of work, including a standard wage and a maximum day. The association will also endeavour to defend its members against unfair treatment by employers and to provide for their general comfort, safety and efficiency. The methods to be employed for the accomplishment of these ends are set forth in the constitution as follows:

(1) A printed contract form, to be used by members of the association in accepting positions with employers; (2) a course in Household Science for which a certificate shall be given to successful candidates; (3) a minimum wage and a maximum day. If more time than the maximum day is required it shall be counted as overtime and shall be paid for as provided in the By-laws; (4) a uniform dress with a distinction to indicate whether the wearer is certified or uncertified.

The By-laws provide for a minimum wage of \$15 per month and a maximum day of 10 hours, overtime to be charged for at the rate of 15 cents per hour. The contract form is as follows:

I,.....Housekeeper, hereby promise good behaviour and my best services to Mrs. Employer, on the following terms: The rate of wages shall be \$. per month, payable at the close of each month. Ten hours shall constitute a day's work on week days and six hours on Sundays and on public holidays. If more hours' work are required in any day they shall be regarded as overtime and shall be paid for at the rate of 15 cents an hour. I shall have every Sunday evening free after half-past six o'clock, unless otherwise mutually agreed upon. The employer will speak of me as her "Housekeeper" and shall address me as "Miss"..... The privilege of entering or departing by the front door shall be accorded me if I wish to use it, also the use of a suitable room one evening a week in which I may entertain my friends until 10 o'clock, it being understood that the home will not be unpleasantly disturbed by such entertainment. I will make it a rule to be in my employer's house at 10 p.m. unless otherwise mutually arranged and to preserve the quietness of that hour. Proper board and comfortable and sanitary lodgings shall be provided for me by my employer. This engagement of service may be terminated at any time by either party giving two weeks' notice to the other party. Less notice may be given if mutually agreed upon, and in case of violation of any of the terms of this agreement either party may terminate the engagement immediately.

All of which is confirmed by.....
Housekeeper.
and accepted by Mrs.
Employer.

Calgary, 191..

INDUSTRIAL CONDITIONS DURING OCTOBER, 1916

I.—GENERAL REVIEW

A pronounced labour shortage in many lines of manufacture, in particular in the metals, machinery and conveyances, and the leather, boots and shoes and rubber groups, in some branches of transportation, in mining, and to some extent lumbering, was a feature of the labour market in October. Municipal and public works also, in a number of localities were curtailed on account of an under-supply of labour. Manufacturing was active in practically all lines, many firms working overtime on account of labour shortage, chiefly of skilled workmen. Transportation by rail was reported active in most localities, and water traffic, while affected by the approach of winter, was fairly well sustained. Metal and coal mining was very active, though there was a continued labour shortage in coal mines.

Building and construction was fair in many parts of the Dominion, the erection of dwellings and extensions to factories furnishing the bulk of activity. Railway and general construction was on the whole quiet.

Lumbering was fairly active, though sawmills were commencing to close down for the winter. Men were being hired for the woods and some districts reported a shortage of this class of labour. In some parts of the West threshing was delayed on account of snow and rain and quite a number of men gave up the work, leaving a serious shortage in some localities when threshing was resumed. According to returns received from eight city corporations the decline in municipal employment which has been noticeable since July continued in October as indicated by the amount of wages paid employees temporarily employed in the first fortnight of the month. The num-

ber of such employees on the pay-roll was, however, practically the same as in September.

During September there was a decrease of 8.13 per cent in the demand for workers as compared with August as shown by reports from employment bureaus. The number of vacancies notified to all offices showed a daily average of 2114.29 as compared with 2195.45 in August, and the number of persons placed a daily average of 827.06 as compared with 1118.32 in the preceding month. The proportion of the total vacancies filled to the total vacancies notified was 39.19 per cent as compared with 49.32 per cent in August. Figures as to vacancies notified for women and girls gave a daily average of 348.27 as compared with 354.25 in August, and the number placed a daily average of 125.84 as compared with 126.53 for the previous month. Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver, Winnipeg and Vancouver only showed decreases in the demand for workers. Montreal and Toronto showed the largest gains. Noticeably larger demands were also recorded in Fort William and Port Arthur and Calgary, while Victoria showed a decrease.

The strike record for October continued to show a decline, there being nine strikes as compared with ten in September, and two new disputes compared with three the previous month. The new disputes concerned two establishments and 47 employees, the clothing and transport trades being affected. Three of the nine strikes in existence during the month were terminated, two of the settled strikes being those which had arisen during October. Six strikes

The Labour Market

Strikes

remained unsettled at the end of the month.

Prices were steeply upward, the index number of wholesale prices rising seven points, from 180.7 to 187.2 for October, as compared with 152.4 a year before and 134.6 for October, 1913. The advance was due chiefly to dairy products, but grains and breadstuffs were also up steeply and many advances in materials occurred. Vegetables were also higher. In retail prices the cost of a family budget of 30 staple foods rose from \$8.97 in September to \$9.30 for October compared with \$7.82 a year ago and \$7.99 for October, 1914.

By an agreement affecting the Canadian Pacific Railway Company and about 8,000 conductors, brakemen and yardmen, which came into operation on November 1, the compensation of practically all the employees was increased and the yardmen received a general increase of 2 cents an hour. About 4,000 steel workers at Sydney, N.S., were granted an increase of ten per cent in their wages, dating from November 1. The wages of about 6,700 coal miners in Nova Scotia employed by the Dominion Steel Company were advanced four per cent from November 1. A "war bonus" of ten per cent, effective on the same date, was also granted, and a special bonus of five per cent to producers of coal working underground who work 22 days in a period of four weeks. About 3,200 maintenance of way employees of the Grand Trunk Railway Company received an advance in wages through the mediation of a Conciliation Board under the Industrial Disputes Investigation Act. Gang foremen were granted an increase of 20 cents per day over the old rates from \$2.40 to \$3.10 per day. Section men were granted an advance of 25 cents over the old rate from \$1.70 to \$1.80 per day. The increased wages dated back from September 1. The wages of 170 printers on the English newspapers at Montreal

were advanced from \$22 to \$24 per week; this increase affected all classes except the machine operators. Employees of the Sandwich, Windsor & Amherstburg Electric Railway were granted an increase from a rate of 25 to 28 cents per hour to a rate of 28 to 32 cents, with an extra 1 cent per hour in lieu of the company supplying uniforms; formerly the company contributed nothing toward uniforms. The settlement with regard to wages was reached by conciliation under the Industrial Disputes Investigation Act. Civic employees to the number of 275 of the Works Department at Hamilton, Ont., received various increases in wages ranging from \$1.00 to \$7.41 per week for those paid weekly and from 1½ to 10 cents an hour for those paid by the hour. About 300 civic labourers at Ottawa had their wages advanced from 25 cents to 28 cents per hour. The City Council of Toronto granted to unskilled labourers in the employ of the city, including employees of the municipal railway, an increase from 27½ cents to 30 cents per hour. About 80 female employees of a Bank Note Company at Ottawa were granted an advance in wages which increased their earnings from a rate of \$4.50 to \$7.50 per week to a rate of \$5.00 to \$8.50 per week.

The total imports of merchandise for consumption in Canada for September, 1916, amounted to \$68,796,262, compared with \$72,331,014 in August, 1916, and \$38,030,320 in September, 1915, an increase of \$21,488,919. Domestic exports of merchandise for September, 1916, amounted to \$90,285,181, as compared with \$96,091,028 in August, 1916, and \$46,129,735 in September, 1915. For the nine months ended September 30, 1916, imports entered for consumption amounted to \$554,855,581 in 1916, as compared with \$322,337,687 in 1915, while the exports for the same period amounted to \$766,798,104 and \$348,987,946 respectively. Increases in the products of the mine, animals and their produce, agriculture

Prices

Changes in Wages and Hours

Trade and Finance

and manufactures were shown, while decreases were noticed in the fisheries, the forest and miscellaneous merchandise.

The following table gives a convenient summary of Canadian imports entered for consumption and domestic exports:

Bank clearings as indicated by returns from 16 cities showed an increase in October as compared with the previous month, the total rising from \$808,277,577 in September to \$999,310,158 in October, an increase of \$191,032,581 or 23.63 per cent. Grouping the returns by provinces increases were shown in all the provinces. As compared with the corresponding month of last year bank clearings showed an increase amounting to \$213,495,249, or 21.36 per cent, the total for October, 1915, being \$785,814,909. As compared with October of last year there were gains in all the provinces. Of the larger cities Montreal showed a decided increase as compared with both September, 1916, and October, 1915. Toronto, Winnipeg and Vancouver showed increases both as compared with September and with October last year.

Canadian revenue for the month of

September, 1916, amounted to \$19,403,872.16, as compared with \$13,154,318.15 for September, 1915, an increase of \$6,249,554.01. The expenditure on capital account for September, 1915, amounted to \$30,368,006.27 which comprised \$28,228,176.09 for war purposes, and \$2,139,830.18 for public works, including railways and canals.

The bank statement for September, 1916, showed the paid-up capital of the chartered banks of Canada to be \$113,025,545, as compared with \$113,018,937 for the month of August, 1916. Deposits payable on demand for September amounted to \$454,148,049 as compared with \$443,317,275 for August, 1916. Notes in circulation for September, 1916, amounted to \$135,285,031 as compared with \$122,656,083 in August. Loans to cities, towns, municipalities and school districts during September amounted to \$38,708,745 as compared with \$39,882,811 during August, 1916.

BANK CLEARINGS IN SIXTEEN CANADIAN CITIES FOR THE MONTH ENDED OCTOBER 31, 1916.

II.—THE INDUSTRIES AND TRADES

Metals, machinery, conveyances. — Very active conditions prevailed in metal manufacturing. Halifax reported bolt and nut mills, stove and furnace factories, boiler shops, skate factories, shipbuilding and repairing plants all active, with a shortage of skilled help. Sydney also reported the steel industry active and suffering from a labour shortage. Amherst reported the car plant was not building any cars, but was expected to start on an order for refrigerator cars soon. Moncton reported active conditions in the car shop, but stove and furnace plants were quiet. Sherbrooke reported metal manufacturing firms active,

some of them building extensions to plants, and at St. Hyacinthe manufacturers of stationary engines and boilers and of farming implements and traction engines were busy. At Three Rivers the Canada Iron Foundry were employing an average of 370 men and the machine shop was running day and night. St. John and Iberville reported the Singer Manufacturing Company working full-handed on large orders. At Toronto metal and machinery trades were busy, but the structural steel industry was adversely affected by scarcity of steel as so much of the output is required for special orders; the automobile industry was very active. Hamilton reported the rolling mills very busy with a scarcity

of help; structural steel companies were also busy; the Dominion Steel Foundry Company, manufacturing cars, etc., were very active and the National Steel Car Company required 250 men; stove foundries were active, with moulders in demand; the International Harvester Company, the Sawyer-Massey Company, and the Oliver Chilled Plough Company were very active, also sheet metal works. Niagara Falls reported cutlery and plating factories busy and advertising for help; establishments engaged in manufacturing fire-arm sights, chains and carriage mountings were also busy. At St. Catharines, manufacturers of boilers, electrical apparatus and fixtures were active. Motor boat and engine manufacturers at Brockville were fairly busy and manufacturers of automobiles very active; the Canadian Carriage Company was working overtime, and the James Smart Manufacturing Company was active on furnaces but quiet on stoves. At Kingston the locomotive works was very active with sufficient orders on hand to keep them busy for some time; the shipbuilding company, however, was slack. Peterborough reported the Canadian General Electric Company busy and moulding and machine shops active, some of these factories working overtime. At Galt establishments making stationary and portable boilers and gas engines were very busy. Stove and furnace foundries also were active and the car and coach company at Preston was busy. Brantford reported manufacturers of engines and boilers very busy on engine orders and pulp mill machinery; the carriage company was running full time and the stove works working overtime; three manufacturers of agricultural implements were running to full capacity and were calling for unskilled labour. Kitchener reported that one plant making portable steam engines and threshers and an automobile factory were not as busy as earlier in the season, but that manufacturers of bicycles and gasoline engines and the Canadian Buffalo Forge Company were very active; the latter was making a large addition to its plant.

Stove and furnace foundries at Guelph were busy and the sewing machine factory was active. At London the rolling mills and wire and iron works were busy; the McClary Manufacturing Company was erecting a large addition to its tin shop and was busy in the tin department and in the furnace and stove departments as well; the George White & Sons Manufacturing Company was making large shipments of steam tractors and threshing machines to the Canadian West. St. Thomas reported the Erie Iron Works fairly busy and the Canadian Iron Corporation active, with a scarcity of metal workers. At Chatham carriage factories were very active; the local plant of the International Harvester Company, which manufactures wagons and carts, was working overtime part of the month. At Orillia the stove factory was behind with orders owing to difficulty in procuring labour; the agricultural implement factory was also finding difficulty in keeping pace with orders owing to labour shortage, and part of the month worked overtime. At Port Arthur the Western Dry Dock Company was employing about 750 hands in shipbuilding and repair work; two freight boats for ocean service were launched in September and October and the keels of two others were being laid; overtime was being worked on the engines and fittings of the two boats already launched; the local blast furnace was not in operation. Winnipeg reported metal factories well engaged. At Medicine Hat the Alberta Rolling Mills were active in turning out rolled iron and were also busy in the nut and bolt department, where a number of girls were employed; the Alberta Foundry Company also was busy. Calgary reported the metal manufacturing companies busy, and at Edmonton machinists and electrical workers were well employed. Shipbuilding at Vancouver was active, some wooden ships for the lumber trade being built; sheet metal manufacturing generally was quiet. Nanaimo reported the one small foundry in the district working steadily. At Victoria the iron shipbuilding industry was

steady and a full staff of workmen were employed in all the yards; the building of three new wooden ships was proceeding rapidly, about 150 men being employed.

Food, tobacco and liquors.— Establishments in the food, tobacco and liquors group were active or fairly so, with the exception of breweries; the latter were reported quiet in many localities owing to recent temperance legislation, and some cigar factories were quieter for the same reason; manufacturers of aerated waters and soft drinks reported business improved. At Halifax sugar refineries, meat packing houses and confectionery establishments were active. Charlottetown reported creameries, dairies and condensed milk factories busy, also tobacco factories, three plants being actively employed on local and export trade. The sugar refinery at St. John was working day and night and biscuit manufacturers and confectioners reported business good; aerated water and soft drink establishments were active and the two breweries in St. John and vicinity were steadily at work. Flour mills at Newcastle were busy. At Montreal baking and confectionery establishments were fairly busy, though slack in candy departments. Aerated water and soft drink establishments were active and tobacco concerns busier than for some time past; cigar factories especially were busy with a demand for operators. At St. Hyacinthe the distillery was in full operation with plenty of orders and at Three Rivers six aerated water and soft drink establishments and one brewery were busy. At Hull the Matthews-Blackwell meat packing establishment was busy. The Windsor Company at St. John's and Iberville, manufacturers of preserved fruits and vegetables, were working overtime. Toronto reported the provision trades normal, but cigar factories and breweries quiet; breweries were manufacturing mild beers and soft drinks. Candy factories, employing large numbers of women and girls, were busy on Christmas orders and some overtime was worked; fruit and vegetable canning establishments were

fairly busy. Hamilton reported abattoirs active and canning companies very busy; the large tobacco factories were busy on Western orders but smaller factories were only fairly well employed; breweries and distilleries were quiet. At Niagara Falls the Shredded Wheat factory was busy and fruit and vegetable canneries very active and constantly advertising for more help. Flour mills, fruit and vegetable canneries, soft drink and brewing establishments were all reported busy at St. Catharines. The Graham Evaporating Company at Belleville, employing a large number of men and women, was running day and night. Oatmeal and cereal mills and meat packing houses at Peterborough were active. At Brantford flour mills were running night and day and the Matthews-Blackwell meat packing plant was running full time; the Patterson Biscuit and Confectionery Company was working overtime in its candy department and reported a shortage of woman workers. At Kitchener, C. H. Doerr & Company's confectionery and biscuit business was working overtime owing to a scarcity of labour. Cigar factories were not as busy as in the previous month; two new factories started and one old one closed down; breweries in both Kitchener and Waterloo were working overtime in some departments; the Dominion Sugar Company began operations on October 12, running a double shift of 12 hours, Sundays included, and was employing about 380 men; meat packing concerns were busy. Guelph reported flour mills running day and night but breweries had reduced staffs by about one-half since the enforcement of the Ontario Temperance Act. Stratford reported flour mills running day and night and meat packing houses busy, but cigar factories very dull. At London the D. S. Perrin Company and the McCormick Company, large manufacturers of biscuits and candy, were very busy; cigar factories which are an important branch of industry at London reported active conditions, breweries also were busy, and no help had been laid off on account of temperance legislation. St. Thomas re-

ported flour mills but and meat-packing houses fairly active. Chatham reported the sugar refinery at Wallaceburg running full time and the abattoir at Chatham very active. At Fort William flour mills were active. Winnipeg reported the foods, tobaccos and liquors group satisfactorily employed; the cheaper lines of cigars were not being manufactured since prohibition became effective and some of the factories formerly engaged in making these lines were closed; others were manufacturing a better quality and employing double the number of hands. Brandon reported flour mills busy, breweries and soft drink establishments active, but cigar factories dull. At Regina flour mills were running full time and the two abattoirs were busy; three aerated water establishments were quiet; the one brewery in the city was quiet and had turned part of its building into an abattoir and packing house. Moose Jaw reported flour and rolled oat mills very active, but breweries quiet. Flour mills at Prince Albert were running steadily and creameries making shipments of butter, one firm shipping large quantities to England. At Saskatoon the Quaker Oats mill were running steadily and the Saskatoon Bread Company was enlarging its plant; the bottling works were doing a brisk business and the one brewery in the city was active. Medicine Hat reported flour and feed mills actively engaged, with labour in demand; soft drink establishments were active, but breweries dull. At Calgary flour and feed mills and abattoirs were reported active; aerated water and soft drink establishments, tobacco factories and breweries were quiet. Edmonton reported bakers and confectioners well employed, but cigar factories very quiet. At Fernie the brewery was active, chiefly on orders from outside the province. At Vancouver cigarmaking was reported busier than for some years and other establishments in the foods group were fairly busy.

Textiles, carpets and cordage.—In the textiles group nearly all localities reported active conditions. At Halifax

the cotton mill was busy and rope and twine makers were actively engaged. Westville reported the woollen industry quiet. At Truro underwear and knitting factories operated full time and cotton factories were working overtime. Moncton reported woollen factories and manufacturers of hosiery, underwear and knitted goods very active. At Montreal cotton factories were very busy with a scarcity of competent help, and rope and twine factories were short of hands. Sherbrooke reported cotton and woollen mills active. At St. Hyacinthe the Penman Company was very active, working day and night and employing a large number of hands. The cotton factory at Three Rivers also was working day and night with many orders ahead. St. John's and Iberville reported the Belding-Paul Corticelli Company working with its full staff, and the Cluett-Peabody Company active with a great demand for workers. Textile workers at Toronto were reported active, overtime being worked in knitting mills; the Toronto Carpet Company, employing 400 women and girls, was finding difficulty in securing help and in the weaving department was working overtime; three cotton factories at Hamilton, employing in all over 1,000, were busy, and underwear and knitting factories were active. Cotton mills at Kingston were busy with orders ahead for some months; the hosiery mill was also active. Woollen mills at Peterborough were working overtime and tents and awnings and carpet factories were active; manufacturers of cottons and woollens were very busy. Woollen mills at Brantford were active on domestic and export orders with a shortage of woman labour; the Niagara Silk Works Company was running full time and advertising for female help; the Brantford Cordage Company was also very busy and advertising for woman help. At Kitchener hosiery and underwear factories were busy, also felt and twine factories. At Guelph cotton spinning mills were running overtime with a shortage of female help; woollen spinning mills were also active with large orders ahead; knitting factories, linen

mills and carpet factories were active. The knitted goods factories at Winnipeg were busy on sweaters and soldiers' socks and tents and awning factories were steadily engaged. Vancouver reported sustained activity in the manufacture of knitted goods but rope and sail makers were quiet.

Clothing and laundering.—In the clothing and laundering group active conditions were reported from nearly all points in the Maritime Provinces. At Halifax ready-made clothing factories, laundries and tie and collar establishments were busy, and at Truro shirt factories and cap factories were active, one cap factory working overtime. Cap manufacturers at Moncton were active. At Montreal ready-made clothing establishments were very busy, also shirt, collar and button factories; factories making hats, caps, gloves and fur goods were very busy; women's whitewear factories were active on Western orders and steam laundries and dyeing establishments were busy with a shortage of help. Ready-made clothing manufacturers at St. Hyacinthe were working overtime, with a demand for woman and girl help; shirt factories also were short of woman help; whitewear factories and laundries were well engaged; establishments of this kind at Three Rivers were also busy. At St. John's and Iberville, Cluett-Peabody & Company were in need of workers who were also required at the straw hat manufacturing plant; laundries were active. Garment workers at Toronto were reported busy and furriers and cap makers well engaged; manufacturers of neckwear, collars and gloves were busy on regular orders, the A. T. Reid Company reporting places for 100 more girls; much the same conditions existed in the whitewear factories where preparation for the usual January sales made October a busy month; business with steam laundries was also improved, the high summer wages continuing and no special lack of help being experienced. In dyeing and cleaning establishments it was found difficult to keep up regular staffs of women for the press-

ing departments. The large ready-made clothing establishments at Hamilton, employing in all nearly 3,000 working people were active; shirt factories also were busy and manufacturers of hats and caps were active; Niagara Falls reported the hat factory busy and the corset factory in need of more hands; laundry work and employment was lessened somewhat by the closing of the large summer hotels and restaurants, but regular custom laundries were busy. St. Catharines reported steam laundries and dyeing establishments active and at Brockville the Wolthausen Hat Corporation was fairly active and the factory working on gloves, mitts, suspenders and ties was running full time. The overall and shirt factory at Brantford was active. At Kitchener the robe and clothing factory was busy but handicapped by slow delivery of furs; shirt and collar factories were very active, with a shortage of help. Glove factories and whitewear factories were very busy. The whitewear factory at Guelph was active, with workers in demand. Stratford and London reported ready-made clothing establishments active and steam laundries busy. At Orillia one ready-made clothing factory reported business good and the number of employees normal; another factory making mackinaws for miners and lumbermen reported business not so good as before the war but improving within the last few months. Winnipeg reported ready-made clothing factories active with larger staffs than a year ago; shirt manufacturers were very busy and ready to engage any experienced help available; manufacturers of hats, caps, gloves and fur goods found difficulty in securing sufficient experienced help; steam laundries and dyeing and cleaning establishments were busy with a demand for experienced help. Regina reported laundry workers in demand. At Edmonton there was a demand for garment workers. Ready-made clothing factories at Vancouver were active, with a shortage of experienced operators for power machines; laundries were active but had no difficulty in securing employees.

Pulp, paper and fibre.—In the pulp, paper and fibre group activity was sustained. The felt and paper works at Halifax reported active conditions and at Newcastle pulp and paper mills were busy with good prospects. Large mills in the Quebec district were busy and increasing staffs. The Wayaganack pulp and paper mills at Three Rivers, employing about 900 hands, were busy day and night. The large works of the Eddy Company at Hull were running day and night. Ottawa reported pulp and paper mills handicapped for several weeks by low water in the Ottawa river which resulted in some mills being temporarily closed. The felt and tarred paper companies at Hamilton were active and pulp and paper mills at St. Catharines were busy. A factory at Brantford making roofing paper was approaching the usual slack season but was keeping its hands on short time making up stock.

Printing, publishing, paper goods.—In printing, publishing and paper goods activity prevailed in some localities, but conditions were only fair in others. Newspaper and job printing houses and paper box factories at Halifax and St. John were active. At Montreal newspaper and job printing offices were active and engraving and lithographing firms fairly busy. Sherbrooke reported printing and bookbinding establishments active. At Three Rivers printing offices, bookbinding firms and paper box factories were busy. Printing, engraving and lithographing establishments at Toronto were steadily engaged and publishing and stationery houses were working overtime in some establishments; the W. J. Gage Company was using woman workers as extensively as possible in men's places; in paper box factories there was an increase in the supply of labour but a shortage of experienced workers; these factories were working overtime, which was expected to continue until the end of the year. Hamilton reported the large newspapers active and binders busy, also lithographing establishments and paper box factories. At Niagara Falls paper

box factories were busy. St. Catharines, Brockville, Kingston and Peterborough also reported activity in newspaper offices and binderies. Printing and job offices at Galt were fairly busy and paper box factories were active. Brantford reported box factories short of help. Newspaper and job offices at Kitchener were fairly busy and paper box factories active and short of help. At Woodstock there was a demand for printers. At London newspaper and job offices continued active and paper box factories were busy, although handicapped by slow delivery of material. Newspaper offices at St. Thomas were busy and job offices fairly so. Newspaper and job printing offices in Fort William and Port Arthur were busy. At Winnipeg binderies were busy and lithographing establishments unusually active; paper box and bag factories were busy, with a demand for girl workers. Brandon reported printing offices fairly active. At Moose Jaw and Medicine Hat printing offices were well employed. Calgary reported newspaper and job offices active but binderies and paper box factories quiet. At Vancouver conditions were fair in newspaper offices, but less active in job offices; engraving and lithographing firms were quiet. Victoria reported printing establishments fairly busy.

Woodwork and furniture.—In the woodwork and furniture group activity was reported in nearly all localities. Sash and door factories were either busy on regular lines or in the manufacture of boxes. Furniture factories at several points were reported working overtime and suffering from a shortage of labour. Halifax reported sash, door and planing mills, box factories and cooperage factories busy, and similar industries at Sydney were fairly busy. Woodworking establishments at Westville were active and the chair factory at Bass River was very busy. At St. John the box factory was advertising for help; the broom work was reported slack, but two brush factories were busy. At Montreal furniture and chair factories were

reported quiet, but broom and brush factories were busy. At St. Hyacinthe sash and door factories were very active, but chair factories were quiet; organ factories were busy. Toronto reported woodworking and furniture establishments active, and a strong demand for skilled brush makers; piano factories were fairly busy, though player piano departments were quiet; some overtime was being worked in one factory; toy and doll manufacturers at Toronto had a busy month on Christmas orders and the Dominion Toy Manufacturing Company worked some overtime. At Hamilton planing mills and sash and door factories were active; also wooden box factories; furniture factories were busy, and broom, brush and cooperage factories were all active. Niagara Falls and St. Catharines reported planing mills busy, and in the latter city wooden box and basket factories were active. Peterborough reported sash and door factories quiet in regular lines but busy on boxes. Guelph reported sash and door factories fairly well employed and piano factories active. At Stratford sash and door factories were busy and furniture and chair factories very active, with a shortage of help; broom and brush establishments were also busy. Woodstock reported furniture and chair factories in need of labour, and piano and organ factories and wagon and sleigh factories constantly requiring skilled help. London reported sash, door and planing mills fairly busy and wooden box factories active. The local piano company had plenty of orders but was short of skilled help. Sash, door and planing mills at Chatham were very busy and working overtime the greater part of the month. At Orillia sash and door factories were quiet, but the furniture factory was unable to keep up with orders owing to difficulty in procuring help. Sash and door factories at Winnipeg and Brandon were well employed, and at Regina experienced men were in demand. Moosejaw reported sash, door and planing mills and box factories active. At Saskatoon only two planing mills were running, several mills which

went out of business during the depression not having re-opened. At Medicine Hat planing mills were actively employed on regular lines and in the manufacture of boxes. Calgary reported sash and door factories quiet, and at Vancouver woodworking and furniture industries generally were dull.

Leather, boots and shoes, rubber.—In the manufacture of leather, boots, shoes and rubber goods activity was general and in many instances a shortage of help was reported. Halifax reported boot and shoe factories active and the factory at Charlottetown was fairly busy. The tannery at St. John and the shoe factory were well employed. Manufacturers of harness and horsegoods at Moncton and Newcastle reported active conditions and at Fredericton tanneries and boot and shoe factories were active. At Montreal and Quebec boot and shoe factories and manufacturers of trunks, bags and rubber footwear were busy. Tanneries at St. Hyacinthe were busy, with some slackening towards the end of the month owing to stocktaking. Three Rivers reported tanneries active and boot and shoe factories busy. At Toronto boot and shoe manufacturers were busy, with experienced workers well employed, but a lack of apprentices. The Julian Sale Leather Goods Company reported increased trade with which they were unable to cope because of a lack of help. At Hamilton the McPherson Shoe Company was very active, with a scarcity of help, and harness manufacturers were busy. Niagara Falls reported a local factory making shoe parts very busy, and that a site had been acquired for a rubber tire factory. St. Catharines reported tanneries and manufacturers of harness and horsegoods and of rubber footwear active. At Kingston the tannery was very busy and harness and saddle manufacturers at Peterborough were active. At Galt the tannery was working steadily and two shoe factories were working overtime. Brantford reported the shoe factory busy. At Kitchener the two largest tanneries in Canada were very busy and short of help; boot and shoe factories were also

busy, some working overtime. Trunk and bag factories were very busy; the tire factory was active and two large rubber factories were busy, with operators in demand. The tannery at Woodstock was closed. At London the tannery was exceptionally busy, also the sole and heel factory. Shoe factories at St. Thomas reported very active conditions. Orillia reported the local tannery running at about two-thirds capacity owing to difficulty in procuring help. Brandon reported tanneries busy and advertising for help; harness makers also were active. The boot and shoe factory at Vancouver was busy.

Clay, glass and stone.—In the clay glass and stone group of industries there was fair activity in some lines, but in others quiet prevailed. Halifax reported the granite industry at St. George doing well and at Moncton brickyards were busy. St. Hyacinthe reported stone cutting establishments busy, but similar establishments and brickyards at St. Jean and Iberville were quiet, while potteries were working full time. Stone cutting establishments and brickyards at Hamilton were active and sewer pipe and tile manufacturers were busy and in need of labourers; lime kilns and potteries were active and the Dominion Fruit Glass Company, employing about 450 hands was active. St. Catharines reported brick, tile and sewer pipe manufacturers active. Brockville and Kingston reported stone cutting establishments quiet. At Belleville a pottery was well engaged on small pottery ware and small sewer pipes; the Canada Cement Company's plant at Point Ann was busy and expected to run all winter. Brick and tile yards at Stratford were busy but were quiet at London; the Hobbs Glass Company was very busy. Brick and tile yards at Fort William and Port Arthur have been practically closed since the outbreak of war. Brickyards at Brandon, also, were closed down. At Saskatoon brickyards which had closed down a few years ago had not re-opened. A stone cutting establishment at Regina was running full time. At Medicine Hat the Alberta Clay Products Com-

pany, manufacturing brick, tile and sewer pipe, reported business rather slack; the Medalta Stoneware Company reported fair conditions. Brick, tile and cement works near Calgary were active, but stone cutting establishments were quiet. Cut stone and granite works and brick and tile yards at Nelson were fairly well engaged. Brick and tile yards in the Nanaimo district were closed.

Paints, oils, chemicals, explosives.—

Halifax reported paint works busy and two paint mills in the vicinity of Three Rivers were working full time. Soap manufacturers at Hamilton were active and the Grasselli Chemical Company, employing over 1,000 hands, was busy; the F. F. Dally Company, manufacturers of extracts, were active. Niagara Falls reported that a site had been purchased near Dunnville for a gasoline refinery, to produce 10,000 gallons of gasoline per day; the new Axolite factory commenced work and the Cyanimid plant was very busy. At London the Lawrason Powdered Ammonia Company was completing an extension to its factory. At Regina the Imperial Oil Company's plant was running, although not fully completed. The Alberta Linseed Oil Company's plant at Medicine Hat was closed for a few days making repairs.

Water, light and power.—Water, light and power companies were reported active in nearly all localities. The Toronto Hydro-Electric system reported a steady increase of business, and at Hamilton the large gas, light and power companies were actively employed. At Kitchener the water commissioners were seeking an increased supply for the city and light commissioners reported increased earnings in September. Stratford reported gas companies active owing to additional consumption of gas in factories. At London the city had drillers at work seeking additional sources of water supply. Chatham reported activity in connection with the city waterworks owing to the extension of mains to the new sugar plant; the gas and electric companies were also busy extending lines to the different new factories. During the month the high ten-

sion transmission line between Eugenia Falls and Collingwood was completed, and Orillia was drawing additional power from the Hydro-Electric plant in addition to that provided by the city plant. At Regina the city was extending water and sewer mains to the Imperial Oil Company's plant. At Prince Albert waterworks employees were engaged in extending mains to the new station and yards of the Grand Trunk Pacific Railway. Nelson reported the West Kootenay Power Company enlarging its plant to supply the power needed at the Trail smelter.

Railway transportation was active and water traffic, although approaching the

Transportation

close of the season on the lakes, was well sustained. Gross earnings of the Canadian Pacific Railway for September, 1916, were \$12,134,159 as compared with \$10,273,165 in the same month of 1915. Halifax reported steam railways and repair shops active. Westville reported rail traffic very busy, with a considerably larger amount of freight handled than in the previous month. At Charlottetown the railway repair shops in connection with the Intercolonial Railway continued to give employment to a large number of men. Moncton reported traffic on railways and work in repair shops very active, and at Newcastle also repair shops were active. Quebec and St. Hyacinthe reported railway traffic busy, and at Three Rivers steam and electric railways had a good month. At Toronto, owing to the difficulty of securing labour, the Canadian Pacific Railway placed an embargo on freight in less than earload lots, which remained in force until October 24; subsequently a similar embargo was put in force on the Grand Trunk Railway. Railways were making every effort to secure additional help and some women were being employed. Receipts of the Toronto street railway showed an increase during September. Hamilton reported activity on steam and electric roads. In the shipment of pig iron from Hamilton the

Grand Trunk Railway showed a falling off of several hundred tons from September and October, owing to its use in local production. At Brockville the Grand Trunk repair shops were busy, and Belleville reported railway traffic busy and repair shops active. Galt, the centre of several electric radial lines, reported these lines and steam railroads busy. Stratford reported the Grand Trunk Railway shops busy, about 800 men being employed, and St. Thomas reported railways busy throughout the month; the Michigan Central Railway had 36 crews working in train service and the increase in cars handled over last month was expected to reach approximately 7,000 cars; the Wabash-Grand Trunk Railway had 28 train crews working and expected the number of cars handled during October to be as large or greater than in September; men for train service were plentiful; the Pere Marquette Railway had 22 train crews in service and reported business brisk. At Port Arthur and Fort William repair shops were busy. Winnipeg reported active railway conditions, but at Regina freight business was quiet, adverse weather interfering with grain shipments. Moosejaw reported transportation in all lines busy. Saskatoon reported that the Canadian Pacific and Canadian Northern shops had recovered normal activity. Calgary reported transportation in various lines active and at Edmonton railway employees were reported well employed. At Nelson and Fernie railways were active.

Employment on the waterfront at Halifax was quiet, the winter season not having begun. Sydney reported shipping brisk and 'longshoremen well employed. At St. John the docks were being prepared for winter sailings. Newcastle reported 'longshoremen only fairly well employed owing to the cessation of lumber shipments. At Quebec some branches of navigation were quiet. Three Rivers reported quiet conditions owing to a scarcity of steamers. Toronto reported navigation nearly over and 'longshoremen mostly laid off. Inland navigation lines at Hamilton showed an

increase in outward freight during September as compared with the same month in 1915. At Port Arthur work on coal docks and at grain elevators was active. Victoria reported that owing to the near approach of the winter season steamship companies tied up some of their vessels and in a few cases sailings were less frequent.

Both metal and coal mines sustained the activity of the previous month, though labour for coal mines was scarce in many districts, and smelting works in the West Kootenay and Boundary districts were somewhat affected by a shortage of coke. Sherbrooke reported asbestos, chrome iron and copper mines were active. Work was commenced on the erection of the refining plant of the International Nickel Company at Port Colborne, a large number of men being employed, and at Orillia the smelter was busy turning out molybdenum.

Cobalt reported mines working to the limit and a steady production being maintained from both the Cobalt silver mines and the Porcupine gold mines; there were no idle miners and some of the gold mines production was practically dependent upon the number of men that could be obtained; there was a heavy demand for muckers and for experienced machine drill runners. In the Antikokan district, near Port Arthur, little iron ore mining was being done. Some shipments of copper, however, from the same district turned out well and arrangements were being made to develop the mines. Prince Albert reported that preparations were under way to start the shipment of gold and copper ore from the Beaver Lake district. Nelson reported mines and mills running short-handed, and that several old mines had resumed operations. The smelter at Trail was running to its full capacity and the mines at Rossland were very busy. The Noble Five mine at Sandon was constructing several thousand feet of pipe line and there were 500 men employed compared with 150 last

year. Nanaimo reported metal mines on the west coast of the Island active on development work. Prince Rupert reported that the Surf Inlet mines had their large dam completed, permitting transportation to the mines by water; it was reported that the Spanish mine at Alice Arm had been bonded by the Granby interests and work had commenced on the property; other camps reported work very satisfactory, with a shortage of labour in some districts.

In the Sydney district the supply of labour for coal mines was not equal to the demand; negotiations regarding wages increases for all colliery workers in the Glace Bay and Sydney Mines districts were carried on during the month. Westville reported coal mines operating full time, but behind in orders. A slight dispute at the Drummond colliery caused a stoppage of operations for a day, but the matter was at once adjusted. Amherst reported a shortage of help. At Lethbridge coal mines were busy but shorthanded. Calgary reported mining operations in coal, gas and petroleum active. At Fernie the demand for coal was very brisk, and all coke ovens that were able to secure slack were kept in operation. Nanaimo reported coal mines in the city and district very active; most of them working to capacity and calling for men.

Building operations throughout the Dominion varied with the locality, but

considering the lateness of the season a fair amount of activity was apparent during October.

Points in the Maritime Provinces reported plenty of work and favourable weather conditions. Halifax reported many dwellings under construction, as well as additions and alterations to commercial buildings. At Sydney several dwellings were being erected. Westville reported much building being done in the locality, though greatly hampered by lack of labour. At St. John building operations were quiet. Moncton reported active conditions in the erection of dwellings and commercial buildings. At

Building and Construction

Quebec a large amount of building was being carried on and at Sherbrooke building trades were active. At Toronto building was active owing to a steady demand for dwellings; there was very little commercial construction, several large contracts arranged for earlier in the season were postponed owing to a shortage of structural steel. Hamilton reported building brisk with a demand for carpenters and labourers; several large public buildings and additions to plants were being constructed. At Niagara Falls several factories were being enlarged and Belleville reported two industrial plants under construction. Galt reported building active and a scarcity of builders' labourers. At Kitchener building tradesmen were fairly well employed on dwellings and additions to factories. Guelph reported building tradesmen still active on dwellings and factory extensions. At London building was quiet, and at St. Thomas there was a falling off in the number of men employed in the building trades in the city, though there was more work in the district than usual. At Chatham building activity was mainly on additions to industrial plants, work being hindered by a scarcity of labour. At Port Arthur and Fort William building tradesmen were fairly well employed; the Western Drydock Company was erecting shops to take the place of those destroyed by fire and an elevator was also being constructed. Winnipeg reported building fairly active; several hundred members of the building trades asked that work be continued on the new parliament buildings during the winter. Brandon reported building tradesmen busy on dwellings and stores, labour being scarce. At Regina a number of commercial buildings, schools and churches were under construction. Moosejaw reported little building in progress. At Saskatoon very few buildings were being erected in the city, but country building was brisk. Calgary reported active building conditions in the city and in rural districts. Vancouver and Nanaimo reported somewhat improved building conditions.

Railway and general construction was fairly busy. At Halifax pier construction work and the erection of temporary freight sheds at the ocean terminals was carried on day and night. Some dredging and cutting on the Intercolonial Railway spur from Rockingham to the ocean terminals was about completed and tracks and overhead bridges were being built. Some work was being done on docks at St. John and dredging was carried on in Courtenay Bay. The Canadian Iron Foundries at Three Rivers were making extensions to plant and building a wharf on the St. Maurice River. Toronto reported rapid progress being made on the Bloor street viaduct on the Don section; construction work on the section of the Toronto-Hamilton highway near Toronto was delayed on account of local improvements being carried on by municipalities along the road; 31 miles of the road had been completed at the end of the month; good progress was made on the new union station; steel work was practically completed and the stone was being prepared. Excavation on the new Welland canal in the section between Allanburg and Port Robinson was continued. At London the street railway company was doing some double-tracking and other construction work, and at St. Thomas the Bell Telephone Company imported about 35 men for construction work. Dredging was being carried on at Port Arthur and Fort William. At Prince Albert work on the Grand Trunk Pacific offices and freight shed was under way and a considerable number of men were engaged in making the grade from the city and in moving buildings to make way for the yards. Lethbridge reported some construction on the Lethbridge-Weyburn railway line. Victoria reported steady progress on the construction of the new harbour works.

Lumbering in the principal districts was fairly active, mills in some localities closing down for the winter. Employees thus thrown out of work, however, were being hired on for the

woods and for this work a scarcity of labour was reported at some points. At Westville lumbering was active and at Truro steady, with a scarcity of labour. Moncton reported lumber camps, sawmills and shingle mills fairly active. At Newcastle large crews were being hired for the woods and a scarcity of men was apparent. At Fredericton sawmills were still running, with logs enough to keep them supplied until the close of navigation on the river; there was a good demand for men for the camps and operators reported a scarcity of labour. At Quebec some mills were closing down and men were being hired for the woods. Sherbrooke reported the lumbering business active, but a shortage of men for the camps and the possibility of a shorter cut in consequence. Three Rivers reported sawmills busy. On account of low water some sawmills in Hull closed down for the season, their employees finding other work at once. Peterborough reported lumbering quiet, the Peterborough Lumber Company shutting down for want of logs; this company was not expected to put men in the woods this winter owing, it was stated, to the scarcity of men and high wages. Sault Ste. Marie reported that several small mills in the district had closed down for lack of help. At Port Arthur camps were being arranged for the winter; the two mills were running but were not very busy. At Prince Albert sawmills were still running day and night shifts and men were being hired for the camps. Fernie reported lumbering camps throughout the district operating more or less actively, but the labour shortage was being keenly felt; sawmills and shingle mills were also greatly affected by labour shortage; many mills had closed on this account and those operating were having difficulty in filling orders; wages were higher than in the previous season. Vancouver reported the demand for lumber from the Prairie Provinces and other points good and that some mills were working night and day and declining orders; logging was quieter and some of the smaller camps had closed down, partly on ac-

count of lack of labour and partly because it was believed the logs on hand would be sufficient for the winter; shingle mills were also busy and a large increase in export trade was reported. Nanaimo reported lumbering camps in the district working steadily with a shortage of skilled and unskilled labour; sawmills also were working steadily. At Prince Rupert increased activity was reported.

From nearly all districts a shortage of farm labour was reported. Halifax re-

ported experienced help scarce with wages of from \$20 to \$30 being

Agriculture

offered for single experienced men, and for experienced married men \$25 to \$40 with free house, fuel, milk and vegetables. At Toronto farm labour was in demand. Hamilton reported the demand for farm help much in excess of the supply, married experienced farm hands being offered \$300 to \$450 per year, including free house, milk, fuel and vegetables, and single experienced men \$250 to \$350 per year with board. At Niagara Falls farm labour was scarce and at Brantford farm labour was not plentiful, although not in as great demand as last month; wages were \$35 per month with board. At St. Thomas labour was scarce, but there was a light demand, \$20 per month and board being offered by those seeking help. Chatham reported farm help very scarce owing to the large numbers employed in harvesting the sugar beet crop. Winnipeg reported much threshing to be done and farm labour scarce. At Brandon threshing was practically completed; labour was scarce and wages high. In the Regina district farmers were meeting with difficulty in getting threshing done, snow and rain hindering operations; about 40 per cent of the threshing was completed. Moosejaw reported only 50 per cent of the crop threshed, men scarce and wages \$4 per day. Saskatoon reported a labour shortage, about 25 per cent of the grain threshed; machines were idle on account of snow and rain and men were leaving. Medicine Hat reported threshing progressing fa-

yourably, but but a shortage of labour; \$45 per month was the average wage paid farm help, but harvesters were receiving from \$3.50 to \$4 per day; labour was also reported scarce on stock farms and ranches. Calgary reported weather favourable for harvest work and the demand for men not being met; wages were \$4 a day.

Sydney reported that cod was the only fish caught during the month and that only in fair quantities.

Fishing

At Newcastle fishing was quiet; oysters were very scarce, also cod and nearly all other

fish. Victoria reported the salmon fishing season the poorest on record in Southern British Columbia waters and prices paid fishermen were unusually high; practically the whole pack had been sold. The Sydney Canning Company enlarged its premises, and besides carrying on the fish canning business intended to can fruits and vegetables. Prince Rupert reported the fishing industry quiet owing to stormy weather; fishermen were paid as high as 12 cents a pound.

III.—LABOUR AND INDUSTRY IN THE PROVINCES

Nova Scotia

At Halifax all branches of industry were finding it difficult to secure experienced help. In bolt and nut mills, boiler shops, skate factories and rolling mill products, conditions were active; shipbuilding and repairing, stoves and furnaces, electrical apparatus and fixtures and sheet metal works also reported activity and a shortage of skilled help. Sugar refineries and meat packing houses were running steadily; the twine makers were well employed. The demand for ready-made clothing was good, particularly in overcoats. The felt and tarred paper works were active; newspaper and job printing were fairly busy, and paper box factories reported business good. Boot and shoe factories and harness makers were active. Many dwelling houses were under construction, and additions and alterations to several commercial buildings were being made. Work on the French Cable Company's new plant and the Imperial Oil Company's works was carried on, carpenters and skilled labourers being in demand. Pier construction work and the erection of temporary freight sheds at the Ocean Terminals was carried on night and day in order to prepare for this winter's shipping. The dredging

and cutting on the Intercolonial Railway spur from Rockingham to the Ocean Terminals was about completed, tracks were being laid, and overhead bridges built where the cutting has crossed several streets. About 400 men were employed on sidewalks and sewer and water-pipe extensions.

Sydney reported labour generally well employed. In the steel and coal industry the labour supply was not equal to the demand and a shortage of skilled labour was felt in a number of works in the district. Negotiations regarding wages for all colliery workers in the Glace Bay and Sydney Mines districts were carried on during the month. Railways were busy in all departments. Water traffic was brisk and longshoremen were well employed. A large number of men were employed on street work and the waterworks of the city. Cod was the only fish caught during the month and that only in fair quantities.

Westville reported a strong demand for all classes of labour, the average wage for unskilled labour advancing to \$2.50 per day. Railway traffic continued extremely busy and the amount of freight handled was considerably larger than last month. Coal mines operated full time, but were far behind their orders. A difference between the

management and the employees of the Drummond Colliery at Westville in connection with the docking system being used caused the stoppage of operations for a day. On October 15 a general advance of 50 cents per ton on coal was announced by the different collieries in this locality. There was considerable building under way, although operations were hampered by labour scarcity. The lumbering industry continued active; dealers were unable to supply the demand and prices were higher than for many years. The woollen industry was quiet but metal and woodworking establishments were active.

At Amherst there still remained a shortage of help in coal mining, and in many instances the coal dealers were far behind in their orders in the different towns throughout the district. Other industries were working at normal with the exceptions of the car plant which was not building any cars but was expected to start on an order for refrigerator cars soon.

At Truro all branches of labour were well employed, and there was a brisk demand for more men. A representative of the Eastern Car Works was seeking mechanics and labourers, offering 37½ to 40 cents an hour for the former and 20 to 25 cents an hour for the latter, but very few men were available. Aerated waters factory worked steadily but there was the usual autumn falling off in the volume of trade. The underwear and knitted goods factory operated full time and the shirt factory was fairly busy. Cap factories (two) were very busy, one working overtime. The sash, door and planing factory was very busy and the chair factory at Bass River was rushed. In railway operations all branches were exceedingly busy. Building was also brisk. Lumbering was steady with a demand for help.

Prince Edward Island

At Charlottetown tobacco factories were doing a brisk trade. This district possesses three plants and the output is

heavy, both for local and export trade. Creameries, dairies and condensed milk factories were very active. Sash and door factories were busy and the local boot and shoe factory was fairly active. Municipal and provincial employment were quiet, though some work was being done at different points on roads and bridges.

New Brunswick

At St. John the sugar refinery was working night and day and bakeries and confectioneries reported business good. Aerated water and soft drink establishments reported business good and the two breweries in St. John and vicinity were well employed. The cotton factories were working overtime to meet demands and had large orders ahead. The American and Globe laundries have been amalgamated and business generally in this line was reported good. The Partington Pulp and Paper Company has sold its properties in St. John and other sections of New Brunswick to the Nashwaak Pulp and Paper Company, Limited, a new company recently incorporated. Printing establishments and binderies were well employed and paper box factories were busy filling Christmas orders. Sash, door and planing mills were running full time. The Wilson box factory was doing a good business and advertised for help. The broom business was slack, but the two brush factories were busy. The one tannery in St. John and the shoe factory was kept well employed. The granite industry at St. George reported a prosperous year. Saw and shingle mills are still running. The city waterworks have been renewing old mains and installing new ones, renewing service and manholes, and installing meters during the past month, and this has given employment to a number of men; the gas works were running steadily and the electric light and power plants were busily employed. Steam railways were busy but navigation was slack, and longshoremen were not steadily at work. House building was slack but work was started on a

school. The docks at West St. John have been dredged and cleaned up preparatory to the opening of the winter sailings, and dredging continued in Courtenay Bay.

At Moncton all the various classes of labour were steadily engaged and the supply in a number of instances was inadequate to the demand, particularly in the cases of unskilled labour and farm and domestic help. Active conditions prevailed in railway lines, in the building trades and in nearly all local manufacturing plants, necessitating additional operatives and overtime. In car shops conditions were active, but stove and furnace plants were quiet. Establishments in the foods group were active and manufacturers of woollen and knitted goods reported business good. In lumbering camps, sawmills and shingle mills, conditions were fair.

At Newcastle labour conditions for part of the month while good were not quite equal to those of the previous month and there was some slackening in the demand for skilled labour. This was due largely to the closing of the season's sawing in a number of the mills as well as stopping of export of lumber as is general at this period of the year. Carriage builders were active but were able to secure all labour necessary without extra demand. Flour mills were busy but no scarcity of employees was reported. Pulp and paper employees had a busy month and the outlook for continued activity in this branch of labour was bright. Newspapermen and job printing establishments were experiencing some difficulty in meeting the demand made upon them due to exceptional scarcity of skilled printers and pressmen. There was a good demand for sash, door and planing mill employees owing to extensive building operations. Harness and horse good manufacturers reported a good demand and all employees working full time. Electric light and waterworks employees were working full time and there was a slight demand for elec-

trical workers. Steam railway workers were well employed with considerable overtime, and railway repair shops were busy. Longshoremen were only fairly well employed as the cessation of lumber shipments released numbers who had been employed in loading. Large crews were being sent into the woods by operators in the lumber industry; several of the mills have stopped sawing for the present season but most of the men thrown out of employment have gone into the lumber woods. Fishing was quiet. Oysters were reported very scarce, also cod and other fish.

At Fredericton there was an improvement in some industries and open weather increased activity in the building trades. Lumber mills were still running with logs enough to keep them operating until the close of navigation on the river. There was a good demand at increased wages for men for lumber camps; operators reported a scarcity of labour.

Quebec

At Montreal a scarcity of available labour was reported in almost every industry, even in some of those which have not reached the level of business which they had experienced in some of the years immediately preceding the war. Most industries, however, were doing well in spite of this handicap. There has been a big advance in values in most products, but wholesalers advise that this has not prevented retailers purchasing liberally. They all stated, however, that the difficulty has been to get deliveries from manufacturers or importers to fill orders taken. No cotton price lists were being issued, the manufacturers selling their goods at the prices obtaining at the time of delivery. Some manufacturers of woollen goods, such as flannels, blankets and woollen clothing have orders which were placed a year ago but which were not yet completed. All manufacturers of domestic textiles had large orders and there was fear that delivery of spring orders would be delayed. Fur manufacturers

were handicapped by a shortage of labour while orders continued coming in.

Demand for iron and steel products was much greater than the supply. Paint and oil manufacturers had all the orders they could deal with, and their prices were high on account of the cost of raw material. With the large British demand for leather, prices have been advancing, and boots and shoes have been higher in consequence.

Flour, rolled oats, refined sugars, canned goods, butter, eggs and cheese have all made further advances. Lumbering operations in the woods this winter will probably suffer from a shortage of labour.

At its meeting on November 19th the Trades and Labour Council passed two resolutions, one asking for representation on any Government commissions to study the high cost of living and another protesting energetically against methods alleged to be adopted by speculators of storing foodstuffs in great quantities and holding them so as to enhance the price.

There was less tonnage through the Lachine Canal than a year ago, and the wheat was only one-quarter the amount, though coal was much more and oats and barley showed good increases.

During October women workers in establishments in the foods and tobaccos group in Montreal were well employed except those in candy factories, which were slack. Cotton factories were very busy and reported a scarcity of competent help, and rope and twine factories were busy on account of shortage of hands. Ready-made clothing establishments were active, also shirt, collar and button factories. Factories making hats, caps, gloves and fur goods were very busy. Women's whitewear factories were busily engaged on Western orders. Steam laundries and dyeing and cleaning establishments were busy with a shortage of hands. Binderries were busy. Furniture and chair factories were quiet. Broom and brush factories were busy. Saleswomen, clerks

and stenographers in offices and departmental stores, and in commercial, telegraph and telephone companies were busy. It was very difficult to find capable domestic help, many of this class of workers having gone into factories. The technical free classes given by the Montreal Committee of the Council of Arts and Manufactures opened at the beginning of October with 865 pupils registered. The usual course for women began also at the Provincial School of Domestic Science.

At Quebec manufacturing in the metals, machinery and conveyances group showed continued activity, also factories engaged in the production of food products. Cotton mills, printing establishments, sash, door and planing mills were busy. Tanneries and boot and shoe factories were active. Outside building operations were delayed somewhat by rainy weather, but it was expected building tradesmen would be fully employed for the balance of the season. In the lumbering industry men were being hired for the bush, and owing to a considerable shortage of labour wages were from \$15 to \$20 per month higher than last year. The large paper mills were particularly active in securing men. Some sawmills and shingle mills were about to close down for the season.

At Sherbrooke most manufacturing and mining firms found the supply of labour inadequate. The Canadian Ingersoll Rand Company were still busy with extensions, also the McKinnon, Holmes Company. The Canadian Connecticut Cotton Mills have ordered plans for several tenements to be built for their employees. Some real estate firms have also arranged for the erection of tenements owing to the lack of housing accommodation for the help in the various industries. Building tradesmen were active. The lumber business was good but operators found it difficult to secure men, and the cut will be smaller than was intended. Asbestos, chrome iron and copper mining was very active.

At St. Hyacinthe the labour in the various industries was well employed. In some cases overtime had to be worked, and female labour was in demand. Building operations were active; several new buildings were started as well as important repairs, and men in these trades are assured of plenty of work during the winter. Farmers were busy threshing. Wheat, oats, barley, peas and potatoes were under the average, but the fruit crop was plentiful.

Three Rivers reported the Canada Iron Foundries employing about 370 men and the machine shops running day and night. The six aerated water and soft drink establishments in the city were busy and the brewery was also active. The cotton factory was active day and night with many orders ahead and the Diamond Whitewear Company was very busy. The Wagagmack Pulp and Paper Company's mills, employing about 900 hands, were busy day and night and would employ many more men if they were available. Newspapers and printing establishments reported a good month and the paper box factory was active. Tanneries were active and the boot and shoe factory was busy. The two paint mills in the vicinity of Three Rivers were working full time. Navigation was as active as the scarcity of steamers would permit. There were several dwellings, a large school and some commercial buildings in course of construction. The Canada Iron Foundries were making extensions to their plant and building a wharf on the St. Maurice river near their plant. Lumber mills were busy, and sash, door and planing mills were active.

Hull reported Gilmour, Hughson & Company and the E. B. Eddy & Company mills closed down for the season on account of low water. All the other industries were active. Wages remained unchanged and there was a large demand for men for the lumber camps.

At St. John's and Iberville all the industries were active with the exception of sash and door factories, which were quiet. In the building trades, stone

cutters, bricklayers and plasterers also reported a quiet month. Municipal labourers were busy building the main sewer. Many American boats passed through the harbour and the grain trade was active.

Ontario

At Toronto there was a marked shortage of labour in practically all lines of industry. The metal and machinery trades were busy, but the structural steel industry was adversely affected by the scarcity of steel, on account of so much of the output being required for special orders. The automobile industry was active. The provision trades were normal. Cigarmakers were quiet. The brewery trade was quiet and much unsettled owing to the enactment of prohibition, in consequence of which some breweries were turning their attention to the manufacture of mild beers and soft drinks. The textile trades were active and garment workers were busy. Furriers and hat and cap workers had plenty of employment. Steam laundries, dyeing and cleaning establishments were active. Printing, lithographing and engraving were steady. Woodworkers and furniture makers were active. The leather trades were fairly well employed. The paint and varnish trade was active. The Toronto Hydro-Electric system shows a steady increase of business. A report covering the first half of the year shows an increase in business on the basis of kilowatt hours over the corresponding period of 1915, of 33 per cent. On account of the reduced rates charged the increase in revenue was only 11 per cent. Owing to the difficulty of obtaining labour freight traffic has been much congested and deliveries slow and uncertain. Early in the month the Canadian Pacific Railway placed an embargo on freight in less than car-load quantities, which remained in force until the 25th, and subsequently a similar embargo was put in force by the Grand Trunk Railway. This has seriously affected retailers and jobbers and to a less extent manufacturers. The rail-

ways have made every effort to secure additional labour and some Indians and women were being employed. Good progress was made on the new Union Station; the steel work was practically complete and the stone was being prepared. The receipts of the Toronto Railway during September were \$506,620, as compared with \$489,573 in September, 1915. Navigation, which had been active for some time, was nearly over and most of the longshoremen were laid off. Building was active owing to a steady demand for dwelling houses. There has been comparatively little commercial construction as some large contracts arranged for earlier in the season have been postponed owing to the shortage of structural steel. The agreement between the Builders' Exchange and the Bricklayers', Masons' and Plasterers' Unions expires at the end of the year and conferences looking to a new agreement have been held between the men and the employers. The men are asking for a substantial increase in wages on account of the higher cost of living. Rapid progress has been made on the Bloor street viaduct; on the Don section the concrete pillars were completed and ready for the steel arches. Approximately \$900,000 has been spent on the work. Construction of the section of the Toronto-Hamilton highway near Toronto has been delayed on account of large local improvements which are being carried out by the municipalities of Mimico and New Toronto along the route of the highway. As soon as these are completed the construction of the road will be proceeded with. Thirty-one miles of concrete roadway have been constructed. Wholesale and retail business were active, although some lines suffered from freight congestion. Forty clerks employed in retail stores have organized a union in affiliation with the Retail Clerks' Association of America with the intention of starting a movement for the earlier closing of retail stores. Restaurants had an active month but the hotel trade was quiet. Since prohibition went into effect many hotel-

keepers have given up business and other state that they are keeping open at a loss. During September the Civic Labour Bureau received applications for 1,053 men, the principal demand being for lumbermen and concrete construction workers. Applications for work were received from 818 men, of whom 566 were placed, the other applicants being unsuited for the work available. The report of the House of Industry for September shows that 27 families were assisted during the month, making a total of 252 receiving aid since April 1, being a decrease of 74 per cent, as compared with the same period last year. Forty-six casuals were sheltered, being a decrease of 75 per cent. There were 133 inmates in the house. Farmers were very busy with their fall ploughing, which was much delayed by the drought, but recent rains have rendered the ground workable. Labour was scarce and most of the farmers were short-handed.

A pronounced shortage of female labour in nearly all lines of factory work was reported, due partly to the increasing numbers of women being utilized in metal factories. All factories were busy and overtime continued three nights a week in many instances. Candy factories were busy with Christmas orders, Robertson Brothers, Limited, employing about 400 women and girls; overtime work while not compulsory was usual three nights a week, for which one and one-quarter time was paid. Fruit and vegetable canning establishments were fairly busy and gave light employment and part time to women unable to do a hard day's work. Knitting mills were active because of work on military underwear and pressure on account of back orders still unfilled; overtime was worked in some departments. The Toronto Carpet Manufacturing Company, Limited, employing 400 women and girls in the past few months has also had difficulty in keeping sufficient help; the weaving department was working till nine o'clock three nights a week. In neckwear, collars, gloves, etc., regular

orders were making a rush of work till Christmas owing to shortage of help, the A. T. Reid Company, Limited, reporting the need of 100 more girls. Much the same conditions existed in the white-wear firms, where preparations for the January sales made October a busy month, although overtime was not general. An improvement in conditions for steam laundries was noted; the higher summer wages continued and no special lack of help was felt. In dyeing and cleaning establishments it has been found difficult to keep up regular staffs of women for the pressing departments. Publishing houses and stationers were working overtime in some departments every night and will continue to do so till January; the W. J. Gage Company, Limited, were employing 176 women and were using women workers as extensively as possible to take the place of men who have enlisted. Paper box factories reported an increase in the supply of labour in the last two months, but there was still a shortage of experienced workers; overtime was being worked three nights a week and was expected to last till the end of the year because of Christmas orders. Brush and broom factories have not experienced any serious shortage of labour as their busy season comes in the winter when more help is available; there was a heavy demand, however, for skilled brush makers. Piano firms were fairly busy, although piano-player departments have been quiet; the men at the Otto Higel Company were working till eight three nights a week, but there has been no night work yet with the women, of who about 50 were engaged. This firm was employing 300 hands as compared with 500 two years ago. Toy and doll manufacturers had a busy month on Christmas orders. The Dominion Toy Manufacturing Company, Limited, were working three nights a week in different departments all month; they reported a greater turnover of labour in the past year than in the previous five years, their average staff numbering about 200. Boot and shoe firms were busy; experienced workers were well employed but there was a lack of

reliable apprentices. The Julian Sale Leather Goods Company, Limited, reported an increasing trade with which they were not able to cope because of lack of help; they had 80 women in their employ and needed as many more. Department stores reported an improvement in the supply of clerks and saleswomen, but a constant turnover; from 25 to 30 applying every morning at one firm and as many as 1,000 could be had for extra week-end work without advertising.

For stenographers and office help October is a slack month, and experienced girls were available; the occasional work of the summer was over and those employed at summer resorts for the holidays have returned to the city. Good conditions were reported among telephone operators, all positions being satisfactorily filled. Cooks and waitresses have been well employed this month; their union, formed about two years ago, has become disorganized owing to the out-of-town summer work and the irregular hours of work in hotels and restaurants, but it was expected to become a strong local this winter. The staff of occasional teachers, who do the supply teaching in the city schools, numbered 130 in September; many of these have already been appointed to the regular staff and the remainder were kept fairly well employed. After a very busy summer October was unusually quiet for nurses. From 50 to 95 have been on call all month. More domestics were placed in October than in September; one agency was able to place 16 reliable maids, while the applications numbered 150.

At Hamilton manufacturing in practically all lines showed great activity, it being estimated that about 29,000 persons were employed in 300 factories. There was also a heavy demand for skilled and unskilled labour. The rolling mills were very active, with labour scarce. Structural steel companies also were busy. Establishments engaged in the manufacture of railway cars, etc., were very active, the National Steel Car

Company calling for 250 men. The three agricultural implement firms, International Harvester Company, Sawyer-Massey Company and the Oliver Chilled Plow Company were very active. The four factories engaged in the manufacture of cans and other sheet metal work were very active, as well as tin shops and miscellaneous metal manufacturing companies. In the food and tobacco group, flour mills were active on local supplies and the five canning factories were very busy. The larger tobacco and cigar factories were active, some of them on western trade, but the smaller factories were only fairly well employed. Breweries and distilleries were quiet. Cotton and knitting factories were busy. Establishments engaged in the manufacture of ready-made clothing were very active, also shirt and cap factories. Printing establishments were active in all departments. Furniture factories, sash and door factories were all busy. The McPherson Shoe Company was very active, with a scarcity of help. Brick and tile yards and sewer pipe companies were busy, with an active demand for labourers. Steam railways were active, there being a large volume of outward freight. Some falling off was reported in outward shipments of pig iron owing to its use for local products and in shipments of pork and beef. Electric railways were active and showed an increase in receipts. Steamship lines showed an increase in outward freight for the month of September as compared with the same month in 1915. The building trades continued brisk, with a demand for carpenters and labourers. Although several thousand men have enlisted from Hamilton the assessment statistics show an increase of 4,000 in the population and an increase in building values. Only absolutely necessary work was being done by the city. The total expenditure of the works department for the nine months from January to September, 1916, was \$262,160, compared to \$290,712 for the same period in 1915. During October 387 men were employed by the Board of Works, compared with 790

in the same month of the previous year.

At Niagara Falls the firearms sight and metal can factories were very busy. The chain works was working overtime and cutlery and plating factories were advertising for help. The carriage mountings factory also wanted more hands. The shredded wheat factory was busy. Canneries putting up fruits and vegetables were very active and constantly advertising for workpeople. It is understood that the season's pack is very large; employment in this industry (which is important in this district) declines late in October and is at a minimum until the following May. The pickle company will build a new factory. The hat factory was busy and the corset factory wanted more hands. Laundry work and other lines of employment declined with the closing of the large summer hotels and restaurants. Regular custom laundries were busy. Local newspaper and job offices were active and the corrugated paper and box factory was very busy. The local factory making shoe parts was busy. A site was secured and other arrangements completed for the establishment of a rubber tire factory. A site has been purchased near Dunnville for a gasoline refinery to produce 10,000 gallons per day and the new Axolite factory commenced operation. The cyanamid plant was very busy. Work was commenced on the erection of the refining plant of the International Nickel Company at Port Colborne, a large number of men being employed. Numerous dwellings and some commercial buildings were in course of erection and several local factories were being enlarged. Excavation on the new Welland ship canal in the section between Allanburg and Port Robinson afforded employment to many men. On account of the scarcity of labour the only civic undertakings this season were renewal works and works necessary to serve new sections of the city. A number of men have been employed in general improvement and repair works in the provincial park. Unskilled labour was generally in demand

at 32½ cents per hour. Fruit and vegetable growers were closing the work of a busy and profitable season.

At St. Catharines manufacturers of boilers, electrical apparatus and fixtures were active. Flour mills, meat packing houses, fruit and vegetable canneries and other establishments in the foods group reported active conditions. Wool-lens, knitted goods and other textile concerns were also busy. Municipal employment was slack, but house building was fairly brisk.

At Ottawa an increased demand for unskilled labour was a feature of the month, men for railway construction and other unskilled work being more difficult to secure than in September. All trades were fully employed and many were busy, particularly pulp-makers, paper-makers and railway workers. Leather workers were not as busy as during recent months but were all employed, while iron workers in general were in demand. Pulp works, paper mills and sawmills were seriously handicapped by low water in the Ottawa river, which resulted in the closing of several for about two weeks.

At Brockville the St. Lawrence Boat and Engine Company was fairly active and the Canada Briscoe Automobile Company were shipping large orders. The Canada Carriage Company was working three nights each week until nine o'clock; this company has imported three carloads of potatoes to be sold to its employees at \$1 per bushel. The James Smart Manufacturing Company was active on furnaces and quiet on stoves. Breweries were quiet. The Wolthausen Hat Corporation was fairly active. Sash, door and planing mills were fairly active, and wooden box factories were busy. Steam railways and Grand Trunk repair shops were active. There were few dwellings in course of erection, but work was proceeding on public buildings. A new company has been organized and incorporated to build, sell or exchange homes for workingmen in Brockville.

Kingston reported the Canadian Locomotive Works very active with orders sufficient to keep the plant busy for some months and the hosiery mill was also active. Sash, door and planing mills were fairly busy and the tannery was active. The Kingston Shipbuilding Company reported work very slack. The North American Smelting Company's plant and mines have been taken over by New York capitalists on a five-year lease, with option of buying at the expiration of the lease. Between 20 and 30 men were employed getting the smelter into shape and operations were expected to commence during November.

At Belleville March and Henthorne's manufacturing concern, manufacturers of portable steam engines and boilers, were working day and night with two full shifts. Two firms engaged in the manufacture of carriage, sleighs, cutters, etc., had a number of hands constantly employed. The two flour mills were busy and the Graham Evaporating Company employing a large number of men and women was running day and night. The Deacon shirt factory, employing chiefly women, was working full time with a number of hands. The three sash, door and planing mills were busy. A pottery was busily engaged on orders for jars, churns, small pottery-ware and glazed sewer pipes. The Canada Cement plant at Point Ann just east of the city limits will run all winter. There was much activity on the three railway lines and the Grand Trunk shops were busy on repairs. Longshore work was limited, only a few vessels laden with coal arriving in port. The Maple Leaf Tire Company was erecting a large plant and was working day and night upon the buildings and the Wilson Foundry Company was erecting a large cement building.

Peterborough reported the labour market active in most lines, although building remained quiet; unskilled labour was specially in demand. The Canadian General Electrical Company was very busy and moulders and machine hands were active; some metal factories

were working overtime. Oatmeal and cereal mills were active, also meat packing houses. Woollen mills were working overtime and the tent and awning factory and the carpet factory were active. Sash and door factories were quiet in regular departments, but busy making boxes. Harness and leather manufacturers were active. Lumbering was quiet; the Peterborough Lumber Company's mill shut down for want of logs and it was expected that owing to the high labour cost this firm would not put in any camps this winter. There was very little building work on dwelling houses, but some additions and alterations were being made to commercial buildings. The city was constructing an outfall sewer as well as some small sewers, but was not doing as much civic work as in other years. At Lindsay metal manufacturing was active. Horn Brothers woollen mill, which was burned down some time ago, started work with 25 hands. Building operations at this point were very busk.

Galt reported active labour conditions, many factories working overtime. Foundries were fairly busy and the Car and Coach Company at Preston was active. Factories making steam and gas engines and boilers were very active and stove and furnace foundries were well employed. Sheet metal workers were working overtime. In textiles, cottons and woollens, activity was general, but manufacturers of ready-made clothing were doing only fairly well; the hat factory, however, was busy. Sash, door and planing mills were active. The local tannery was working steadily and shoe factories were working overtime. Building was active and there was a scarcity of builders' labourers.

Brantford reported the engine company busy, not only on engine orders but on pulpwood machinery. The Brantford Carriage Company, which has bought out the firm of Baynes Carriages in Hamilton and moved to Brantford was running full time. The Buck Stove Works were running overtime for one week on account of scarcity of help.

Three large agricultural implement factories were running to full capacity and could not secure sufficient unskilled labour. The two flour mills were running night and day. Matthews-Blackwell's meat packing establishment was running full time and the Patterson Biscuit and Confectionery Company was working overtime in its candy departments and reported a shortage of girls. Watson and Slingsey woollen mills were very busy on domestic and export orders, with a shortage of woman labour, and the Niagara Silk Works was running full time and advertising for female help. The Brantford Cordage Company was very busy and was continually advertising for girl help. The Kitchen Overall Shirt Company was busy on a special order, while their home trade will keep them going full time. The Brantford Roofing Company was approaching the usual slack season, but kept their hands employed on short time in making up stock. The Hampel Paper Box Company was about to move into its new factory and was short of woman workers. Schultz Brothers planing mills were advertising for unskilled labour, chiefly for their box department. The Brandon Shoe Company was steadily employed throughout the month. The Brantford and Hamilton Electric Radial was extending its line to the new station of the Lake Erie and Northern Electric Railway Company, about one-half mile of work. Street paving, which had been under way, was discontinued owing to shortage of help and sewer construction was curtailed on the same account. Farm labour was not in as great demand as last month but wages were \$35 per month and board.

At Kitchener metal manufacturing establishments continued busy. The Waterloo Manufacturing Company, makers of portable steam engines and threshers, were not as busy as earlier in the season, and this applied also to the Regal automobile factory. The bicycle factory, however, was still busy and also the Gasoline Engine Company. The Canadian-Buffalo Forge Company com-

menced work on an addition which will double the capacity of the plant; it was expected the building would be completed by December. The enlarged plant will have a capacity for 300 hands and 25 machinists could be taken on at once. C. H. Doerr and Company reported business in both confectionery and biscuit lines 25 per cent better than last year. The company was handicapped by the scarcity of labour, and will work overtime to the end of the year; other bakeries were busy. Cigar factories were not as busy as in previous months; two new shops started during the month while one old one closed down. Breweries both in Kitchener and Waterloo were busy working overtime in some departments. Flour mills were active. The Dominion Sugar Factory, working on sugar beets, began operations October 12, running a double shift of 12 hours each, Sundays included, and employing about 380 men. Wholesale sausage factories and meat packing houses were busy and prices of livestock very high. Owing to scarcity of fodder farmers raised milk to 20 cents per gallon to the vendors; these in turn raised the retail price to 9 cents per quart. The soft drink factory reports trade fair. Hosiery and underwear factories were busy. The felt factory was very busy and has worked overtime for a considerable period. The twine factory reported trade very good. The robe and clothing factory was busy, but was handicapped by slow delivery of furs. Laundries were busy, shirt and collar and button factories were very busy, but short of boy and girl workers. Glove factories reported trade very good. The women's whitewear factory was active. The paper box factory is busy and short of help. Woodwork and furniture factories were busy, some which had been working on boxes having other orders for one year ahead. Sash, door and planing mills were busy and short of help. Broom, woodenware and cooperage factories were fair. The piano and organ factory was busy. The two tanneries, the largest in Canada, were very busy

and short of help. Boot and shoe factories were busy, some working overtime and advertising for help. Trunk and bag factories were very busy and saddler shops report trade good. The Dominion Tire Factory was very busy. The two large rubber factories were active, 50 experienced or inexperienced men being wanted at once by the Kaufman Rubber Company. Brick, tile and sewer pipe establishments were brisk as earlier in the season. The light commissioners reported a gain in receipts for September, and earnings of the street railway also showed an increase. The building trades were fairly well employed on additions to factories and dwellings. Outside work, such as laying of sidewalks, paving of roads, putting in sewer, water and gas connections was proceeded with, though some of the work was delayed on account of labour shortage. Work on the new sewage farm was still going on but will not be completed this year owing to shortage of help and material.

At Guelph a number of extensions were being built to factories, all were busy, and some were working overtime. Stove and furnace foundries were very active, with large orders ahead. Malleable iron moulders were active, also piano plate, gasoline engine and general jobbing moulders. Sewing machine makers were also active. Flour mills were running night and day. Breweries have reduced their staffs to about one-half the usual number since the enforcement of the Ontario Temperance Act. Among the textile firms cotton spinning mills were running overtime and reported a shortage of female help. Woollen spinning mills were active with large orders ahead and knitting factories were also busy. Linen mill and carpet weavers were active. The women's whitewear factory was busy and workers were in demand. In woodwork and furniture, sash and door makers were fairly well employed and piano workers were active. The building trades were still active with plenty of work in sight for the balance of the

season, dwellings and factory extensions providing the employment. Activity still prevailed in municipal works and labourers being in demand for the laying of storm drains. The supply of farm labour was about equal to the demand.

At Stratford the Grand Trunk Railway locomotive and car repair shops were busy, 800 men being employed. Establishments in the foods group were active, but cigar factories were very dull. Woollen and knitting factories were busy and ready-made clothing establishments were active. Furniture and chair factories were very busy and reported a shortage of help; a new furniture factory employing 40 hands began operations and more workers are likely to be taken on later. Tannery employees were busy and harness makers active. Brick and tile yards were active. There was considerable employment on waterworks repairing and extending mains, and the gas workers were active owing to the large amount of gas being consumed in factories; a number of municipal employees were busy repairing pavements. Building tradesmen were well employed.

At Woodstock factory reports indicated improved business conditions; but the scarcity of labour was still a serious problem. Manufacturers of stoves and furnaces reported business very good but labour of all kinds scarce, especially stove-mounters and finishers. There was a constant demand for help for knitted goods, also a demand for job printers. In furniture and chair factories the demand for labour of all kinds was urgent. In piano and organ factories also there was a constant demand for skilled labour, also in the manufacture of wagons and sleighs. The local tannery owing to business complications was idle. The building season was almost closed. Labour for civic work was scarce and little was being done.

At London manufacturing in metals, machinery and conveyances continued good. The McClary Manufacturing

Company is erecting a four-storey addition to its tin shops; this company was busy both in the tin and furnace and stove departments. The George White and Sons Manufacturing Company was very busy, and was making large shipments of steam tractors and threshing machines to the Canadian West. Both the D. S. Perrin Company and the McCormick Company, large manufacturers of candy and biscuits, were very busy and were giving part time employment to married women in order to speed up output. Conditions in cigarmaking continued good, with almost all hands back to work after the recent strike. Breweries continued busy, no help having been laid off on account of prohibition. The ready-made clothing concerns reported business fair, difficulty being experienced in securing certain classes of goods. Steam laundries were exceptionally busy. Newspaper and job printing continued active, and reported the prices of papers and inks going up continually. Paper box factories were very busy, but were handicapped through slow delivery and increased prices of board from papermills. Sash, door and planing mills reported trade fair. The wooden box factory was very busy. The Sherlock-Manning piano and organ factory had plenty of orders but was short of skilled help. The local tannery was exceptionally busy, also the sole and heel factory; the price of these goods was increased. Local brick yards owing to poor demand did no burning this year. The city was employing well drillers in an attempt to strike water in order to increase the city's supply. The local street car company was doing some double tracking and other construction work. Very few residences have been built this year and building has been generally slack. Retail and wholesale trade was good but there was some difficulty in securing goods to fill orders.

At St. Thomas there was a scarcity of labour, skilled and unskilled. Michigan Central car workers were employed full time throughout the month. The

Erie Iron Works reported business fair and better than the corresponding month of last year. The Canadian Iron Corporation's car wheel works reported orders plentiful, with a scarcity of metal workers. The Empire Flour Company reported business brisk and the grain supply plentiful. Business was fair with the St. Thomas Packing Company and the St. Thomas Candy Company showed steady improvement. The Monarch Knitting Company reported business good, notwithstanding that this is the dull time of year, and clothing manufacturers reported business good although rough goods were scarce. Heard and Company, manufacturers of carriage and automobile parts, were handicapped by scarcity of labour; the firm had 20 men employed but could use 40. With Still and Company, handle manufacturers, business was brisk; 40 men were employed but the company had employment for 100. Shoe factories reported very active conditions. The railroads were busy throughout the month, the Michigan Central having 36 crews working in train service; there was an increase in cars handled on this line of approximately 7,000 as compared with last month. The Wabash, Grand Trunk Railway, had 28 train crews working and handled 8,906 cars during September; the supply of trainmen was adequate. The Pere Marquette Railway had 22 crews in train service and reported business was brisk. There was a falling off in the number of men employed in the building trades but those who remained in the city were well employed. There has been more building in the district this season than usual. The Bell Telephone Company imported 35 men for construction work, as linemen were much in demand. Farm workers were scarce but the demand was light, \$20 and board being offered.

Chatham reported an active month, particularly in building construction. Carriage factories were very active and the local plant of the International Harvester Company, which manufactures wagons and carts only, was working

overtime part of the month. The Sugar Refinery at Wallaceburgh was running full time, the beet season having commenced about the end of the month. The abattoir was active. The woollen mill was working with a full staff, and sash, door and planing mills worked overtime the greater part of the month. The civic waterworks department was busy laying mains to the new sugar company's plant; the Chatham Gas Company was also completing mains to the same company, and the Electric Light Company was extending its lines to new factories. There was fair activity in the erection of dwellings but the principal activity was in connection with additions to plants by a number of companies. The scarcity of building mechanics and labourers brought an advance in wages which left the labour market much unsettled. In municipal employment all available men were at work on street pavements and sewers. Farm help was much in demand on account of the harvesting of the sugar beet crop.

Windsor reported a demand for all classes of labour, and in response a number of workers were coming in from other parts of the province. The demand for men in motor products has been steady and in other factories conditions have been very favourable, there being no cessation of operations reported during the month. The building trades were very active and the demand for dwellings still continued. Freight transportation was steady during the month.

Orillia reported the local stove factory behind with orders because of difficulty in procuring labour, and for the same reason the agricultural implement factory also was finding difficulty in keeping pace with orders; the plant worked overtime part of the month. The smelter was fairly active on molybdenum. One ready-made clothing factory reported business good and the number of employees normal; the other, which makes mackinaw goods for miners and lumbermen, reported business not so good as before the war, but a marked

improvement in the past three months, and no difficulty in securing labour. The printing business was good; the various offices employed full staffs and wages were about 25 per cent higher than before the war. The local tannery was running at about two-thirds capacity, owing to difficulty in procuring help. The principal sash and door factory reported business quiet; about 70 hands were employed on regular lines. The furniture factory was unable to keep up with orders, owing to difficulty in procuring help. The factory manufacturing flooring, broom handles, etc., was employing the usual number of men for this season. The lumbering and mining machinery factory was busy on special lines.

Cobalt reported the mines were working to the limit and a steady production was being maintained from both the silver mines and the Porcupine gold mines; there were no idle miners and in some of the gold mines production was almost dependent upon the number of men that could be had. There was a heavy demand for muckers in particular, and for experienced machine drill runners. A number of new and important finds have been made within the past month, the most important of which is the new ore shoot on the Nipissing. Unskilled labour was everywhere in demand. Building was brisk at Timmins and there was a strong demand for bricklayers, wages as high as 65 cents an hour being paid; for builders' labourers, also, there was a very fair demand.

At Port Arthur the Canadian Northern Railway round-house and repair shops were active and the Canadian Pacific Railway round-house and repair shops at Fort William were also busy. The Western Dry Dock, Port Arthur, was employing about 750 men and boys of all classes in shipbuilding and repair work; two freight boats for ocean service were launched and the keels of two others were being laid. On the two already launched men were working overtime and Sundays on the engines and fittings so that the vessels may proceed

down the Lakes under their own steam before navigation closes. The Western Machine Company at Port Arthur and the Copp Foundry of Fort William were also engaged on special lines; at the Port Arthur firm 30 men and boys were employed last month in two ten-hour shifts, while the Fort William factory employed about 100 men and boys on the same plan. Flour mills at Fort William, which had been busy all summer, continued active. The cigar factory at Fort William was quiet. Two dyeing establishments in Port Arthur and one in Fort William were quiet. The tent and awning works, Port Arthur, have had a fairly busy summer but work was falling off. Two steam laundries, one in each city, and each taking orders in both cities were fairly busy. Newspapers, one in each city, and job printing offices, two in each city, were all busy. Sash and door factories were quiet. A small broom factory at Fort William was very quiet. Brick and tile works at Fort William and State River Valley have been practically closed since the outbreak of war. The Canadian Pacific, the Canadian Northern and the Booth docks at Port Arthur were busy and the Canadian Coal and Ore docks and grain elevators were active. The coal docks and the Grand Trunk Pacific grain elevators at Fort William were employing a large number of longshoremen, freight handlers and grain trimmers. Iron ore mining in the Atikokan district was quiet; from the same district there have been two shipments of copper ore and arrangements were going forward to develop this mine under a company. Quarrying was carried on at Simpson Island for white building stone, also there was activity at other quarries along the lake shore and on islands of red sand stone and marble in and about Nipigon. There are granite quarries at Ignace. All these quarries were practically closed. A commercial block in Port Arthur was putting in foundations, but house building in the two cities was generally slack. The Western Dry Docks were erecting shops to replace

those destroyed by fire and an elevator was being built at Port Arthur. Railway sidings for new elevators at Port Arthur from Canadian Pacific Railway and Canadian Northern Railway lines were being constructed. Dredging was being carried on in the river and in the lake to keep open harbour ways; there was also dredging for new elevators at Port Arthur. Lumbering camps were being arranged for the winter. The Pigeon River mill and Sterrit's mill, Port Arthur, were running, but were not very busy. In civic employment, 38 men were employed during October at Port Arthur, including teams and teamsters.

Manitoba

At Winnipeg all branches of metal and machinery manufacture were very well employed and factories in the foods and tobaccos group were also active. Printing and publishing establishments reported business satisfactory during October. Tradesmen in steam and electric service were well employed, while building and construction was fairly active; it was expected that there would soon be a shrinkage of employment in this line. About 1,500 men in the building trades paraded to the Provincial Parliament Buildings and requested that work on the new Parliament Buildings should be continued all winter to provide employment for the large number of workers who will become idle when building operations are suspended with the approach of winter. No definite assurance was given the men. There was very little civic work being carried on. In the surrounding district there was much threshing to be done and labour was in demand. There was no interruption of the heavy railway transportation of grain. Retail and wholesale trade generally was not as good as during October of last year.

Confectionery factories reported an active season, experienced chocolate dippers being continually in demand. Some cigar factories manufacturing the

cheaper grade have closed down, others were manufacturing better qualities and employing double the number of hands. In the textiles group knitted goods factories were busy, especially on sweaters and military orders and employees of awning and tent factories had steady employment. Ready-made clothing factories were very active and had increased staffs as compared with a year ago. Shirt manufacturers were busy and ready to employ experienced help. Manufacturers of hats, caps, gloves and fur goods found experienced workers scarce and had to secure outside help. Steam laundries and dyeing and cleaning establishments afforded steady employment. Girls employed in job printing were fairly well employed and all experienced bindery girls were working; the lithographing departments were unusually active. In paper box and bag factories girls were in demand, many having left the factories to go into employment in stores. Saleswomen in department stores were very busy and there was a slight increase in activity in single line stores. Stenographers were more in demand in October than in September, but not so much as in the summer; girls employed in telephone and telegraph companies were busy. The demand for hotel help was slack; the City Employment Bureau reported 23 kitchen women called for and 19 positions filled. Domestic help was greatly in demand; for 92 openings for generals at the city bureau only 34 were available.

At Brandon machinists and iron workers were well employed. Flour mills and bakeries were busy. Breweries and soft drink factories were active, but cigarmakers were dull. Sash and door makers were busy. Tanneries were busy and advertising for help and harness makers were active. The brick works were closed down, but with practically no stocks on hand. Railway transportation was very active and building contractors working on houses, stores and apartments were securing labour with difficulty. Work was progress-

ing favourably on the new telephone building for the Provincial Government and a contract for a new building at the Provincial Asylum was let. Threshing was practically completed; some difficulty in obtaining help was experienced.

Saskatchewan

Regina reported the flour mills running full time. The city's two abattoirs were busy but were unable to supply all demands on account of the scarcity of fat stock, and some meats were being imported. The six bakeries were all doing a fair business but not rushed as a great many people were doing their own baking since the price of bread was raised; bakers, however, were in demand. Three aerated water establishments were quiet. The one brewery in the city was quiet owing to the closing of the bars; part of the building has been turned into an abattoir and packing house. Steam laundries were active and laundry workers were in demand. Sash, door and planing mills were busy and experienced men were being called for. The cut stone plant was running full time. The soap factory was fairly busy. Steam railways were quiet owing to bad weather and not much grain was moving. No dwelling houses were being built but a number of commercial buildings were under construction, also schools and churches. Building tradesmen were busy with the exception of plumbers and steamfitters. The Imperial Oil Company's plant was running although not fully completed. Farmers were meeting with difficulty in getting their threshing done as snow and rain hindered operations and there was much grain still to be threshed.

At Moose Jaw flour and rolled oats mills were very active and creameries and dairies were busy. Sash, door and planing mills were active, also wooden box factories. Brick and tile yards were busy but there was very little building work under way other than the erection of a new hospital. Only 50 per cent of the harvest was threshed, men were scarce and wages \$4 per day.

Prince Albert reported flour mills were running steadily and creameries were active; the Birch Hills creamery shipped a carload of butter direct to England. Aerated water and soft drink makers reported work steady and trade improved. Waterworks employees were engaged on extension of water mains to the Grand Trunk Pacific new station and yards and electric light employees were well employed. Steam railroad employees were working full time. In mining preparations were under way for the shipment of gold and copper ores from the Beaver Lake district north of Prince Albert; a New York concern was operating in order to determine the stamp mill capacity that might be required. In building a new store was erected and many minor improvements were under way. There was a considerable amount of building in the farming district about and work on the offices and freight sheds of the Grand Trunk Pacific terminal was proceeding. A number of men were engaged in making the grade through the city and in moving buildings ready for the Grand Trunk Pacific yards. Returned harvesters were leaving for the lumber camps; men were in demand for cordwood camps, and it was feared that there would be a serious shortage of labour for lumbering operations. Local sawmills were still running day and night shifts. All municipal employment was reduced to a minimum and only necessary work was being undertaken.

At Saskatoon the Quaker Oats mills were running steadily and the Saskatoon Cereal Company was busy and enlarging its plant. The several bottling works were doing a brisk business; the one brewery in the city was active. Planing mills were quiet; several mills closed during the depression and have not re-opened. One planing mill had installed box making machinery and was working on large contracts. Several brick yards near Saskatoon have not re-opened since the depression. The Canadian Northern and the Canadian Pacific Railway shops were employing quite a number of men and have recovered

their normal activity. Very few dwellings were being erected in the city, although country building has been brisk. City building was confined to the construction of one large moving picture theatre, additions to a bakery and a large garage. There was a notable shortage of men for threshing, although unfavourable weather prevailed during the month and only about 25 per cent of grain has been threshed. Men were leaving the country on account of the impossible threshing weather; wages ranged from \$3.50 to \$4 per day.

Alberta

At Medicine Hat labour conditions showed little change as compared with the previous month. There was still a scarcity of labour in many lines. Building tradesmen were actively engaged but many of the buildings were nearing completion. Wholesale and retail merchants reported business good. Empty stores and former real estate offices were filling up rapidly and a number of merchants were remodelling and making additions to handle the growing trade. Metal, manufacturing and machine shops were active. The rolling mills were employing a number of girls in the nut and bolt department. Flour and feed mills were actively engaged, with labour scarce. Breweries reported business rather dull compared with last month and sufficient help available. Steam laundries reported business fair with sufficient help. Planing mills were active. The Alberta Clay Products, manufacturing brick, tile and sewer pipe, report business rather slack, 50 men being employed. Pottery and porcelain works reported business fair with sufficient help. The Alberta Linseed Oil Company was closed for a few weeks making repairs. Threshing was progressing favourably but still there was a shortage of labour; \$45 per month was the average wage paid farm help, but harvesters were receiving from \$3.50 to \$4 per day. Labour was also scarce on stock farms and ranches.

At Lethbridge there was a demand for help in all lines and the demand for domestic servants was not nearly being met. Building tradesmen were busy, mainly in surrounding districts; carpenters were receiving higher wages. The coal mines were active, though still shorthanded. Work has been started on a civic filtration waterworks system; the city office employees have had their wages raised 10 per cent. Railroad construction was progressing on the Lethbridge-Weyburn line.

At Calgary there was increased activity in building in the city and country districts, all classes of the building and metal trades being well employed with the exception of stonecutters, tile layers and structural iron workers. The weather was favourable for harvest work and the demand for men could not be met. Wages offered were \$4 per day. There was also a demand for men for the coal mines and lumber camps. The Associated Charities reported giving relief to 62 British families and one foreign.

Edmonton reported that farmers were asking for men and a few builders were calling for carpenters. The Edmonton-Dunvegan Railway Company is contemplating opening its mill at West Edmonton and this will give work to a hundred men. There was a fair demand for bricklayers and a slight demand for carpenters and joiners. Painters, decorators and paperhangers were quiet, several being unemployed; plumbers were also quiet, and gas and steam fitters were following other occupations. Machinists were well employed and those coming to the district were able to secure work. Electrical workers and linemen were busy. Blacksmiths were well employed but sheet metal workers were very quiet. In printing and allied trades, typographical men and pressmen were well employed; bookbinders were only partially employed. There was some call for garment workers. There was a demand for farm help of all kinds and an increased demand for lumbermen. Coal

mining was very brisk with a persistent demand for labour.

British Columbia

Fernie reported an incessant demand for labour in every branch of industry. There were no changes of wages announced, but numerous demands have been made upon the employers for war bonuses. In the local brewing industry there was activity chiefly on account of orders from outside points. There was considerable activity in job printing and also in newspaper work, there now being three established papers, two of which have job printing departments in connection. There was very little activity in the sash and door factory and the local planing mills have not operated this season. The light and power plant was operating with the usual staff. The three steam railways were very active. The demand for coal has been exceptionally brisk and output would be much larger were it possible for the operators to secure labour. There are 454 coke ovens located at Fernie and practically the same number at Michel Colliery; everyone of these ovens for which it has been possible to secure slack have been kept in operation. An explosion at Michel in August suspended operations in No. 3 mine and work has not been resumed on a producing basis. The supply of slack from that mine has been cut off. In order to keep as many coke ovens at Michel operating it has been necessary to make shipments of slack from Fernie and this practice will likely continue until operations are resumed at Michel. Construction work on piling to protect property on the bank of the Elk river against floods was commenced. The lumber camps throughout the district were operating, but the labour shortage was being keenly felt in this industry. Sawmills and shingle mills were also greatly affected by the labour shortage and many were not operating on this account; others have experienced some difficulty in filling orders on account of the labour shortage.

Wages in this industry were higher than during the previous seasons.

At Nelson mines and mills were running short-handed. Additions to the high school and building a new hospital provided steady employment to building tradesmen. There was a shortage of coal said to be due to difficulty in securing men for mining. Wood was also scarce, the price having increased \$1 per cord owing to labour shortage, men being unwilling to cut at the old price. The old Eureka mine near Nelson resumed operations and expected to ship ore all winter and the smelter at Trail was running to its full capacity. The West Kootenay Power Company was enlarging its plant to supply the necessary power needed at the Trail smelter. Rossland mines were working to full capacity. The Noble Five mine at Sandon was constructing 5,000 feet of pipe line which will supply water to operate the compressor plant and other machinery. The camp at Sandon was very busy, there being 500 men employed as compared with 150 last year. Lumber mills reported the demand for lumber much better than one year ago.

At Vancouver there was a steady demand for labour, especially of the unskilled class; the demand came chiefly from outside points, a feature of the labour situation which has obtained throughout the summer. In the city itself there was an improvement over last year in some lines, including the building trade. There was considerable activity in ship-building; some wooden ships for the lumber trade for British owners have been building at Vancouver for some time. Sheet metal manufacturing was generally quiet. Cigar-making was busier than for some years, members of the cigarmakers' union reporting in the Trades and Labour Council that there was a scarcity of men in their trade. In the flour, feed and cereals group conditions were reported "fair." This applies also to abattoirs, meat-packing, baking and confectionery, fruit and vegetable canning, dairies,

soft-drink factories and breweries. Activity in the manufacture of knitted goods was sustained. Rope and sail industries were quiet. In the printing, publishing and paper goods line, conditions were "fair" so far as newspapers were concerned, but less active among job printers. The woodwork and furniture industry was generally "quiet." The boot and shoe factory was busy chiefly on war orders. The demand for lumber from prairie and other points continued good and some mills were working 24 hours and declining orders. Logging was quieter, some of the smaller camps having closed down, partly, it is stated, owing to lack of labour, and partly because it is believed by some firms that the amount of logs now in the water is sufficient to last through the winter. Shingle mills were also busy and a large increase in export trade was reported. The season has been a poor one for fishing, especially as the salmon pack has been small and some canneries closed down early. The Department of Fisheries has been requested to extend the sock-eye fishing season until October 31 in the hope that a late run may compensate for previous light catches. There was a demand for coal miners for Vancouver Island. Building permits, customs receipts and inland revenue receipts for September all showed increases over those of the same month last year. Relief was being given by the city to 108 families.

The improvement in conditions for female labour previously reported was steadily maintained during October, very few women seeking employment. The report of the Women's Volunteer Reserve Corps shows that very little progress is being made with the registration of women to take up the work hitherto performed by men in the event of their being a shortage of male labour due to enlistment. In the local banks, however, women were being steadily used to replace men who have enlisted. A resolution passed by the Vancouver Trades and Labour Council at its regu-

lar meeting and addressed to the Premier-elect, urged the stricter enforcement of the Factories Act with regard to the eight-hour day for women employed in steam laundries. Reports from various employment agencies show that the supply of domestic help available during the past month was considerably less than the demand, some difficulty being experienced in filling the positions offered. The demand for cooks, however, was less than the supply, many women cooks taking up general domestic work temporarily, the same condition prevailing with regard to housekeepers. There was very little demand for domestic help in hotels, women who had hitherto been employed in this line also taking up domestic work or factory employment. In garment making, especially in the factories where Government orders are being executed, experienced operators for power machines were difficult to obtain. The opening of the "fall" season for the manufacture of ladies' garments, suits and cloaks, has further increased the demand for operators and decreased the available supply. Women employed in cigar factories, book binderies, boot and shoe factories, laundries and knitting factories were all fully occupied, but no difficulty was experienced in obtaining the employees needed. In such seasonal trades as tailoring, millinery and dressmaking, all employees were fully employed, the fall season being at its height. The report of the British Columbia Telephone Company shows that an average of eight new operators per month was being maintained with no difficulty in obtaining employees. The demand for stenographers declined as there was no call for substitute workers to take the place of those on vacation. The demand for skilled stenographers, however, remained fair. Retail clerks and nurses were fully employed, nurses particularly reporting improved employment conditions. With the re-opening of the schools in September some slight difficulty was experienced in ob-

taining teachers for classes of a certain grade, although the supply on the substitute list remained very much as usual.

Nanaimo reported the one small foundry in the district working steadily. The brick yards, however, were all idle. On the west coast of the island there was some activity in mining development work with good prospects, but very little ore was being shipped. The coal mines in the city and district were very active, most of them working to capacity with a shortage of skilled men. The Vancouver-Nanaimo Coal Company gave a five per cent war bonus commencing November 1 for the period of the war. The Pacific Coast Collieries some months ago gave a number of their men a ten per cent raise which brought them up to the rates prevailing in the district, and this month the remaining employees received the same increase. Building tradesmen have been better employed than for some time past on repair work and a few new buildings. Logging camps in the district have been working steadily and reported a shortage of skilled and unskilled men. The sawmills of the district were also busy.

In iron shipbuilding at Victoria full staffs of workmen were employed in all the yards, including the navy yard. Work on three wooden ships was proceeding rapidly, about 150 men being employed. Owing to the near approach of the winter season, the steamship companies have tied up some of their vessels and the sailing in some of the routes were less frequent. Work on the new harbour works has made steady progress during the past two months. The logging camps on the island have been operated steadily this fall, the unusually dry season allowing work to be carried on without interruption. On September 28 the Victoria shingle mill was destroyed by fire. The whale fishing season just ended has proved very successful, 40

whales being caught during the season at the three stations operated; eight vessels were engaged in the work. The salmon fishing season has proved to be one of the poorest on record in Southern British Columbia waters and the price paid to fishermen has been unusually high. Practically the whole salmon pack of the past season has been sold. The Sidney Cannery Company, which has been engaged in fish canning, has enlarged its premises and in future will carry on a fruit canning and preserving business as well. The City Council has refused the request of the Trades and Labour Council for an increase in the wages of civic labourers. Owing to the high price of bread the Victoria Trades and Labour Council asked the City Council to establish a municipal bakery, but no action had been taken in the matter at the end of the month. The City Council rejected a proposition to establish a municipal abattoir.

Conditions in and around Prince Rupert continued to improve and there were reports of increased activity in the lumbering and the pulp industries from outside points. Plants at Powell river were running steadily and establishments at Ocean Falls and Swanson Bay were employing large numbers of men. Mining was still very active. The Surf Inlet mines had their large dam completed and were able to carry on transportation to the mine by water. The Spanish mine at Alice Arm has been bonded, it was reported, by the Granby interests and the new holders have commenced work on the property. Other camps report satisfactory operations; labour, however, was insufficient in some quarters. The fishing industry was quiet, especially towards the end of the month, on account of stormy weather; as a result the price to the fishermen went as high as 12 cents a pound, the highest price that has yet been paid.

THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS DURING OCTOBER, 1916

DURING the month of October reports were received from Boards of Conciliation and Investigation appointed to deal with disputes between the Moose Jaw Electric Railway Company and conductors and motormen, the Grand Trunk Railway Company and maintenance of way employees, and the Canadian Northern Railway Company and maintenance of way employee on its lines east of Port Arthur.

Two applications were also dealt with during the month, one from the maintenance of way employees on the Canadian Northern Railway lines west of Fort William, and the other from the Canadian Pacific Railway Company in connection with a dispute affecting the conductors and trainmen on the entire system. In the former case a Board was established and in the latter negotiations resulted in a settlement being arrived at without a Board inquiry. Proceedings also occurred in connection with four applications received prior to the beginning of the month, in one of which an adjustment of the matters in dispute was effected through negotiation; in two cases Boards were established; and in the fourth case the Company's nominee on the Board was unable to act and a substitute was accordingly appointed.

Applications Received

An application was received on October 7 for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Canadian Northern Railway Company and maintenance of way employees on its lines west of Fort William, members of the International Brotherhood of Maintenance of Way Employees. The application gave the number directly affected as 3,000 and indirectly 2,000, and the cause of the dispute as the demand of the employees for the adoption of a schedule

of rates of pay and working conditions which had been submitted by them to the Company.

A Board was established in this matter on October 25. Mr. William Cross, Winnipeg, was appointed a member of the Board on the recommendation of the company, and Mr. David Campbell, Winnipeg, on the recommendation of the employees concerned. On November 2 the Board was completed by the appointment of Mr. Edmund L. Taylor, K.C., Winnipeg, as chairman, this appointment being made by the Minister in the absence of any joint recommendation from the other members of the Board.

On October 21 the Department received a telegraphic message from the Canadian Pacific Railway Company, applying for the establishment of a Board of Conciliation and Investigation to deal with certain matters in dispute affecting the conductors and trainmen on the entire system, members of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, to the number of 7,000 directly and 50,000 indirectly. This was followed on October 23 by a more formal application on the company's behalf, setting forth the nature of the dispute and the efforts which had been made by the parties concerned to effect an adjustment. Elsewhere in the present number of the *Labour Gazette* reference is made to the settlement which was made of this dispute by negotiation between the parties interested.

Other Proceedings under Act

Reference has been made in the October number of the *Labour Gazette** to an application made on behalf of the railway engineers, firemen, conductors, brakemen and yardmen in the employ

*See October, 1916, *Labour Gazette*, p. 1624.

of the Fredericton and Grand Lake Coal and Railway Company and the New Brunswick Coal and Railway Company, to the number of 20, members of the Brotherhood of Locomotive Engineers and the Brotherhood of Railroad Trainmen, the cause of the dispute being given in the application as a demand on the employees' part for the same rules and rates of pay as were in effect on the Canadian Pacific Railway system. Proceedings in connection with the establishment of a Board of Conciliation and Investigation were suspended for a few days in order that the parties concerned might endeavour to reach a settlement through negotiation. These negotiations did not, however, have the hoped-for result, and on October 3 the Minister established a Board, appointing on that date Mr. G. D. Robertson, Welland, on the employees' recommendation. No recommendation was received from the employer and on October 10 the Minister appointed Mr. Chas. D. Richards, Fredericton, to act for the company. At this juncture procedure was again stayed in view of a possible adjustment without a Board inquiry. No settlement was, however, reached and it became necessary to complete the constitution of the Board. This was done by the appointment on November 2 of His Honour Judge R. D. Gunn, Ottawa, as chairman. This appointment was made by the Minister, the other members having failed to make any joint recommendation.

In the October number of the *Labour Gazette*** mention has been made of the Board which was appointed to deal with a dispute relating to wages and working conditions as the result of an application made on behalf of the motormen and conductors employed by the Quebec Railway, Light, Heat and Power Company, Limited, members of the *Fraternité des Employés de Tramway de Québec*, to the number of 260 directly and 305 indirectly. The Board as originally constituted consisted of the Honourable Mr.

Justice C. E. Dorion, Quebec, chairman, appointed on the joint recommendation of the other members, and Messrs. J. L. Perron, K.C., Montreal, and Hector Laferté, appointed on the recommendation of the employing company and the employees respectively. Owing to the inability of Mr. Perron to act as a member of the Board it became necessary for the company to nominate another member, and on the latter's recommendation Mr. Antonin Galipeault, Quebec, was appointed on October 13 to replace Mr. Perron. The Board had not completed its work of investigation at the close of the month.

Reference was made in the October number of the *Labour Gazette** to the application for a Board of Conciliation and Investigation which was made on behalf of the motormen, conductors and other employees of the Sandwich, Windsor and Amherstburg Railway Company and the Windsor and Tecumseh Railway Company, members of the Amalgamated Association of Street and Electric Railway Employees of America, to the number of 150. The application followed the alleged refusal of the employers to agree to a schedule which had been proposed by the employees. A Board was established by the Minister on October 3, Messrs. Ernest G. Henderson, Windsor, and Magnus Sinclair, Toronto, being appointed members thereof on the recommendation of the employing companies and the employees respectively. On October 11 the Board was completed by the appointment of His Honour Judge Drumgole as chairman. This appointment was made by the Minister, the other members having failed to make any joint recommendation.

In connection with the suspension of proceedings looking to the establishment of a Board of Conciliation and Investigation in the case of an application received from the street railway men employed on the Edmonton Radial Railway by the Corporation of the City of

**See October, 1916, *Labour Gazette*, p. 1625.

*See October, 1916, *Labour Gazette*, p. 1626.

Edmonton, to which reference has been made in the previous issue of the *Labour Gazette*,** the Department was informed during October that the matters in dispute had been finally adjusted, thus obviating the necessity for any further departmental action. The text of the agreement reached is given elsewhere in this issue.

In connection with the proceedings which occurred under the Industrial Disputes Investigation Act relative to a dispute between the Algoma Central

Railway Company and its trainmen and yardmen it was stated in the October issue of the *Labour Gazette* that "before the Board entered upon its duties the conductors and brakemen ceased work on August 29 for some days on account of a disagreement with company officials regarding promised increases to the latter." It has since been brought to the attention of the Department of Labour that the strike in question did not affect the employees of the Algoma Central Railway Company, but involved instead a number of trainmen in the employ of the Algoma Steel Company at Sault Ste. Marie.

**See October, 1916, *Labour Gazette*, pp. 1624-1625.

Report of Board in Dispute Between the Moose Jaw Electric Railway Company and Motormen and Conductors.

ON October 17 the Minister received the report and minority report of the Board of Conciliation and Investigation which was appointed to deal with a dispute between the Moose Jaw Electric Railway Company and its motormen and conductors, members of Division No. 614 of the Amalgamated Association of Street and Electric Railway Employees of America. The dispute was said to have affected 36 employees and grew out of the latter's demand for a schedule of agreement with the company, providing for increased wages, shorter hours, improved conditions of employment, and recognition of the union.

A Board was established in this matter on September 14, Messrs. Jas. Thomson and Jas. Somerville, both of Moose Jaw, being appointed members thereof on the recommendation of the employing company and the employees respectively. On September 27 the Board was completed by the appointment of Mr. J. H. Wellington, also of Moose Jaw, as chairman, this appointment being made by the Minister in the absence of any joint recommendation from the other members of the Board.

The report bears the signatures of Mr. J. H. Wellington, chairman, and Mr.

Jas. Somerville, the employees' nominee. The Board stated that an endeavour had been made by conferences between the parties to reach some satisfactory arrangement but that all efforts in this direction had proved unavailing. On the question of wages, it was contended on behalf of the men that the rates paid for this service in Regina, Saskatoon, Calgary and Edmonton are considerably higher than those paid by the Moose Jaw Electric Railway Company. The company, however, contended that a fair comparison could not be made on this basis as the above named street railways are owned and operated by the respective municipalities, whereas the Moose Jaw Electric Railway is owned and operated by a private company. The report embodied a schedule of wages and working rules recommended to remain in force until August 1, 1917. This schedule provides for wage rates slightly in excess of the company's offer, and a working day of nine hours in so far as the operating conditions would permit.

Mr. Thomson, in his minority report, proposed as a basis of settlement the rates offered by the company. On all other points Mr. Thomson concurred in the recommendations of the majority report.

Report of Board

The text of the report of the Board in this matter is as follows:

F. A. Acland, Esq.,
Deputy Minister of Labour,
Ottawa, Ont.

Sir,—

In the matter of the dispute between the Moose Jaw Electric Street Railway Company, Limited, and their motormen and conductors, members of the Amalgamated Association of Street and Electric Railway Employees of America, Division No. 614, the undersigned members of the Board of Conciliation and Investigation appointed to deal with this dispute make report as follows:

On October 4, 1916, the Board was constituted and met in the City Hall, Moose Jaw. The sittings continued until October 6 when an adjournment was made until October 9. Mr. A. Dion, superintendent, and Mr. C. E. Armstrong, one of the directors, appeared before the Board in the interests of the street railway, and Mr. Arthur Brierley and Mr. George Ford represented the motormen and conductors.

The matter complained of on behalf of the motormen and conductors was the failure of their committee to arrive at a satisfactory agreement providing for an increase in wages, shorter hours, improved working conditions and recognition of the Amalgamated Association of Street and Electric Employees of America.

In reply to these complaints it was contended on behalf of the company that they were now paying all and more than the receipts of the company would warrant and that any increase over the present rates would work a grave injustice on the company.

In presenting the employees' case, Mr. Brierley reviewed the negotiations that had taken place between the men and the company, dating back to November, 1915, and dealt at considerable length and supplied figures to show the rapid increase that had taken place in the cost of living during the last 18 months or two years, running as high as 31 per cent, and also pointed out that at the time the first reduction in their wages took place, which was on December 16th, 1914, that the company gave the men to understand that the reduction was only temporary and that as soon as conditions improved this reduction would be removed. In support of this contention the Board secured a copy of the Bulletin from the company, which is as follows:

(Bulletin No. 443.)

Notice to Conductors and Motormen:

Motormen and conductors please take notice that, starting December 16, a reduction in wages of 10 per cent will go into effect. This reduction is due altogether to conditions which are prevalent throughout the country. As soon as 'times change for the better this reduction will be removed. In the meantime we trust that you will continue to be the loyal employees that you have always shown yourselves to be and feel that this step, no matter how unpleasant a one, is forced upon us.

By order,
General Superintendent.

December 15, 1914.

We might point out in this connection that the company claim that the men's contention is correct, that the reduction is only temporary, and that as soon as conditions will warrant it, the former rates of pay will be restored, but that at the present time conditions have not improved sufficiently to warrant the company in fully restoring the former rates which were paid prior to December 16, 1914, which are as follows:

	Per hour.
For first 6 months' service..	27½c.
For second 6 months' service	30c.
Second year	32½c.
Third year and after	35c.

This reduction continued until the end of February, 1915, when a further reduction was made of 5 per cent, making a total reduction of 15 per cent.

The evidence went to show that the company considered this a temporary reduction as the men's time was computed on the basis of the rates in existence prior to December 16, 1914, and then the 15 per cent was deducted. This system of keeping the men's time continued until July 21, 1916, when another Bulletin was issued as follows:

(Bulletin No. 274.)

To Conductors and Motormen:

Conductors and motormen will please take notice that the following rates of wages will take effect starting July 16, 1916:

	Per hour.
First 6 months	26c.
Second 6 months	26½c.
Second year	27½c.
Third year	30c.

July 21, 1916.

By order,
A. H. D., Superintendent.

This Bulletin that was issued on July 21, 1916, is where the men claim the company broke faith with them, as they claim that it provided a flat rate and consequently a new rate, and while it provided a small increase it had no reference whatever to the old rates that were in existence prior to December 16, 1914. On the other hand the company claim that they had no intention whatever of breaking faith with the men, but was for the purpose of giving them a slight increase and to reduce the office work as far as making up the men's time was concerned.

Mr. Brierley, on behalf of the men's contention, compared the rates paid in Regina, Saskatoon, Calgary and Edmonton street railways, which are considerably in advance to those paid by the Moose Jaw Street Railway for similar services.

Against this claim the company contends that it was not a fair comparison, as these roads are owned and operated by the municipality, that at least three of the systems are being operated at a considerable loss, also that it is much easier for a municipality to finance a deficit than a private company.

You will observe that the negotiations between the company and the men started in November, 1915, and continued from time to time until June 15, 1916, when it would appear that negotiations took a definite shape, as on this date there were three requests made: First, that the old rate of wages be restored; second, that nine hours constitute a day's work, and overtime be paid at the rate of time and one-half; third, that seats be provided for motormen and conductors.

The first and second requests were not granted. The third request was granted on certain conditions not satisfactory to the men.

On July 3, 1916, there was another conference held between Superintendent Dion and the men. At this interview the men requested increases for the second and third year men. To this request Mr. Dion could not give any satisfactory answer but would give them a reply on the seventeenth. Apparently nothing further took place until July 21, 1916, the date on which Bulletin No. 274, referred to above, was posted.

Negotiations continued to take place between July 22, 1916, and August 31, 1916, when the following rates were granted:

- 26 cents per hour, first 6 months.
- 26½ cents per hour, second 6 months.
- 28½ cents per hour, second year.
- 31 cents per hour, third year.

This proposition was rejected by the men, although Mr. Dion claims that his understanding was that the men had accepted the offer, and complained very bitterly of the men ac-

cepting the company's offer and then increasing their demands. This, of course, the men claim was not the case.

At this point a very lengthy discussion took place. Considerable more evidence was submitted by the men in support of the increases asked for, while the company submitted their books and daily receipts to show that they were paying the men all they could afford to pay.

The schedule was then taken up and endeavour made to consider it clause by clause. We discussed clause 2, 5 (a) and 5 (b). These clauses chiefly pertain to the rates per hour and overtime.

These clauses resulted in a long discussion and considerable evidence put in by the men to show the average number of hours the men had to work per day and the number of days worked per year in order for them to draw a pay from \$65.00 to \$78.00 per month. They also submitted a comparison with other classes of labour, with their rates of pay and working conditions.

A number of other street railway rates both in the East and West were submitted by both the company and the men. Mr. Dion stated that the company would be glad to restore the old rate to the men when business would warrant it, but would renew the offer made the men by the directors on Aug. 31, 1916, subject, however, to ratification. He would also grant the use of seats as requested except in restricted areas, to be decided upon.

Mr. Dion also stated that with the exception of the rates per hour and overtime, the company and the men had practically agreed on the balance of the schedule.

The Board asked the men if Mr. Dion's statement regarding agreeing to the balance of the schedule was correct. The reply was in the affirmative.

Mr. Brierley here stated that if the company would grant the following rates he thought the men would accept:

- 26 cents per hour for the first six months,
- 27 cents per hour for the second 6 months,
- 29 cents per hour for the second year,
- 32 cents per hour for the third year,

and in addition to the above rates, 5 cents per hour extra on legal holidays.

Mr. Dion stated that the company would allow 5 cents extra per hour on legal holidays.

The company and the men being so close together, the Board was of the opinion that it would be wise for Mr. Brierley and Mr. Ford to call a meeting of the men and lay the company's proposition before them, which they consented to do, and in order to allow them sufficient time the Board adjourned.

The full Board met again on October 9, 1916; with Mr. Dion and Mr. Armstrong representing the company and Mr. Brierley and Mr. Ford representing the men.

Mr. Brierley reported that the men refused to accept the company's proposition and requested that the matter be left to the Board, and in addition presented a copy of a resolution passed by the meeting as follows:

That the meeting withdraws President Brierley's concessions and delegates President Brierley and Bro. Ford are instructed to take back the refusal of the men and censured for conceding anything at all and it is to be left in the hands of the Board for their report and findings on all clauses. Motion carried.

Mr. Dion registered a complaint that during the adjournment that was made for the purpose of laying the company's proposition before the men that Mr. Somerville had no right to be present at that meeting as his presence there was sure to influence the men. To this complaint Mr. Brierley strongly objected to the insinuation that the men would be influenced by outside parties.

Mr. Brierley here stated that the working conditions were not settled, although on Friday, Oct. 6, they informed the Board that they had been practically settled between themselves and the company.

You will observe that the negotiations here reached a deadlock as neither party was willing to concede anything further, and according to the men's resolution presented on the ninth it left no alternative but proceed with the consideration of the rates and working conditions, which was done.

The schedule was taken up clause by clause and the Board was successful in arriving at a unanimous conclusion in all clauses with the exception of clause 2 (a) pertaining to rates. On this clause you will receive a minority report from Mr. James Thomson.

In making our recommendations we have endeavoured to take all the circumstances presented to the Board into consideration and arrive at a conclusion that would be acceptable to all concerned.

We therefore recommend the following agreement of rates and conditions, to take effect Aug. 1, 1916:

AGREEMENT.

AGREEMENT entered into (in duplicate) this day of, A.D. 1916, by and between the Moose Jaw Electric Railway Company, Limited, hereinafter called "the Company," and the Amalgamated Association of Street and Electric Railway Employees of America, representing the employees of said company affected by the agreement, hereinafter called "The Association."

Witnesseth:

That the following wage schedule and working conditions shall take effect and be binding on the parties hereto:

Wage schedule.—Clause 1. This wage schedule and the working conditions submitted herewith shall be binding on the company and its employees until the first day of August, 1917, and from year to year thereafter unless changed by the parties hereto.

Either of the parties desiring to change the same or open up the agreement or wage schedule shall notify the other party in writing of the desired changes at least 30 days before the expiry of same.

Clause 2. The following rates of wages shall be paid during the continuation of this schedule:

(a) Motormen and conductors in the passenger service shall receive:

First six months.....	26 cents per hour.
Second six months ...	27 cents per hour.
Second year	29 cents per hour.
Third year	32 cents per hour.

1. **Working conditions.**—The company has no objection to any employee being a member of the Amalgamated Association of Street and Electric Railway Employees of America and will not discriminate against any employee by reason of his being a member of that organization.

2. **Grievances.** (a) A committee of the men shall be recognized by the company in discussing any grievances of any employee.

(b) Any employee suspended or dismissed for cause and upon investigation not being proved guilty shall be reinstated and paid for all time lost through such suspension or dismissal. Investigation of a charge in cases of suspension or dismissal shall be held as soon as possible thereafter and the suspended or dismissed employee shall be notified of the nature of the charge laid against him. He shall have the right to produce witnesses and evidence thereat, and also the privilege of having a fellow employee present if he desires. Final decision in all cases of suspension or dismissal shall be given as soon as possible after hearing if the charge is closed.

3. **Leave of absence.**—Employees' committees shall be granted leave of absence on business in so far as the regular operation of the service will permit and shall be given precedence over any other application for leave on the same day.

4. **Extra list.**—The company shall endeavour to maintain at all times an adequate and proper extra list, so that any motorman or conductor will not be required to work over schedule running time.

5. **Nine hours per day.**—Nine hours to constitute a day's work, and shall be observed as far as operating conditions will permit.

6. **Statutory holidays.**—On statutory holidays motormen and conductors shall be paid at 5 cents per hour extra.

7. **Permanency of position.**—Continuous service in either position as motorman or conductor as originally appointed to must be maintained if changes are made, such parties as change must go back to the bottom of the list but retain their rate.

8. **Transportation.**—Motormen and conductors shall be supplied with badges that will cover transportation at all times over all lines.

9. **Change money.**—It is agreed herein that the company shall advance to all conductors in its employ the sum of \$50.00 or over for the purchase of tickets and change to be used in the performance of their duties as conductors.

10. **Inspectors** shall furnish conductors with tickets and change when same is required to replenish their supplies when on duty.

11. **Reporting time.**—Motormen and conductors shall be allowed 15 minutes for reporting time prior to taking cars out in the service and they shall also be allowed 15 minutes additional time for pulling away cars taken out of the service.

12. *Stools*.—Suitable seats shall be supplied by the company and kept on all cars for the use of motormen and conductors when on duty except in restricted areas.

As witness the hands of the parties hereto.

All of which is respectfully submitted

(Sgd.) J. H. WELLINGTON,
Chairman.

(Sgd.) JAS. SOMERVILLE.

Moose Jaw, Oct. 11, 1916.

Minority Report

The text of the minority report of Mr. Jas. Thomson in this matter is as follows:

Minority Report re Moose Jaw Electric Railway Company, Limited, and its Employees.

Under the Industrial Disputes Investigation Act and re differences between the Moose Jaw Electric Railway Company, Limited, and its employees, being motormen and conductors, members of the Amalgamated Association of Street and Electric Railway Employees of America, Division No. 614, as one of the members of the Board of Conciliation and Investigation, after hearing all the evidence, I herewith submit my report as follows:

The Board's first sitting was on October 4, 1916, and for three days we inquired into all matters affecting the dispute and endeavoured to bring about an amicable settlement. In the schedule submitted to the Board we found that the working conditions could be satisfactorily arranged with both parties but could not arrange a wage rate that both parties would agree to.

The following rates, from both parties, were proposed as a basis of settlement:

Proposed by Company.

First 6 months—

26 cents per hour.

Second 6 months—

26½ cents per hour.

Second year—

28½ cents per hour.

Third year—

31 cents per hour.

and 5 cents per hour extra on legal holidays; nothing extra for overtime.

Proposed by Employees.

First 6 months—

26 cents per hour.

Second 6 months—

27 cents per hour.

Second year—

29 cents per hour.

Third year—

32 cents per hour.

and 5 cents per hour extra on legal holidays; nothing extra for overtime.

The Board was then asked to make their finding. After considering all the material supplied by the men (nearest similar wages in the City of Moose Jaw and Western cities, cost of living, etc.), and after examining the records of the company, which showed that all receipts were being paid out for operation of the road and that no dividends had been paid for two years, I came to the conclusion that the company's offer of 26 cents, 26½ cents, 28½ cents, 31 cents per hour was exceedingly fair and could not agree with the argument of the men's representative that the company, being a corporation, could finance easier than they as individuals could.

Where comparison of wages was made with other electric railways in other Western cities, which are somewhat higher, I find that they are all municipal owned roads and their deficits are made up by the ratepayers, while the Moose Jaw railway is owned privately.

Dated at Moose Jaw, Saskatchewan, this day of, A.D. 1916.

(Sgd.) JAMES THOMSON,

Member of Conciliation Board.

Report of Board in Dispute Between the Grand Trunk Railway Company and Maintenance of Way Employees

ON October 21 the Minister received the report of the Board of Conciliation and Investigation to which had been referred for adjustment certain matters in dispute affecting the maintenance of way employees of the Grand Trunk Railway System, members of the International Brotherhood of Maintenance of Way Employees, to the number of 3,200.

The dispute related to the question of wages.

On August 21 a Board was established by the Minister which was constituted as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed on the recommendation of the other members of the Board; Mr. F. H. McGuigan, Toronto, appointed on the recommendation

of the employing company, and Mr. G. D. Robertson, Welland, appointed on the recommendation of the employees concerned.

The report is signed by His Honour Judge R. D. Gunn as chairman, and Mr. G. D. Robertson, the employees' nominee. The report stated that the parties concerned had previously agreed upon a set of working rules but had been unable to agree upon the question of wage rates, the increases offered by the company being considered inadequate by the employees. The report further stated that after careful consideration of all the facts, statements and circumstances in the judgment of the Board the present rates should be increased, and they recommended that an increase of 20 cents per day should be made to section foremen, extra gang foremen, and their assistants, and an increase of 25 cents per day to section men, these increases to cover all divisions of the system and to be made effective from September 1, 1916.

Mr. McGuigan, the company's nominee, submitted a minority report, which was received in the Department on October 25. Mr. McGuigan, in this report, expressed his inability to concur in the increases recommended by the other members of the Board, giving as his reasons for doing so the adverse conditions under which the company is operating and the fact that the company is paying as high rates to its maintenance of way men as its principal competitors in the same and adjacent territory.

Shortly after the close of the month word was received from both parties accepting the findings of the Board, so that the dispute was definitely closed.

Report of Board

The text of the report of the Board in this matter is as follows:

IN THE MATTER of the Industrial Disputes Investigation Act and in the matter of a dispute between the Grand Trunk Railway (Employer) and its its maintenance of way men (Employees).

To the Honourable T. W. Crothers, Esq., K.C.,
Minister of Labour,
Ottawa, Canada.

The members of the Board of Conciliation and Investigation to whom was referred the dispute outlined in the application of the employees filed with the Registrar of Boards, having at a time and place agreed upon by the respective parties heard such evidence, representations and arguments as they desired to present upon the matters in dispute to be investigated, and having consulted and conferred with E. J. Chamberlin, Esq., President, and H. G. Kelley, Esq., Vice-President of the railway company, now respectfully report thereupon as follows:

The employees had terminated the schedule of working rules and rates made effective in March, A.D. 1914, by regular notice taking effect in July last past, and since have had many conferences with the employers, with the result that a set of working rules had been agreed upon, but without agreement upon the question of rates of pay to be established, which therefore forms the only subject for consideration by this Board.

The main lines of this railway system, extending from the City of Portland in the East, through the Provinces of Quebec and Ontario, into the States of Michigan, Indiana and Illinois, to the City of Chicago in the West, are divided into four working districts, or divisions, namely, (1) the Eastern, embracing all lines east of Toronto and Depot Harbour, with 345 section foremen and 1,043 section men; (2) Ontario lines, embracing all northwest and south of Toronto, except St. Thomas Division, with 286 foremen and 979 section men; (3) Western Division, embracing all west of Port Huron and Detroit, with 196 foremen and 768 section men, and (4) Southern Division, embracing all between Windsor and Buffalo, with 57 foremen and 260 section men.

These employees have charge of the upkeep of the track and terminal yards, and many of the section foremen are old and experienced employees, as well, no doubt, as are many of the section men in these divisions, and are keenly alive to the duties and responsibilities they have resting upon them.

It should also be stated that the per diem rate of pay for the section foremen ranges from \$2.40 to \$3.10, and section men in the same territory from \$1.70 to \$1.80, and by the rates now proposed by the employees they are seeking an increase of 50 cents per day for the foremen and section men generally, and considering that there are nearly 900 section foremen and 3,100 section men now on the pay-roll seeking such increase, the proposed advance in the total wage bill runs to vast proportions in this single branch of railway operating expense.

The grounds and reasons upon which the employees base their claims are the familiar ones, about which there cannot be much controversy, namely, increased cost of living, increase in wages generally, increase demanded by the same class of employees on the other railway lines.

It is also contended that the same class of organized labour on the other lines where increases have not been mutually agreed upon have submitted their claims to Boards.

The company say that the demand of the employees is very excessive and should not be upheld, as the present is an unusual and abnormal period in the history of the labour market and will not last, and even now the rates paid are reasonable and fair, because the service is steady and permanent, whereas other positions offering any more attractive pay are much less permanent in character and do not produce the same compensation the year round as the employees can earn, and to grant any increase means an invitation to other employees on the railway to seek increased rates, which if granted even partially, immensely swells the operating expense without affording any known remedy, or method of obtaining the funds to meet the largely increased operating cost.

There is undoubtedly very great force in the contentions of the officers and representatives of the company, and while the same have very great weight with the members of the Board, still the Board cannot avoid the duty laid upon it because of the consequences to the employers, any more than it could reasonably base a report to increase rates of pay to employees already adequately compensated for the sole and only cause that the employers were financially able to pay an increase.

It generally can be stated that the burden of establishing a right to a favourable report upon a demand for increased compensation lies upon the employees.

There is no doubt that the steady, continuous employment of the section men, with sure pay, is an element to be considered in adjusting the wage dispute submitted, and a comparison with rates on other transportation lines is not unfair.

An increase of 5 cents per day in rates for 3,000 section men means \$46,800 annually over and above present outlay, and the demand submitted is ten times that amount, or \$468,000, for section men alone, or nearly \$600,000 for foremen and section men. The company could not yield to the demand, nor give it serious consideration, but to their credit it can be said that they have granted increases to the men during the years past and continued the same rate of pay during the period of depression, following the outbreak of present war. Although claiming they could obtain an adequate force for their needs at present rates, but to retain their organized force, they would be agreeable to grant an increase of 15 cents per diem over present rates to the section men and section foremen on the system, but which was

not sufficient in the opinion of the employees and was refused.

The employees in presenting their schedule of rates have preserved the "differential" at certain established points, and with this situation the Board do not feel there is any excuse for interfering.

Notwithstanding the most earnest exertions of the Board to have the parties make a mutual adjustment of their differences, the result has not been reached that the Board has desired, as the employees have not seen fit to accept any of the propositions of the company made since the proceedings began.

After the most careful and serious consideration of all the facts, statements and circumstances submitted, the undersigned members of the Board do respectfully recommend and report that, in their best judgment, the present rates of pay for maintenance of way employees are not at the present time adequate, and should be increased, and do further recommend that an increase of rates of pay should be made to the section foremen, extra gang foremen and their assistants, as follows, that is to say, 20 cents per day, and to the section men an increase of 25 cents per day, on all divisions over the system, to be made effective from the first day of September, 1916.

(Sgd.) R. D. GUNN,
Chairman.

(Sgd.) G. D. ROBERTSON.

Minority Report

The text of the minority report of Mr. F. H. McGuigan in this matter is as follows:

To the Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ontario.

My Dear Sir,—

After numerous conferences with the President, Vice-President and other officers of the Grand Trunk Railway, also with representatives of their employees, and careful consideration of all evidence given at the several hearings of the Board, in the dispute between the Grand Trunk Railway Company and its maintenance of way employees, I regret that I am unable to concur in the recommendations of my colleagues of the Conciliation Board (Hon. Judge Gunn and Mr. Robertson) that the rates of pay of foremen be increased twenty (20c) cents, and section men twenty-five (25c) cents per day, believing, as I do, that so large a percentage of increase at this time, and under existing conditions, would be unjust and most unfair to that company.

My conclusions are based upon careful examination of the annual reports of the company, covering a period of twenty years' operations, and which show that the average rate received

for moving freight in the year 1895 was 0.68 of one cent (6 8/10 mills) per ton per mile, and an average rate of only 0.70 (7 mills) per ton per mile in the year 1915. An increase of less than 3 per cent in the earning capacity of the company for such service rendered the public, while on the other hand, in the year 1895, the pay of track foremen was only \$1.50, and section men \$1.10 per day, which has since been increased from year to year, to the present rate of \$2.40 for foremen and \$1.70 per day for section men, making a total increase to this class of employees of 60 per cent to foremen, and 54½ per cent for section men, in this period of twenty years, during which the company has been able to secure an increase of less than 3 per cent in freight rates.

Notwithstanding these adverse conditions, and with reports before him, covering the first six months of this year, ending June 30, 1916, showing his freight rates to be only 0.57 to 0.67 of one cent per ton per mile, clearly indicating a lower rate per ton per mile for this year (1916) than earned during the year 1895, President Chamberlin, in consideration of the increased cost of living proposed to share, as far as it seemed to him possible to do, the burdens of these employees, by a general increase of 15 cents per day, making an increase of approximately 70 per cent over the wages

received by this class of employees in the year 1895.

After numerous further conferences and much discussion Mr. Robertson said that he could not accept, on behalf of the employees, the increases offered by President Chamberlin. With the hope of reaching an amicable adjustment of the difficulty I then proposed a rate of \$2.55 per day for section foremen, and \$1.90 per day for section men, and \$2.00 per day for the section men employed in the seven or eight larger terminal yards. This offer was made with the distinct understanding that it was for the purpose of mutual agreement, and a unanimous report bearing the signatures of all members of the Board, otherwise it would be withdrawn.

Therefore, for the reasons stated, and the further reason that this company at present is paying as high rates to its maintenance of way men as its principal competitors, in the same and adjacent territory, I cannot concur in the increases recommended by my colleagues, nor that any increase which may later be agreed upon be made retroactive, to take effect on September 1, 1916, as suggested.

Very respectfully,
(Sgd.) F. H. McGUIGAN.

Toronto, October 24, 1916.

Report of Board in Dispute Between the Canadian Northern Railway and Maintenance of Way Employees on its Lines East of Port Arthur

ON October 21 the Minister received the report of the Board of Conciliation and Investigation which had been appointed to deal with a dispute between the Canadian Northern Railway Company and the maintenance of way employees on the company's lines east of Port Arthur, including trackmen, bridge and building employees, and water and signal service employees, members of the International Brotherhood of Maintenance of Way Employees, to the number of 1,000 directly and 3,000 indirectly. The dispute resulted from the employees' demand for the adoption of a schedule of wage rates and rules which they had submitted to the company.

A Board was established on July 22 and was composed as follows: His Honour Judge R. D. Gunn, Ottawa, chairman, appointed by the Minister on the recommendation of the other Board members; Mr. F. H. Richardson, Tor-

onto, the company's nominee; and Mr. G. D. Robertson, Welland, the employees' nominee.

The report is signed by His Honour Judge Gunn, chairman, and Mr. Robertson. The report stated that after a conference it was agreed that the employees affected on the main and branch lines in the provinces outside of Ontario and Quebec should be dropped from the dispute. It was also stated that there are 1,136 track foremen and men now admittedly entitled to representation by the maintenance of way department and that there are in or allied to the bridge and building department and the water and signal service and other trades about 180 employees seeking representation in the same schedule. The employer's general manager strongly objected to the inclusion of the above trades in the schedule of the maintenance of way employees, but the Board considered that

to deny these employees the right and privilege of representation indefinitely would create dissatisfaction and disorganization without in any way serving the interests of the employers; and, in the opinion of the Board, no injustice would result from the inclusion of the different branches in the schedule at the present time. The question of putting into effect different schedules on lines east of Port Arthur was considered, but the Board decided that one schedule would be sufficient. The task of framing one schedule necessitated the examination of past and proposed schedules in detail, and the Board acknowledged the very valuable assistance received from the representatives of the company and the employees. Schedules of wage rates and working rules were drawn up and submitted by the Board, the same to be effective from September 1, 1916.

The minority report of Mr. F. H. Richardson was received in the Department on November 2. In this report Mr. Richardson gives his reasons for not concurring in the recommendations of the majority report.

Report of Board

The text of the report of the Board in this matter is as follows:

IN THE MATTER of the Industrial Disputes Investigation Act, 1907, and of a dispute between the Canadian Northern Railway lines east of Port Arthur (Employer) and its maintenance of way employees (Employees).

Upon the application of the employees it pleased the Honourable the Minister of Labour to constitute a Board of Conciliation and Investigation, to whom were referred the disputes defined in the said application and statements filed in the Office of the Registrar of Boards of Conciliation.

After consultation with the parties, 10 a.m. on Tuesday, the nineteenth day of September, A.D. 1916, at the Court House in the City of Toronto, was fixed as the time and place to hear the said parties and their witnesses.

The employees were represented by F. H. Fljzodal, general chairman; Mr. W. Crampton, general secretary; J. G. Maggs, secretary of Western lines, and C. P. Parnell, A. Frakes, Joseph Lacoste, H. H. St. Cyr and W. J. Coughlin, members of the men's committee; and the

employees were represented by Mr. W. M. Moore, secretary, and Mr. L. C. Fritch, general manager of the employer's Eastern lines.

From the statement of the general chairman of the men's committee it appeared that the schedules heretofore governing the employees had been determined by notice on the second day of June, A.D. 1916, and one new schedule was proposed to provide increased rates and to include all the main and branch lines in the provinces of Ontario, Quebec and Nova Scotia, where heretofore separate schedules existed, and employees in other departments not heretofore defined in any schedule. It was agreed after a short conference that the employees affected on the main and branch lines in provinces outside of Ontario and Quebec should be dropped from the dispute.

It further appeared that there are 1,136 track foremen and men now admittedly entitled to representation by the Maintenance of Way Department, and that there are in or allied to the Bridge and Building Department, Water and Signal service and other trades in the same territory about 180 employees seeking representation in the same schedule, as shown by and defined in Exhibit No. 1 hereto, who had been recruited by the Maintenance of Way organization, with a view to the present procedure.

It was conceded that the employees in the Bridge and Building, Water Service and Signal Departments on the main and branch lines in the Province of Quebec, or a majority thereof, were members of the employees' organization; it was denied, however, that the men in these last departments within the Province of Ontario, or even a majority, were members or entitled to be represented by the Maintenance of Way employees.

Many conferences had taken place and much negotiation had been effected between the parties without any satisfactory results. After hearing the statements of the general chairman, and other gentlemen representing the employees, and some considerable discussion, the Board, to save time and labour under present conditions, urged the parties to make another earnest effort to agree on a schedule in all its terms, which suggestion was acted upon, with, however, little beneficial result. In the circumstances the Board was compelled to proceed and hear the representations of the different parties at length and in detail on the whole dispute.

After these statements and representations had been fully presented by the representatives of the parties and the proposed schedule carefully reviewed in all its parts, it appeared clearly that the employees proposed the new schedule on the grounds and for the reasons following:

1. The old schedule of working rules was obsolete and inapplicable to hours, service and representation.

2. The new schedule of rules provided for the inclusion of and representation for the different branches of service enumerated in Exhibit "1," and increased rates of pay based on the greatly

increased cost of living, as well as increases granted the same class of labour on other lines and the increased scale of wages generally obtaining in all other services, all of which statements were strongly supported by the officers and members of the men's committee.

The employer's general manager objected strongly to the regular Maintenance of Way men including and representing the Bridge and Building, Signal and Water service men, or any of the trades mentioned by the Exhibit "1," for the reasons that he believed the men in these other services in the Province of Ontario had never been included in any schedule and were not members of the Maintenance of Way organization, and over 1,000 miles of the road were not in operation a year as yet, and conditions and positions were not at all settled or in any manner of a permanent or fixed character, and it would materially hamper and embarrass the management in the placing of men in these new departments, and unfavourably affect the operating efficiency of the line by unfairly tying the hands of the officials and limiting the exercise of their discretion in handling and placing the employees, and to impose any new conditions and rules as is done on the other and older railway lines much better organized and many years in operation would be unreasonable here.

The general manager did state that they had made advances in rates on many points without solicitation and that the company was not unwilling to make the increases in the rates, though not to the full extent proposed, at the present time, but protested against the extension of any of the schedules to cover new conditions or give new representation to any employees in any branch of service not heretofore included in schedule.

The foregoing fairly outlines the main contentions put forward by the respective parties, and sufficiently defines the chief reasons deducible from the testimony submitted supporting the different contentions.

The Board have, after fully reviewing the whole evidence, statements and representations, and carefully weighing the contentions of the different officers and committeemen of the employees and the officials of the company, concluded to deal with and report on the dispute as follows:

First—Demand of the employees to include in the proposed schedule the departments of service named in Exhibit 1.

Second—Advisability of placing in force one schedule for the main and branch lines east of Port Arthur.

Third—Consider the proposed working rules.

Fourth—Adjust the rates of pay.

It has been stated and is correct that there are east of Port Arthur 342 track foremen and 794 trackmen. These men are employed in the upkeep of the track and yards, terminals, and between the stations throughout the system, and

are regularly organized as maintenance of way men, and were defined in a schedule of working rules and rates of pay settled in April, 1914, and made effective on the first of July of the same year, and recently determined as hereinbefore mentioned. This organization since the last schedule was made effective have brought into their ranks the B. and B. men, Signal men, and Water Service employees, and others on the main and branch lines east of Port Arthur. On the question of fact as to whether the employees in B. and B. Department, Water and Signal service are or are not members, there appears every reason to believe that in Ontario and Quebec the majority are members of such organization. It should be pointed out that these departments are in the schedule on the company's lines west of Port Arthur, and in the schedule on the lines of the Canadian Pacific Railway and Government Railways.

Exhibit I shows that the B. and B. Department number 101 men, and that there are approximately 20 signal men who operate lever at interlocking points, and 25 pump men and pump repair men who are or may be properly classed as permanent employees performing duties well defined and filling positions which are not at all of a temporary character, and which employments are on many, if not all, other railways allied to and represented by the Maintenance of Way organization, and it also must be conceded that automatically with the opening of any railway line for traffic there becomes a necessity for B. and B., Signal and Water service men, as well as Maintenance of Way men, and these employments are on all roads permanent in character, and, in the opinion of the Board, to deny the right now sought by the employees in these departments would deprive them of the right and privilege of representation indefinitely, create dissatisfaction and disorganization, without in any way serving the interests of the employers, and in the opinion of this Board no injustice will result if these different branches of the service be included in the schedule at the present time, nor can we realize that any embarrassment will be occasioned to the management, such as claimed.

The Board also have considered the question of putting in effect different schedules on lines east of Port Arthur and have concluded to report that one schedule, including the employees, and covering rates and working rules, is all that is necessary

The Board have considered and carefully revised the proposed working rules, and would recommend that the Exhibit 2 hereto be the working rules to be adopted and made effective on the company's main and branch lines east of Port Arthur from the first day of September, A.D. 1916. After carefully investigating the reasons for increases sought in rates the Board have pleasure in recommending that the rates, as defined in Exhibit 3 hereto, many of which

have generously been conceded by the employers, be made effective on the same lines in the same territory from the first day of September, 1916.

The Board desire to draw attention to the real importance of many of the arguments made by the general manager against hasty and ill-considered demands for schedule and beg to state that on this particular railway, struggling to create a sphere of usefulness and striving for financial results, the employees in all branches who may to-day consider they are underpaid will in the future be the men who acquire promotion with increased compensation, and comparisons of rates of pay with other and all older lines at present time, though the labour may be similar, while open to consideration, should not be conclusive in determining rates of pay, and the hope is expressed that it will be only after serious consideration and for excellent reasons that the employees seek to depart from the new schedule.

The task of framing one schedule included the examination of the past and proposed schedules in detail and involved much labour and patience on the part of all concerned, and it is gratifying to the Board to acknowledge, as they do, the very valuable assistance received from the representatives of all parties and the usual courtesies extended by the officers of the company, exhibiting in many ways that added materially to the beneficial deliberations of the Board.

(Sgd.) R. D. GUNN,
Chairman.

(Sgd.) G. D. ROBERTSON.

Dated this sixteenth day of October, A.D. 1916.

Exhibit 1 to the Report—List showing number of men employed in the Maintenance of Way Service, C.N.O. Eastern Lines, and sought to be included in proposed schedule.

Track foremen	342
Track labourers	794
Bridge and building, foremen, road	18
Bridge and building, foremen, yard	1
Bridge men	56
Carpenters, shop	2
Carpenters, road	24
Pump repairers	4
Pump repair men	2
Pump men	10
Blacksmith	1
Gate men and signalmen	32
Signal repair foremen	1
Dredge and building labourers	9
Paint foremen	2
Painters	7
Signal repairmen	2
Total	1,316

Exhibit 2 to Report—Proposed Schedule of Rules governing service of Maintenance of Way Employees on all lines operated by the Canadian Northern Railway Company, east of Port Arthur, in Ontario and Quebec. Effective First September, 1916.

Section 1. Maintenance of Way employees are men employed in the Track, Bridge and Building Department, interlocking signalmen, pumpmen and pump repairers, who have been in the service continuously for 12 months or more, or who have had 12 months' cumulative service in the immediately preceding three years and are hereinafter referred to as "employees." Labourers in extra gangs, unless practically engaged the year round, will not be ranked as permanent employees.

Section 2. Ten hours shall constitute a day's work. When required to work in excess of ten hours, time and a half will be allowed for such excess and for work done on Sundays and Christmas Day.

Twelve hours shall constitute a day's work for signalmen, and they shall be entitled to at least eight hours' continuous rest in each twenty-four.

Employees will not be required to work more than 24 hours continuously without a rest of eight hours, except in cases of emergency, when other help not available.

At pumping stations where the amount of work is such that it is necessary for pumpmen to work continuously for 12 hours in order to keep the supply up, overtime will be paid pro rata up to 24 K. and at the rate of time and a half between 24 K. and 7 K.

Section foremen and sectionmen travelling on orders of the company to and from work after regular working hours will be allowed straight time. Members of bridge and building gangs travelling on orders of the company to and from work after their regular hours will be allowed straight time, except when provided with boarding and lodging cars to carry them to and from work. Members of regular bridge and building gangs travelling in boarding cars at the request of the company, on Sundays, between 7 K. and 16 K. will be allowed straight time.

Extra gang foremen, provided they remain on duty, will be allowed straight time for wet days.

Section 3. Sectionmen and section foremen taken off their regular sections temporarily to work on snow or tie trains or other work will be compensated for the boarding and lodging expenses incurred.

Bridge and building employees taken from their place of residence or boarding outfits over night will be compensated for the extra expense they necessarily incur, such expense not to exceed 75 cents per day.

Section 4. Employees required to attend to and light semaphore or switch lamps before or after regular hours will receive \$4.00 per month for eight or less lamps, and 50 cents per month per lamp for those in excess of eight. When lamps are located beyond the yard limits they will be attended to during regular working hours.

Section 5. Employees will be promoted hereafter on their respective superintendent's division in order of seniority, provided they are qualified. The several senior qualified employees shall be advised of all vacancies in the position of foreman, and their applications, if presented within five days after being notified, will be considered. Employees may be transferred from one division to another for extra gang work, or on opening of new lines, or when the necessary qualified men are not obtainable on the division.

In promoting employees to the position of road-master or bridge and building master, men may be taken from any point on the system, according to seniority, if competent.

Employees refusing promotion will become junior to those accepting such promotion.

An employee who is transferred to another department, or from the bridge and building department to the track department, or vice versa, at his own request, will lose his seniority standing.

A list of all employees will be prepared for each superintendent's division, and such list will show the seniority standing of each employee. The lists will be revised from time to time to agree with the rates of service and promotions made, and a copy will be furnished to employees' representatives, which will be open for inspection and correction on proper representation.

In the event of a reduction in the number of men employed, those longest in the service shall be given preference of employment.

Employees leaving the service of the company, when their services are required, in the event of re-employment, will rank as new men.

Section 6. Leave of absence and free transportation will be granted to members of duly appointed committees for the adjustment of matters in dispute, previously submitted in writing, between the company and employees, so far as is consistent with good service, within ten days after request in writing has been made to the proper officers.

Section 7. Employees suspended or dismissed, who consider they have been unjustly treated, will receive full and impartial hearing, and will be advised of decisions reached within 15 days after the time of their suspension or dismissal. Should the investigation show that the suspension or dismissal was unjust, time will be allowed and employees reinstated. Appeals from decisions must be made in writing by the employee through his roadmaster or bridge and building master within 15 days after being advised of such decision.

Except in case of sickness, leave of absence will not be granted beyond three months. Employees remaining out of the service of the railroad longer than three months will rank as new men. Applications for leave of absence must be made in writing.

Permanent employees leaving the service of the company from any cause whatever will be furnished with service letter, if desired.

Section 8. For the purpose of enabling them to attend their meetings employees will be granted leave of absence four times a year, and free transportation not to extend beyond their superintendent's division. Such leave of absence will not exceed two days, and then only when consistent with good service and provided the company is not put to any additional expense.

Section 9. Employees will, on request, be granted transportation in accordance with the established rules of the company.

Section 10. The company will keep all section houses in good repair; the cost of repair, other than ordinary wear and tear, to be charged to occupant.

Section 11. A member of the household of permanent employees will be furnished with free transportation once a month for the purpose of purchasing supplies.

Section 12. Bridge and building gangs shall, where practicable, include:

First—Foreman.

Second—Carpenters, who shall be skilled mechanics in house and bench work, and have a proper kit of carpenters' tools.

Third—Brigemen, who shall be rough carpenters, expert saw, axe and hammer, and have a general experience in bridge work.

The rates of pay of bridge and building employees will be increased 15 cents per day each year until the maximum rate is reached, and after five years' continuous service they will receive the maximum rate for their class of service.

Section 13. Monthly rate of employees will be given two weeks' leave of absence each year with pay, after one year's service. In the event of the company not being able to relieve any employee and grant leave of absence to him in any one year such leave of absence will be added to his leave in the following year.

Employees of maintenance of way will not be required to clean out buildings at stations or back yard at stations where station occupied by agent or other parties.

Exhibit 3 to the Report—Rates of Pay governing Maintenance of Way Employees on the Canadian Northern Railway Eastern Lines.

(Port Arthur to Foleyet inclusive.)

	Per day.
Section foremen in yards at Jellico, Horne, Payne and Foleyet	\$3.00
Sectionmen in yards	2.00
Foremen on line	2.70
Men on line	1.90
Foreman of extra gang	3.00-3.85
Asst. foreman of extra gang	2.70

B. and B. Department—

	Per day.
B. and B. foremen	\$4.00
Brigemen	2.50-3.00
Carpenters	2.75-3.25

Water Service Department—

	Per month.
Pump repairers	\$85.00
and expenses \$1.00 per day when necessarily incurred away from headquarters.	
Pumpmen (one pump)	57.50
for each additional pump	5.00

(East of Foleyet.)

	Per day.
Section foremen in yards at Toronto, Trenton, Ottawa, Quebec, Joliette, Montreal, Longue Point, Capreol, Sudbury and Limilou	3.00
Sectionmen in same yards	2.00
Section foremen at Parry Sound, Belleville, River à Pierre, Chambord, Chicoutimi, Hawkesbury, St. Jerome, Garneau, St. Raymond, and Jonquiere, and Brockville	2.70
Sectionmen in same yards	1.90
Section foreman on line, except branches ..	2.55
Sectionmen on line	1.90
(except branches in Ontario)	
Sectionmen on B. W. and N. W., I.B. and O. Tweed Sub. and Central Ontario	1.60
Foreman, extra gangs	2.55-3.75
Asst. extra gang foreman	2.55
Foremen on branch lines	2.40
Snow plough service in all lines:	
Foreman in charge of snow plough or flanger to receive \$1.00 per day over and above his ordinary daily wage, and expenses necessarily incurred when away from home.	
Other employees in the same service, 75 cents per day over daily wage, and expenses when necessarily incurred when away from headquarters.	

Bridge and Building Department—

	Per day.
B. and B. foreman	\$3.75
B. and B. men	2.25-2.50
Carpenters	2.50-2.75

Water Service Department—

	Per month.
Pump repairers	\$85.00
and expenses not to exceed \$1.00 per day when away from headquarters.	
Pumpmen (one pump)	50.00
each additional pump	5.00
Interlocking towermen	55.00

Minority Report

The text of the minority report of Mr. Richardson in this matter is as follows:

To the Honourable Minister of Labour and Registrar of Boards of Conciliation and Labour Investigation, Department of Labour, Ottawa, Ont.

Dear Sir,—

Referring to the matter of industrial dispute between the Canadian Northern Railway, lines east of Port Arthur, and its maintenance of way employees.

I was unable to forward my report to you owing to not having a copy of the final report of my colleagues. Having been advised this morning by the chairman that a copy of this report was in the hands of the company, I have since had opportunity of seeing it, and now beg to submit my report on this controversy.

Exception is taken to the report filed by the other two members of this Board, to wit:

The officers of the Canadian Northern Railway, Eastern Lines, in agreeing to a Board of Conciliation in this matter, definitely pointed out to you, and it was understood that the question of including bridgemen, water supply men and signal men in the schedule was not a matter to be considered by this Board, and that therefore the Board had not authority to consider this matter or make any recommendation thereon. The report filed with you by the other members of this Board stated that they could see no reason why the bridge and building, water supply and signal men should not be included in the schedule, as the schedules of the Canadian Pacific Railway and the Government Railway included these employees. It was, however, not stated that the bridge and building men, water supply men and signal men are not included in the schedule of the Grand Trunk Railway and no request whatever has been made on the Grand Trunk Railway to include such employees. There is no good reason why the Canadian Northern should be forced to include men in this schedule that are not in the schedule of the Grand Trunk Railway, a corporation that has approximately five times the earnings that obtain on the Canadian Northern Eastern Lines.

When this matter was under discussion the Canadian Northern Railway took the position that the majority of men engaged in bridge and building, water supply and signal department are not members of the International Brotherhood of Maintenance of Way Employees, and no proof was submitted to sustain the contention made that majority of such employees were members of this organization. Therefore, I cannot concur in the report of my colleagues, that these men should be included in the schedule.

The company clearly pointed out in its arguments the reason why these men should not be included in a schedule at this time and the report filed with you by the other members of the Board does not fully inform you of the arguments made by the railway company on

this important matter. One of the main reasons why these men should not now be included in the schedule is the fact that this is an abnormal period in the labour market and to predicate a schedule of employment of this class of men, at present, will impose conditions on the company from which it cannot recover when these abnormal conditions have changed, and the company would be free to deal with this matter later when proper conditions obtain.

To further emphasize the company's stand, many of the positions which it is sought to put into the schedule do not exist at all, and many of them only exist for a fraction of a year, which does not give these men the necessary standing to bring them under the schedule.

The railway company endeavoured in every possible way to reach a compromise with its employees, and the only reason why a compromise could not be reached was due to the fact that no concessions were made on the part of the men, while the railway company continually made concessions with the object of reaching a satisfactory conclusion. To emphasize this point it may be stated that the chairman of the Board of Conciliation during the progress of the hearing stated that he would give the men and the company another opportunity to meet with a view to reaching a compromise; the railway company endeavoured by every possible means to make a settlement by making concessions, and it did make valuable concessions, to the extent of being willing to name the rates covering the bridge foremen, bridge carpenters and bridgemen in the schedule, but the men absolutely refused to make any concessions whatever on their part so that a settlement could not be reached.

I reiterate, therefore, that the other members of the Board in reporting this matter to you have not given you a complete statement of the testimony taken on this point.

The report filed by my colleagues stated that:

"In the opinion of the Board, to deny the right now sought by the employees in these departments would deprive them of the right and privilege of representation in—definitely, create dissatisfaction, and disorganization, without in any way serving the interests of the employers, and in the opinion of this Board no injustice will result if these different branches of the service be included in the schedule at the present time, nor can we realize that any embarrassment will be occasioned to the management, such as claimed."

Exception is taken to this statement for the fact that there was no evidence produced to show that there was any dissension among the employees of the Bridge and Building Department, and no such condition as explained by the other members of the Board has ever arisen or could arise, but evidence showed that the men were being fairly treated and there are no

complaints in regard to their treatment. Therefore, the inclusion of these men in the schedule will have no effect whatever in the character of their treatment and employment by the company.

My conclusion, therefore, is that this Board has no authority to recommend the inclusion of the bridge and building men in the schedule as this was a matter not within the province of the Board, and, although it was discussed, there was no evidence submitted or proof supplied to show that a majority of the employees of the Bridge and Building, Water Supply and Signal Departments on Canadian Northern Eastern Lines were members of International Brotherhood of Maintenance of Way Employees.

The only question properly before the Board was that of rates of wages for the men employed on track work. There was no testimony whatever submitted by the men that the wages offered by the company were unfair, and the Board was allowed to believe that the propositions made to the trackmen in their negotiations with the company were acceptable and no exceptions were taken to them, and therefore the Board was led to expect that the rates which were practically agreed upon by conference between the men and the company and shown hereto as Exhibit "A" are the rates which should be established.

The company had voluntarily in many instances increased the wages of its trackmen during the past summer and in an opportunity had been given to introduce testimony on the question of wages before the Board it would have been plainly shown that the wages of trackmen are governed by the supply and demand of the labour market. It is well known that at present the labour demand exceeds the supply and the rates are therefore on an abnormal basis. If a schedule is made now on the present abnormal conditions of the labour market it will impose a hardship on the company, when these conditions have been changed, unless the employees would agree at this time that the rates would be changed subsequently to meet the changed condition of the labour market.

As to the question of rates, the men themselves stated that there was very little difference between the company's offer and the men's final proposal on rates and no testimony was offered by either the men or the company on this point.

If testimony has been taken on the question of rates the company could have shown that with the previous negotiations with the men that they were perfectly satisfied with the rates offered on branch lines in view of the fact that an increase in wages had been made during the summer on branch lines, the figures of which were accepted by the committee of the men. Without introducing any testimony on this point the Board has recommended an increase

on the branch lines' rates over and above the amount that was satisfactory to the men and the company, I submit that the Board should not have re-opened this question and increased rates of wages which were already acceptable to the men.

The railway company contended that the present working conditions are ample to cover and fully protect the men and there is no necessity of introducing a lot of new conditions, many of which do not apply in any of the schedules with other railway companies, for example:

In Section 12—two weeks' leave of absence each year with pay is given a certain class of employees. This is not now in effect in any schedule covering trackmen in Canada, and the Canadian Northern Eastern Lines cannot consent to such a condition.

For reasons given above I cannot assent to the report made by the other members of this Board, and I therefore desire to submit this minority report.

(Sgd.) F. H. RICHARDSON.

Toronto, Ont., October 30, 1916.

SETTLEMENT OF DISPUTE BETWEEN CANADIAN PACIFIC RAILWAY AND ITS TRAINMEN

ANNOUNCEMENT was made on October 25 of an amicable settlement of matters in dispute between the Canadian Pacific Railway Company and its trainmen, numbering approximately 7,000, the dispute relating to terms of employment. The settlement was effected in Winnipeg as the result of negotiations between Mr. Grant Hall, Vice-President and General Manager of the Company's Western Lines, and representatives of the Order of Railway Conductors and the Brotherhood of Railroad Trainmen, respectively. Towards the middle of October and for some days thereafter there was widespread apprehension of a trainmen's strike throughout the entire Canadian Pacific Railway system on account of the negotiations between the employing and the employed interests having apparently reached a deadlock. At this point, however, the Dominion Government through the Prime Minister and the Minister of Labour appealed to the parties concerned for a resumption of negotiations, and the services of Mr. G. D. Robertson, of Welland, Ontario, were also employed as a mediator with this end in view. Mr. Robertson, at the instance of the Minister of Labour, proceeded to Winnipeg, arriving on Sunday, October 22, and an agreement was announced on the following Wednesday.

It should be noted that this dispute originated in a demand made upon the Canadian Pacific Railway Company in September, 1913, by its trainmen for the acceptance of a new schedule of agreement. No settlement resulting from direct negotiations, an application was made by the employees in March, 1914, for a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, and a Board was established by the Minister of Labour early in April; the Board reported in

August, 1914, the employees' nominee submitting a minority report. The majority report was accepted by the company but was not acceptable to the employees. This point in procedure was reached simultaneously with the outbreak of war, and the representatives of the employees in their communication to the Minister of Labour, stating the attitude of the employees to the Board's findings, added that "having regard, however, to the facts in connection with the recent war developments in which the British Empire is so deeply interested and involved, it has been decided that these matters will be left in abeyance for a shorter or a longer period before being submitted to the men of the line."

The Minister of Labour, becoming aware that the negotiations of October, 1916, were not progressing favourably and that a strike was threatening, expressed his willingness to establish a Board of Conciliation, should an application be received, and the question was raised if a strike under the existing conditions would be lawful, the Minister's views being that there was ground for doubting the legality of a strike with regard to which no inquiry under the Act had taken place for considerably over two years. Representatives of the employees, on the other hand, held that the requirements of the Industrial Disputes Investigation Act had been met by the procedure of 1914. The point involved is one which had not previously arisen and had not been therefore the subject of any judicial or official decision.

Reference is made elsewhere in the present issue to an application received on October 23, 1916, from the Canadian Pacific Railway Company for a reference of the matters in dispute to a Board established under the Industrial Disputes

Investigation Act. The resumption of direct negotiations between the parties bringing about a settlement, no procedure on the company's application became necessary.

The terms of the new agreement were not available for publication in time for the present issue of the *Labour Gazette*, but will be printed if possible in the December number.

TRADE DISPUTES DURING OCTOBER, 1916

DURING October there were nine industrial disputes in existence involving approximately 26 employers and 215 employees. Two of these disputes commenced during the month, while seven were carried over from September. In the two new disputes of the month two establishments and 47 employees were affected, while 24 firms and 168 employees were involved in the seven disputes commencing prior to October. The estimated time losses occasioned by the nine disputes amounted to 3,673 working days, 3,058 of which are chargeable to the seven old disputes and 615 to the new disputes. Three of the nine disputes were terminated during the month, two of these terminated strikes being the two which commenced in October. Settlements were effected in the case of one of the new and one of the old disputes, while in the case of the other new dispute the strike ended as a result of the places of the strikers being filled. Six strikes remained unsettled at the end of October.

New disputes in October, 1916.—The table below shows the trades affected by the two new disputes of October:

TRADES	No. of disputes	No. of firms.	No. of employees.
Clothing trades.....	1	1	25
General Transport	1	1	22
Total	2	2	47

Disputes beginning prior to October

One of the disputes commencing before October was settled during the month. This dispute was:

Structural iron workers, Hamilton, Ont.—On September 5, about 25 structural iron workers in the employ of the Hamilton Bridge Works Company, Limited, Hamilton, Ont., went on strike to enforce their demand for a nine-hour day. As a result of negotiations between the employees and the company a settlement was effected resulting in the company acceding to the demand for the nine-hour day. The men resumed work on November 1.

The following six strikes, the date of commencement of which dates prior to October 1, remained unsettled at the end of the month:

Machinists, boilermakers, blacksmiths and car repairers, Toronto, Hamilton & Buffalo Railway, Hamilton, Ont.; electrical workers, Hamilton, Ont.; machinists, Hamilton, Ont.; carpenters, Welland Canal; moulders, Vancouver, B.C.; cigarmakers, London, Ont.

Disputes beginning during October

Lasters, Quebec, Que.—On October 3, 25 shoe lasters in the employ of the shoe manufacturing firm of Wm. Marsh & Company, Limited, Quebec, Que., ceased work demanding increased wages and also protesting against the employment of non-union workmen in the factory. A

settlement in the nature of a compromise was reached through the efforts of a provincial Conciliation Board, the employees returning to work on October 11.

Freight handlers, Niagara Falls, Ont.—On October 2, 22 freight handlers in the employ of the Grand Trunk Railway

at Niagara Falls, Ont., ceased work owing to the refusal of the company to accede to their demand for an increase in wages from \$2 to \$2.25 per day. The dispute was reported to have terminated on October 25, the company having filled the places of the strikers with men engaged to work on a tonnage basis.

TABLE OF TRADE DISPUTES IN EXISTENCE DURING OCTOBER, 1916.

Occupation	Locality	Alleged Cause or Object	Number affected		Date of Commencement	Date of Termination	Method of Settlement	Result
			Employers	Employees				
DISPUTES BEGINNING PRIOR TO OCTOBER, 1916.								
<i>Building Trades—</i>								
Electrical workers (electricians and wiremen)	Hamilton, Ont. . .	Increased wages.	14	41	June 1.		Unsettled	In favour of employees
Carpenters	Welland Canal. . .	“ “	1	9	August 8.		Unsettled	
Structural iron workers	Hamilton, Ont. . .	Demand for a nine-hour day	1	25	Sept. 5.	October 31.	Negotiations	
<i>Metal—</i>								
Machinists, boilermakers, blacksmiths & car repairers	Hamilton, Ont. . .	Increased wages.	1	5	May 20.		Unsettled	
Machinists and toolmakers	Hamilton, Ont. . .	Demand for a nine-hour day	3	June 12.		Unsettled	
Moulders	Vancouver, B.C. .	Demand for an eight-hour day	6	55	August 31.		Unsettled

Cigar makers. . .	London, Ont. . . .	Increased wages.	1	30	August 29.		Unsettled	

DISPUTES COMMENCING DURING OCTOBER.

<i>Clothing Trades—</i>								
Lasters.....	Quebec, Que....	Increased wages and objection to non-unionists	1	25	October 3..	October 11.	Conciliation	Compromise
<i>General Transport—</i>								
Freight handlers (G.T. Rly.)	Niagara Falls, Ont	Increased wages.....	1	22	October 2..	October 25.	Places of strikers filled ..	In favour of employers

REPORTS OF EMPLOYMENT BUREAUS

DURING September there was a decrease of 8.13 per cent in the demand for workers as compared with August, as shown by reports from 120 employment bureaus—86 commercial, 13 public, and 21 philanthropic. The number of vacancies notified to all offices was 54,376, a daily average of 2114.29, as compared with 2195.45 in August. The number of persons placed was 21,315, a daily average of 827.06, as compared with 1118.32 in the preceding month. The proportion of the total vacancies filled to the total vacancies notified was 39.19 per cent, as compared with 49.32 per cent in August. As to employment for women and girl workers the number of vacancies notified was 9,055—a daily average of 348.27 as compared with 354.25 in August. The number of such workers placed was 3,272, a daily average of 125.84, as compared with 126.53 for the previous month. The proportion of vacancies filled to vacancies notified for men and boys was 39.89 per cent and for women and girls 36.14 per cent, as compared with 52.1 per cent and 34.87 per cent respectively for August.

Of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—Winnipeg and Vancouver only showed decreases in the demand for workers. Montreal and Toronto showed the largest gains. Noticeably larger demands were also recorded in Fort William and Port Arthur and Calgary, while Victoria showed a decrease.

The number of persons who obtained casual employment through the Salvation Army, Young Women's Christian Association and other agencies was 1,182, a daily average of 45.58, as com-

pared with 55.73 in July. The number of casual jobs secured was 3,433, a daily average of 132.08 as compared with 130.88 in the preceding month.

CASUAL EMPLOYMENT SUPPLIED BY VARIOUS AGENCIES DURING THE MONTH ENDED SEPTEMBER 30, 1916.

EMPLOYMENT FOR CIVIC EMPLOYEES IN EIGHT CITIES

AS stated in the last issue of the *Labour Gazette*, the Department has been trying to arrive at some measurement of the volume of employment afforded by the larger city corporations in Canada and to ascertain to what extent civic employment is seasonal. Returns from eight cities for the months of July, August, September and October are summarized in the following table. It is hoped that

the Department will soon be able to publish returns from all the larger cities of the country. The decline in municipal employment which has been indicated monthly since July, continued in October as indicated by the amount of wages paid employees temporarily employed in the first fortnight of the month. The number of such employees on the payroll was, however, practically the same as in September.

EMPLOYMENT (BOTH CONTRACT AND MUNICIPAL WORK) AFFORDED WORKPEOPLE TEMPORARILY EMPLOYED BY EIGHT CITY CORPORATIONS, JULY-OCTOBER, 1916.

MIGRATION AND SETTLEMENT

NEITHER the British Board of Trade nor the Canadian immigration officials have resumed the issuing of monthly statements in regard to immigration, and the only information available deals with the movement of persons, not United States citizens, between that country and Canada. Of persons other than citizens of the United States 1,684 left the United States in September to take up permanent residence in British North America as compared with 1,436 in August. On the other hand 11,896

persons (other than citizens of the United States) departed from British North America in September to take up permanent residence in the United States as compared with 8,728 in August, indicating for British North America an outward balance of 10,213 in September of this class of persons as compared with an outward balance of 7,292 in August.

The usual renewal of the Dominion order-in-council continuing the prohibition of artisans and labourers from entering British Columbia was passed September 19. The order-in-council sets out

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY
BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed an increase in October, as compared with the preceding month, the total value of building permits rising from \$3,422,658 in September to \$3,923,418 in October, an increase of \$500,760, or 14.63 per cent. Grouping the returns by provinces, New Brunswick, Ontario and Alberta showed increases, the value of permits rising 198.02, 48.43 and 115.42 per cent respectively in these provinces. As compared with the corresponding month of last year, building permits in October showed the very considerable increase of \$1,393,307 or 55.06 per cent, the value for September, 1915, being \$2,530,111. As compared with October of last year, there were gains in all provinces except Nova Scotia and Quebec. In Manitoba,

Saskatchewan and Alberta, increases of 115.64, 135.93 and 165.18 per cent respectively were indicated, while Ontario showed a gain of 99.22 per cent. Of the larger cities, Montreal showed an increase of 71.77 per cent, as compared with last month, and a decrease of 28.45 per cent as compared with last October. Winnipeg showed a decrease of 61.26 per cent as compared with September and an increase of 109.33 per cent as compared with October, 1915. Toronto showed a decrease of 22.88 per cent as compared with the previous month and an increase of 19.91 per cent over last October, while Vancouver showed a slight decrease as compared with September and an increase as compared with October, 1915. Port Arthur showed the remarkable gains of 822.09 and 26,876. per cent over September and last October respectively.

UNEMPLOYMENT IN TRADE UNIONS ON SEPTEMBER 30, 1916

THE present quarterly article on unemployment among the members of local trade unions deals with unemployment as at September 30, 1916. The article is based on returns received from 470 unions with a total membership of 110,924, or about 74.25 per cent of the total union membership of the country. The report for June 30 included returns from 1,103 unions with 100,621 members or slightly over 70 per cent of the total trade union membership. The number of members unemployed on September 30 was 1,627, or 1.47 per cent as compared with 2,153 members and a percentage of 2.1 for June 30 and 4,584 members and a percentage of 8.7 for December 31, 1915. Members unemployed on account of trade disputes or disability were not included. As compared with June 30 a decline in unemployment among members of trade unions is indicated in all the provinces except Quebec and Prince Edward Island, where increases are reported. Taking the returns by provinces the percentages of unemployment are as follows:

Province.	Sept. 30, 1916	June 30, 1916	Dec. 31, 1915
Nova Scotia.....	0.	.10	.18
Prince Edward Island.....	5.53	4.6	3.2
New Brunswick.....	.09	.8	.7
Quebec.....	2.43	1.8	9.9
Ontario.....	.72	1.7	8.1
Manitoba.....	.83	1.2	3.2
Saskatchewan.....	2.19	2.6	7.0
Alberta.....	.92	3.03	4.3
British Columbia.....	3.37	5.3	14.3

The percentages for the four largest cities were: Montreal 5.0, Toronto .63, Winnipeg .58, Vancouver 4.56, as compared with 2.6, 1.8, 1.9 and 8.4 respectively for June 30, and 10.6, 10.6, 2.6 and 18.0 respectively for December 31, 1915.

The table which follows gives the percentages of unemployment in the different occupations. A decline in unemployment as compared with June 30 is indicated in nearly every instance. Activity in the manufacturing and mechanical industries has been well sustained, and in the sub-group, metals, machinery and conveyances, the abnormal activity was intensified. Food, tobacco and liquors shows a marked decrease in unemployment as compared with June 30, but in printing, publishing and paper goods there is a slight increase in unemployment. The heavy volume of employment in transportation has been maintained, activity in mining increased, and there was a noteworthy improvement in building and construction.

Occupation.	Sept. 30, 1916	June 30, 1916	Dec. 31, 1915

PRICES, RETAIL AND WHOLESALE, IN CANADA, OCTOBER, 1916,
AND IN OTHER COUNTRIES

PRICES advanced steeply in dairy products and in flour, bread and all grains, as a result of the unfavourable crop season. Vegetables were also higher, except potatoes, which were somewhat lower where the crop was being marketed. Canned vegetables rose to very high levels following short packs for 1916 as well as 1915. In meats some lines were lower but others advanced. Woollens, cottons, jutes and some metals and metal products were also higher.

In retail prices the average cost of a budget of some 30 staple foods in 60 cities throughout the Dominion rose to \$9.30 for October as compared with \$8.97 for September and \$7.82 for October, 1915, and \$7.99 for October, 1914. The chief increases for the month were in butter, eggs, cheese, bread and flour, while potatoes were appreciably lower. Slight advances also occurred in some meats, but milk advanced in several cities.

In wholesale prices the Department's index number stood at 187.2 for October as compared with 180.7 for September, 152.4 for October, 1915, 138.7 for October, 1914, and 134.6 for October, 1913. The chief increases for the month were in Dairy Products, but Grains and Fodder and Breadstuffs also advanced considerably. Fruits and Vegetables also averaged considerably higher, and advances occurred in Textiles, Metals and Implements, Fuel, Building Materials, House Furnishings and in the Miscellaneous group. In Animals and Meats, decreases offset the increases, and fresh fish were lower in some lines.

More detailed information as to the prices movement may be seen in the accompanying tables. The table of retail prices shows the prices of some 30 foods at the middle of the month in 60 localities of Canada, having a population of

10,000 or over. The quotations are obtained by the correspondents of the *Labour Gazette* from dealers doing a considerable trade with workingmen. All prices are for delivered goods. The rates for rent are for houses in districts inhabited by workingmen.

Retail Prices

Meats showed numerous declines, especially in some western cities, as farmers were marketing stock before the winter set in. Some lines, however, were still upward in some localities. Mutton advanced in several cities in Ontario and the Maritime Provinces, while pork, bacon and lard were generally higher. Canned salmon rose in some cities as the pack had been short.

In dairy products prices reached very high levels, milk being above 10 cents per quart in many more cities than before and butter rising above 40 cents per lb. Cheese was also rising in many cities.

Bread advanced in many cities throughout the Dominion and was expected to rise in many others as wheat and flour were continuing to advance. Rolled oats was also upward in sympathy with the general advance in the grain markets.

Canned tomatoes, peas and corn were rising owing to repeated and steep advances in wholesale prices. The pack of 1916 was put on the market at very high levels owing to the short pack and the short stocks from the 1915 pack. Unfavourable weather had reduced the pack seriously, especially in tomatoes. Beans and prunes were also upward in several cities.

In sugar there were many decreases following declines in the wholesale prices, but the latter having risen somewhat again advances occurred in some cities.

COST PER WEEK OF A FAMILY BUDGET OF STAPLE FOODS, FUEL AND LIGHTING, AND RENT IN
TERMS OF THE AVERAGE PRICES IN SOME SIXTY CITIES IN CANADA.

*Coal, wood and coal oil. No allowance is made for the varying extent to which these are used in the different localities and provinces.

Potatoes declined in most of the cities as supplies from the new crop were fairly liberal in many centres, but prices were still very high as compared with recent years, even when crops were short. No yield whatever was reported on many farms in Ontario as a result of unfavourable weather.

Coal rose steeply in many cities, especially in Eastern Canada, but advances also occurred in western cities. Higher prices at the mines in the United States, short stocks, and difficulty in securing transportation were the chief causes reported, but improvement was expected when the freight congestion on the railways was relieved. Wood was also higher in some cities.

Rents were upward at Orillia, Ont., as houses were very scarce.

Wholesale Prices

Grains and fodder.—Manitoba Northern wheat, No. 1, rose from \$1.65 to \$1.87 per bushel at Fort William and market conditions indicated possible further advances to as high as \$2.00. Short crops in all parts of the world except Russia appeared as the main factor, in conjunction with the fear of shortage and the speculation which result from such conditions. Ontario winter wheat rose from \$1.42 at the end of September to \$1.78. Other grains were upward in sympathy with wheat and the shortage in nearly all crops. Western and Ontario barley rose from 90c per bushel to \$1.12. Western oats rose from 53c to 60c per bushel at Winnipeg and Ontario oats to 64c at Toronto. American corn was up from 96c to \$1.17 per bushel. Flaxseed advanced from \$1.97 to \$2.49 per bushel. Peas rose to \$2.40 per bushel and rye to \$1.27. Hay was steady at Montreal and Toronto, but bran and shorts rose \$3.00 per ton to \$29.00 and \$32.00 respectively.

Animals and meats.—Cattle were somewhat lower than in September at both Toronto and Winnipeg, best butchers being down to \$8.50 at the former and \$6.85 at the latter. Dressed beef, hindquarters, was down from \$14.00-

15.00' per cwt. to \$11.50-12.50 at Toronto, but forequarters were higher at \$10.00-11.00. Plate beef in 200 lb. barrels rose from \$22.50-23.00 to \$23.00-24.00. Hogs, live, fluctuated from week to week, averaging about \$10.50 per cwt., nearly \$1.00 lower than in September. Dressed hogs declined to \$14.00-15.00, but recovered to \$15.50-16.50. Barrelled pork rose \$1.50 to \$32.00-33.00. Lard advanced from 17¼c to 18½c. Sheep rose from \$6.50-7.50 to \$7.50-8.25, and dressed lamb from \$16.00-18.00 per cwt. to \$17.00-19.50. In poultry, spring chicken rose 2c per lb.

Dairy products.—Butter, creamery finest, at Montreal reached 42½c per lb., a rise of 5c during the month, and similar advances occurred at Toronto. Dairy butter was up from 35c per lb. to 39c. Cheese had risen to 21c at the end of September and reached 22½c in October. In milk, dealers at Toronto and Montreal made contracts at 25c per gallon for the winter months. Scarcity and the high prices of all fodder except hay, scarcity of labour, and the export demand for cheese and butter were reported as the causes. Fresh eggs rose to 52c per dozen at Montreal and to 50c at Toronto. Storage eggs were up to 37c per dozen.

Fish.—Dry cod from the Lunenburg catch was sold at \$7.75 per quintal, a record price as the market was bare and the demand in the West Indies was good. The catch was estimated to be slightly greater than last year. In herring the fall catch was a failure so that supplies were short. At Toronto lake trout was lower at 11c per lb. and whitefish at 13c. Canned salmon was already rising above the opening prices for the 1916 pack as supplies were short.

Fruit and vegetables.—Apples were up to \$4.00-5.00 per barrel for No. 1 and some varieties were higher. The smallest crop in years in Ontario was reported. Grapes continued as low as 20c per basket but rose to 25c in the last week. Some peaches were as low as 50c until the last week when the price reached \$1.00. Pears were down from 50c to 35c for some varieties, but recovered. Plums

*Cheaper grades also on the market (\$7.00) owing to the high price of wood.

f. Natural gas used. g. Lignite. h. Calculated from the price per 100 lbs. i. Including \$1.00 per ton for delivery.

went off the market. Verdelli lemons declined to \$5.00-5.50 per case, but oranges were slightly higher at \$4.00-6.00. Evaporated apples were firmer at 8½-10c per lb. Currants rose to 19-19½c per lb. Prunes were also higher at 10c per lb. for medium grades. Raisins were somewhat lower at 7¾-8½c as the new crop was coming on the market. Potatoes were down to \$1.35, but rose to \$1.80-1.85 per bag at Montreal. At Toronto potatoes from Ontario were down to \$1.50-1.65. Beans were still high and it was reported that supplies were being purchased in Manchuria. The crops in Ontario and Michigan were reported to be fair. Onions rose to \$1.75 per bag. Turnips were up to \$1.25-1.35 per bag at Toronto, the crop being very short. Tomatoes rose to 50c and 60c per basket, but declined. Canned corn advanced to \$1.30 per dozen and canned peas to \$1.25. Canned tomatoes rose to \$1.80-1.90 and prices for the new pack were reported to be much higher on account of the short pack as a result of unfavourable weather.

Miscellaneous groceries.—Flour continued to advance and Manitoba first patents reached \$9.40 per barrel at Montreal, a point 70c higher than in September, and was still rising with the wheat market. Winter wheat flour was also up 60c and 80c per barrel. Bread advanced in many cities at Toronto from 4c per lb. wholesale to 4½c. Soda biscuits also advanced 1 cent per lb. Oatmeal rose to \$3.85 per cwt. Santos coffee was 2c higher at 25-26c. Sugar recovered from the declines in the summer and reached \$7.71 per cwt. at Toronto in barrels, 60c lower than the high level in the spring. Molasses continued high at 62c per gallon. Glucose was slightly easier. Honey was up 1c per lb. at 12-12½c, and the demand was reported good. Maple sugar advanced again, reaching 13-14c. Pepper rose 1c per lb. to 29c. Cream of tartar was higher at 51c per lb.

Textiles.—Woollen yarn was 3c per lb. higher and beaver cloth 20c per yard

higher. Raw cotton rose to 18.15c per lb., an advance of over 6c per lb. since March. The United States crop was estimated to be short. Coloured cottons and prints averaged higher. Raw silk was slightly higher, both for Japanese and Italian varieties. Jute and hessians were again upward, the demand being good. Flax tow was 1c higher at 11½-13c per lb.

Hides, leather, boots and shoes.—Markets continued firm with scarcity of goods and prospects for further advances.

Metals and implements.—Pig iron was higher by \$1.50 per ton and many lines of iron goods were higher. Iron and steel bar rose to \$3.40 per 100 lbs. Steel billets rose to \$45.00-47.50 per ton. Wrought iron scrap rose 50c per ton. Aluminium, brass, copper, lead, quicksilver, spelter, solder and tin were higher. Crowbars were higher, but grindstones declined.

Fuel and lighting.—Connellsville coke was nearly \$1.00 per ton higher at the ovens for prompt delivery but contracts could be made at lower figures. Anthracite coal was steady at the September price.

Building materials.—New Brunswick spruce deals rose to \$21.00 per M, the same price as last January. In Ontario several lines of soft woods were higher. Dealers reported a very good demand during December. British Columbia fir advanced \$1.00 per M. at Winnipeg. Black iron pipe, lead pipe, cut nails, sash weights, sash cord, copper wire, wire cloth and barb wire were higher. White lead, linseed oil, turpentine and shellac advanced.

House furnishings.—Iron beds, brooms and sad irons were higher on account of higher prices for raw materials.

Drugs and chemicals.—No changes were reported.

Miscellaneous.—English hops rose 6c and 9c per lb., the crop having been damaged and good quality being scarce. Malt rose to \$1.30 per bushel, in sym-

* July of each year.

b. Foods

c. 1901=1000.

* Quarter beginning that month.

pathy with barley. Pulp and paper continued to rise and newsprint was up to 3c per lb. and higher. Ground wood pulp reached \$32.00 per ton and sulphite \$170.00, nearly three times normal prices. The demand for paper continued good. Raw rubber rose from 62c to 66c per lb.

Prices in Other Countries

In the United Kingdom retail prices of food were again slightly higher than in the previous month, fish, flour, bread, bacon, milk, butter and cheese being higher. Tea and margarine were about

the same price, while sugar was slightly dearer and meat slightly cheaper. Potatoes fluctuated in various localities but averaged the same. In wholesale prices the average level was little changed, barley, potatoes, butter, pork, tea, copper, tin, flax, wool, hides, seeds, olive oil and timber being higher, but wheat, beef, mutton, bacon, coal, lead, leather, tallow, nitrate of soda were lower.

In the United States, breadstuffs, miscellaneous foods, clothing, metals and miscellaneous commodities were higher, while meats and dairy and garden products were lower.

FAIR WAGES CONTRACTS, OCTOBER, 1916

DURING October the Department of

Labour received for insertion in the *Labour Gazette* information relative to seven fair wage contracts, six of which were awarded by the Department of Public Works and one by the Department of Railways and Canals. Two of the contracts awarded by the Department of Public Works contained fair wage schedules and in the other five a fair wage clause was inserted providing for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the Regulations for the Suppression of the Sweating System.

Fair Wages Schedules

DEPARTMENT OF PUBLIC WORKS.

Drill hall, Calgary, Alta. Name of contractor, A. G. Creelman & Company, Shaughnessy Heights, Vancouver, B.C. Date of contract, September 29, 1916. Amount, \$282,051.45 and \$9.75 for additional concrete, etc.

Fair Wages Clauses

DEPARTMENT OF PUBLIC WORKS.

Metallic fittings, P. S. & C. Division, Department of Militia and Defence, Ottawa, Ont. Name of contractor, Office Specialty Manufacturing Company, Limited, Ottawa, Ont. Date of contract, September 29, 1916. Amount, \$12,997.

58. The contractor shall comply with and be subject to all terms, stipulations and conditions contained in the following fair wages clauses:

(1) No labourers shall be employed on or about the works hereby contracted for who are not citizens or residents of Canada, but the Minister may, in writing, waive the provisions of this clause, either in general or to a limited extent, should he deem it expedient to do so.

(2) The minimum rate of wages to be paid by the contractor for the labour of any employee, or the minimum rate of hire for any team, employed in or about the works, shall be at the rate specified in the Fair Wages Schedule hereto annexed for the same or similar class of labour as that in which such employee is engaged, or for the hire of teams respectively.

(3) The number of working hours for employees in the day or week shall be in accordance with such statute or statutes of Canada as may now or hereafter be passed, and if there is no such statute then in accordance with the custom of the same or similar trades or classes of labour in the district where the work is being carried on—to be determined, in case of dispute, by the Minister; and no employee shall be required to work for longer hours except for the protection of life or property, or in case of other emer-

gencies, when the necessity therefor is confirmed by the engineer.

(4) In case any labour is required in or about the works for which, in the opinion of the engineer, no rate is fixed in the said schedule, the engineer, or other officer authorized by him, may fix the minimum rate of wages payable in respect thereof, which shall not be less than the rate of wages generally accepted as current for competent workmen in the same or similar trades or classes of labour in the district where the work is being carried on.

(5) The said contractor further agrees and binds himself to pay to the workmen engaged in the said work such rates of wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district where the work is to be carried on, and if there are no current rates of wages in the district, then fair and reasonable rates; in the event of a dispute arising as to what is the current or a fair and reasonable rate of wages for any of the classes of labour required, it shall be determined by the Minister of Labour, whose decision shall be final.

(6) The contractor shall not be entitled to any payments under this contract in respect of work and labour performed until he has filed in the office of the engineer a statement, in duplicate, showing the rate of wages by him paid for the various classes of labour, and the hire of teams, employed in or about the work, and, if any amounts should then be due and unpaid in respect of such wages or hire, showing in detail the names of the unpaid employees, the class of employment, rate of wages, and the amounts due to each; nor shall the contractor be entitled to any payments under this contract in respect of materials or other things supplied, for use in or upon the works, until he has filed in the office of the engineer a statement, in duplicate, showing the prices and quantities of all such materials or things, and if any amounts should then be due and unpaid in respect thereof, showing in detail the names of the unpaid vendors, the quantities, prices, and the amounts due to each, such statements shall be attested, in duplicate, by the statutory declaration of the contractor, or of such person on behalf of the contractor as the Minister may approve.

(7) The Minister, or the engineer, may, as a further condition to such payment, at any time require the contractor to furnish such further or other detailed information as may be necessary to establish to their satisfaction the compliance by the contractor with the conditions of this contract.

(8) Should the contractor fail to adhere in every particular to the Fair Wages Schedule hereto annexed, or permit any wages or amounts payable for the hire of teams to become or remain in arrears or unpaid or fail to pay any accounts for material or other things supplied for the works, the engineer may give notice in writing requiring the contractor to adhere to such schedule, or to pay such wages, or for such hire of teams, or for such materials or other things, as the case may be. Should the contractor fail for the period of 48 hours after the giving of such notice to comply with the terms thereof, the Minister may make such payments as shall be sufficient to effect an adherence with such schedule, or other settlement or discharge of such arrears, or indebtedness for hire or materials or things supplied, and the contractor, in the event of any such payments being made after notice and default, as aforesaid, shall be stopped from setting up, as against His Majesty the

accuracy of any amounts so paid, or the existence or extent of any such indebtedness, and all amounts so paid shall be repaid at once by the contractor, or may be deducted from any amounts then or thereafter due by His Majesty to the contractor.

(9) The Minister or the engineer may, in their discretion, at any time require proof, with such formalities or to such extent as they may deem requisite, of any claim under the said Fair Wages Schedule, or for wages or hire of teams in arrears or of accounts for materials, or other things unpaid.

(10) The contractor shall post and keep posted in a conspicuous place on the works under construction the said Fair Wages Schedule for the protection of the workmen employed, and also keep a proper record of all payments made to workmen in his employ, and the books and documents containing such record shall be open for inspection by the fair wages officers of His Majesty at any time that it may seem expedient to the Minister of Labour of Canada to have the same inspected.

Reconstruction of Parliament Buildings, Ottawa, Ont. Name of contractor, P. Lyall & Sons Construction Company, Limited. Date of contract, September 29, 1916. Amount: Eight per cent up to \$4,000,000 and seven per cent for further \$1,000,000 (no commission above said sum of \$5,000,000).

35.—The contractor shall comply with and be subject to all terms, stipulations and conditions contained in the following fair wages clauses:

(a) No labourers shall be employed on or about the works hereby contracted for who are not citizens or residents of Canada, but the Minister may, in writing, waive the provisions of this clause, either in general or to a limited extent, should he deem it expedient to do so;

(b) The minimum rate of wages to be paid by the contractor for the labour of any employee, or the minimum rate of hire for any team, employed in or about the works, shall be at the rate specified in the Fair Wages Schedule to be furnished by the Department of Labour for the same or similar class of labour as that in which such employee is engaged, or for the hire of teams respectively.

(c) The number of working hours for employees in the day or week shall be in accordance with such statute or statutes of Canada as may now or hereafter be passed, and, if there is no such statute, then in accordance with the custom of the same or similar trades or classes of labour in the district where the work is being carried on—to be determined in case of dispute, by the Minister of Labour; and no employee shall be required to work for longer hours except for the protection of life or property, or in case of other emergencies, when the necessity therefor is confirmed by the architects.

(d) In case any labour is required in or about the works for which, in the opinion of the architects, no rate is fixed in the said schedule, the architects, or other officer authorized by them, may fix the minimum rate of wages payable in respect thereof, which shall not be less than the rate of wages generally accepted as current for competent workmen in the same or similar trades or classes of labour in the district where the work is being carried on.

The fair wage clauses given below were inserted in the contracts immediately following.

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair or reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams; and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other persons employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works, and proof thereof is satisfactory, the Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the contractor.

One freight elevator, enclosure pit, foundations, etc., and alterations to building in Postal Station "A," Montreal, Que. Name of contractor, The Turnbull Elevator Manufacturing Company, Toronto, Ont. Date of contract, October 17, 1916. Amount, \$5,993.

RECENT INDUSTRIAL AGREEMENTS

Edmonton Radial Railway and Employees

IN the October number of the *Labour Gazette* reference was made to difficulties between the Edmonton Radial Railway, operated by the city, and Local Division No. 569 of the Amalgamated Association of Street and Electric Railway Employees of America. Application was made by the employees for a Board under the Industrial Disputes Investigation Act, the application setting forth that the employees had been unsuccessful in attempts to open negotiations with the city for renewal of an agreement which had been in existence for the past four years, the chief question involved being recognition of the union together with some other minor matters. Through negotiations between the parties brought about by Mr. F. E. Harrison, of the Department, a settlement was reached without the necessity of appointing a Board and the parties signed an agreement by which the union was recognized and other matters adjusted. The agreement which is to be effective

for one year from August 31, 1916, is as follows:

A (1) *Conductors and motormen*.—First six months, per hour, 26 cents; second six months, per hour, 28.5 cents; commencing second year, per hour, 32 cents; commencing third year and thereafter, 34 cents; operator of one man car to be paid, per hour, 40 cents.

B (1) *Car barns department*.—The following trades shall be paid the recognized rate of wages, as adopted by the City of Edmonton, under the Fair Wage Clause, as amended on March 2, 1915: electricians, painters, carpenters, machinists and fitters, blacksmiths.

B (2) *Barns men and car repairers*.—First six months, per hour, 26 cents; second six months, per hour, 28.5 cents; commencing second year, per hour, 32 cents; commencing third year and thereafter, 34 cents; experienced car repairers, per hour, 36 cents.

B (3) *Car cleaners*.—Head car cleaners, per hour, 32 cents; other car cleaners, per hour, 28.5 cents.

B (4) *Track greasers*.—Per month, \$71.25.

B (5) *Trackmen*.—Per hour, for 9 hour day, 28.5 cents.

All employees of the classes mentioned in part B (1) and B (2) of this section shall work from 7 a.m. until 5 p.m. on week days and from 7 a.m. to 12.00 noon Saturdays, and night men from 10 p.m. to 7 a.m., and shall be paid time and one-half on the following holidays: New Year's, Good Friday, 24th May, Dominion Day, Civic Holiday, Labour Day, Christmas Day and Thanksgiving Day, but it is agreed that a sufficient number of employees shall remain on duty at all times in the various departments and work to enable the superintendent to handle any emergency

conditions that may arise. Emergency men will be paid time and one-half on Sundays, provided the emergency demands their full seven days per week, which emergency condition shall be determined by the superintendent.

Section (2). *Working Hours.*—That all motormen and conductors operating cars shall be paid on a basis of a nine hour day, and any motorman or conductor who shall work over nine hours shall be paid straight platform time, but all runs shall be as near nine hours as possible. Time will be computed from time of reporting at car barns, and it is agreed that sufficient time will be allowed by the superintendent from time of reporting at car barns to time of taking car.

And it is further agreed that all motormen and conductors shall be allowed seven days' holidays in each year with pay, but no employee shall become entitled to holidays until he has been in said service for one year. Spare men shall be paid one hour's time for each report if not allotted a run, but men reporting up to and including 6 a.m. shall be paid one and one-half hours unless allotted a run of equivalent value.

Section (3). *Seniority.*—Each motorman and conductor shall be entitled to hold his run in accordance with his age in the continuous service in the employ of the department, and preference of runs shall always belong to the oldest men in the continuous service, except when in the opinion of the superintendent such men are incompetent to hold such runs. In accordance with the policy of the city promotions will, as far as possible, be made from the rank and file of the men, and, having due regard to the needs of the service, be governed by seniority and proficiency, but in all matters of promotion and appointments the superintendent reserves the right of absolute freedom of selection.

Section (4). *Picking of runs.*—When a sign-up occurs the oldest man will sign up first, the second oldest next, and so on until sign-up is completed; the board to be posted up not less than two days before sign-up takes place. Any day run made vacant by sickness, leave of absence, discharge or resignation for over a period of seven days, shall be held by the next man entitled to a day run and his run to be filled by senior spare man; and in case of vacancy occurring amongst the night runs, the vacancy will be filled from the spare list on the same basis as above mentioned.

Section (5). *Uniforms.*—Motormen and conductors who have been in the continuous service for six calendar months shall be furnished with a regulation uniform, the cost of which will be equally divided between the city and the motormen and conductors; and any man leaving the service of the city, from any cause, within six months after receiving the uniform will be charged that portion of the cost of the

said uniform which has been advanced by the said city. The city shall furnish all subsequent uniforms yearly, and will also furnish caps, badges and buttons. All men who have been previously supplied with uniforms will receive the next and subsequent uniforms free.

Section 5 (a). *Overcoats.*—That the city will furnish overcoats at least every two years on the same basis as specified under uniforms.

Section (6). *Tickets and change.*—That the conductors on regular runs will be furnished with tickets and change to the amount of \$30.00.

Conductors who are not operating on regular runs will be furnished with tickets and change sufficient to carry them over their operating time or over whatever runs they may operate; the value of said tickets and change shall be in proportion to the run and length of said runs. In each case the conductors will be required to sign the departmental forms of agreement for the return of the equivalent amount of tickets and cash advanced when called upon to do so. Inspectors shall carry tickets and change at all times for conductors who may run short.

Section (7). *Training.*—That preference be given to the citizens of Edmonton, who are British subjects, for positions in the department, who must be able to read and write English and be approved by the superintendent, the training period being left to the discretion of the superintendent.

Section (8). *Transportation.*—That motormen, conductors and barn men be allowed to ride free at all times on the production of their badge to the conductor.

Section (9). *Age of employees.*—That no man under 21 years of age be employed as motorman.

Section (10). *Regular men on extra work.*—No regular man shall be required to do extra work after finishing his day's run if spare men are available, and the superintendent shall do his best at all times to provide a sufficient extra list so that regular men will not be required to do extra work on their offdays.

Section (11). *Maximum hours of duty.*—That no motorman or conductor shall work more than seven and one-half consecutive hours without relief, unless motormen or conductors are willing to do so in cases of emergency, or unless when finishing a run.

Section (12). *Operation of cars.*—It is agreed that in the case of the line car it will not be necessary to take out a conductor in addition to the line crew, except in cases of emergency.

Section (13). *Laying off workmen.*—When it is necessary to curtail expenses by laying off workmen in any branch of the trades, the last man employed will be laid off first, and so on. When employing a man for service in any of the respective trades, the man last laid off in that particular branch of trade, if available, will be given preference of employment,

and a man shall not be considered a new man in re-starting. Where men in the car barns have been advanced to any positions, and in case such men are affected through a reduction of force, they shall be reduced to the position and rank from which last advanced in preference to being laid off. Seniority list to be available to the association.

Section (14). *Disputes*.—Any employee who has been suspended, superseded or discharged shall have the right to have his case investigated by a committee of employees, which committee shall have the right to appeal to the superintendent on behalf of the employee when evidence for both sides will be submitted. Such investigation must be held within three days (Sundays and holidays not included) of the date upon which the employee was suspended, superseded or dismissed, and if through such investigation the superintendent decides the employee has been unjustly dealt with he shall be reinstated in his proper position and shall be paid for lost time. In the event of the decision given by the superintendent not being satisfactory, the committee shall have the right to further appeal to the Commissioners of the City of Edmonton.

And it is further agreed that the superintendent will call in men in their spare time for minor breaches of rules.

Section (15). *Lavatories*.—That lavatories be provided at all terminals where no such accommodation exists.

Section (16). *Seats*.—All seats for motormen in future shall be of four-legged type. Conductors shall be supplied with seats as approved of by the association and the superintendent.

Section (17). *Lost articles*.—All articles left on cars shall be turned into the office and properly tagged, where they shall be kept in the office for 60 days from the last day of the month in which they were handed in, and then turned over to the city commissioners to be disposed of. Any employee guilty of having found any article in his car and not having turned it in with his daily report shall be dismissed from the service.

Section (18). *Recognition of association*.—That the city recognizes the employees' association and will not discriminate against any employee because of connection with same. The association, on the other hand, will not in any way interfere with or limit the city's right to employ, discharge or discipline any employee except for membership of the association. And it is further agreed that all the rules, regulations and working conditions of this agreement shall apply

to all employees of the street railway department irrespective of whether or not they are members of the association.

Section (19). *Trading positions*.—Any motorman or conductor wishing to trade positions shall first get the approval of the association and then get permission from the superintendent, who may allow such a trade.

Section (20). *Absence of members*.—Any member of the association who may be elected to an office or assigned to any duties by the association affecting this agreement, which shall require his or their temporary leave of absence from runs, shall be granted leave of absence without pay in so far as the regular operation of the service will permit and provided a day's notice is given beforehand to the superintendent, and upon their return they shall be entitled to their respective runs or places upon the running board, leave of absence not to exceed one year.

Section (21). *Conduct of members*.—It is further understood and agreed between the city and the association that in consideration of the foregoing, said employees will, to the best of their ability, conduct themselves as gentlemen, be courteous to the passengers and travelling public, and work at all times to the best interest of the said department; that they will keep a strict compliance with all the rules and regulations of the city affecting the street railway department, and cheerfully obey all orders of the same, when not in conflict with the rules and scale of wages entered into through this agreement; they further agree at all times to protect the property of the city from injury at their own hands and at the hands of others, when in their power to do so; that in the handling of equipment of all kinds, to use their best judgment, and to use every effort to prevent injury to the property and persons of the travelling public.

Section (22). *Changing agreement*.—This agreement and provisions thereof shall continue in force and be binding upon the respective parties hereto for one year from August 31, 1916, and from year to year thereafter, unless either of the parties hereto desiring to cancel this agreement in whole or in part or to change any section or sections thereof shall notify the other party in writing of the cancellation or desired change thirty (30) days prior to the end of any year, which is the thirty-first day of August; upon such notice being given the agreement shall on the following thirty-first day of August be at an end or be opened for the purpose of considering the desired changes

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN CANADA DURING THE THIRD QUARTER OF 1916

THE accompanying statistical table contains detailed information relating to changes in wages and hours of labour reported to the Department of Labour during the third quarter of 1916. In this period there were reported 31 changes affecting about 19,450 employees. One change, affecting 325 men, involved a reduction in hours. Another change affecting 500 men involved both higher wages and shorter hours. In all the other cases there were advances in wages. The number of employees affected was about 650 more than in the previous quarter, and about 18,300 more than in the third quarter of 1915.

The following table shows the approximate number of employees affected by changes which took place in the different trades and industries:

Trade or Industry.	No of Changes	No. of employees affected.
Mining.....	5	8,222
Building trades.....	4	735
Metal trades.....	3	685
Printing trades.....	1	90
Clothing trades.....	1	25
Food and tobacco preparation.....	1	70
Railway service.....	5	8,320
Street railway employees.....	2	750
Civic employees.....	6	421
Unskilled labour.....	3	125
Total.....	31	19,443

Changes by Industries and Trades

The following is a statement of changes in wages and hours according to the industry affected:

Mining.—On August 7 about 5,000 coal miners in the Crow's Nest Pass district, British Columbia, and Southern Alberta were granted a war bonus ranging from 5 to 12½ per cent, under an agreement reached through the

friendly mediation of the Department of Labour.¹

On July 1, 1,520 smelter men at Trail, B.C., received an increase in wages of 15 cents per day, which was in addition to an increase of 25 cents per day granted on May 1, and would be in force for three months, and would thereafter vary according to the price of lead and copper.²

On July 16 the Consolidated Mining and Smelting Company and Le Roi No. 2, Limited, of Rossland, B.C., granted a bonus of from 25 to 50 cents per day for underground wages and from 15 to 25 cents for surface wages, according to the price of copper, to date from January 1, 1916. This bonus was granted through the friendly mediation of the Department of Labour.³

On August 24 the wages of 900 asbestos miners at Thetford Mines, Que., were increased from \$2.00 to \$2.25 per day through the mediation of the Department of Labour.

On July 27 about 75 labourers in a coal mine at Corbin, B.C., received an increase in wages from \$2.47 to \$2.60 per day.

Building trades.—The wages of 35 carpenters at St. Catharines, Ont., were increased from 43 to 50 cents per hour as the result of a strike which terminated on August 18.

On July 1 the wages of about 500 plumbers at Toronto, Ont., were advanced from 35 cents per hour to 47½ cents for the first year, and 50 cents for the second year. Concrete workers in Toronto also received a general advance during July from 30 to 35 cents per hour.

¹For terms of settlement and rates of wages see *Labour Gazette*, September, 1916, pages 1550 to 1557.

²See *Labour Gazette*, August, 1916, pages 1472 and 1473.

During July about 200 builders' labourers at Windsor, Ont., were granted an increase in wages from 25 to 30 cents per hour.

Metal trades.—On September 9 an agreement was reached between the British Columbia Telephone Company and the Electrical Workers' Union, by which the wages of about 100 were increased by 25 cents per day, restoring the rate prevailing prior to the cut a year ago. The wages of groundmen were advanced from \$2.56 to \$3.00 per day, splicers from \$4.75 to \$5.00 per day, and others from \$4.00 to \$4.25.

On August 24 about 260 men employed in iron shipbuilding at Levis, Que., received an advance of about 15 per cent in wages following a strike. The wages per week of the different classes were as follows:

	Before change	After change.
Rivettters.....	\$18.00	\$20.70
Holders-on.....	15.00	17.25
Machinists.....	16.50	17.87
Carpenters.....	16.50	17.87
Labourers.....	12.00	13.80

On August 23 about 325 employees in the iron shipbuilding industry at Esquimalt, B.C., were granted a reduction in working hours from 54 to 48 per week. The weekly wages of the boilermakers and iron shipbuilders were increased slightly from \$23.75 to \$24.00, affecting about 137 men. The wages of the other employees were unchanged.

Printing trades.—On July 1 the minimum scale of wages of 90 printing compositors and machine operators at London, Ont., was advanced \$1.00 per week.

Clothing trades.—On August 26 an increase in piece-work prices of 15 per cent was granted to 25 pant makers in a clothing factory at Hamilton, Ont., the earnings of the operators being from \$15 to \$22 per week.

Food and tobacco preparation.—On July 17 agreements were signed by six bakeries employing 70 men at Winnipeg, Man., by which the weekly wages of bakers were fixed at \$18 for first hands, \$15 for second hands, and \$12 for third hands, and the wages of drivers were fixed at \$16 per week of six days and \$14 per week of five days. Prior to this date no established rates prevailed in these bakeries, but the new rates involve an increase.

Railway service.—During the month of October the Grand Trunk Railway Company put into effect a new schedule of wages for locomotive engineers and firemen to date from September 1, by which about 3,000 employees received an increase of about 15 per cent. The following statement shows the new and old rates according to the class of locomotive, based on a mileage of 100 miles.

Way freight.....	5.00	4.67

FIREMEN—

Passenger.....	3.00	2.70
Freight (through) mixed and snow plow...	3.30	3.03
Way freight.....	3.45	3.10

The wages of about 5,000 other employees of the Grand Trunk Railway, including conductors, brakemen, baggage-men and yardmen, were also increased in September by from 5 to 40 cents per day, and the working hours of many of the men were reduced.

A new schedule of wages of maintenance of way employees was announced by the Edmonton, Dunvegan and British Columbia Railway Company, dating from July 1. This was the outcome of a settlement reached through the friendly mediation of the Department of Labour after the employees had applied for a Board of Conciliation and Investigation.¹

On August 10 the Canadian Pacific Railway Company granted an increase in wages to railway shop hands amounting to an advance of 8 per cent in the shops east of Fort William, and an advance of from 2 to 3 cents per hour in the western shops.

On July 8 the wages of 20 freight handlers at Stratford, Ont., were advanced from \$1.85 to \$2.00 per day after a strike.

Electric railway employees.—On July 1 the wages of about 500 conductors and motormen at Ottawa, Ont., were advanced by 3 cents an hour, the new scale being 26 cents per hour for first year, 27 cents per hour for second year, 30 cents per hour for third year and upwards, with 4 cents per hour extra for Sunday work. The hours of work were also reduced from 10 to 9. These changes were effected through a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act.²

On August 31 an agreement went into effect between the Edmonton Radial

Railway and its employees, by which 250 men received an increase in wages.³

Civic employees.—On July 1 an increase was made in the pay of the civic firemen at London, Ont. The chief received an advance of \$100 per year, the assistant chief \$50 per year, the captains and lieutenants 5 cents per day, the first, second and third year men 25 cents per day, and the fourth year men 15 cents per day.

On July 1 the members of the civic fire department of Vancouver, B.C., to the number of 162, were granted increases in wages ranging from \$7.50 to \$19 per month.

On August 9 the wages of 21 civic firemen at South Vancouver, B.C., were increased by \$5 per month for first year men and \$10 per month for second year men.

On July 1 the police constables at Hamilton, Ont., received an advance in pay of \$60 per year, from a scale of \$1,000, \$900 and \$800, to one of \$1,060, \$960 and \$860 for first, second and third class men.

On July 1, 76 men employed on the parks and boulevards at Victoria, B.C., received an advance in wages from \$2.25 to \$2.50 per day.

On July 11 the wages of 50 street sweepers at Calgary, Alta., were increased from 28 to 30 cents per hour.

Unskilled labour.—On August 2 the wages of 55 labourers in a steel foundry at Hamilton, Ont., were advanced by 10 per cent after a strike.

On August 28, 70 dock labourers at Vancouver, B.C., received an increase in wages from 25 to 35 cents per hour for a day of nine hours, with 35 cents per hour overtime.

During July a general increase in wages of labourers and coal and ice handlers from 25 to 30 cents per hour was reported to have taken place at Toronto, Ont.

CHANGES IN WAGES AND HOURS DURING JULY, AUGUST AND SEPTEMBER, 1916.

Class of workpeople affected	Locality.	Approximate number of work-people affected	Date from which change took effect.	Particulars of change.
MINING—				
Coal miners.....	Crow's Nest Pass district, B.C., and Southern Alberta.	5,000	Aug. 7	War bonus ranging from 5 to 12½ per cent granted, to end March 31, 1917, with present agreement.
Coal mine laborers.....	Corbin, B.C.	75	July 27	Increase from \$2.47 to \$2.60 per 10-hour day
Smeltermen.....	Trail, B.C.	1,520	July 1	Increase of 15 cents per day granted.
Miners, gold and copper.....	Rossland, B.C.	727	Jan. 1	Wages advanced according to price of copper, dating back to January 1st.
Asbestos miners.....	Thetford Mines, Que.	900	Aug. 24	Wages advanced from \$2.00 to \$2.25 per day through mediation of Department of Labour.
BUILDING TRADES—				
Plumbers.....	Toronto, Ont.....	500	July 1	Wages advanced from 35 cents per hour to 47½ cents for first year and 50 cents for second year.
Labourers.....	Windsor, Ont.....	200	July ..	Wages advanced from 25 to 30 cents per hour.
Concrete workers.....	Toronto, Ont.....		July ..	Wages advanced from 30 to 35 cents per hour.
Carpenters.....	St. Catharines, Ont.	35	Aug. 18	Wages advanced from 43 to 50 cents per hour after strike.
METAL TRADES:—				
Electrical workers.....	British Columbia ..	100	Sept. 9	Wages increased 25 cents per day, restoring rate prevailing before reduction, last year.
Machinists, carpenters rivetters and labourers.....	Lévis, Que.....	260	Aug. 23	Wages increased by 2¼ to 4½ cents per hour, after strike settled through mediation of Department.
Boilermakers, iron shipbuilders, machinists and locksmiths and helpers.	Esquimalt, B.C. ...	325	Aug. 23	Hours reduced from 9 to 8 after strike.
PRINTING TRADES:—				
Compositors and machine operators.	London, Ont.....	90	July 1	Minimum scale advanced \$1.00 per week.
CLOTHING TRADES:—				
Pant makers.....	Hamilton, Ont....	25	Aug. 26	Increase of 15 per cent in piece-work prices, average earnings from \$15 to \$22 per week.
FOOD & TOBACCO PREPARATION—				
Bakers.....	Winnipeg, Man....	70	July 17	Agreement signed by 6 firms granting wages of \$18 per week for 1st hands, \$15 for 2nd hands and \$12 for 3rd hands, no fixed rate before.
Bakers' drivers.....	" "		"	Agreement signed by 6 firms granting \$16 per week of 6 days and \$14 per week of 5 days, no fixed rate before.
RAILWAY EMPLOYEES:—				
Engineers and firemen.....	G.T.R. lines.....	3,000	Sept. 1	Wages advanced about 15 per cent after negotiations.
Conductors, brakemen, baggage men and yardmen.	G.T.R. lines.....	5,000	Sept. ..	Wages increase of from 5 to 40 cents per day, hours of many employees reduced.

CHANGES IN WAGES AND HOURS DURING JULY, AUGUST AND SEPTEMBER, 1916.—*Concluded.*

Class of workpeople affected	Locality.	Approximate number of work-people affected	Date from which change took effect.	Particulars of change.
RAILWAY EMPLOYEES—Cont'd.				
Maintenance-of-way employees	Alberta.....	300	July 1	Wages increased, settlement through conciliation of Department of Labour.
Shop hands.....	C.P.R. lines East,		Aug. 10	Increase of 8 per cent granted.
	C.P.R. lines West.....		Aug. 10	Increase of from 2 to 3 cents per hour granted.
Freight handlers	Stratford, Ont.	20	July 8	Wages increased from \$1.85 to \$2.00 per day after strike.
ELECTRIC RAILWAY EMPLOYEES—				
Conductors and motormen....	Ottawa, Ont.....	500	July 1	Wages increased by 3 cents an hour and hours reduced from 10 to 9, settled through Board under I.D.I. Act.
Conductors and motormen, barnsmen and car repairers, car cleaners, trackmen	Edmonton, Alta....	250	Aug. 31	Wages increased by settlement through conciliation of Department.
CIVIC EMPLOYEES:—				
Fire chief	London, Ont....	1	July 1	Increase from \$2,100 to \$2,200 per year.
Assistant fire chief.....		1	Increase from \$1,400 to \$1,450 per year.
Captains.....		5	Wages increased from \$2.60 to \$2.65 per day, also get \$125 per year.
Lieutenants		5	Wages increased from \$2.60 to \$2.65 per day, also get \$50 per year.
Men.....		30	Old scale \$2.00, \$2.20, \$2.40, \$2.60 for 1st, 2nd, 3rd and 4th year men. New scale \$2.25, \$2.45, \$2.65 for 1st, 2nd and 3rd year men.
Firemen, 1st class.....	Vancouver, B.C....	77	July 1	Increase from \$80 to \$95 per month.
2nd class		13	Increase from \$76.50 to \$85.50 per month.
3rd class		8	Increase from \$68.00 to \$76.00 per month.
4th class		27	Increase from \$63.75 to \$71.25 per month.
Captains		17	Increase from \$100 to \$118.75 per month.
Lieutenants		15	Increase from \$88 to \$104.50 per month.
Engineers		5	Increase from \$100 to \$118.75 per month.
Firewarden and machinist		2	Increase from \$100 to \$118.75 per month.
Auto expert and head engineer.....		2	Increase from \$112 to \$133 per month.
Secretary		1	Increase from \$88 to \$104.50 per month.
Policemen	Hamilton, Ont....	65	July 1	Increase from \$1,000, \$900 and \$800 per year for 1st, 2nd and 3rd class men to \$1,060, \$960, and \$860.
Parks and boulevard men.....	Victoria, B.C.....	76	July 1	Wages increased from \$2.25 to \$2.50 per day.
Street sweepers	Calgary, Alta.....	50	July 11	Wages increased from 28 to 30 cents per hour.
Firemen	South Vancouver, B.C.	21	Aug. 9	Wages of 1st year men increased \$5 per month, and 2nd year men \$10.
UNSKILLED LABOUR:—				
Labourers and coal and ice handlers.	Toronto, Ont.....	July ..	Wages advanced from 25 to 30 cents per hour.
Labourers in steel foundry	Hamilton, Ont....	55	Aug 8	Wages advanced by 10 per cent after strike.
Dock labourers	Vancouver, B.C....	70	Aug. 28	Wages increased from 25 to 30 cents per hour for 9-hour day, 35 cents per hour overtime.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1916

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Department of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the Inspector of Factories of Ontario, Ontario Railway and Municipal Board, the Bureau of Labour of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

The following is a record of the accidents of the month by industries and groups of trades:

STATEMENT OF ACCIDENTS DURING THE MONTH OF OCTOBER, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry	Killed	Injured	Total
Agriculture.....	5	14	19
Fishing and Hunting.....	1	1
Lumbering.....	3	2	5
Mining.....	4	6	10
Railway Construction.....	1	3	4
Building Trades.....	3	19	22
Metal Trades.....	10	145	155
Woodworking Trades.....	10	10
Printing and Allied Trades.....	2	2
Clothing.....	7	7
Textile.....	1	3	4
Food & Tobacco Preparation.....	2	3	5
<i>Transportation:—</i>			
Steam Railway Service...	14	83	97
Electric Railway Service.....	3	3
Navigation.....	2	3	5
Miscellaneous.....	5	20	25
Public Employees.....	5	5
Miscellaneous Skilled Trades.....	3	24	27
Unskilled Labour.....	4	4	8
Total.....	58	356	414

DURING October the Department of Labour recorded industrial accidents affecting 414 workpeople, 58 of whom were killed or fatally injured and 356 were seriously injured during the course of their respective employments. The record for September was 66 killed and 415 injured, while the total number recorded for October, 1915, was 85 killed and 524 injured. It may be noted there was a decrease in the October accident record as compared with both September this year and with October, 1915, there being 8 fewer killed and 59 fewer injured as compared with September and 27 fewer killed and 168 less injured in October this year than in the same month a year ago.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING OCTOBER, 1916.

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
<i>Agriculture—</i>				
Farmer.....	Sandwich, Ont.....	Oct. 6	1	Kicked by a cow.
".....	Wyoming, Ont.....	" 4	1	Cave-in of gravel pit.
".....	Campbellford, Ont.....	" 1	1	Kicked by a cow.
".....	Mariposa, Ont.....	" 27	1	Run over by a wagon.
Farmhand.....	Wolseley, Sask.....	" 20	1	Mangled by threshing machine.
<i>Fishing and Hunting—</i>				
Fisherman.....	Campbellton, N.B.....	" 9	1	Drowned.
<i>Lumbering—</i>				
Sawmill employee.....	Temperance Vale, N.B.....	" 20	1	Struck by a piece of scantling.
Shinglemill employee.....	Vancouver, B.C.....	" 10	1	Mangled by machinery.
Logger.....	Laggan, B.C.....	" 27	1	Struck by falling tree.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING OCTOBER, 1916.—(Continued.)

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
Mines, Metalliferous Works and Quarries—				
Miner, Col. 15	New Waterford, N.S.	Oct. 17	1	Crushed by a mine car.
Miner, Victoria Mine	River Hebert, N.S.	" 27	1	Fall of rock.
Asbestos miner	Thetford Mines, Que.	" 13	1	Crushed by falling rock.
Quarry employee	Chicoutimi, Que.	" ..	1	Crushed by falling rock.
Railway and Canal Construction—				
Laborer (C.N.R. Tunnel) ..	Montreal, Que.	" 7	1	Crushed by falling stone.
Building Trades—				
Painter	Verdun, Que.	" 12	1	Electrocuted.
Carpenter	Thorold, Ont.	" 13	1	Electrocuted.
Derrick operator	Winnipeg, Man.	" 10	1	Crushed by a falling derrick.
Metal, Engineering and Shipbuilding—				
Machinist	Brantford, Ont.	" 10	1	Caught in shafting of machinery.
"	Hamilton, Ont.	" 10	1	By a fall.
"	Burrows, Man.	" 9	1	Struck by flying piece of wood.
Steel worker	Sydney, N.S.	" 20	1	Fell into pit of blasting furnace.
"	Sydney, N.S.	" 10	1	Crushed by falling metal.
"	Longue Pointe, Que.	" 18	1	Crushed by falling metal.
Metal worker	Hamilton, Ont.	" 16	1	Fell down elevator shaft.
Blacksmith	Chippawa, Ont.	" 21	1	Struck by belt of machine.
Lineman	Orillia, Ont.	" 5	1	Fell from a pole.
"	Toronto, Ont.	" 18	1	Electrocuted.
Textile—				
Woollen mill employee	Merrickville, Ont.	" 30	1	Fell down elevator shaft.
Food & Tobacco Preparation—				
Baker	Montreal, Que.	" 10	1	Mangled by machinery.
Emp. condensed milk factory	Chesterville, Ont.	" 6	1	Collapse of a tank.
Steam Railway Service—				
Conductor	Asquith, Sask.	" 6	1	Crushed between car and platform.
Brakeman	Camrose, Alta.	" 22	1	Deraiment of train.
Brakeman	St. Casimir, Que.	" 26	1	Deraiment of train.
Car repairer	Sault Ste. Marie, Ont.	" 20	1	Run over by cars.
Bridgeman	Ottawa, Ont.	" 4	1	Fell from bridge.
Employee	Brockville, Ont.	" 14	1	Run over by locomotive.
Car checker	Toronto, Ont.	" 19	1	Struck by a train.
Signalman	Ottawa, Ont.	" 18	1	Jumping from moving train.
Sectionman	Capleton, Que.	" 30	1	Hand car struck by a train.
"	Laval des Rapides, Que.	" 23	1	Struck by a locomotive.
"	M. P. 57 and 58 (—)	" 3	1	Run over by a train.
"	Lacombe, Alta.	" 23	1	Fell from hand car.
Employee, M.P. 88	Ft. William, Ont. S.D.	" 7	1	Struck by a train.
"	Kenora, Ont.	" 23	1	Struck by a train.
Navigation—				
Captain	Sydney, N.S.	" 16	1	Fell into hold of vessel.
Deckhand	Lock 1, Welland Canal	" 12	1	Fell between vessel and lockwall.
Miscellaneous Transport—				
Driver	Hamilton, Ont.	" 4	1	Wagon struck by a train.
Teamster	Marmora, Ont.	" 20	1	Thrown from a wagon.
Teamster	Brandon, Ont.	" 4	1	Run over by a railway car.
Longshoreman	Montreal, Que.	" 22	1	Crushed, handling a heavy piece of metal.
Coal handler	Sarnia, Ont.	" 19	1	Caught in jaws of clam shell bucket.
Miscellaneous Skilled Trades—				
Janitor	Montreal, Que.	" 30	1	Died from burns received in a fire.
Janitor	Montreal, Que.	" 22	1	Overcome by smoke.
Hospital maid	Victoria, B.C.	" 7	1	Fell from door leading to fire escape.
Unskilled Labour—				
Laborer	Ft. William	" 28	1	Electrocuted.
"	Montreal, Que.	" 30	1	Mangled by a circular saw.
"	Montreal, Que.	" 6	1	Cave-in of excavation.
"	East Flamboro, Ont.	" 25	1	Explosion of dynamite.

THE UNITED STATES CHILD-LABOUR LAW AND THE COMPENSATION LAW FOR INJURED EMPLOYEES OF THE UNITED STATES

THE *Labour Gazette* reproduces here the text of the Federal child-labour law of the United States and the compensation law for injured employees of the United States Government. The enactment of this legislation was noted in the last issue (page 1602).

The United States Child-Labour Law

The purpose of this act, which is entitled an act to prevent interstate commerce in the products of child labour and for other purposes and which marks the culmination of demands extending over a number of years, is to prevent the interstate shipment of the products of any mine or quarry in which children under the age of 16 years have been employed or the products of any manufacturing establishment in which children under 14 years of age have been employed or in which children between the ages of 14 and 16 years have worked more than eight hours in any day or more than six days in any week or have been employed at night work. The text of the act is as follows:

PUBLIC—No. 249—SIXTY-FOURTH CONGRESS.

(H R. 8234.)

SECTION 1. No producer, manufacturer or dealer shall ship or deliver for shipment in interstate or foreign commerce any article or commodity the product of any mine or quarry, situated in the United States, in which within 30 days prior to the time of the removal of such product therefrom children under the age of 16 years have been employed or permitted to work, or any article or commodity the product of any mill, cannery, workshop, factory, or manufacturing establishment, situated in the United States, in which within 30 days prior to the removal of such product therefrom children under the age of 14 years have been employed or permitted to work, or children between the ages of 14 years and 16 years have been employed or permitted to work more than eight hours in any day, or more than six days in any week, or after the hour of seven o'clock postmeridian, or before the hour of six o'clock antemeridian: *Provided*, That a prosecution and conviction of a defendant for the shipment or delivery for shipment of any article or commodity under the conditions

herein prohibited shall be a bar to any further prosecution against the same defendant for shipments or deliveries for shipment of any such article or commodity before the beginning of said prosecution.

SEC. 2. The Attorney General, the Secretary of Commerce, and the Secretary of Labour shall constitute a board to make and publish from time to time uniform rules and regulations for carrying out the provisions of this act.

SEC. 3. For the purpose of securing proper enforcement of this act the Secretary of Labour, or any person duly authorized by him, shall have authority to enter and inspect at any time mines, quarries, mills, canneries, workshops, factories, manufacturing establishments, and other places in which goods are produced or held for interstate commerce; and the Secretary of Labour shall have authority to employ such assistance for the purposes of this act as may from time to time be authorized by appropriation or other law.

SEC. 4. It shall be the duty of each district attorney to whom the Secretary of Labour shall report any violation of this act, or to whom any State factory or mining or quarry inspector, commissioner of labour, State medical inspector, or school-attendance officer, or any other person shall present satisfactory evidence of any such violation to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States without delay for the enforcement of the penalties in such cases herein provided: *Provided*, That nothing in this act shall be construed to apply to bona fide boys' and girls' canning clubs recognized by the Agricultural Department of the several States and of the United States.

SEC. 5. Any person who violates any of the provisions of section one of this act, or who refuses or obstructs entry or inspection authorized by section three of this act, shall for each offense prior to the first conviction of such person under the provisions of this act, be punished by a fine of not more than \$200, and shall for each offense subsequent to such conviction be punished by a fine of not more than \$1,000, nor less than \$100, or by imprisonment for not more than three months, or by both such fine and imprisonment, in the discretion of the court: *Provided*, That no dealer shall be prosecuted under the provisions of this act for a shipment, delivery for shipment, or transportation who establishes a guaranty issued by the person by whom the goods shipped or delivered for shipment or transportation were manufactured or produced, resident in the United States, to the effect that such goods were produced or manufactured in a mine or quarry in which within 30 days prior to their removal therefrom no children under the age of 16 years were employed or permitted to work, or in a mill, cannery, workshop, factory or manufacturing establishment, in which within 30 days prior to the removal of such goods therefrom no children under the age of 14 years were employed or permitted to work, nor children between the ages of 14 years and 16 years employed or permitted to work more than eight hours in any day or more than six days in any week or after the hour of seven o'clock postmeridian or before the hour of six o'clock antemeridian; and in such event, if the guaranty contains any false statement of a material fact, the guarantor shall be amenable to prosecution and to

the fine or imprisonment provided by this section for violation of the provisions of this act. Said guaranty, to afford the protection above provided, shall contain the name and address of the person giving the same: *And provided further*, That no producer, manufacturer or dealer shall be prosecuted under this act for the shipment, delivery for shipment, or transportation of a product of any mine, quarry, mill, cannery, workshop, factory, or manufacturing establishment, if the only employment therein, within 30 days prior to the removal of such product therefrom, of a child under the age of 16 years has been that of a child as to whom the producer or manufacturer has in good faith procured, at the time of employing such child, and has since in good faith relied upon and kept on file a certificate, issued in such form, under such conditions, and by such persons as may be prescribed by the board, showing the child to be of such an age that the shipment, delivery for shipment, or transportation was not prohibited by this act. Any person who knowingly makes a false statement or presents false evidence in or in relation to any such certificate or application therefor shall be amenable to prosecution and to the fine or imprisonment provided by this section for violations of this act. In any State designated by the board, an employment certificate or other similar paper as to the age of the child, issued under the laws of that State and not inconsistent with the provisions of this act, shall have the same force and effect as a certificate herein provided for.

SEC. 6. The word "person" as used in this act shall be construed to include any individual or corporation or the members of any partnership or other unincorporated association. The term "ship or deliver for shipment in interstate or foreign commerce" as used in this act means to transport or to ship or deliver for shipment from any State or Territory or the District of Columbia to or through any other State or Territory or the District of Columbia or to any foreign country; and in the case of a dealer means only to transport or to ship or deliver for shipment from the State, Territory or district of manufacture or production.

SEC. 7. This act shall take effect from and after one year from the date of its passage.

Approved, September 1, 1916.

Compensation Law for Injured Employees of the United States Government

This act, which provides compensation for civilian employees of the United States suffering injuries while in the performance of their duties, supersedes the Act of 1908 which makes provision for certain groups of such employees, amounting to perhaps one-fourth of the more than 480,000 employees of the United States, as well as other acts applying to the Post Office Department and orders relating to the Isthmian Canal and the Panama Railroad and to the Alaskan Railway. The act creates a commission for its administration to be known as the United States Em-

ployees Compensation Commission, to be composed of three commissioners appointed by the President with the advice and consent of the Senate. Benefits are to be paid on a basis of two-thirds of the injured employee's wages, payments continuing as long as the disability lasts. Partial disability is compensated on the basis of the wage loss resulting from the injury. Death benefits to a widow cease only on her death or remarriage and to children on their attaining the age of 18, though they may continue beyond this date if the child is incapacitated from earning a livelihood. Other beneficiaries are to be provided for in the absence of the foregoing or subject to their prior rights.

The maximum benefit payable under the law during total disability is \$66.67 per month; the minimum, \$33.33. No compensation is to be paid for the first three days of disability, but reasonable medical, surgical and hospital services are to be furnished in all cases. Although the act as drawn made provision for occupational or industrial diseases, this provision was omitted in the enactment. However, compensation is to be based on personal injury and not on accident and it was stated on the floor of the House that laws of similar phraseology had been construed to include the results of occupational diseases. The text of the act follows:

PUBLIC—No. 267—64th CONGRESS.

(H. R. 15316.)

SECTION 1. The United States shall pay compensation as hereinafter specified for the disability or death of an employee resulting from a personal injury sustained while in the performance of his duty, but no compensation shall be paid if the injury or death is caused by the willful misconduct of the employee or by the employee's intention to bring about the injury or death of himself or of another, or if intoxication of the injured employee is the proximate cause of the injury or death.

SEC. 2. During the first three days of disability the employee shall not be entitled to compensation except as provided in section nine. No compensation shall at any time be paid for such period.

SEC. 3. If the disability is total the United States shall pay to the disabled employee during such disability a monthly compensation equal to sixty-six and two-thirds per centum of his monthly pay, except as hereinafter provided.

SEC. 4. If the disability is partial the United States shall pay to the disabled employee during such disability a monthly compensation equal to sixty-six and two-thirds per centum of the difference between his monthly pay and his monthly wage-earning capacity after the beginning of such partial disability. The commission may, from time to time, require a partially disabled employee to make an affidavit as to the wages which he is then receiving. In such affidavit the employee shall include a statement of the value of housing, board, lodging, and other advantages which are received from the employer as a part of his remuneration and which can be estimated in money. If the employee, when required, fails to make such affidavit, he shall not be entitled to any compensation while such failure continues, and the period of such failure shall be deducted from the period during which compensation is payable to him.

SEC. 5. If a partially disabled employee refuses to seek suitable work or refuses or neglects to work after suitable work is offered to, procured by, or secured for him, he shall not be entitled to any compensation.

SEC. 6. The monthly compensation for total disability shall not be more than \$66.67 nor less than \$33.33, unless the employee's monthly pay is less than \$33.33, in which case his monthly compensation shall be the full amount of his monthly pay. The monthly compensation for partial disability shall not be more than \$66.67. In the case of persons who at the time of the injury were minors or employed in a learner's capacity and who were not physically or mentally defective, the commission shall, on any review after the time when the monthly wage-earning capacity of such persons would probably, but for the injury, have increased, award compensation based on such probable monthly wage-earning capacity. The commission may, on any review after the time when the monthly wage-earning capacity of the disabled employee would probably, irrespective of the injury, have decreased on account of old age, award compensation based on such probable monthly wage-earning capacity.

SEC. 7. As long as the employee is in receipt of compensation under this act, or, if he has been paid a lump sum in commutation of installment payments, until the expiration of the period during which such installment payments would have continued, he shall not receive from the United States any salary, pay, or remuneration whatsoever except in return for services actually performed, and except pensions for service in the Army or Navy of the United States.

SEC. 8. If at the time the disability begins the employee has annual or sick leave to his credit he may, subject to the approval of the head of the department, use such leave until it is exhausted, in which case his compensation shall begin on the fourth day of disability after the annual or sick leave has ceased.

SEC. 9. Immediately after an injury sustained by an employee while in the performance of his duty, whether or not disability has arisen, and for a reasonable time thereafter, the United States shall furnish to such employee reasonable medical, surgical and hospital services and supplies unless he refuses to accept them. Such services and supplies shall be furnished by United States medical officers and hospitals, but where this is not practicable shall be furnished by private physicians and hospitals designated or approved by the commission and paid for from the employees' compensation fund. If necessary for the securing of proper medical, surgical and hospital treatment, the employee, in the discretion of the com-

mission, may be furnished transportation at the expense of the employees' compensation fund.

SEC. 10. If death results from the injury within six years the United States shall pay to the following persons for the following period a monthly compensation equal to the following percentages of the deceased employee's monthly pay, subject to the modification that no compensation shall be paid where the death takes place more than one year after the cessation of disability resulting from such injury, or, if there has been no disability preceding death, more than one year after the injury:

(A) To the widow, if there is no child, thirty-five per centum. This compensation shall be paid until her death or marriage.

(B) To the widower, if there is no child, thirty-five per centum if wholly dependent for support upon the deceased employee at the time of her death. This compensation shall be paid until his death or marriage.

(C) To the widow or widower, if there is a child, the compensation payable under clause (A) or clause (B) and in addition thereto ten per centum for each child, not to exceed a total of sixty-six and two-thirds per centum for such widow or widower and children. If a child has a guardian other than the surviving widow or widower, the compensation payable on account of such child shall be paid to such guardian. The compensation payable on account of any child shall cease when he dies, marries, or reaches the age of 18, or, if over 18, and incapable of self-support, becomes capable of self-support.

(D) To the children, if there is no widow or widower, twenty-five per centum for one child and ten per centum additional for each additional child, not to exceed a total of sixty-six and two-thirds per centum, divided among such children share and share alike. The compensation of each child shall be paid until he dies, marries, or reaches the age of 18, or, if over 18 and incapable of self-support, becomes capable of self-support. The compensation of a child under legal age shall be paid to its guardian.

(E) To the parents, if one is wholly dependent for support upon the deceased employee at the time of his death and the other is not dependent to any extent, twenty-five per centum; if both are wholly dependent, twenty per centum to each; if one is or both are partly dependent, a proportionate amount in the discretion of the commission.

The above percentages shall be paid if there is no widow, widower, or child. If there is a widow, widower or child, there shall be paid so much of the above percentages as, when added to the total percentages payable to the widow, widower or children, will not exceed a total of sixty-six and two-thirds per centum.

(F) To the brothers, sisters, grandparents, and grandchildren, if one is wholly dependent upon the deceased employee for support at the time of his death, twenty per centum to such dependent; if more than one are wholly dependent, thirty per centum, divided among such dependents share and share alike; if there is no one of them wholly dependent, but one or more partly dependent, ten per centum divided among such dependents share and share alike.

The above percentages shall be paid if there is no widow, widower, child, or dependent parent. If there is a widow, widower, child, or dependent parent, there shall be paid so much of the above percentages as, when added to the total percentage payable to the widow, widower, children, and dependent

parents, will not exceed a total of sixty-six and two-thirds per centum.

(G) The compensation of each beneficiary under clauses (E) and (F) shall be paid for a period of eight years from the time of the death, unless before that time he, if a parent or grandparent, dies, marries, or ceases to be dependent, or, if a brother, sister, or grandchild, dies, marries, or reaches the age of 18, or, if over 18 and incapable of self-support, becomes capable of self-support. The compensation of a brother, sister, or grandchild under legal age shall be paid to his or her guardian.

(H) As used in this section, the term "child" includes step-children, adopted children, and posthumous children, but does not include married children. The terms "brother" and "sister" include step-brothers and step-sisters, half brothers and half sisters, and brothers and sisters by adoption, but do not include married brothers or married sisters. All of the above terms and the term "grandchild" include only persons who at the time of the death of the deceased employee are under 18 years of age or over that age and incapable of self-support. The term "parent" includes stepparents and parents by adoption. The term "widow" includes only the decedent's wife living with or dependent for support upon him at the time of his death. The term "widower" includes only the decedent's husband dependent for support upon her at the time of her death. The terms "adopted" and "adoption" as used in this clause include only legal adoption prior to the time of the injury.

(I) Upon the cessation of compensation under this section to or on account of any person, the compensation of the remaining persons entitled to compensation for the unexpired part of the period during which their compensation is payable shall be that which such persons would have received if they had been the only persons entitled to compensation at the time of the decedent's death.

(J) In case there are two or more classes of persons entitled to compensation under this section and the apportionment of such compensation, above provided, would result in injustice, the commission may, in its discretion, modify the apportionment to meet the requirements of the case.

(K) In computing compensation under this section, the monthly pay shall be considered not to be more than \$100 nor less than \$50, but the total monthly compensation shall not exceed the monthly pay computed as provided in section twelve.

(L) If any person entitled to compensation under this section, whose compensation by the terms of this section ceases upon his marriage, accepts any payments of compensation after his marriage he shall be punished by a fine of not more than \$2,000 or by imprisonment for not more than one year, or by both such fine and imprisonment.

SEC. 11. If death results from the injury within six years the United States shall pay to the personal representative of the deceased employee burial expenses not to exceed \$100, in the discretion of the commission. In the case of an employee whose home is within the United States, if his death occurs away from his home office or outside of the United States, and if so desired by his relatives, the body shall, in the discretion of the commission, be embalmed and transported in a hermetically sealed casket to the home of the employee. Such burial expenses shall not be paid and such transportation shall not be furnished where the death takes place more than one year after the cessation of disability resulting from such injury, or, if there has been no disability preceding death, more than one year after the injury.

SEC. 12. In computing the monthly pay the usual practice of the service in which the employee was employed shall be followed. Subsistence and the value of quarters furnished an employee shall be included as part of the pay, but overtime pay shall not be taken into account.

SEC. 13. In the determination of the employee's monthly wage-earning capacity after the beginning of partial disability, the value of housing, board, lodging, and other advantages which are received from his employer as a part of his remuneration and which can be estimated in money shall be taken into account.

SEC. 14. In cases of death or of permanent total or permanent partial disability, if the monthly payment to the beneficiary is less than \$5 a month, or if the beneficiary is or is about to become a non-resident of the United States, or if the commission determines that it is for the best interests of the beneficiary, the liability of the United States for compensation to such beneficiary may be discharged by the payment of a lump sum equal to the present value of all future payments of compensation computed at four per centum true discount compounded annually. The probability of the beneficiary's death before the expiration of the period during which he is entitled to compensation shall be determined according to the American Experience Table of Mortality; but in case of compensation to the widow or widower of the deceased employee, such lump sum shall not exceed sixty months' compensation. The probability of the happening of any other contingency affecting the amount or duration of the compensation shall be disregarded.

SEC. 15. Every employee injured in the performance of his duty, or some one on his behalf, shall, within 48 hours after the injury, give written notice thereof to the immediate superior of the employee. Such notice shall be given by delivering it personally or by depositing it properly stamped and addressed in the mail.

SEC. 16. The notice shall state the name and address of the employee, the year, month, day and hour when and the particular locality where the injury occurred, and the cause and nature of the injury, and shall be signed by and contain the address of the person giving the notice.

SEC. 17. Unless notice is given within the time specified or unless the immediate superior has actual knowledge of the injury, no compensation shall be allowed, but for any reasonable cause shown, the commission may allow compensation if the notice is filed within one year after the injury.

SEC. 18. No compensation under this act shall be allowed to any person, except as provided in section 38, unless he or some one on his behalf shall, within the time specified in section 20, make a written claim therefor. Such claim shall be made by delivering it at the office of the commission or to any commissioner or to any person whom the commission may by regulation designate, or by depositing it in the mail properly stamped and addressed to the commission or to any person whom the commission may by regulation designate.

SEC. 19. Every claim shall be made on forms to be furnished by the commission and shall contain all the information required by the commission. Each claim shall be sworn to by the person entitled to compensation or by the person acting on his behalf, and, except in case of death, shall be accompanied by a certificate of the employee's physician stating the nature of the injury and the nature and probable extent of the disability. For any reasonable cause shown the commission may waive the provisions of this section.

SEC. 20. All original claims for compensation shall be made within 60 days after the injury. All original claims for compensation for death shall be made within one year after the death. For any reasonable cause shown the commission may allow original claims for compensation for disability to be made at any time within one year.

SEC. 21. After the injury the employee shall, as frequently and at such times and places as may be reasonably required, submit himself to examination by a medical officer of the United States or by a duly qualified physician designated or approved by the commission. The employee may have a duly qualified physician designated and paid by him present to participate in such examination. For all examinations after the first the employee shall, in the discretion of the commission, be paid his reasonable travelling and other expenses and loss of wages incurred in order to submit to such examination. If the employee refuses to submit himself for or in any way obstructs any examination, his right to claim compensation under this act shall be suspended until such refusal or obstruction ceases. No compensation shall be payable while such refusal or obstruction continues, and the period of such refusal or obstruction shall be deducted from the period for which compensation is payable to him.

SEC. 22. In case of any disagreement between the physician making an examination on the part of the United States and the employee's physician the commission shall appoint a third physician, duly qualified, who shall make an examination.

SEC. 23. Fees for examinations made on the part of the United States under sections 21 and 22 by physicians who are not already in the service of the United States shall be fixed by the commission. Such fees, and any sum payable to the employee under section 21, shall be paid out of the appropriation for the work of the commission.

SEC. 24. Immediately after an injury to an employee resulting in his death or in his probable disability, his immediate superior shall make a report to the commission containing such information as the commission may require, and shall thereafter make such supplementary reports as the commission may require.

SEC. 25. Any assignment of a claim for compensation under this act shall be void and all compensation and claims therefor shall be exempt from all claims of creditors.

SEC. 26. If an injury or death for which compensation is payable under this act is caused under circumstances creating a legal liability upon some person other than the United States to pay damages therefor, the commission may require the beneficiary to assign to the United States any right of action he may have to enforce such liability of such other person or any right which he may have to share in any money or other property received in satisfaction of such liability of such other person, or the commission may require said beneficiary to prosecute said action in his own name.

If the beneficiary shall refuse to make such assignment or to prosecute said action in his own name when required by the commission, he shall not be entitled to any compensation under this act.

The cause of action when assigned to the United States may be prosecuted or compromised by the commission, and if the commission realizes upon such cause of action, it shall apply the money or other property so received in the following manner: After deducting the amount of any compensation already paid to the beneficiary and the expenses of such

realization or collection, which sum shall be placed to the credit of the employees' compensation fund, the surplus, if any, shall be paid to the beneficiary and credited upon any future payments of compensation payable to him on account of the same injury.

SEC. 27. If an injury or death for which compensation is payable under this act is caused under circumstances creating a legal liability in some person other than the United States to pay damages therefor, and a beneficiary entitled to compensation from the United States for such injury or death receives, as a result of a suit brought by him or on his behalf, or as a result of a settlement made by him or on his behalf, any money or other property in satisfaction of the liability of such other person, such beneficiary shall, after deducting the costs of suit and a reasonable attorney's fee, apply the money or other property so received in the following manner:

(A) If his compensation has been paid in whole or in part, he shall refund to the United States the amount of compensation which has been paid by the United States and credit any surplus upon future payments of compensation payable to him on account of the same injury. Any amount so refunded to the United States shall be placed to the credit of the employees' compensation fund.

(B) If no compensation has been paid to him by the United States, he shall credit the money or other property so received upon any compensation payable to him by the United States on account of the same injury.

SEC. 28. A commission is hereby created, to be known as the United States Employees' Compensation Commission, and to be composed of three commissioners appointed by the President, by and with the advice and consent of the Senate, one of whom shall be designated by the President as chairman. No commissioner shall hold any other office or position under the United States. No more than two of said commissioners shall be members of the same political party. One of said commissioners shall be appointed for a term of two years, one for a term of four years, and one for a term of six years, and at the expiration of each of said terms, the commissioner then appointed shall be appointed for a period of six years. Each commissioner shall receive a salary of \$4,000 a year. The principal office of said commission shall be in Washington, District of Columbia, but the said commission is authorized to perform its work at any place deemed necessary by said commission, subject to the restrictions and limitations of this act.

SEC. 28a. Upon the organization of said commission and notification to the heads of all executive departments that the commission is ready to take up the work devolved upon it by this act, all commissions and independent bureaus, by or in which payments for compensation are now provided, together with the adjustment and settlement of such claims, shall cease and determine, and such executive departments, commissions and independent bureaus shall transfer all pending claims to said commission to be administered by it. The said commission may obtain, in all cases, in addition to the reports provided in section 24, such information and such reports from employees of the departments as may be agreed upon by the commission and the heads of the respective departments. All clerks and employees now exclusively engaged in carrying on said work in the various executive departments, commissions, and independent bureaus, shall be transferred to, and become employees of, the commission at their present grades and salaries.

SEC. 29. The commission, or any commissioner by authority of the commission, shall have power to issue subpoenas for and compel the attendance of witnesses within a radius of 100 miles, to require the production of books, papers, documents, and other evidence, to administer oaths, and to examine witnesses, upon any matter within the jurisdiction of the commission.

SEC. 30. The commission shall have such assistants, clerks, and other employees as may be from time to time provided by Congress. They shall be appointed from lists of eligibles to be supplied by the Civil Service Commission, and in accordance with the civil service law.

SEC. 31. The commission shall submit annually to the Secretary of the Treasury estimates of the appropriations necessary for the work of the commission.

SEC. 32. The commission is authorized to make necessary rules and regulations for the enforcement of this act, and shall decide all questions arising under this act.

SEC. 33. The commission shall make to Congress at the beginning of each regular session a report of its work for the preceding fiscal year, including a detailed statement of appropriations and expenditures, a detailed statement showing receipts of and expenditures from the employees' compensation fund, and its recommendations for legislation.

SEC. 34. For the fiscal year ending June thirtieth, 1917, there is hereby authorized to be appropriated, from any money in the Treasury not otherwise appropriated, the sum of \$50,000 for the work of the commission, including salaries of the commissioners and of such assistants, clerks, and other employees as the commission may deem necessary, and for travelling expenses, expenses of medical examinations under sections 21 and 22, reasonable travelling and other expenses and loss of wages payable to employees under section 21, rent and equipment of offices, purchase of books, stationery, and other supplies, printing and binding to be done at the Government Printing Office, and other necessary expenses.

SEC. 35. There is hereby authorized to be appropriated, from any money in the Treasury not otherwise appropriated, the sum of \$500,000, to be set aside as a separate fund in the Treasury, to be known as the employees' compensation fund. To this fund there shall be added such sums as Congress may from time to time appropriate for the purpose. Such fund, including all additions that may be made to it, is hereby authorized to be permanently appropriated for the payment of the compensation provided by this act, including the medical, surgical and hospital services and supplies provided by section nine, and the transportation and burial expenses provided by sections nine and eleven. The commission shall submit annually to the Secretary of the Treasury estimates of the appropriations necessary for the maintenance of the fund.

SEC. 36. The commission, upon consideration of the claim presented by the beneficiary, and the report furnished by the immediate superior and the completion of such investigation as it may deem necessary, shall determine and make a finding of facts thereon and make an award for or against payment of the compensation provided for in this act. Compensation when awarded shall be paid from the employees' compensation fund.

SEC. 37. If the original claim for compensation has been made within the time specified in section 20, the commission may, at any time, on its own motion or on application, review the award, and, in accordance with the facts found on such review, may

end, diminish, or increase the compensation previously awarded, or, if compensation has been refused or discontinued, award compensation.

SEC. 38. If any compensation is paid under a mistake of law or of fact, the commission shall immediately cancel any award under which such compensation has been paid and shall recover, as far as practicable, any amount which has been so paid. Any amount so recovered shall be placed to the credit of the employees' compensation fund.

SEC. 39. Whoever makes, in any affidavit required under section 4 or in any claim for compensation, any statement, knowing it to be false, shall be guilty of perjury and shall be punished by a fine of not more than \$2,000, or by imprisonment for not more than one year, or by both such fine and imprisonment.

Sec. 40. Wherever used in this act—

The singular includes the plural and the masculine line includes the feminine.

The term "employee" includes all civil employees of the United States and of the Panama Railroad Company.

The term "commission" shall be taken to refer to the United States Employees' Compensation Commission provided for in section 28.

The term "physician" includes surgeons.

The term "monthly pay" shall be taken to refer to the monthly pay at the time of the injury.

SEC. 41. All acts or parts of acts inconsistent with this act are hereby repealed: *Provided, however*, That for injuries occurring prior to the passage of this act compensation shall be paid under the law in force at the time of the passage of this act: *And provided further*, That if an injury or death for which compensation is payable under this act is caused under circumstances creating a legal liability in the Panama Railroad Company to pay damages therefor under the laws of any State, Territory, or possession of the United States or of the district of Columbia or of any foreign country, no compensation shall be payable until the person entitled to compensation releases to the Panama Railroad Company any right of action which he may have to enforce such liability of the Panama Railroad Company, or until he assigns to the United States any right which he may have to share in any money or other property received in satisfaction of such liability of the Panama Railroad Company.

SEC. 42. The President may, from time to time, transfer the administration of this act so far as employees of the Panama Canal and of the Panama Railroad Company are concerned to the governor of the Panama Canal, and so far as employees of the Alaskan Engineering Commission are concerned to the chairman of that commission, in which cases the words "commission" and "its" wherever they appear in this act shall, so far as necessary to give effect to such transfer, be read "governor of the Panama Canal" or "chairman of the Alaskan Engineering Commission," as the case may be, and "his"; and the expenses of medical examinations under sections 21 and 22, and the reasonable travelling and other expenses and loss of wages payable to employees under section 21, shall be paid out of appropriations for the Panama Canal or for the Alaskan Engineering Commission or out of funds of the Panama Railroad, as the case may be, instead of out of the appropriation for the work of the commission.

In the case of compensation to employees of the Panama Canal or of the Panama Railroad Company for temporary disability, either total or partial, the President may authorize the governor of the

Panama Canal to waive, at his discretion, the making of the claim required by section 18. In the case of alien employees of the Panama Canal or of the Panama Railroad Company, or of any class or classes of them, the President may remove or modify the minimum limit established by section 6 on the monthly compensation for disability and the minimum limit established by clause (K) of section 10 on the monthly pay on which death compensation is to be computed. The President may authorize the governor of the Panama Canal and the chairman of the

Alaskan Engineering Commission to pay the compensation provided by this act, including the medical, surgical and hospital services and supplies provided by section 9 and the transportation and burial expenses provided by sections 9 and 11, out of the appropriations for the Panama Canal and for the Alaskan Engineering Commission, such appropriations to be reimbursed for such payments by the transfer of funds from the employees' compensation fund.

Approved, September 7, 1916.

REVIEWS

United Kingdom.—Report of the Health of Munition Workers Committee. Memorandum No. 13, Juvenile Employment, 1916; 8 pp.

The committee appointed by the Minister of Munitions "to consider and advise on questions of industrial fatigue, hours of labour and other matters affecting the personal health and physical efficiency of workers in munition factories and workshops," has issued to date 13 memoranda. No. 13—Juvenile Employment—gives an account of the working conditions of the boy munitioner. The report calls attention to the necessity at the present time of special effort to conserve the health of the rising generation, and while signs of immediate breakdown are not generally apparent it is noted that the principal lady factory inspector finds that there are symptoms of lassitude, exhaustion and impaired vitality among youthful workers on account of night work. The investigators of the committee found in one steel works that for the most part the boys were "so spiritless, so dull, so dead in look, so woebegone and attacked with weariness to a dulling of their spirits as to compel attention." It was found that conditions outside the workshop were responsible in a large measure for this unhealthy state. It was found that while there is danger of juvenile employment adversely affecting physique under normal conditions this danger has been materially increased by the present industrial stress. It is suggested that "too big a price was being paid for out-

put," and it is pointed out that boys, under 16 years of age especially, required shorter hours and more sleep. Under the Factories and Workshops Act of 1901, boys and girls under 18 years of age may be employed for a weekly period of 60 hours, while, with some exceptions, night work, Sunday work and overtime is forbidden for these workers. Since the commencement of the war these restrictions have been relaxed and the weekly hours have been frequently extended to 67 and in some instances even longer hours have been worked. The daily hours of employment have been extended to 14 and occasionally to 15 hours; night work has been common and Sunday work has also been allowed, although of late it has been largely discontinued.

As to employment for women workers employers have increasingly recognized that there are definite limits beyond which women and girls cannot usefully be employed. At a number of factories the three-shift system has been introduced, and where this is not found practical the weekly hours have been frequently kept below 60. While there can be no doubt that a daily period of 12 hours is desirable under ordinary circumstances the committee did not feel justified in recommending that no extension beyond this limit should be permitted. Some power of extension is of value to employers in enabling them to meet sudden emergencies, and the committee, therefore, considered that unless conditions of employment are especially unfavourable, daily employment for

more than 12 hours may continue to be allowed under the present exceptional circumstances, provided that:

- (a) The maximum weekly hours already recommended are not extended.
- (b) Overtime employment should be concentrated on not more than three evenings in any week and so far as possible not on consecutive evenings.

As to Sunday work the committee hopes that all Sunday work will shortly be completely stopped and suggests that where the two-shift system is in operation at least two shifts should be dropped at each week-end.

As to night work the committee is of the opinion that girls under 18 and boys under 16 should only be employed at night if other labour cannot be obtained, and wherever possible a week's holidays may be usefully granted, perhaps as a reward for regular attendance during the year.

The memorandum has a section on Supervision of Health and Welfare which deals with the need for the welfare supervision of boys as well as of women and girls in factories, and suggests measures for the solution of some welfare problems. Questions as to the instruction of young workers, their food, health, wages and savings are also considered.

Union of South Africa.—General Report of the Miners' Phthisis Prevention Committee. Johannesburg, March 15, 1916; 199 pp.

The Minister of Mines of the Union of South Africa appointed a committee in February, 1912, "to inquire into by experimental or other investigation, and to report, from time to time,

**Miners'
Phthisis in
South Africa**

upon the improvement of methods for the prevention of miners' phthisis in the Witwatersrand gold mines and to advise upon the introduction of a systematic and uniform policy and the amendments to the mining regulations which may be necessary for combatting the disease."

The committee has submitted several reports and memoranda. The present general report, however, covers all the labours of the committee.

There have been three previous inquiries upon this subject in the Transvaal—the Commissions of 1902, 1907 and 1911. Since the appointment of the present Commission in 1912 it has carried out numerous experiments to determine the quantity and nature of the dust formed in mines and in considering the best methods of preventing the formation of dust and the laying of it when formation cannot be prevented and of safeguarding miners against its inhalation. Attention has also been paid to medical research work.

The disease begins as a silicosis which is a condition of fibroid change in the lung, caused by mechanical irritation of the tissues, arising from the presence in the substance of the lung of very fine silicious particles from the dust-laden atmosphere which the miner breathes. A lung in a condition of developed silicosis is thereby rendered more liable than a normal lung to intercurrent invasion by infective processes and especially to invasion by tuberculosis. It is, therefore, important that miners should keep the protective mechanism with which nature has provided them in a state of efficiency. Exercises in the open air after working hours and the systematic practice of simple breathing movements are recommended. A regular annual holiday, free from the inimical influences of underground work, is also an important preventive measure.

In the report of the Medical Commission appointed to inquire into the prevalence of miners' phthisis and pulmonary tuberculosis of miners in the Union of South Africa, issued early in 1912, it is stated that as the result of the examination of 3,136 underground workers, 26 per cent of the general body of miners at work were found to show definite signs of silicosis, while a further 5.5 per cent were classed as "probable" but not "definite" cases. The disease was found to fall most heavily upon rock-drill miners. Trammers, hammer-

men and timbermen, respectively, came next in order of risk, but the investigation clearly showed also that no group of underground workers was free from serious risk of attack, and that even the supervisory staff of the mines was by no means exempt from the danger of contracting miners' phthisis.

From this it appears that any broad policy aiming at the prevention of disease must include two lines of action:

- (a) To prevent the formation of dust and its dissemination in the air of the mine, and where, as is the case in certain mining operations this is impossible, to protect the workmen from inhaling the dust, and also from inhaling the fumes arising from the use of explosives.
- (b) To protect the workmen as far as possible against risks of infection by tuberculosis.

Methods such as the following are suggested for the control of tuberculosis among underground workers:

1. Measures to prevent employment of tuberculous persons underground.
2. The disinfection of underground workings.
3. The disinfection and sanitation of compounds and living rooms.
4. Inspection of food supplies.
5. Maintaining the standard of health of underground workers by periodic holidays.

As to the control of dust, the committee has concluded that abundance of clean water judiciously used is generally the most satisfactory medium at present known for dealing with dust. Certain special sticky liquids, while they have shown no superiority over plain water in extracting dust from the air, retain the dust after deposition better than water does.

As to ventilation the committee considers that the only method of insuring the adequate ventilation of winzes and workings connected only with winzes is to supply a separate ventilating pipe, altogether independent of the air supply to the machines, and controlled only by

a valve at the top of the winze, in all such workings, the size of the pipe to be proportioned to the depth of the winze. Provision should also be made for the special ventilation of all raises, exceeding 10 degrees from the horizontal, carried beyond a distance of 50 feet, and in all drives and raises under 10 degrees carried over 300 feet beyond any connections having a thorough air current, special ventilating appliances should be installed in direct connection with the general ventilating scheme.

In its concluding remarks the committee states that conditions underground have greatly improved since the inception of the committee in 1912 when the general use of water for dust-laying was inaugurated, and it is added that "generally speaking, the mines are to-day well equipped with water and the necessary appliances, but there are still too many cases of carelessness and lack of proper precautions in using these appliances. This is particularly true with natives who, owing to the discomfort caused by the use of water and the slight additional effort required, are inclined to neglect precautions when not being watched."

There are several appendices on various phases of the inquiry.

United Kingdom.—Report of the Departmental Committee on Prices appointed by the Board of Trade. Interim Report on Meat, Milk and Bacon. London, 1916; 17 pp.

The committee was appointed on June 17, 1916, and consisted of 12 persons,

Causes of Increase in Prices during the War

including one lady and five members of Parliament. The interim report was dated September 22. The report dealt first with prices in general

and pointed out that the increase in food prices had considerable effect on the life of the people, although other items of expenditure had not advanced on the average as much as food, while increases in rent had been prohibited by legislation, and rates of wages and actual earnings through overtime, etc., had been increased in many cases. It was stated, however, that "the evidence

taken goes to show that there is less total distress in the country than in an ordinary year of peace, the majority of the classes which chronically suffer from distress being in unusually regular employment and that this, together with the higher wages earned by and the greater needs of so many skilled and unskilled workers employed directly and indirectly in the production of munitions of war, has tended to increase considerably, in some directions, the total demand for food. On the other hand certain classes, . . . for example, the cotton operatives and some classes of day wage workers and labourers, are hard pressed by the rise in prices and actually have to curtail their consumption. . . ."

In describing the rise in prices it is pointed out that at different periods the general increase was due to a rise in particular items; the winter rise of 1914-15 to flour and bread, in May, 1915, to meat, and in September, 1915, to increased duties on tea and sugar, while the rise in April-May, 1916, was due chiefly to advances in prices of meat, sugar and potatoes, and the advance in August, 1916, to increases in prices of bread, flour, butter and eggs. Figures from the Labour Statistics Department showed advances in woollen clothing of from 40 to 90 per cent, in cotton of 50 per cent, and in boots of from 60 to 75 per cent. Coal advanced 32 per cent in London and 33 per cent in other towns, and prices had been regulated under the Price of Coal (Limitation) Act.

Meat prices.—A continuous rise in meat had occurred, although to keep up supplies the Government had put restrictions on the export of feeding stuffs, including oilcakes, maize, barley and oats, and also fertilizers, while in Ireland farmers were asked to maintain breeding stocks. Feeding stuffs and fertilizers, however, had risen and farm wages had advanced, while imported meat which normally forms 40 per cent of the nation's consumption had risen steeply in price, the main reason being the abnormal demand for frozen meat for the armies of the allies. Also the consumption by soldiers was greater per

head than in civilian life. The supplies in South America were increased and the imports from the United States, which had fallen after 1907 to vanishing point before the war, recovered to 50,068 tons for 1915, but imports from Australia were reduced by 25 per cent as a result of drought. The consumption of meat by the civilian population was estimated to be reduced $\frac{1}{6}$, although many persons engaged on munitions work, etc., required more than the normal allowance of meat.

To get additional supplies, new sources for frozen meat were developed in various countries, China, Venezuela, Madagascar, Brazil, Canada and South Africa. In August, 1914, Queensland gave full control of meat supplies to the Imperial Government and New South Wales followed early in 1915. In February, 1915, the Australian and New Zealand governments agreed to purchase on behalf of the mother country all the beef, mutton and lamb available for export at agreed prices. In regard to supplies from South America the British Government controlled the shipping and contracted with the River Plate Companies, the latest contract covering the entire surplus of Argentina and Uruguay at prices only 7 per cent higher than the 1915 contract, which was little higher than that of 1914.

It is pointed out that though prices for meat to the civilian population have risen by 30-60 per cent, freights, being regulated, have accounted for a rise of only 1d. per lb.

"The high wholesale prices of foreign meat, therefore, subsist by reason of the reduced amount available for civilian use, the high general demand, and the limitation of means of transport. The last-named factor includes the handling of cargoes in port and by rail and the frequent congestion in the docks, which so seriously limited the working power of ships, played an important part in the restriction of supplies. But tonnage, too, has been inadequate."

It is stated as certain that considerably increased profits have been made during the war by cattle breeders in the United

Kingdom and in foreign countries, especially in South America, although the cost of labour and feeding stuffs had greatly increased also.

The meat importers were found to have made their largest profits soon after the outbreak of war, owing to the sudden rise in the prices of available stocks. No evidence was obtained that cold storage had been used to inflate prices. The profits on the import meat business went to the producers and importers and in the case of home produced meat to the producers and the jobbers. The substantial rise in meat and the increased profits were due rather to "the shortage of supply than any process of combination, and but for the Government control of colonial meat (Australia and New Zealand) prices might be higher. . . . Where prices control is practicable—that is in the case of the Australian meat put on the market by the Government—it appears to be efficiently applied."

Milk.—"The price of milk is in obvious economic connection with those of meat and cheese. If the farmer can secure a higher profit either by selling his cows to the butcher or by turning his produce into cheese, he will probably do so; and a period of high meat prices is more likely to mean a reduction of the milk herds because the earnings made through the latter are very laboriously gotten. The dairying industry means 365 days' work in the year; the long hours of labour involved are exceptionally trying; the legal requirements as to sanitation and quality are considered strict; and not a few farmers avowedly abandon the business because of its irksomeness. It was accordingly to be expected that the rapidly rising meat prices of 1915, accompanied as they were by a shortage of labour, would lead to some slaughtering of milch cows; and it was found necessary, by Orders dated June 22 and August 18, 1915 (the latter of which was amended on March 31, 1916) to put a restraint upon the slaughtering of cows obviously in-calf. At the same time a limit was put upon the slaughter of calves under six months' old."

Regarding the distribution of milk it is found that combinations of milk dealers resulted in an economy of labour and plant, the elimination of much competitive effort, thus making good the war drain alike on men and horses, as well as providing a more regular and certain supply to the small retail dealers than if he contracted direct from the farmer. It was found that the companies made their profits in the retail milk business from the business in condensed milk, cheese, cream, etc., rather than from the sale and delivery of milk to the householders.

Bacon.—A searching investigation was made by the committee into the allegation that large quantities of bacon from America had been put in cold storage for the purpose of raising prices. It was found that this was the surplus from an unusually large importation as American shippers had made considerable shipments before the hot weather to meet the anticipated greater demand indicated by high prices. It was also found that losses had occurred on many shipments of bacon, but this also happened under normal conditions. It was pointed out that consumers in the United Kingdom were getting bacon at a lower retail price than in Canada where the bacon was produced. An increase in net imports during the war was found and was reported to be due to increases in military and civil consumption.

Recommendations.—The remedies proposed were the greatest possible increase in the supply of mercantile shipping, by the Government if necessary; increase in the supply of men at the docks to relieve congestion; further restriction of the imports of unnecessary commodities; prohibition of slaughter of breeding animals, etc.; development of sources of supply of meats by direct Government purchasing; control by the Government of the conditions of sale by retailers of the meat it supplies for civilian consumption to ensure reasonable prices; expedition of the establishment of refrigerating plants in Brazil at Rio de Janeiro, Santos or Bahia to open up supplies there; that persons not engaged

in severe manual labour should abstain from meat one day per week; consideration by the War Office of greater efficiency and economy in the use of meat for the army; that if additional milk could be obtained from Ireland it should be attempted to sell it over the counter in poor town districts at a cheaper price, due to the elimination of delivery costs; a scientific inquiry as to the possibility of drying and re-liquifying milk in pastoral countries; further attempts by the agricultural authorities to increase the supply of women as milkers on farms; the furnishing of returns by wholesale milk dealers as to the names and addresses of farmers with whom they have contracted for milk, the estimated quantities, prices, etc., the granting of fresh powers to local authorities to open municipal shops where there is reason to believe any group of retailers are using the present abnormal situation to obtain excessive profits; the provision of milk and dinners by all local authorities at maternity centres, etc., for mothers and children under five years of age out of the funds towards which special grants are made by the Local Government Board and the Board of Education; finally the establishment of fair and adequate rates of wages for women workers in controlled establishments where such a policy has not yet been completed, and the consideration by all employers as to whether their employees have yet received sufficient increases in earnings.

The committee also reported that the withdrawal of the embargo on the importation of live cattle from Canada was not examined from the standpoint of the alleged danger of disease, but that there seemed to be at present no likelihood of any considerable supply of live cattle from that source, even if scarcity of shipping did not make the importation of live as against dead meat uneconomical.

The report was signed by all the members of the committee, but seven out of the twelve appended a memorandum recommending far-reaching Government action, enlarging more and more its purchases of meat and bacon from outside

sources, becoming the sole purchaser when possible, and insisting that the purchasing public should get the full benefit of advantageous buying. The memorandum also stated that the recommendations should have dealt with the home supplies of meat, milk and bacon, that in many cases far too much profit was being made by home producers, that public control should be exercised over these and that reasonable prices should be fixed. This had been done as regards coal, rent, the home wool-clip, etc., and there was no adequate reason known why the public control of prices should not embrace the primary foodstuffs produced at home. For instance, in the milk industry, Parliament could set up machinery which would eliminate any element of extortion and encourage more efficient organization in distribution.

An appendix to the report gives tables of changes in wages, prices, imports and the cost of meat and milk production.

United States.—Bulletins Nos. 197 and 200 of the Bureau of Labour Statistics on Retail Prices, 1907 to 1915, and Wholesale Prices, 1890 to 1915. June and July, 1916. 381 pp. and 295 pp.

The Bulletin on Retail Prices gives the prices during 1915 of 29 articles of food, eight textiles, two kinds of anthracite coal, one bituminous coal and gas, and also the prices and weights per loaf of bread in 44 of the most important industrial cities in the various sections of the United States. To show the percentage changes in prices index numbers are given for foods and coal back to 1907, the year 1915 being used as the base period and therefore made equal to 100.

On this basis the index number of the 29 articles, weighted according to family consumption, was 101 for 1914, 98 for 1913 and 81 for 1907. The greatest rises since 1913 were in flour, sugar and corn meal and the least change appeared in milk and in eggs. Potatoes were much lower in 1915 than in any year since 1907.

Coal, stove, was slightly higher in

1915 than in 1914, slightly cheaper than in 1913, but much higher than in 1907, the index number for 1914 being 99, as compared with 100 for 1915, 101 for 1913 and 93 for 1907. Bituminous coal showed less change, standing at 103 in 1913 and 1914 and 101 in 1907 as compared with 100 for 1915.

As retail prices of dry goods have not been compiled prior to 1915 comparisons with previous years were not possible.

"To show the changes and results of changes in retail prices of food for a period of 26 years, from 1890 to 1915 inclusive, a table has been prepared from the figures appearing in preceding reports and bulletins on this subject, presenting the average price of each article and the average amount of each article that could be bought for \$1 each year of the period, except for two articles—sirloin steak and rib roast—for which satisfactory data were available only for the years 1907 to 1915. A second table shows the average price of each article and the quantity that could be bought for \$1 on December 15 of each year from 1912 to 1915 inclusive."

The number of pounds of round steak which could be bought for \$1.00 changed from 8.1 in 1890 to 4.4 in 1915, the quantity of bacon from 8.0 lbs. to 3.7 lbs., eggs from 4.8 doz. to 3.0 doz., butter 3.9 lbs. to 2.8 lbs., while the quantity of potatoes increased from 4.0 pecks to 4.4 pecks, and sugar from 14.5 lbs. to 15.2 lbs., and was as high as 18.2 lbs. for \$1.00 in 1913.

The Bulletin on Wholesale Prices gives the prices from month to month

**Wholesale
Prices of 300
Commodities
two per cent
higher in 1915
than in 1914**

or week to week during 1915 of 300 commodities on the most important markets in the United States, there being several series of quotations of prices. Index numbers are given for each

commodity by groups and a weighted average for all commodities back to 1890, the year 1915 being made the base period and therefore equal 100. On this basis the general index number for

1914 was 98, for 1913, 99, and 81 for 1890. For December, 1915, the index number was 105 as compared with 98 in January, 98 in July, 1914, and 99 in January, 1914.

Violent fluctuations were recorded during 1915 in the prices of many commodities, particularly drugs and chemicals and metals and metal products. In the former group prices as a whole declined during the first five months of the year, after which they rose sharply until the December average was 39 per cent above the average for January and 43 per cent above that for May. Metals and metal products advanced steadily in price throughout the year, except for slight recessions in August, September and October. The year closed with prices in this group 37 per cent above the January prices.

In the fuel and lighting group there was little change in prices during the first three months of the year, but marked declines occurred in the spring and early summer. In August prices again advanced, the increase continuing throughout the remainder of the year. The December average for this group was 11 per cent above that for January. Prices in the cloths and clothing group showed a steady advance during the entire year, the increase from January to December being more than 11 per cent.

Articles belonging to the foods group were, in the aggregate, highest in price in December and lowest in September. The increase between January and December in this group was nearly 4 per cent. Farm products averaged highest in May and lowest in January, September and November. The average for December was only slightly above that for January. In the remaining groups prices as a whole showed a falling tendency during the earlier part and a rising tendency during the latter part of 1915.

Comparing 1915 with 1914, an increase in average yearly prices was shown in six groups of commodities and a decrease in three groups. The group of commodities showing the greatest increase in average yearly prices was that

of metals and metal products, the increase in the group as a whole being slightly more than 11 per cent. In the drugs and chemicals group the increase between the two years was nearly 10 per cent and in the miscellaneous group nearly 9 per cent. The group of farm products showed a 2 per cent increase in the average for 1915 over that for 1914, while the food group and the cloths and clothing group each showed an increase of 1 per cent.

Of the three groups showing a decrease in average yearly prices in 1915 as compared with 1914, fuel and lighting decreased nearly 6 per cent, lumber

and building materials nearly 4 per cent, and housefurnishing goods nearly 1 per cent.

Both bulletins contain numerous charts showing the more significant movements in prices and also descriptions of the methods of calculating index numbers. In the regular article on prices in Canada and in other countries the index number of retail food prices is given up to recent date and also the index numbers of Bradstreet and Dun, showing the general movement in wholesale prices, the Bureau's index number of wholesale prices being issued only annually.

RECENT LEGAL DECISIONS AFFECTING LABOUR

Plaintiff secured on April 30, 1915, a first judgment against the defendant company for \$192 as an indemnity and for loss of time on account of an industrial accident. On July 23 following, he sued to have the judgment revised, claiming he was suffering a total incapacity for the balance of his life, and asked for \$1,000, being the capital of a rent representing 5 per cent of his year wages. The facts of the case were as follows: Through the accident, which occurred on May 28, 1914, the plaintiff's collar bone was broken, causing a partial incapacity, for which he secured compensation in a first action. Later on, an arthritis developed, "in the course of treatment and perhaps as a consequence of the treatment," and the plaintiff, an old man, was permanently incapacitated.

A workman may seek a second judgment if it is found his incapacity was permanent

The defendant company, besides denying the facts alleged by the plaintiff, claimed prescription. The Court, however, held that prescription counted only from the day the aggravation of the plaintiff's injury was discovered and that the action was taken within the time limit fixed by law. As the plaintiff was an old man and an invalid, and consequently had very little prospect of living

many years, but on the contrary might die at any time, it was further held that a large indemnity could not be allowed as a capital and that the plaintiff was entitled to a sum of \$209 as indemnity. Judgment was rendered accordingly, with costs against the defendant company. (*Quebec — Pelland v. Touzin Sand Company.*)

On November 14, 1914, the plaintiff, a workman, was sent to fetch the

A workman may retain possession of and attach an automobile on which he has made repairs

defendant's automobile, which had been damaged, on the Ahuntsic road (near Montreal), and made to the same repairs which amounted to \$176.10. He afterwards kept possession of the automobile and took

a writ of attachment on the same. The defendant denied that the plaintiff had any lien on the automobile. Mr. Justice Lamothe, of the Superior Court, maintained the writ, holding, among other things, that "according to law, the plaintiff had and still had the right of retaining the defendant's automobile, and that his claim constitutes a claim entitled to preference on the product of the sale, if there be any sale." (*Quebec—Morin v. Garbi.*)

THE LABOUR GAZETTE

DECEMBER, 1916

NOTES ON CURRENT MATTERS OF INDUSTRIAL INTEREST

Industrial activity during November was well maintained, and despite the approach of winter a fair amount of employment was afforded in industries which usually show a seasonal reduction in working force at this time. The labour shortage was continued; the completion of threshing in many parts of the West and of municipal work and other outside operations in various localities released a considerable number of men, but these were quickly absorbed in lumbering, mining and other industries. There were 14 new strikes in November as compared with two in October; eight of these were settled during the month. The Department's index number of wholesale prices rose to 198.4 for November as compared with 187.2 for the previous month and 158.7 for November, 1915. The increase in retail prices is indicated by the rise of the Department's weekly budget of staple foods from \$9.30 in October to \$10.05 in November. The usual summaries of the labour market, prices, strikes and changes in wages appear in the General Review. A special article deals with wage changes and disputes in coal mines, and the text of the recent Order-in-Council respecting the price of necessities of life is given in full.

**In this
Issue**

During November three Board reports affecting employees of electric railways at Windsor, Ont., and Quebec, and coal and railway companies in the Grand Lake district, New Brunswick, were received. A two-year agreement was reached

**Proceedings
under the In-
dustrial Dis-
putes Investi-
gation Act**

in the case of the Sandwich, Windsor and Amherstburg Railway and the Windsor and Tecumseh Railway, which is operated by the former company. No settlement was reached in the case of the coal and railway companies in New Brunswick, and while the employees of the Quebec Light, Heat and Power Company accepted the Board's report, no word had yet reached the Department from the company. Applications for Boards were received from the Dominion Coal Company in regard to a dispute with its coal handlers at St. John, N.B., which was settled by direct negotiation, the application being withdrawn, and from maintenance of way employees on the Canadian division of the Pere Marquette Railway. Steps towards the establishment of a Board in this latter case were being taken. The Department was advised that a satisfactory adjustment had been made of differences between the Canadian Pacific Railway Company and its maintenance of way employees, from whom an ap-

plication for a Board was received in September.

* * *

The report has recently come to hand of the Board of Investigation appointed in British Columbia to inquire into the matter of alleged improper holding and using of certificates of competency by coal miners in the Comox Colliery, operated by the Canadian Colliery at Cumberland, B.C. The members of the Board were the Honourable Mr. Justice Macdonald, Robert R. Hindmarch and Robert Henderson. Counsel appointed by the Provincial Department of Mines brought to the Board's attention two cases where, apparently, certificates of competency had been improperly used. In one case a coal miner was convicted of an infraction of the Coal Mines' Regulation Act and his certificate was cancelled by the Department of Mines. Before the certificate was cancelled, however, a substituted certificate was issued to a person of the same name on the ground that his original certificate had been lost and this substituted certificate at the time of the cancellation referred to was still outstanding. A miner of the name in question was found in one of the mines, and when summoned, gave evidence that he had never been convicted of any offence under the Coal Mines' Regulation Act; it soon became apparent that for a time two persons had worked under the same certificate and that the genuine miner was entitled to hold the substituted certificate. The evidence indicated the ease with which a person could obtain the certificate of a miner, then change his name to suit the circumstances and obtain employment in a coal mine without being duly qualified. A special rule passed in December, 1914, requiring coal miners to deposit their certificates with the owner before obtaining employment in a mine greatly lessens the opportunity for accomplishing this fraudulent purpose. In the second case it appeared that after a miner had been killed while working

in a mine, a substituted certificate was issued to a person of the same name on the ground that the original certificate had been lost. It was evident that fraud had been committed by a person familiar with the existence and contents of the original certificate and desirous of obtaining work in the colliery under false pretences. This substituted certificate was transmitted for cancellation with the Board's report with the recommendation that notification be given the different coal mines of the province. The Board thought it advisable to make some inquiry into the certificates of coal miners employed in the Comox Colliery, and it was found that all appeared to have certificates of competency; a number of miners were called and examined, and it was evident that they had all passed examination before. The Board, however, emphasized the desirability of care being exercised in these examinations to see that the applicant is sufficiently conversant with the English language to render his employment as a miner safe. A number of suggested amendments are submitted which, in the Board's opinion, will, if adopted, tend in the direction of safety, and will also enable accurate information to be available at all times as to the coal miners employed in each mine.

* * *

The compulsory arbitration of industrial disputes was the chief subject of

**Compulsory
Arbitration in
Australia and
the Canadian
Industrial
Disputes Act**

discussion at the November meeting of the New York Academy of Political Science. The representatives of labour—Peter Brady, Secretary of the Allied Printing Trades Council of New York, and W. S. Carter, President of the Brotherhood of Locomotive Firemen and Enginemen, made it clear that labour in the United States was opposed to compulsory arbitration. Commissioner William Lee Chambers of the Federal Board of Mediation and Conciliation was of the opinion that the time for the adoption by law of the principles of compulsory arbitration had not

come in the United States. Oscar S. Straus, chairman of the Public Service Commission of the first district of New York, held that while there has been increased government supervision of railroad operators, the tendency with respect to railroad operatives had been in the opposite direction; this he characterized as retrogressive. Professor Matthew B. Hammond, of the Ohio State Industrial Commission, who spent a year in Australia and New Zealand, emphasized the fact that compulsory arbitration is only a deterrent; it does not eliminate industrial disputes. The essential factor of the Australian Trade Board system was not compulsory arbitration, but the extension of government regulation of industry which had improved working conditions for employees and for employers had created standards which eliminated ruthless competition. Dr. Victor S. Clark, of the Carnegie Institute at Washington, formerly of the federal Department of Labour, pointed out that, in contrast to the Australian system, under the Canadian Industrial Disputes Investigation Act either the union or the employer can reject the findings of the public inquiry and resort to strike or lockout. He was of the opinion that Canadian trade unionists were not as strongly opposed to the Act as was believed in labour circles in the United States. The legislation, he thought, had the support of the employers and employees affected; while the Trades and Labour Congress had pronounced against the Act the trades represented were in the main not those to which the Act applies.

* * *

The Trades and Labour branch of the Ontario Government has opened a public employment bureau at Toronto, largely, it is understood, to meet the needs of the Imperial Munitions Board. Because of the inadequacy of the labour supply for munitions works, the Munitions Board urges that dilution of

labour be pressed forward without delay and the new bureau will assist in this work. The bureau took over the employment work of the Toronto Women's Emergency Corps. It will be remembered that the Trades and Labour Branch Act, enacted at the last session of the Ontario House, included among the duties of the new department the establishment and maintenance throughout Ontario of employment bureaus for obtaining suitable employment for work-people; the Toronto bureau will therefore probably be the first among several. Steps towards the establishment of public employment bureaus in the Prairie Provinces have also been taken. At a recent meeting at Winnipeg a movement was inaugurated with the object of securing legislation in the Provinces of Manitoba, Saskatchewan and Alberta to establish provincial employment bureaus at Winnipeg, Brandon, Moose Jaw, Saskatoon, Calgary, Edmonton and Lethbridge. It is proposed that each province shall bear the expense of maintaining its own bureau and that the City Council, the Grain Growers' Association and the Trades and Labour Council in each city shall be invited to appoint two of their number to constitute an advisory committee for each local office. The plan also involves the establishment of central offices at Winnipeg, Regina and Edmonton, which shall have supervision of all local bureaus.

Under date of November 16, the regulations made in the United Kingdom

Conservation of Food Supplies in the United Kingdom

under the Defence of the Realm Consolidation Act, 1914, which have been amended by various other Acts and Orders in Council, were

further amended. By this Order in Council the Board of Trade is given power to take special measures for the maintenance of the supply of any article of commerce important as being part

of the food supply or as being necessary for the wants of the public. The waste of any article to which the provisions are applied is forbidden, nor may any article be used for purposes other than those specified. The production and manufacture of commodities and the mode of their sale and distribution are also regulated in the same direction. The Board of Trade is empowered to make regulations with a view to preventing unreasonable inflation of price as the result of market operations and the Board may also fix prices. The Board of Trade may require that stocks of any article shall be placed at its disposal, the compensation being determined, in default of agreement, by arbitration. Information as to stocks on hand, contracts for supply, prices paid, cost of production and other matters may also be required, and officers of the Board of Trade are authorized to enter premises and make examinations of books. In special cases before exercising any of their powers the Board may, if they think it expedient, appoint persons to hold an inquiry as respect a particular article. The Board of Trade may also make arrangements with any other Government Department for the exercise by that Department on behalf of the Board of Trade of some of the powers of the Board granted in the Order.

INDUSTRIAL CONDITIONS DURING NOVEMBER 1916,

I.—GENERAL REVIEW

Industrial conditions were active during November, and to some extent the labour shortage noted

The Labour Market

last month was lessened by the release of a number of men who had

been engaged in threshing in the West and in municipal and other outside employments. These forces, however, were absorbed into the lumbering and mining industries and the effect upon the gen-

eral situation was comparatively slight. Activity in manufacturing was reflected in the large amount of overtime and in the number of extensions to plant reported. Railway transportation continued very active, but with inland navigation practically closed at the end of the month there was a falling off in water-borne traffic; activity was commencing, however, at Atlantic winter ports. Employment in metal and coal

mining continued at a maximum, though outputs in the latter industry were adversely affected by the cessation for a few days of operations in the Crow's Nest Pass coal mines. Building and construction owing to the favourable weather were fairly well maintained in many parts of the country; public works and railway construction remained quiet. Employment in sawmills was diminishing, most of the large mills closing down for the winter, but operations in the woods were being carried on with as large working forces as the scarcity of labour would permit.

The Toronto Civic Employment Bureau reported it had placed more men and boys during November than in any month in two years, the number of men placed showing an increase of 75 per cent over the previous month. In factories where the work was of a strenuous or unpleasant character the bureau reported the turn-over considerable. Large numbers of men were coming into the city and nearly all were looking for factory work.

During October there was a decrease in the demand for workers as compared with September as shown by reports from 119 employment bureaus. The number of vacancies notified to all offices showed a daily average of 1840.45 as compared with 2107.54 in September, and the number of persons placed, a daily average of 704.00 as compared with 822.42 in the preceding month. Figures as to vacancies notified for women and girls gave a daily average of 329.88 as compared with 348.27 in September, and the number placed, a daily average of 94.04 as compared with 125.84 in the previous month. Each of the five principal centres of labour distribution, Montreal, Toronto, Winni-

peg, Edmonton and Vancouver, showed a decrease in the demand for workers, the greatest declines being recorded at Montreal and Winnipeg.

The number of strikes reported to the Department in November was considerably in excess of the number reported in the previous month, there

Strikes

being 14 new disputes in November compared with two new disputes in October. Eight of the new disputes were settled, leaving six new disputes to be added to five carried over from the previous month and unadjusted, a total of eleven strikes unsettled at the end of November. Nineteen firms and approximately 5,920 employees were involved in the disputes which occurred in November compared with 22 firms and 129 employees involved in the six disputes which commenced prior to November 1. The large numbers affected in the November strikes are accounted for largely by strikes which took place in the Crow's Nest Pass coal fields. Other lines of industry affected were clothing, food and tobacco preparation and general transport.

Prices were again steeply upward, especially in grain, dairy products, fruits and vegetables, and in miscellaneous groceries, while textiles, hides,

Prices

leathers, boots and shoes, iron and steel were considerably higher. The average cost of a list of 29 staple foods in 60 cities in Canada was \$10.05 for November as compared with \$9.30 at the middle of October and \$8.02 in November, 1915. The index number of wholesale prices, based on the prices of 272 commodities, rose to 198.4 for November as compared with 187.2 for Oc-

tober, 158.7 for November, 1915, 137.5 for November, 1914, and 135.8 for November, 1913.

Many increases in wages took place during the month, chiefly in coal mining and transportation. The Nova Scotia Steel and Coal Company granted an advance of 12½ per cent to all underground employees and 10 per cent to all other employees at Sydney Mines, N.S., as a war bonus. The Acadia Coal Company granted an increase of 6 per cent to its employees at Westville, N.S. By an agreement which came into effect on October 1, the employees of the Western Fuel Company in the collieries at Nainaimo, B.C., received an advance of 5 per cent as a war bonus. On November 16 the wages of asbestos miners at Thetford Mines, Que., were increased from \$2.25 to \$2.50 per day for day work and from \$2.25 to \$2.75 for night work. The wages of 89 coal miners at Taylorton, Sask., were increased by 10 cents per ton and day men received an advance of 2½ cents per hour from November 1. In accordance with the finding of a Board of Conciliation and Investigation, the Grand Trunk Railway Company increased the wages of section foremen, extra gang foremen and their assistants by 20 cents per day, and the wages of section men by 25 cents per day, the changes dating from September 1. About 3,000 men were affected. A similar increase, effective on October 1, was granted by the Canadian Pacific Railway Company to employees on its Eastern lines. By an agreement between the Canadian Pacific Railway Company and the New Brunswick Railway Freight Handlers' Union, the wages of 600 freight handlers at St. John, N.B., were increased from 25 to 30 cents per hour, dating from November 20. On November 16, from 1,600 to 1,700 longshoremen at St. John, N.B.,

received an increase from 35 to 37½ cents per hour for the winter months. Employees of the Plymouth Cordage Company at Welland, Ont., were granted an advance of 7½ per cent in wages with additional bonuses, the increase dating from September 1. Civic firemen at North Vancouver, B.C., were advanced \$10 per month for each class, the new schedule being as follows: chief, \$100; captains, \$85; drivers, \$80; firemen, \$75 per month. The wages of labourers employed on civic works at Ottawa were increased from 25 to 27½ cents per hour. The wages of stationary engineers employed by the City of Ottawa were also advanced, as follows: roller men, from 33 to 40 cents per hour; boiler firers, from 28 to 33 cents; other men tending boilers, from 35 to 45 cents per hour. These changes date from July 1.

The total imports of merchandise for consumption in Canada for October, 1916, amounted to \$71,196,552, compared with \$68,796,262 in September, 1916, and \$39,515,144 in October, 1915, an increase of \$31,681,408. Domestic exports of merchandise for October, 1916, amounted to \$85,312,175, as compared with \$90,285,181 in September, 1916, and \$80,038,582 in October, 1915. For the ten months ended October 31, 1916, imports entered for consumption amounted to \$626,052,133, as compared with \$361,852,831 in 1915, while the exports for the same period amounted to \$852,110,279 and \$429,026,528 respectively. Increases in the products of the mine, animals and their produce and manufactures were shown, while decreases were noticed in the fisheries, the forest, agriculture and miscellaneous merchandise. The following table gives a convenient summary of Canadian imports entered for consumption and domestic exports:

**Changes in
Wages
and Hours**

**Trade
and Finance**

Bank clearings as indicated by returns from 16 cities showed an increase in October as compared with the previous month, the total rising from \$999,310,158 in October to \$1,139,380,419 in November, an increase of \$140,070,261 or 14.01 per cent. Grouping the returns by provinces increases were shown in all the provinces with the exception of New Brunswick and British Columbia. As compared with the corresponding month of last year bank clearings showed an increase amounting to \$248,095,718, or 27.83 per cent, the total for November, 1915, being \$891,284,701. As compared with November of last year there were gains in all the provinces. Of the larger cities, Montreal, Toronto, Winnipeg and Vancouver showed decided increases as compared with November last year.

Canadian revenue for the month of October, 1916, amounted to \$18,158,-

128.05, as compared with with \$14,440,-333.90, an increase of \$3,717,794.15. The expenditure on capital account for October, 1916, amounted to \$25,332,956.66, which comprised \$22,948,251.86 for war purposes, and \$2,384,704.80 for public works, including railways and canals.

The bank statement for October, 1916, showed the paid-up capital of the chartered banks of Canada to be \$113,030,-878, as compared with \$113,025,545 for the month of September, 1916. Deposits payable on demand for October amounted to \$489,230,234 as compared with \$454,148,049 for September, 1916. Notes in circulation for October, 1916, amounted to \$145,031,667 as compared with \$135,285,031 in August. Loans to cities, towns, municipalities and school districts during October amounted to \$37,613,530 as compared with \$38,708,745 during September, 1916.

II.—THE INDUSTRIES AND TRADES

Metals, machinery and conveyances.

—The activity noted in October was continued during November. Sydney reported the outputs of the large steel companies in that district about the same as in the previous month. One of the blast

furnaces was being remodelled and enlarged, and at Sydney Mines a second furnace was

nearly completed. At Halifax, rolling mills, bolt mills, shipbuilding and repairing plants and stove and furnace foundries were very active. Westville reported all plants engaged in the manufacture of iron and steel busy, with the exception of one plant which was closed down, but was expected to resume operations shortly. At Montreal all branches of iron and steel manufacturing were busy. Quebec reported that some 300 hands were laid off in the boat building industry upon the completion of some contracts, but at Sorel the various shipyards were actively engaged. Sherbrooke reported iron working establishments ac-

tive. At Toronto the metal and machinery trades were busy, with skilled labour much in demand, and at Hamilton the various branches of metal manufacturing were active. Niagara Falls and St. Catharines reported metal manufacturing active, and at the latter place a number of establishments were enlarging their plants. Brockville reported manufacturers of motors and stoves active. Rolling mills and foundries at Belleville were busy and at Galt some factories were adding to plant. Brantford reported the various engine shops and foundries well employed, with a shortage of skilled labour; manufacturers of farm implements were very active, one company having to send orders elsewhere on account of labour shortage. At Kitchener foundries and machinery manufacturers were active and some additions to plant were under way. Stratford reported farm implement manufacturers busy, and at Woodstock labour was reported scarce in all departments of stove and furnace foundries. At London rolling mills and thresher and traction en-

gine plants were working overtime. Foundries at St. Thomas were active, with a scarcity of mechanics. Chatham reported foundries and carriage and wagon factories working to capacity. Automobile factories at Windsor were busy, but handicapped somewhat by lack of natural gas as fuel for power. Port Arthur reported the Western Drydock Company active on the construction of ocean freight boats and repairs. At Winnipeg various branches of metal manufacturing were busy, and at Medicine Hat rolling mills and foundries were active, with a scarcity of labour. Calgary also reported active conditions in the various branches of metal manufacturing. Vancouver reported shipbuilding active and metal manufacturing fairly busy. At Victoria all branches of the shipbuilding industry were working to capacity, and at Prince Rupert work on the repairing section of the drydock was active.

Food, tobacco and liquors.—From practically all points activity was reported in most branches of the food, tobacco and liquors group, except in the manufacture of tobacco and liquors, which was quiet in some localities. The Acadia Sugar Refinery at Halifax and the Atlantic Sugar Company at St. John were busy, with orders sufficient to keep day and night staffs employed. In other parts of the Maritime Provinces flour and feed mills, meat packing establishments and biscuit and confectionery concerns were busy. Aerated water and brewery establishments, however, while busy in some localities, were reported quiet in others. Montreal reported all establishments engaged in food preparation, tobacco and liquors working at normal capacity, and tobacco and liquor firms at Quebec were very active making shipments to points along the St. Lawrence before the close of navigation. At St. Hyacinthe tobacco and confectionery establishments were busy. Toronto reported the provision trades steadily engaged, but cigar factories and breweries were quiet. Confectionery factories were running overtime three nights a week and fruit and vegetable canneries were

busy. Hamilton reported the provision trades active. At Niagara Falls the shredded wheat factory was busy, but canning factories were slackening. Peterborough reported flour and feed mills running day and night and meat packing houses very busy. At Kitchener the Dominion Sugar Company closed down owing to shortage of coal and shipped all beets to its factory at Chatham where natural gas is used; a number of the company's employees were transferred to Chatham and others secured work in local industries; cigar factories, breweries and distilleries were active. Guelph reported flour mills active, but cigar factories and breweries quiet, and at Stratford flour mills, confectioners and packing houses were busy; Chatham reported flour and feed mills and meat packing houses well employed. Winnipeg reported flour and feed mills active and other branches of food preparation busy. Flour mills at Brandon, Prince Albert and Saskatoon were running steadily. At Medicine Hat the Lake of the Woods mill was nearing completion and the Hedley Shaw and Ogilvie mills were working day and night. Calgary reported flour and feed mills and abattoirs active, but breweries and cigar factories were quiet. Vancouver reported cigarmaking very active, with a shortage of workmen; breweries were only fairly busy.

Textiles, carpets and cordage.—Halifax reported cotton mills busy, with difficulty in securing sufficient help to handle orders on hand, and at St. John the two cotton mills were running overtime. The rope works at Dartmouth were operating to full capacity. Montreal reported cotton mills overloaded with orders and taxed to capacity. The output of the Dominion Textile Company showed an increase of 10 per cent over the output in November, 1915. Quebec reported cotton factories working overtime, and Sherbrooke also reported activity in the manufacture of cottons and woollens. At St. Hyacinthe the Penman Manufacturing Company was running day and night and at Three Rivers the Wabasso Cotton Company

was busy. At Toronto textile trades were active, and at Hamilton cotton factories and knitting factories were busy. Kingston reported the cotton and hosiery mill working overtime. Knitting factories at Galt were working overtime and felt and twine factories at Kitchener were busy. Cotton and woollen spinning mills and one department of the carpet company at Guelph were working overtime. Woodstock and Stratford reported knitting mills active, and at the latter point woman workers were in demand. Knitting mills at London and St. Thomas were busy. Vancouver reported women employees in knitting factories fully employed, but twine and sail factories were quiet.

Clothing and laundering.—Activity in this group was well sustained. Halifax reported clothing trades fairly busy and at Truro and Moncton cap manufacturers reported business active, some factories at Truro working overtime. Steam laundries in the larger cities of the Maritime Provinces also reported active conditions. At Montreal clothing, shirt and fur factories were active, and similar factories at Quebec were behind with orders and working to full capacity. Sherbrooke, St. Hyacinthe, St. John and Itherville and Three Rivers reported these industries active.

At Toronto ready-made clothing, hat, cap and fur factories were all fully employed. Women's whitewear factories were busy, with help much in demand. Hamilton reported ready-made clothing, shirt and collar and whitewear factories active, and at Niagara Falls hat and corset factories were busy. Brockville and Galt reported ready-made clothing and hat factories active. At Kitchener robe and clothing factories were short of help and women's whitewear and shirt and collar factories were active. Ready-made clothing houses at London were busy.

Winnipeg reported one ready-made clothing firm active and another fairly well employed; shirt factories had laid off a number of women workers. Vancouver reported conditions in clothing factories varied; one establishment

making ready-made clothing was active, but other firms manufacturing the cheaper grades were not so busy. In some shirt factories employees were fully occupied, but in others they were on short time.

Pulp, paper and fibre.—Pulp and paper mills were reported very active throughout the Dominion. At St. John the pulp mills were working steadily day and night, and at Bathurst mills were also working day and night with capacity crews. The plant of the New Brunswick Pulp and Paper Company, which was destroyed by fire, was being rebuilt and was expected to be in operation by March 1. Offices of the pulp and paper mills at Montreal reported the mills very active, and Quebec City reported pulp and paper mills in that city and locality working to capacity. At Sherbrooke and Three Rivers pulp and paper mills were active and the E. B. Eddy Company at Hull and the J. R. Booth Company at Ottawa showed great activity, the Eddy Company being about to erect a new paper plant. The large mills at Meriton and Thorold, near St. Catharines, were very active. The Riordan Paper Company enlarged its plant and increased its working forces. Sault Ste. Marie reported pulp mills active, and Vancouver reported pulp mills on the coast very busy.

Printing, publishing, paper goods.—Conditions in the printing, publishing and paper goods group were fairly active in nearly all districts, paper box factories being particularly active on Christmas orders. Special Christmas and advertising editions by newspapers also added to activity among printers. Halifax and nearly all other points in the Maritime Provinces reported active conditions in printing and publishing, and at Newcastle skilled printers were in demand. Montreal reported conditions fair with all hands employed. Quebec reported business in the printing trades brisk. Other cities in Quebec reported printing trades active or fairly so. At Toronto printers, bookbinders and lithographers were well employed. Paper box factories were rushed on ac-

count of lack of help; toy and novelty firms were active. Hamilton also reported the printing and publishing business active, and at Niagara Falls, St. Catharines, Ottawa, Brockville and Belleville, printing trades were busy. Peterborough and Galt reported printing trades fairly busy, and at the latter place paper box manufacturers were very active and short of help. At London newspapers were very busy, special advertising causing extra work; job plants were active, and paper box factories were working overtime. Other cities in Western Ontario, such as St. Thomas, Chatham and Windsor reported the printing trades active. At Port Arthur and Fort William newspaper and job offices were quiet. Printing establishments and paper box factories at Winnipeg were busy. At Medicine Hat one newspaper discontinued business, throwing a few people out of employment. Calgary reported the printing business active, and at Edmonton some establishments were working overtime, with a demand for linotype operators. At Vancouver newspapers were busy, but job plants were quiet. Conditions at Victoria and Prince Rupert were fair.

Woodworking and furniture.—Woodworking establishments in many localities were actively engaged on contracts for boxes and other work outside of regular lines. In the Maritime Provinces most localities reported sash and door factories active or fairly active, and in one or two places factories were working overtime; Newcastle reported skilled labour for work in these factories hard to secure. Woodworking and furniture factories were reported fairly well engaged at Montreal and active at Quebec City. Furniture and chair factories at Sherbrooke were busy, and at St. Hyacinthe were working overtime. Other points in Quebec Province also reported activity in this branch of manufacture. At Toronto woodworkers were actively engaged and piano manufacturers were busy, with skilled workmen in demand. All branches of woodworking were reported active at Hamilton, Niagara Falls and St. Catharines. Brockville report-

ed two factories busy on builders' supplies. At Kingston sash and door factories were fairly well engaged, but were gradually finishing orders with the close of the building season. At Kitchener furniture factories were working overtime, broom and woodenware factories were busy and the organ and piano company active. Stratford reported furniture factories busy, with a shortage of help; some factories were employing girls. At Woodstock there was a steady demand for men in chair and furniture factories and for skilled labour in piano and organ factories. London reported sash, door and planing mills busy, and a piano company active but short of help. The large woodworking factories at Chatham were working overtime. Sash and door factories in several other parts of the province were actively engaged, though at Port Arthur this branch of manufacturing was quiet. Winnipeg reported sash and door factories fairly active and at Brandon these establishments were busy, one firm advertising for cabinet makers. At Medicine Hat one firm reported business very good, with skilled labour scarce; another company reported business fair. Woodworking establishments at Calgary and Edmonton were well employed.

Leather, boots, shoes, rubber.—Halifax reported boot and shoe workers active and leather workers busy. St. John reported tanneries busy and at Fredericton boot and shoe factories were active. Montreal reported tanneries and boot and shoe factories busy, with difficulty in securing workmen. Other branches of leather and rubber manufacture were fairly well engaged. Some of the large sole leather tanneries were reported working below capacity through inability to get sufficient help. Sole leather, green hides and calfskin advanced in price. Quebec reported boot and shoe factories very busy, and at St. Hyacinthe tanneries and boot and shoe factories were very active, with overtime in some branches. Three Rivers reported the Tebbutt Shoe and Leather Company, employing over 300 hands, active, nearly all hands working overtime. A new

boot and shoe factory, employing about 35 hands, was started at Sorel. At Toronto leather and boot and shoe workers had an active month, with a shortage of labour in some branches. Hamilton reported boot and shoe and trunk and bag factories active, and at Niagara Falls a factory making shoe parts was very busy. Tanneries and manufacturers of rubber footwear at St. Catharines were very active; at Kingston tanneries were working overtime. At Galt, Brantford and Kitchener, shoe factories were busy, one factory at Kitchener working overtime and two others were building additions to plant. The tannery at London and the boot and shoe factories were busy; shoe factories at St. Thomas were active.

At Winnipeg tanneries reported business good and other branches of leather manufacture were well employed. Calgary reported manufacturers of leather goods active, and at Hamilton saddlers were busy. Vancouver reported boot and shoe factories active.

Clay, glass and stone.—Halifax reported granite and stone works active, and at Moncton brick, tile and sewer pipe works were fairly busy. Montreal reported stone and granite works quiet, brick, tile and cement works fair, and glass works quiet. At Sherbrooke cut stone and granite establishments were quiet but brick and lime works were active. Potteries at St. John and Iberville worked full time. Hamilton reported the clay, glass and stone group of industries active. Brickyards at St. Catharines were busy and the Canada Cement Works near Belleville was active and expected to run all winter. Kitchener reported marble works busy, brickyards fair and tile and sewer pipe manufacturers busy. At some other points the brickmaking season was over. Medicine Hat reported brickmaking slack, but a stoneware company was active. Calgary reported brick, tile and sewer pipe works active, but cement and lime establishments quiet.

Paints, oils, chemicals, explosives.—Halifax reported paint factories very busy with a considerable volume of or-

ders for export to the West Indies and South America. The Sydney Tar and Chemical Company was busy. At Montreal paint manufacturers were well employed, though short of help. Sherbrooke reported activity in the manufacture of acids. At Hamilton and Galt soap manufacturers were active, and at Niagara Falls the Cyanimid Company, manufacturers of fertilizer, was very busy. Brantford reported starch and varnish factories busy. Perfume and extract manufacturers at Windsor were active. At Regina the Imperial Oil Company's plant was busy, and at Medicine Hat the linseed oil mills commenced operations after being closed down for some time. Calgary reported oil refineries quiet, but some activity in soap manufacture.

Water, light and power.—Nearly all cities reported activity in light, heat and power, increased demands being made on the services in many instances on account of activity in manufacturing and extensions to plant; in some cases a scarcity of labour was reported. In a few localities the approach of winter occasioned a slackening of work in extension of gas mains. Points in the Maritime Provinces reported conditions active, and Montreal reported that the Shawinigan Water and Power Company was just able to keep up to the demand for power; the company was seeking additional power to meet the demands from manufacturers. Power and light companies were active in the different Ontario cities. At Niagara Falls the Ontario Hydro Electric Commission completed the purchase of a right of way for the Chippewa-Queenstown power canal, upon which work was expected to commence in the spring. Kitchener reported the peak load of the Power Commission still going up and additional power being arranged for. Chatham reported the extension of water mains delayed by lack of labour and light and power companies were extending their services. At Windsor it was impossible to supply the demand for natural gas. At Medicine Hat there was considerable activity in the laying of

water mains and more labour was required. At Calgary a break in the gas mains for a time seriously interfered with operations in printing offices and other plants using gas for fuel and power.

Activity in transportation was well maintained, though there was some falling off in water-borne traffic. Gross earnings of the Canadian Pacific Railway for October, 1916, were \$13,237,086, as compared with \$13,443,214 in the same month of 1915, a decrease of \$206,128. The same figures for the Grand Trunk Railway were \$4,618,000 and \$3,591,305, an increase of \$1,026,695. Halifax reported active conditions, and at Sydney, in order to prevent freight congestion on the Sydney end of the Intercolonial Railway, trains were being run seven days a week. Moncton reported that both freight and passenger traffic was above normal for the season, and the regular train service was largely supplemented by specials, many extra crews being maintained; a marked shortage of freight cars interfered with shipments of produce and lumber. Very active conditions obtained in the railway shops where, in addition to the regular repairs, 50 new standard freight vans and 175 remodelled pulp cars were being turned out. Newcastle reported railways busy, crews working much overtime. At Montreal railways were fully employed though handicapped by a lack of cars. At Quebec railways were reducing their suburban trains and cutting down passenger service to the winter schedule. At Toronto railway traffic was active, with a considerable shortage of labour. A strike of freight handlers interfered to some extent with shipments during the month. At Hamilton and Niagara Falls railway traffic was reported active. Brantford reported a shortage of help on railways and a lack of freight cars. Repair shops of the Grand Trunk Company at Stratford were very active; night gangs were employed and a shortage of help existed, a number of girls

and women being employed. St. Thomas reported the Michigan Central, Wabash and Pere Marquette lines active. At Chatham agents were compelled to refuse some freight owing to car shortage. Western districts reported railways active with car shortages in some localities.

Navigation had practically ceased on the Great Lakes and inland waters, but at the winter ports fairly active conditions prevailed. Halifax reported work for 'longshoremen, while quiet, improved over the previous month. At Sydney shipping fell off owing to the closing of the St. Lawrence trade, but was still fairly heavy to ports in the Maritime Provinces. Charlottetown reported work along the dock active, many vessels loading produce. The winter port of St. John was open and about 300 'longshoremen were employed; a large quantity of grain was stored in the Canadian Pacific Railway elevator ready for shipment. Newcastle reported navigation in the Miramichi River drawing to a close, though the river was still open; nearly all small steamers were laid up, but a few were loading lumber for the United Kingdom. The number of boats entering Montreal harbour during November was less than in the same month in 1915, but the cargo tonnage was greater. At Quebec boats and schooners were making their last trip or were being laid up for the winter. Port Arthur reported 'longshore work very active. Work for 'longshoremen at Prince Rupert was improved owing to increased shipments of ore. Miscellaneous lines of transport, such as teaming, transfers, garages and liveries, were reported active in nearly all centres.

There was no abatement of the activity reported in October, and outputs in a number of instances were increased. Sherbrooke reported active conditions in copper, asbestos and chrome iron mining. In the Cobalt, Porcupine and Kirkland Lake camps, mines were working to capacity and shipments were greatly increased over

Transportation

Mining

those of last year. At Rossland 250 men working in the gold mines of the Canadian Consolidated Company were sent to copper mines of the company owing to the high price obtaining for copper. The smelter of this company at Trail was still running to full capacity and adding to plant; some shortage of coke was reported.

Coal mining was active in all districts, though some cessation of work in the Crow's Nest Pass district lessened outputs in most collieries. Numerous wage changes and trade disputes occurred in a number of fields, particulars of which are given in a special article in this issue. Sydney reported the output of coal 375,000 tons in October as against 360,000 in September. At Westville the mines were operating full time, and the demand still exceeded the supply.

In the Lethbridge and Crow's Nest Pass districts operations in nearly all mines were suspended for several days pending the outcome of a dispute between the unions comprised in District 18 of the United Mine Workers of America and the Western Coal Operators' Association and other owners in regard to increased wages. Work was resumed in practically all mines by the end of the month on the appointment of an officer of the Department of Labour to investigate the situation. Full particulars regarding this dispute will be found elsewhere in this issue in a special article entitled "Wage Changes and Disputes in the Coal Mining Industry." Earth disturbances which occurred in one of the collieries at Coal Creek resulted in the death of a miner and damaged the mine to such an extent that mining operations could not be resumed. Officials of the Provincial Mines Department were investigating the cause of the disturbances. Edmonton reported coal mining active, with a demand for labour. Mines on Vancouver Island were working steadily.

Building operations throughout the Dominion continued fair for the season, and in some localities

Building and Construction

where the building of dwellings had come to a conclusion, factory extensions or new buildings provided a considerable volume of employment. Points in the Maritime Provinces reported fair activity in building, and at Montreal difficulty was reported in securing a sufficient number of building tradesmen for the different buildings under construction. Sherbrooke reported building active in the erection of extensions to industrial plants and fair in house building. At Toronto building was active for the season and several large contracts were expected to keep inside trades busy during the winter. At Niagara Falls building continued active both in the construction of dwellings and additions to industrial plants; large numbers of men were working on the nickel refinery at Port Colborne. At London, Chatham and Windsor, building was reported very active, but in other Ontario cities work was finished for the season. Port Arthur reported about 200 men engaged in the building of elevators and commercial buildings.

Winnipeg reported building quiet, but at Brandon operations were active and labour scarce. Medicine Hat reported some building going on and tradesmen scarce, and at Lethbridge a fair amount of activity was reported in rural districts. Calgary reported building fairly active, and at Edmonton there was a fair demand for building tradesmen. At Vancouver building was improved, but at New Westminster quiet. At Trail there was considerable building in the construction of dwellings and additions to plant.

Railway and other construction was quiet, though some activity was noticeable in a few localities. At Halifax work progressed favourably at the ocean terminals and the Furness-Withy pier. At St. John the preliminary work for the construction of a new shed for a steamship berth was commenced; dredg-

ing in the harbour was about completed and everything was in readiness for winter port business; a grain elevator was also under construction and a spur line was being laid to connect with the Government Railway. Moncton reported activity in bridge construction. St. Catharines reported work on the Welland canal dull and likely to be discontinued. Quebec reported that work had been re-opened on the railway from St. Joachim to Murray Bay and was progressing on some sections.

Prince Albert reported the grade for the new Grand Trunk Pacific station and yards completed, but it was expected the laying of steel would not be completed before spring. The construction of the station was giving employment to a number of men. Victoria reported the breakwater off the harbour nearly completed.

Active conditions prevailed in nearly all lumbering districts, and in many localities the winter cut

Lumbering

was expected to be a large one, though this depended largely on the supply of labour available. Westville reported the lumbering industry somewhat quiet, but that indications pointed to a very active winter; camps were being erected and crews advertised for; Truro reported lumbermen busy and help scarce. St. John reported that the estimated cut upon the Nashwaak lands of the Nashwaak Pulp and Paper Company during the winter would be 2,000,000 feet, an increase of 25 per cent over last winter's cut; three mills were running and employing about 350 men. Newcastle reported large crews in the woods and a scarcity of experienced woodmen; work in the mills was suspended for the winter. At Quebec saw and shingle mills had about finished for the season and nearly all the men formerly employed in the mills had gone to the woods, where wage rates were reported from \$10 to \$15 per month higher than last year. At

Hull, Gilmour & Hughson's mill was closed for the season and most of the employees had gone to the camps. Port Arthur reported that a number of camps were opened in the district for the cutting of pulpwood and men were being advertised for. At Prince Albert lumber companies were having difficulty in obtaining enough men for the woods and for the first time had to send agents to the prairie sections to get men; the Big River lumber mill was closed for the winter, but the Prince Albert Lumber Company's mill was still running; men and supplies were being shipped to the camps. Edmonton reported camp crews were being assembled for winter operations north of the city. Nelson reported sawmills running full time and a demand for lumber. At New Westminster sawmills were busy, but had difficulty in getting cars for shipments. Sawmills in the Nanaimo district were running steadily but not to capacity.

Farming operations were becoming quieter with the approach of winter, though in the West

Agriculture

threshing was still going on in some localities. In the Niagara district the fruit growing season was over and agricultural operations were comparatively quiet. Chatham reported more fall plowing than in the previous year and that farmers had united and were asking an advance of from \$5 to \$7 per ton, free seed and freight for growing sugar beets for 1917. Winnipeg reported that much threshing remained to be done; work was steady throughout the month, but more help was needed. Saskatoon reported threshing almost completed and labourers were returning East. Medicine Hat reported threshing progressing favourably, but about 30 per cent unfinished. At Lethbridge a great many farmers had finished threshing and crews had left the district, some for the lumber camps and others for the United States. Calgary reported activity in threshing; at Edmonton threshing was almost completed.

Sydney reported that halibut were caught in fairly large numbers in the early part of the month, but at Charlottetown the fishing season was almost closed. At Port Arthur herring fishing was active and good catches were reported. Prince Albert reported that fishing in the northern lakes was commencing and at Edmonton a large num-

Fishing

ber of commercial licenses for lake fishing were taken out. At Prince Rupert weather conditions had a noticeable effect on fishing, storms keeping nearly all boats in port; the supply was not equal to the demand and the price paid to fishermen advanced at times to 14 cents per pound. Nanaimo reported the herring season had commenced but was quiet. Whale fishing on the west coast had practically closed for the season.

III.—LABOUR AND INDUSTRY IN THE PROVINCES

Nova Scotia

At Halifax rolling mills, skate factory and bolt mills were very active, with orders booked for some time ahead; shipbuilding and repairing plants were busy; there was one new sailing vessel under construction but repair work to larger vessels afforded much of the employment; stove and furnace foundries were active and the shortage of help was marked; sheet metal workers were active. In foods the Acadia Sugar Refinery was busy with night and day staffs employed; baking and confectionery houses were very active, and were offering higher wages as an inducement to secure sufficient female help; aerated water factories reported business normal but expected to be very busy during the next month with orders for Christmas. The cotton mill was also having trouble in securing sufficient help, both male and female; the rope works at Dartmouth were running to full capacity. Work in clothing trades kept up fairly well, but the demand was not as good as in former seasons; steam laundries were working overtime. All branches of the printing trades were active and paper box factories were very active on Christmas orders. Sash and planing mills were over the rush period, with enough work on hand to keep their regular help employed. The boot and shoe trade had a good volume of business, and factory workers were active; harness and leather workers were also busy. The

paint works was very busy on orders for export to the West Indies and South America. All branches of transportation work were active, with the exception of 'longshore work, which was quiet though showing an improvement over last month. Dwelling house construction continued active and work progressed favourably on the new ocean terminals and the Furness-Withy pier.

At Sydney there was still a shortage of skilled men in the large industries, and in some of the smaller ones. One of the Sydney blast furnaces was being remodelled and enlarged, and at Sydney Mines the second furnace was half completed, and new coke ovens were being built. Through the efforts of the Provincial Workmen's Association surface men and underground employees at Sydney Mines received increases of 10 and 12½ per cent respectively. The output of pig iron and steel and of pig iron and rolling mills products was well maintained. The A. C. Thompson Company, makers of stoves, steel ranges, hot water and hot air furnaces, and employing 50 workmen, reported business very active and were working overtime; sheet metal firms reported business good. Sash, door and planing mills, employing altogether 80 men, were busy. Railway transportation was very heavy, and in order to prevent a congestion of traffic on the Sydney end of the Intercolonial Railway trains were being run seven days in the week; Reid's Shopping Company, North Sydney, employed 25 'long-

shoremen; shipping fell off considerably owing to the closing of the St. Lawrence trade, but was still fairly heavy to ports in the Maritime Provinces; coal haulers were well employed, and the number of these was increased, both in Sydney and North Sydney. In mining the output of coal was 375,000 tons in October compared with 360,000 tons in September; the coke output for the month was 60,000 tons; shipments of iron ore and limestone from Wabana were fairly heavy, but were soon to be discontinued until the opening of navigation in 1917. Fourteen houses were being built in the district, but unfavourable weather interfered with street paving. In fishing, halibut were caught in fairly large numbers in the early part of the month; the Cross Fertilizing Company, which usually employs about 40 men, had 60 employees last month.

Westville reported that there was still a demand for labour and that wages of labourers had advanced to \$2.50 per day. All plants engaged in the steel industry were working day and night; the Albion Machine Company at Stellarton, however, was closed down owing to some alleged difficulty in the quality of its product but expected to resume operations shortly. Flour and feed mills worked continuously. Pictou County Dairy Company reported a fair month's business, though somewhat handicapped by the scarcity of cream; the Francis Drake Company, manufacturers of aerated waters, reported a considerably larger volume of business than for the corresponding period of last year. Newspaper and job printing continued normal. All woodworking mills worked steadily during the month, and the Standard Clay and Product Company also worked to capacity. The Pictou County Electric Company, which furnishes practically all the light and power used in the district, and operates an electric railway from Westville to Trenton, had an exceedingly busy month, although handicapped by the scarcity of labour. Railway traffic, both steam and electric, was extremely heavy. The different coal mines in the district oper-

ated full time, but the demand for coal still largely exceeded the supply, all operators having several months' output contracted for; about 53,000 tons of coal were raised in the district during the month. The lumbering industry was somewhat quiet, but indications pointed to a very active winter; camps were being erected and crews advertised for. Owing to the high wages and cost of material, municipal work was curtailed as much as possible.

At Truro steel employees worked two shifts; woollen workers were very busy and woodworkers were steadily employed. Railway operatives were exceedingly busy. Cap makers were very busy, some working overtime. Lumbermen were busy with help scarce, and unskilled labour was in demand.

Prince Edward Island

At Charlottetown two meat packing companies employing together about 100 men were busy. Heavy shipments of produce, chiefly potatoes, provided a considerable volume of employment along the docks.

New Brunswick

St. John reported the St. John Milling Company had installed a second 50-barrel milling unit, giving the mill a capacity of 100 barrels of flour per day; the Atlantic Sugar Refinery had received 2,600 tons of sugar from Barbadoes and the West Indies, and was working day and night on orders for the British Government; the two breweries were active. The two cotton mills were working overtime to supply the demand. The pulp mill was working steadily night and day. Newspaper, job printing and binding establishments were well employed; the D. F. Brown Paper Box Company employing about 40 girls was busy. In the woodwork group the sash, door and planing mills were busy, one company working overtime; the brush factories were running full time and new orders were being received daily. The Dominion Tanneries, Limited, Woodstock, which recently bought the J. D.

Dickenson tannery, was securing a large supply of hides, and expected to be working to capacity in a short time; about 50 men being employed. C. H. Peters Son's tannery was employing about 12 hands. Transportation was active; the winter port has opened and five steamers were loading; the number of longshoremen employed was about 300; work was begun on a new shipping shed and the Canadian Pacific Railway was laying more track to the wharf; dredging in the harbour was about completed and everything was in readiness for the winter port business. The Nashwaak Pulp and Paper Company was planning an increase in the cut over last winter of 25 per cent; this will mean larger crews in the woods with increased wages; the mills were employing about 350 men. The Civic Works Department was busy paving several of the principal streets and 50 men in the employ of a contractor were also engaged in street paving; the water and sewerage department was employing about 200 men renewing old mains and sewers. Work was begun on the erection of a grain elevator at Reid's Point; the old buildings were removed and a spur was laid to connect with the Canadian Government Railway tracks.

At Moncton the metals, machinery and conveyance group was reported active in some branches and fair in others, and the food, tobacco and liquors group was active in all lines. Woollens, hosiery, underwear and knitted goods factories were steadily engaged. With the approach of the slack season the woodworking factories were planning to keep their staffs employed making up stock. Steam railways were very active; both freight and passenger traffic continuing heavier than normal for the season of the year and the regular train service was so largely supplemented by "specials" that steady employment was afforded to extra train crews; a marked shortage of freight cars in many parts of the road interfered seriously with shipments; very active conditions also prevailed in the railway shops where in addition to a large amount of general repair work under

way, 50 new freight vans and 175 remodelled pulp cars were turned out. The old cotton mill purchased by J. A. Morin, Limited, was being remodelled and prepared for the installation of machinery; when completed it will be one of the largest biscuit factories in the province; the Engineers and Contractors Company had 40 men employed on the work of completing the piers of the new Moncton-Coverdale bridge; the superstructure is not likely to be started before spring. Lumber camps and sawmills were quiet.

At Newcastle unskilled labour was only fairly well employed, but skilled labour was in demand. Carriage builders continued busy. Flour mills were also active with the season's grinding. The pulp mill at Bathurst was working day and night with capacity crews. In Millerton, work on the re-erection of the plant of the New Brunswick Pulp and Paper Company, which was destroyed by fire in January, 1914, was expected to start early in December, the mill to be ready for operation by March 1, 1917; orders sufficient to keep the mill running night and day for one year have already been taken. Printing establishments showed increased activity, but it was impossible to procure skilled printers in the locality. Sash, door and planing factories were especially active and skilled labour for this industry was in demand. Harness and horse goods manufacturers were busy with full staffs employed. Work on the new electric plant at Chatham was progressing favourably. Steam railway employees were exceptionally busy and there was much overtime work; water transportation, however, was almost suspended. In lumbering large crews were employed in the woods and the men were being engaged for this work; a scarcity of experienced woodsmen was reported; work in the sawmills has been suspended for the winter. Fishermen were repairing their nets and other gear, in preparation for smelt fishing which opened on December 1.

At Fredericton employment slackened to some extent towards the end of the

month; this was more noticeable in the building trades, especially in the case of painters and masons. Men were being hired for the lumber camps and there was a good demand for this class of labour. A company with large capital has been organized to take over and operate the Lake George antimony mines.

Quebec

Montreal reported that labour was at a premium in most industries and for this reason some plants were unable to work to capacity. The iron market was quiet through the month with advancing prices, but most of the industries depending on iron were very busy, and nearly all the steel industries were very active; the Canadian Vickers were beginning work on two steel freighters of 7,000 tons each for Norway and have launched a million dollar dredge for the Canadian Government; the company expects its shipbuilding activity to continue long after the war. All industries engaged in the manufacture of foods, tobaccos and liquors maintained normal activity during the month. Textile mills were taxed to capacity; the Dominion Textiles, employing about 3,500 hands, 60 to 65 per cent of whom are woman workers, was very busy, and the output for November of the Montreal mills showed an increase of 10 per cent over that of the corresponding month of 1915, and dry goods orders were increased despite advancing prices; cotton mills were overloaded with orders; woollen prices also advanced and a brisk demand in all classes of woollens kept the mills busy; there was great activity in the making of the poor classes of tweeds and serges as the advanced prices brought a heavier demand for these lines. Canadian Convertors, manufacturers of women's whitewear, were very busy; this firm, which employs between 400 and 450 women and girls, slightly increased its staff during November and was calling for more hands; an establishment working on blouses, employing about 400 woman workers, reported a large increase in business and a lack of

hands. Fur manufacturers had good orders in hand, but deliveries were expected to be delayed owing to shortage of factory help; there was marked activity in the wholesale fur trade and many furriers were refusing further orders. Montreal offices of pulp and paper mills reported the mills very active. The large sole leather tanneries were reported to be working at only about 65 per cent of their capacity because of the inadequate supply of labour. Paint plants were well employed, though short of help. The Shawinigan Water and Power Company was keeping up to demand with difficulty and was asking for a further supply of power; this company has spent \$1,500,000 in new plants during the year; the new chemical plant has begun work but will not be operating fully until the first of the year; the plant for the manufacture of electrodes is a development of the year as well, and the St. Maurice Paper Company was expected to take more power as soon as its construction is finished; the Shawinigan Company has also built 100 dwellings for employees. Railway transportation was heavy, although the lack of cars has been a handicap to industry; there were 750 trips of lake boats into the harbour during the last month of navigation, 84 less than the same month of 1915, but the cargo tonnage was greater. There was a considerable amount of building and construction work under way in the city, and some difficulty was being experienced in securing labour. In public employment it may be noted that the City of Montreal has been ordered by the Superior Court to open up a new street 100 feet wide from Cote de Liesse road to Snowdon Junction, to macadamize it and to build sidewalks to fulfil the agreement made when Notre Dame de Grace and Cote des Neiges were annexed to the city.

At Quebec there was considerable activity in the metals and machinery group except in boat building, some 300 hands being laid off in this industry; in the iron shipbuilding and repairing line business was very brisk, overtime being

the rule. In tobaccos and liquors there was special activity as supplies were being forwarded for winter by coastwise vessels before the close of navigation. In the cotton factories much overtime was worked; all clothing, furs, gloves and whitewear factories were behind with orders and were working to full capacity. In pulp and paper mills capacity production was the rule. In the printing trade business was brisk, but there was a shrinkage in the number of sheets, usually issued by the newspapers, attributed to shortage or high price of paper. Sash and planing mills and box factories were busy. Boot and shoe factories, tanners and curriers were very active; a dispute affecting about eight employees in a shoe factory was settled by reference to arbitration. Employment in shipping was declining as boats were being laid up for the winter. The stone quarries at Beauport and Chateau Richer were still working to full capacity. Saw and shingle mills in the district had almost finished for the season and nearly all the men available had gone to the lumber camps; rates of wages were from \$10 to \$15 per month higher than last year. Municipal work on roads and pavements and provincial road building has closed for this season. Construction work upon the railway from St. Joachim to Murray Bay has been resumed.

At Sherbrooke labour continued in demand. Lumbermen were complaining they could not get men for the woods, and there was also a shortage of building tradesmen, notwithstanding the approach of winter. Some sawmills were closed down for the winter. Railway traffic was very heavy and all roads reported a shortage of cars. Asbestos, chrome iron and copper mining were very brisk, and operators were calling for about 500 workmen.

At St. Hyacinthe, in machine shops, automobile repair shops, agricultural implement factories and all iron works, active conditions prevailed, and in some cases overtime had to be worked. The flour mill ran full time and the tobacco industry was very active; the

distillery was busy and made heavy shipments. The Penman factory was working night and day shifts. Clothing factories were very active, with work ahead for several months. The paper box factory was active and sash, door and planing mills were working day and night; the chair factory was active, but organ factories were only fairly busy. Boot and shoe factories were making large shipments. Building stonecutters were quiet, but stone monument work was busy. There was much activity on railways, all employees working full time. Building was quiet; city work on streets was practically at an end, but city labourers readily found employment in other lines.

Three Rivers reported that the Canada Iron Foundries Company was still busy on the construction of extensions to its plant and was keeping its 375 regular men working full time. The Wabasso Cotton Company was employing about 1,400 hands and keeping them busy full time and the Diamond Whitewear Company had a few hundred hands at work. The three glove factories, employing together nearly 300 hands, were active. The Wayagamaack Pulp and Paper Company maintained its activity and the sash, door and planing mills and the chair factory were also busy. In the Tebbutt Shoe and Leather Company, which employs 325 hands, much overtime was worked. The Three Rivers Traction Company has completed its line between the Cap de la Madeleine and Three Rivers and cars were running. Several dwellings and three large school buildings were under construction.

Hull reported that the Matthews-Blackwell Company would employ more men and that the E. B. Eddy Company would build a new paper factory. The Gilmour & Hughson Company's sawmill was closed for the season, most of the employees having been sent to the firm's lumber camps.

At St. John's and Iberville building was quiet. Labour was in demand, however, at the Cluett, Peabody Company's factory, and printing tradesmen and employees in the potteries worked full time.

Navigation was practically closed, but railway employees reported a good month.

In Sorel the number of hands in the shipyards was considerably increased, as is usual at this time of the year. A new shoe factory was employing from 30 to 35 hands. The Canada Steamship Lines Company's shipyards was very active, employing about 250 hands, and more men will be employed during the winter months. The Government's shipyard was busy; a number of vessels will be repaired during the winter, and from 900 to 1,000 men will likely be employed; wages have been increased 25 cents per day for the journeymen, and other employees were receiving an increase of some six per cent. At the shipyard of the Sincennes-McNaught Lines Company about 200 men were at work; this yard was busier than in November of last year and more men were expected to be employed during the winter. Other small shipyards were also busy. The foundry and steel works of Beauchemin and Son have been employing between 75 and 125 men during the year; in November the number of men employed was 75. At the tannery and shoe factory of Messrs. Duhamel Brothers about 80 men were employed in November. The mica company was erecting a large building and was employing some 700 woman workers and a few men.

Ontario

At Toronto the shortage of labour continued serious; with cold weather there was the usual influx of unskilled workers from the outlying sections of the province, but they had no difficulty in finding employment. The metal and machinery trades were busy, with skilled labour much in demand; shipbuilding showed increasing activity; the Polson Iron Works has been awarded contracts for the construction of two steel freighters of approximately 3,000 tons capacity, and two of 4,250 tons capacity for Norway; Baines and Packover, iron and steel manufacturers, have secured a site in the Ashbridge Marsh industrial dis-

trict for the erection of a large steel plant. The provisions trades were generally steady; bakers, however, had a considerable falling off in trade as many families were baking at home owing to the increase in the price of bread; cigar-makers and brewery employees were quiet. Confectionery factories were still busy with overtime three times a week; fruit and vegetable canning establishments were busy, especially in the extracts department. Knitting mills were active, one firm running a ten-hour day; carpet factories were busy, but tent factories quiet. Women employed in factories making shirts, collars, caps and women's whitewear had steady employment, and difficulty was experienced in getting sufficient help; Keen's Manufacturing Company, Limited, where about 375 women were employed on whitewear reported no difficulty in getting and keeping competent help; among straw hat workers there was a tendency towards shorter hours and increased wages. Garment workers had a slack month and about one-quarter of the staff used in the busy season was engaged. Binderries, stationers and engraving firms continued busy and paper box factories were rushed because of lack of help. Toy and novelty firms were active. Woodwork and furniture was active; the Toronto Furniture Company, which has gone extensively into the manufacture of boxes, has received a contract for 400,000 boxes, the last of which are to be delivered next summer; the piano trade was busy; several manufacturers had contracts for some months ahead, but were finding difficulty in securing skilled workmen. Leather workers and boot and shoe workers had an active month. Railway traffic was active with a considerable shortage of labour which caused delay in deliveries. A strike of freight handlers on the Canadian Pacific Railway affected freight shipments for a time. The gross receipts of the Toronto Railway Company for October were \$487,954, as compared with \$461,682 in October, 1915. The agreement of the Toronto Railway Company and its employees expires next spring

and the men were preparing to put forward a demand for a reduction of hours and an increase in wages. The chauffeurs have organized a union in affiliation with the American Federation of Labour. Building was active for the season and some large contracts were given out which will keep indoor trades employed during the winter; painters and decorators decided to demand an increase of wages to 45 cents per hour next session; the William Davies Company is erecting a cold storage building at a cost of \$100,000. In public employment it may be noted that the Toronto Harbour Commission has reclaimed 300 acres of land in connection with their part of the work of the harbour front development scheme, the value of which is estimated at \$10,000 per acre; the Ontario Railway Board has ordered the construction of new street railway trackage upon Carlaw, Guelph and Pope avenues in order to relieve traffic congestion in the east end of the city. Saleswomen and clerks had a busy month, large numbers being engaged temporarily to handle the Christmas trade. Stenographers and typists were busy, with a considerable demand for junior girls. The supply of experienced domestic help was small during the month. Employment bureaus reported a large registration of unskilled women workers. During the month Eaton's factory adopted the eight-hour day.

Hamilton reported the various branches of metal manufacturing active, and establishments in the food and tobacco group were busy, except breweries. Cotton factories and manufacturers of underwear and knitted goods had a good month, and ready-made clothing, shirt and collar and whitewear factories were active.

Niagara Falls reported the metals and machinery group active; the firearms-sight factory was busy and the Pollard Manufacturing Company, which had orders ahead for a year's work, was exporting stone-cutting machinery to Australia; the carriage mountings factory increased its staff, and at the Dominion Chain Company skilled men were in de-

mand; cutlery and plating factories were very active. The shredded wheat factory was busy; canning factories were quieter, as the supply of apples was very small and of poor quality; an artificial ice plant was being built. The hat factory was busy and the corset factory very busy. Printing offices were active, one newspaper installing a new press. The corrugated paper and box factory was well employed. Planing mills were very busy and the shoe-parts factory was active. The cyanamid plant was also busy. The Ontario Hydro-Electric Power Commission has completed the purchase of a right-of-way for Chippawa-Queenston power canal, and it was expected work would commence in the spring; the Commission increased its purchases of power from private generating companies and took over for operation the Ontario Distributing Company of Stamford. Steam railways were busy and the Grand Trunk roundhouse was being enlarged, but closing of navigation on the lakes reduced employment in transportation. There was continued activity in the erection of dwellings and a contract was awarded for a new bank building; the Axolite factory and extension of the cyanamid works were being rushed to completion and a large number of men were working on the erection of the nickel refinery at Port Colborne; skilled building tradesmen were in great demand.

St. Catharines reported the manufacturers of boilers and of electrical apparatus active; the Canadian Crocker Wheel Company was enlarging its plant to meet the increased demand for electrical supplies and other lines; the McKinnon, Dash and Metal Company has also enlarged its plant and was employing about 1,000 work-people. Meat-packing houses were busy; breweries quiet. The knitting and silk mill was active. Pulp and paper mills and manufacturers of beaver board and other pulp products had a good month; the Riordan Paper Company has enlarged its plant and increased its staff of employees. In wood-working, sash, door and planing mills, basket factories, brooms, brushes and

cooperage factories were active. Tanneries were well employed, as were also manufacturers of trunks, bags, harness and horse goods and rubber footwear. Navigation on the Welland canal was closed on several occasions owing to lock gates being carried away. Building tradesmen were quiet on dwellings but busy on factory extensions; canal construction was dull.

At Ottawa trades engaged on war contracts, and iron workers in particular, were busy, and printing tradesmen were fully employed. There was a falling off in civic employment as usual at this time of the year, work on a number of contracts being deferred until spring. Cold weather brought a rush of work for shoeing smiths and a scarcity of these tradesmen was reported.

At Brockville the St. Lawrence Engine and Boat Company was working full time and the Canadian Briscoe Motor Company was active; several departments of the Canada Carriage Company were working three nights per week until nine o'clock; the James Smart Manufacturing Company was active on heaters and furnaces and on axes, hammers, hatchets and other lines of hardware. Confectionery companies were busy with Christmas orders, but soft drink establishments were rather quiet; cigarmakers were fairly active, but the brewery was slack. The Wolthausen Hat Corporation and Halls Limited, manufacturers of gloves, mitts, suspenders and neckties, were working full time. The Brockville Lumber Company and the Peter McLaren Lumber Company were running full time on builders' supplies and boxes. The belting company was fairly busy. Steam railways were active in all branches, but navigation was closing for the season. In building there were very few dwellings under construction, but certain factory extensions were in progress. Municipal employment was slack.

At Kingston textile workers were very active, both the cotton mill and the hosiery mill working overtime. Sash, door and planing mills reported business slackening owing to the closing of build-

ing operations; broom factories, however, had fairly large orders ahead. Tanneries were working overtime. The Gordon Granite Company, near Gananoque, has been awarded a contract by the City of Toronto to supply them with all the granite blocks that the city may require for the year 1917; from 35 to 40 men will be required to handle this work. The Utilities Commission has arranged with the Hydro Electric Commission to secure power for Kingston; the cost of construction from Napanee will be approximately \$90,000 and the work of constructing the line was expected to commence at once. Work along the waterfront was very slack, as many vessels have been laid up for the winter; the Davis Dry Dock Company was active, however, and expected to be so during the winter months. The Montreal Transportation Company had a large gang of men on repair work, but general construction work had nearly closed for the season. Municipal employment was also slackening.

At Belleville the steel company was adding to its plant and its furnaces and converters were fairly busy; the rolling mills, employing more than 100 hands, were active; March and Henthorne's foundry, manufacturing portable steam engines and boilers, was engaged on special orders and day and night shifts were employed; the Belleville Hardware Company, employing about 100 hands, was also busy; the Springer Lock Works, a similar concern, was employing some 70 hands; electrical apparatus and fixtures were being manufactured by the Greenleaf Company, Limited, which recently moved into larger quarters; the St. Charles Omnibus and Carriage Company reported a good season's business and employees working full time. A small cigar factory, which had been operating for some time, was temporarily closed, owing to over-production. The Deacon Shirt Company, employing 70 hands, chiefly women, was busy. The Grand Trunk Railway, Canadian Northern Railway and Canadian Pacific Railway were all busily engaged, both passenger and freight traffic being excep-

tionally brisk. Longshore work was practically ended for the season, only a few boatloads of coal being brought in during the past month. Two new industrial plants were being erected.

Peterborough reported that the metal and machinery plants were very active and factories were working overtime. Flour, feed and cereal mills were running night and day, and meat packing houses were also busy. Establishments working on textiles and woodenware were steadily employed. Lumbering was quiet and the building trades were only fair; a woollen mill was building a dye house and had almost completed a large addition to its plant. The Grand Trunk Railway was laying heavier rails between Lindsay and Peterborough and expected to have the work done by January when larger engines will be put on to handle the increased freight traffic on this line.

At Galt boiler and engine workers and car and coach makers were very busy; stove and furnace foundries were very active, and electrical apparatus, steel metal works and machine shops had a good month. Flour mills were running steadily; baking and confectionery factories were fully employed on Christmas orders. In textiles cottons and woollens were busy and underwear and knitted goods factories were working overtime. Ready-made clothing factories were active and at the hat factory help was in demand; laundries also reported a shortage of labour. The paper box factory was very active with labour in demand and boot and shoe workers were fully employed. The soap factory was very busy. The building season was about over, but some extensions to industrial plants and a new school were in course of construction.

Brantford reported that the Waterous Engine Works Company was experiencing a shortage of unskilled labour and moulders; the Brantford Carriage Company and the Gould Shapley Muir Gas Engine Company were busy, the latter firm being short of unskilled labour; the Massey-Harris Company, the Verity Plough Company and the Cockshutt Plough Company were very busy,

and all reported a shortage of labour; the Brandon Shoe Company was busy with orders ahead to last all winter. The starch and varnish factories were very busy, the starch factory being short of woman help. Steam railways were busy, with a shortage of freight handlers and also of freight cars. The Watson Manufacturing Company, manufacturing underwear and knitted goods, was busy and calling for woman workers; the Slingsby Company, manufacturers of blankets, were also busy, and the Niagara Silk Company was continually advertising for woman and girl help; the Brantford Cordage Company was short of skilled and unskilled woman operators. The Kitchen Overall Shirt Company was very busy. The Hampel Paper Box Company had a good month. The Brantford and Hamilton Electric Railway has completed an extension to the Lake Erie and Northern Railway station. All public work was practically at a standstill owing to the shortage of unskilled labour.

At Kitchener, Waterloo and Elmira, the automobile factory was not as active as in the previous month, but the Pequegnat bicycle factory remained busy and electrical workers were well employed; the Waterloo Manufacturing Company, manufacturers of portable engines and threshers, were working full time and sheet metal factories and foundries were busy; the Canadian branch of the Buffalo Forge Company was very active. In the foods group flour mills were busy, but the Dominion Sugar Factory closed down November 13 owing to shortage of coal when its operations were only about half completed; the company ordered all beets to be shipped to Chatham where the firm has another factory which uses gas as fuel; the company employed about 310 men on double shift, a number of whom were transferred to Chatham and others secured work in local industries; meat and sausage factories were very busy; the C. H. Doer biscuit and confectionery factory and the Metcalfe candy factory were working overtime; cigarmakers were well employed; breweries, both in Waterloo and Kitchener,

were still busy; as well as the Seagram distillery at Waterloo, which was short of men and girls in the bottling department. The Macklin hosiery factory was very busy and felt factories were working overtime; the Dominion twine factory was very busy, but the robe and clothing factory was slacker than last month; shirt, collar and button factories were short of help; glove factories and women's whitewear factories were very active; the Star Whitewear Company calling for 25 operators. Paper box factories were very busy, as well as the Batzner novelty factory. Sash, door and planing mills were fairly active, one working overtime, and wooden box factories were short of help. Nearly all furniture and woodenware factories were working overtime. Tanneries were very busy; boot and shoe factories were nearly all working overtime, two building large additions; both trunk and bag factories in Kitchener were busy, and the one at Waterloo was working overtime; the two large rubber factories were very busy and short of help. In clay and stone the Braun Marble Works was busy, but brickyards were only fairly well employed; tile and sewer pipe makers were busy. The Light Commission reported that the peak load of the electric department was still going up; an additional 900 h.p. was being arranged for by the Dominion Tire Company. Gas and electric receipts showed increases; also street railway earnings. The work of changing part of the route of the Berlin and Northern Electric Railway was completed and cars were running over the new route. Building tradesmen were active, chiefly on additions to factories, and the Pollock Manufacturing Company was expected to build extensions. The Buffalo Forge Company was building a large addition to its plant and will increase its staff.

At Guelph the Guelph Stove Company was building an extension to its plant; the Malleable Iron Company was active; the Gibson Manufacturing Company were busy making large shipments of gasoline engines; the White Sewing Machine Company has almost doubled the

output of machines since taking over the Raymond plant. Flour mills continued working overtime, but other provision trades were normal; cigarmakers and breweries were quiet. The textile trades were very active, cotton spinning mills and woollen spinning mills working overtime, as was also the tapestry department of the Guelph Carpet Company; the Dominion linen mills were active. In woodwork and furniture, planing mills were only fairly well employed, but the Bell Piano Company was working overtime. Building tradesmen were well employed for this season.

At Stratford workers engaged in the threshing machine factory were active. In the foods group the flour mill, with a capacity of 500 barrels per day, and employing 25 men, was active, and the Whyte Packing Company was busy. In woodwork and furniture, sash, door and planing mills were active, and furniture and chair factories reported business good with a shortage of help; some factories were employing girls. The gas works was running to full capacity owing to the large amount consumed in factories. The Grand Trunk Railway repair shops were active and night gangs were employed.

At Woodstock a few factory managers reported a slight improvement in the supply of labour; a few men were coming in from the farms and some of the factories were less rushed, but the supply of labour was generally inadequate. Manufacturers of wagons and sleighs were stock-taking and the supply of labour in this line was sufficient. Labour was scarce in all departments of stoves and furnace factories. Girls were in constant demand for confectionery work, and in underwear and knitted goods factories. Newspaper and job printing establishments were busy with a demand for job printers. There was also a constant demand for men in chair and furniture factories and for skilled labour in piano and organ factories. Little building was being done and municipal work was quiet.

At London outside work was coming to a close and outside workers were find-

ing employment indoors for the winter. The rolling mills were very busy, and White and Sons, manufacturers of threshers and traction engines, were working overtime. The Ford Motor Company has practically closed its assembly factory here, laying off about 25 skilled men, who readily found employment in garages in and out of the city. The McClary Manufacturing Company was busy in all departments. In the foods group the McCormick Manufacturing Company and the Perrin Manufacturing Company were working several nights a week overtime in both candy and biscuit departments; cigar-makers reported trade good and breweries continued very busy, a large quantity of their goods being exported from the province. In the textiles group the Middlesex Mills Company were removed to new quarters and were busy on towel-ing and similar lines; the Peerless Hosiery Company was busy with plenty of orders on hand. Greene and Swift, manufacturers of ready-made clothing, were busy, and John Marshall and Company, manufacturers of furs, were working overtime. The Parisian Steam Laundry, a large establishment, was very busy. Newspapers were very busy, Christmas advertising causing considerable extra work, and all job plants were busy. Paper box manufacturers were working overtime. In woodwork and furniture, sash, door and planing mills continued busy, and the London Wooden Box Company was rushed with orders. The Sherlock-Manning Piano and Organ Company was active and short of help. Hyman's tannery and their heel and sole factory were exceptionally busy, and behind on their orders; hides were reported hard to procure and prices were increasing; boot and shoe manufacturers were also busy. In transportation the street railway had almost completed a mile of extension east of the city; the Grand Trunk Railway car repair shops were fairly busy. A considerable improvement in the building trades was noticeable, due to the erection of dwellings and of the Technical and Art schools. Municipal work on pavements

was nearly finished for the season but considerable sewer work was under way.

At St. Thomas the locomotive shops were busy; the Michigan Central was waiting for material to commence the construction of 150 flat cars; at the Norsworthy Foundry 30 men were employed and mechanics were in demand; the Erie Iron Works, employing 20 men, reported business good, but moulders difficult to secure. The St. Thomas Packing Company reported no increase in staff over the previous month; the St. Thomas Candy Works reported business very good, 103 hands being employed. The Monarch Knitting Company reported business improving steadily; 10 more hands were employed than during October. Shoe workers were busy, the Nursery Shoe Company reporting that more business offered than could be handled; the Just Wright Company reported business brisk, but no increases in staff. The railroads were very busy; the Michigan Central, Wabash and Pere Marquette Railways show a substantial increase in cars handled over the preceding month; railway shops were also active.

At Chatham the Dowsley Spring and Axle Company were working overtime three nights per week and carriage and wagon factories were very active; the Hay Wheel Company was unable to cope with orders for automobile supplies; foundries and machine shops were busy throughout the month. Brick, tile and cement factories were very active. Cigar-makers were busy on Christmas stock and flour and feed mills were active. In printing conditions were very fair, full staffs being continually employed. Sash and door factories were working overtime and offering high wages for skilled workmen. In public employment the water department was active on the extension of a 12-inch main to the sugar company; the work was handicapped, however, by the inadequate supply of labour. Light and power companies were active extending their services. Canadian Pacific Railway, Grand Trunk Railway and the Pere Marquette Railway were very busy; agents were compelled to refuse freight going East owing to

car shortage. Building tradesmen were well employed, the Dominion Sugar Company's plant was nearly completed and work on the plant of the American Pad and Textile Company was being rushed. Farmers in the district have united and were asking an advance from \$5 to \$7 per ton for growing sugar beets for 1917. Few contracts had been secured.

Windsor reported the structural iron and steel industry fairly active. Automobile factories reported a good demand, but were handicapped part of the month by scarcity of fuel; natural gas was being used to a great extent; similar conditions were evident in factories making automobile parts. Flour and feed mills were busy; the Postum Cereal Company was active in some lines but quiet in others. Breweries and distilleries were dull. Ready-made clothing firms, and shirt and button factories were busy. A paper-roofing firm was active. Brick and tile yards were not able to supply the demand. Perfume and extract firms and drug manufacturers were busy. Electric railways were unable to obtain sufficient labour during the month. Building and construction was exceptionally active. In public employment large paving and sewer contracts were under construction, employing all the available unskilled labour.

At Cobalt every effort towards high production was being exerted in the mining industry, the limit only being determined by the number of men that could be secured and economically placed. In the Cobalt camp and in Porcupine and Kirkland Lake camps all the mines were working to capacity and shipments were greatly increased over last year; a shortage of steam coal was expected to affect production, especially in the Kirkland Lake camp, until the completion of the new power transmission line of the Northern Ontario Light and Power Company. There was a considerable amount of building at Kirkland Lake, especially at the mines, and at Timmins, where a large number of houses were being built; there was a fairly good demand for

skilled building tradesmen. In Cobalt building was light.

At Port Arthur the Western Dry Dock Shipbuilding Company was employing about 800 men and boys in the building and fitting up of new ocean-going freight boats and on repair work in connection with its dry dock; this work was providing employment for carpenters, pattern makers, machinists, blacksmiths, electricians, rivetters, caulkers, plumbers, steamfitters, decorators and glaziers, shipwrights and joiners, besides much unskilled and semi-skilled labour. Port Arthur has made application for additional power to take care of a proposed pulp mill and an engineer from the Hydro Electric Commission conferred with the city councils of Port Arthur and Fort William with the idea of these cities co-operating with the Commission to develop the additional power required at Silver Falls, Dog Lake. Flour mills at Fort William were busy. Two newspapers and job printing offices in the two cities, employing 35 to 50 employees, reported business quiet. Sash, door and planing mills were very quiet and mostly engaged in repair work and storm sash. Cut stone and granite works were very quiet and brick works were closed down for the winter. Steam railways were busy and railway repair shops steadily employed; navigation and long-shore work was very active. With the exception of one business block in Port Arthur and the erection of elevators also in Port Arthur building was slack; on these works about 200 men were engaged and work on repairs employed another 100 men; most of the building trade employees have gone into car repair shops, the dry docks and elevator work. Camps were established in the district for the cutting of wood, and men for this work were being advertised for. Ordinary municipal work in both cities employed about 70 men and teamsters and 12 to 14 teams; the Parks Boards in both cities reduced the number of employees. During November fishing tugs were engaged in preparations for herring fishing; tugs were provided with shel-

ters, docks and wharves were cleared, and from the middle of the month tons of fish were brought in daily.

Manitoba

At Winnipeg milling companies were busy and abattoirs and meat-packing houses had a fairly good month; breweries were active. Ready-made clothing establishments reported trade fair, and shirt, collar and button factories were busy. Building was quiet during the month, but there was some activity in municipal work and on provincial highways employment was steady. In the surrounding country threshing continued steadily throughout the month, with help in demand.

Confectionery establishments had full staffs engaged; chocolate dippers were in demand; pickle factories were busy. In ready-made clothing most firms were busy, but one concern employing 70 hands had only half its staff employed, though improvement was expected in a few weeks; girls were being laid off in shirt factories owing to some orders being placed in the East; glove factories, however, were working full staffs. Printing, publishing, job printing and binderies were active and paper box factories busy. Saleswomen were in heavy demand and 32 telephone girls were taken on during November. Employment bureaus reported a decline in demand for domestic help as householders have discontinued efforts to secure these workers.

At Brandon labour generally was well employed. The building trades were active and building labour was in demand in the foods group; flour mills and creameries were busy; cigarmaking was dull. Sash, door and planing mills were active, one company advertising for cabinet makers. In the surrounding district threshing operations were completed.

Saskatchewan

At Regina labour was fairly well employed; the building trades were busy, and unskilled labour was well employed.

threshing. The Imperial Oil Company was running to capacity, employing about 150 men steadily. The Robert Simpson Western Limited were advertising for more help. Railway employees were busy moving the grain to the head of the lakes. Threshing was not completed and harvesters' excursion tickets were to be extended in order to hold the labour required.

At Prince Albert the lumber companies were having difficulty in obtaining enough men for the woods, and for the first time had to send agents to the prairie sections to hire hands; lumber and cordwood shipments were leaving regularly for the south. The Big River lumber mills have closed for the winter but the Prince Albert Lumber Company was still running. A serious fire at one of the largest dry goods and millinery establishments in the city resulted in a loss of \$200,000 and the throwing out of employment of about 60 employees. The grading for the new Grand Trunk Pacific station and yards was completed. It was hoped that the steel would have been laid into the city before the end of the month, but the company stated that shortage of labour delayed the work. Threshing was practically completed and farmers were hauling their grain to the cars or elevator, many points reporting a car shortage.

Saskatoon reported the demand for labour still brisk but not so marked a labour shortage. The Quaker Oats Company was running to full capacity night and day. Cushing Brothers' planing mill was doing a considerable business in box-making, having several long term contracts. Passenger and freight traffic was heavy with a car shortage in evidence, especially on the Canadian Northern Railway. Threshing was completed and threshing labourers were returning east; in some cases wages of threshing hands exceeded \$5 per day but the average was about \$4.

Alberta

At Medicine Hat the Alberta Rolling Mills reported business good in the

manufacture of bar and band iron, nuts and bolts, about 75 hands being employed; the Medicine Hat Pump and Brass Company reported business very active in special lines; about 55 men were employed working two shifts and labour was in demand. The Alberta Foundry Company was actively engaged on structural iron and on repair work on agricultural machinery. The Lake of the Woods Flour Mills was nearing completion; the elevator was completed and was receiving grain; the Hedley Shaw Milling Company was working day and night and employing about 30 men; the Ogilvy Flour Mills, employing about 35 men, was working day and night, with labour scarce; the Tabor Candy Company reported a brisk Christmas trade; dairies reported business good, but the supply of milk and butter was not adequate to the demand; all the aerated water companies reported business rather quiet, and the Medicine Hat Brewery Company was only fairly well employed. The Medicine Hat Steam Laundry reported business very brisk with labour scarce. The Medicine Hat News reported trade good in both newspaper and job work; the Times Publishing Company discontinued business, throwing about eight people out of employment. The Preston Planing Mills reported business good, but skilled labour scarce; the Gas City planing mills reported business fair. The Alberta Clay Products Company was more slack than last month; the Medalta Stoneware Company, however, was active. The Alberta Linseed Oil Mills have commenced operations again after being closed down for repairs and improvements and reported business very brisk; about 20 men were employed. In transportation the Canadian Pacific Railway reported a considerable improvement over the previous month, with a scarcity of some classes of labour; mechanics for repair work in garages were in demand. As to municipal employment the city completed laying one water main and was commencing another; labour was wanted. Threshing was progressing, but about 30 per cent still remained to be

threshed; reports of good yields were coming in from all parts of the district.

At Lethbridge coal mining was very active. There was a great demand for help in all lines, and although at the end of the month the supply appeared greater than the demand, this was owing to weather conditions. The building trades were well employed, mainly on building in the country. Much of the threshing was completed and the crews have left the district, some to the lumber camps and others to the United States. The movement of the grain has been slow on account of lack of cars.

Calgary reported metal manufacturing active in some lines only. Flour and feed mills and abattoirs were busy, but breweries and tobacco factories were quiet. Sash, door and planing mills ran steadily and workers on leather goods were well employed. Steam railways had a busy month and railway repair shops were active. Employment in the building trades continued only fair; a few warehouses were being built and some extensions to commercial premises were in progress, but the Canadian Northern Railway depot was nearing completion.

At Edmonton the Edmonton-Dunvegan Railway had opened their mill, and it was expected that 150 men would be employed. Lumber camp crews were being assembled for the winter operations north of the city. Coal mining remained active with a demand for labour. Civic work was almost completed and only a few men were employed. Threshing was almost completed and threshing labourers were being absorbed in the local industries. Fishing promised to be very brisk in the near-north country, and much was expected to depend on the supply of labour for the necessary crews; 400 commercial licenses have been issued by the local officials.

British Columbia

Nelson reported men leaving for the mines for the winter. About 250 men were laid off by the consolidated com-

pany at Rossland, but most of them were sent to other properties. The smelter at Trail was running at full capacity and was still making extensions to its large plant; the only drawback seemed to be the shortage of coke. There was a great shortage of coal and wood, some wood being brought in from outside points. Sawmills were running full time.

At Vancouver the demand for labour was fair generally, and in some branches of the metal industry employers were not able to secure a sufficient supply. Compared with the three previous years employment generally was much better and this condition was evidenced by the absence of systematic measures for the relief of distress. While the labour demand in the city itself was greatly improved, the demand for labour from outside points was also steady. Structural iron and steel workers were busy, and shipbuilding was very active, many vessels, chiefly wooden lumber carriers, being under construction; stove and furnace making, although not extensive, was fairly active, chiefly due to seasonal demand; electrical apparatus and sheet metal works were quiet. Cigarmaking was very active and demands for workmen in this line were not being met; breweries and distilleries, however, were only fairly busy. Clothing manufacturers reported a good month. Pulp and paper mills up coast were busy. Newspapers were busy but job printing establishments rather quiet. Conditions in wood working factories were improving with a rising demand for machine operators. The boot and shoe factory was active. Building was slightly better, some unions reporting increased membership and a better demand for men. During the month the city gave relief to 105 families and 68 crippled single men.

Women workers were fully employed except those engaged in such seasonal occupations as are slack at this period. The matter of a possible shortage of male labour in the future and the substitution of women for men if necessary was taken up by the Manufacturers'

Association at its last meeting, the feeling of the members being in favour of the registration of all women able and willing to take up the work where there is a shortage of male labour in the future, the matter being left in the hands of the executive to take such steps towards the registration of women as thought necessary. Various women's organizations, such as the Canadian Women's Club, the University Women's Club and the Local Council of Women have offered to co-operate with the Manufacturers' Association, if the registration of all women is found necessary. The opening of the Stettler Cigar Factory provided employment for 30 girls and women, all of whom were unskilled workers; no difficulty was experienced by the firm in obtaining all the help required. Workers in candy and biscuit factories were fully employed preparing for the Christmas trade, no difficulty being experienced in obtaining all the help necessary. Women employed in knitting factories were fully occupied, but tent, awning and sail factories were in their slack season. One large firm manufacturing men's clothing reported trade good and all employees fully occupied; some difficulty was experienced in obtaining skilled operators, both male and female; firms manufacturing cheaper lines reported trade not so good; garment workers on shirts and overalls in factories with Government orders were fully occupied, but in other factories of this class employees were on short time; there was very little activity in the women's garment making trade, the slack season prevailing. Steam laundries reported trade increased during November, and laundry workers were steadily employed. Women engaged in bookbinding and lithographing were fully employed. Paper box factories were active, the Christmas trade making necessary the employment of more women and girls. Boot and shoe workers were actively employed, except during a period of five days when the employees of one firm were on strike. The demand for skilled stenographers remained fair during the past month, employment

bureaus reporting all positions offered filled and few remaining idle if fully experienced. Sales clerks in department stores were fully employed, extra help being taken on in anticipation of the Christmas trade. A slightly increased demand for waitresses was noted, but there was little demand for other classes of hotel work. In domestic employment increasing difficulty was experienced in filling the positions offered, and although wages were advanced to \$25 and \$30 per month very few domestic workers were secured.

At New Westminster there was some unemployment in factories where machinery was being altered. Many men who were in the harvest fields had returned and there was no difficulty in securing labour. The building trades were slack. Sawmills were busy, but had difficulty in getting cars for shipments.

Nanaimo reported little being done in quartz mining; the only work under way was development work on the west coast of the Island; no ore was being shipped as the smelter at Ladysmith has not operated for some time. The coal mines of the district were working steadily; those that were on short time during the fall were nearly all working full time. Logging camps were working as continuously as weather conditions would permit. Sawmills also ran steadily but not to full capacity. The herring fishing season had commenced, but was not very active; whale fishing on the west coast had practically closed for the season.

Victoria reported activity in the shipyards; Yarrows Limited have received a contract for building a steel stern-wheel steamer, in addition to the one now under construction; work on the new vessel will commence early in December. The Victoria Machinery Depot have received an order for building locomotives for the Canadian Colliery Company. The lumber and timber industry continued in a fairly prosperous condition. On

November 1 two drying kilns belonging to the Victoria Lumber Company at Chemainus were destroyed by fire, causing a loss estimated at \$15,000. The Ogdèn Point breakwater was nearly finished. In public employment there was quietness as the construction of the northwest sewer and of the sewer system of the municipality of Esquimault, a project which has been under way for the past three years, have been completed. The City Labour Bureau, by resolution of the City Council, will extend its facilities to all Island centres, so that farmers and the lumbering and mining industries will be supplied with help if available. The Labour Bureau will also co-operate with the Canadian Pacific Railway in order to relieve as much as possible the shortage of labour on the prairie; the Trades and Labour Council have asked the Provincial Government to increase the wages of men employed making roads on the old Indian Reserve. The same body has also protested against the efforts of farmers' organizations for the removal of regulations restricting the immigration of labourers and artisans into British Columbia since the beginning of the war.

At Prince Rupert there were no idle men, though there was little work under way in the city. Lumbering and mining districts continued active and gave promise of remaining so for some time. Ore was being shipped from the Hazelton district over the Grand Trunk Pacific by way of this port, giving employment to an increased number of 'longshoremen. Work on the repairing section of the dry dock continued and it was reported that the dock was giving satisfaction. In fishing the weather was so unfavourable on the banks that nearly all the smaller boats had to remain in port; some of the larger boats, however, made irregular trips; as the catch fell far short of the demand the price paid to the fishermen advanced at times to 14 cents a pound.

**THE INDUSTRIAL DISPUTES INVESTIGATION ACT, 1907.—PROCEEDINGS
DURING NOVEMBER, 1916**

DURING the month of November reports were received from Boards of Conciliation and Investigation appointed to deal with disputes between the Sandwich, Windsor and Amherstburg Railway and the Windsor and Tecumseh Railway and their motormen, conductors, etc.; the Fredericton and Grand Lake Coal and Railway Company and New Brunswick Coal and Railway Company and their engineers, firemen, conductors, brakemen and yardmen; and the Quebec Railway, Light, Heat and Power Company and its conductors and motormen.

Two applications for Boards were also received, one from the Dominion Coal Company, Limited, regarding a dispute with its coal handlers at St. John, N.B., which was settled by direct negotiation, the application being withdrawn. The other application was made by the maintenance of way employees on the Canadian Division of the Pere Marquette Railroad, and at the end of the month steps were being taken looking to the establishment of a Board. In connection with an application received in the month of September from the maintenance of way men in the employ of the Canadian Pacific Railway Company, the Department was informed that a satisfactory adjustment of the dispute had been effected and application was accordingly withdrawn.

Applications Received

On November 18, an application was received from the Dominion Coal Company, Limited, for the establishment of a Board of Conciliation and Investigation to deal with a dispute existing between that company and the coal handlers in its employ at St. John, N.B., members of Coal Handlers' Union No. 810 of the International Longshoremen's Association. The application

stated that the dispute affected 50 employees directly and 1,000 indirectly and related to the men's demand for increased wages. Two days later, whilst the application was under consideration by the Minister of Labour, a telegram was received in the Department from the Dominion Coal Company, Limited, to the effect that the difficulty had been satisfactorily adjusted and a new agreement would be signed. This was followed on the next day by a letter from the company, cancelling the application and stating that the terms of the new agreement were practically the same as those of the old agreement, with the exception that the rate of pay would be 50 cents per hour all the year round instead of 35 cents in winter and 40 cents in summer, and that on coal boats the working day would consist of ten hours instead of nine hours as formerly. No further action was, therefore, necessary by the Department.

An application was received on November 27 for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Canadian Division of the Pere Marquette Railroad and its maintenance of way employees. The application emanated from the employees and was stated to affect 120 workmen directly and 500 others indirectly. The employees stated in their application that request had already been made to the Pere Marquette management for a higher scale of wages but the same had been without result. The procedure looking to the establishment of a Board was under way at the end of the month.

Other Proceedings under Act

In the October number of the *Labour Gazette** reference was made to an application of the maintenance of way men

*See October, 1916, *Labour Gazette*, p. 1625.

in the employ of the Canadian Pacific Railway Company for the establishment of a Board of Conciliation and Investigation to deal with a dispute growing out of the employees' demand for the adoption of a schedule of agreement providing for increased wages and improved working conditions. The employees concerned were members of the International Brotherhood of Maintenance of Way Employees and numbered 6,000 directly and 17,000 indirectly. It was deemed advisable to suspend proceedings in connection with the establishment of a Board until the reports were received from Boards which were at that time dealing with disputes affecting the maintenance of way men on the Canadian Northern and Grand Trunk sys-

tems. On November 30 the Minister received a communication from the chairman of the men's committee in the terms following:

"I am pleased to inform you that matters in dispute between the Canadian Pacific Railway Company and its maintenance of way employees which were referred to your Department with application for a Conciliation Board have now been settled. The application for a Board of Conciliation is, therefore, withdrawn.

"We fully appreciate the fact that your Department has played no small part in bringing about settlement of our difficulties, and I wish on behalf of the men on the Canadian Pacific Railway to thank you for same."

Report of Board in Dispute Between the Sandwich, Windsor and Amherstburg Railway and Windsor and Tecumseh Railway and Employees

ON November 9 the Minister received the report of the Board of Conciliation and Investigation which had been established on October 3 to deal with certain matters in dispute between the Sandwich, Windsor and Amherstburg Railway and Windsor and Tecumseh Railway and their employees, being motormen, conductors, etc., members of the Amalgamated Association of Street and Electric Railway Employees of America, to the number of 150. The dispute grew out of the alleged refusal of the employers to agree to a schedule which had been submitted to them by the employees.

The Board was constituted as follows: His Honour Judge Jno. O. Drumgole, Windsor, chairman, appointed by the Minister in the absence of any joint recommendation from the other Board members; Mr. Ernest G. Henderson, Windsor, employers' nominee; and Mr. Magnus Sinclair, Toronto, employees' nominee.

The report was signed by all three members of the Board, Mr. Sinclair, however, submitting an additional statement on the question of the recognition of the Amalgamated Association of Street and Electric Railway Employees of America. An agreement was appended to the report, signed by the general manager on behalf of the Sandwich, Windsor and Amherstburg Railway and by three representatives of the employees concerned, the same to remain in effect from October 1, 1916, until April 1, 1918. In the report it was stated that the Windsor and Tecumseh Railway was not a party to the agreement for the reason that the latter system is operated by the Sandwich, Windsor and Amherstburg Railway. The Board also stated that there was throughout a spirit of conciliation, and a sincere desire to reach an amicable conclusion was evinced, and the hope was expressed that the new agreement would bring about a continuance for the future of the friendly relations which had in the past existed between the employees and the officers and management of the company.

Report of Board

The text of the report of the Board in this matter is as follows:

The Honourable T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ontario.

Sir,—

The undersigned, members of the Board of Conciliation and Investigation, established on the third day of October, A.D. 1916, under the provisions of the Industrial Disputes Investigation Act, 1907, in the matter of a dispute between the Sandwich, Windsor and Amherstburg Railway and Windsor and Tecumseh Railway and their employees, motormen and conductors, have the honour to report that after full investigation and hearing the evidence adduced by the parties to the dispute, the Board entered into negotiations between the parties which have resulted in a settlement covering all the matters of difference set forth in the application of the employees for the appointment of a Board of Investigation and Conciliation, dated September 26th, 1916.

The terms of the settlement have been reduced to writing and are set forth in the signed agreement, a triplicate original of which is hereto attached.

It will be observed that the Windsor and Tecumseh Railway is not a party to the agreement. The reason for this is that the Windsor and Tecumseh system is operated by the Sandwich, Windsor and Amherstburg Railway under a lease from the Windsor and Tecumseh Railway and the Sandwich, Windsor and Amherstburg Railway Company is therefore, in fact, the only employing company.

In the course of the said investigation and negotiations the Board was in session on October 14th, 17th, 20th, 21st, 24th, 25th and 26th, and concluded its work in a session held on October 28th when the above agreement was finally completed and executed.

We desire to acknowledge the eminent fairness and courtesy which has marked the conduct of all parties and their representatives toward one another as well as toward the members of the Board. Throughout a spirit of conciliation and a sincere desire to reach an amicable conclusion has been evinced; and we express the hope that the agreement arrived at will bring about a continuance for the future of the friendly relations which, notwithstanding the differences now disposed of, have in the past existed between the employees and the officers and management of the company.

While Mr. Sinclair executes this report as containing the result of the investigation, he reserves to himself the privilege of making a special additional report as to the question of recognition of the Amalgamated Association of Railway Employees of America.

We have the honour to be,

Sir,

Yours faithfully,

(Sgd.) JNO. O. DROMGOLE,
Chairman.
(Sgd.) ERNEST G. HENDERSON.
(Sgd.) MAGNUS SINCLAIR.

Dated at Windsor, this thirty-first day of October, 1916.

THIS AGREEMENT entered into in triplicate the twenty-eighth day of October, A.D. 1916, between the Sandwich, Windsor and Amherstburg Railway Company, their successors and assigns, hereinafter called "the Company," parties of the First Part, and the motormen and conductors employed by the said company, represented by the parties who sign this agreement, being their duly accredited representatives, hereinafter called "the Employees," parties of the Second Part.

Witnesseth:

1. That for the purpose of enabling harmonious operation of the company's system for the period hereinafter set out, the parties mutually agree that should any difference arise out of this agreement, or should any other matters arise which may not appear to be provided for in this agreement, the company's properly accredited officers shall at all reasonable times receive and give hearing to such officers and representatives which the employees shall nominate from their own number, regardless of the fact that such officers or representatives may be a member of a committee or a member of Division 616 of the Amalgamated Association of Street Railway Employees of America.

2. That the day's work for all motormen and conductors shall be from nine (9) to ten (10) hours, to be completed within twelve (12) consecutive hours so far as practical and possible. The runs to be as nearly equally divided as possible between two crews to be known as early and late runs, and when practical to do so the present schedule shall be arranged to provide for this.

3. The company will not discriminate against any employee by reason of his being a member of Division 616, and any employees who are members of any committee of the employees, or are officers of any association of the employees, or delegates to conventions of street railway men shall be entitled to leave of absence for the purpose of attending conventions or of doing such committee work, without losing any privilege.

4. Any employees against whom charges may be received will be required to report when off duty to the superintendent. His case will be considered by the proper officers and dealt with according to the rules and regulations of the company, but any employee against whom such charges are made shall have the right of

appeal to the general manager or president, and may bring with him any committee or delegation of his fellow employees as defined in Section 1, and if upon such investigation it is proven there was not sufficient cause for his suspension or dismissal, he shall be reinstated in his former position and paid for all time lost at schedule rate.

5. All cars shall be properly cleaned, oiled and equipped, and fires laid by barn men at Windsor barns, prior to car man taking out car for his run.

6. All cars shall be properly equipped with good brakes, fenders, and modern sanders, as required by the provisions of the Ontario Railway Act.

7. The rates of wages to be paid shall be as follows for motormen and conductors:

First six months	28c per hour
Second six months	29c per hour
Second year	31c per hour
Third year and after . .	32c per hour

and an additional allowance of one (1) cent per hour, exclusive of overtime, shall be paid to all classes of conductors and motormen in lieu of uniforms. Caps and badges will be supplied free by the company, and all men will be expected to be in suitable uniform, clean and tidy when on duty.

8. Conductors and motormen will not be required to perform extra work in excess of his regular schedule of ten (10) hours' work, except in cases of necessity and for such extra work shall receive four (4) cents per hour extra.

9. All conductors and motormen training students shall be allowed a sum of twenty-five (25) cents per day for such services while so engaged.

10. All spare men who show up at the barn for work at 5.45 a.m. or 4 o'clock p.m., and who fail to procure work shall be allowed one hour for so doing at either morning or afternoon.

11. This agreement and the provisions hereof shall be deemed to be in force and binding on both parties as from the first day of October, 1916, and shall remain in force and binding on both parties until the first day of April, 1918.

In witness whereof the parties hereto have signed.

The Sandwich, Windsor and Amherstburg Railway Company, by

(Sgd.) JAMES ANDERSON,
General Manager.

Signed on behalf of the Employees:

(Sgd.) MILTON W. MACKLEM

(Sgd.) JAS. H. LOGAN

(Sgd.) ERNEST A. THORN

Their accredited representatives.

Signed and executed in the presence of:

(Sgd.) JNO. O. DROMGOLE.

Statement by Mr. Sinclair

The text of the statement by Mr. Sinclair in this matter is as follows:

Windsor, Ont., Oct. 30, 1916.

To the Hon. T. W. Crothers, K.C.,
Minister of Labour,
Ottawa, Ont.

Honoured Sir,—

In the case of petition of Division No. 616, Amalgamated Association of Street and Electric Railway Employees of America, Windsor, Ont., employees of the Sandwich, Windsor and Amherstburg Railway Company and the Windsor and Tecumseh Railway Company, for appointment of a Board of Conciliation and Investigation under the Industrial Disputes Investigation Act, 1907, and upon which petition Your Honour created a Board by appointment thereon of the Hon. Judge John O. Dromgole of Windsor, and, by request of the said company, Ernest G. Henderson, Esq., of Windsor, and, upon recommendation of the employees, your obedient servant, Magnus Sinclair, of Toronto, Ont., I beg to submit my report to you, the same being as follows:

Upon receiving my appointment to the said Board of Conciliation and notice of the appointment of Mr. Ernest G. Henderson, I at once sought and obtained a conference with Mr. Henderson, upon date of October 6, 1916. At this conference we discussed matters pertaining to our duty and arranged for further conferences, which were held October 7, 1916.

At these above conferences names were submitted pro and con by Mr. Henderson and myself, which were given consideration, and we discovered that we were unable to agree upon a man for third arbitrator which we could jointly recommend to you for appointment to fill the Board. We, therefore, upon October 7, forwarded to you joint telegram, petitioning the appointment of a third arbitrator, upon which petition you appointed the Hon. Judge John O. Dromgole of Windsor.

My first meeting with Judge Dromgole in connection with the case was October 13 at the St. Clair Hotel, Detroit.

October 14 at the Crawford Hotel, Windsor, occurred a preliminary meeting of the Board at which the members took the oath of office and adopted a method of procedure and arrangements for hearings.

October 17 a conciliation meeting was held at City Hall, Windsor, in the evening, at which, by request, representatives of the parties to the dispute were present.

At this meeting appeared before the Board as representing the respondent companies, Messrs. James Anderson, general manager, and George McLeod, general superintendent; and representing the petitioners, employees of the Sandwich, Windsor and Amherstburg Railway Company and the Windsor and Tecumseh Rail-

way Company, members of Division No. 616, Amalgamated Association of Street and Electric Railway Employees of America, Windsor, Ont., appeared Milton Macklem, President of Division No. 616 and an employee of said company; Ernest A. Thorn, Executive Board Member of said Division No. 616, an employee, and R. L. Reeves, an International officer of the said Amalgamated Association. At this meeting Chairman Dromgole advised those present of the purpose of the meeting, that it was to give the parties to the dispute an opportunity to settle without going through an investigation. The representatives of the petitioners questioned by the Chair submitted to the Board, in typewritten form, an explanation of the dispute as follows:

"In the matter of 'Dispute' in the case of petition for a Board of Conciliation and Investigation under the Industrial Disputes and Investigation Act, filed by Division No. 616, Amalgamated Association of Street and Electric Railway Employees of America, a labour organization—employees of the Sandwich, Windsor and Amherstburg Railway and extensions, branch or section of, owned and operated by and as a part of the Detroit United Railway, the said Division Association—members thereof, employees of said company set forth that said organization by its duly authorized representatives, presented to the said company a proposed agreement, which, if executed, would specify collective agreement relations by and between said company and said employees, and provide wages and conditions of employment, said proposed collective agreement provisions being, in part:

"'Memorandum of agreement by and between the Sandwich, Windsor and Amherstburg Railway Company, and also the Windsor and Tecumseh Railway Company, their successors and assigns, parties of the first part, and hereinafter for convenience called the company, and the Amalgamated Association of Street and Electric Railway Employees of America, Division No. 616, party of the second part, for convenience hereinafter called the association.

"'Witnesseth, That both parties mutually agree that all business arising between the company and the association shall be transacted directly between the properly accredited officers and committee of the association.

"'Section 1. That all employees of said companies shall become members of the association within thirty (30) days from the date of signing this agreement, and all employees entering the service of the companies shall become members of the association within thirty (30) days from the date of their entering the service of said companies. . . .

"'Section 5. Where any differences arise between the company and the association that cannot be amicably adjusted between

the respective parties to this agreement, the same shall be submitted to a Board of Arbitration.'

"Said provisions explain the relations the said organization desires to have established by agreement between the parties to the dispute. The company declined to enter any agreement establishing said desired relations. In fact there was sufficient denial to warrant the employees to conclude that to establish the said relations, a suspension of work would be necessary.

"The petitioners further set forth that it is quite impossible to determine what further disputes might arise in effecting wages and conditions of employment in the event that the contractual relations explained should be established."

To this explanation Mr. Anderson, representing the company, made the statement to your Board that "the company has no intention of making a collective agreement with the employees and is determined not to recognize any organization of the employees," but that the company had no objection to the employees belonging to the Amalgamated Association or any organization and that the company would not discriminate against employees on account of membership or non-membership in said organization; that the company, however, was opposed to signing any agreement that would compel employees to join any union. It developed at this meeting that there were 91 motormen and conductors in the employ of the respondent companies that would be affected by any award of this Board and that 81 of these 91 employees were members of the said Division No. 616 of the Amalgamated Association of Street and Electric Railway Employees of America, and constituted the petitioners, whose petition, through the officers of the association, had been filed. After exhausting the efforts of the Board to effect a conciliation, the parties to the dispute were advised that another meeting would be held at which evidence and statements would be taken bearing upon the subject in dispute, and that as the chief subject of dispute was the question of contract relations, or a union or collective agreement, that subject would be first heard; the chair directing the parties, however, that the Board had authority, and it was its duty to investigate all matters contained in the petition other than the question of contract relations, such as wages and working conditions.

From this session the Board adjourned to Friday, October 20, at 10 o'clock a.m., sessions being held in the Council Chamber of the City Hall in Windsor.

On Friday, October 20, at an hour set at the previous session, your Board reconvened in the Council Chamber at the Windsor City Hall, and during the entire two sessions of the whole day listened to evidence and statements pro and con in support of the petition for the

establishment of collective contract relations and recognition of the union.

Witnesses were sworn by the Chair. All evidence was taken under oath. The evidence of Mr. Lucien Salive and Mr. Frank Fields was in effect that they were dismissed on or about the thirteenth day of September, because of the conviction of the general manager and general superintendent that they were responsible for or at least active in signing and circulation of a petition among the employees to be submitted to Mr. Anderson, general manager, petitioning the company for an increase in wages. The said petition was headed as follows:

"Mr. James Anderson,

"Manager, S. W. and A. Ry.,

"Windsor, Ont.

"The undersigned employees of the Sandwich, W. and A. Railway Company make application to you for an increase in their wages, as conductors and motormen on your road. We have duly considered after taking into account the advanced cost of living, and the increase in the cost of the general necessities of life, and it is our opinion that the scale of wages should be increased so that the maximum pay per hour be 35 cents and graded on the principle of present remuneration according to the term of service, as now in force, and your petitioners as in duty bound will ever pray.

"Dated at Windsor, this twelfth day of September, 1916."

This petition was signed by a vast majority of the employees, and among the signers were Conductors Salive and Fields. Mr. Salive had been delegated by the employees to request the presence of Mr. Anderson at a meeting to be held on the evening of September 14, at which to him the employees designed to present the petition. The evidence of Mr. Anderson before the Board was that he did not attend this meeting on account of sickness. Mr. Salive also testified that Mr. Anderson so told him when he requested his presence at the meeting. Mr. Salive, however, was told by Mr. Anderson, as the evidence is, that he could look for another job.

This meeting of the employees called for September 14 was held, and although Mr. Anderson, the general manager, was not present, Mr. McLeod, the general superintendent, was sought and his attendance procured long enough so that the men, through spokesmen, and the evidence showed that Mr. Thorn was one,—there petitioned, verbally, Mr. McLeod to restore Mr. Salive and Mr. Fields to employment, and Mr. McLeod agreed to take the matter of their reinstatement up immediately with Mr. Anderson. Mr. Fields, upon previously approaching Mr. McLeod for reinstatement, had received a letter from him which he had been directed to take to Mr. Anderson, and although this letter was returned to Mr. McLeod at the

meeting of September 14 and was not presented to Mr. Anderson by Mr. Fields, Mr. McLeod testified that it contained an assurance to Mr. Anderson that he (McLeod) had satisfied himself that Mr. Fields had not circulated the petition. Mr. McLeod, upon reinstating these men, asked them what they had to do with circulating the petition and there was sufficient evidence testified before your Board to warrant your Board in awarding that these two men were dismissed solely upon the charges heretofore given. This evidence was sufficient to impress me, as a member of the Board, that it was dangerous for an employee of the company to agitate for an increase in wage or even ask or petition for an increase in wage, and is conclusive evidence that the Board was warranted in recommending that a union or collective agreement should be made through which the employees would have the right to collectively negotiate their grievances and disputes with the company by properly appointed representatives, as in the case of a labour organization.

By evidence it was further established that the employees of this company were organized in Division No. 231 of the same Amalgamated Association; that they maintained their organization for several years and disbanded in 1906. (The organization was established in 1900, as per statement to the Board by Representative Reeves.)

A matter of evidence I here quote:

"Question by Mr. Anderson, manager of the company, of Witness Majors: 'Did I not tell you older men in a meeting that if you would give up your organization (Division No. 231—the old organization) I would get better wages and working conditions for you than the union would?' Answer: 'Yes, you told us that.' Question: 'And that was the time the old organization broke up?' Answer: 'Yes, about that time.'"

However, Mr. Majors, under oath, further testified that he was a member of Division No. 231 and that he is now a member of Division No. 616 and desired the establishment of an agreement between the association and the company. This evidence was conclusive to me that the company was opposed to membership of its employees in the association.

Mr. Piper, a witness, employee of the company, recently employed, testified that he was told by Mr. Anderson that he had better not join the organization, again conclusively showing that the company is opposed to the organization.

Further evidence was shown by the submission of a sworn statement of the Detroit United Railway Company to the United States Commerce Commission that the Detroit United Railway owns and controls the Sandwich, Windsor, Amherstburg and Tecumseh properties involved in this dispute. This evidence was in the shape of a certified copy of the report to the U. S. Federal Government. It was conclusive evi-

dence to my honourable associate, Judge Dromgole, that the Sandwich, Windsor and Amherstburg and Windsor and Tecumseh Railways are a branch of the Detroit United Railway, operated by the Detroit United Railway, and from which the Detroit United Railway receives the profits from operation. Thus it is conclusive, and I think my associates upon the Board agree with me upon that, that the system is a part of the Detroit United Railway, and copies of agreements were submitted in evidence, showing that of the five groups of street and electric railway employees the Windsor group is the only group that is not working for the company under agreement relations such as sought by Division No. 616 of Windsor. The other four groups are known as Division No. 26, Amalgamated Association, holding an agreement covering the Detroit street railway men, the Detroit and Flint interurban men, the Wyandotte interurban men, the Orchard Lake and Pontiac interurban men and the Flint city men, the latter a group of about the same number and operating under about the same conditions as in Windsor. This agreement provides 35c per hour for the members upon all of the lines mentioned as a maximum pay reached upon 18 months of service, the actual rates being: 27½ cents per hour for first six months' service men; 32½ cents per hour for the second and third six months' service men, and 35 cents per hour for those of more than 18 months of service.

Division No. 90, Amalgamated Association, embracing the employees of Port Huron and Mt. Clemens cities and the Rapid Railway and Shore Line Railway upon the interurban lines of which the same wages are paid as are paid in the cities of Detroit and Flint, and in Port Huron and Mt. Clemens the rates of wages paid are: 24 cents per hour for first six months' service men; 28 cents per hour for second and third six months' service men, and 33 cents per hour for those of 18 or more months of service. Statements and the records before the Board are in effect that the Port Huron city system compared very favourably with the Windsor city system.

A third group is known as Division No. 111 of the Amalgamated Association, having the same contract relations as the other two groups and the same wages as heretofore reported as enjoyed by Division No. 26 of Detroit. This local's agreement is with the Detroit, Jackson and Chicago Railway, a branch operating from Detroit to Jackson, Michigan, through Ypsilanti, with city cars operated in Ann Arbor, Michigan.

The fourth group is known as the Monroe Branch of Division No. 26, employed upon the Detroit, Monroe and Toledo and Monroe Pier lines. These men have a separate agreement, the preamble of which notes as the party of the second part "The Monroe Branch of Division No. 26, Detroit, Michigan, Amalgamated Association."

The company made no attempt to disprove the evidence before the Board of ownership and control of the Windsor lines after the submission on part of the petitioners of evidence that it is merely a branch of the Detroit United Railway, the same as the lines upon which are employed the members of the other four groups of the employees, although Mr. Anderson took the position at the beginning, when it was inferred by Mr. Reeves that it was all one property, that the Windsor property was not identified with the Detroit United Railway. No evidence, however, was shown to the contrary and the point was well established that it is a part of and really the Detroit United Railway. These facts impressed me that the Windsor street railway men should be accorded by your Board in its award the same rights and privileges and contract relations as are enjoyed by the other employees of the company. It is conclusive to me that these employees—the petitioners—are especially discriminated against, a condition that it is not consistent for this Government to endorse, any way encourage or sustain, and in this matter I must necessarily non-concur in and dissent from the opinion of my associates upon the Commission. I cannot consent to become a party to placing the Canadian Government and your administration in a position of condoning any such relentless discrimination against Canadian citizens.

Permit me to further report that in all of my knowledge and observation of the operation of the Industrial Disputes Investigation Act my attention has never come to a case in which there could exist a more flagrant violation of any presumed intent of this law not to deny the recognition that the organization of labour is a material condition. Here is a company that with four distinct groups of men recognizes and deals with their organizations, grants and respects the trade union agreement, and in the case of a fifth group, operated under the Canadian Government, the Government under this act is invoked by the company to sustain its refusal of the recognition that it extends to the four groups wherein the branches of the company are operated within the United States—Michigan and Ohio.

I hold that it was within the premise of discretion and authority of this Board, of which I am a member here reporting, to have entered an award finding for collective contract relations in which the collective capacity of the employees should be recognized. I feel that in this case, where the opportunity so unobstructedly prevailed, the majority decision in which recognition of the organization is denied the employees, is a withholding of equity and justice and a clear demonstration of how this law in its present form is converted to the convenience of "open shop" or union destroying employment. Here in this case the majority award has disarmed the employees and crippled them from effecting that justice for which the condition appealed wholly in their favour at

the time they found it necessary to invoke the procedure upon which was instituted this Board of which I have the honour of being a member. It appears to me that in this case the voice of the Government as sounded in the majority award is, in effect a stay to the progress of labour through organization.

While I cannot find language too strong in which to predicate my esteem of the honour and high standing of the gentlemen who served with me on the Board as your appointees, and I confess that I found the Hon. Judge Dromgole to be an estimable gentleman of the highest order in character and profound in his calling as a jurist, yet from the fundamentals of unionism and the nature of conditions with which we had to deal in this case, I cannot agree with them in their majority award, which has placed the Canadian Government in the attitude of sustaining the Detroit United Railway Company in its purpose to withhold recognition of the

collective capacity of its employees and refusing to recommend the consummation of an agreement between the parties to this dispute in which should be embraced full recognition of the associate character of the employees.

I, therefore, dissent from the majority opinion wherein is effected in the majority award the preamble of the agreement and hold that in lieu of said preamble should be entered the recognition clause of the proposed agreement accompanying the petition for the creation of this Board.

I concur in all further provisions and matters of the award relating to wages and working conditions embraced in the report of my associate, the Hon. Judge John O. Dromgole.

Very respectfully submitted by your obedient servant.

(Sgd.) MAGNUS SINCLAIR,

Member of the Board for the Employees.

Report of Board in Dispute Between the Fredericton and Grand Lake Coal and Railway Company and New Brunswick Coal and Railway Company and Employees

ON November 25 the Minister received the report of the Board of Conciliation and Investigation which was appointed to deal with a dispute between the Fredericton and Grand Lake Coal and Railway Company and New Brunswick Coal and Railway Company and their railway engineers, firemen, conductors, brakemen and yardmen, members of the Brotherhood of Locomotive Engineers and the Brotherhood of Railroad Trainmen, to the number of 20. The cause of the dispute was given in the employees' application as a demand on their part for the same rules and rates of pay as were in effect on the Canadian Pacific Railway system.

A Board was established on October 3, but proceedings in connection with the completion of the Board were delayed owing to a likelihood of a settlement being reached without the necessity of a Board inquiry. No settlement was, however, reached by the parties interested. The Board, as finally constituted on November 2, was composed of the following members: His Honour Judge R. D. Gunn, -Ottawa, chairman, appointed by the Minister in the absence of any joint recommendation from the other Board

members; Mr. Chas. D. Richards, Fredericton, appointed by the Minister in the absence of any recommendation from the employing company; and Mr. G. D. Robertson, Welland, appointed on the recommendation of the employees concerned.

A schedule of rules and rates of pay for employees in engine, train and yard service was drawn up and submitted by the Board as part of their report; it was recommended that the rates should be effective from July 1, 1916, and the rules from December 1, 1916. The closing paragraph of the report sets out Mr. Richards' views, as follows:

"I agree with the terms of the above report and schedule of rates and working rules, with the exception of the Rule No. 1, second paragraph thereof, wherein it provides for a mileage basis, and would eliminate that second paragraph of that Rule."

The report of the Board was accepted by the company, with the exception of sub-section 2 of Article 1. No word had been received from the employees as to their acceptance or rejection of the award up to the time of writing.

Report of Board

The text of the report of the Board in this matter is as follows:

IN THE MATTER of the Industrial Disputes Act and its amendments, and in the matter of a dispute between the Fredericton and Grand Lake Coal and Railway Company and New Brunswick Coal and Railway Company, employers, and their railway engineers, firemen, conductors, trainmen and yardmen, employees.

To the Honourable Thomas W. Crothers,
Minister of Labour,
Ottawa, Canada.

The board appointed on the application of the above named employees met at the Canadian Pacific Railway offices in Montreal on the seventeenth and eighteenth days of November, A.D. 1916, to consider the dispute outlined in the statement filed with the Registrar of Boards between the above parties, and were attended by Mr. Ash Kennedy, Assistant Grand Chief of the B. of L. E.; Mr. Howard Lynch, General Chairman of the B. of L. F. and E.; Mr. R. H. Cobb, General Chairman of B. of L. E., Canadian Pacific Railway System, and Mr. J. Swift, Secretary of Men's Committee, representing the Engineers and Firemen, and Mr. Albert H. McGovern, Chairman of B. R. T., representing Vice-President Murdock of the same order; Mr. B. J. Quilty, Vice Chairman of B. R. T., and Mr. W. A. Morrison and A. E. Barton, representing the Trainmen and Yardmen, and Mr. A. Sherwood, General Manager of the company's lines, representing the companies.

After carefully hearing the evidence, representations and arguments of all the parties, through their representatives at some considerable length, and fully considering the proposals and counter-proposals, towards an adjustment of the dispute between the parties interested, the undersigned members of the Board respectfully recommend that the schedule hereto annexed be the rates of pay and working rules made effective on the lines of the Fredericton and Grand Lake Coal and Railway Company and New Brunswick Coal and Railway Company, at the times set out therein, and until legally cancelled.

Dated the eighteenth day of November, 1916.

(Sgd.) R. D. GUNN, *Chairman.*

(Sgd.) G. D. ROBERTSON.

I agree with the terms of the above report and schedule of rates and working rules, with the exception of the Rule No. 1, second paragraph thereof, wherein it provides for a mileage basis, and would eliminate that second paragraph of that Rule.

(Sgd.) CHAS. D. RICHARDS.

Schedule referred to in annexed report:

Fredericton and Grand Lake Coal and Railway Company and New Brunswick Coal and Railway Company Rules and Rates of Pay for Employees in Engine, Train and Yard Service.

Rates effective July 1, 1916.

Rules effective December 1, 1916.

ARTICLE 1.

Ten (10) hours or less will constitute a day, over-time *pro rata*.

Ten (10) miles, when run, will be considered the equivalent of one hour.

ARTICLE 2.

All train crews shall have at least one conductor and two brakemen, except in cases of unforeseen emergency. The special Saturday service may be manned as at present. Spare men will be given all extra work.

ARTICLE 3.

Trainmen required to coal engines will be paid 30 cents per hour for such service, in addition to time made on day or trip, and enginemen required to hostle or repair engines at terminals will be paid at overtime rates on same basis.

ARTICLE 4.

The time of train and enginemen shall commence at the time they are required to report for duty, and do so report.

ARTICLE 5.

Train or enginemen called and cancelled before performing service shall be paid a minimum of three hours.

ARTICLE 6.

Employees in train, engine and yard service shall have choice of runs at change of time-table, in accordance with seniority from date of employment or promotion.

ARTICLE 7.

Train or enginemen deadheading shall be paid the time at one-half the rate of the corresponding men on the train on which they are deadheaded.

ARTICLE 8.

Grievances arising, or questions of interpretation of this agreement, will be adjusted as between the general manager and the employees' committee.

ARTICLE 9.

The rates of pay will be:

Enginemen	\$4.10 per day.
Firemen	2.70 per day.
Conductors	3.90 per day.
Brakemen	2.65 per day.

Accepted for the Railway Companies.

Accepted for the Employees.

Report of Board in Dispute between the Quebec Railway, Light, Heat and Power Company, Limited, and Conductors and Motormen in its Employ

ON December 8 the Minister received the report of the Board of Conciliation and Investigation which had been appointed to inquire into certain differences between the Quebec Railway, Light, Heat and Power Company, Limited, of Quebec, and its conductors and motormen, members of the *Fraternité Nationale des Employés de Tramway de Québec*. This dispute was stated in the application to affect 260 employees directly and 305 others indirectly. The dispute grew out of a demand on the employees' part for increased wage rates and certain changes in their conditions of employment.

The Board was established by the Minister on September 8, when Messrs. J. L. Perron, K.C., of Montreal, and Hector Laferté, of Quebec, were appointed members on behalf of the company and the employees respectively. The Board was completed on September 12 by the appointment of the Honourable Mr. Justice Dorion, of Quebec, as chairman. The last named appointment was made by the Minister in the absence of any joint recommendation from the other Board members. Mr. Perron was replaced on October 13 by Mr. Antonin Galipeault, of Quebec, the former having been unable to act.

The report of the Board was signed by all three members and recommended certain wages changes to be effective from December 1, 1916. The report dealt also with various other terms of employment and recommended that an agreement should be made along the lines proposed for a period of three years. The report as received in the Department of Labour was in French, a translation of which is given hereunder.

Report of Board

The translation of the text of the report of the Board in this matter is as follows:

To the Honourable
the Minister of Labour,
Ottawa.

IN THE MATTER of the dispute submitted to a Board of Conciliation under the Industrial Disputes Investigation Act, 1907, between the Quebec Railway, Light, Heat and Power Company and its employees, being conductors and motormen.

The Board of Conciliation and Investigation appointed in this dispute met on October 14 and 15, 1916, and heard the parties through their representatives.

The company was represented by Mr. Ralph M. Reade, and the employees by Messrs. Emile Lavoie, Eudore Gamache and Henry O'Neill.

The investigation lasted two days. One single witness was heard, on behalf of the employees, the matters in dispute having been sufficiently elucidated by the statements of the parties.

The discussion was conducted with much courtesy on both sides and with a real desire to come to an understanding.

On account of the large number of details contained in the dispute submitted to them, the members of the Board of Conciliation were forced to meet several times subsequently to the investigation to discuss such details and had to consult the parties on the propositions made from either side.

The members of the Board finally agreed on the following report, which could not be signed on account of the long delay which would have resulted from a meeting of the company's board of directors.

The matters submitted to the Board of Conciliation in the dispute between the Quebec Railway, Light, Heat and Power Company and its employees, conductors and motormen are settled in the following manner:

1. Conductors and motormen shall receive, as from December 1, 1916, an increase in wages of $2\frac{1}{2}$ cents per hour for each hour's work over the rates paid on November 30, 1916.

The scale of prices shall be as follows:

Upon entering the service, 21 cents per hour.

After one year's service, 22 cents per hour.

After two years' service, 24 cents per hour.

After seven years' service, 26 cents per hour.

2. All overtime after the regular day's work, and all special work which a man may be called upon to perform after the distribution of the regular work, shall be paid at the rate of 2 cents per hour above the regular pay.

3. An employee relieved from his work before the regular hour, by order of the Board or of the inspector, shall be entitled to his pay for the time he is supposed to make, except in cases of serious misconduct justifying his immediate suspension or dismissal.

4. Conductors and motormen, without distinction, shall be entitled to two uniform caps free of charge every year, one for summer and the other for winter use.

5. First and second year men shall pay half of the cost of the summer and winter uniform. After the second year uniforms shall be paid for by the company.

6. Winter overcoats which in the future are supplied to conductors and motormen must come down six inches below the knee.

7. The men will not be obliged to return the uniforms supplied to them free of charge when they leave the company's service.

8. No employee shall be required to do more than ten hours' service per day, without necessity.

9. Every employee shall be entitled to at least two hours' rest after working for six consecutive hours. The schedule of hours shall be prepared accordingly.

10. Employees shall be entitled to rest on Sundays each in turn, except in case of necessity.

11. One hour's pay shall be allowed every spare man who reports regularly at the time of changing crews in any day and who has not secured any work. Moreover 12 hours' work per week is assured to all such employees who thus report.

12. Cars must have heaters, protecting frames for the motormen, and, on the sides of open cars, eaves to protect conductors against the water falling from the roof.

13. Open cars will only be put in service between May 15 and October 1.

14. The vestibule where the motorman stands shall be enclosed, heated in winter and supplied with a curtain to prevent the reflection of lights.

15. Conductors and motormen shall be required to make only urgent and temporary repairs to brakes, sand boxes, motors and trolley.

16. Reprimands to employees before the public shall be avoided as much as possible.

17. Any employee suspended or dismissed on an unfounded complaint and reinstated shall be paid his full wages for all time lost.

18. No employee shall be dismissed on a complaint, or suspended, before being heard.

19. A detailed statement shall be given to any employee from whom a part of his wages is being held to pay for his uniform.

20. An employee shall not be forced to accept a promotion.

21. A suitable and clean waiting room, properly lighted, ventilated and heated, shall be put at the disposition of the employees.

22. On the occasion of labour conventions in Canada, funerals of their co-employees, Labour Day and the National Holiday, the employees shall be entitled to a leave of absence for three conductors and three motormen, provided the request is made in advance and men are found to relieve them. The length of the leave of absence for conventions shall be fixed in advance and must not exceed eight days.

23. Employees shall be paid on the last working day of December for the amount of wages due on the second preceding day for the last quarter of the year. The balance of the monthly wages shall be carried over to the following month.

24. Cars shall be supplied with a bell going from the forepart to the back of the same, to be used for signals from the motorman to the conductor.

25. Employees shall be admitted in the presence of the general manager to appeal from the superintendent's decisions, or to state any other dispute, after giving notice of the same to the superintendent.

26. Any employee shall be free to belong to the National Brotherhood of Street Railway Employees.

27. At meetings of the employees called by officers of the company, communications and instructions shall be given in both English and French.

28. Any employee leaving at the office an article he has received shall be entitled to a receipt.

29. Actions taken in connection with the 1916 strike shall be abandoned, and no further action shall be taken in connection with that strike.

30. The present agreement shall have a retroactive effect from December 1, 1916, and shall remain in force for three years, that is until December 1, 1919.

C. E. DORION,
Chairman Board of Conciliation.
ANTOINE GALIPEAULT.
HECTOR LAFERTE.

Quebec, December 6, 1916.

TRADE DISPUTES DURING NOVEMBER, 1916

DURING November there were 20 strikes in existence in Canada, involving 41 firms and approximately 6,063 employees. Fourteen of these strikes commenced during the month, while six were carried over from the previous month. Eighteen firms and

approximately 5,934 employees were involved in the 14 new disputes, while 22 firms and 129 employees were involved in the six disputes, the commencement of which dates prior to November 1. The estimated time losses resulting from the 20 existing strikes amounted to approxi-

mately 32,000 working days, 800 of which were occasioned through the continuation of the six disputes commencing before November 1. Nine strikes terminated during November, eight being strikes which commenced during the month and one of the old disputes. Settlements through negotiations were effected in the case of seven of the terminated strikes, while in one case the employees returned to work unconditionally, and in the case of the old dispute, while no formal settlement was reported to the Department, the information relative to the situation reaching the Department would seem to show that conditions were no longer affected by the strike. Eleven strikes remained unsettled at the end of November.

New disputes in November, 1916. — The table below shows the trades affected by the strikes commencing during November:

TRADES	No. of disputes	No. of firms.	No. of employees.
Mining	2	3	4,589
Clothing	2	2	305
Food, tobacco & liquor preparation.....	3	6	555
General transport.....	7	8	485
Total	14	19	5,934

Disputes beginning prior to November

Moulders, Vancouver, B.C. — On August 31, 1916, about 48 iron moulders went on strike to enforce their demand for an eight-hour day, which was refused by the following six firms involved: Ross & Howard Iron Works, Limited, Terminal City Iron Works, Vancouver Engineering Works, Limited, Letson & Burpee, Orr Foundry Company and the Sumner Metal Company. No formal settlement of this strike has been reported, but the information reaching the Department appeared to indicate that labour conditions had ceased to be affected by the dispute.

The following five strikes which commenced prior to November 1 and continued in existence during November, remained unsettled at the end of the month: machinists, boilermakers, blacksmiths and carmen of the Toronto, Hamilton and Buffalo Railway (the boilermakers resumed work on November 1, leaving the other three classes of mechanics still on strike); electrical workers, Hamilton, Ont.; machinists, Hamilton, Ont.; carpenters, Welland Canal; cigarmakers at London, Ont.

Disputes beginning during November

Coal miners, Taylorton, Sask. — On November 2 coal miners in the employ of the Western Dominion Collieries, Limited, at Taylorton, Sask., to the number of 89, went on strike to enforce their demand for an increase of 15 cents per ton for contract labour and 2½ cents per hour for day labour. As a result of negotiations a compromise settlement was reached whereby the men accepted an increase of 10 cents per ton for contract work and 2½ cents per hour for day work, work being resumed on November 6, 1916.

Coal miners, Crow's Nest Pass District, B.C., and Alberta Coal Fields. — On November 27, coal miners, numbering approximately 4,500, employed in the various mines of the Crow's Nest Pass and Alberta coal districts, ceased work owing to their demand for a war bonus of 25 per cent, based on the increased cost of living, presented to the Western Coal Operators' Association, being refused. A conference of the miners was called at Ottawa by the Minister of Labour, and they were requested to resume work pending an investigation into the increased cost of the necessities of life in the various coal mining districts. The majority of the miners had returned to work on December 1.

Clothing workers, Montreal, Que. — On November 13, about 250 clothing workers employed by the Fashion Craft Manufacturers, Limited, Montreal, Que., went on strike owing to the firm refusing to

recognize the union or to grant an increase in wages. The strike was unsettled at the end of the month.

Boot and shoe workers, Vancouver, B.C.—On November 16, about 50 employees of the J. Leckie Company, Limited, boot and shoe manufacturers, at Vancouver, B.C., ceased work to enforce their demand for increased wages. The employees returned to work on November 22, the firm promising to pay the employees at Christmas a bonus of 75 per cent of their wages.

Cigarmakers, Hamilton, Ont.—On November 16, 268 cigarmakers employed by four cigar manufacturing establishments, namely, the Tuckett Tobacco Company, Limited, Harper-Presnail Cigar Company, Limited, Hilda Cigar Company and the Schrader Cigar Company went on strike for increased wages. The strike was unsettled at the end of the month.

Cigarmakers, London, Ont.—On November 16, the cigarmakers employed by the Tuckett Tobacco Company, Limited, at London, Ont., to the number of 109, went on strike for increased wages. The strike was still in existence on November 30.

Cigarmakers, Montreal, Que.—On November 16 the cigarmakers employed by the Tuckett Tobacco Company, Limited, at Montreal, Que., to the number of 178, went on strike for increased wages. No settlement was reported at the end of November.

Freight handlers, London, Ont. — On November 1, 27 freight handlers in the employ of the Grand Trunk Railway Company at London ceased work to enforce their demand for an increase of wages from 20 to 25 cents per hour. Negotiations resulted in the company granting an increase of 1 cent per hour, and the men resumed work at the rate of 21 cents per hour on November 10.

Freight handlers, London, Ont. — On November 4, 15 freight handlers employed by the Canadian Pacific Railway Company at London, Ont., went on strike

for an increase in wages from 20 to 25 cents per hour. The strikers accepted the rate of 21 cents per hour offered by the company and resumed work on November 9.

Dairy drivers, Winnipeg, Man.—On November 11, the drivers employed by the Crescent Creamery Company, Limited, at Winnipeg, Man., numbering about 150 men, went on strike for recognition of their union, and a "closed shop." Negotiations between the parties resulted in the company agreeing to recognize the union to which their drivers belonged and the drivers waiving their demand for a "closed shop." The drivers resumed work on November 14.

Express drivers, Toronto, Ont.—On November 13, about 50 drivers in the employ of the Canadian Express Company, at Toronto, Ont., went on strike for increased wages. The company refused the increase demanded, with the result that the drivers unconditionally returned to work on November 16.

Freight handlers, Toronto, Ont.—On November 16, freight handlers to the number of 197, employed by the Canadian Pacific Railway Company at London, Ont., ceased work to enforce their demand for increased wages. After several conferences between representatives of the company and the freight handlers, the latter resumed work on November 21, pending a final adjustment of the matter in dispute.

Drivers, Winnipeg, Man.—On November 27, six drivers employed by the Swift Canadian Company, at Winnipeg, Man., went on strike owing to the dismissal of a fellow driver. The strike was unsettled at the end of November.

Teamsters, Saskatoon, Sask.—On November 28, about 40 teamsters employed by two firms, namely, the Western Distributors, Limited, and G. W. A. Potter, went on strike owing to their employers reducing their wages from \$2.50 to \$2.25 per day. The strike was unsettled at the end of the month.

TABLE OF TRADE DISPUTES IN EXISTENCE DURING NOVEMBER, 1916.

Occupation	Locality	Alleged Cause or Object	Number affected		Date of Commencement	Date of Termination	Method of Settlement	Result

REPORTS OF EMPLOYMENT BUREAUS

DURING October there was a decrease in the demand for workers as compared with September, as shown by reports from 119 employment bureaus—87 commercial, 11 public and 21 philanthropic. The number of vacancies notified to all offices was 47,287, a daily average of 1840.45 as compared with 2107.54 in September. The number of persons placed was 18,575, a daily average of 704.00, as compared with 822.42 in the preceding month. The proportion of the total vacancies filled to the total vacancies notified was 39.28 per cent, as compared with 39.19 per cent in September. As to employment for women and girl workers the number of vacancies notified was 8,247, a daily average of 329.88, as compared with 348.27 in September. The number of such workers placed was 2,351, a daily average of 94.04, as compared with 125.84 in the previous month. The proportion of vacancies filled to vacancies notified for men and boys was 41.53 per cent, and for women and girls 28.51 per cent, as compared with 39.89 per cent and 36.14 per cent respectively for September.

Each of the five principal centres of labour distribution—Montreal, Toronto, Winnipeg, Edmonton and Vancouver—showed a decrease in the demand for workers, the greatest declines being recorded at Montreal and Winnipeg. Of the smaller centres, Ottawa, Hamilton, Regina and Saskatoon reported heavier demands.

The number of persons who obtained casual employment through the Salvation Army, the Young Women's Christian Association and other agencies, was 2,162, a daily average of 83.86 as compared with 45.58 in September. The

number of casual jobs secured was 4,570, a daily average of 176.48 as compared with 132.08 in the preceding month.

EMPLOYMENT FOR CIVIC EMPLOYEES IN EIGHT CITIES

THE Department has received returns from eight city corporations indicating the number of employees temporarily employed on the city pay-rolls in the first fortnight of the month and the wages paid such employees. The returns cover the months of July,

August, September, October and November. The decline in municipal employment which has been noted in previous months continued in November, Ottawa and Regina being the only cities employing more workers in November than in October.

EMPLOYMENT IN THE BUILDING TRADES AS INDICATED BY BUILDING PERMITS

EMPLOYMENT in the building trades as indicated by the value of building permits issued in 35 cities showed an increase in November as compared with the preceding month, the total value of building permits rising from \$3,924,025 in October to \$4,031,008 in November, an increase of \$106,983, or 2.73 per cent. Grouping the returns by provinces, Nova Scotia, Quebec and Manitoba showed increases, the value of permits rising 29.93; 207.13 and 117.85 per cent respectively in these provinces. As compared with the corresponding month of last year, building permits in November showed an increase of \$695,651, or 20.86 per cent, the value for November, 1915, being \$3,335,357. As compared with November of last year,

there were gains in all provinces except New Brunswick and Ontario. In Manitoba, Alberta and British Columbia, the considerable increases of 361.57; 254.62 and 279.96 respectively were indicated, while Quebec showed a gain of 29.45 per cent. Of the larger cities, Montreal showed an increase of 145.25 per cent as compared with last month and an increase of 98.63 per cent over November, 1915. Winnipeg showed increases of 115.61 per cent and 351.34 per cent respectively as compared with October and last November. Toronto also showed increases over both months, while Vancouver showed a decrease of 74.45 per cent as compared with the preceding month, and an increase of 629.68 over November, 1915.

ESTIMATED COST OF BUILDING WORK AS INDICATED BY BUILDING PERMITS ISSUED IN THIRTY-FIVE CITIES.

MIGRATION AND SETTLEMENT

NEITHER the British Board of Trade nor the Canadian immigration officials have resumed the issuing of monthly statements in regard to immigration, and the only information available deals with the movement of persons, not United States citizens, between that country and Canada. Of persons other than citizens of the United States, 1,663 left the United States in October to take up permanent residence in British North America as compared with 1,684 in September. On the other hand 12,241 persons (other than citizens of the United States) departed from British North America in October to take up permanent residence in the United States as compared with 11,896 in September, indicating for British North America an outward balance of 10,578 in October of this class of persons as

compared with an outward balance of 10,212 in September.

Homestead Entries and Land Patents

Homestead entries.—During the month of October, 1916, there were 190 homestead entries in Manitoba; 294 in Saskatchewan; 319 in Alberta, and 31 in British Columbia, a total of 834, as compared with a total of 1,035 in September, 1916, and 1,436 in October, 1915.

Lands patented.—According to the Department of the Interior's statement of letters patent covering Dominion lands in Manitoba, Alberta, Saskatchewan, British Columbia and the Yukon Territory for the month of October, 1916, the number of patents was 1,293 and the number of acres 199,593.61, as compared with 1,390 patents and 220,545.34 acres during September, and 1,607 acres and 252,028.81 acres for October, 1915.

ORDER-IN-COUNCIL RESPECTING PRICES OF THE NECESSARIES OF LIFE

UNDER date of November 10, 1916, an

Order in Council was passed respecting the prices of the necessities of life. The Order in Council makes it illegal to limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in the necessities of life or to enhance prices or to prevent or lessen competition in the production or distribution of such necessities. The word "unduly" used in section 498 of the Criminal Code, which is the section dealing with conspiracies in restraint of trade, is omitted. The Minister of Labour is empowered to require from business firms detailed information as to stocks on hand, costs of production and distribution, prices and length of time stored. Municipal councils are empow-

ered to make investigations on their own account, and if they consider the circumstances warrant such action, the councils may refer information gathered to the Minister of Labour for further investigation. If returns are not forwarded as requested the Minister is empowered to investigate the business of the concern in question, and whenever in his opinion an offence against any of the regulations is disclosed the Minister is to submit the facts of the case to the Attorney General of the province in which the offence has been committed for such action as the Attorney General may be pleased to institute.

The original Order in Council—No. 2777—was amended in certain minor details by Order in Council No. 2957 passed on the twenty-ninth November, 1916.

The text of the original Order in Council, as amended, follows:

P.C. 2777 and 2957.

Order of His Excellency the Administrator in Council of the tenth November, 1916, respecting the High Cost of Living, as amended by Order in Council of twenty-ninth November, 1916.

His Excellency the Administrator in Council with a view to prevent the undue enhancement of the cost of living, is pleased, under the power in that behalf conferred by Section 6 of the War Measures Act, 1914, or otherwise vested in the Governor General in Council, to make the following regulations respecting the price, sale, control, storage, transport, etc., of the necessaries of life and the same are hereby made and enacted accordingly:—

1. For the purposes of these regulations the expression—

“Council” means the governing body of a municipality.

“Necessary of life” means a staple and ordinary article of food (whether fresh, preserved, canned, or otherwise treated), clothing and fuel, including the products, materials and ingredients from or of which any thereof are in whole or in part manufactured, composed, derived or made.

“Municipality” means any county, district, township, parish, city, town, village, or other area within a province which is governed municipally by a council or similar body.

“Person” includes natural persons and bodies corporate.

2. (1) No person shall conspire, combine, agree, or arrange with any other person,—

(a) to limit the facilities for transporting, producing, manufacturing, supplying, storing or dealing in any necessary of life, or

(b) to restrain or injure trade or commerce in relation to any necessary of life; or

(c) to prevent, limit or lessen the manufacture or production of any necessary of life, or to enhance the price thereof; or

(d) to prevent or lessen competition in the production, manufacture, purchase, barter, sale, transportation, insurance or supply of any necessary of life.

(2) Nothing in this section shall be construed to apply to combinations of workmen or employees for their own reasonable protection as such workmen or employees.

(3) Section 498 of the Criminal Code shall, as respect necessities of life only, until the repeal of this section of these regulations, be deemed to have been repealed.

3. (1) No person shall accumulate or shall withhold from sale any necessary of life beyond an amount thereof reasonably required for the use or consumption of his household or for the ordinary purposes of his business;

(2) Every person who shall at any time hold any necessary of life beyond an amount thereof reasonably required as aforesaid, and every person who shall hold for the purpose of sale, whether as manufacturer, wholesaler, jobber, retailer or otherwise, any stock-in-trade, as the case may be, at prices not higher than are reasonable and just.

Provided, however, that this section shall not apply or extend to any accumulating or withholding by any farmer, gardener, or other person, of the products of any farm, garden or other land cultivated by him; nor shall any manufacturer, wholesaler or jobber, because of anything herein contained, be under obligation to sell to other than such classes of persons as are accustomed to purchase from manufacturers, wholesalers or jobbers, respectively, nor shall any person be under obligation to sell otherwise than in accordance with the ordinary course of business.

4. The Minister of Labour may, by notice in writing under his hand or that of his Deputy, require any person who

operates, controls or manages any cold storage plant, packing house, cannery, factory, mine, warehouse, or other premises in which or in any part of which any necessary of life is prepared, manufactured, produced or held by such person for himself or for another, or who in any manner deals in any necessary of life, to make and render unto such Minister, within a time set in such notice, and such person shall make and render unto such Minister precisely as required by him, a written return under oath or affirmation showing in detail—

(a) the species and amount of any necessary of life held by such person at any indicated time or times, including any time preceding the making of these regulations, where and for whom said necessary is held, and if held for another, upon what terms held;

(b) the time when any or all of such necessary of life was prepared, manufactured, produced, acquired, or taken into possession;

(c) the cost of such necessary of life, including all charges and expenses of an overhead or other nature, affecting such cost;

(d) the price at which such necessary of life, if already sold, has been sold, or, if unsold, is held for sale;

(e) such other information concerning any necessary of life as the Minister may require, including a full disclosure of all existing contracts or agreements which such person, or his principal or agent, may have at any time entered into, with any other person, touching or concerning the sale or re-sale prices of any necessary of life, or the period of time during which any necessary of life should be held, as bailee or otherwise, before sale or re-sale, or limiting the quantity of any necessary of life which should be sold to any one buyer or combination of buyers or within any limited district.

5. Whenever the Council of any municipality shall declare by way of resolu-

tion that in its opinion excessive prices are being demanded within the limits of such municipality for any necessary of life, such Council may, by notice in writing under the hand of its Clerk or other authorized officer, require any person dealing within the municipality in such necessary of life, and locally situate therein, to make and render unto such Council within a time set in such notice, and such person shall make and render unto such Council, precisely as required by it, a written return under oath or affirmation, showing in detail—

(a) The amount of such necessary of life held by such person for sale or disposition within such municipality at any indicated time or times including any time preceding the making of these regulations;

(b) The time when any or all of such necessary of life was acquired, produced, or brought within or into such municipality;

(c) The cost of such necessary of life, including all charges of an overhead or other nature affecting such cost;

(d) The price at which such necessary of life is held for sale or at which any sales of part of the same or of a similar necessary of life have been made by such person within such municipality at any indicated time or times, including any time preceding the making of these regulations.

If, after the receipt of any such return, such Council shall consider that any circumstances justify reference of the return and a statement of the conditions to the Minister of Labour for further investigation at his hands, or if no return, or what the Council shall consider an untrue or misleading return, is made, such Council may, by way of resolution in writing expressing the facts and the Council's conclusion therefrom, report to such Minister.

6. (1) If, after the receipt by the Minister of Labour of any return made to him or to any municipality in pur-

ported compliance with these regulations, such Minister shall consider that any circumstances so justify, or if, after a return under these regulations has been required, none is made or none is made within the time set in the notice requiring such return or within such further time as the Minister of Labour may upon special application to him allow, the said Minister shall have power to investigate the business and to examine the premises, books, papers and records of the person making or failing to make such return, as the case may be, and, for those purposes such Minister may appoint an examiner or examiners and may authorize in writing any examiner so appointed to enter and examine the premises, books, records and papers of such person, and to take evidence under oath or affirmation of any person who such examiner may believe has knowledge relating to such matters as ought to have been included within a proper return according to circumstances.

(2) Every person who is in possession or control of any such premises, books, records or papers shall give and afford to such examiner admission and access thereto whenever and as often as demanded.

(3) No person shall in any manner impede or prevent or attempt to impede or prevent any such investigation or examination.

(4) Every person in any manner required by such examiner to give evidence under oath or affirmation touching or concerning the matters committed to such examiner for investigation shall attend before said examiner and give evidence whenever so required.

7. Whenever, in the opinion of the Minister of Labour, after an investigation and examination held in pursuance of the powers conferred by these regulations, an offence against any of these regulations is disclosed, said Minister shall remit to the Attorney General of any province within which such offence shall have been committed, for such action as such Attorney General may be pleased to institute because of the conditions appearing, certified copies of (a)

any return or returns and resolutions of any municipality which may have been made, rendered or passed pursuant to these regulations and are in the possession of the Minister and relevant to such offence and of (b) the evidence taken on any such investigation or examination and the report of the examiner.

8. (1) No prosecution for a contravention or non-observance of any provision of these regulations shall be commenced without the written leave of the Attorney General for the province in which the offence is alleged to have been committed, expressing whether such prosecution shall be by way of indictment or under Part XV of the Criminal Code.

(2) Such prosecution shall be commenced only in the county or municipality in which some or all of the necessary of life with respect to which the alleged offence was committed were situated at the time of the commission of the offence, or in the county in which the person charged resides or carries on business.

9. (1) Any person who contravenes or fails to observe any of the provisions of these regulations shall be guilty of an indictable offence and liable upon indictment or upon summary conviction under Part XV of the Criminal Code to a penalty not exceeding five thousand dollars, or to imprisonment for any term not exceeding two years, or to both fine and imprisonment as specified; and any director or officer of any company or corporation who assents to or acquiesces in the contravention or non-observance by such company or corporation of any of the provisions of these regulations shall be guilty personally and cumulatively with his company or corporation and with his co-directors or associate officers.

(2) For the purposes of the trial of any indictment for any offence against these regulations Section 581 of the Criminal Code, authorizing speedy trials without juries, shall apply.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

PRICES, RETAIL AND WHOLESALE, IN CANADA, NOVEMBER, 1916, AND IN OTHER COUNTRIES

PRICES were again steeply upward.

In retail food prices advances occurred in nearly all lines except meats, but were especially high in eggs, butter, cheese and potatoes. Bread and flour were also higher. Both coal and wood were substantially higher east of Winnipeg, and in Saskatchewan and Alberta prices were somewhat higher. The cost of a list of staple foods for a family of five averaged \$10.05 in the 60 cities of the Dominion as compared with \$9.30 in October and \$8.02 in November last year. All commodities were higher than a year ago except coffee, but the chief increase was in potatoes. Rent averaged higher than last year, increases appearing in all the provinces except Nova Scotia, Alberta and British Columbia.

In wholesale prices considerable increases appeared in Grains and Fodder, Dairy Products, Fruits and Vegetables, Miscellaneous Groceries, Textiles, Hides, Leathers, Boots and Shoes, Metals, Fuel, Miscellaneous Building Materials, House Furnishings, and Raw Furs. In Drugs and Chemicals there were some decreases, while Animals and Meats and Fish averaged only slightly higher. All groups were higher than in the same month during the past three years.

In other countries prices have continued to advance, so far as shown by statistics available, except that some foods declined in Australia and New Zealand in August; in Italy little change appeared in the seven foods included in the official record, during the next three months, after the slight decline in July; in Germany the slight decline in food prices shown for August accompanied a further extension of the system of rationing and maximum prices. In the United States foods have advanced steadily since February but more steeply since July.

More detailed information appears in the accompanying tables and in the following notes. The quotations of retail prices are obtained by correspondents of the *Labour Gazette* in each locality from dealers trading considerably with workmen. The figures for rent are for houses in the parts of the cities chiefly inhabited by workmen.

Retail Prices

Some lines of meats averaged slightly lower than a month before, but salt pork, bacon and lard were higher. In some localities stock was being marketed on account of the high price of feed. The high price of butter was reported as a factor in increasing the demand for lard.

Eggs, butter, milk and cheese rose to record levels. Fresh eggs reached as high levels as in previous years in mid-winter, but packed eggs averaged over 40c per dozen, 10 cents higher than in previous years. A factor in the high price of eggs was reported to be the lateness of the season all through 1916, with the result that after the autumn moulting hens did not commence laying as early as usual. In butter, milk, and cheese, the export demand for cheese was reported as the most important factor, together with comparatively small receipts due to the high price of grain and feed, except hay, while the root and corn crops were short.

Bread advanced in many of the cities and was considerably higher in the average. Flour was also higher but was somewhat downward toward the end of the month. Bread also receded slightly in some cities. Rolled oats was again higher in some of the cities in sympathy with the grain market. Rice declined in some cities in the western provinces. Tapioca was upward.

Canned tomatoes, peas and corn were higher in several cities which had not

*Coal, wood and coal oil. No allowance is made for the varying extent to which these are used in the different localities and provinces.

shared in the general advance in October, when wholesale prices had risen considerably. Beans were also considerably higher. Prunes and evaporated apples were slightly higher.

Sugar was again upward but not as high as last spring. Black tea advanced to some extent.

Potatoes were considerably higher, although in a few localities prices were lower when crops were put on the market. Shipments to Ontario where the crop was short raised prices in the eastern and western parts of the Dominion.

Coal and wood advanced considerably, anthracite coal being up to \$12.00 per ton in some cities in the Maritime Provinces, and at Windsor, Ont., while \$9.00 per ton was reached in many cities in Ontario. Supplies were reported to be short in many localities and the shortage of cars increased the difficulties in getting shipments. In bituminous coal there was also shortage and some advances in prices. Wood was also scarce in some localities and the high price of coal increased the demand. Coal oil was steady.

Rentals were unchanged.

Wholesale Prices

Grains and fodder.—Manitoba Northern wheat rose from \$1.87 at the end of October and was as high as \$2.00 per bushel for some time at the middle of the month, reaching \$2.05 on the twenty-second. Buying for export before the close of lake navigation was a factor on the market. The close of navigation, the scarcity of ships and heavy receipts of grain toward the end of the month lowered the price to \$1.87½. Ontario winter wheat rose to \$1.88-1.90 at Toronto, but receded 10c. Western barley rose from \$1.08 per bushel to \$1.13, but receded to \$1.10. Ontario barley rose to \$1.18-1.20. Western oats advanced to 67c and Ontario oats to 68c. American corn receded from \$1.17 per bushel to \$1.04. Flaxseed rose to \$2.73¾ per bushel on the thirteenth, but receded to \$2.54. Peas advanced to \$2.50 and rye to \$1.40-1.42. Hay as steady at Montreal, but rose at Toronto to \$13.00-14.00. Baled

straw advanced to \$9.00-9.50. Bran rose to \$31.00 and shorts to \$33.00.

Animals and meats.—Cattle advanced at Winnipeg from \$6.85 to \$7.25 per cwt., and at Toronto from \$8.50 to \$8.75. Dressed beef, hindquarters, advanced \$1.00 per cwt. to \$12.50-13.50, and forequarters were 50c higher at \$10.50-11.50. Plate beef rose \$1.00 per barrel to \$24.00-25.00. Dressed veal was 50c higher at \$17.50 for the best. Hogs declined to \$10.15 per cwt., but recovered in the last week. Dressed hogs were \$1.00 per cwt. higher at \$15.00-16.00. Breakfast bacon was higher at 27c per lb. Lard advanced to 20c per lb. Sheep rose to \$8.50-9.00 per cwt. Fowl was down to 12-16c, and large supplies were reported on the market owing to the high price of feed. Turkeys were up to 24-26c as compared with 20-20½c last year.

Dairy products. — Butter was 1½c higher at Montreal than at the end of October, for finest creamery, at 43½-44c per lb., and creamery solids were up to 44-45c at Toronto. Dairy prints rose to 34-41c per lb. at Toronto. Prices were therefore 6c to 13c higher than a year ago. Cheese rose from 22½c to 25c, nearly 8c per lb. higher than a year ago. Milk rose to \$2.75 per cwt. at Winnipeg, and in several other centres producers were reported to be raising the price owing to the shortage and high prices of all feed except hay. Strictly fresh eggs at Montreal rose to 60-65c per dozen and storage eggs were up to 43c per dozen at Toronto.

Fish.—Canned salmon was high as packers were sold out to a considerable extent and the export demand was strong. Fresh halibut advanced 1c to \$12 per lb. at the Atlantic coast. Salmon trout was firmer at 11-12c at Toronto, but whitefish was easier at 12-13c. Dry cod at Lunenburg advanced to \$7.75 per quintal. Supplies of both dry and salted fish were reported short. Export markets were good. Pickled herring advanced to \$5.50 per barrel and spring mackerel to \$14.00. Live lobsters brought high prices in the United States during the autumn.

f. Natural gas used. g. Lignite. h. Calculated from the price per 100 lbs. i. Including \$1.00 per ton for delivery.

Fruits and vegetables.—Early winter apples were up to \$5.00 and \$6.50 per barrel according to variety. Bananas advanced to \$2.00-3.00 per bunch. Lemons were steady and oranges were firmer. Evaporated apples rose to 10½c per lb. Currants were up to 20-22c per lb., and raisins to 10¼c for California Valencias. Prunes are firmer at 10½c per lb. Potatoes rose to \$2.25 per bag at Montreal, and after easing off to \$1.75 on receipt of heavier supplies recovered to \$2.15. At Toronto, Ontario potatoes were up to \$2.15-2.25 per bag, and some British Columbia potatoes were brought on the market at the same level. New Brunswick stock sold at \$2.25-2.35. Beans rose to \$7.00 per bushel for hand-picked, and onions advanced to \$2.50 per bag. Turnips were easier at 75-90c per bag. Canned corn rose to \$1.30 per dozen, canned peas to \$1.35, and canned tomatoes to \$2.02½-2.40.

Miscellaneous groceries.—Flour, spring wheat patents, advanced to \$10.50 per barrel at Montreal, and at Toronto to \$10.60 in small lots. Later the prices fluctuated, becoming easier as the wheat market receded at times. Winter wheat flour was up to \$9.50 per barrel. Bread advanced to 5½c per lb. at Toronto and to 6.4c at Victoria, B.C. Soda biscuits rose to 10c per lb. Oatmeal was up to \$4.00 per bag of 98 lbs. and rolled oats to \$3.75 per bag of 90 lbs. Rangoon rice was steady at \$4.30 per cwt. Tapioca was firmer at 9½-10½c per lb. Black tea was higher at 32-34c per lb. Sugar was up to \$8.03 per cwt. in barrels at Toronto. Glucose advanced 60c per cwt. in sympathy with the high price of corn. Honey was easier at 11½-12½c in 60 lb. pails. Maple syrup advanced again, reaching 14-15c. Soda bicarbonate was higher at \$2.75 per cwt.

Textiles.—Wool, Ontario, washed, was 1c per lb. easier at 42-45c, but unwashed wool was steady. Yarn rose to \$1.10 per lb. and a line of woollen underwear to \$12.00 per dozen. Beaver cloth was 15c per yard higher. Raw cotton advanced to 20.40c per lb. Grey cottons and prints averaged higher. Raw silk, Japanese and Italian, was higher, and machine silk thread rose 50c per lb. Jute was higher and the prices of hessians were firm. Flax fibre was 5c per lb. higher at 25-30c, tow rose to 12-14c, and flax sewing twine rose 2c per lb.

Hides, leathers, boots and shoes. — Calfskins rose to 35c per lb. and horse-hides to \$7.25-7.50 each. Tallow rose to 9c per lb. Sole leather was nearly 10c per lb. higher at 60c and another line was up to 63c. Harness leather was up to 60-68c per lb. and upper leather to 78-80c per lb. Boots advanced about 15 per cent and further advances were expected as a result of the steep advances in leather.

Metals and implements. — Foundry iron rose to \$33.00 per ton at Toronto. Bar iron advanced to \$3.50 per cwt. and steel bar to \$3.80. Black sheets rose to \$4.05 per cwt. and tinplates, coke, to \$7.75 per box. Wrought iron scrap rose to \$16.00 per ton. Aluminium was easier at 64½-66c per lb. Silver was higher at 71½c per oz. Anvils were higher at 15c per lb. Axes were firmer at \$8.00-10.50 per dozen. Carpenter's mallets were higher at \$2.05 per dozen. Soldering irons rose to 61c per lb.

Fuel and lighting.—Anthracite coal advanced to \$7.10 per ton at Montreal for egg size. Coke at Connellsville rose to \$7.25-7.75 for prompt shipments and \$3.75-4.00 for contracts. Later, however, prices were easier. Foundry coke was

*Nine commodities off the market, fruits, vegetables, etc. One line of spelter was dropped in 1915.

†Revised.

up to \$9.00 and \$6.00. Gasoline was slightly higher at 30c.

Building materials.—New Brunswick spruce deals were easier at \$19.00 per M. Lumber prices were upward in British Columbia by \$1.00 per M. for ship-lap and \$5.00 for flooring. The lumber trade in Ontario was reported better, but there was difficulty in getting stocks owing to labour shortage at the mills and car shortage. Hemlock was higher at \$20.00 for No. 1. Common building bricks advanced \$1.00 per M. to \$10.50 and fire bricks were \$3.00 to \$7.00 higher. Iron goods advanced again, soil pipe, iron pipe, nails, sash weights, iron wire and wire cloth being higher. Sash cord was up 5c per lb. and copper wire rose to 35-36c per lb. Barb wire was easier at \$4.25. Linseed oil was steeply upward, raw oil reaching \$1.20 per gallon. Turpentine was up to 74c per gallon. Prepared paints rose from \$2.25 to \$2.50 per gallon. White rosen was up to 4-5½c per lb. Shellac was again higher at \$2.40 per gallon.

House furnishings.—Furniture was higher owing to higher prices for metal parts and for mirrors. Crockery advanced about 12 per cent. Sad irons were firmer at \$1.00 per set.

Drugs and chemicals.—Alum was easier at 6c per lb. Brimstone was also down to 2¼c per lb. Carbolic acid was down 5c to \$1.20 per lb. Caustic soda was easier at 6½c per lb. Glycerine was down to 65c per lb. Opium was firmer.

Miscellaneous.—Raw furs were higher, muskrat being up to 35-40c per skin, raccoon to \$3.00-3.50, and skunk to \$3.50-4.00. English hops were higher at 40-45c per lb. Malt rose to \$1.50 per bushel.

Pulp and paper markets were higher. Ground wood pulp rose to \$40.00 per ton and bleached sulphite to \$160-180 per ton. Price lists for binder twine were withdrawn. Raw rubber advanced to 71c per lb. Laundry starch rose to 7c per lb.

Prices in Other Countries

In the United Kingdom prices were reported about five per cent higher at November 1 than a month earlier. A large proportion of the increase was due to the rise in potatoes, but milk, flour, bread, eggs, fish, butter and cheese were higher by from four per cent to nineteen per cent and bacon advanced two per cent. The increase in retail food prices since the beginning of the war, allowing for the relative importance of the various commodities was 78 per cent, but only 72 per cent if the advance due to the increases in duties on tea and sugar were deducted.

Wholesale prices in the United Kingdom as shown by the index numbers of the *Economist* and the *Statist*, London, were substantially higher than at the end of October, there being advances in nearly all the groups of commodities.

In the United States wholesale prices were also steeply upward as shown by the index numbers of Bradstreet and Dun, and the index numbers of foods prices of the *Annalist*, New York, and of Thomas Gibson. The index number of retail food prices of the United States Bureau of Labour Statistics for October 15 stood at 119 as compared with 116 for September and 103 for October last year.

In Australia both wholesale and retail prices were somewhat downward during the second and third quarters of the year. The index number of prices of

. July of each year. b. Foods c. 1901 = 1000. * Quarter beginning that month.

New South Wales domestic produce exported was slightly higher in August, as metals were higher while pastoral products were lower.

In New Zealand the Dominion Statistician's index number of retail food prices averaged higher in September than in August, but dairy products were lower, while the chief increases were in potatoes and in meats.

In Norway the prices of foods, groceries and fuel in August averaged 82 per cent higher than in July, 1914, as reported in *Sociala Meddelelser*, the journal of the Norwegian Department for Social Affairs, but allowing for the

relative importance of each commodity in the consumption of the average urban family as shown by an investigation in 1912 and 1913, the increase in costs is only 68 per cent. It is stated that the increase in the case of pork, fish, bread and fuel would have been greater but for the sale of these commodities by communes and provisioning committees.

In Switzerland, figures published in the Journal of the Swiss League for Reducing the Cost of Living show food prices in September 2.8 per cent higher than in July and 44.5 per cent higher than in June, 1914, while other necessities were 36.5 per cent higher.

FAIR WAGES CONTRACTS, NOVEMBER, 1916

DURING November the Department of Labour received for insertion in the *Labour Gazette* information relative to ten fair wage contracts, six of which were awarded by the Department of Public Works and four by the Department of Railways and Canals. Three of the contracts awarded by the Department of Public Works contained a fair wage schedule, while the other three and the four contracts awarded by the Department of Railways and Canals contained a fair wage clause providing for the rates of wages generally accepted as current in the locality where the work is to be performed. A statement is added for supplies given by the Post Office Department subject to the Regulations for the Suppression of the Sweating System.

Fair Wages Schedules

DEPARTMENT OF PUBLIC WORKS.

Public building, Ashcroft, B.C. Name of contractor, Edward Hunt, Victoria,

B.C. Date of contract, October 30, 1916. Amount, \$9,757 and \$1 per cubic yard for excavation and \$12 per cubic yard for concrete foundation walls, including forms.

Trade or Class of Labour.	Rate of Wages Not less than the following rates:
Stonecutters.....	62½c per hour, 9 hrs. per day.

Driver with two horses and wagon.....	50c " " 10 " "

All mechanics, labourers or other persons who perform labour in the construction of the work hereby contracted for, shall be paid such wages as are generally accepted as current from time to time during the continuance of the contract for competent workmen in the district in which the work is being performed, and if there is no current rate in such district, then a fair and reasonable rate, and shall not be required to work for longer hours than those fixed by the custom of the trade in the district where the work is carried on, except for the protection of life or property, or in the case of other emergencies. In the event of a dispute arising as to what is the current or a fair and reasonable rate of wages, or what are the current hours fixed by the custom of the trade, it shall be determined by the Minister of Labour, whose decision shall be final.

These conditions shall extend and apply to moneys payable for the use or hire of horses or teams, and the persons entitled to payment for the use or hire of horses or teams shall have the like right in respect of moneys so owing them as if such moneys were payable to them in respect of wages.

In the event of default being made in payment of any money owing in respect of wages of any mechanic, labourer or other person employed on the said work, and if a claim therefor is filed in the office of the Minister of Public Works and proof thereof satisfactory to the Minister is furnished, the said Minister may pay such claim out of any moneys at any time payable by His Majesty under said contract and the amounts so paid shall be deemed payments to the company.

The company shall post in a conspicuous place on the works under construction the general clause above mentioned for the protection of the workmen employed.

The company shall keep a record of payments made to workmen in its employ, and the books or documents containing such record shall be open for inspection by the Fair Wages Officers of the Government at any time it may be expedient to the Minister of Labour to have the same inspected.

DEPARTMENT OF PUBLIC WORKS.

Fair Wages Clauses

The fair wages clauses given below were inserted in the contracts immediately following.

Supply of sorting cases, Nos. 1257 and 1259 for post offices generally. Name of contractor, The Berlin Interior Hardwood Company, Limited, Kitchener, Ont. Date of contract, November 7, 1916. Amount, \$2,650.

Post office fittings, Palmerston, Ont. Name of contractor, The Berlin Interior Hardwood Company, Limited, Kitchener, Ont. Date of contract, November 23, 1916. Amount, \$1,228.

Wooden shed, etc., on No. 1 Pier at Berth 16, West St. John, N.B. Name of contractor, D. C. Clark, West St. John, N.B. Date of contract, November 27, 1916. Schedule of prices.

1916. Amount, bulk sum price of \$34,400.30 with schedule rate for additions and deductions.

Erection of five (5) double cottages at Grant, Thunder Bay, Ont., on the Transcontinental Railway. Name of contractor, Alexander Robertson, Ottawa, Ont. Date of contract, November 20, 1916. Amount, bulk sum price of \$35,469.80 with schedule rate for additions and deductions.

DEPARTMENT OF RAILWAYS AND CANALS.

Construction of a 40,000 gallon enclosed water tank at any or all of the following points on the Dartmouth to Dean's Branch of the Intercolonial Railway, namely: East Lawrencetown, Meagher's Grant and Upper Musquodoboit. Name of contractors, Thomas E. Stewart, Upper Musquodoboit, N.S., and Henry C. Redmond, Halifax, N.S. Date of contract, November 15, 1916. Amount, bulk sum price of \$2,574 (with schedule rate for backfill, foundation excavation and concrete) for each water tank.

Erection of a standard No. 5 station building at Boisdale, Cape Breton, N.S., on the Intercolonial Railway. Name of contractors, Rhodes, Curry Company, Limited, Amherst, N.S. Date of contract, November 4, 1916. Amount, bulk sum price of \$5,171 with schedule rate for additions or deductions.

Erection of five (5) double cottages at Cochrane, Nipissing, Ont., on the Transcontinental Railway. Name of contractor, Alexander Robertson, Ottawa, Ont. Date of contract, November 20,

POST OFFICE DEPARTMENT.

During the month of October, payments were made by the Post Office Department for the supplies below mentioned, subject to the Regulations for the Suppression of the Sweating System and the securing of payment to the working men and working women of fair wages, and the performance of the work under proper sanitary conditions.

Nature of Orders.	Amount of Orders.
Making metal dating stamps and type and making other hand stamps and brass crown seals.....	\$ 331.46
Making and repairing rubber dating stamps and type, also other stamps.....	56.51
Supplying stamping material and repairing stamping pads.....	1,220.74
Supplying post office scale.....	9.00
Supplying mail bags.....	475.00
Repairing mail bags.....	2,470.22
Supplying mail bag fittings.....	5,093.25
Repairing railway mail clerk's tin travelling boxes and steel portable letter boxes.....	91.80
Repairing miscellaneous articles of postal stores.....	4.80
Making and supplying articles of official uniforms.....	1,339.86
Repairing parcel post hampers.....	53.45

INDUSTRIAL ACCIDENTS DURING THE MONTH OF NOVEMBER, 1916

Based on reports of correspondents and on returns from the Board of Railway Commissioners, Department of Mines of Nova Scotia, Quebec, Ontario, Alberta and British Columbia, the Inspector of Factories of Ontario, Ontario Railway and Municipal Board, the Bureau of Labour of Manitoba, and the Saskatchewan Bureau of Labour. Industrial accidents reported in the press are also recorded.

THE industrial accident record for the month of November shows there to have been 74 workers killed or fatally injured and 388 injured during the course of their respective employments. The record for October was 58 killed and 356 injured, while that for November, 1915, was 57 killed and 546 injured. A comparison of the above figures show that there were 16 more workpeople killed and 32 more injured during November than in October, while there were 17 more killed and 158 less injured in November this year than in the same month of 1915.

The following is a record of the accidents of the month by industries and groups of trades:

STATEMENT OF ACCIDENTS DURING THE MONTH OF NOVEMBER, 1916, BY INDUSTRIES AND GROUPS OF TRADES.

Trade or Industry	Killed	Injured	Total
Agriculture.....	6	14	20
Lumbering.....	2	2	4
Mining.....	23	18	41
Railway Construction.....	1	1
Building Trades.....	3	19	22

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING NOVEMBER, 1916

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
<i>Agriculture:—</i>				
Farmer.....	Chatham, Ont.....	Nov. 6	1	Mangled by threshing machine.
".....	Kleinburg, Ont.....	" 13	1	" " " " " "
".....	Brock, Sask.....	" 2	1	Mangled by a tractor.
".....	Hibbert, Ont.....	" 18	1	Mangled by threshing machine.
".....	Dutton, Ont.....	" 20	1	Mangled by a threshing machine.
".....	London, Ont.....	" 20	1	Fell from barn roof.
<i>Lumbering:—</i>				
Sawmill employee.....	Humphrey's, N. B.....	" 7	1	Mangled by machinery
Sawmill employee.....	Fraser Mills, B. C.....	" 11	1	Fall.
<i>Mines, metalliferous works and quarries:—</i>				
Miner No. 16 col.).....	New Waterford, N. S.....	Nov. 2	1	Fall of coal.
Miner (No. 2 col.).....	Springhill, N. S.....	" 13	1	Thrown from cage.
Miner (No. 3 col.).....	Springhill, N. S.....	" 23	1	Fall of coal.
Quarry foreman.....	Chateau Richer, Que.....	" 13	1	Struck by falling tripod.
Asbestos miners.....	Asbestos, Que.....	" 9	2	Falling crane.

TABLE OF FATAL INDUSTRIAL ACCIDENTS OCCURRING DURING NOVEMBER, 1916—*Continued.*

Trade or Industry.	Locality.	Date.	Number.	Cause of Fatality.
Mining, etc.—(Continued).				
Miner.....	Capelton, Que.....	Nov. 6	1	Asphyxiated.
Quarryman.....	Montreal, Que.....	" 24	1	Crushed by falling rock.
Miners.....	Adanac Mine, Cobalt, Ont.	" 4	2	Cable of cage broke; cage fell to bottom of mine shaft.
Miner.....	Creighton Mine, Ont.....	" 3	1	Crushed by falling rock.
Miners.....	Cobalt, Ont.....	" 22	2	Explosion of "miss-fire" charge.
Miner.....	Timmins, Ont.....	" 22	1	" " " " " "
Miner (Albion mine).....	Stellarton, N. S.....	" 25	1	Struck by a mine car.
Quarry worker.....	Hamilton, Ont.....	" 22	1	Mangled by machinery.
Quarryman.....	Montreal, Que.....	" 25	1	Crushed by falling rock.
Miner.....	Coalhurst, Alta.....	" 10	1	Fell from mine car.
Miner.....	Coal Creek, B. C.....	" 8	1	Fall of rock.
Miner.....	Rossland, B. C.....	" 16	1	Fall of rock.
Miners.....	Britannia Beach, B. C.....	" 9	2	Struck by a pipe.
Miner.....	Nanaimo, B. C.....	" 25	1	Fall of rock.
Railway and canal construction.				
Laborer.....	Baie St. Paul, Que.....	" 11	1	Explosion of dynamite.
Building trades:—				
Carpenter.....	Magog, Que.....	" 7	1	Fell from scaffold.
Carpenter.....	Toronto, Ont.....	" 20	1	By a fall.
Carpenter.....	Trail, B. C.....	" 5	1	Fell from scaffold.
Metal, engineering and ship-building trades:—				
Millwright.....	Calgary, Alta.....	" 20	1	Mangled by machinery.
Emp. (Screw mfg. plant.).....	Hamilton, Ont.....	" 30	1	Mangled by machinery.
Emp. (Electric supp. plant).....	Toronto, Ont.....	" 29	1	Suffocated; fell into ash storage pit.
Metal worker.....	Welland, Ont.....	" ..	1	Died from injuries resulting from electric shock.
Metal worker.....	Pembroke, Que.....	" 16	1	Fell from scaffold.
Steel worker.....	Montreal, Que.....	" 7	1	
Lineman.....	Toronto, Ont.....	" 1	1	Electrocuted.
Food, tobacco and liquor preparation:—				
Flourmill employee.....	Vancouver, B. C.....	" 15	1	Struck by machinery shaft.
Flourmill employee.....	Montreal, Que.....	" 7	1	Mangled by machinery.
Steam railway service:—				
Conductor.....	Chilliwack, B. C.....	" 19	1	Fell from and run over by train.
Fireman.....	Phillips, N. B.....	" 14	1	Jumped from locomotive and struck by passing train.
Fireman.....	Melville, Sask.....	" 17	1	Fell from and run over by locomotive.
Brakeman.....	Africville, N. S.....	" 23	1	Run over by a train.
Brakeman.....	Hochelaga, Que.....	" 30	1	Crushed between cars.
Brakeman.....	Stony Point, Ont.....	" 14	1	Fell from and run over by train.
Yardman.....	Transcona, Man.....	" 3	1	Fell from and run over by cars.
Sectionman.....	Lorette, Que.....	" 5	1	Struck by a train.
Sectionman.....	Qu'Appelle, Sask.....	" 2	1	Struck by a train.
Employee.....	Fort William, Ont.....	" 11	1	Mangled by conveyor machinery.
Employee.....	(Big Valley Yard).....	" 23	1	Struck by a moving van.
Navigation:—				
Captain.....	Fort William, Ont.....	" 6	1	By a fall.
Deckhand.....	Montreal, Que.....	" 22	1	Drowned; fell from wharf.
Deckhand.....	Montreal, Que.....	" 15	1	Drowned; fell from vessel.
Miscellaneous transport:—				
Carter.....	Montreal, Que.....	" 5	1	Fell from carts.
Cab driver.....	Montreal, Que.....	" 24	1	Fell from cab.
Longshoreman.....	Montreal, Que.....	" 19	1	Fell into hold of vessel.
Longshoreman.....	Montreal, Que.....	" 7	1	Drowned; fell from wharf.
Miscellaneous skilled trades:—				
Factory employee.....	Montreal, Que.....	" 10	1	Fell into elevator shaft.
Factory employee.....	Toronto, Ont.....	" 27	1	Fell into elevator shaft.
Employee (explosive works).....	Drummondville, Que.....	" 16	1	Burned; fell into tank of sulphuric acid.
Papermaker.....	Sault Ste-Marie, Ont.....	" 18	1	Mangled by machinery.
Papermaker.....	Shawinigan Falls, Que.....	" 18	1	Crushed by roll of paper.
Emp. explosive factory.....	Nobel, Ont.....	" 14	1	Mangled by machinery.
Night watchman.....	Medicine Hat, Alta.....	" 2	1	Fell down elevator shaft.
Messenger boy.....	Montreal, Que.....	" 20	1	Jumping from elevator.
Office boy.....	Montreal, Que.....	" 15	1	" " " "
Elevator boy.....	Regina, Sask.....	" 15	1	" " " "
Unskilled labour:—				
Laborer.....	Orillia, Ont.....	" 2	1	Crushed by falling material.
Laborer.....	Ottawa, Ont.....	" 7	1	Struck by dump car.

WAGES CHANGES AND DISPUTES IN THE COAL MINING INDUSTRY
IN CANADA

WITHIN the past year a number of important changes have occurred in the rates of wages in the coal mining districts of Nova Scotia, New Brunswick, Saskatchewan, Alberta and in both the Crow's Nest Pass and Vancouver Island districts of British Columbia. The changes were all in the nature of increases which have been granted on account of the high cost of living. In the cases of the Dominion Coal Company's mines at Glace Bay, Cape Breton and Springhill, Nova Scotia, the Nova Scotia Steel and Coal Company's mines at Sydney Mines, Cape Breton, and the Western Fuel Company's mines at Nanaimo, British Columbia, the readjustments were accomplished without any interruption of mining operations through agreements between the operating companies and the employees' representatives. There were brief strikes in the Western Dominion Collieries, Limited, at Taylor-ton, Sask., and in the mines of the Manitoba and Saskatchewan Coal Company at Bienfait, Sask., in the months of October and November respectively, which were, however, followed by the conclusion of definite agreements for increased wage rates. During the months of July and August last strikes also occurred at Coal Creek and Michel, British Columbia, and at Galt, Coalhurst, Chinook, Nordegg and Drumheller, Alberta. An agreement disposing of these matters was reached in August between the Western Coal Operators' Association and District 18 of the United Mine Workers of America. Mining operations in the Crow's Nest Pass and Alberta districts were again interrupted by the recurrence of labour trouble in the month of November, but through the intervention of the Dominion Government an understanding was reached for the investigation of the increased cost of living, which, it is hoped, will be to the establishment of

more settled conditions in the mining communities. A strike of three weeks' duration occurred in the Acadia Coal Company's mines at Stellarton, N.S., in the month of April, which was terminated by the employees' reference of their claims for adjustment under the Industrial Disputes Investigation Act. There was a three weeks' strike of the coal miners employed by the Minto Coal Company, of Minto, New Brunswick, in the month of June, for increased wage rates, which was, however, unsuccessful. A strike occurred on December 4 in the Pacific Coal Mining Company's mines at South Wellington, British Columbia, for an increased scale of wages. The Department of Labour was informed by telegram that this trouble was settled on December 6 by the employing company agreeing to pay the same scale of wages as is in force at Nanaimo. No further particulars were available at the time of writing.

**Strike in Crow's Nest Pass and Alberta
Coal Fields**

Reference was made in the September number of the *Labour Gazette* to the arrangement made on August 5 between the coal mining companies of the Crow's Nest Pass and Alberta coal fields and District 18 of the United Mine Workers of America, for a revision of the previously existing terms of agreement to provide for increased rates of pay in these mines in the form of a war bonus, ranging from 5 to 12½ per cent. The Crow's Nest Pass and Alberta mines continued to operate under these new conditions throughout the ensuing fall. On Nov. 12, however, the Minister of Labour received a telegram from the officers of the United Mine Workers' District Executive Board of Fernie, B.C., regarding employment conditions, in the terms following:

"We, the Executive Board of District 18, United Mine Workers of America, in session here to-day, passed unanimously the following motion, which we transmit to you for your information and guidance: 'That we demand a war bonus of 25 per cent, to take effect from Nov. 1. In the event of the operators not conceding this direct request, submitted in writing, we offer as a counter-proposition the following, to take effect from same date, Nov. 1, that a committee be formed immediately comprised of three representatives of the Western Coal Operators' Association and three from the miners' organization, together with a representative or representatives of the Dominion Government, said committee to investigate the increased cost of living, and the war bonus paid to be commensurate with said increased cost of living ascertained by said committee. Further, that a copy of this resolution be wired to Premier Borden, the special committee recently appointed by the Cabinet to investigate the high cost of living, and the President and Secretary of the Operators' Association. One of the foregoing propositions must be decided upon by November 25.' On behalf of the Executive Board,

WM. GRAHAM, *President.*

T. BIGGS, *Vice-President.*

A. J. CARTER, *Secretary.*"

Mr. Frederick E. Harrison, the resident representative of the Department in Calgary, proceeded at once to Fernie to obtain, if possible, an agreement between the mine operators and their employees which would prevent any interruption of work. Mr. Harrison exerted himself to this end and various communications were also exchanged to this same end between the Department of Labour and the parties concerned. Notwithstanding these efforts a strike occurred of the mine operatives on November 27. In the meantime two representatives of the employees' union, namely, Mr. Wm. Graham, the District President, and Mr.

David Rees, International Board Member for District 18, were summoned to Ottawa for conference with the Dominion Government. Conferences were held with the miners' representatives on November 27 and 28 by the Minister of Labour and the Minister of Public Works, and announcement was made on the latter date that an understanding had been reached whereby the miners would return to work. In connection with this understanding an Order-in-Council was adopted in the terms following, and mining operations were gradually resumed in the various properties affected.

Privy Council, Canada.
(P.C. 2969.)

Certified copy of a Report of the Committee of the Privy Council, approved by His Excellency the Governor General on the first December, 1916.

The Committee of the Privy Council have had before them a report, dated November 28, 1916, from the Minister of Labour, submitting—in order that certain differences existing between operators and miners in several coal mining districts in British Columbia and Alberta may be amicably adjusted—that it is necessary and expedient that the prices at several points therein of certain necessities of life should be ascertained.

The Minister therefore recommends that Mr. Frederick E. Harrison, of Calgary, Alberta, be appointed a Commissioner under the provisions of Part 1 of Chapter 104 of the Revised Statutes of Canada, 1906, commonly called the Inquiries Act, to inquire into and to ascertain the wholesale and retail prices respectively of the staple and ordinary articles of food (whether fresh, preserved, canned or otherwise treated), clothing and fuel, at Fernie, B.C., Lethbridge and Calgary, Alberta, respectively, on the first day of July, 1916, and the twenty-second day

of November, 1916, and the percentage of increase, if any, in such prices between the said dates, and to report to the Minister of Labour with all convenient despatch.

The Minister further recommends that the Commissioner be vested for the purposes of this inquiry with all the powers conferred by the foregoing statute.

The committee concur in the foregoing recommendations and submit the same for approval.

(Sgd.) F. K. BENNETTS,

Asst. Clerk of the Privy Council.

Increased Wage Rates in Nova Scotia Coal Mines

On account of the increased cost of living and of the comparative scarcity of labour, an agreement was made on May 27 between the Dominion Coal Company, operating mines at Glace Bay and Springhill, N.S., and its employees, represented by the Provincial Workmen's Association, for a readjustment of the previously existing terms of agreement. Under this arrangement a six per cent wages increase was granted in June, with a promise of an additional four per cent increase in January, 1917. On account of the continued increase in the high cost of living, however, the Dominion Coal Company agreed with its employees on October 28 that the further increase of four per cent above mentioned should become effective from November 1. It was also agreed on October 28 that a further ten per cent increase in wages should be granted from November 1 in the form of a "war bonus," and that as an incentive to steady work an additional bonus of five per cent should be paid to producers of coal working underground, and including all men at the face, drives, haulage men and bottomers. Under these conditions, it will be possible for individual workmen to receive from 21 to 27 per cent increase over the scale which was in force last spring. The terms of the new agreement are as follows:

October 31, 1916.

John Moffatt, Esq.,
Grand Secretary, P.W.A.,
Dominion, C.B.

Dear Sir,—

I now confirm the understanding arrived at on Saturday, the twenty-eighth instant, between a joint committee (representing all the Lodges of the Provincial Workmen's Association at the collieries of this company), accompanied by the Executive, and this company as represented by the superintendents and myself.

The company makes the following offers, which we understand are accepted by the Provincial Workmen's Association, namely:

The four per cent increase in wages, which under the agreement of the twenty-seventh May last, becomes effective on the first of January, 1917, is instead to become effective and to commence from the first of November, 1916.

A ten per cent increase in wages is granted to the employees at the collieries, effective first of November, 1916, as a "war bonus."

In addition to the before-mentioned increase, and with the object of increasing the output of coal by the encouragement of steady work by the producers, the company will give a bonus of five per cent on the earnings of all producers of coal working underground who work 22 days out of each period of four weeks.

In the case where a man works 11 days in one fortnight he shall, provided he works ten days in the other fortnight of the same four-weekly period, but not otherwise, be given a bonus of 5 per cent on the earnings of the fortnight in which he works 11 days.

The application of the aforesaid bonus is limited to men who produce and handle coal underground, and includes all men at the face, drives, haulage men and bottomers.

The bonus shall be given so long as in the company's opinion conditions warrant its continuance.

These increases are additional to the rates set out in the several agreements or renewals referred to in the agreement of the twenty-seventh May, 1916, the validity and intention of which is in no way affected by these increases.

If this letter agrees with your understanding of our agreement, please signify your acceptance by signing the enclosed duplicate copy, and return to me.

Yours truly,

(Sgd.) D. H. MACDOUGALL,
General Manager.

Accepted:

(Sgd.) JOHN MOFFATT,
*Grand Secretary of the
Provincial Workmen's Association.*

A new agreement was also made during November between the Nova Scotia Steel and Coal Company and its coal mining employees at Sydney Mines, Cape Breton. The terms of the new arrangement are contained in the following letter from Colonel Thomas Cantley, President and General Manager of the Nova Scotia Steel and Coal Company, Limited, to Mr. Thomas J. Brown, in charge of the company's coal mines:

Sydney Mines, N.S., Nov. 8, 1916.

Mr. Thomas J. Brown,
Sydney Mines, N.S.

Dear Sir,—

We have your several favours with reference to the demand made by our colliery employees for an advance in wages.

After careful consideration, the Executive have decided, owing to the exceptional war conditions, to pay an advance as a war bonus of 12½ per cent to all underground employees and 10 per cent to all colliery surface employees.

While no demand has been presented, the wages of all other employees of the company at Sydney Mines will also be advanced 10 per cent.

These advances to be effective from the first of November of the present year, and to be paid on all earnings, whether on day, piece work or con-

tract, and to continue while the present conditions continue.

This advance, added to the advance granted our men earlier in this year, makes 21 per cent given to the surface employees, and 23¾ per cent to the underground employees; and added to the various advances given different classes from time to time during the past year, exceeds 25 per cent, and the Executive are of the opinion that this substantial increase should be satisfactory to all concerned.

Yours truly,

(Sgd.) THOS. CANTLEY,
President and General Manager.

There was a three weeks' strike in the mines of the Acadia Coal Company, Limited, of Stellarton, Nova Scotia, beginning on April 18, 1916. This dispute was terminated through the miners agreeing to a reference of their claims for settlement under the Industrial Disputes Investigation Act. There had, indeed, been unrest in these mines during several months preceding this strike on account of the employees being dissatisfied with the findings of a Board which had been constituted under the Industrial Disputes Investigation Act in November, 1915, to deal with their case. A number of increases had been granted by the company on the recommendation of the last mentioned Board in December, 1915. The second reference under the Industrial Disputes Investigation Act resulted, however, in a number of further increases, effective from May 15, 1916, including a raise of eight per cent in the cases of tonnage, yardage or consideration rates for miners, with a further increase of two per cent from January, 1917. A rate of time and one-half was also conceded for work on Sundays, holidays and overtime.

Coal Mining Strike at Minto, New Brunswick

A strike of miners employed by the Minto Coal Company, of Minto, New Brunswick, occurred in the month of June, 1916, for the enforcement of in-

creased wage rates. This strike continued in effect for upwards of three weeks without, however, accomplishing the object in view. A number of workmen of alien enemy nationality concerned in this dispute were taken into custody and later interned at Amherst, Nova Scotia. During the negotiations preceding the strike certain wages readjustments were made, including a bonus of $2\frac{1}{2}$ per cent per box at the end of each two months to any miners whose production reached certain proportions.

Increased Rates in Saskatchewan Coal Mines

A strike occurred on October 26 in the mines of the Manitoba and Saskatchewan Coal Company at Bienfait, Saskatchewan, which resulted in the miners obtaining an advance of 5 cents per ton, with a further promise that the Board of Directors would also consider an additional advance of 5 cents per ton on account of the increased cost of living. The strike lasted for two days.

A strike occurred on November 2 in the mines of the Western Dominion Collieries, Limited, at Taylorton, Saskatchewan, which resulted in the miners obtaining an increase in wages of 10 cents per ton, and day men an advance of $2\frac{1}{2}$ cents per hour, on account of the

increased cost of living. This agreement was concluded on November 6.

Coal Miners' Strike at South Wellington, British Columbia

A new agreement was made in September between the Western Fuel Company, of Nanaimo, British Columbia, and its employees in the Nanaimo collieries, for a period of three years from October 1, 1916. This agreement was made with a committee of the employees and provided for a five per cent increase of wages in the form of a war bonus applicable alike to surface employees and to underground operatives. The new agreement was also understood to have conceded free transportation to the operatives on the Reserve Mine train.

War Bonus Granted in Nanaimo Mines

The Department of Labour was informed by telegram of the occurrence of a strike on December 4 in the mines of the Pacific Coast Coal Mines, Limited, at South Wellington, British Columbia, for increased wages. A further telegram was received on December 7 to the effect that this trouble was settled on December 6 by the employing company agreeing to pay the same scale of wages as is in force in Nanaimo. No further particulars were available at the time of writing.

REVIEWS

Saskatchewan.—Fifth Annual Report of the Bureau of Labour of the Department of Agriculture of the Province of Saskatchewan for the sixteen months ended April 30, 1916. Regina. 30 pp.

The report notes that the principal industries of the province, with the possible exception of flour milling, have undergone such a change that it is almost impossible to make comparative tables for 1915 as compared with 1914. Nearly all brick and tile plants have been closed down and the planing mills have been working on box making, shelving and job work instead of sash and door work

as before. Steel and iron working plants have also undergone a remarkable change as to the kind of articles manufactured, the manufacture of shells contributing much to this change. The factories in the province coming under the provisions of The Factories Act now number 212 and the number of employees 3,782, of whom 383 were women workers. There was a larger number of male employees than during 1914, due largely to the opening of factories for the manufacture of munitions of war. Some difficulty was experienced in enforcing the nine-hour day provision for woman and girl workers, especially in

the laundries, as employers experienced difficulty in securing a sufficient number of woman workers to keep their plants running to capacity. The inspector of coal mines draws attention to the number of small mines that have been opened throughout the province, some 109 mines having been opened since the Coal Mines Act was first put into force. Accidents in factories were more numerous during 1915, due to the increased number of employees, and also to the introduction of shell manufacturing. The following is a comparative table of the industrial accidents occurring in the province during 1914 and 1915:

Trade or Industry.	1914		1915	
	Fatal	Non-fatal	Fatal	Non-fatal
Lumbering.....		4		16
Steam and electric railways.....	6	134	7	137
Laundry workers.....		2		2
Unskilled labourers.....		16		6
Civic employees.....	2	24	1	27
Milling.....		1		3
Railway construction.....	1	99	2	56
Electric workers.....		3		5
Woodworkers.....		4		6
Building trades.....	4	156		34
Grain elevators.....			1	1
Printing and publishing.....				2
Butchers, meat packing.....				26
Mining (coal).....	1	14	1	1
Not classified.....				12
Total.....	14	457	13	334

During the year a number of inspections of private employment agencies were made, and while minor irregularities were found, none were of sufficient importance to warrant proceedings under the Act. The total immigration into the province for the year 1915 was 5,812 as compared with 20,634 for 1914 and 44,543 for 1913. To secure workers for the wheat harvest the bureau made arrangements for bringing in men from British Columbia and for securing soldiers from one of the training camps; the usual cheap railway rates were put into effect. Contrary to expectations the number of harvesters secured greatly exceeded that of 1914. The table which follows shows the number brought in by the railways from the eastern and western provinces, as well as those secured

at the local or provincial offices of the bureau:

Points of supply.	1914	1915
Regina.....	2,228	2,112
Moose Jaw.....	1,499	1,400
Saskatoon.....	1,830	3,750
Eastern Canada.....	3,097	15,421
British Columbia.....		2,716
Sewell-Soldiers' Camp.....		1,700
Homesteaders (dried out area).....	3,024	
Total harvesters.....	11,678	27,099

Wages for farm labour were slightly higher than in other years, averaging \$40 per month at the opening of the spring and \$45 per month when work became general. During harvest and threshing wages from \$2.50 to \$3.50 per day were paid to good men.

Netherlands.—Werkstakingen en uitsluitingen in Nederland 1913-1914, uitgegeven door het centraal Bureau voor de Statistiek. Nos. 216, 224. The Hague; 1915.

According to this report there was in the Netherlands during the year 1913 a total of 400 strikes as against 265 in 1912, 205 in 1911 and 133 in 1910. The strikers numbered 23,990 in 383 strikes, and the number of firms concerned was 1,878, while the time loss was 428,826 working days for 391 strikes. As to the results of the strikes, 91 terminated in favour of the employees, 116 in favour of the employers, and 159 ended in a compromise, while in 27 cases the result was doubtful or unknown. The lockouts for the same year were 27 in number, the number of firms concerned being 404 and the number of workmen locked out, 6,171. The 27 lockouts lasted in all 844 days, and the time loss was estimated at 387,062 working days, to which must be added 66,830 days of enforced idleness until work was resumed after the lockouts, making a total time loss of 453,892 working days.

The number of strikes in 1914 was 250, involving 13,953 employees and 844

firms. The time loss was estimated at 302,386 working days. Fifty-nine of the strikes resulted in favour of the employees, 84 in favour of the employers, and 89 ended in a compromise, while in 16 cases the result was doubtful or unknown. The number of lockouts for that year was 21, involving 1,706 employees and 294 firms. The time loss was estimated at 59,014 working days, to which were added 1,099 days of idleness until work was resumed, making a total of 60,113 days.

Dominion of Canada.—Synopsis of the Laws of the Dominion of Canada respecting the Sale of Food

and other Commodities. Issued by the Department of Trade and Commerce. Ottawa, 1916. 16 pp.

The Department of Trade and Commerce has recently issued a convenient synopsis of the federal statutes bearing on the sale of food. Certain other commodities, such as blue grass seed, clover seed, hemp seed, timothy seed, feed, hay and straw, lime, and fish oils are included. The information, which is presented in tabular form, includes the legal weight, a brief statement of the existing law covering sale, and the penalty for violation of the law.

Canadian Food Laws

RECENT LEGAL DECISIONS AFFECTING LABOUR

A brakeman, while employed in coupling cars, -caught his foot, it was alleged, in an unpacked frog and was thrown down and killed by the train. The deceased's widow sued for damages and the trial judge awarded her \$7,000 on the findings of the jury which were that the defendant railway company was guilty of negligence in not packing the frog and that the deceased brakeman was not guilty of any contributory negligence.

The railway appealed from the verdict of the trial judge, arguing that the evidence showed the deceased had gone in voluntarily between the cars he was coupling and that it was owing to his negligence that he lost his life. It was argued on the other hand for the plaintiff respondent that the deceased had stumbled and fallen between the cars and that the defendant's negligence in not packing the frog was the proximate cause of the accident.

The appeal court held that the jury should have indicated how or why the want of packing of the frog was the cause of death, that there was a want of proper evidence of direct causal negligence and an absence of intelligible expression by the jury of what they thought was a reasonable inference, there being at least three explanations which

might have existed. A new trial was accordingly ordered. (*Ontario—Ryan v. Canadian Pacific Railway.*)

In the Practice Division of the Superior Court, Montreal, judgment was handed out recently allowing proceedings in an action which an Australian had taken to recover a sum claimed as wages. The plaintiff had recently been liberated from an internment camp, and his counsel asked that in view of his liberation a previous judgment suspending all proceedings should be set aside and the plaintiff's claim heard on its merits. The motion was opposed on the ground that while a proclamation of the Governor General in Council, dated August 15, 1914, declared that all aliens of enemy nationality should continue to enjoy the protection of the law so long as they merited the respect and consideration due to law-abiding citizens, the plaintiff having been interned as an alien enemy "of bad character," could not, even although he had been liberated, pretend to have the right to enjoy the protection of the law, namely, to sue in the courts. The plaintiff's counsel argued that the certificate of the man's liberation should be considered as reviving his right before the civil courts. The judge ordered the plaintiff to continue his action and the defendant to reply. (*Quebec—Gusset v. Laing.*)
